A man spoke of the difference in his home-life since Christian Science came into it, saying that now harmony and brightness had taken the place of sickness and discord, and that he could not be grateful enough for that change and for the weekly meetings which were so full of help and comfort for all present. Another man rose to give thanks that because of Christian Science his mother is today living, a strong, well woman. He added that perhaps his deepest sense of gratitude on this particular evening was for the fact that we now had authorized Christian Science literature in German, and that the *Herold* was so ably fulfilling its mission for Truth. A lady said that above all else she was thankful that Christian Science had been brought to Germany, and that so many were seeing its beauty and power. Another warmly endorsed that thought, for she had first heard of Christian Science here, and was very grateful for the help that it had been to her in her special work,—music. Others told of healing from throat trouble (the escape from an operation which had been pronounced absolutely necessary), healing of life-long difficulty with eyes, the healing of pneumonia, nervous headaches, and numerous other difficulties, chief among them being the claims of sorrow and sin.

The English service was equally interesting and earnest, and there were about the same number of testimonies. Thanks were given for our revised Science and Health, for the Concordance, Manual, and the publications of our Publishing Society; for the great blessing which has come through our last Communion season in Boston, and for many physical healings.

One said that she was unspeakably grateful for Christian Science, for it had taught her that she had a *right* to be happy, something which she never had been until she found Science. Now when it seemed as if she were not progressing as she should, she could always find encouragement in the thought of what she had been, and the contrast with the present manifestation helped her to persevere with fresh hope. Another told how her household was preserved from ill effects when poisoned food had been unwittingly eaten, through an understanding of the promise, "and if they drink any deadly thing, it shall not hurt them."

In this meeting, as in the one of Wednesday evening, the giving of thanks was about equally divided between our German and English speaking brothers and sisters. All mentioned the *Herold* with deepest appreciation, and expressed loving gratitude to God and to our beloved Leader, Mrs. Eddy, for this blessed truth, which is daily proving to us that "*Now* are we the sons of God."

Wise and Unwise Statements.

J. E. FELLERS.

ONE fruitful source of prejudice against Christian Science unquestionably lies in the fact that many well-meaning Scientists too often make statements which other people do not understand, and which might bear better fruit if expressed differently and with greater care.

On one occasion recently in a general conversation, a Scientist, among other things, said to a man who was hesitating about trying Christian Science for his sick wife, "All is good." The man looked somewhat puzzled, and the Scientist added, "Sickness is unreal—an illusion. Jesus never recommended a physician or medicine." The man was still puzzled, and manifested a spirit of criticism. He had been well impressed by some testimonies of healing he had heard and by a lecture he had read, but after the Scientist left the office in which these statements were made, the man challenged what had been said. Having declared himself against these statements which he did not understand, it required tact and judgment to overcome the discouraging effect they had produced.

The first statement "All is good," fell heavily upon his ears, and he questioned it because he could not believe

Copyright, 1904, by Mary Baker G. Eddy.

Digitized by Google

that sickness is good, and he had not yet learned that it is an illusion, and therefore no part of the All. The other statements, "Sickness is unreal—an illusion. Jesus never recommended a physician or medicine," aroused his antagonism even more. The following explanation was made and he was satisfied.

"Let us reason together in regard to the first statement, 'All is good,' which you think you do not believe. Your Bible plainly states that God made all that was made, and it was good, does it not?"

"Yes."

"Well, since you believe and admit so much, is not the first statement, therefore, 'All is good,' literally and scientifically true?" He made no reply, which meant that he had learned his first letter in a new alphabet and was studying its meaning.

"Now let's examine the second statement, 'Sickness is unreal—an illusion,' to which you object. Sickness is not good, is it?"

"No, it is not."

"Since it is not good, it is not true, for all truth is good. Since it is not true it is untrue, is it not?"

"Yes."

"Since it is untrue it is unreal, is it not?"

"Yes."

"Since it is unreal, it must be an illusion,—nothing,—is it not?"

"Yes."

"Do you not see, therefore, that the statement 'Sickness is unreal—an illusion,' is literally and scientifically true?"

He made no answer, but it was plain that he had learned his second letter in the new alphabet.

"Now let us consider your objection to the third statement, 'Jesus never recommended a physician or medicine.' You quote Jesus as saying on one occasion, 'They that be whole need not a physician, but they that are sick,' and you say that would certainly imply that Jesus recommended physicians. You will understand that text better when it is set in its proper place and read with the preceding and succeeding Scripture. Listen. In Matthew, ninth chapter, we read, 'And it came to pass, as Jesus sat at meat in the house, behold, many publicans and sinners came and sat down with him and his disciples. And when the Pharisees saw it, they said unto his disciples, Why eateth your Master with publicans and sinners? But when Jesus heard that, he said unto them, They that be whole need not a physician, but they that are sick.' Even if Jesus had stopped there and said no more, the theological and medical fraternities could not possibly construe his words to mean an endorsement or recommendation of physicians or material remedies, because it is not stated that any one on that occasion was sick. But he did not stop there. Immediately after the statement, 'They that be whole need not a physician, but they that are sick,' he added, 'But go ye and learn what that meaneth, I will have mercy, and not sacrifice: for I am not come to call the righteous, but sinners to repentance.'

"When Jesus said to the Pharisees, 'They that be whole need not a physician, but they that are sick,' he used this as an illustration which would appeal to their understanding, and by which he designed to show to them that the righteous (they that be whole) need not to be called to repentance, but sinners (they that are sick) did need that call. It would seem, also, that for fear the Pharisees might construe his statement, 'They that be whole need not a physician, but they that are sick,' to mean an endorsement of material remedies, he immediately added, 'But go ye and learn what that meaneth.' Christian Scientists have learned what he meant.

"This seems to be the only text in the New Testament which theology and medicine can possibly construe, or rather misconstrue, to mean that Jesus favored or recommended the employment of a physician. Do you believe that these time-honored schools have understood and interpreted that Scripture correctly?"

"No, I do not."

"This being the only statement of the Master which they have ever cited as a recommendation of a physician in case of sickness, and seeing clearly, as you do, that they have not interpreted that single passage correctly, is it not clear that our friend's statement, 'Jesus never recommended a physician or medicine,' is also true?"

He answered, "It seems true." He had learned another letter in the new alphabet. He has since learned a few words in the new tongue and has already begun to read. He understands also what Jesus meant when he said, "They shall speak with new tongues." He realizes now that before one can speak with a new tongue, one must first learn the letter, the word, and the meaning. The three statements to which he objected have become plain to him, and they no longer antagonize.

Serving on a Jury.

W. D. MC CRACKAN.

I FIND that Christian Science is a help to me in the proper discharge of my duties as a citizen. The call to be in the world, but not of it, involves the conscientious performance of public duties, such as voting, paying taxes, serving on juries, etc. A recent experience as a juror has proved to me that the greater insight into the workings of the human mind which Christian Science brings us has enabled me to become a better public servant, to be less easily deceived by appearances, and to detect fundamental motives more readily.

I have been deeply impressed with the tone of kindliness which has pervaded the court where I have been serving. On the first day of the term, the judge, in a speech full of courtesy and benevolence, expressed his desire to lighten the work of the jurors as much as lay in his power. He thereupon proposed a method of apportioning the time which he had never before tried and which was intended to make the work of attendance much easier for us. On the following day we were asked as a body to vote on this proposition, and the plan of the judge was unanimously adopted. This care for our comfort characterized the whole term and indicated the mental attitude which prevailed in the court room.

Among the prisoners brought to the bar were people of many nationalities and races, representing the heterogeneous population of a metropolitan city sent into court to receive sentence or acquittal. It was possible to read on the faces of the prisoners fear expressing itself in various physical manifestations, but the essential unity of man was only emphasized by these outward appearances. There were many confessions of guilt, there was much sorrow and contrition; the court room became the abode where divine compassion was pre-eminently in place. The greater the misery at the bar, the more evident was the true sense of compassion on the bench.

I confess that my respect for the law was heightened by my experience as a juror. Much crude justice was meted out in the sentences of the judge. Neither judge nor jurors seemed to be affected in their decisions by sympathetic mesmerism, but gave their verdicts and sentences in accordance with the law. The court attendants, far from showing any brutality, malignity, or vindictiveness towards their charges, displayed much care and forethought. Not an angry word was spoken by them. I noticed especially the face of the court officer who sat with the prisoners while they were being tried. It was a face from which the benediction of divine Love was reflected. Again and again I was reminded of the fact that Jesus was crucified between two malefactors.

Digitized by Google

With all the admirable features, however, of the practice in this court, it was evident to me that the system in use was not capable of uncovering the hidden motive and the secret sin entrenched behind evil mental methods. I could see that, though much was attained in the sorting and classifying of crime and in the punishment of it, a clearer understanding of the nature of man was requisite to master occultism. I thought of those words of our Leader when she said,—

"During this final conflict, wicked minds will endeavor to find means whereby to accomplish more evil; but those who discern Christian Science will hold crime in check. They will aid in the ejection of error. They will maintain law and order, and cheerfully await the certainty of ultimate perfection" (Science and Health, p. 96).

Thus it was that as a juror I learned to recognize more clearly than ever the inevitableness and the indispensable quality of Christian Science. But in the mean time I am not unmindful of the grand thought which underlies and overlies the whole business of our courts; namely, that expressed in the ancient Saxon saying, a man is innocent until he is proved guilty. In a higher and better way this noble verity is already working out the liberation of man from sin, sickness, and sorrow until such time as man's innocency, even from the sting of death, shall have been completely demonstrated. Even to-day it is never man who is sentenced, but the false, injurious, and demoralizing beliefs which have brought out their own fruits and are liquidating themselves through suffering and shame.

The True Sense of Gratitude.

A. PRICE.

"He that receiveth a prophet in the name of a prophet shall receive prophet reward."

He that receiveth a prophet in the name or character of a prophet, does so because he perceives that the prophecy is true and could have been uttered by no one less exalted than a prophet. This perception is of itself spiritual or prophetic vision and entitles the possessor to a prophet's reward—the understanding in some degree of the truth revealed.

It is thus seen that if we do not understand, at least in part, our Leader's relation to the cause of Christian Science, it is because we have not comprehended that Christian Science is a divine revelation, and thus we miss the reward of such knowledge. To say that Christian Science is a divine revelation and yet not to love the Revelator and believe that her mission is divinely appointed, is to doubt God's wisdom in selecting the one through whom to give this great revelation to the world. To criticise her motives and acts is to expose our own egotism in attempting to judge one whom, in accepting Christian Science, we have acknowledged to be best fitted among all people for the place she fills.

It was when their own faith was tried and found wanting that the Israelites murmured against Moses. After the mighty triumph at the Red Sea, the children of Israel sang with Moses, "I will sing unto the Lord, for he has triumphed gloriously," etc.

There was no confusion of ideas then, they knew that God was leading them; but when they came to Marah and the waters were bitter, "The people murmured against Moses, saying, What shall we drink?" And again, when tempted with hunger, "The whole congregation of the children of Israel murmured against Moses and Aaron in the wilderness," and said "Ye have brought us forth into this wilderness, to kill this whole assembly with hunger." They had so soon forgotten that God was leading them.

But Moses said, "The Lord heareth your murmurings which ye murmur against him: and what are we? your murmurings are not against us, but against the Lord."

When trials come we should not admit the sin of ingratitude and forget, like the Israelites, the passage of the Red Sea and all the blessings of the past which God has given us by the hand of His messenger, but remember that these very victories lead to Marah whose waters must be sweetened by Truth. "Neither murmur ye, as some of them also murmured, and were destroyed of the destroyer."

The Everlasting Arms.

LENA P. MORSE.

THERE has long been in my thought this little parable, if I may call it such. I am a mother, and in their baby days, the children would come and creep into my arms when their childish troubles seemed to press heavily. I would rock and sing and they were soon fast asleep.

But the moan and sigh and crying out, "Mamma! mamma!" showed that the dream-shadows were pursuing and seemed as real as the other troubles, and the knowledge of their refuge and safety was crowded out by what seemed to the sleeping thought to be true.

What was to be done? Awaken the child and tell it the truth. Say to it, "You are safe, dear; listen, mother is speaking, she is right here, you are in mother's arms. Wake up!"

I began four years ago to work out life's problems, including the mother-problems, with the Bible, as interpreted by Science and Health. It was not until then that I was awakened to know that, "Underneath are the everlasting arms," of the Father-Mother God (Love), and that I am safe under the covert of His wings.

So long as I stay awake I shall always realize the calm and peace that comes from such knowledge. If I go to sleep (become engrossed in materiality, choked with the cares of this world, open thought's door to the carnal mind) I shall believe the dream-shadows to be true. I shall sigh and moan and cry out with Job, "Why hast thou set me as a mark against thee, so that I am a burden to myself!"

We learn in Christian Science that "Now it is high time to awake out of sleep; for now is our salvation nearer than when we believed." "Awake to righteousness [right thinking] and sin not; for some have not the knowledge of God." "Awake thou that sleepest, and arise from the dead, and Christ [Truth] shall give thee light."

Sleeper, awake and listen, God is speaking to thee. "The eternal God *is* thy refuge, and underneath *are* the everlasting arms." "Behold, He that keepeth Israel shall neither slumber nor sleep."

Give men power and note what they will do with it, and you will learn the dominating element in their nature, motives, and affections. The love of power in the human breast well-nigh equals the love of money. It has ever been argued, that even the love of money exists because the possession of wealth leads to a sense of power. Individual, spiritual independence alone manifests the divine order and annuls that despotic tendency in human nature which ever tries to usurp the place of the supreme Mind and mentally dominate men and women.—CAROL NORTON.

[Written for the *Sentinel*.]

The New Year.

JULIETTE M. MINK.

FAREWELL, old year, farewell!
Go on thy way, and tell
To high and low,
With rhythmic flow,
That all is well.

Love still doth rule and sceptre wield,
And far and wide o'er every field,
Displays His banners, azure blue,
And whispers low, that God is true.

Moderation vs. Fanaticism.

THE Leader of the Christian Science movement has declared in "Science and Health with Key to the Scriptures" (p. 462), "Though gathering new energy, an idea should injure none of its useful surroundings, in the travail of spiritual birth." This statement is worthy of the profoundest consideration of Christian Scientists as well as the general public.

The adherents of this new religio-science have never been impressed that its introduction or propagation demanded any degree of fanaticism. It has always seemed wise that this new idea should not be hastily obtruded upon mankind, but that it should gradually leaven the lump of human consciousness, and that Christian Science work should be conducted in such a manner as not to produce upheavals in human affairs. It has never entered into the plans of Scientists to isolate themselves from the society of others nor to undertake the establishment of a government within a government, neither to advocate aggressive action against their opponents; but, on the contrary, they have deemed it proper to be law-abiding in every sense and to change human affairs by education rather than by coercion or arbitrary demands.

While Christian Scientists may differ to some extent from their neighbors in what constitutes preaching the gospel, they do not even entertain a wish to interfere with what is generally in vogue in this respect. Though they differ from some of their neighbors in their understanding of what constitutes the proper treatment of the sick, they have no inclination to interfere with the practices which are in common use in this regard. They are permitted to practise Christian Science to a sufficient degree to convince a large portion of the public and win for themselves the privilege of continuing in the propagation of their ideas and adding daily to the confidence reposed in them by the general public.

Christian Science not only involves an understanding of spiritual power, dependence, and provision, but a wise consideration of the "powers that be,"—of the customs, usages, and opinions which are already in existence in the material world. Christian Science is that which appears and appeals to us where we now stand, and in its disposition of the imperfect and material customs which obtain, it takes into consideration what is best for the general good, adhering strictly to the Golden Rule and to the commandment, "Love thy neighbor as thyself." This Science, therefore, will not admit of open rebellion, but if, perchance, its adherents believe themselves in possession of means and methods which are superior to those of their neighbors, they depend upon convincing the latter of this fact by education and demonstration, thereby winning them by just inducements instead of using force. ALFRED FARLOW.

Boston Times.

Buy St. Paul's Church, Washington, D. C.

THE Foundry M. E. Church has sold to First Church of Christ, Scientist, the old St. Paul's Church building soon to be vacated by the United Foundry and St. Paul's Methodist Churches, when they move into the new Foundry edifice on Sixteenth Street. The Christian Scientists expect to move into their first church edifice in the district early in February, giving up the hall which they now occupy in the Scottish Rite Building on G Street.

The price paid by the Christian Scientists for their new church home was not all in cash and it is not therefore possible to state it in exact figures, but it is estimated to be about $40,000. A cash payment was made and the society also gave to the Methodists the valuable lots owned by the society on the corner of Erie and Ontario Streets, Washington Heights, on which it was intended to erect a new Christian Science edifice.

The sale of the building is mutually very satisfactory. The Foundry Church people have been very anxious to sell since they determined to build their magnificent new church on Sixteenth Street, and as church property is always harder to sell than good residence property or office buildings, there has been some misgiving as to whether the value would be realized. It was felt that only a church would probably be willing to get anything like the value of the property out of its use.

The Christian Scientists, on the other hand, have been hampered by having no other home than a hall and have felt that their growth was greatly retarded. In the past year, notwithstanding this handicap, the society has increased largely in membership, and it has become evident that something must be done immediately. The St. Paul Church building fills all the wants of the society and more, being much larger than there is any present need for. The Scientists believe, however, judging from their experience during the past year, that it will not long be too large for them. There is also the possibility, though this has not yet been discussed formally, that the two Christian Science Churches of the city will unite and use the new building.

St. Paul's Church building was erected in 1894-1896, and is, therefore, one of the newest church buildings in the city. It stands on property that has been occupied by Methodist churches and congregations for thirty years, since 1874. The old wooden structure, which had long been a landmark in this part of the city, was torn down in 1894 and the present fine brick building was then begun.

The purchase of the building by the Christian Scientists has been under discussion for several weeks. The society formally agreed to purchase at the beginning of the present week, and the committee in charge of the sale for the Foundry Church accepted the terms offered at a meeting last Tuesday evening. The committee on sale for the Foundry Church was composed of Messrs. A. B. Browne, Theodore Harding, Jr., and Joseph T. Birch. Mr. Harding was the real estate man in the deal.

Washington (D. C.) *Daily Post.*

Christian Science teaches the science of right doing, and while it provides a way in which disease and suffering can be alleviated without recourse to hospitals and asylums, Christian Scientists recognize the present necessity for these institutions and, in many instances, are to be found among those who contribute to their support.

The Leader of the Christian Science movement, Mrs. Eddy, has satisfied many thoughtful and devoted Christians that her interpretation of the Scripture heals as well as saves. Christian Science is identical with the teachings and practice of Jesus of Nazareth. There is no question but what the "signs" which he promised should "follow them that believe," are being brought forth to-day in Christian Science. The fact should not be lost sight of that the great majority of Christian Scientists have had in the past much experience with medicine, as well as years of close association with other Christians, and are therefore qualified to exercise reasonably good judgment in matters pertaining to religious and medical beliefs. They know whereof they speak, and their judgment should not be lightly set aside.

Christ Jesus is the great exemplar, and his life and works are taken as the guide to right thinking and doing. Christian Science strives to make practical the "effectual, fervent prayer," which "availeth much." ALBERT E. MILLER.

Among the Churches.

A Church Building in Columbus, O.

On Wednesday evening, November 25, 1903, over two hundred and fifty persons assembled in the weekly experience meeting, in the auditorium of First Church of Christ, Scientist, in Columbus, O. It was the first service in the church building, and was held as a testimonial of the wonderful things God had done for this branch Church in the twelve months then drawing to a close; for within twelve months, following the lead of present necessity (which is always God's opportunity), Columbus branch had demonstrated its way, step by step, from rented quarters to the possession of a cement-block church building with a seating capacity of five hundred persons, and located within four squares of the Capitol Building, in the heart of the city. We have always said, that when standing room is at a premium, then would be the time to talk about a church building; and the time duly arrived. Beginning the year with an offering to the building fund of the Mother Church; with all the money in hand paid out as a first payment on the church lot; the necessities of the church seemed to cry, "Go forward," and the command came as it did to Moses, with a Red Sea of mortal mind between the church and dry land in front, with hills of mortal mind at either hand, and with fear trying to overcome us from the rear and lead us back to the bondage of Pharaoh and of Egypt. And yet there was always dry land for the advancing footstep, and the church passed through the sea dry-shod, and entered unharmed upon its further journey in the cause of the One Lord,—"Infinite Mind and its infinite manifestation" (Science and Health, p. 468).

The first service in the new church building opened with the singing of the beautiful hymn by our beloved Leader, "Shepherd, show me how to go," and the selections from Science and Health began with the inspiring and wonderfully suitable words, "To those leaning on the sustaining infinite, to-day is big with blessings" (Science and Health, Preface, p. vii). At the close of the lesson, there was read these words of greeting and Christian cheer from her to whom the whole world of Christian Science is so deeply indebted for all it knows of this truth:—

First Church of Christ, Scientist, Columbus, O.

May God unite your dear church in the scientific, sacred oneness of Himself, give it life from Love, and Christian charity and activity according to the demands of the Bible.

Lovingly yours in Christ,
MARY BAKER G. EDDY.

Pleasant View, Concord, N. H., October 30, 1903.

May the prayer of our dear Leader for the Columbus Church be fully met by a deeper consecration of those who are its members now, and those who may be its members hereafter.—E. HOWARD GILKEY, *Clerk.*

A Church Building in New Bern, N. C.

First Church of Christ, Scientist, of New Bern, N. C., recognizing the many blessings it has received during the present year from God, has started to build its new church edifice, a token of gratitude to Him, to our Leader, and to our Mother Church. The foundation and corner-stone are to be of granite from Concord, N. H., to remind us ever of the life of the tender, loving woman there who has so cheered us on through all. The corner-stone was ordered soon after Thanksgiving and the following letter from the First Reader of First Church of Christ, Scientist, Concord, N. H., will give the reason for our great joy at this hour. Most deeply have we been touched by this thoughtfulness on our dear Leader's part, and also by the generous gift of the stone, which arrived December 21, 1903.

The lot on which it will be built is splendidly located in a most central and desirable part of the city.

Correspondence.

The following letters are self-explanatory.

Concord, N. H., December 20, 1903.

First Church of Christ, Scientist,
New Bern, N. C.

Beloved Brethren:—By the loving kindness of our revered Leader you will receive the literature that should go into the box in the corner-stone of your new church.

As Mr. Frye's note concerning this dear thoughtfulness may be prized by you, I inclose it herewith.

You will also find within the account of the laying of the corner-stone of our Leader's gift to the Concord Church.

As I wrote you, Mr. John Swenson of Concord is the donor of the stone.

I do indeed "rejoice with you."

Fraternally yours,
IRVING C. TOMLINSON.

Pleasant View, Concord, N. H., December 18, 1903.

Dear Brother Tomlinson:—Mrs. Eddy says please select the Christian Science literature that should go into the box in the corner-stone for the Church at New Bern, N. C., and request Mr. Armstrong to send it to them, and for him to send the bill for same to Mrs. Eddy.

Yours fraternally,
C. A. FRYE.

Progress in New York, N. Y.

Fifth Church of Christ, Scientist, the "baby church" of New York, has outgrown very rapidly the cradle of its infancy, and we are on the eve of stepping out of the dear "upper room" where we have hitherto worshiped, in the Scotia Building, into larger, more commodious quarters. On the first Sunday of the new year we have planned to commence services in the church edifice 228 and 230 West 45th Street, known as the Episcopal Church of St. Mary the Virgin. The opportunity to obtain this building came to us unexpectedly, but after due deliberation, we secured the lease of the building for five years.

It seemed a very big step forward for a society still as young as ours to take; but the leadings of divine Love have been so unmistakable, that we have gone forward unfalteringly. Each step of the way has unfolded such a Divine purpose overruling and directing our human plans, that we have had no cause for hesitation.

With reverent love and renewed consecration we desire to prove our worthiness by our works.

We commend ourselves to the loving thought of our cherished Leader, Rev. Mary Baker G. Eddy, through whose clear teachings we were led to examine and accept this wonderful revelation of divine Love; and in the unity of peace we commend ourselves to the fraternal interest of our beloved co-workers in the great cause of Truth.

HORACE DILLON.

Progress in Phoenix, Ariz.

The Christian Scientists have opened their new rooms in the Post Office Building, and held their first services there November 8 at 11 A.M. We have a large audience room, reading room, etc. Our Wednesday evening services are well attended, and our circulating library, which was established two years ago, has been a great help in the work here. Copies of Science and Health go into the mountains and valleys, and are read with interest and good results. The work is growing in our city, and as we are willing to give up self and work for God, we shall realize the harvest. Our gratitude goes out to our Leader, for the benefits the world is receiving to-day through her teaching and guidance.—MRS. CATHERINE RUMNEY.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Impartiality Necessary.

We have before us a clipping from a newspaper published in one of the cities of the Middle West which reports the action taken at a recent regular monthly meeting of the local Ministerial Association. The clipping states that the ministers assembled at this meeting decided to appoint a committee from the churches of the city to investigate the practice of Christian Science, and to embody in its report that which shall stand as the opinion of the ministers regarding Christian Scientists; that the members of the Ministerial Association thought it time to make an expression of the matter, and that they have taken this means of getting at the truth. It also states that it is not intended that the committee shall be made up of ministers entirely, but shall consist as well of members of the congregations of the various churches of the city, and that it shall report in two weeks, which is deemed sufficient time to make the proper investigation and inquiry into the foundation of Christian Science.

Questions which naturally arise are, Upon what basis will this committee conduct its investigation? Is it intended that the report shall include the testimony of those who have been healed of serious disease, in some cases of disease pronounced incurable by physicians? Will the committee give heed to the testimony of persons who have been reclaimed from drunkenness and other sins to which they were in bondage for years? Will it take into consideration those who have been rescued from agnosticism and infidelity? If the experiences of all these people are considered by the committee, its report will be of value, not only to the Ministerial Association but to the world at large. If, on the contrary, the committee attempts to report only the views of those already prejudiced against Christian Science, its report will be valueless.

We are sufficiently optimistic to hope for an impartial report, one that will reflect credit on the committee, but we should be still more hopeful had the article before us stated that it was the intention to have at least one Christian Scientist on the committee.

There will be no difficulty about obtaining as much testimony as can be considered by the committee within the allotted two weeks. M.

The Unpardonable Sin.

Chief among the religious problems which have given rise to almost endless questionings is one the thought of which has made many a heedless sinner pause, and, in some instances, threatened to turn remorse for sin into despair. This problem is that of the unpardonable sin, a term which seems to contradict many statements found in Scripture, but which is so definite and unequivocal as to leave no doubt as to its vital import.

We are certainly encouraged to study the Scriptures by the fact that Jesus was a close student of the sacred writing of his time, and referred to them constantly. When obscure questions were brought to him, he "opened their understanding," and lifted thought to the spiritual sense of the Word. We know, too, that through our revered Leader's continuous and prayerful study of the Bible came the wonderful revelation of Truth which has brought healing from both sin and sickness to thousands who to-day find their deepest joy in the study and demonstration of the Word of God, having learned that with obedience and spiritual growth, every perplexing problem will at length be solved.

After we accept Christian Science we wonder how we could ever have been so dull and "slow of heart" all the while that we claimed to love Christ and to be his followers. We see many cases where error so darkens thought that there is bitter regret for some one wrong, and yet no true acceptance of the Holy Ghost or divine Science which alone can save from all sin. This error is obviously unpardonable so long as it exists in belief, for when the fountain of knowledge is opened in any age, ignorance is inexcusable.

In order to understand clearly Jesus' teaching on this subject, we need to turn to the accounts given in Matthew, 12 : 22–37, and Mark, 3 : 22–30, which show unmistakably that this sin is committed where mortal or carnal mind attributes its own wickedness to God, and, worse still, when it claims that the divine healing practised by Christ Jesus was a manifestation of sorcery or demonology. These statements of Jesus need no commentary, they stand to-day clothed with the majesty of Truth's perpetual demand for recognition and obedience.

The question for us is, How shall we avoid that sin which Christ Jesus declared to be more heinous than all others? The teaching of our text-book is in full accord with Scripture, and has its support when it shows that God never made sin or sickness, and that they are not found in His kingdom which is neither divided against itself nor against divine Principle. When this teaching is truly accepted, sin and disease disappear, even as in Jesus' time. It rests upon us, therefore, to give God the glory for the good which comes to us and to others who are healed by the Christ-truth. Those who impiously say that this Truth-healing is in any wise due to the action of the mortal or carnal mind which is "enmity against God," are, according to Christ's own words, guilty of that sin which shall not be forgiven, "neither in this world, neither in the world to come." This sin is its own punisher, because it shuts out from the offender the moral, physical, and spiritual healing which follows the acceptance of Truth.

To-day many are gladly accepting this message of healing, and this is evidence that the demands of apostolic Christianity are being deeply felt. The wonder is that any hesitate, and the yet greater wonder is that any who have accepted Christian Science should ever question the efficacy of the truth in their own experience, or what is worse, attribute their relief from suffering to anything less than the power of divine Truth.

One may be sinning either consciously or ignorantly, but so long as he acknowledges that God is right and he is wrong, his redemption is not afar off. But what hope is there for him who, like Saul of Tarsus, resists Truth, and would stay the blessed healing influence which proves Immanuel,—God with us? There is none until the light which is "above the light of the sun" destroys his sense of materiality, and he is willing to heed the voice of Truth which says, "Receive thy sight."

Christian Science declares to the world that its healing comes from the secret place of the most High, where the seraphim proclaim, "Holy, holy, holy is the Lord of hosts: the whole earth is full of his glory." When this message reaches the hearts of the sick and the sinful, and when they see devils cast out "by the spirit of God," the sin of doubt and denial no longer can deceive, and by their words of acknowledgment they are not "condemned," but "justified." K.

Christ and the Evildoer.

A well-known judge has recently said, "I do not believe in putting people to death for any crime. They should be properly confined so they can hurt no one. If a man lives after death, by putting him to death we only transfer him to another state of existence. May he not be just as mischievous there as he was here? That may be an amusing suggestion, but it is logical. What right have we to put him into this other existence?"

This strong word from a judicial authority is one of many evidences of a very great change in the eschatology of the general thought. Though it still has a place in much theological statement, the idea that death settles any problem is rapidly passing. Men now see that the mere ending of so-called bodily life can have nothing to do with the acquirement of character, no determinative relation to humanity's loves and hates, and hence that while the suicide may jump out of this arena of experience, he finds thereby no escape from himself, from duty, from the law of being, or from God.

The consideration shown by the judge for those into whose presence capital punishment may transfer the criminal, is rather new, but if it is wrong for one nation to transport its undesirables to the domain of another, thus selfishly freeing itself from a problem which its own unrighteous conditions may have begotten, then it must be wrong for us to free ourselves of difficulties by flinging them bodily into a future state. So-called Christian peoples are constantly taking the lives of criminals, and yet Christian sentiment stands for a gospel of healing and reformation which makes it impossible for us to think that Jesus or his disciples would have entertained a thought of treating the culpable and the degraded in this way. This so-called short cut out of a difficulty finds, with many another, no approving consent in the teaching of our Great Exemplar, and it could not, for the reason that it is a practical denial of the power of Truth and Love to save and redeem humanity from its every low state and condition. Among the momentous facts which have made the hill of Calvary the highest summit of history, is this: that there, in the hour of agony, Jesus discovered in one of the malefactors whom men had condemned to a dreadful death, a heart so responsive to divine Love as to make it possible for the suffering Master to utter those memorable words: "To-day shalt thou be with me in Paradise."

No cowardly yielding to defeat in the warfare with sin finds indulgence in the Christ-thought respecting the manifestations of sin. All are to be brought into subjection to the power of Love, and that whether they be without or within. One of the most distinctive fruits of Christian Science is the heroic attitude which it begets toward what have seemed to be the insoluble problems of the race and of individual experience. The spirit it inculcates is indicated in the words of our Leader, when she says, "Rise, in the strength of Spirit, to resist all that is unlike God. He has made man capable of this, and nothing can vitiate the ability and power divinely bestowed. . . . Let Christian Science instead of corporeal sense, support your understanding of being, and this understanding will supplant error with Truth, replace mortality with immortality, and silence discord with harmony" (Science and Health, pp. 393, 495).

Responding to this appeal and in the strength of this spirit, Christian Scientists are courageously facing many a situation, and undertaking the solution of many a problem which they now know to lie within the scope of the gospel, but which they once had neither the conscience, the courage, nor the understanding to meet. W.

A Gift from Mrs. Eddy.

MRS. MARY BAKER G. EDDY has given one hundred dollars to the Congregational Church of Northfield and Tilton.—*Concord* (N. H.) *Monitor.*

Letters to our Leader.

Boston, Mass., December 25, 1903.

Dear Mrs. Eddy.

Beloved Leader:—The enclosed extract from a letter, received on Christmas Eve, I know will interest you, and so I send it with a heart full of gratitude to God, and to the faithful Shepherdess, who so tenderly tends all her flocks, large and small, and has a room in her heart for them all.

I am, with profound reverence and love,

Yours for the sacred Cause,

AIMEE E. LUNDGREN.

Extract from a letter (Translation from Swedish).

Gothenburgh, December 11, 1903.

Dear Miss Lundgren:—Your kind communication, and the required copy of the *Journal* I had the pleasure of receiving yesterday. As I have access to the *Journal* here at the library, I do not need it especially for myself. However, requisitions may soon appear from this city, for reasons which I will now mention. Scarcely a month ago an advertisement appeared in the *Handelskidningen,* with the heading "Christian Science," and containing a request to reply to "Engineer." It was found to be the "German family from Christiania," which you mentioned in your letter. The outcome of my reply was a visit from the "Engineer." They had learned of Christian Science in Berlin, and were seeking congenial persons here. The further consequence was the calling of a meeting. It was here learned that Christian Science was already known to several families. A brother of a Mr. Fredrikson had arrived here a couple of months ago, on a visit from London, where he and his wife are members of Second Church of Christ, Scientist. He had interested some friends, who had since been meeting to study the text-book and other writings. At this meeting about twenty persons were present. It was decided that they should meet every Monday at 8 P.M. in a rented room, and there have now been three meetings. The meetings are commenced and ended with a hymn. . . . Mr. Bergstrom has read a translation from a paper, Mr. Wallin has addressed us, and I have translated from Science and Health. You see from this, that the matter is already started. But none of the participants are regular adherents of Christian Science. I believe that interest is awakened in the community; I have also learned that a number of families are postponing their uniting with us, until a person fully familiar with the movement and practised in healing will take charge.—O. L. LOFGREN.

New York, December 25, 1903.

Our Dear Leader:—My heart fills with gratitude this joyous Christmas morn, in knowing what the real meaning of this grand revelation is bringing to me and mine. No present ever visible to the human eye could give me the happiness that I feel this morning through the understanding that is gradually coming into my consciousness through reading your wonderful book, "Science and Health with Key to the Scriptures."

Three years ago it was spoken of by a friend who was healed of consumption. I purchased a copy and was healed almost immediately, simply through reading and spiritually grasping its meaning as far as I could, and each day it becomes clearer and clearer. I had suffered for twelve years with indigestion, and from asthma for about four years. I had worn glasses for four years also. All of these ailments left me in about two weeks.

I have never taken a treatment. Truth has been found and revealed through your beautiful words.

To-day my heart is full of thanksgiving to God and to you, as the Discoverer; for this light once seen, in its glorious golden rays, can never be taken from me. Dear Leader,

Digitized by Google

all the love that comes to me, I send to you, to help sustain, and aid you in this grand work.

Ever with you, in Christ-truth,

B. H. NORTON.

Rev. Mary Baker G. Eddy,
Concord, N. H.

[From a little child.]

Concord, N. H., December 24, 1903.

Dear Mrs. Eddy:—I want to tell you a little demonstration. I went to the dentist's to have two teeth filled, and while he was working I said, "God is Love! God is All in all," and repeated the scientific statement of being. And it did not hurt me a bit. We love you so much for telling us about God.

Lovingly,

MARGARET CAMPBELL.

Omaha, Neb., December 21, 1903.

Rev. Mary B. G. Eddy.

Dear Leader:—Please accept this small token of love and appreciation from one who has been healed of so-called incurable diseases, such as consumption, catarrh, cavities in the teeth, and muscular rheumatism.

This healing was brought about by three days' reading of the Bible and Science and Health; it being the first I heard or knew of Christian Science.

With much love,

EVA THOMPSON.

New York, December, 1903.

Beloved Teacher and Leader:—Feeling such a debt of gratitude and love, it has always been a great pleasure, now and again, to send you some personal reminder. It is a sacrifice at this holiday season to take self out of it and let my love to my teacher be expressed this year in a subscription to the building fund of the church in Concord. This love and appreciation grow deeper as the years go on, as I am better able to realize more the marvel of love and patient endurance, beyond human understanding, that has held you firm at your post, holding aloft to a world the truth that must have been true to you, so true that no mortal power has been able to pull down the "standard," even for an instant. Each fresh assault has caused it to radiate with greater glory until even now its beams extend to the uttermost parts of the earth.

May the honest faith, the true understanding, the love that faileth not, still uphold Truth's faithful sentinel and exponent, strengthen and bless our Leader until she is crowned with victory. "Love triumphant over all" is the holiday greeting of one of your loving students.

Lovingly yours,

EFFIE ANDREWS.

The Church in Concord.

The interior of the new Christian Science Church has been closed in so that work may continue there through the winter.—*Concord* (N. H.) *Monitor,* January 1.

The slaters commenced work on the roof of the new Christian Science Church this morning.

Concord (N. H.) *Patriot,* January 1.

The copper finish is being placed on the eaves of the new Christian Science Church Building, and the outside is commencing to wear a completed appearance.

Concord (N. H.) *Patriot,* January 2.

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

Testimonies of Healing.

I send this testimony in token of my gratitude. In the summer of 1900, I doctored about two months for a trouble which I finally began to recognize had a mental cause, and I knew that medicine could not remove it. Just at this time Christian Science was brought to my attention, and I tremblingly gave up material remedies, and took absent treatment. I would hardly have had the courage to do this, if I had not known of the healing by Christian Science of two of my relatives. I shall always remember the healing of constipation which I experienced soon after commencing treatment. If ever a doubt of the healing power of Christian Science entered my mind it was dispelled immediately by the remembrance of that healing. Nevertheless it was the mental and spiritual uplift which accompanied the experience that impressed me most. Though it was a beautiful morning in September, I had not realized its beauty, but was thinking how weak and miserable I felt, and that as soon as I had completed a certain piece of work, I would lie down the rest of the day, but now everything was changed. After the healing I became conscious at once of the beauty of the morning, I felt so happy, hopeful, and strong, and immediately planned out some sewing and went to work at it. When I compared this healing and its effects with former times while under *materia medica,* there was no doubt left in my mind as to which system of healing I should hereafter trust. Since then I have had better health, been stronger, and have been able to do more work than for a number of years before.

Last winter when suffering from an attack of grip so severe as to cause fear of pneumonia, I had absent treatment, and instead of being confined to the bed for several days, and unable to do anything for a week or more afterward, as had always previously been the case, I was able to do my work every day, and when the ailment was destroyed, I had no sense of weakness, but felt stronger than before.

My children never desire anything but Christian Science treatment since the eldest, after trying several remedies for sores which broke out on his face and body, and which became worse all the time, was healed almost immediately by Christian Science,—every sign of sores disappeared completely in less than a week.

But far more than for the physical healing, I am thankful for the help Christian Science is giving me in overcoming mental and moral ailments. Instead of discontent, discouragement, and sorrow, I am beginning to realize in a measure, hope, courage, peace, and joy. I am so thankful for the understanding of the Bible which the reading of Science and Health is giving me; to know that God's promises are absolute; that they are for me, and it is my privilege to claim them right now. I am glad to get the *Sentinel* and *Journal,* for there are always many helpful thoughts in them.—I. H. M., Clifton, Ill.

It is now over six years since I first heard of Christian Science. At that time, while having no special trouble, I was tired all the time and hardly knew what it was to be free from backache or headache. I had been to several doctors without being relieved for any length of time; my appetite was very poor, and at this time I was subsisting chiefly on malt.

A Christian Scientist had been asked to call at our house to explain something of Christian Science, with the hope that another member of the family might consent to take treatment. I was present during the conversation, but was very much opposed to what I then believed Christian Science to be. I mentioned to this gentleman how I was feeling, and as he was leaving us he said he could not go without giving me a thought, which was, that when I was tired,

Digitized by Google

to think that I was made in the image and likeness of God, that He could not be tired, therefore I could not be tired. This did not appeal to me as being very reasonable, but I said nothing. However, the thought clung to me,—I could not get rid of it. I had always been subject to severe colds, often being confined to the house two or three weeks and sometimes to my bed, and after this time, when being exposed to any of the mortal mind laws regarding colds, I found myself repeating, "I am God's child and cannot take cold," with the result that I began immediately to improve, although I did not interest myself enough to take up the study right away. I finished taking what malt was in the house, but did not get more, and since that time have taken no medicine whatever, do not remember that I have ever been confined to the house one day on account of sickness, and have almost forgotten what backache and headache are.

For all the physical benefits, for the privilege of class instruction, and more than all else for the spiritual uplifting that comes through the study of the Bible and Science and Health by Mrs. Eddy, I feel that I cannot be grateful enough.—E. M. M., Mount Vernon, N. Y.

I came into Christian Science about thirteen years ago, through the healing of my son, who was then twelve years of age. He had been afflicted with St. Vitus's dance for three or four years. It was a very severe case. His eyes became affected, and the sight of one eye was entirely lost. He was under the care of doctors all these years, but grew worse instead of better. I was living in the West at the time, and my relatives in Brooklyn advised me to bring him here and try the physicians of this place. I did so, but with no better result than before.

A friend called upon me and asked me why I did not try Christian Science. I told her I had never heard of it, and asked her what it was. She talked for more than an hour, and as I listened and asked many questions, I thought it the most beautiful religion I had ever heard of. She directed me to a pioneer Scientist of Brooklyn. I placed my son under her care, and after the first treatment I could see improvement. In the course of three or four weeks, he was entirely healed of the nervous trouble, and at the end of six weeks, called to me one night, saying, "Mamma, I can see with both eyes now!" and in a childish way was holding his hand, first over one eye, and then over the other, saying, "Yes, there is no difference. I can see just as well with one as with the other." Such a happy boy as he was, and such a happy mother too! Every one remarked the change. He was under size for his age, but he began to grow and he stands to-day five feet ten inches. This was thirteen years ago, and he has never had a return of the disease, nor has his sight failed. To me this is one of the most beautiful demonstrations of the power of Truth and Love,—its enduring power.

I am indeed grateful to our beloved Leader who has brought to us such marvelous light, also for the loving care of the faithful practitioner who proved that in Christian Science such things are not only possible but divinely natural.—J. H., Brooklyn, N. Y.

"So shall the spiritual idea guide all right desires in their passage from sense to Soul" (Science and Health, p. 566).

This right desire, this turning from matter to Spirit, discovers the reflection of God,—the spiritual identity, the real man. This desire, if kept pure and honest, will heal the sick and cast out evil. This longing after good comes before we really understand what good is.

From my childhood, there was always an indescribable longing, an unsatisfied desire for something which I was unable to define to myself. As I grew older, the unrest grew more and more pronounced. Material things became more and more odious, less and less satisfying, the desire for rest and peace more imperative, until one day I was told of Christian Science. With my husband I attended a Wednesday evening experience meeting. I shall never forget that first gleam of light which showed me that there was satisfaction, rest, peace, and something above the material.

It never occurred to either of us to doubt one word voiced there that night. Our only thought was to know and understand this wonderful thing that made all that came within its influence well, happy, and good. We lived in anticipation from that evening until Sunday morning, when we again attended service. We both knew after this service what made the people well and happy, for we had found the same power,—God.

We returned home and emptied out all medicines, as we knew we would never use them again,—we had found God. We began to read the Bible and Science and Health, and during the following weeks we were made whole. The tobacco habit was destroyed in my husband; glasses worn for ten years were laid aside; chronic constipation and sick headaches were gone, and love for God and man was brought to light.

The old dissatisfaction was gone; the old longing satisfied, and the right desire guided by the spiritual idea was launched forth in its "passage from sense to Soul" (Science and Health, p. 566).—I. H. S., New York, N. Y.

"And the eyes of them that see shall not be dim." This verse of Scripture has come to me many times since my healing of a severe eye trouble just three years ago. I had taken treatment of four different oculists considered among the best in Boston. I had worn glasses constantly for six years, and previous to this time had worn them off and on for about two years when I attempted to do any near work.

My principal trouble seemed to be an inability to use my eyes for any near work without suffering terribly. After each attempt to read or sew I would have to go to bed and have the windows darkened so that no light could reach my eyes. Three of the oculists with whom I treated said that I had muscular trouble, and the fourth one said that I had compound astigmatism also. One of them advised me to have an operation performed which he said consisted in taking a pleat in the muscles, but to this I would not agree. No hope was given me that I should ever be able to go without glasses.

I had heard of Christian Science through the healing of a friend but was not ready at that time to accept it. However, the time came when I saw that the oculist was not helping me, and I then turned to Christian Science. I took treatment of a practitioner and in two weeks' time laid aside my glasses and have never felt the need of them since. The fear at that time was very great, so I continued treatment until it was destroyed. During this time I was healed of a nervous trouble brought on by the condition of my eyes. For this, and for the many blessings which have come to me since accepting Christian Science and especially for the spiritual uplifting which came with the healing, I am very grateful to God, to our dear Leader through whom God has revealed this truth to this age, and to the practitioner through whose faithful work this demonstration was made possible.

MRS. F. LOUISE SAVORY, W. Somerville, Mass.

A little over two years ago Christian Science found me despondent, melancholy, and very unhappy, as I had been suffering with catarrh of the stomach for six years. I had also been wearing glasses for five years for astigmatism. A cousin who had been in Science for three years asked me to try it. I consented and took treatments for three weeks

Digitized by Google

and quit. I had been benefited but not healed, and as a result I went back to medicine. I ought to say that my eyes were healed during my treatments, and I have never needed my glasses since; but while my eyes were healed my stomach trouble was not.

For the next eight months I doctored constantly, growing worse all the time, and at the end of that time I was very miserable and sick. In that state of mind I went to see my cousin and told her my troubles. She again advised me to try Christian Science and stick to it. After a struggle of about three weeks I went to see a practitioner for treatment. I stated my past experience and I shall never forget how gently but firmly she led me into this truth that makes us free. To-day I can say I am learning to understand God and God's laws.

For the encouragement of others I want to say that the way has sometimes seemed very dark and dreary, but as I was advised I have stood firm and trusted in God, and to-day I am a well woman, healed mentally, morally, physically, and spiritually, and I realize that I am beginning to live. I am perfectly well and free from all my old ailments.

Words fail me to express my gratitude to all who have helped me to gain this understanding. I also want to express my love and gratitude to Mrs. Eddy for revealing this healing truth to the world.—Mrs. H. Heibel, Chicago, Ill.

In August, 1893, I first heard of Christian Science, bought Science and Health, and began to study. In 1894 I had the privilege of class instruction, and while going through the class I was healed of grief caused by our only child passing away two months before.

I have had many demonstrations which prove to me that Christian Science is the truth that Jesus taught.

I had throat trouble ever since I was a child, and was healed in a week's time by reading Science and Health and realizing God's allness, and have never had it since. A lady asked for treatment who had rheumatism, and whom the doctors had given up, saying she would never walk down town again. In three weeks' treatment she was entirely healed. A gentleman who had diabetes was healed in two weeks' treatment. A young man who had typhoid fever was healed in one treatment, and got up and ate his supper with his family. A lady had her shoulder out of place and wrote for treatment. She had a doctor set it, but in three days took the bandage off, and said she felt no pain from the time treatment began. A little boy fell from a swing and broke his collar bone. His parents were Scientists, but the father was away from home so the mother sent for Science help, as she did not want a doctor, and desired to trust in Truth alone. In four days the child could use his arm, and in a short time was all right.

I am very grateful for the physical healing, but am more grateful for the spiritual uplifting which has come to me. I am thankful to our dear Leader for inviting us to Concord, and I shall never forget the love feast it was for me. I am also thankful for all our periodicals.

Mrs. Kate N. Cave, Kirkwood, Ill.

With great love and gratitude I testify to my wonderful healing, through the teachings of Christian Science. About five years ago Christian Science found me a hopeless dyspeptic; and besides this I had other troubles, pronounced by physicians to be beyond human skill. My first treatment in Christian Science resulted in the instantaneous healing of the dyspepsia, which was shortly followed by the healing of organic troubles of about sixteen years' standing. One of these was a trouble of the ear which discharged and had to be washed out with antiseptics daily, only to be found in the same trying condition the next day.

When I first heard of Christian Science I really did not hope for such marvelous healing, although I was much impressed with the spirituality of the every-day lives of the Christian Scientists whom I had met. As I look back to five years ago and realize the great spiritual uplifting that has come to me through daily reading of my Bible and "Science and Health with Key to the Scriptures," I find that I have been shown the way out of sin that I could not overcome through my former religious teaching. I tried many times to adhere to these teachings to please my family, and when Christian Science was brought to me, I saw that it was indeed the truth that leads into all good and uplifts mankind and shows earnest seekers the way out of all human misery; therefore I could no longer hold to a false education. My earnest desire is so to live the truth which has revealed a new world to me, through our Leader, Mary Baker G. Eddy, that I may reflect Love as taught in Christian Science.

Anna A. Kilduff, Brooklyn, N. Y.

With gratitude and thanks to my Father who is in heaven, and with my heart full of love for our Leader, I am ready to acknowledge the abundance of benefits received from reading Science and Health, and also the help received from kind practitioners. I have been healed of the desire for tobacco, and have also been uplifted spiritually. I have not needed help for physical ailments, but have found Truth to be the healing power at all times when needed.

My wife fell down a flight of fourteen stairs striking her foot on the steps as she fell. On recovering herself she realized that "God is Love," and that there are no accidents with God's children, and then she got up and went about her work. At bed time error seemed to be manifested by severe pains in her foot and ankle. I telephoned to a practitioner for help and the pain left her, so that she slept most of the night, but in the morning she was unable to step on her foot at all. On Monday morning she arose and walked all right, and had no further trouble. Neither foot nor ankle had any marks of bruises, nor were they swollen at any time.

I have seen measles, whooping cough, and other diseases of children vanish almost instantly when my little girl was treated. We are all very grateful to know that we have a God to whom we can go in the time of need, and that He will heal us of all our ailments if we trust in Him.

L. E. S., Lexington, Mass.

For some time I have desired sending to our Publishing Society a testimony of the great benefits received through Christian Science, but not till the October *Journal* came was I awakened to the opportunity of doing so at once.

Over six years ago I was healed of catarrh and dyspepsia, both of which had troubled me since I was quite a girl. These and other demonstrations led to the study of Science and Health, and later to the privilege of class instruction.

Within the last year we have moved to South Africa, and have proved many times that "Divine love always has met, and always will meet, every human need" (Science and Health, p. 494).

Though there are no other Christian Scientists in Johannesburg, we have had the precious assurance of "a very present help in trouble," and our periodicals always come as a message of encouragement and admonition for more faithful work.

My heart is full of love and gratitude to Mrs. Eddy for her untiring services in making this blessed truth so plain "That he may run that readeth it."

Mrs. Hettie P. Nicely, Johannesburg, So. Africa.

I cannot express the gratitude I feel for what Christian Science has done for me. About ten months ago I was having trouble with my eyes; the physician who attended

Digitized by Google

me said that I would lose the sight of one eye, and the other would be badly affected. While in this condition a dear relative who had been healed through Christian Science advised me to try it before I decided about having an operation, which I had been told was necessary.

Fearing I knew not what, if I submitted to the operation, I said I would take treatment, and the relative immediately wrote to a Christian Science practitioner asking her to take my case, which she did. I commenced to improve in three days' time, and in a few weeks was cured. I did not meet the practitioner until all the trouble was gone from my eyes, and during the time I was being treated many other ailments which I had, also disappeared.

My heart goes out in love to my dear friend and helper for her lovingkindness and patience toward me, not only in the physical healing, but in the sweet counsel through which I have been led to the understanding of the blessed truth. God bless Mrs. Eddy for this revelation of Life, Truth, and Love.—Mrs. Julia A. Perkins, Laconia, N. H.

I realize that long before this I should have given my testimony, telling of the wonderful help our family have received since coming into Christian Science. About seven years ago I was instantaneously healed of a great many ailments in one treatment. I spoke to the practitioner of one only, and I was healed of all the others as well.

My children have been helped in many different ways by this wonderful truth. Our boy dislocated his arm at the elbow, and a physician was called in to set it. No anæsthetic was given, and the doctor said it was the first time he had ever seen anything like that. He asked if he could watch the result of the case, and this same physician attended a lecture on Christian Science which was given soon afterward. Like others I have had my problem to work out since coming into Christian Science, and there have been dark places, but by clinging "steadfastly to God and His idea" (Science and Health, p. 495), I have been helped over these places, and now I praise God for all the blessings that He has given to our family. My heart goes out with love to our dear Leader for this wonderful truth.

Mrs. E. McKelvey, Cincinnati, O.

I wish to express my heartfelt gratitude for the help I always get from our publications. Our Lesson-Sermons are priceless to me. Long ago when a very young girl I noticed that the times when my attention was most attracted during a sermon was when the minister quoted a Bible text and tried to explain it, or brought it in incidentally so that it seemed startlingly clear, when I had before not understood it at all. Then I formed a desire in my mind that I might some day hear sermons made up entirely of Bible texts just connected with sufficient other words to explain them properly and make them applicable to everyday needs. Now my desire is granted, and the texts need not be connected with human opinions, for we have the demonstrable truths as discovered by Mrs. Eddy and revealed in Science and Health to serve that purpose. My prayer is therefore more than granted and the Scriptures are again fulfilled which says that He "is able to do exceeding abundantly above all that we ask or think."

Mrs. Gertrude Mahin, Denver, Col.

I am a little girl nine years old and I would like to tell of a demonstration. A year ago when mamma and I were visiting some friends, my little playmate and I were riding a bicycle. We were both thrown from the wheel. My playmate was not hurt at all, but mamma thought my leg was broken and sent for a surgeon. He said the bone was not broken but that the leg was bruised and twisted, and that I would not walk for three months. We remained two weeks and I was yet unable to walk and had to be carried home. Mamma then called a Christian Science practitioner and after two treatments I felt the ankle joint go in place; it jerked so hard it frightened me, but my fear was soon gone and I told mamma my leg was all right, and I got up and stood on it for the first time in three weeks. Christian Science also helps me in school, where I declare the one intelligence.

G. M. B., Lancaster, O.

For a long time I have been wanting to send something to either the *Journal* or *Sentinel*. I have enjoyed the things in the *Sentinel* so much that I would like to tell something of what Christian Science has done for me. Although I am a little American girl, I live in Berlin, Germany, and go to school there. When I first went to school I was told that I would be given a week's trial in a class with children of my own age, that I would almost surely need to have outside instruction, and even then I might not stay in that class. Mother then helped me to know that I was the reflection of infinite intelligence. I stayed in that class, and at the end of the quarter I was promoted from the fifteenth place to the sixth. Through Christian Science I have been healed of bronchitis, measles, mumps, and other things, and have had their nothingness shown me. I cannot express half my gratitude for all that Christian Science has done for me.—L. P. S., Berlin, Ger.

It is nearly four years since I came into the understanding of the Christ-truth. Physical healing did not bring me to Christian Science, but I came to be healed of grief, and one treatment awakened me to the understanding that God is Life. Since then I have had so many proofs of God's allness and presence, that it is impossible to find words to express my gratitude for that which I know is mine and which can never be taken from me.

This light has enabled me to help others, in healing both mental and physical discord, and in overcoming error in myself. My greatest desire now is to gain more spiritual understanding, that I may help our Cause and our beloved Leader, through the healing of the sick, the comforting of those that mourn, and the awakening of sinners, by reflecting divine Love.

Martha Otis Dickinson, New York, N. Y.

It is with joy that I can say Christian Science has healed me and taught me to know God and the truth.

In 1896 I first learned of Science, and at once commenced treatment, thinking it might help me. I was about to have an operation for ovarian trouble, having been under treatment or care of doctors for fourteen years. Everything had been tried but had failed. In three weeks I was perfectly well, and thankful to God and to our dear Leader for bringing again to us the truth that makes free from sin, sickness, and death.

I learned through the study of Science and Health to love God and His word, and that Life is found in overcoming all that is unlike God. My thought goes out in gratitude to all who contribute to our periodicals, for they are a great help.—G. B. S., Buffalo, N. Y.

Our two little bairnies, who have been with us, the one five, the other nearly seven years, slept together last night, and I was aroused during the night to find the elder screaming, frightened by a terrible dream or nightmare, which must have seemed very real to her. Before I reached their bedside, I saw the little one calmly put her arms about her sister and say, "There, dearie, that's an old lie and can't hurt you," and at once the peace of God was restored and quiet and order prevailed in accord with the law of perfect Love which casteth out fear.

A little thing, some may say, still a beautiful proof of God's loving presence and watchful care over His sleeping children.—I. H. Quinby, Buffalo, N. Y.

From our Exchanges.

"The natural man receiveth not the things of the Spirit of God: . . . and he cannot know them, because they are spiritually judged" (Revised Version). That is a fundamental fact in spiritual experience. Only the man who is "born from above" can "see the kingdom of God," or suspect its presence in the world. Only the heart that is renewed can appreciate God's grace, or delight in God's purpose of love, or even apprehend that He has a purpose by which the world is being transformed. "The things of God" none know except those who are quickened and illumined by the Spirit of God.

But it is well that we bear in mind that these high spiritual experiences are not unnatural, in the proper sense of that term. Man is made for God, created in His image, fitted for companionship with Him by his very nature, and thus creatively qualified to know Him and love Him and live for Him.—*The Examiner.*

Spenser B. Meeser, D.D., says in *The Standard:* "We are hearing to-day a great deal about the 'new evangelism.' What do men mean by it? Some of them mean, to be very frank, that the old evangelism, which promised men with passionate vehemence that if they accepted Christ in a confession, in holding up the hand or bowing at an altar-rail, if in some heat of emotion they would be converted, it would be all well with them here and hereafter; this evangelism they mean is inadequate and unappealing and ineffective now, and we can hope for little or no progress from such appeals to-day. Men resent it as artificial, shallow, and inefficient, and, therefore, we must have a new evangelism, with a fresh message, more ethical and more effective."

The world calls for a reasonable and practical presentation of the Gospel, charging men with the living power to go forth and be men and Christians everywhere. The world to-day is welcoming a religion of kindness and benevolence to fellow-men, but it is also longing for a church which will at the same time above all else cultivate personal relations with God in Jesus Christ. And when the services of the church present God as the Father of all, the supreme object of worship, and Christ as the Saviour of the world and not merely of a few souls or a few bodies, then will the difficulties of administration grow less and less, and the church will make strides as it did in the days of Paul and of Luther. REV. F. W. SPRAGUE.
The Universalist Leader.

We even become "dead" in trespasses and sins when we willingly follow our sense impressions to their logical conclusions. If we are to enter into our heritage as the Father's children, His angel must gain our ear with his message of annunciation, and quicken a hopeful, expectant longing for the birth of saving truth within the will and life. The "Son of God" is the Lord's Divine Truth working salvation in the human soul.—*New-Church Messenger.*

Only love can win love. Gratitude is love. Our fellow-beings will give it when we have shown them they are our kin and of one blood with us. We cannot without danger of spiritual aridity remain ungrateful to God, and first for life which under all conditions is His priceless bestowal.
The Christian Register.

The Gospel does not change from age to age, but the human apprehension and realization of it changes, and the Holy Spirit has greatly honored prophets in being the medium of bringing the churches to a deeper and fuller consciousness of the meaning of the Christian revelation. To-day we need that more than anything else.
The Watchman.

So long as we are self-centered it is impossible to be of one accord. The strings of a violin are tuned in place and all together, and to a keynote given by another instrument. Note Paul's deep thought of Christ's deliberately chosen humanity and humility, and the emphatic "wherefore" of his eternal honor. Humility is doorkeeper where glory fills the life.—*The Congregationalist.*

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

NOTICE.—Members of the Mother Church who have changed their name by marriage will please notify the Clerk and send $1.00 for change of name in the published list of church members. Changes will appear in the list of names semi-annually only,—July and December.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America.

It contains about thirty-eight pages of reading matter, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

German Supplements

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. The Christianity of Christ. By Rev. IRVING C. TOMLINSON.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

In the decision rendered by Umpire Carroll D. Wright in the dispute of the anthracite miners' Board of Conciliation regarding the Saturday "short-day" grievance of the Schuylkill Valley miners, it is ruled that the contention of the miners cannot be sustained and that both operators and miners have misinterpreted the strike committee's award on the "nine-hour-day matter." After the award of the coal strike commission, the companies all through the region established a nine-hour day with ten hours' pay. This gave an increase of 11 1-9 per cent in wages to the men paid by the day. The Schuylkill Valley men demanded that their Saturday short day should be decreased proportionately with the other days, that they should receive the same wages for 52.2 hours per week as they had been receiving for 58 hours. The case went to the Conciliation Board, the Board disagreed, and Umpire Wright decided the dispute. Dealing with the question, the umpire says that the committee did not reduce the hours of company men from sixty to fifty-four, nor did they fix any number of hours or change any custom existing prior to the strike. Hence the umpire says the parties are left just where they were at the time of the strike—at perfect liberty to fix the hours by voluntary action.

Governor Carter of Honolulu and the heads of departments have decided to run the territorial administration during 1904 on about one-half of what the Legislature appropriated for the salaries and current expenses, in order to get the treasury out of debt. The appropriations are for more than the estimated income, and it is calculated that with the fifty per cent cut the Territory will still be in debt about a quarter of a million dollars at the end of the year.

The Supreme Court of the United States has decided that citizens of Porto Rico are not aliens of the United States, and that they are entitled to enter this country without obstruction. The opinion was delivered by Chief Justice Fuller in the case of the Porto Rican woman Gonzales, who, in 1902, was refused admission to the port of New York on the ground that she was likely to become a public charge.

General Rafael Reyes, the Colombian special envoy, has received the answer of the United States Government to his note, charging the United States with open violation of the treaty of 1846. The answer, though diplomatic and expressing the wish of this Government to deal justly with Colombia, is an emphatic refusal to reopen the Panama question.

Queen Liliuokalani is planning to ask this session of Congress for an indemnity of $350,000 as a recompense for the crown lands of Hawaii, of which she was deprived by the Dole Government, which overthrew her dynasty. She is preparing to present her request through Prince Cupid, the Hawaiian delegate to the House of Representatives.

At a recent Cabinet meeting at Washington a unanimous decision was reached that the hours of Government employees shall be from 9 A.M. to 4.30 P.M., with a half-hour for lunch. This will affect about one hundred thousand employees, and will result in their giving 114½ more hours of time to the Government during the year.

The President has sent to the Senate the nomination of William H. Taft of Ohio to be Secretary of War; Luke E. Wright of Tennessee to be Civil Governor of the Philippine Islands; Henry C. Ide of Vermont to be Vice-Civil Governor of the Philippine Islands; John C. Black of Illinois, Civil Service Commissioner.

Foreign.

The disturbances in San Domingo are contests by factions and not for principle. The United States will take a firm stand to abate what a European ambassador there calls "an insufferable nuisance, which the civilized world looks to the United States to clean up."

An extra edition of the Japanese Official Gazette has been issued containing army and navy orders prohibiting the publication of any reports of the movements of troops or war vessels. Otherwise the Japanese authorities are not interfering with press messages.

A zoölogical and anthropological expedition to the frontiers of Peru and Bolivia has been arranged by Baron Nordenskjold. He expects to spend eight months in studying the hostile forest Indians of that region.

A despatch says Russia is negotiating with Turkey to permit her Black Sea fleet to pass through the Dardanelles. It is stated that the fleet consists of seventy-six ships.

It is announced that Great Britain has agreed to the Anglo-Italian arbitration treaty which will be signed in Rome.

About ninety miles of electric roads have been successfully constructed about Lake Como, Switzerland.

Industrial and Commercial.

The *Era Druggists' Directory* gives the total number of drug stores in the United States in October of last year at 39,899, or 150 less than a year ago. The most striking change in the character of the business carried on by American druggists is the addition of various side lines to the drug stock. On the other hand, many druggists, particularly in the larger cities, have dropped the sales of wines and liquors. The preponderance of foreign names among the druggists of New York City and Chicago is more marked than ever. One of the features of the drug market during the past year was the stability of price and the lack of speculation in the leading articles. There has been a great scarcity of native American herbs, roots, and barks, and prices have been very high in consequence. The scarcity was due to a decreased production, which was caused by the fact that labor was more profitably employed in the sections where these articles are obtained than in gathering these medicines. There has been a decided falling off in the sales of patent and proprietary medicines. This is due to two causes, one being that druggists have been making substitute preparations of their own, and the other that the profits derived by retailers have been reduced.

The total number of corporations chartered in New Jersey for the year 1903 was 2,005, and the fees for granting charters received were $269,147.62. In 1901 there were 2,347 corporations chartered, for which $687,439.87 in filing fees were received; and in 1902, 2,250 corporations, and $485,089.29 paid as sponsor fees to the State. The decrease in amount of money received by the State for granting charters in 1903 is 64 per cent, taking the year 1901 as standard.

In a special bulletin, which will be issued by the United States Geological Survey shortly, Government experts will announce the discovery of tin ore in large quantities in Alaska. Enthusiasts state that the discovery eclipses the value of the Alaskan gold fields. The Western Hemisphere has been practically tinless. Millions of pounds have been imported annually and millions of dollars have been paid to foreign countries for the tin.

It is stated that the Southern Pacific has under consideration a project to facilitate transportation across the Sierras, the tunnel project having been indefinitely deferred by the laying of a third rail between Sacramento and Truckee, and the establishment of an electric plant, with power obtained from the .iver. Great motor cars will be operated to assist the trains in crossing the heavy grades.

Reports concerning the iron and steel business at Pittsburg show some satisfactory improvement in orders, while inquiries which are on a very large scale, will result in orders later. There has been a general movement towards resumption, and it is thought that operations will soon be normal again.

The Occidental & Oriental liner Coptic, just arrived at San Francisco, brought one of the most valuable cargoes that ever came there. It included 1,501 bales of silk, valued at about $1,200,000, besides gold in Japanese yen valued at $1,250,000.

A number of officials of the Pennsylvania Railway are soon to go abroad to study in England and on the Continent the methods of railway transportation there.

General.

The Bavarian Government has decided to construct a large number of new locomotives upon the models of the American locomotives introduced by the railways of Bavaria nearly four years ago. During the next two years forty locomotives of various classes are to be replaced by seventy new locomotives. Five million marks ($1,190,000) are to be expended for this purpose. The two locomotive factories in Munich, the large establishment at Maffei, as well as that of Kraus, are to be favored in the distribution of these contracts.

On December 15 the southeastern peak of Mt. Ranier, sixty miles southeast of Tacoma, Washington, tumbled down the mountain-side into the valley. Mount Ranier is nearly fifteen thousand feet high and is surmounted by three peaks, the highest of which, Columbia's Crest, stands on the southwest shoulder of the mount. This peak contains a crater several hundred feet in diameter from which sulphurous fumes and steam are constantly rising. The mountain has a glacial system comprising 15 distinct glaciers.

Señor Alcantara, the distinguished Spanish art critic, writes in the *Imparcial* that the splendid cathedral of Toledo, one of the celebrated mediæval monuments of Spain is hopelessly falling to ruins.

The steamer Teutonic, which sailed just before Christmas, carried 2,583 sacks of mail for Great Britain. The shipment included over seven hundred thousand letters.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

More Sayings of Jesus.

In a recent issue of the *Sentinel* brief mention was made of the excavation of ancient papyri by Doctors Grenfell and Hunt who have been prosecuting such work in Egypt for a number of years. We have been requested to give fuller information on the subject, and therefore publish below the text of the news item as it appeared in the *Boston Transcript.*

Many hitherto unknown sayings of Jesus Christ have been discovered in Egypt by archæologists who have dug up papyri, buried since the second century, one hundred miles south of Cairo. Dr. Bernard P. Grenfell, who has been engaged in Egyptian excavations since 1894, at the general meeting of the Egypt Exploration Fund here, gave the following details: Accompanied by Dr. Hunt, Dr. Grenfell found a rich Ptolemaic necropolis at El-Khibeh. The bulk of the documents from one mound consisted of a collection of sayings of Jesus. They are all introduced with the words, "Jesus saith," and for the most part are new. The ends of the lines, unfortunately, are often obliterated. Apparently, all the sayings were addressed to St. Thomas. One of the most remarkable is, "Let not him that seeketh cease from his search until he find, and when he finds he shall wonder; wondering, he shall reach the kingdom; *i.e.*, the kingdom of heaven, and when he reaches the kingdom he shall have rest."

Dr. Grenfell remarked that enormous interest would be aroused by the discoveries, on account of the variations they disclosed from accepted texts. One variant of the mystical saying, recorded in St. Luke, "the kingdom of God is within you," was of great value, as the saying in the papyrus appeared in quite different surroundings from those attributed to it by the evangelist, and extended far into another region. According to Dr. Grenfell, these sayings formed the new Gospel which is traditionally associated with St. Thomas. An interesting variation of the Gospel according to St. Luke, eleventh chapter and fifty-second verse ("woe unto you, lawyers! for ye have taken away the key of knowledge: ye entered not in yourselves, and them that were entering in ye hindered"), reads in the papyrus: "Ye have hidden the key of knowledge; ye entered not yourselves, and to them that were entering in ye did not open."

Another fragment contained a discourse of Christ, closely related to passages of the Sermon on the Mount, and a conversation between Christ and his disciples, in which Christ answers a question as to when his kingdom will be realized, saying, "When ye return to the state of innocence which existed before the fall."

A valuable find was made in papyri, written in Latin, giving the text of the Epistle to the Hebrews and an epitome of Livy's six lost books. This, with other papyri covering the period 150–137 B.C., threw much new and valuable information on the history of the world, and marked the recovery of hitherto lost classical literature of Egypt. A quaint instance of the business methods in vogue in 137 B.C. is shown in the discovery of an amusing contract whereby a slave boy was to be taught shorthand for one hundred and twenty drachmæ. The payment was arranged on a thoroughly businesslike basis,—forty drachmæ down, forty on satisfactory evidence of progress, and forty on the attainment of proficiency.

El-Khibeh is a burial place near the site of Oxyrrynchus, a town dating from the times of the Ptolemies, something over one hundred miles a little to the west of south of Cairo, on the edge of the Libyan desert. Roman and Arab pottery indicated the necropolis, and the first attack upon the mound revealed the presence of a valuable literary deposit. It was six years ago that Doctors Grenfell and Hunt, agents of the Egypt Exploration Fund, unearthed here a collection of papyri dating from the second century. Among the mass of material the discoverers found and translated one leaf bearing a Christian writing of surpassing interest. It immediately transfixed the attention of the world of scholarship, and especially of all students of church history and the Bible. The leaf in question, a six-inch square of papyrus, with broken edges, inscribed in uncial Greek, part of which had faded into illegibility, purported to be a record of sentences spoken by Jesus. It contained eight sentences, each beginning "Jesus saith." Several of these were substantially identical with sayings of Christ recorded in the New Testament. Three of them, however, were new; of these one saying, or "logion," provoked the widest possible interest; it ran thus: "Jesus saith: . . . and there is one . . . alone I am with him. Lift the stone and thou shalt find me; cleave the wood and I am there."

There is no doubt of the immense significance of these discoveries. The most conservative critics at Oxford pronounced the first leaf translated the oldest Christian writing in existence. The leaf and the writing upon it is without doubt sixteen hundred years old, and there is a strong probability that it is a copy of a still older manuscript. Whether or not the new papyri be authentic accounts of words spoken by Jesus, it is at least certain that Messrs. Grenfell and Hunt have brought to light primitive Christian documents, recording traditional words of the Saviour as these were current in a town in Egypt certainly less than three hundred years, and almost certainly less than one hundred years, after his death. The twentieth century has suddenly become the heir of an astonishing treasure, unknown to all the intervening ages.

What the Editors Say.

Recent scientific discovery in London amazes specialists. Professor Ramsey's discovery that the elements can be changed one into another is felt to have changed the foundations of science. Professor Lodge declares that matter, after all, is only the weapon and vehicle of mind. "Every act of human thought is accompanied with the change of the molecules in the brain." He thinks that an essentially similar process is going on through the inorganic world, and asks whether all this motion does not correspond to some universal thought or to some mental activity. This new theory seems to be a scientific interpretation of the

Copyright, 1904, by Mary Baker G. Eddy.

Digitized by Google

position long taken by the Christian Scientists. Perhaps Christian Science will claim Professor Lodge's scientific surmises create a presumption in favor of Mrs. Eddy's views being, after all, the ultimate reality.

Boston (Mass.) *Journal.*

Theologians are much interested in the text of the new-found sayings alleged to be those of Christ which were taken from a mound in Egypt. Scripture scholars are reluctant to accept any interpretations at variance with the New Testament text. It is doubtful if the papyri are antecedent to the sacred biographies which make up the chief part of our New Testament. That the words of the founder of Christianity made deep impression upon Egypt as well as upon Greece is clear. Such words of Jesus as preceded him came from the Far East, but they were never so happily grouped as by the Nazarene, because there was never a prophet who lived a life of such unique beauty. This in part is what is meant by the word made flesh dwelling among folks. *Boston* (Mass.) *Journal.*

The teachings of Mrs. Eddy, the Leader of the Christian Scientists, have called down upon their author much criticism and no little abuse, as would naturally be the case, such extraordinary success have her views received in this country and to some extent abroad. Some of the criticism has been written by well-meaning people who have not fully understood her teachings, but by a larger class who took occasion to please those who regarded Mrs. Eddy as a pretender. We can say that of all that we have read about Mrs. Eddy, and there has been much written, nothing has been said to show that she is not a lady of the purest character personally. Her motives as well as her teachings, have been assailed, but despite all inferences as regards her private and long public life, Mrs. Eddy remains irreproachable. She has become wealthy, but has contributed generously in behalf of the cause she advocates. Those who accept her teachings, as a body, are of the more intelligent and educated classes, and they number over a hundred thousand, and are increasing very fast. No hope of pecuniary benefit is held out to any one accepting Christian Science, and its followers are liberal contributors to promote their belief. Recently a million dollar church was built in New York. Alongside the Mother Church in Boston a large plot of ground has been secured on which is to be erected a two million dollar church, to meet the needs of believers, and all over the land fine churches are being built by the Christian Scientists.

Mrs. Eddy has been ridiculed and lampooned for saying there was no such thing as pain or sickness, or any matter either. These are startling declarations for any one to make, taken in their ordinary sense and experience of people.

But here is a more startling admission of the brightest scientific men of the age, and that is their endorsement of Mrs. Eddy's remarkable statement, that there is no such thing, absolutely, as matter. The recent discovery of radium and an investigation of its peculiar properties not only astonished but dumbfounded the investigators in breaking down the long-established laws of matter, compelling them to doubt if not disbelieve in the possibility of the existence of such a thing as matter. Faraday nearly a century ago, advanced the same belief, first suggested by a French philosopher.

While disbelieving anything has been or can be discovered, not revealed in the Bible, concerning man and his relations to his Creator, we cannot accept the teachings of Mrs. Eddy, as we understand them, but we have no right to judge her until we have a clear understanding of what she means by her strange statements and the novel phrases in which she clothes them. We can say the same of many things advanced by men of acknowledged excellence and ability in the orthodox Christian churches.

Putnam (Conn.) *Patriot.*

The dearest thing to most people is life, and persons of sane minds have a right to follow their own judgments in selecting methods to prolong it, provided they violate no law by so doing.

. . . . . .

Scores of people in New Haven and all over the country to-day believe in Christian Science treatment. They are neither crazy nor unsound in mind. Many of them bear testimony to the benefits they have received. Our convictions and experiences may not be in accord with theirs, but is that a good reason for proceeding as if they are not entitled to the protection of the law and sympathy of rational men and women?

Let us be fair in the treatment of these people, who find comfort and peace in their religious belief and whose life among us is worthy of highest commendation, regardless of the conscientious belief of their fellows and the disputing facts of science as it relates to the treatment of disease.

New Haven (Conn.) *Leader.*

It has not been so long ago when in many quarters Christian Scientists were never spoken of except as cranks. Members of their own family often thought their conversion should be followed by an inquisition of lunacy, and there are some good and intelligent people to-day who declare that Mrs. Eddy and all her followers suffer from mental aberration.

But in the realm of thought the world is rapidly broadening and in matters of opinion, mankind is becoming more tolerant. In this connection the Founder of Christian Science says,—

"Within the last decade, religion in the United States has passed from stern Protestantism, to doubtful liberalism. God speed the right! The wise builders will build on the Stone at the head of the corner; and so Christian Science, the little leaven hid in the three measures of meal,—ethics, medicine, and religion,—is rapidly fermenting, and enlightening the world with the glory of untrammeled truth. . . . Dogmatism, relegated to the past, gives place to a more spiritual manifestation, where Christ is Alpha and Omega" (Message, 1902, p. 5.)

The *Texarkanian*, in accordance with the policy announced some weeks ago, to the effect that a report of a sermon delivered by some one of the Christian ministers of Texarkana would be a feature in each Monday's issue of this paper, to-day publishes in another column a report of the services of the Christian Scientists held in this city on yesterday.

The same purpose which animates us to print the news, with pertinent comment thereon, now influences us to say that those who would stay the rising tide of Christian Science cannot hope to do so by ignoring its votaries or thinking and speaking of them as cranks and fanatics. Men and women of wealth, of culture and intelligence, and of the highest social standing, all over the United States and Canada, in Germany and in other parts of the world, are proclaiming their adhesion to and faith in this new religion. There is scarcely a city of fifteen thousand inhabitants in the United States that has not organized, or has in process of organization, a branch of Christian Science. Located all over the United States, from Maine to California and from the Lakes to the Gulf, are more than one hundred Christian Science Institutes. Its publications are numerous and are being widely circulated. During the current year their system of healing has been legalized in the states of North Carolina and New Hampshire.

Light in Dark Places.

A. M. D.

"FEED my sheep." It is just three years ago this month since this command of our Master met with a loving response among the members of Second Church of Christ, Scientist, of Minneapolis, and the regular Sunday service was instituted in the workhouse, the same being held Thursday evening of each week, and it may be of interest to the Field to know the changes which the truth has made in this institution within that time.

The services are held in the dining-room, which has a seating capacity of one hundred and fifty to two hundred. The first evening the service was held one small kerosene lamp furnished such light as there was, and truly it seemed that darkness ruled materially, morally, and spiritually. The guards spoke to the men as they would to brutes, giving them the stern, short command "*Up*," in a voice which thrilled one with terror, when they wished them to rise. The thought of absolute bondage was uppermost, and mortal sense would surely ask, "Can God prepare a table in this wilderness?" but ever-present Love re-echoed the question, "What cannot God do?" (Science and Health, p. 135). "God said, Let there be light: and there was light." Within three weeks sixteen bright and shining lamps filled the large hall with light and cheer, and the sweet influence of "the still, small voice" of Truth and Love had lifted the dream shadows of harshness, subjection, utter hopelessness, and despair. The stern command had become a quiet request to "Rise," and to-day simply an uplifted hand is all that is necessary to insure prompt obedience on the part of the men and women. Instead of coming into the room with the thought of servitude, they now march in to music, the assistant superintendent leading the march with folded arms like the men, thus proving the unity and brotherhood of man; and the whole thought is now one of helpfulness and love.

The attendance at these meetings is wholly voluntary, and the extent of the work may be realized when it is known that the average has been seventy-five, and often one hundred and more are present, while no two congregations are ever composed of just the same persons,—the sentences ranging from ten days to nine months and longer. The officers tell us that the long-term men always attend regularly after having attended one service, and one can soon discern among the faces those who have been attending for some time. The sullen, hopeless, despairing look first becomes one of surprise, then interest in what is being read, then earnest attention, and eventually hope and a higher desire for right is expressed. They quickly recognize the thought of love and helpfulness which is going out to them in place of the customary condemnation, and this at once arouses their interest.

We are told by the matron of the women's department that oftentimes those under her charge count the days between the services, and always make a special effort in their work on Thursdays that they may be ready for the Christian Science service, one remarking not long ago, "How I wish we could have that service every night!" Another who had been sick in bed all day, said to the matron, "Please help me to dress, as I want to go to the service to-night and be healed." It is pleasant to recall the fact that she received her reward and was perfectly free the next morning. Another interesting example of the fruits of the service was brought to light during the first six months.

In the winter an old man was sent up for sixty days. His home had been in Camden Place, where the workhouse is located, and for some twenty years or more it seems he had been called the terror of the neighborhood. He drank heavily and showed a most cruel disposition in his home. He attended the Christian Science services those eight weeks, and then returned to his home. Shortly after, his daughter, who washed for one of our members living in that locality, said to her, "Something very strange has happened. It seems as though God's kingdom had come to our home. Father is staying at home now, he does not drink a drop of liquor, he does not abuse us, and is a changed man. We do not know how to account for it, but we are *so* happy!" It is learned that this healing has been permanent.

Another incident which proves the power of God's word to heal and save occurred a few weeks ago. One of the Readers was walking on the street Sunday afternoon, her thought at the time being filled with this work, and with gratitude to God for what the truth was doing there. She saw a cab approaching the crossing, but of course paid no attention to it till it stopped right in front of her. The coachman politely lifted his hat and said, "Pardon me, but I wish to speak to you a moment." He then said, "You read at the Workhouse, do you not?" On receiving an affirmative reply, he said, "I was one of the unfortunates there. I attended your service and was converted. I have not drank a drop of liquor now for over a year, and do not expect to. I wish to thank you and the young man for the good you are doing there. I hope you will continue the good work." He then touched the horses with his whip and drove on without time for further conversation, but the gratitude expressed in his face and words was most touching. "He sent his word, and healed them, and delivered them from their destructions. Oh that men would praise the Lord for his goodness, and for his wonderful works to the children of men!"

Others have called at the Reading Rooms on their release from the Workhouse, and several have been given employment.

Our Leader's hymn, "Shepherd, show me how to go," is sung at each service, and thus many of the long-term men and women have learned the song by heart and will stand with closed books, singing the entire hymn, and though we may not see many of the present fruits from this work, we know that those words of truth will never leave them but will bear fruit after its kind and eventually guide them "into all Truth." They also join heartily in the responsive reading, and some have joined in the repetition of the Lord's Prayer. All have learned to love our hymns, and we feel that through them they receive much truth which will remain with them. Last New Year's evening all but two in the entire institution came out to the service, making a congregation of one hundred and four. Four copies of our text-book, Science and Health by Mrs. Eddy, are in constant use; also one copy of "Miscellaneous Writings" by the same author; and one hundred *Sentinels* and fifty *Journals* are distributed each month. Our hearts are filled with gratitude for these Lesson-Sermons which so truly meet "the heart's great needs" among these people, and for our literature which indeed "elevates even mortal mind to the contemplation of something better than disease or sin" (Science and Health, p. 323). We feel that the reign of divine Truth, Life, and Love is being established, and that the Word of God is indeed enriching their affections and governing them. (Manual, p. 56.)

To whom Much has been Given and Forgiven.

SAMUEL GREENWOOD.

THE perfume of gratitude and love which the Magdalen poured upon her Master's feet has diffused its fragrance through all after time, and is passing sweet to-day. Her adoration stands out in radiant relief against the dark ingratitude and faithlessness of that period which condemned and crucified the most God-like man the world has ever known. This was one of the most beautiful incidents in our Lord's career on earth, for it exemplified the purifying and redeeming influence of divine Love even to the deepest depths of human misery and sin. Should not Jesus have

Digitized by Google

received this woman's gift, when he knew, though the others did not, that this symbol of her love was in evidence of that "repentance which reforms the heart"? (Science and Health, p. 19). Had not God made pure even this one whom men had cast out as a sinner? The immaculate purity of Jesus' thought of her rebuked and destroyed the wrong, and the returning sense of her true womanhood unsealed the fountain of her joy and love. Who could refuse such priceless homage? What costlier, brighter gem could grace the life of the Master or of his disciples, than the gratitude and love of those redeemed from sin? Unregenerate would be the thought which turned away in forgetfulness, or remembered with indifference the one who had toiled and prayed through dark hours of agony for her deliverance. God who is infinite Love does not mark ingratitude or selfishness as the sign of sin's forgiveness, but rather the God-like qualities of love.

Christian Scientists are like Mary Magdalen in their learning to love much, because much has been forgiven them. If their overflow of gratitude, seeking outlets of expression, has been at times allowed unwise freedom, and has perhaps excited the criticism of adverse minds, the cause thereof has always been the deliverance from sin and suffering which has come to them and theirs through the teaching and practice of Christian Science. The sensuous world may not appreciate the animus of such devotion, being unable to understand the great spiritual good which preceded and gave it birth, but to Christian Scientists the reason of their gratitude is too palpable and satisfying to need apology or defence. Could others but know somewhat of the wondrous transformation wrought in them through Christian Science, and through the loving ministry and wise counsel of their Leader, they would cease to resent this bestowal of Christian love.

Those who have come out of great tribulation, out of the deepest and darkest depths of sin and woe,—the fiery torment of unresisted passions,—out of nameless agony and fear, and have reached through Christian Science the realization of harmony and peace; those who have seen the light rise out of their obscurity, whose deaf ears have been unstopped and whose lame feet have leaped as an hart; who have seen the shadows of sorrow and want and despair pass away as a mist,—these know best what Christian Science is and does, and the debt they owe to its Discoverer and Founder. To be enshrined in the hearts of such as these, whose lives have been made purer, happier, and holier because her life has been so freely given to God and mankind, is a higher throne and a kinglier crown than the world could ever give.

The faithfulness of Mrs. Eddy to the task entrusted to her as the Discoverer of Christian Science, her tireless labors, unceasing watchfulness and care in establishing "the stately goings" of this Science in their divine purity and entirety, has found loving response in the hearts of Christian Scientists the world over, and has won world-wide recognition, not only for herself but for the abundant success of her Cause. An ever-increasing multitude, gathered from every class and condition of society, men and women of culture and refinement, as well as those from the humble walks of life, representative, of every nation and kindred, esteem their knowledge of Christian Science as the greatest blessing of their lives, and their hearts go out in gratitude and love to that great and good woman through whom God has given this priceless revelation to men. Could they do less? Could the prodigals returning home who have learned through Christian Science the way to their Father's house, who have found health and heaven, peace and good-will on earth, who have received the best robe and signet ring of their divine sonship, could these keep faith with divine Love and keep their hearts right and true with God if they withheld their loving obedience from His messenger, who opened their blind eyes to the husks of materiality on which they fed, and guided them into a knowledge of the truth? Could those whose hearts had become parched and famished for the bread and water of Life, and who have had the bounty of God spread for them in the wilderness of their mortal beliefs and in the presence of their enemies, ever forget through whom they learned of the infinite goodness and power of God?

The weary Christian who had struggled faithfully through long years to reach God's hand in his pain and trouble, but in vain; and the man whose faith in an overruling God of goodness had passed out before the awful spectacle of the world's continued misery and woe,—these are they who are finding in Christian Science the answer to every righteous prayer made possible, and the God who is too good to "behold iniquity." Who that has not measured the dark depths from which they have been lifted, can rightly judge the purity and extent of their gratitude?

The grateful life is always the loving life, for love is appreciative and cannot thrive in the atmosphere of indifference or ingratitude, which would obscure our debt to God and to our benefactors. Gratitude is the preservative of the heart's sweetness, saving it from the canker and corruption of worldly self-seeking and the cold callousness of pride and conceit. It is that divine outflowing of love which submerges selfishness in appreciation of others' goodness, and blesses because it has been blessed. It is the response of man's inherent God-likeness to the touch of generous service and bestowal. It stirs the stagnant affections of mortals,—their neglected power to love,—clarifies the heart's atmosphere, and opens its portals to the inflow of God's grace and a quickened sense of Love's reflection in man.

Loyal Christian Scientists will not be blinded by the subtle jealousies of evil or the passing vanities of human egotism and vainglory, to the rightful and dignified position of their noble Leader and their loving obligations to her. Their own aspiring but faltering wisdom and sin-encumbered growth, stand rebuked before the Christ-likeness of her character and that far-seeing judgment which has governed them so wisely and so well. This foremost pioneer in the scientific and Christian overcoming of the flesh through spiritual supremacy has earned the gratitude of all mankind for her reformatory and healing work. As the successful explorer in the realm of Truth, discovering and demonstrating the Christ Science, she has blazed the way for all mortals through the dense and tangled growth of human error,—superstition, ignorance, and fear,—out of matter and evil with their consequent sin and suffering, into harmonious being in God, good. The holy benediction of her faith in God has laid its joy upon unnumbered lives, changing their dissonant chords to harmony, and leading the sorrowing into strength and peace.

Christian Scientists feel that much has been given them, even that which surpasses the highest good before attained by mortal man; and much has been forgiven them, too much for human language to express in the measure of its sadness and in the joy and warmth of Love's dawning. Should not their hearts love much in return for being invested with this great gift of God, and in return for her who has so lovingly and bravely followed Christ in the face of an unfriendly world and the protests of a material sense of religion? Because of the wondrous light which shone on the darkness of their despair through the divine message of Christian Science; because of the blessed knowledge of the possible achievement of every holy thought and pure desire; because God and Christ and heaven have become nearer and dearer than they had ever hoped to realize on earth; because of their deliverance from indescribable depths of desolation, from the godlessness of a dead faith, and the dreariness of material living,—because of this, Christian Scientists thank God with glad and loving hearts for the coming of Christian Science, and for the beautiful and pure life of its Discoverer.

The Lectures.

At Lancaster, N. H.

Hon. William G. Ewing of Chicago, lectured at Lancaster, N. H., Friday evening December 4. General W. P. Buckley introduced the speaker as follows:—

Ladies and Gentlemen:—We are met this evening to listen to a discourse upon a subject concerning which opinions are as diverse as they well can be upon any subject of human interest. It will be well to remember that progress along any line of human endeavor depends largely upon a diversity of opinion, and that conservatism never assisted in developing a truth nor aided in the betterment of the condition of mankind. It is therefore the duty of all not to decry a thing because it seems new, nor to deny the truth of those things which we have not thoroughly investigated. Such a course of liberality, alas, has not usually been pursued by humanity in the past. It is not necessary to go back to Socrates defying the Athenian mob four hundred years before Christ for an example of the reluctance with which newly discovered truths are accepted: the Perfect Teacher, the Perfect Example, the Perfect Man himself found his followers few at first and the doubters many; and modern secular history is full of examples of the same skepticism. Surely the lessons of modern religious history disclose sufficient useless, acrimonious, and sanguinary conflict to teach us of the twentieth century the virtue of tolerance.

And so, if there be those here, who, like myself, have not made the subject which will be discussed a matter of special study, and who, for that very reason perhaps, are unwilling to accept its doctrines, there are not here, I am sure, any who will not listen with a spirit of charity and toleration to the expression of an opinion which may differ from their own, for such is the duty of every good citizen.

So far as the question of the right of Christian Scientists to practise their beliefs according to the dictates of their own conscience has come before the courts of this state, the decisions have been in favor of such right; and the last legislature refused passage to an act so comprehensive and drastic in its terms that, had it been enacted into law, it would, in my opinion, have been an attempted violation of the constitutional, inalienable rights of our citizens. That I had a small share in the defeat of so unwise and unjust a measure it is now a pleasure to remember.

We should never forget that the desire for religious liberty was the guiding spirit which led our forefathers to these shores; it was this spirit which filled their sails and wafted them over the sea; it is this spirit which has begotten and fostered our grand institutions, and that will indeed be a direful day when we, as a people, shall have forgotten these things. And so I bespeak for the lecturer of the evening that careful attention and that openness of mind which are characteristic of those who are looking for light; and it gives me genuine pleasure to introduce a distinguished citizen of a sister state, Judge Ewing of Illinois, who will now address you.—*Correspondence.*

At New York, N. Y.

Mr. Edward A. Kimball delivered a lecture November 24, at Second Church of Christ, Scientist, New York City. The lecture was given under the auspices of Second and Fourth Churches. The church was crowded and many failed to gain admittance.

Mr. Kimball was introduced by Mr. C. E. Finlay as follows:—

Christian Science is a message from God which if rightly followed will free mankind from sickness and sin. It teaches that man is not fallen and a miserable sinner subject to sorrow, disease, and death, but a blessed child of God who has dominion, as the Scripture says, "over all the earth." A Christian Scientist is of necessity an optimist, for he knows that good is the ultimate and the conclusion of all, and that God is a kind, loving, and compassionate Father, who cares for and protects His children. Unity with God is heaven's first law.

I am inexpressibly well pleased that two of our churches have united in calling the lecturer here to disseminate a Gospel that will free the human family from every ill that flesh is heir to. I formerly had the pleasure of introducing the lecturer of this evening in Kansas City to an audience of over eight thousand. Upon that occasion, the sick were healed, the broken-hearted comforted, and the weak made strong.—*Correspondence.*

At Dallas, Tex.

A large and fashionable audience was present at Carnegie Hall last night [December 8] to hear the lecture by Bicknell Young of Chicago on Christian Science.

Judge J. J. Eckford introduced the speaker in the following words:—

Friends, Ladies, and Gentlemen:—That the teachings and promises of our Lord are practical, energizing, and living truths attained in a degree by the earnest and devout seeker in this and every age, is the firm belief of the Christian Scientists. Mindful of the resulting benefits and blessings of this faith, Christian Scientists desire in a modest and respectful manner to attract to it the attention of others, appealing to their calm and dispassionate thought and reason disassociated from excitement, sensation, and emotion, and for this reason, in compliance with a custom of the church, we have invited your presence this evening.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

The Intangibility of Matter.

THE world of scientific research has frequently been called upon to readjust its theories about matter and a material universe, but scarcely ever to such an extent as must follow the acceptance of Professor Ramsey's discovery that the elements can be changed one into another. This discovery, and Professor Lodge's declaration that matter, after all, is only the weapon and vehicle of the mind has caused the *Boston Journal* to ask whether Mrs. Eddy's views about matter are not now verified by science, and to say that "this new theory seems to be a scientific interpretation of the position long taken by the Christian Scientists."

The seriousness with which our contemporary propounds its question and announces its conclusion proves that Mrs. Eddy's postulate, "All is infinite Mind and its infinite manifestation" (Science and Health, p. 468), is not so startling to the twentieth century as it was to the last quarter of the nineteenth. The breadth of view of this editor is in marked contrast to the attitude of those critics of Christian Science who have been much disturbed by what they have looked upon as Mrs. Eddy's unwarranted interference with the substantiality and reality of matter. We fear that those critics who have embarked so eagerly in the good craft "Matter," will soon realize that they are in a leaky boat and out of sight of land if discoveries such as that of Professor Ramsey continue to startle the scientific world.

The trend of modern scientific opinion and experiment has all been away from a belief in the substantial entity of matter, and we may therefore expect to hear less and less about "Mrs. Eddy's strange and illogical ideas" on the subject, but that does not mean that the world has grasped the full import of her teaching about Mind and matter; the former of which she defines in part as "the one God; not that which is *in* man, but the divine Principle, or God, of whom man is the full and perfect expression," and the latter in part as "that of which immortal Mind takes no cognizance; that which mortal mind sees, feels, hears, tastes, and smells only in belief" (Science and Health, p. 591).

We are glad to republish the *Journal's* editorial in another column, and we congratulate the writer of it upon his frank admission of the logic of Mrs. Eddy's estimate of matter. M.

"Rest for the Weary."

IN accounting for the fact that not a few Christian Scientists were once identified with other churches, the editor of a leading denominational weekly has recently said,—

"These people were not fully satisfied with the average Christian experience. They longed for something beyond what they had. . . .

"Of course some people . . . will deny that the ordinary Christian experience is unsatisfactory; but a fairly wide acquaintance with Christian churches all over the land confirms our confidence in the essential truth of our statement. The average church member does not find much in his religion which really satisfies him. He finds something, but he does not find that which abundantly ministers to his spiritual needs, even while it enlarges them.

"Now the striking thing about the early history of our religion is that the first Christians found in their faith precisely that which satisfied their souls. . . . How is it that the average Christian experience of our days falls so far below their level?"

We are of the opinion that the correctness of this statement will not be generally questioned, and if true it certainly merits thoughtful consideration. In commenting upon the matter, the editor goes on to say, "The actual fact is that Christian experience has always proved unsatisfactory, in the first century as well as in the twentieth, to those who do not thoroughly and absolutely surrender themselves to the allegiance of Jesus Christ," and this too will not be questioned. It must be assumed that such surrender to Christ as would bring content is no less possible to us than to "the first Christians," and since its fruits are so longed for, it is entirely proper to inquire why it is not made.

In considering this question we need to remember that the chief explanations of the discontent of Christian people would include the consciousness of sin, poverty, physical discomfort, and the fear of want and death. Now it is certainly true that very many of those who are most "dissatisfied with Christian experience" have been earnest and faithful in their efforts to keep the commandments. They are not wilfully or consciously violating any divine law, and in this sense they are not living in sin. They are, however, burdened with poverty, pain, or the fear of want, impending disease, or death, from all of which Christian Scientists are demonstrating that intelligent and devoted allegiance to the Christ-truth will bring the boon of freedom. Jesus said, "Come unto me, all ye that labor and are heavy laden, and I will give you rest," but how can this be so long as there are present those conditions which always have, and always must bring unrest and discomfort. Did Jesus seek to impart a consciousness of ease and comfort despite the presence of sickness, sorrow, and want; or did he remove disease, and other occasions of anxiety and fear, that rest and quietness might ensue? Was it his plan to impose heaven upon earth, or to supplant earthly conditions with the heavenly?

Regarding this matter, Christian Scientists rejoice in having reached the understanding that it is the province of light to dispel darkness so that it simply is not; that freedom means the breaking of fetters, and that comfort of heart is to come to every believer by the forever passing away of those material sense conditions which have brought distress and unhappiness. They now see how futile is the hope for peace and joy so long as the legitimacy and advantage of disease are clung to; and that escape from the entailment of evil is quite impossible so long as its reality and consequent persistence is maintained.

"Absolute surrender to the allegiance of Christ Jesus"—this prescription of our brother will certainly bring relief to the heart-burdened, and content to the dissatisfied, for it means such a possession of the mind that was in Christ Jesus as will enable us to do his works,—to cast out the demon of fear, to annul the mortal law of sickness, and, ultimately, to overcome "the last enemy," death, even as he commanded. And is it not quite clear that if those who have not found satisfaction in past Christian experience, had been taught that the results of sin are to pass away when sin is forsaken and forgiven, they would have accepted their coveted inheritance and found rest? This is the glory, and strange to say the offence, of Christian Science, that it is claiming and securing, for the heavy hearted, a fuller possession of the patrimony of divine Love,

Digitized by Google

a larger exemption from the afflictive experiences of human life.

It teaches that "our Master fully and finally demonstrated divine Science . . . for the enlightenment of man, and for the salvation of the whole world from sin, sickness, and death. . . . Glory be to God, and peace to the struggling hearts! Christ hath rolled away the stone from the door of human hope and faith, and elevated them to possible at-one-ment with the spiritual idea of man, and his divine Principle, Love, through the revelation and demonstration of life in God!" (Science and Health, p. 45).

This pæan of hope and joy is being sung in many lands by those "who have come out of great tribulation" through their new apprehension, in Christian Science, of the richer, more blessed meaning, for the sad and suffering to-day, of the words and works of Christ Jesus. The "word of their testimony" is certainly reaching many of those who have not found satisfaction in their past Christian experience, and surely our brother will rejoice with them if in the eventide of their discontent it has become light.

W.

True Comfort.

"COMFORT ye my people, saith your God." The great calamity which has recently visited a progressive and prosperous city, has called forth much tenderness and compassion for the afflicted. This is well, and the heart is hard indeed which is not touched by another's woe, even though it can do no more than "weep with them that weep." But while human sympathy may seem a balm for many wounds, a surer remedy is needed to heal them, so that our lives may go on unhurt and even enriched by our hardest lessons.

Humanity in its hours of sorrow is constantly repeating the question of Job: "If a man die, shall he live again?" and in this it often expresses a large measure of doubt. Who is there that can give such a reply as will bid doubt and uncertainty depart forever? who light anew the way to immortality? There was one whose words were so assured as to leave no room for such a query. He said, "If a man keep my saying he shall never see death." We have faith in this statement of the Master, because he so understood life as to be able to prove its continuity and reality,—to awaken from the dream of death them that had "fallen asleep."

There have been many speculations as to the experiences of those awakened by Christ Jesus, but on this point the Gospels are silent. John tells of a feast in Bethany at which were present the Master and one who had lain in the tomb for four days. We need not wonder that many came from Jerusalem to see Lazarus and the one who called him back from the grave, but no word of his experience is given. We are told, however, that Jesus constantly emphasized his mission to bring life to the world, and declared, "The Father which sent me, he gave me a commandment, what I should say, and what I should speak. And I know that his commandment is life everlasting." In the parable of the rich man and the beggar he lifts the curtain, if but momentarily, on what is called the future life. It tells of a man who had lived only for self and materiality. Luxury and pride had held him fast, but in his new conditions he humbly asks for aid from the beggar who had lain at his gate, and whose name he had not forgotten. Perhaps the most touching lesson of this parable is found in Dives' affection for his brethren, which was expressed in his desire for their salvation. Death had not lessened his sense of human love, but seemed rather to have quickened it. If this were true of a bad man, should we not expect that those who were tender and loving while here must have a deeper sense of the permanence of love when they learn that they have never died, and that the experience called death does not quench life and love, nor destroy a single quality of Mind? If we do not put love, hope, or faith into the grave, then where are they? Has all that made life beautiful been suddenly extinguished? Impossible! all that expresses the idea of Life is deathless, and must ever rise above the stormy waves of mortal experience, however dark,—

Distinct as is the swimmer from the flood.

If we have not ceased to love those who have left us, why should we suppose that they have forgotten us?

It is the inspiring idea of God as the only Life, which is the foundation of our hope and faith as Christian Scientists. Apprehending this truth, we can trust divine Love with all that is most dear to us,—for the "here" and the "hereafter" alike,—since to God there is but the "life eternal."

Many broken hearts are healed to-day, many blighted hopes rekindled through the understanding of that sublime declaration of our text-book which says, "Life is real, and death is the illusion. . . . To divest our thought of false trusts and material evidences, in order that the spiritual facts of being may appear,—this is the great attainment whereby we may sweep away the false and give place to the true" (Science and Health, p. 428).

K.

A Gift from Mrs. Eddy.

At the Unitarian Church on Sunday a Christmas gift of three hundred dollars from Mrs. Mary Baker G. Eddy was announced and was acknowledged by a rising vote of thanks. During the erection of their new church the Christian Scientists of this city have been worshiping in the Unitarian edifice.—*Concord* (N. H.) *Evening Monitor.*

Letters to our Leader.

Somerville, Mass., December 30, 1903.

Rev. Mary B. G. Eddy, Concord, N. H.

My Dear Cousin:—I beg to acknowledge the receipt of a copy of poems by the Earl of Dunmore.

As yet, I have read only the "Revelation." That has furnished so much food for thought that I must not and cannot proceed further for a time.

The thoughts therein are so beautifully expressed, and the subject-matter so reverentially handled, that I am profoundly impressed that every conscientious reader must realize the great responsibility resting upon him.

I assure you that I shall prize the volume, not for its literary worth alone, but for the message of love which accompanied it, and which I trust may abide.

Very sincerely yours,

JOHN LEE AMBROSE.

Waynesville, N. C., January 3, 1904.

To Rev. Mary Baker G. Eddy.

Our Revered Leader:—A hush of soul and stillness of reverence fills our thought when it turns to "Christ and Christmas," our Christmas gift from God, through you.

We do not pretend to understand it, but we feel that it possesses the "power of the word" "in the beauty of holiness." We know that it brings to our realization the presence of Spirit.

Artistically, it is the most beautiful of anything we have ever seen. We thank God and you, our beloved Leader, for so great a gift.

Most lovingly and gratefully among those who hope to "follow after."

Mother and Daughter,

SUSAN F. C. HUBBARD,

ELMA RUTH HUBBARD.

New York, January 5, 1904.

Rev. Mary Baker G. Eddy, Concord, N. H.

My dear Leader:—At the suggestion of Mrs. Laura Lathrop, of Second Church of Christ, Scientist, of New York City, I gladly send you a portion of a testimony which I gave at the above church last Wednesday.

For over two years before I heard about Christian Science I suffered greatly from partial loss of eyesight, which at times brought pain so strongly that I found relief only in a dark room and even then had to keep my eyes closed.

Sunlight and all artificial light were at times maddening to me, and even the white coverings of my bed aggravated the condition. Reading became utterly impossible, even with glasses which had been fitted to my eyes by the oculist.

Being deprived of reading I was deprived of my greatest pleasure and I became convinced that life was not worth living. I was on the verge of "having the courage of my convictions" when a woman spoke to me of a Science which was Christian, wherein God was proven to be Love, and disease was proven to be unreal, etc., all of which sounded extremely absurd, but which set me to thinking, with the result that I finally bought the book Science and Health, but with a strong feeling that I was throwing away three dollars.

I felt such disgust at my credulity that I did not even open the book for some time after I brought it home.

In that antagonistic spirit I took up the book one day and began to read. When I laid it down,—still resisting,—I realized that I had read more at that one sitting than I had read for months before, and with subsequent readings my eyes were entirely healed, so that now I apply them closely from seven to twelve hours every day. I have not used glasses since I bought that wonderful book.

That your teaching of the Christ Science is practicable as a healing power I have had other proof beside the above instance, and that I am grateful to you I am trying to prove by endeavoring to be "the good ground" in which the seed was sown, knowing that there is no better way of thanking you.

In Love and Truth I remain

Yours respectfully,

GEORGE FARREN.

Sydney, N. S. W., November 5, 1903.

Rev. Mary Baker G. Eddy.

Beloved Leader and Friend:—We, the members of First Church of Christ, Scientist, Sydney, in meeting assembled, desire to send you greetings and heart-felt gratitude and love for the revelation of Truth in "Science and Health with Key to the Scriptures." We are thankful for all the inspiring messages that you have given, and for proclaiming what we now know to be true,—that "it is the genius of Christian Science to demonstrate good, not evil; harmony, not discord; for Science is the mandate of Truth, which destroys all error."

Most of us have come out of much tribulation, either mental or physical; and we rejoice that through the study of the Bible, as illumined by your words, we have felt the touch of God's healing power, and are now daily seeking to reflect the graces of Spirit, and to follow our Leader as she follows Christ. As the spiritual sense of the Word has been unfolded to our understanding, "clouds of doubt and creeds of fear" have vanished, and the beacon light of Truth has shown us the pathway that leads to perfect Life.

We would sing a song of praise because Christian Science, in fulfilment of its world-wide mission, has, as you foresaw, extended "southward to the genial tropics, with the Southern Cross in the skies,—the Cross of Calvary, which binds human society into solemn union." As a winged messenger of Love it is being welcomed in every state of this great Australian Commonwealth, and will be a potent influence in exalting this into a nation of righteousness.

You have reminded us that "Obedience is the offspring of Love." As we recall your devotion to the noble mission entrusted to you, and the joy and peace and health that have come to us individually as the result of your labors, we feel that we cannot show our reverence and appreciation better than by taking as our watchwords "Truth and Love," believing, as you have told us, that "If we abide in these, they will abound in us, and we shall be one in heart, one in purpose, one in motive and pursuit."

Signed on behalf of the Church,

MARY M. ROBINSON, *First Reader.*
ROBERT NALL, *President of Directors.*
HARRIET M. VIRTUE, *Supt. of Sunday School.*

Annual Meeting in Concord, N. H.

FIRST CHURCH OF CHRIST, SCIENTIST, held its annual meeting last night in the reading room, 14 North State Street. The reports of the officers for the past year showed substantial growth. The treasurer reported all bills paid and a balance in the treasury. Grateful thanks were voiced to the revered Leader, the Reverend Mary Baker Eddy, for her munificent gift of $120,000 for the beautiful new church edifice now being erected. Interesting letters were read from kind friends in all parts of the country who have made generous contributions toward the new church. A cordial vote of thanks was passed to the many generous donors, who, out of their gratitude for benefits received, have thus liberally remembered the church in Mrs. Eddy's home city.

The following officers were elected for the ensuing year: President, Joseph A. Moore; treasurer, George H. Moore; clerk, Miss Mabel C. Gage; auditing committee, Horace G. Boutwell, James R. Hosking, Mrs. Edward A. Grover; trustees, Irving C. Tomlinson, Miss Mary E. Tomlinson, George H. Moore, Mrs. George H. Moore, Fred A. Piper, Mrs. Fred A. Piper, Joseph A. Moore, Miss M. Elizabeth Thompson, William A. Clark, J. Wesley Plummer.

Concord (N. H.) *Evening Monitor.*

WE are pleased to learn that the Canadian government has removed the Christian Science Hymnal from the list of dutiable articles. Our text-book, Science and Health, has been admitted free since the year 1895.

THE special Christmas number of the *Oakland* (Cal.) *Tribune* devotes nearly two pages to a finely illustrated sketch of the growth and present status of Christian Science in the Pacific coast states. An interesting portrait of our Leader is given, with fine exterior and interior views of the beautiful churches at Los Angeles, Riverside, Oakland, and other places.

The Christmas number of the *Washington* (D. C.) *Times* also contains a well-illustrated article on Christian Science, its teachings and Founder.

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

Testimonies of Healing.

I feel it a privilege, to give to the Field through our periodicals, a statement of the benefits of an understanding of the truth as taught by our revered Leader and Teacher, Mrs. Eddy. From a child, I had been afflicted with a stomach and bowel trouble, which at times caused me great suffering. In the year 1888, it reached a condition which the physicians called bowel dyspepsia or consumption, and they said I could not live over six months.

Only those who have been in a like condition can know what I suffered in the summer and fall of that year. In November I gave up medicine, as it did me no good and seemed to cause more suffering. I told my people I would just rest until I could gain strength enough to take the train to our county seat, where I could take electric baths, which I hoped would at least relieve my suffering. This I accomplished, but after taking the baths for a month I was not any better but much weaker and more emaciated.

I found, when I reached town, that my friends there were taking a new kind of treatment called Christian Science. I had never heard of it up to that time. The practitioner gave me literature to read which fully met my approval, and I very much desired to see the book Science and Health, to which frequent reference was made in the literature. There was only one copy in the city, and that belonged to the practitioner. I was permitted to have it for a few days, with the result that I bought a book and asked for treatment. The first treatment took away the fear of eating, to which I had long been a slave. I ate a hearty supper with good results, and have always eaten whatever was set before me since that time. Other conditions began at once to improve, and proper action to take place. While the healing was slow it was a perfect cure.

One thing I wish to mention is this, I had become so despondent through much suffering that I did not wish to live, and took no interest in anything about me. After I began treatment life began to seem very desirable, and everything seemed clothed in beauty,—I was awakening to the real as I had never seen it before. I have found in the little understanding of Christian Science I have, that my every need is met, spiritually, mentally, physically, and financially. The statement, "God is All," is being comprehended more clearly every day.

It has been my privilege to have class instruction, and I have been enabled to extend the healing thought and word to many suffering ones, for which I am truly thankful. I have seen the power of Truth demonstrated over inflammatory rheumatism, heart trouble, consumption, contagious diseases, and many other forms of error. One case of the latter I will mention.

The first of October, 1902, I went home from my work and found my sister's little son, three years old, sick. His face, head, and neck were broken out with a peculiar eruption which the family feared was small-pox. The second day they thought it best to call in the family physician. He came and examined the case, and when he came the second time that day he was much excited and told them he thought it was as they feared. He asked them not to go out of the house for anything, and he would not quarantine them until further developments. That evening they informed me of the doctor's opinion, and as soon as the house was quiet for the night I went to my room and read the ninety-first Psalm carefully and prayerfully, to the verse which says, "Neither shall any plague come nigh thy dwelling." I stopped there and asked myself, if God had permitted a plague to come nigh my dwelling when I was unaware of its approach. I could not answer the question in the affirmative, because I knew this to be a statement of divine Principle which could not change. There was no small-pox in my home, neither indeed could be. I saw the complete nothingness of the claim of contagion, of the development of error.

When I saw the child, before going to my room, he was fairly purple with fever, and the great spots stood out on his face and were festered, presenting a threatening appearance. His fever left him at about midnight, and he has never had any since. Next morning the spots were disappearing and were drying away. The doctor came in the morning and could not account for the condition, and in the afternoon brought two experts. They could not name the condition, said it was clear beyond the ordinary. The whole family, myself excepted, had to be vaccinated. The trouble continued to pass away, and the third day after the doctor was called he dismissed the case, saying, "It is chicken-pox, but I never have seen a case like it." All the doctors were nonplussed. My sister and family have not yet seen that they need Science, but they did recognize this demonstration of the power of Truth over a condition which filled the house with such an intensity of fear as I had never seen there before.

I wish to take this opportunity to thank our Leader and Teacher for the Key which unlocks the treasures of Truth so that we may utilize them in every time of need, and I hope that my life may be a living expression of gratitude which will grow brighter "unto the perfect day."

E. PHELPS, Pittsburg, Pa.

[Translation.]

I gladly testify to the blessings which have come to me through Christian Science. Six years ago, through treatment and much reading of our beloved text-book, Science and Health, I was healed of a lifelong disease and of conditions which were often unbearable. Not only for this am I grateful, but I am still more grateful for the elucidation and interpretation of the Scriptures. What I had desired for so many years, I have now received, and I often ask myself, why could I not find this simple truth sooner and know that God is All in all, since I always loved God and His kingdom from earliest childhood and sought enlightenment with an ardent desire for all that was related to the mission of Christ?

All the qualities needed for the comprehension of this great truth were combined in Mrs. Eddy. I feel touched with profound gratitude for her firm, faithful perseverance amid the many trials which the world has caused her, instead of rewarding her for this greatest of all benefits, the knowledge of Truth which makes us free. This clear current of revelation in Mrs. Eddy's writings refreshes humanity which is sighing for salvation. For nineteen hundred years the word found in John: "And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent," has resounded through the world, yet not until we came into Christian Science has it been clear to us what this knowing means.

I wish to speak of one of the many demonstrations which I have had through this truth. Last January I suffered from a very severe and painful attack of inflammation of the lungs, my breathing seemed obstructed with phlegm on my chest, the cough seemed to choke me, my head was dizzy, and at the outbreak of this attack my effort to demonstrate was ineffectual. The third morning I was awakened early and it seemed as if the trouble had reached its crisis. I thought I must choke unless relief came quickly. I rang the bell, because I was alone and asked for the card of the Scientist whom I intended to have called, when suddenly I remembered how often I had been healed of such sudden attacks of illness through reading Science and Health, and that God was just as near to me as He had ever been; I belonged to Him, and was made in His image.

I sent for a member of the household to come in, a lady who was not opposed to Science, and asked her to read

Digitized by Google

to me. I could neither raise my head from the pillow, nor open my eyes, the fever was so intense. After she had read to me for an hour, I felt so much relieved that I could read myself. I read for another hour, undisturbed by cough; then I could rise, strong and free from fever. I coughed occasionally for a few days, but it disappeared without any other help than the spiritual overcoming, this understanding of our freedom in God.

MISS LUISE STROPP, New York, N. Y.

In gratitude for the benefits derived from Christian Science I wish to relate what is considered a wonderful case of healing.

In February, 1903, my younger brother was working in Mishawaka, which is only four miles from South Bend and connected with it by street cars. It was the custom for him to come to South Bend and attend church.

For two weeks he failed to appear at church and I received no information until my attention was called to an article about him in a local paper which stated that he had been removed from his boarding house to the county infirmary, that he was suffering from pneumonia and peritonitis, and that no hope for his recovery was entertained.

I investigated immediately and found that he had become delirious, and did not know enough to tell any one about me, and as he had been in Mishawaka but a short time no one knew anything about his relatives, so when the physician pronounced the death sentence (he having been under a doctor's care), his landlady proceeded at once to have him removed from her house. He was wrapped in blankets, put in an ordinary hack, driven two miles to the county infirmary, and left there without any one to care for him except an old man who was an inmate of the home.

I engaged the services of a local practitioner and had him removed in an ambulance to a Scientist's home where he received Science treatment and the best of attention. In four days the symptoms were entirely destroyed, and in a short time he regained strength and was able to call on the physician in Mishawaka who attended him, and was greeted with the remark, "Well, I never expected to see you alive again."

Then a lady Scientist had him come and make his home with her. He secured a better position and is now doing nicely in Science and in every way. Thus it was proven again that "Divine Love always has met, and always will meet, every human need" (Science and Health, p. 494). As I recall this experience my heart goes out in gratitude to God, and also to Mrs. Eddy for giving us Christian Science. I am deeply thankful to the practitioner and to the Scientist who gave my brother so nice a home.

FRED MCNULTY, South Bend, Ind.

The whole family on my mother's side, as well as my mother, passed away with consumption, and the doctor told my father that he would not keep me till I became a man, but Truth came in time to rebuke this claim of error, and has proved to me that God is my Life, and in Him I have my being.

That Life does not lead to death, was proven to me last July, when I was cured of typhoid fever in a short time. I had not been feeling well for a couple of days, and had been eating very little. I came home one evening quite sick, but I thought to care for myself and not ask for help, so I read and worked that night, and it seemed to destroy the fear of the fever and I went to sleep before morning. In the morning I seemed to feel all right, with the exception that I was weak. I went to work that morning, Wednesday, but I had eaten no breakfast and by noon I had to come home. I was nearly exhausted, as I had been working before a hot furnace, and it seemed as if my head would burn with the heat.

I tried to telephone to a practitioner that afternoon, but as the telephone was out of order I could not reach the Scientist. I then waited till Thursday noon, and during this time I was up only a few minutes at a time, when I had some one telephone for me. They could not get the practitioner, so I dressed myself and went about five miles on the car to her home. I was in a high fever when I reached there, and she had me stay at her house, which was much better for me, as I was boarding with people that were not Scientists. The result of the work was seen immediately, although the fever was high for a few days, and then error tried to manifest itself in chills, but they were checked each time and did no harm. My bowels then gave trouble, but my strength was in God, and in less than two weeks I was out around the house.

During this time I did not miss many times sitting down at the table with the rest of the family, and eating what I wished. I felt the power of divine Love manifested in the peace and harmony of a Christian Science home.

In less than three weeks I made a trip home, a distance of a little over three hundred miles, and carried a heavy suitcase to and from the depot.

I am very thankful for all Christian Science has done for me, and I am very thankful to Mrs. Eddy, who has shown us the way.—JOHN B. SITES, Pittsburg, Pa.

I want to give my mite to the world that others may know of the blessings which Christian Science will bring to them.

Two or three years ago, on coming home from a visit in the East, I was taken with chills and fever, a type of malaria which is prevalent in this part of our country. I had been interested in Christian Science for some time and had had treatment. After having a chill I would get up feeling very well, but on the third day I would have another chill. This continued for about two weeks, my friends and relatives all the time insisting that I should call a doctor. Finally I consented, and a doctor came to see me. He prescribed such strong and horrible medicine that I was in bed for a week, and when I did get up I was so weak I could hardly walk and was as thin as it is possible to be.

This was in the fall, and in the spring the chills returned. I again had Christian Science treatment, determined that I would rely upon Truth, for I knew if Christ should make me free I should be free indeed. I had four or five chills; then I was healed, and felt perfectly well and strong. Soon after this I went through a class in Christian Science, as I wished to know more of this truth which had been such a help to me. I had one more chill while going through the class, but since then have been perfectly well.

I am indeed grateful for the truth as given in Christian Science, and should this be read by any one who is suffering from this terrible ailment which clings to our Southern States, I hope it will encourage him and show him where to go for health and strength—to God, "whom to know aright is Life eternal" (Science and Health, Pref. p. 7).

JESSIE W. HUCKER, Houston, Tex.

I did not think when I used to throw aside the papers with the testimonies that my wife gave me to read and say they were a pack of lies and fairy tales and I did not believe a word of them, that I would some day be adding my testimony to the great work that our Leader has done for us and mankind. I do not suppose any one ever fought against Science harder than I did.

My wife had been a great sufferer and our doctor had ordered me to take her to the mountains where we heard of Christian Science through the wife of the hotel keeper. Up to that time we were nothing more than atheists without

Digitized by Google

God or hope in the world. When she told me she had put herself in the hands of a Christian Science practitioner I thought she had gone crazy, and told her so. At the start she had very little confidence in it herself, but as the truth dawned upon her, she asked me to stop my ridicule, as she had found what she had not found in any other creed that she had investigated,—a loving God.

As her bodily suffering left, and knowing her to be a woman of sound judgment, I thought perhaps there was something in it after all, but while I stopped ridiculing it on her account, I would not give in that it was anything but a delusion and a snare. As she became more interested in the work and I saw the great improvement in her health and that she had stopped all drugs, I told her she could treat me, not believing any good would come from it, as I was a terrible sufferer from constipation and rheumatism. My friends said I was a walking patent medicine shop, as I was always taking everything new that I saw advertised. I had always been a hard drinker, and when excited in business, a very profane man. As the treatment went on and I began to be better physically, the spiritual commenced to manifest itself. I realized what a terrible thing profanity was and I quit it. I stood with a glass of whiskey in my hand ready to drink it, and I realized how wrong it was. I asked my wife if she knew what I was going to do with it, and she replied, "Drink it." I told her as I threw it in the wash basin, "No; I will never drink a drop of liquor again," and by the grace of God I have not, and that was three years ago. Now I want to return thanks to God, and to our Leader for Christian Science, and for the great blessings it has brought me and mine.

ADRIAN HEGEMAN, Brooklyn, N. Y.

Eight years ago when at a boarding school in Dresden, Germany, I was suffering terribly with my back. I had been to many doctors, who afforded me no relief, and they could not even tell me what was the matter with me. I had just been to one doctor who had experimented in burning my back to the bone with a red hot needle eleven times, to see, as he said, if the pain of the burning would dominate the other, and I was completely worn out, and did not care to live, when I was told about Christian Science.

A Scientist came to see me and advised me to read Science and Health. I did so and was healed without any treatment having been given. But still I did not think about the spiritual part, and simply thought I could be saved suffering and doctors' bills by having Christian Science treatments.

When I was in America three years ago, I was physically strong, but was suffering mentally, as I had grown tired of a society life, and did not know how to be happy in any other way. I was told about a practitioner who would talk to me and help me to understand Christian Science, and the first visit I paid him, I felt satisfied that he had something I greatly desired, and that was a contented mind.

Two years ago we came to live in London, England, and I had class instruction, and since then have proved for ourselves that the Christ-truth is still at work reclaiming the sinner and healing the sick.

Headaches, colds, mental depression, and many minor troubles have disappeared one after the other and I am growing stronger, physically, morally, and spiritually every day. I am most grateful to God for the truth which Mrs. Eddy has given to the world, and also to my teacher, who has helped me and taught me so many wonderful things.

MINNIE P. MUSSER, London, Eng.

I am a boy eleven years old, and go to Sunday School every Sunday. A little over a year ago I was taken with Saint Vitus' dance in its worst form, but I am thankful that it was all overcome by the truth which we learn in Christian Science. I have been well and happy ever since, although a neighbor told me that it would come back every spring, but I have learned that that is not God's law.

When I went out to play again, a boy asked me what doctor I had. I told him that I had taken Christian Science treatment, and he said, "How can that help you?" I told him that it was praying to God to help us. Then he said, "How can God heal?" I asked him, "Do you believe God made you?" He said, "Yes." "Well," I said, "if God made you, can't you believe that He can heal you?" Then he stopped to think, but said nothing.

I am very thankful for what we learn in Sunday School. My little brother and sister and myself are members of the Christian Science Sunday School of First Church of Christ, Scientist, Sheboygan, Wis.

WALTER ROBINSON, Sheboygan, Wis.

"Glory to God in the highest, and on earth peace, good will toward men." This morning I seem to hear those blessed words, and I know and realize their meaning as never before. I would like to express my thanks and gratitude to God, to our dear Leader, Mrs. Eddy, and to all the dear friends who have helped to bring the Christian Science thought to my consciousness. There is nothing in the whole world that could induce me to go back to the old thought, for all I am and have I owe to Christian Science.

I am indeed thankful for all the blessing that has come to me, and I realize every day and hour that I have been born again. Four years ago I was wretched, miserable, —no hope, no God,—but now everything is changed and I know what it is to live, for God is my Life, and God is All in all to me. May divine Love be always with those who love God and His cause in Christian Science.

WM. N. GREAVES, Cleveland, O.

I should like to tell of some demonstrations which have proved to me that God is All in all.

When I was a child I had measles, and through it lost the sense of hearing in one ear. I have regained perfect hearing through Christian Science. I have also been healed of eczema, for which I had been doctored for several years.

My sister was severely burned about the hands. She was unable to move her fingers, but in less than twenty minutes' treatment she could do so easily, and the pain entirely ceased.

For these blessings I am grateful to God, and to our dear Leader and Teacher, Mrs. Eddy.

MRS. MARY BAGLEY, Chicago, Ill.

[Translation.]

For five years my grandmother suffered from inflammation of the hip-joint, and employed a physician therefor. The physician helped her so far that she was out of bed, but could not walk well without being supported, and it caused her great pain. She could not sleep nights.

We then told her of Christian Science and she took treatment. After the fourth treatment she could walk without any support and the pain had entirely disappeared. She therefore expresses her sincere gratitude here.

JOHANNA JACOB, Dresden, Germany.

Revelation has not yet ceased in spite of theories about inspiration. So long as one man can be found who is sure that there is yet more light to break from God's wisdom, it will never cease.

"The Insight of the Christian" by REV. W. P. ALLIS.
The Outlook.

Digitized by Google

From Our Exchanges.

Evil begins in the heart. Before any one goes astray outwardly he departs from righteousness inwardly. The starting-point of every wicked life is in the thoughts of the mind and the desires of the heart. To repent of outward wickedness and continue to indulge evil thoughts would be to cut down the evil tree and leave the living root in the ground to sprout again and send up another tree like unto the former. In true repentance the evil must be overthrown, root and branch, and put away forever. Genuine repentance goes to the bottom of the heart. "Let the wicked forsake his way, and the unrighteous man his thoughts." Uncharitable thoughts, unkind thoughts, deceitful thoughts, dishonest thoughts, impure thoughts, vain thoughts, unbelieving thoughts must be put away.

The Christian Advocate.

Conversions which do not involve the quickening of moral sensibility, the elevation of moral standards, the purpose to embody all possible moral qualities, are conversions only in name. To profess is not necessarily to be born from above. The new life which begins with the entrance of Christ into the heart must be like Christ's life in intent and purpose. Unfortunately, many have fancied that the Christian life consists in assent to formal statements and the establishment of outward relations. It is an age-long fallacy. Jesus met it in the Scribes and Pharisees, Paul battled with it in the infant Church, it persists to this day. Nothing is so difficult of attainment as a right heart. It is hard to be pure, genuine, honest, forgiving, unselfish, to love our neighbors as ourselves. But these things are of the very essence of Christianity.—*The Standard.*

The religious life is not to be reached at a bound, nor does it come as the result of any immediate and sudden turn of the pathway. We need to put ourselves under positive training in order to come forward in the course of development into the higher life and into the spirit of that eminence which we look up to and aspire after. We need to begin to plant and water and cultivate and secure in our hearts and consciences and souls the germinal and the promissory. We need to attend now and all the time to the taking of forward steps. We need, without further delay, to push on with our faces set toward the goal of unselfishness and purity and holiness and love.

The Universalist Leader.

The old thought, that death somehow atoned,—the old idea I can remember holding myself that, if before the gate was finally shut, I could only get through, I should be as well off as John or Paul,—this, lying somewhere in the background of the mind of thousands of people, is the most intolerable nonsense, if we stop to analyze it. You will not get to heaven in the next world unless you get heaven into yourselves here. You will get into no more heaven in any world than you first get into yourselves. So that we do need something to prepare us for the next life and we need something to prepare us for this.

Rev. Minot J. Savage, D.D.
The Christian Register.

Many are saying, "Go to! Let us have a religious revival." But the floods do not come until the springs are full and the streams are everywhere rising. We shall have a revival of religion when there are people enough who are filled with the spirit of it, and who, overflowing with it, form streams of blessing which inundate the community.

The Christian Register.

The Acts and the Epistles contain no reference to Jesus' birth or his infancy as reasons why men should accept him as Saviour and Lord. The early disciples presented his life and his teaching and his deeds, attested by his death and resurrection, as sufficient to bring men into his kingdom and to prove that he was the Son of God.

The Congregationalist.

But it must never be forgotten that the essence of true worship is in the heart of the worshiper, not in the elaborateness of the worship.—*The Christian Advocate.*

Church Tenets.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to William B. Johnson, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

Building Fund of the Mother Church.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

Stephen A. Chase, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

Clerk of the Mother Church.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

Church Treasurer.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to Stephen A. Chase, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

Notice.—Members of the Mother Church who have changed their name by marriage will please notify the Clerk and send $1.00 for change of name in the published list of church members. Changes will appear in the list of names semi-annually only,—July and December.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

Stephen A. Chase, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America.

It contains about thirty-eight pages of reading matter, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

Reprints from the Journal and Sentinel

THE TRUE LAW.

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

The Germanic Museum of Harvard has received from a committee of German artists and scientists interested in the museum, the collection made in Germany of copies of the best work of Nuremberg and Augsberg goldsmiths and silversmiths from the fifteenth to the eighteenth centuries. In the collection are imitations of about fifty-five cups, basins, and dishes of various designs, many of them of great beauty and historic interest. The copies are made of bronze, gilded and silvered by electroplating.

Among the famous cups copied are the Landeshadenbund cup from the Museum of Gratz; a cup presented to Martin Luther by the Wittenberg town council, and the Corvinus cup presented to the Vienna Council by King Corvinus of Hungary in 1642.

The annual report of the Postmaster General for the fiscal year ending June 30, 1903, shows that the receipts from ordinary revenue rose to $131,984,535 for the year, an increase of $12,026,306 over the preceding year; that money order receipts rose to $2,239,908, an increase of $350,091 for the year. The total receipts showed a gain of $12,376,396, but expenses rose to $138,784,488, an increase over the preceding year of $13,998,791. The deficit for the year is $4,560,045, which was more than $1,000,000 less than was estimated.

The Senate Committee on Foreign Relations has adopted an amendment to the Panama Canal Treaty giving to the United States partial jurisdiction over the harbors of Colon and Panama, in order to protect the shipping interests of this country. The amendment is in the nature of a safeguard, and, it is believed, will not meet with any opposition from the Republic of Panama.

The Chinese Emperor has ratified the American and Japanese treaties of commerce with China. It has also been ratified at Washington by protocol by Secretary Hay and Sir Chentung Liang Cheng, the Chinese minister. The treaty provides for the opening of the ports of Moukden and Antung, in Manchuria, to the world's commerce.

The special legislation enacted during the coal strike last winter, allowing a temporary rebate on duties collected on coal, expired last week. A reciprocal provision designed to take its place in continuing "free coal" will probably be enacted at the next revision of the tariff, which is contemplated early in the next Administration.

Rear Admiral Evans and other naval experts have declared that Pearl Harbor in the Hawaiian Islands, for which large claims were made for its possibilities as one of the greatest naval stations in the world, is valueless for that purpose without an immense expenditure of money in straightening out the natural channel.

The visit of King Emmanuel and Queen Helena to the recent exhibition of the work of the students of the American Academy at Rome, and their congratulations to Director Mowbray on the progress made by American Art, formed the first high recognition and appreciation the school has received there.

The founding by the Russian Government of an Agricultural High School for Women, whose students will administer the Crown Lands on equal terms with men, will afford Russian women an opportunity to take up agriculture as a regular profession.

President Roosevelt has sent a message to Congress recommending that the Federal Government take steps for the preservation of the Calaveras big tree grove, which he describes as "not only a California, but a National inheritance."

The War Department has accepted the proposal of a New York banking firm for the entire $7,000,000 bond issue of the Philippine Government for the purchase of the Friars' lands, at $107.577.

The Government makes enough money on the cent pieces made to pay the entire expenses of the mint.

The Senate has confirmed the nomination of William H. Taft to be Secretary of War.

Foreign.

The new treaty recently negotiated between Cuba and Italy reserves to the President, as well as to the King of Italy, the right to expel any and all persons, natives of the other Power, from the country, whenever these shall be deemed personæ non gratæ, without the formality of explaining the reasons for such action. Also, the citizens of each party to the compact residing in the other's territory are obliged to submit whatever claims they may at times wish to prefer, to the courts of the country in which they reside, and are bound to accept and abide by whatever decision these may render in the case laid before them for examination.

The Russian Government has informed the Powers that it will respect fully the rights any nation has in Manchuria by treaty with China. This declaration is made without reservation. It is stated on what is considered trustworthy information that Russia tried unsuccessfully to negotiate a war loan with the Paris banks, but was offered no encouragement whatever and was informed that it would be useless to consider such details at this time.

Wu Ting Fang has been appointed to be junior vice-president of the Chinese Foreign Office, as the result of an audience with the Dowager Empress, who asked for his views on China's best policy. The appointment will enable the Legationers to deal with a diplomat trained in foreign methods, speaking English, and able to grasp the questions presented to him. Wu Ting Fang is now in a position to exert an influence for reform.

The situation in the East is still critical, and, although war preparations are being pushed, it is hoped that diplomacy will yet arrive at a satisfactory understanding. Japan has already requisitioned thirty merchant vessels for transports, and the two cruisers recently purchased from China have left Italian waters for destination unknown. Late advices indicate that Russia is actively increasing her guard at Seoul.

The Porte has notified the Austro-Hungarian and Russian ambassadors of its full acceptance of the Macedonian reform scheme, and of its consent to the repatriation of the Macedonian refugees, promising amnesty to all political prisoners, with the exception of dynamiters.

M. Jean Léon Gérome, the French painter and sculptor, one of the most eminent artists of the nineteenth and early twentieth centuries, passed away in Paris on the 10th inst. He was born May 11, 1842, at Vésoul.

Industrial and Commercial.

Reviewing the increase in grain production in the South in 1903 the *Manufacturers' Record* says: "The world's attention has been so largely centered upon cotton by reason of the high prices now prevailing, that the advance in grain production in the South has attracted less notice than it would otherwise have received. The yield of corn in the fourteen Southern States last year was 640,000,000 bushels, against 502,000,000 bushels in 1902; in wheat there was an increase from 48,000,000 bushels in 1902 to 68,000,000 bushels in 1903, and in oats a gain from 56,000,000 bushels to 64,000,000 bushels. The total increase in the grain crop of the South was 166,000,000 bushels, the yield for 1903 having been 773,000,000 bushels, against 607,000,000 bushels in 1902. The total value of the corn, wheat, oats, Irish potatoes, rye and hay crops(the only ones on which the Agricultural Department has yet made its full reports) for 1903 was $506,887,000, against $402,700,000 in 1902.

An agreement between Mayor Johnson and the Cleveland Electric Railway Company for three-cent fares within the city of Cleveland has been ratified by the directors of the Railroad Company. The agreement is practically a full victory for Mayor Johnson in the fight that he has waged for nearly three years.

The assessed valuation of taxable property in New York City for 1904 shows a total for all boroughs of $4,798,344,789, an increase of $281,978,299 over 1903. Land values comprised $3,697,586,935 of the total.

General.

At the recent meeting of the American Historical and Economic Associations in New Orleans, the American Political Science Association was organized. The objects of the new society are to promote the scientific study of politics, public law, administration, and diplomacy. It is intended to hold annual meetings in close affiliation and harmony with the older associations, and to publish investigations in the various fields of political science. Not only academic students of these subjects, but also lawyers, editors, legislators, and public officials have been interested in establishing this association.

The death rate for New York for last year as calculated by the Health Department, is the lowest in the history of the records of mortality of that city. It was estimated at 18.15 in 1903 as against 18.75 in 1902. Full returns may show it to be even less. Since 1890 there has been a great and steady diminution in the percentage of mortality. The death rate of Manhattan and the Bronx was as high as 26.31 in 1891. In 1898, taking in the whole city as now constituted, it had fallen to 20.26, in 1901 to 20.

The Chicago health department has discovered that an average Chicagoan of today lives twice as long as his grandfather, and that the ratio is steadily increasing.

New York is said to have spent $800,000 for Christmas-trees, $600,000 for holly, $400,000 for mistletoe, and $200,000 for evergreens this year.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

From our Contributors.

Physician, Heal Thyself.

WILLARD S. MATTOX.

THE beginner in Christian Science has not been long at work, before he uncovers one of the small lies of mortal mind which is invented just to retard his growth and delay his final victory. It is such a very little falsehood, hidden away in the pile of rubbish which has been dignified by the name "myself," that very often he overlooks it until, like all overlooked lies, it grows large enough to demand some attention. It is much easier to dispose of this lie when it is first discovered than later on, but we need a keen vision and sound metaphysics to detect it. Though ever so little, it requires a whole sentence to state it. This is what it calls itself: "It is easier to heal others than to heal myself."

Away back in the days of Job, when suffering was just as real to the man made in the likeness of Adam as it is to-day to Adam's progeny, this insinuating libel on man's God-given right of self-government was uttered by one of Job's voluble advisers. The same evil which voiced itself through a person then, talks to us now, sometimes through persons, oftener by means of thoughts which we very unwisely call our thoughts. Said Eliphaz the Temanite to Job, "Behold, thou hast instructed many, and thou hast strengthened the weak hands. Thy words have upholden him that was falling, and thou hast strengthened the feeble knees. But now it is come upon thee, and thou faintest; it toucheth thee, and thou art troubled." This was about the most discouraging thing a sick man could be told: that he could do nothing to help himself. Such philosophy is atheistic, for it denies God's power to heal, turns him to persons for the aid needed, and presents an outlook altogether hopeless and depressing.

Jesus had to meet this pitiless lie: "He saved others; himself he cannot save." The diabolism which had pursued this Godlike man to the very finish, was capable of a last refinement of cruelty. It was the distilled essence of all that was evil which uttered itself in those words. At the very time when he most needed encouragement, the murderous carnal mind sought to prevent his proof of the continuity of existence by that taunting lie. It was calculated more than anything else to pierce the patient heart, to transform vigorous, assertive consciousness into weary apathy. The world glories in the victory won that day over the malicious and deadly suggestion of incapacity.

The design of this lie is to paralyze the natural recuperative effort which immediately follows the suggestion of suffering. It assumes that the pain is real, that there is something about you which can be pained, and that you are afraid of pain. Hoping that you will believe these untruths, it then suggests that you need help, that you cannot heal yourself, that somebody else can bring you relief much quicker than you can do the same thing for yourself. If you believe it once, it is harder to disbelieve it the next time it has occasion to talk to you. It does not take long to acquire the habit of letting others do your work for you, and then you are successfully stalled in your progress and the lie has done exactly what it started out to accomplish,—it has convinced you that pain is personal, that because it is your pain, you cannot get rid of it as easily as you could help others to be rid of their pains, or, conversely, as well as others could help you.

At the root of this lie, is the belief that pain is personal, that some specific pain is the property of some particular person. It follows that the pain which calls itself *your* pain seems to have a bigger hold on you than the pain which calls itself somebody's else pain. The argument of error is that you can make suffering unreal; *i.e.*, nothing, when it is attached to some other person, but if it belongs to your own experience, it becomes a very different matter. The truth is, disease, like all error, is impersonal and nothing. Science and Health tells us plainly that "Evil has no reality. It is neither person, place, nor thing, but is simply a belief, an illusion of material sense" (p. 71). Evil, being nothing, is neither subjective nor objective, and it really should be no more difficult to destroy the claim of subjective sickness than to overthrow the belief of objective sickness. The scientific fact is that discord has no more claim upon us when it calls itself ours, than when it calls itself the chattel of our neighbor.

Mortal mind has a subtle purpose in putting forward this plausible lie. It is nothing less than the entanglement of the race in a cunningly woven net. The individual who believes this, becomes lulled by an apathy that prevents him from vigorous action. He becomes mentally lazy, a condition in which he can be made to believe many things which are not at all true. "The Bible contains the recipe for all healing" (Science and Health, p. 406), and what does the Bible say regarding this claim? "Work out your own salvation with fear and trembling. For it is God which worketh in you both to will and to do of his good pleasure." This is the truth that heals. We cannot let others work out our salvation. We cannot pay others to work out our salvation. We must do our own work. Individual consciousness must become "cognizant only of the things of God" (Science and Health, p. 276), for itself and of itself. Each one must know the truth about himself and about everything. It helps to have others know this truth, but it requires an individual knowing to destroy a personal belief. It is your "conscious, constant capacity to understand God" (Science and Health, p. 209) which delivers you. When we realize that the Saviour is our Saviour, we have laid hold on a great metaphysical fact which gives us wondrous courage and enables us to combat successfully the evil suggestion that we cannot heal ourselves.

Christian Science pleads for a recognition of the theory of individualism, taking that word in its best sense, to mean the integrity of the individual idea of the Creator. But while we bring to humanity's attention the ultimate need of an individual growth, an individual conquering for one's self, we do not demand the impossible. It would be cruel to refuse to strengthen the weak hands and confirm the feeble knees during that period of development wherein the former things still seem to have a very large

hold on us. Christian Science practice is compassionate, and enables the rich in understanding to help the poor. In Science and Health, p. 420, we read, "If students do not readily restore themselves, they should early call an experienced Christian Scientist to aid them." But in the very next paragraph Mrs. Eddy says, "Instruct the sick that they are not helpless victims; for, if they will only accept Truth, they can resist disease and ward it off, just as positively as they can the temptation to sin." That is the great encouragement to learners, that "*they* can resist disease" as well as another can do it for them, and all the while the conscientious practitioner is helping a patient, he is making it plain to him that with increased understanding he will be able to do his own work.

Self-Condemnation and Humility.

ABBOT EDES SMITH.

BEFORE the advent of Christian Science people were often taught on retiring for the night to think over all that they had done or left undone during the day and to spend much time in grieving over the day's sins of omission and of commission. It was very commonly deemed an important part of the Christian's duty to spend much of his life in mourning over his past sins and failures, and this tended to produce a kind of sad resignation which has sometimes been thought to express a high degree of piety. The story used to be told of a boy whose father drove a nail into a post whenever the boy did wrong and drew out a nail whenever the boy resisted a temptation. At first the post became well filled with nails, but gradually these were drawn out, until finally the time came to draw out the last nail. The father expected the boy to be delighted, but to his surprise the boy burst into tears and exclaimed, "The scars remain!" Each day's record in the book of life was supposed to be permanently marred by the blots of the daily misdoings, and it was forgotten that the prophet Isaiah had proclaimed, "Though your sins be as scarlet, they shall be as white as snow."

When the hour of his betrayal was near at hand, Jesus took with him the three apostles whom he most trusted and asked them to watch with him in a brief hour of prayer. Three times in this hour of his agony he returned to find them asleep. Later on, when those appointed came to arrest him, Peter's first impulse was to draw his sword and fight, but later on he acted upon his second impulse, and with the other apostles he forsook the Master and fled. So when Jesus was on trial at the house of the high priest, only one of the disciples was present in the courtroom, and he not as the friend of the prisoner, but as the friend of the high priest, the chief of the judges who condemned the prisoner. Peter, too, though he loved his Master and wished to know the result of the trial, did not dare to risk his life by openly avowing his sympathy, but stood with the high priest's servants and with those who were probably part of the mob that cried, "Crucify him!" When Peter was recognized and accused of being a friend of Jesus, he positively denied the charge twice, and finally became so frightened lest he might share his Master's fate, that he cursed and swore, confident that this would prove to all that he had no part with the prisoner.

Judas' betrayal was but little worse than Peter's desertion and denial; but the essential difference is illustrated by this: that when Judas realized what an awful wrong he had done, he went and hanged himself; while Peter, though realizing his cowardly ingratitude just as fully as did Judas his ungrateful selfishness, wept bitterly, but arose and pressed bravely on, resolved to try in the future to atone for his awful crime of the past, by living, so far as he might be able, such a life as his crucified Master had lived and taught. And nobly did he succeed. At times he still stumbled, as who does not? but in spite of his faults, Peter was a manly man, honest and earnest, and it was his honest steadfastness of purpose that, whenever he fell, enabled him, instead of uselessly grieving over what could not be changed, to remember the lesson thereby learned and then, forgetting the unpleasant experience itself, to press on with renewed courage in the path of duty. Later when Peter again met the same temptation to which he had yielded before, when his choice lay between a denial of his Master and death itself, he unhesitatingly chose death and bore this last testimony to Truth, as his Master had done.

In similar manner the apostle Paul, who certainly had a past bad enough to grieve over, if, indeed, that were the right method, has explained to us clearly the better way. He says, "I count not myself to have apprehended: but this one thing I do, forgetting those things which are behind, and reaching forth unto those things which are before, I press toward the mark." If Judas, when he fell, had only awakened from his overwhelming and hopeless self-condemnation and, like Peter, Paul, and the other apostles, having learned the lesson of less reliance on self and more on God, had with renewed courage pressed towards the mark, remembering, not the sad experience, but the blessed lesson learned therefrom, even Judas might have left a good record.

Self-condemnation, self-depreciation, is a species of self-consciousness. It is not to be mistaken for humility, and is useful only as a stepping-stone from self-pride and self-reliance to humility and trust in God. Self-condemnation and humility both agree in remembering with Paul, "Who is weak, and I am not weak;" but here the resemblance ceases. Self-condemnation blames and condemns the mortal self for its essential powerlessness, forgetting all else; while humility remembers also with joyous confidence that, as Jesus said, "The Father . . . doeth the works," and as Paul said, "When I am weak, then am I strong." It is when all is prosperous and full of light that one is most apt to be filled with self-pride and self-sufficiency, and to forget God, who is the source of all good; but when darkness comes and all seems lost, there is not much danger of self-pride and, if only one wisely avoids the Scylla of self-satisfaction and the Charybdis of self-condemnation, he will turn with redoubled earnestness to God for help, and, trusting Him, will safely and surely sail on with humility into clear and quiet waters lighted by the sunlight of God's presence, power, and love, wherein he joyfully proves with Paul, "I can do all things through Christ which strengtheneth me."

Seeking and Finding.

LUCY HOLTZCLAW.

A MAN who had spent his life studying the American Indian, his history, customs, etc., visited a resort among the mountains whose site was once the home of the Cherokees. The first morning of his stay, he took a walk over ground that for the past twenty years had been visited by hundreds of people, and his keen eye picked out from the underbrush and stones a fine specimen of an Indian arrow-head. Without special search, he found what he was ever seeking,—knowledge of the Indian,—where untrained eyes had seen nothing.

Jesus plainly tells us what to seek: "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." The kingdom of heaven, he says, is within you, it is the true consciousness, and the Christian Scientist who is progressing is seeking, not so much for results as for cause, for the unfolding of the true idea of God and man and the universe. Christ said, "An evil and adulterous generation seeketh after a sign," and the reward received for such seeking is far from the health and peace which follow the seeking of holiness.

Digitized by Google

Seeking in Christian Science means that we are searching after the Principle by which the healing work is done, the wholeness that comes as a natural consequence of knowing God. If one wishes merely to be healed of a troublesome disease, and then lets the matter drop as if that were sufficient, he is like the nine who were healed but returned not to follow Christ, and such cannot hope to progress in Christian Science until ready to acknowledge the healing as the result of understanding God. Beginning the study thus, seeking the kingdom of harmony, harmonious thoughts are soon made manifest and we find that some long-standing disease disappears, whether it be mental or physical. When our hearts are filled with truth and love, as our beloved Leader admonishes us they should be, and when we seek only good, we can find only peace, and many evidences of love come where mortal thought can find nought but sin, disease, or death. Thus the real healing work of Christian Science is revealed as a necessary outcome of love to God and man.

Spirit and Matter Contrasted.

FRANCES A. GESNER.

IN the text-book of Christian Science we read, "The so-called pleasures and pains of matter perish; and they must go out under the blaze of Truth, spiritual sense, and the actuality of being. Mortal belief must, through Science or suffering, lose all satisfaction in error and sin, in order to part with them" (Science and Health, p. 296). The last clause of this paragraph may be said to present the point at issue between Christian Scientists and other Christians. The latter do not, because no human being can, deny the first clause; viz., The "pleasures and pains of matter perish;" but they do oppose the Scientist's statement that Truth is the destroyer; for all other religionists insist on the reality of material conditions, as being in themselves a phase or part of Truth's manifestation.

As the light of divine Science grows brighter and brighter, how paradoxical, unreasonable, and illogical appears such insistence, such a ground for opposition; what contradictions are involved therein, what admissions are thereby necessitated. If material conditions are real, they must be of God, if one acknowledges God. If they are of God, He must have a material element or essence in His nature or consciousness. Materiality is present only as material sense. How is it, then, that in all the material-sense records of all the ages no man has ever seen, or claimed to have seen, God? Why did Jesus say, "No man hath seen God at any time"? Why does Scripture say, "There shall no man see me and live"? Surely if God had any material consciousness, or essence, there would be a link of communication through our material consciousness. Paul writes, "Flesh and blood cannot inherit the kingdom of God." Why not? No Christian takes issue with this declaration, but why not? If God creates materially, if flesh and blood are in His consciousness, how would it be possible that they should not be worthy to inherit His kingdom. Surely no Christian can believe that God either would or could create something of which He has no consciousness, or that is unworthy to appear in His presence. What an utter contradiction! An inventor, for instance, cannot possibly invent, or create anything of which he has no conception in his own mentality. One might as well say a machine or any invention could never when completed appear in the presence of its inventor, as to say flesh and blood cannot enter God's kingdom, if God conceived and created them. Can God forget, or rid Himself of His own nature or consciousness?

Again, do those who insist on the reality of material man as the creation of God ever consider what all this implies? To say nothing of the sins of material personality,—all the sufferings, pains, disease, deformities, unsupplied needs,—every possible phase of torture is consequent upon materiality. If God created man materially, what possible ground of assurance can there be that He may not continue man's material being? Does God change? If so, how should we be sure of this? If God created man materiality, and we are agonizing in material conditions, what assurance or even hope can we have in prayer to their author to be delivered therefrom? Again, if the most determined claimants for materiality are looking, and must look in view of death, to spiritual consciousness alone for an earnest of continued existence after death, what is the ground of their opposition to the claim of Christian Science that Spirit is the only real Life here and now as well as in the hereafter, and that according to the mentality will be the manifestation or form, which the "carnal mind," as Paul calls it, will reflect; and further that divine Mind—God—is reflected spiritually. Christ Jesus said "God is Spirit," and "that which is born of the Spirit is spirit." Can any Christian object to, or oppose this reasoning?

What have the opponents of Christian Science to stand upon? Which assertion is reasonable and logical: that God —Spirit—creates matter? or that all that "is born of the Spirit is spirit"? Are Christians in general ready and willing to accept the material man, and his, at best, imperfect conditions, and also more generally his heart-sickening experiences—as being "born of Spirit"—God? If they are, which seems impossible to the thinker and reasoner, should they not at least withhold their denunciation of those who, seeking the Science of the eternal Christ, ask of all that appears to material sense, "Whose is this image and superscription?" and where they fail to find response to the test "that which is born of the Spirit is spirit," seek to obey still Christ's command, "Render therefore unto Cæsar the things which are Cæsar's; and unto God the things that are God's."

"Little Children, love One Another."

M. E. WEBB.

ON page 572 of Science and Health may be found the words above quoted, coupled with the statement that it "is the most simple and profound saying of the inspired writer." In looking for the verse in the Bible I found many passages addressed to "little children," many urging the necessity of loving each other, but not this exact statement. I inquired of old Bible students where this passage could be found. Though many told me they were sure they could turn to it, on searching they found as I did that it needed a more careful study to learn this lesson of Love. A few weeks ago, in looking up some references, I took up my large family Bible, and the book opened at the "Lives of the Holy Apostles and Evangelists" by the Rev. W. F. B. Jackson; in the life of St. John I found the words for which I had been looking all these years, and quote in the author's own words, "It is also said that when he had grown so old that he was not able to preach to his converts, at every public meeting he used to be led to the church, and say no more than these words, "Little children, love one another;" and when his hearers wearied with the repetition of the same words, and asked him why he always said this and nothing more, he replied, because it was the command of our Lord, and that if they did nothing else this alone was enough."

Our Master said, "I am come that they might have life, and that they might have it more abundantly;" and if Life is Love, then we must also have Love more abundantly. If we as Christian Scientists are obeying this admonition of the "beloved disciple," "it is enough," for our love to God is to be measured by our love for our fellow-men.

Curing Poverty.

IT has come to be generally recognized by those who have made a study of poverty that economics alone is not enough to explain the poor who are always with us.

The unthinking regard poverty as the result, as it were, of a chance throw of the dice of ill luck, fate, misfortune, and countless other indefinite things which persistently overlook the vital thing, which is the personal equation.

Through bitter experience it has been learned that charity for the poor which does not at the same time demand something from the poor is a practically useless expedient. It is like attempting to bail out the ocean with a bucket.

The truth has been finally forced home that money is not a cure for poverty, and that charity which consists in the giving of money is no charity at all. Such giving merely aggravates the conditions which it tries to destroy, and annihilates self-respect, which is a potent poverty destroyer.

It is now an accepted doctrine that to find labor for the poverty-stricken, so that they may earn money, is the only sort of charity which is really charitable.

Excellent as are the results obtained from this sort of charity, the fact that poverty does not decrease materially on account of its widespread ministrations, indicates that it does not afford a full remedy for poverty.

The reason for this is that it does not take fully into account what poverty really is. It does not hold as a basic fact the truth that poverty is a condition of thought declaring itself in the surroundings of those who are both doing the thinking and who, perhaps, are being thought about.

Why is it that the giving of gifts will not raise any man from poverty into affluence? Simply because the giving of gifts never cures shiftlessness, or discouragement, or fear, or selfishness, or an abiding sense of the power of money, or laziness, or moral stagnation, or moral degeneracy.

These are the fundamental causes of poverty, not all the causes by any means, but some of the most prevalent. These are the diseases which must be healed before the person afflicted by them can come into his birthright of domination.

How can they be healed? Evidently not by the doctors, for these diseases are qualities of thought.

Many of them can be reached by proper instruction, by teaching incompetence to be competent, by changing lack of self-confidence into confidence in self.

All of them can be healed by awaking their victim to a true sense of what he is and what life really is—an opportunity for each individual man, woman, and child to do good, to be good, and to love his fellow-man.

The Boston Evening News.

Now.

DON'T spend your days wishing for this or that opportunity. If you cannot find your opportunity right here and now you will never find it, though you live to be as old as Methuselah and undergo every experience of which human life is capable.

So many people go through the world "looking for opportunities," with their heads in a perpetual whirl of "schemes." Every new thing that presents itself is eagerly taken up and discussed, and, it may be, tried for a time, then dropped, simply and solely because of the human animal's inability to be doing many things at the same time.

The world contains a fairly large proportion of people of this class; you meet them everywhere, in stores, banks, offices, on the streets, the railways and steamships; men and women who get to middle life with a certain amount of youthful enthusiasm, ever on the lookout for "something to turn up," as they express it. These are the jobbers of life, the scene-shifters, the "hacks," the go-betweens, and seeing that the world has need of them, and can use them all, there is every reason for their existence; the sadness of their condition so often lies in the manner in which it has been brought about; the waste of God-given strength, and intelligence, and time; the frittering away of these things in absolutely useless flittings after the unattainable.

The boy at school wasting his time with dreams of college and college football is likely to find both a little beyond him at the appointed time, just as the clerk in an office lays but a poor foundation for a managership by shirking the "petty" details of the business that comes within his daily sphere.

It is very doubtful whether it can be truly said of any man that "he never had an opportunity." Of course it is a very charitable way of looking at the lives of some men, but, as has been truly said, "Some people are so broad minded and charitable that they commend even vice." Much more is it likely that what we term "lack of opportunity" is simply a case of waste of opportunity. Only so can we account for life's many failures.—*Concord* (N. H.) *Daily Patriot.*

It should be recognized that Christian Scientists do not give their children the benefit of Christian Science treatment by reason of any fanaticism or mere obstinacy, but because they have found such treatment to be the surest and safest means of combating disease; in other words, these parents are acting in accordance with the results of personal experience, and thus with the dictates of common sense. The whole question to be decided between *materia medica* and Christian metaphysics is one of practical results. We belong to a race which for thousands of years has been made to believe that the healing art is based upon the drugging system, and that what drugs will not cure, nothing will cure. To some extent, surgery, physical manipulation, and various dietary systems have also been added to the list of supposedly effective means, but public opinion is not yet sufficiently instructed to sanction fully other than material means. And yet Christian Science for the past thirty years has been healing great numbers of cases declared incurable by material means, and has met and mastered virtually every disease known to man. Its achievements partake of the nature of wonders, and would be called miraculous if they were not in entire accord with law and order and the science of life and being. The public is rapidly learning of these practical achievements, and such a decision as that just rendered in Ohio, as well as others in New Hampshire and North Carolina, mark an awakening sense of the usefulness of Christian Science practice in promoting the welfare and well-being of mankind. Indeed, Christian Science practice has become indispensable in our day, and any one who through ignorance of the blessed results of Christian Science, should essay to stop its ministrations, would be assuming a very grave responsibility. The irresistible logic of events is establishing the fact that it is healing not only adults but also multitudes of children, and as public opinion recognizes this condition of affairs, so decisions similar to this one in Ohio will multiply.

W. D. MCCRACKAN.

Brooklyn (N. Y.) *Times.*

It is wonderful what miracles God works in wills that are utterly surrendered to Him. He turns hard things into easy, and bitter things into sweet. It is not that He puts easy things in the place of the hard, but He actually changes the hard thing into an easy one.

HANNAH WHITALL SMITH.

Digitized by Google

The Lectures.

At Atlanta, Ga.

Before an audience that filled the Grand Opera House yesterday afternoon [December 13], Mrs. Sue Harper Mims held the closest attention of her hearers for more than an hour on the beauties and beliefs of Christian Science.

In yesterday's lecture she unquestionably struck a deeper note than was even anticipated, as many told the ushers they wanted to sit far back, as they had only dropped in for a few moments. These, because they became greatly interested, remained until after Mrs. Mims had finished speaking; and many there were who stopped to talk the matter over among themselves and ask questions as to where they could learn more regarding this subject that had been so clearly presented.

Mrs. Mims was introduced to the audience by her husband, Major Mims, in his usual graceful, easy, and felicitous style.—*The Constitution.*

At Clinton, Ia.

A large audience of interested followers of Christian Science, and a great many who are students of any line of thought denoting careful study, were at the Clinton Theatre, last evening [December 7], on the occasion of the lecture given by Carol Norton, C.S.D., of New York.

Mr. Iten introduced the Rev. D. M. Brown, pastor of the Congregational Church of Prophetstown, Ill. Mr. Brown introduced the speaker in part as follows:—

The open mind is the need of the day. Like a towering mountain catching the first rays of the rising sun and holding long the lingering beams of its going-down, so should the earnest seeker after Spirit, Truth, and Life, open his mind to receive all that God has to give.

We know God is not in the past; all of God is in the present; all the infinite Spirit that was ever in the world in ancient times is with us still.

Christian Science has come to emphasize and realize in our midst the great spiritual realities all about us.

The Clinton Herald.

At Madison, Wis.

Carol Norton of New York lectured before a large and appreciative audience at the Fuller Opera House, last night [December 11] on Christian Science.

Mr. Norton was introduced by M. L. Daggy, Ph.D., instructor in rhetoric at the University, who said in part,—

Against the slavery of ignorance and superstition man has been forever struggling. Gradually his vision of truth has widened, and with the new vision there has come the extension of the era of freedom. In this age-long conflict, old systems of thought have crumbled, and upon their ruins new structures have been raised. Thus in the renaissance there came a revelation of the dignity of life; in the reformation man discovered the worth of the soul; out of the political revolution there issued a larger faith in the civil and political rights of the individual.

The twentieth century forms no exception to this universal principle. We live in an era of religious liberality and toleration. Trials for heresy are no longer in fashion. The heterodoxy of yesterday is the orthodoxy of to-day. Creed is no longer considered of more consequence than character. Mankind is finding freedom in the truth that religion is primarily concerned with the practical affairs of this world. It is natural that in such an age of transition there have arisen many organizations that seek to interpret the teachings of the Great Teacher according to the present needs of humanity. Among the institutions of this character, the Church of Christ, Scientist, is the one which probably appeals most strongly to the largest constituency.

While I am not a believer in the doctrines of Christian Science, yet I am ready to acknowledge that to many thousands this philosophy has been a beacon-light of hope and inspiration. The advocates of this faith have done much to provoke thought, to make the orthodox more liberal, and to arouse the masses to an appreciation of the sacredness of the secular life. In their advocacy of an unpopular and misunderstood faith, they have exhibited a moral courage at once rare and refreshing.—*Wisconsin State Journal.*

At Providence, R. I.

Mr. Edward A. Kimball of Chicago lectured Sunday evening, December 13, at the Providence Opera House. He was introduced by Mayor Miller as follows:—

Ladies and Gentlemen:—I have been requested by some of our best citizens to present to you the speaker of the evening. I may say that before this large audience I feel somewhat embarrassed, for I have to confess that I know very little about the subject which will be presented to you. Most of that I have learned has been gained from the public press, and I have not always felt in accord with what I have read therein. At the same time we all know that we cannot take for granted everything that we read in the papers, and we should always be glad to learn the truth concerning any subject. The fact that Christian Science has grown as it has during the past quarter of a century must indicate to us that there is something in it which merits our careful study and understanding, and I am very much pleased to be here and to present to you as the speaker of the evening Mr. Edward A. Kimball, C.S.D., of Chicago.

Correspondence.

At Pasadena, Cal.

Judge Septimus J. Hanna lectured in the Pasadena Opera House, Monday evening, December 14. The house was well filled with a representative and very attentive audience. He was introduced by Judge John D. Works of Los Angeles, who spoke in part as follows:—

My Friends:—Christian Science touches and affects questions of the most vital interest and consequence to the whole human race. It is a revival of the pure and simple religion of the meek and lowly Jesus Christ, with its gospel of love, beneficence, and healing. It has brought peace and comfort of mind and health of body to multitudes of the sick, sinful, and sorrowing.

This new-old religion was founded by a woman whose boundless love encompasses all mankind, and whose tireless patience and research and wonderful spiritual insight has made it possible for all to read and understand and know the truth. It is supported by thousands of earnest, intelligent Christian people, who look up to its Founder with affectionate gratitude and who believe in and revere the Bible and strive to live the religion they profess.

Christian Scientists are not seeking to build up their religion by tearing down other religions. They are not making war on the conscientious physician or surgeon who is giving his best skill and energy to the amelioration of human suffering. But they do maintain that as compared with other modes of moral and physical healing, theirs is the better way, because it is the way taught by Christ, and therefore is God's way.—*Correspondence.*

The world is full of loving hearts
That blossom out each day;
With patience, tenderness, and joy,
These loving hearts hold sway.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Not Words but Works.

ACCORDING to the Chicago *Record-Herald* it is estimated that the Christian Scientists in that city have increased fully twenty per cent in numbers during 1903, and we believe that this would be a conservative estimate of the increase in the country at large, certainly there has not been a period of greater activity in the progress of the Cause, nor a time when the public has manifested greater interest. Uniformly large audiences have listened to the lecturers, many churches have been compelled to seek larger quarters, and what is still more important, the sick have been healed and sinners have been reformed in greater numbers than ever before. It is to this healing work that the attention of the world has been drawn, and it is to this work that we must look for still greater results in spreading the gospel of holiness and health.

What this increase in numbers means will be better understood when viewed in the light of the following extracts from a testimony which appeared in last week's issue of the *Sentinel*. The attitude of this man was such that argument would have failed to reach him, yet he was amenable to indisputable evidence. Christian Scientists are Christian Scientists not because of what some one has said, but because they have been convinced by facts within their own range of observation. The following is the first paragraph of the testimony referred to,—

"I did not think when I used to throw aside the papers with the testimonies which my wife gave me to read and say they were a pack of lies and fairy tales and that I did not believe a word of them, that I would some day be adding my testimony to the great work that our Leader has done for us and mankind. I do not suppose any one ever fought against Science harder than I did."

What caused this man to change his views? Certainly not words or empty preaching. His explanation is,—

"My wife had been a great sufferer. . . . Up to that time we were nothing more than atheists without God or hope in the world. When she told me she had put herself in the hands of a Christian Science practitioner I thought she had gone crazy, and told her so . . . but as the truth dawned upon her, she asked me to stop my ridicule, as she had found what she had not found in any other creed that she had investigated,—a loving God.

"As her bodily suffering left, and knowing her to be a woman of sound judgment, . . . I stopped ridiculing it on her account. As she became more interested in the work and I saw the great improvement in her health and that she had stopped all drugs, I told her she could treat me. . . . I was a terrible sufferer from constipation and rheumatism. I had always been a hard drinker, and when excited in business, a very profane man. As the treatment went on and I began to be better physically, the spiritual commenced to manifest itself. I realized what a terrible thing profanity was and I quit it. . . . I told her (my wife) 'I will never drink a drop of liquor again,' and by the grace of God I have not, and that was three years ago."

Is it surprising that our numbers increase, or that this man should say, "Now I want to return thanks to God and to our Leader for Christian Science and the great blessings it has brought me and mine."

The ministry of Jesus was pre-eminently a ministry of works, and only by works of healing and reform can his gospel be successfully preached. Mrs. Eddy has epitomized this in Science and Health, p. 201, "The best sermon ever preached is Truth practised, and the demonstration thereof,—the destruction of sin, sickness, and death." The experience of this man whose testimony has been quoted, proves the truth and wisdom of this statement.

Mrs: Eddy is in all respects a consistent follower of the Master, and it is most gratifying to Christian Scientists to know that her work is contributing, in a larger and larger degree each year, to the establishment of Christ's kingdom among men. M.

Born of God.

THE illumination which came to Saul on his way to Damascus effected a marvelous change in his ideas about pedigree. Prior to this time, his sense of human quality was strong; a "Hebrew of the Hebrews," he was zealous for the exclusiveness of a religious caste, and, as indicated in his letter to the Philippians, he prided himself not a little upon his nation, his tribe, and his family.

In that experience, however, he realized the falsity of his old bases of estimate, and in his beautiful letter to Philemon he reveals a spirit of democracy, in his recognition of human brotherhood, which is the very antithesis of his old attitude, and which has challenged the admiration of all lovers of men. He now glories ever and only in the realization that he is God's child, his letters teem with evidences of his exaltation in this thought, and his life ministry might be epitomized as an endeavor to awaken men to the meaning of their divine sonship.

So too John in his matchless Gospel presses to the front this thought of finding in the true self a son of God, "born not of blood, nor of the will of the flesh, nor of the will of man, but of God" and as no other sacred writer, perhaps, he enlarges upon the metaphysical and practical significance of the divine fatherhood.

Christian Science is again focusing the world's attention upon this keystone of spiritual apprehension. It teaches that God is not only the source of all being, but that He is never separate from all being. It finds a restatement of the divine omnipresence in the philosophy that "All things exist in and for consciousness."

The theology of the centuries has imposed the limitations of time and space upon the concept of the divine manifestation, and thus practically sundered the thing created from the Creator, and the universe has come to be thought of as the expressions of an impulse which was divine, but which is not continuous. In this thought creation has had a beginning and ending in time, and man is fulfilling, upon an unspiritual plane, a life program to which he has been committed by divine Providence.

One need but read the 139th Psalm, however, to see how shocking this idea, in which many of us have been nurtured, would have seemed to some, at least, of the Old Testament worthies, when at their best estate.

Says the Psalmist: "Thou compassest my path and my lying down, and art acquainted with all my ways. . . . The darkness hideth not from Thee; but the night shineth as the day. . . . Thine eyes did see my substance, yet being unperfect; and in thy book all my numbers were written, which in continuance were fashioned, when as yet there was none of them."

These wondrous words make it plain that the ancient bard had reached the exalted consciousness that man is the continuous going forth of the divine Life: that from the

Digitized by Google

foundations of the world he is born of God and is the noblest product of that all-inclusive spiritual creation which is coincident with an eternal now.

This impelling sense of the immediateness of man's relation to God is of unmeasured practical significance to humanity. Every field of thought and experience is illumined by its radiance, and in its light the familiar words, "Son, all that I have is thine," awaken a train of new and inspiring suggestions. The dignity, supremacy, and authority of our rank and station; the possibility and naturalness of the ideal life,—that we should be sinless, perfect even as our Father is perfect; the incongruity of our subjection to any assertion or law of material sense, and the inexhaustible riches of our possessions,—the all-wisdom, all-power, all-freedom, all-beauty, all-joy which pertain to the inheritance of the "offspring of God"—these great thoughts are ever present with those who are dwelling in this citadel of consciousness, this "Secret place of the most High,"—the realization that now are we indeed the sons of God. Nature's Poet sensed man's source aright when he sang,—

> Our birth is but a sleep and a forgetting;
> . . . . . .
> Not in entire forgetfulness,
> And not in utter nakedness,
> But trailing clouds of glory do we come
> From God who is our home.

W.

The Infinite Name.

THAT wonderful Scripture, the 91st Psalm, is held in high regard by Christian Scientists, not only on account of their Leader's special references to it, but also because of the help and comfort they receive from its inspired declarations. Like many other Psalms, it is antiphonal. In it thought passes from God to man, and the response is awakened, "I will say of the Lord, He is my refuge and my fortress; my God; in him will I trust." In the fourteenth verse the divine assurance which crowns all the promises, expresses the reason for deliverance and uplifting, "Because he hath set his love on me, therefore will I deliver him; I will set him on high, because he hath known my name." It is surely clear that the Divine name as thus understood, inspires with perfect confidence and leads the worshiper to say, "In him will I trust."

In Christian Science we come to know God through those spiritual qualities which forever express good, and which are wholly separate from materiality and evil. As we gain this new understanding of God, our former beliefs,—the outgrowth of materiality,—are reversed one by one, and finally disappear. Through false education we had believed God to be conscious of evil, at the same time that we declared Him to be infinitely good,—a condition of thought which is at once illogical and self-contradictory, since infinite good would of necessity exclude all evil. To those tossed about on the waves of conflicting human opinions, the idea of God as infinite divine Principle comes with a blessed sense of security which anchors faith firmly upon the Rock of ages.

In the old thought the idea of Principle was the best that we would grasp, even though we did not analyze our reason for it. We recognized the fact that quite apart from their personal interests, their likes or dislikes, certain persons were honest and truthful, and we said, they are men of principle. This recognition was right so far as it went, but it did not go very far, and, because of human ignorance of what Principle really means, it did not satisfy the needs of the heart or mind. We had heard vague hints of a "life principle," but never until we felt the healing touch of Life divine did we know that its presence and power were demonstrable truth. Then divine Principle became an awe-inspiring word, and as day followed day our reverence for it was deepened. Here at last was the Life known to Christ Jesus,—Life unmarred by sickness, sin, or death, and as we have advanced in the understanding of Christian Science it has become clearer and clearer that no amount of sense-testimony can ever make Life less than infinite Principle,—the cause and sustainer of all that really exists.

We have also learned that Truth is Principle, and this explains why the reality of evil is denied in Christian Science,—it has no Principle, hence no truth. On the other hand, Truth is never unexpressed, but is ever manifested in truthfulness,—an expression of Principle.

As we gain a yet clearer sense of Divine Science, we see also that Love is best understood through Principle,—that which is absolutely changeless. The prophet Isaiah presents the idea of mother-love as the highest type of pure affection and compares it with the Divine. He asks, "Can a woman forget her sucking child?" then he answers for the Principle of all true love, "Yea, they may forget, yet will I not forget thee." Is it any wonder that in the face of this declaration the heavens and the earth are called upon to "be joyful," and to "break forth into singing"? Thus are we comforted when we learn that divine Principle is our Father-Mother God, and as the shadows of sin and fear melt away before this revelation, we say with a newborn understanding, "Thine is the kingdom, and the power, and the glory forever."

For this high knowledge of Truth, who would not yield the trembling belief that clings to matter and an "unknown God"? Surely we need not fear to trust ourselves wholly, unreservedly, to God as thus revealed. Though mortal sense may seek to grieve or injure, through lack of love or truth, undismayed we rise above it, for our refuge is the "divine Principle, Love, underlying, overlying, and encompassing all true being" (Science and Health, p. 496). K.

Excerpt from a Letter to our Leader.

Boston, Thursday, January, 7, 1904.

Beloved Leader and Teacher:—Last night we had a very beautiful meeting. There were many there and we again had an overflow meeting in the vestry. A large number of business men spoke; some about their physical healing and others of the help received in their business. One said that Science and Health was worth more to him than a capital of a million dollars. There were several good cases of healing given,—some that occurred fifteen and twenty years ago, and some recently,—and several spoke of having been healed through reading Science and Health.

One testimony that pleased me very much was that of a lady who had been an invalid for three years and was scarcely able to walk. She said she felt that if she could only get to this church she would be healed. One Sunday two months ago, she made a desperate effort and came to church. During the service she felt she was healed, but she could only remember and take home with her the "scientific statement of being." That week she was able to walk three miles and has been perfectly well since. Subsequently she bought Science and Health and has been studying it, and now her husband is also interested and her child is in the Sunday School. She expressed much gratitude. HERMANN S. HERING.

A Letter to our Leader.

Needham, Mass., January 13, 1904.

Dear Leader:—It may please you to know something of the young lady, who has so artistically printed and decorated this message of love to you.

She is one of our members and earns her living by doing art work of different kinds.

Some years ago she was a student at the Normal Art

Digitized by Google

School in Boston and was obliged to give up her work there on account of a serious eye trouble. She was treated by several eye specialists and wound up with two years' continual treatment from one of Boston's best oculists. Finally he fitted her with glasses, telling her that she could never take up the study of art again and the time would come when no glasses would help her. She came to me, took off her glasses, declaring she saw two of me and everything about her at the time.

She was healed instantaneously and has *stayed healed.* This was six years ago.

She offered to print this message and probably you can imagine the satisfaction it has been to her to give this loving proof that "Christian Science heals the sick quickly and wholly" (Church Manual, p. 83).

A faithful student's student,

ESTELLE R. FREEMAN.

Mrs. Eddy's Gift to Scientists of New Bern, N. C.

The Christian Scientists of this city are in receipt of a rich New Year's gift from Mrs. Mary Baker G. Eddy, the great Leader of the Scientists.

The gift was three thousand dollars which is to be used in the erection of the Scientists' new church in New Bern, upon the property recently purchased by them corner Middle and Broad Streets.

This gift is highly prized by the recipients, both for the love which prompted it, and the great help it will give the Scientists in their work in his city.

New Bern (N. C.) *Journal.*

Laying of Corner-stone in New Bern, N. C.

REFERENCE has recently been made to the work in New Bern and to the expression of practical interest which was given by our Leader in the gift of her published works, and by Mr. John Swenson of Concord, N. H., in donating the corner-stone. We learn through correspondence that the corner-stone was laid with simple and impressive ceremony December 31, and all are rejoicing in the promise of steady and rapid advance in the work of our Cause.

The *Concord* (N. H.) *Monitor* furnishes an additional item of interest in the following statement:—

"Concord has again furnished the corner-stone for another new Christian Science Church. This time the order comes from New Bern, North Carolina. The foundation of the beautiful new church will also be of Concord granite. The corner-stone is a gift to the church from Mr. John Swenson. All the literature which went into the box of the corner-stone was sent to the church by the Rev. Mary Baker Eddy. North Carolina is the Southern state where Mrs. Eddy's husband, Major George W. Glover, died, and its last legislature made the practice of Christian Science legal in that historic commonwealth.

Efficient Work.

Editor Christian Science Sentinel:—I trust that you will consider the following letter, addressed to me, of interest. It will give your readers an example of the pluck and energy suitable for a good Publication Committee.

Yours sincerely,

ALFRED FARLOW.

Toledo, O., December 27, 1903.

Dear Brother:—I often have helpful experiences with the editors of newspapers in connection with my work as assistant to the Publication Committee for this state, but my last one is perhaps worthy of note.

A few weeks ago I received a paper from a neighboring town containing a very bitter attack upon our beloved Leader and the Cause by a minister, and I wrote to the editor about it, but, as I did not hear from him after a sufficient time had elapsed for a return letter, I went by train (ninety miles) to see him.

I have always found the editors broad-minded men, and this one was no exception to the rule. But he was short of help and, being rushed on account of the Christmas season, he said he was unable to publish my article "at present." I explained to him our good reasons for having it appear as soon as possible, one of which was that the students of the college there would be away after the next issue was printed, and he finally consented if I would undertake to get some one to set the type.

His laws of limitation were then soon met. I had worked in a newspaper office in my early career, and I concluded that I was the one to do the work, so I took off my coat and went at it.

The editor gave me his apron and reminded me that the article would be published only on condition that it was set up that night, as the front page upon which it would appear was to be printed the next day.

It was then nearly eleven o'clock. I had not been at work long before the other men in the shop became interested in me and my work. When noon came, one of them asked me to go to lunch with him, but I thanked him and remained at my work. The junior, a deaf mute, seemed much interested in my enthusiasm, and came back early to help me. He set up the sub-heads, and in the afternoon, when he had finished his own work, he helped me with the straight matter. Every hour I seemed to gain in speed, not one thing that I had learned about the business had left me. The foreman often remarked that I could not possibly finish it before my train left, and the editor paid me occasional visits to see how much I had accomplished. I kept on working and knew that divine Love would help me through.

A few minutes before my train was to leave, I had taken a proof and examined two columns, and the third column was all set up but the last stickful. The editor then assured me that it would appear word for word and I rushed out and caught my train.

Am sending you fifty copies.

Yours sincerely,

ARTHUR E. JENNINGS.

Notice to Clerks of Churches.

The following notice is repeated because a number of churches have recently held their annual meetings, and it is important that changes made at those meetings should appear in the list now being prepared.

"Clerks of Churches and Societies were requested by a notice in the *Sentinel* to send their names and addresses (with address for telegrams if different from that for mail) to The Christian Science Publishing Society, 250 Huntington Avenue, Boston, Mass., in order that a complete list might be made. A number of Societies and some Churches have not been heard from, and we ask that clerks will carefully attend to this request at once, else their names must be omitted. Whenever changes occur notification should be sent, so that the exact address of every clerk, the church officer to whom correspondence is addressed, may always be on record with the Publishing Society."

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

Testimonies of Healing.

Only ten months ago to me all was despair and darkness; now, health, and love for God and my neighbor. Christian Science found me in the former condition, when my sister induced me to seek help through its teachings. A number of so-called incurable diseases had often made me voice the longing to die. Prominent physicians at home and in Cincinnati had told me that there was no cure for me. I went about from place to place looking for relief from the dreadful suffering caused by asthma, when early last spring, in addition to all other troubles, I was about to lose my eyesight. Pen cannot describe the horror this brought to me at that time,—not to be able to see the coming spring, and to be compelled to sit idly without even the companionship of a book,—this I considered worse than all other troubles combined, and I often cried out, "There can be no God! for why should He punish me thus?"

The eye specialist I called upon treated my eyes, and fitted glasses, but he finally said that the only way to save what eyesight was left would be through an operation. To this I would not consent at once. It was about this time that my sister came on a two weeks' visit and told me of Christian Science. It was all very well, I could see truth in this teaching, but what of the orthodox church that my parents had belonged to ever since I could remember? There was a great struggle of mortal mind and opinions. However, before my sister left I asked for treatment, at the same time asking her when I would be able to lay off my glasses. "You will realize and know when they become unnecessary," she replied. After bidding each other farewell at the station, I returned home, took off my glasses, and laid them aside, saying, "I cannot expect God to set me free while clinging to the glasses. I *know* God,—all good and all Love,—will not let me wait long for deliverance."

For a few days the struggle between truth and error was strong. I had laid my glasses aside Monday noon, and on Thursday the pain and fear seemed so strong that I left the sitting-room to get my glasses, but before I reached my room I realized my mistake, turned back, and sitting down again I called to mind as much of the scientific statement of being as I could remember. The only Christian Science literature I had was a few *Sentinels* and an old *Quarterly*. Inside of an hour from the time I sat down I could take up the Bible and go over that part of the lesson that I could find without the text-book, Science and Health. All pain and blindness were gone, and my eyesight since then has been better than ever before. All other troubles, including the asthma, have left and I am indeed set free.

Great indeed seems the deliverance from physical ailments, but greater still is the spiritual uplifting I have received since coming into this beautiful truth. I am grateful to Mrs. Eddy, who has given us this light, and all my life will I praise God for His goodness and loving-kindness.—CLARA WICKHAM, Traverse City, Mich.

For a long time I have been impelled to contribute a testimony of the healing power of Truth. As I read other testimonies and rejoice in them, some one may rejoice in mine. I was healed by reading Science and Health. By applying it, I found it to be the truth that Jesus taught,—the truth that sets free.

From childhood I had never known a well day. I was healed of lung trouble of long standing. Consumption was hereditary in our family, my mother and three brothers having passed on with it. The law of *materia medica* said that in a short time I must follow them. I also had severe stomach trouble of over eight years' standing, during which time I always retired without supper, as the fear of suffering from my food was so great that I denied myself food when hungry. For over twenty years I had ovarian trouble, which was almost unbearable at times. It dated from the birth of my first child, and at one time necessitated an operation. I suffered with about all the ills that flesh is heir to: I had trouble with my eyes from a child; wore glasses for fourteen years, several oculists saying I would go blind, one declaring I would be blind in less than a year if I did not submit to an operation, which I refused to do.

But thanks be to God who so loved the world that He gave His only begotten son, that blessed Christ who was sent to us to open the eyes of the blind and set the captive free; who reached me through the study of our text-book which gives us the understanding of the Christ-truth. Words fail me to express what Christian Science has done for me in various ways, for my children, my home, my all. The physical healing is but a small part; the spiritual unfolding and uplifting is the "pearl of great price," the half that has never yet been told. Thanks to God, and to her who has made it possible for me to receive such blessings, that loving, consecrated woman, Mrs. Eddy, who, by revelation, has made clear to our darkened sense, the one living Principle, God, good, and thus awakened within us an appreciation of our great teacher, Christ, as the way-shower of Truth and Love. Since coming to Kansas City, I have had the blessed privilege of class instruction and am having daily proofs that Christian Science is the same word which was in the beginning with God; it is the Comforter leading us to see the Motherhood as well as the Fatherhood of God. Nor do I forget the help of the *Sentinels* and *Journals* and our weekly Lesson-Sermons which are meat and drink, and daily helps to overcome error. For all these blessings, I want to learn obedience and follow the leadings of Truth.

MRS. JENNIE P. MCINTYRE, Kansas City, Mo.

It gives me great joy to tell of what Christian Science has done for me in the way of healing, but what it has done for me spiritually I have no words that would reveal, or make clear, for the deep things of God can only be realized, and not told in a way that they would be understood. Yet glimpses of heaven are granted us in this way of righteousness (right doing) which lift us above self, and lead us to think less of self and more and more of others, and of things higher and more pure than was ever found in the old way. I am more than grateful to Christian Science for what it has done and is still doing for me. I will now give a demonstration over the results of a fall.

I had a colored man in my cellar, whitewashing, also two women cleaning it. In due time I was told that the whitewashing was finished and I must come to see if it pleased me. One of the women had taken a pailful of boiling water, and going down three steps, she set it down and returned to the kitchen for something needed. I came down stairs just at that time, and went direct to the cellar stairs, and started down. Not knowing of the water, I stepped into the pail, which tipped it over, and pail, water, and all fell to the stone floor ten steps below, the hot water scalding me, as it seemed, all over. They all screamed, and came to me to help me up, but I waved them aside, for as I was going down I declared that Mind is master, and thus I was not confused in thought, but to sense, I did lie there with every bone in my body broken, and the suffering from the hot water seemed awful.

I did not speak, or attempt to get up, but realized the Truth of being to the best of my understanding, and later I got up on my feet, and walked about, examined the work done, and left the cellar without speaking a word aside from my approval of the work.

I walked up the cellar steps, then up another flight, and sat down, when such an overwhelming sense of breakage

Digitized by Google

and bruise and burns came before me to be met, that for a few moments I quaked with fear. But a sense of Truth was quickly realized, and the error soon went down in such a degree that I was able that evening to go to our Wednesday meeting, and there I gave an account of the power of Truth to destroy error, and stood a living witness for the same.

I failed, however, to overcome the evidence of discoloration, and the next day, in belief, the body was black and blue all over, but there were no marks left by the boiling water and no pain whatever, and God was given all the glory.—M. E. CRAWFORD, Cleveland, O.

Christian Science found me a great sufferer with nervous prostration, stomach troubles, constipation and its attending ills. Besides these troubles I was very greatly weakened by two tumors on my body which had been opened by surgeons some two years before this time, and which had never healed, although I was under continual treatment.

I was induced by a kind neighbor to try Christian Science, and as medicine and travel had not produced the desired effect, I decided that Science could at least do me no harm. I took about two weeks' treatments and was entirely healed of my troubles, which included the healing of the tumors. This was eight years ago, and I am very glad to say that I have never had the least desire for medicine since.

Through the kind and loving work of the student and teacher who helped me I was led to receive class instruction and my real life began to unfold from that hour. From the worst type of infidelity I soon began to study and enjoy the Bible. I soon learned that there is a God, and that He is the only Cause and Creator of all that really is. As these thoughts unfolded to me, the sins which were many began to fall away, and without any direct effort the desire for smoking and drinking left me and my disposition began to undergo a great change. As time goes on I am still looking and praying for more of this truth, endeavoring to put aside "the old man with his deeds," realizing that as this is accomplished I am being renewed in spirit.

For this wonderful light which I have received and am daily and hourly receiving, I am deeply grateful both to the noble woman who has given it to this generation, Mrs. Eddy, and to my teacher who has so patiently and lovingly pointed the way for my weary feet.

ADELBERT C. EDDY, Bloomington, Ill.

During my three years' study of Christian Science it has been my privilege to have many beautiful demonstrations of the truth. For some years my eyes had been troubling me and I had to wear glasses, but shortly after I became interested in Christian Science I took them off. My understanding at that time was limited, yet I tried to realize the allness of God. For about ten days I did not wear my glasses, but during that time I still kept them with me in case I should need them. This of course showed a lack of faith in God; and while I was trying to serve Him, I did not trust Him, but doubted His goodness and power.

At the end of ten days the old trouble seemingly returned, and I put on my glasses, but only for an instant as everything became so blurred that I could not see anything with them on. Since that time, over three years ago, I have not worn glasses and my eyes were never so strong and well as now. This demonstration has proved to me the nothingness of error and the allness of God. If we look to the one Mind, God, for help, nothing will be withheld from us, as all things are possible with God.

I had also a skin eruption on my fingers which was very annoying. It disappeared before I was aware, and this was accomplished through the understanding of a friend who is a student of Mrs. Eddy, and who rebuked the error whenever I voiced it.

The Bible has become a new book to me, and this understanding has come through the study of the Lesson-Sermons in the *Quarterly*. I never thought of God as a present help until I studied Science and Health. He seemed very far off and I rarely read my Bible, for its meaning was hidden from me, but now I find it a constant source of help and comfort. I know that God is All, that He is infinite Love, and in Him I have dominion, wisdom, and understanding.

I feel very grateful to our Leader, Mrs. Eddy, for the many blessings which come to us through the understanding of Truth which makes us free.

A. M. VOLLERT, Champaign, Ill.

"Christian Science brings to the body the sunlight of Truth, which invigorates and purifies. . . . The effects of this Science are to stir the human mind to a change of base, whereon it may yield to the harmony of the divine Mind" (Science and Health, p. 162).

The truth of this statement was proved conclusively to me five years ago when I first turned to Christian Science for help. I had been under the doctor's treatment for about six years for Bright's disease and other chronic troubles, until the physician said he could do no more for me. He drew a picture of the kidneys on paper and showed me the exact stage the disease had reached and the condition of the organs at that stage according to *materia medica*. This picture and his verdict made a terrible impression upon me and haunted me continually.

In this desperate condition of thought I turned to Christian Science for help, not expecting to be healed, but thinking I might get a little insight into the future through the study of Christian Science, for when I was brought face to face with the grim monster, I felt that all my own thought and preparation for a future life were nothing but blackness and despair. I longed to know something about God and heaven, and how to read the Bible and gain a spiritual understanding therefrom.

In a very short time I was conscious of a great change in my thoughts, and that change brought with it a love for God and man which I had never felt before. In resting in this new light of Love, I awoke to the consciousness that I was perfectly free from the disease and all its attending symptoms.

To this healing power of Christian Science I owe my life and all that life holds dear, and I hope to prove my love and gratitude for this revelation, by taking up the cross and living Christian Science in my daily life.

MRS. NANNIE WATERMAN, Chicago, Ill.

[Translation.]

I am greatly indebted to Christian Science. For fifteen years I had worn glasses when doing any needlework or reading, and after I had changed them several times the oculist prescribed for me eight years ago a dark eyeglass, telling me that I must always wear it. In trying to comfort my sister-in-law, who in spite of all medical assistance was gradually becoming totally blind, he told her that I had the same trouble.

The fear of blindness took possession of me. I turned to the so-called natural method of healing, submitting to different ways of massage and cold water cure, which made me feel better but brought no help. My eyesight left me in an alarming manner. The burning and stinging sensation in one eye became almost unbearable. I was afraid of the light, because every ray of it caused me pain. Religious thoughts were foreign to me: I knew only the troubles and cares of life, bitterness and resentment.

Thus I came to take Christian Science treatment and was soon free from pain. Last year I laid aside the dark glass,

Digitized by Google

and last summer the other one. I thank God that I can again do needle-work, because a great deal of sewing is needed for my five children. I had all my lifetime suffered from a disorder, of which trouble I am entirely healed. As I gained a better understanding of God, I grew calm and peaceful and learned to love and thank Him.

I also wish to express my gratitude to my practitioner, who so earnestly strove to give me an understanding of this teaching. The love of God will reward her.

BERTHA LOEFFLER, Dresden, Germany.

The study of a recent lesson brought to my thought two very convincing demonstrations in proof that there is no sensation in matter.

The one was several years ago when I first took up the study of Christian Science. I came home one afternoon and found my then small daughter crying with pain from a troublesome hangnail. It was something unusual for her to cry over a little thing, but in spite of my effort to quiet her, she still seemed to suffer from the condition. We soon sat down to supper, but the thumb pained her so she could not eat. I said, "Flanie, let us ask God to cure it," and to the best of my understanding I gave my first Christian Science treatment. I shall never forget the face that greeted me when I had finished. With the big tears still in her eyes and on her cheeks, and her face radiant with joy, she said, "Mamma, it does not hurt me at all, not even when I pinch it."

The other was a few months ago. My daughter and I were making cakes, when she took from the stove a long-handled pan of hot caramel and set it on the table. She sat down to stir it, but in some way hit the handle and tipped the contents of the pan into her lap, pouring it over one hand. She gave a wail of agony, and I declared audibly, "There is but one Mind." With the words came the realization, that nothing has power or intelligence unless God gives it, and His power governs all. For the moment there was no sense of a discordant condition in my home, or in the whole world. In less time than it takes to tell it, the pain was gone and her hand was not even red.

These and many other demonstrations, have proved to me conclusively, that when we are conscious of God's ruling power, matter has no sensation or power to harm.

"There is no wisdom nor understanding nor counsel against the Lord." "Become conscious for a single moment that Life and intelligence are purely spiritual,—neither in nor of matter,—and the body will then utter no complaints. If suffering from a belief in sickness, you will find yourself suddenly well" (Science and Health, p. 14).

E. M. T., Denver, Col.

[Translation.]

When I first heard of Christian Science I was in such a condition that any help was welcome. I suffered so from asthma and dyspepsia that about half the time I was unable to work, and medicine brought me no relief. In our family there was usually one of the children sick.

Christian Science has entirely healed me, and through the study of Science and Health by Mrs. Eddy, we are enabled to keep well. For twelve years we have needed neither physician nor medicine. Christian Science has been our only and never-failing physician, and it has healed in our family a case of eczema, besides scarlet fever, diphtheria, and croup. We are truly grateful for the physical healing, yet much more for the moral healing.

I was without God, without an aim; a slave of sin in very many forms. For over twenty years I had not been in a church, never read the Bible, and when my wife bought one I reproached her for spending money so unnecessarily. But now, thanks to God, through the understanding of Christian Science, I have learned to overcome sin and to lead a better life in every way. We read the Bible daily and it becomes clearer and more intelligible through the correct and true understanding of God and man, as taught in Science and Health. I learn more and more how unreliable is the testimony of the senses, and through trials and experience I have learned to trust in God alone.

With a grateful heart we recognize the blessings of God which Christian Science has brought to our home.

JOHN KULL, Sioux City, Ia.

Words cannot express how thankful I am that Christian Science found its way to Walworth, so out of gratitude for what it has done for me I feel that I must write and give thanks for the healing of my ankle that I fractured six years ago.

I was in a hospital for nine weeks and on crutches for nineteen weeks. I was an out-patient for six months, and at the end of that time they told me they could do no more for me, as my ankle had not been set right. For five years I was never free from pain. I could never walk very far, and if I had to go upstairs I used to groan, the pain would be so great. Now I can walk any distance and run up and down stairs, forgetting I ever had a pain in my ankle, and knowing that God never made pain, so how can I, God's child, have pain. I have a lot to be thankful for and I owe it all to Christian Science.

MRS. M. FLACK, Walworth, London, Eng.

I desire to add my name to the list of those who have been healed in Christian Science. Nervous prostration, which was fast developing into melancholia, held me in bondage. A kind physician had done all he could, but the relief was only temporary. Fearful of becoming a chronic invalid I applied for Christian Science treatment and was healed. Since that healing, which took place in April, 1902, conditions of poisoning and abscesses have been overcome by Truth.

I am grateful for our beloved Leader who discovered the priceless blessing of Christian Science, and for my dear teacher and friends who have helped me along the road, and I pray for grace to give as well as to receive.

OLIVIA CHRYSTAL, New York, N. Y.

The truth of the healing power of Christian Science has been proved efficacious to me through the overcoming of ailments from which I suffered for years. One of these was named by the physicians in attendance, intestinal indigestion. I was constantly under care of physicians and wedded to material remedies until I took treatment from Christian Scientists and received great benefit, sufficient to lead me to its text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy. Through the enlarged spiritual understanding that came by reading and study, the old conditions of pain and suffering left me. I severed my former church connections, receiving from them kind words of regret.—L. L., Gloucester, Mass.

I will tell what Christian Science has done for me. I am a cook and had been unable to work for two years on account of poor health, nervousness, heart trouble, dyspepsia, and, worse than all else, despondency. I went to a practitioner and unburdened myself to her, took seven treatments, and was healed. I got a good position immediately, and have been all right ever since. I soon had class teaching and have been enabled to attend our Communion service in Boston last year and also this year, for which I am indeed grateful. The study of Christian Science is regenerating to me, and I love our Leader for her faithfulness in bringing it to us.

MRS. FANNIE D. FITZSIMMONS, Omaha, Neb.

From our Exchanges.

Some hearts, like some houses, always seem to have room for one more. This is where human hearts show their touch of heavenly infinity; they are like the skies, with no end to their outreaching. Peter saw this, and wrote in his second letter about our becoming "partakers of the divine nature," by adding love to love,—as he puts it, adding to your brotherly kindness love. That may mean adding to our love of brethren the love of others also, or it may mean adding to our love of the brethren more love of the brethren. Love is so much partaker of the divine nature that it can ever stretch out about more people, or more aboundingly proceed towards the same people. It is ever inventing new telescopes which add new stars to its charts, and which make the old stars shine out in brighter magnitude.—*The Sunday School Times.*

More and more the moral conflict of the ages is concentrating around the person of Jesus of Nazareth. More and more it is becoming clear that the only tenable explanation of that unique person is the admission that he knew more about his own origin and nature than his contemporaries or subsequent critics, and that his words concerning himself are true. Jesus, who so persistently called himself the Son of man, is the ultimate ground of religious certainty because he was at the same time the Son of God, and because he spoke truly when he affirmed of himself: "To this end have I been born, and to this end am I come into the world, that I should bear witness unto the truth."

REV. PHILIP A. NORDELL, D.D.
The Watchman.

If anything is put beyond question by the teaching of Jesus it is that outward things do not constitute us his disciples. We may call him Lord, and even claim to have performed wonderful works in his name, and yet be rejected of him because his spirit of unselfish service has not passed over into us. To say that every true revival must be ethical is not to say that morality is religion. It is only affirming that the Christian religion is essentially ethical, and that the absence of this element in the alleged Christian life vitiates the profession. When Christians are no more unselfish, no more patient, no more honest, no more forgiving than non-Christians, Christianity is robbed of its vitality and becomes a form without power.—*The Standard.*

The Psalmist ran his plowshare deep. He saw the uselessness of cultivating the surface if the soil was corrupt. He knew that if his heart was right the issues from it would be right. He saw that the secret of a perfect life was in the unity of a perfect spirit at the heart of life. So must we learn that the unity of life, the harmonious expression of all its functions, the co-operation of all its powers, always depends upon roots of experience which run deep into the consciousness of this great central source of life. Our life must be a system revolving by invisible but omnipotent laws around the vision of truth and God, if it is to reveal from every point of view, order and beauty and symmetry.—*The Universalist Leader.*

The world is tired of unrest. The world wants faith. It sorely needs the preaching of the living faith of a living world, a religion which tells of the God of things as they are,—God's law in business, God's law in social life, God's law in national policies. It is tired of the mere empty clothes of religion: it wants the living, breathing reality. It will find it somewhere. REV. H. C. MCDOUGALL.
The Christian Register.

It is to be remembered that Christ nowhere commends suffering or sorrow or sacrifice for their own sakes, as possessing value in themselves. He did not seek suffering; he evaded it. He concealed himself from his enemies and kept out of their way again and again, until "his hour" had come, and suffering could be longer evaded only by the neglect of duty.—*The Examiner.*

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

NOTICE.—Members of the Mother Church who have changed their name by marriage will please notify the Clerk and send $1.00 for change of name in the published list of church members. Changes will appear in the list of names semi-annually only,—July and December.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America.

It contains about thirty-eight pages of reading matter, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

National.

The first torpedo-boat flotilla, consisting of the destroyers Decatur, Chauncey, Dale, Bainbridge, and Barry, convoyed by the cruiser Buffalo, has arrived from San Juan in the West Indies at Las Palmas in the Canaries. This reach, twenty-eight hundred miles, was covered in eleven days, and is the longest in the journey that is being made to the Philippines to test the sea-going capacity of the destroyers.

The Carnegie Institute has appropriated thirty thousand dollars a year for a term of five years for the preparation of an economic history of the United States. Experts in the various lines of practical economic development will be engaged to cover the specialties. It is hoped to condense results into ten volumes. Carroll D. Wright will have the enterprise in charge, acting as editor-in-chief.

The "Ajax" of Sophocles was recently presented at Hull House, the social settlement in the center of the worst section of Chicago, by Greeks resident there. The lines were spoken in modern Greek rather than classical. It is reported that the play was remarkably well done.

It has been practically determined to drop all the amendments to the Panama treaty, as assurances have been received that Panama concedes that the treaty will be interpreted as the amendments provide in regard to the harbors, sanitation, and the limitations of the cities of Panama and Colon.

Colombia's statement of grievances, as presented by General Reyes to the State Department, was made public last week when President Roosevelt transmitted to the Senate the correspondence between the Colombian envoy and Mr. Hay.

Calls for the presidential nominating conventions have been issued by the National Committees. The Socialists to meet at Chicago, May 1; the Republicans at Chicago, June 21; the Democrats at St. Louis, July 6.

The Senate Committee on Privileges and Elections met last week to hear the attorneys on both sides of the case involving the right of Senator-elect Smoot of Utah to his seat.

The House Committee on Public Lands has reported favorably on a bill to set apart certain lands in Arizona to be known as the Petrified Forest Park.

According to reports from the other side of the Atlantic, Designers Fife and Watson are at work on boat plans for the American cup races.

Panaman and Panamanians seem to be in the lead among the various terms suggested in referring to the people on the isthmus.

Foreign.

The constitutional convention at Panama has approved a draft of a constitution which contains the following principal points:—

The abolition of business monopolies in the Republic; the infliction of the death penalty for political crimes; the abolition of the army and the establishment of an efficient police force; the recognition of the Roman Catholic faith, but the separation of Church and State; all citizens, with the exception of members of any military body which may be established, shall have the right to vote; a free press; the President's term of office to be four years.

There are two substitute vice-presidents, one from the Liberal and one from the Conservative party, and they shall serve for two years; the judiciary is to be elected by Congress. It has been agreed among the members of the convention to approve a bill ratifying all the acts of the provisional government.

A Russian imperial ukase just issued, orders the assembling of Government conferences under the presidency of the governors of the various provinces where the rural authorities hold office, and in the governments of Kieff, Volhynia, and Podolia, in order to elaborate the new peasant laws outlined in the Czar's manifesto of March 11, 1903. The conferences will be attended by representatives of the nobility and by experts conversant with the needs of the districts. It is reported that the bureaucracy is thwarting systematically the attempt of the Czar to ascertain the facts relative to the peasant situation.

It is hinted in despatches that Russia has agreed to recognize Japan's supremacy in Korea, to abandon her neutral zone proposition, and to bind herself to the open door policy as regards Manchurian trade, but stands firm on her claim to political and strategic predominance in Manchuria. Japan insists on written assurances rather than verbal. The situation in the East now seems much more hopeful, though both sides are continuing their war preparations. No opposition will be made by Russia to the United States consuls appointed to Mukden and Antung, the open treaty ports.

By the recent concessions of the Danish King and Parliament the constitutional struggle which has been going on for thirty years between Iceland and the mother country has ended in a substantial victory for the Icelanders. The island, with its population of eighty thousand, will now have its own ministry with its seat at Rejkjavik. At its head will be a representative of the home government, who, however, must be acquainted with the Icelandic language.

Reports from Calcutta indicate that the British expedition into Thibet is likely to meet with some opposition. The native priests assert that they will appeal to Russia.

The festivities in honor of the seventy-fifth birthday of King Oscar were inaugurated at Stockholm last week.

Industrial and Commercial.

It is announced that a company having for its purpose the construction of a deep-water ship canal between Lake St. Clair and Lake Erie has been formed. English and French capital is behind the project. The new route, it is claimed, will be a shorter and safer passage, lengthen the season, and be of great benefit during fogs and obstructions in the Detroit River.

A representative of large Transvaal interests is studying American methods of cotton raising in Louisiana with a view of introducing these methods in South Africa, especially Natal. He feels that cotton will not be successfully grown there until the American method is mastered.

The shipment of ore from Lake Superior for the year 1903 amounted to 24,300,607 tons. This is a greater amount than was shipped in 1901, but was three and one-half million tons less than last year.

Peanuts are said to be growing scarce and high because so many growers have turned to cotton culture, attracted by the high prices at present prevailing for that staple.

The New York Central Railroad is said to be negotiating with the American Locomotive Works for 112 new engines, involving an expenditure of $1,750,000.

The number of pairs of shoes made in Lynn, Mass., in 1903 was 21,879,424, valued at $28,443,251.20. The value of the output in 1902 was $25,000,000

General.

The organ which will be the unparalleled attraction of Festival Hall at the St. Louis Exposition is as large as a brick house, says the *Musical Age*. It is 62 feet long, 40 feet high, and 33 feet wide, and possesses 140 stops, 239 movements, and 10,059 pipes. It cost approximately $100,000. Two electric motors, each of ten horse-power, drive this factory of sound, the construction of which required 100,000 feet of lumber and 115 miles of wire. The metal pipes alone consumed 16,000 pounds of zinc and 9,000 pounds of soft metal; its wooden pipes contain 35,000 feet of California sugar pine. The two pipes drawing the lowest tones are each 32 feet long.

Five separate organs are combined within this enormous mass of enginery, electrical mechanism, and wind-pressure. All five can be automatically played at one time by a double roll self-performing attachment, on a separate console or key-desk. There is a movable console for the great organ.

The second or self-playing console is stationary. Through the agency of the stationary key-desk the greatest symphony orchestra scores can be played verbatim without having to reduce the scope of the composition to bring it within the range of human fingers. As an illustration of its superhuman compass, it may be said that while a full orchestration would call for ten fingers on each hand, the automatic device can perform it just as easily as any smaller number—a double touch, used in this connection, producing effects precisely the same as if the organist had four hands, two of which were playing full harmony scores on one manual while the other two were performing a stately theme on the full organ. The organ consists of two departments, manual and pedal. The manual department, composed of 110 speaking stops and 8,907 pipes of metal and wood, is controlled by five claviers or key-boards of sixty-one keys each. The pedal organ is provided with all the leading varieties of what is technically known as the unimitative and imitative tones furnishing appropriate basses for all classes of musical combinations. Thirty-six couplers, when joined to the pedal keyboard, produce twenty-eight different relations. Thirteen speaking stops in the first sub-division of the great organ form the foundation tone of the entire instrument. Its second sub-division, including the three important reed stops, is capable of multiplying the tonal effects tenfold.

The third, or swell organ, introduces the true orchestral element, and possesses the wood wind, and string choirs, besides the human voice. Another division of the swell contains 1,281 pipes, every one of which is string tone. The brass wind division is represented by the solo organ.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

From our Contributors.

Conversation as Becometh the Gospel.

C. L. E.

PERHAPS it is possible for only a small percentage of the students of Christian Science to associate exclusively with those whose leading interest in life is Christian Science, and to the many therefore the question is often presented, as to how they shall fashion their intercourse so that those with whom they are brought in contact may be uplifted and blessed.

We read in our Leader's "Miscellaneous Writings," p. 59, "The only benefit in speaking often one to another, arises from the success that one individual has with another in leading his thoughts away from the human mind or body, and guiding them with Truth." Love is the keynote of practice in Christian Science. If, then, love is the mainspring of thought, word, and deed in the thought of the Christian Scientist, whosoever is brought into contact with that thought cannot fail to receive a degree of benefit. Not infrequently does it occur that our consciousness has been greatly uplifted by the study of the Bible, of Science and Health, and of our periodicals, or by silent communion with divine Mind. Then perhaps we meet with those who are seemingly indifferent or even antagonistic to Christian Science, and Truth soon unveils to us the error of considering this a tiresome duty; reveals the selfishness of such a thought; and the serpent becomes a rod whereon to lean.

As we reflect our uplifted sense upon another, greater light dawns upon our consciousness, and we have a glimpse of the meaning of these words in Science and Health: "The condemnation of mortals to till the ground means this, —that they should so improve material belief as to destroy it, by thought-germs tending spiritually upward" (p. 545). If we cannot converse from a like spiritual view-point, we can and may, through unselfed love, lift, with the power of Truth, the whole tone of conversation, and our mentality need receive no impress of error. Where it does not seem wise to make a sweeping declaration of truth, we can at least give an improved belief. "Christ changes a belief of sin or of sickness into a better belief, that melts into spiritual understanding wherein sin, disease, and death disappear" (Science and Health, p. 442). Maybe it will not be our privilege to bring to the individual the Truth of being, but the soil can be prepared, and no honest, loving thought is lost. As we strive to raise and purify our intercourse with others Christ will aid us and God's presence and purity will be felt. "Lo, I am with you alway."

Paul says, "Our conversation is in heaven." It starts from Principle and is clothed in truth; hence it is harmonious. We should remember that the first act of Jesus after the transfiguration, was to descend from the mount and minister to the needs of a few sinning, sick, and sorrowful mortals. As we consider the contrast between that uplifting experience in the light of Mind, and the sudden stooping to mortal darkness, do we not see how Love was indeed his guiding Principle, and can we not rejoice at the privilege of descending from our transfigurations to meet some mortal sense of need and so let divine communion be repeated in human converse?

Science and Health says on page 72, "The joy of intercourse becomes the jest of sin, when evil and suffering are communicable;" and on page 57, "To happify existence, by constant intercourse with those adapted to elevate it, should be the motive for society." And who is better adapted therefor than a Christian Scientist, who has received God's sacred trust? Our conversation should express all the beauty and the variety of lofty thought; purity, health, simplicity, tenderness, accuracy, vigor, grandeur, patience, justice, mercy, charity,—all the qualities of infinite Mind.

We can and should let the Christ-truth reign continuously in our consciousness; then will thought rise into the freshness, sublimity, and light of Mind. Then will the mental environment of the Christian Scientist be so rarefied from material beliefs that the sinful, sick, sorrowing, and heavy-laden will, by the law of divine attraction, be drawn unto the Christ-idea; and mankind will be spiritualized in "the radiation of Spirit" (Science and Health, p. 556); quickened by the activity of Life; strengthened by the all-mightiness of Truth; unselfed by the ever-presence of Love; transfigured by the purity of Mind.

Thy Word is a Lamp.

BLANCHE H. HOGUE.

IN the translation of the New Testament by Joseph B. Rotherham, the text in the eleventh chapter of Luke reads, "No one, having lit a lamp, puts it into a covered place, neither under a measure; but in the lamp-stand, that those who enter may see the light. Be looking to it, therefore, lest the light which is in thee is darkness. If therefore, thy whole body is lighted up, not having any part darkened, the whole shall be lighted, as whensoever the lamp with its radiance may be giving thee light."

This translation emphasizes the characteristic simplicity of illustration which Jesus used in making his appeal to the hearts of those about him. Clear comparison, dealing with the familiar things of every-day life, brought home to the men of his time the great lessons which have since become the standard for all Christendom. In this household picture, the central figure is the lamp "upon the lamp-stand." The mission of the lamp is to reveal the presence of the surrounding objects. Without its light, these objects are hidden in darkness, but in the illumination of its rays, they are brought clearly into view. And Jesus tells us that this service to the household can best be performed when the lamp is given a prominent place in the room. The presence and position of the lamp is a matter of relationship to everything else in the household, and the more intelligently right relationship is established and maintained, the more clearly "the whole shall be lighted up."

He who thoughtfully entertains this illustration, will perceive that his own highest knowledge of good enlightens the household of his thoughts, as the shining lamp lends its

Digitized by Google

light to all about it. His highest idea of righteousness bears to his lesser ideas the same relationship which the little lamp of olden time bore to adjacent objects. The purest ideal, by its own shining, makes known the presence of all the thoughts which throng about it, disclosing their position and revealing their true nature.

The third chapter of John's Gospel records Jesus as saying, "Every one that doeth evil hateth the light, neither cometh to the light, lest his deeds should be reproved. But he that doeth truth cometh to the light, that his deeds may be made manifest, that they are wrought in God."

Evil thoughts do, indeed, shrink from the light, well knowing that their deeds are evil; but the faintest right desire is a little missionary which seeks the darkened recesses of thought, forcing into notice all which it has strength to illumine. As its first rays fall upon the accumulated traits and impulses of the human nature, the light may be so feeble that the hidden motives are but dimly seen. But that first faint ray brings to the householder a sense of discomfort; he is no longer perfectly at ease with that which lurks in the dim corners. He suspects that there are many thoughts which a brightening light will reveal as deformed and unworthy. No man is so degraded but that a measure of this illumination is with him, but many men are avoiding self analysis, content to excuse and justify the inclination of to-day. Cherishing the present furnishings of their mental home, they fail to honor and exalt the higher ideal which would discover and reject all that is unfit to abide in the light. It is only that man who is honest in desiring a better condition, faithful in tending the flame of his lamp, and courageous in facing all which comes to view under its searching rays, who accomplishes a reformation which endures, and which makes his household a sweet and holy place.

The Psalmist says, "Thy word is a lamp unto my feet, and a light unto my path. . . . The entrance of thy words giveth light." The Christian Science text-book, which is in truth a "Key to the Scriptures," brings to the one who has not had the word of God for his lamp, a mighty desire to find it, that it may illumine and order his household; and to the mental home which has already set God's Word "upon the lamp-stand," Christian Science brings that which keeps the lamp always "trimmed and burning."

When the word of God enters consciousness, through the doorway of enlightened understanding, its first work is to challenge all which it finds. Every thought must, sooner or later, "come to the light," that its deeds may be "reproved" or that it may give evidence that its deeds are "wrought in God." As the perfect Christ model is kept faithfully in thought, the light becomes clearer. As the first unworthy thought which the light reveals, is removed, there is less to obstruct the rays of the "shining lamp," and they penetrate farther into the dim and hitherto unexplored recesses. One after another, motives, impulses, desires, and fears are discovered, analyzed, and seen in their true light. Many thoughts and deeds are found to be unfit for companionship with the Christ-light which has entered the household; some there are which cause the heart to shrink in dismay that they have so long been harbored in the dim light; others have held place under the cloak of hypocrisy, calling themselves by refined names which half concealed their hideousness. Traits hitherto supposed to belong to one's neighbor, but never to one's self, emerge from the disappearing darkness, and evil forces unforeseen arise from the retreating gloom to assail the very presence of the light itself. Sometimes, however, the heart is cheered and comforted by finding qualities of thought which, chastened and purified, may continue to abide in the household; for they stand the test, having been "wrought in God."

This piercing of the darkness of the human mind by the light of Christian Science, often brings disquietude and discouragement to the student, but there is no good reason therefor. He first accepted the teaching of Christian Science because he saw the light, and for a time nothing except the light. In his rejoicing, he brought it into his home and obediently put it, not "in a covered place, neither under a measure, but in the lamp-stand." Need he rejoice less when the light begins to disclose that which should be destroyed? Need he be discouraged because he finds how poverty-stricken and dismal his abode had been without the light? Before its entrance, he only knew his life was unillumined. Now, in the light of Christ's clear shining, he sees the nature of past deformities. The old condition may seem worse under the light than when it lurked in thought unexposed, but in all reason it is not. Mrs. Eddy says in the book "No and Yes," p. 33, "Exposure is nine points of destruction." To see clearly *how* evil has entangled one's career, opens the way of escape from the unhappy condition; and that which throws light upon the unrighteous complications, is in every case a blessing.

The relation of the lamp to the household objects must not be forgotten. Its mission must not be mistaken. And when one remembers that in the same way one's lamp of understanding must discover all surrounding mental deformity that the house may be "swept and garnished," one may gather courage and give thanks, that "the lamp with its radiance may be giving thee light." Inborn sin and chronic diseases of long standing may argue that they have so long held place and power that their removal is impossible; that it is easier to leave them unmolested than to maintain the struggle against them. The moment of their exposure, however, decides their eventual destruction, and the time involved depends not upon the months or years they have dwelt in the household, but upon the fidelity and activity of the householder. Whether they have been stubborn intruders for one year, or for twenty, matters not, if to-day there is sufficient light to exclude them.

The Point of View.

C. C.

A RECENT experience of mine, though perhaps insignificant, has been of great help to me, and it may help others.

A friend in pointing out the comet, spoke of its being above the lower left star of the dipper. In vain I searched and wondered why I could not see what was so apparent to others. Upon further discussion I learned that I had always viewed the dipper differently from my friend, and from the majority of those present. They saw it with the handle on the left, and I with the handle on the right. Not only was the comet immediately found after this, but the experience taught me a helpful lesson.

So often when telling my friends of some of the great truths of Christian Science that mean so much to me and seem so very clear, I wonder why they cannot see them as readily. But I forget that life has a different outlook to them, believing as they do, in life in matter, a corporeal God, a future heaven, etc. Then I see that I must be patient, and slowly and lovingly help them to see the difference between the real and the unreal which is shown us so plainly in Science and Health, so that they too may find and enjoy the many blessings brought us in that wondrous book.

[Written for the *Sentinel*.]

The Tempest.

HERT POOLE.

"BE still," dear mortal, tossed and tried
All night by self-inflicted woes
Upon life's Galilean sea,
The voice of Christ bids thee obey
The Truth that conquers all thy foes
And makes thee ever free.

Selected Articles.

Regarding Evil.

There is a peculiar mental philosophy afloat which declares that evil is a species of good, a lower form of good. It states that good is all and in this all includes evil as well as good; but this is not the teaching of Christian Science. This Science draws the line emphatically between right and wrong and demands an absolute abandonment of evil.

Whether evil be real or unreal, it is of necessity something to him who indulges in it. He who continues in sin does not believe the teaching of Christian Science that there is nothing in it, but believes that there is something in it.

Christian Science proposes to give strength to the sinner in his effort to overcome evil, by revealing to him the omnipotence of God and the consequent impotency of evil. In Science and Health, p. 447, Mrs. Eddy declares, "To put down the claim of sin you must detect it, remove the mask, point out the illusion, and thus get the victory over sin, and prove its unreality." Also on page 339, she states, "The destruction of sin is the divine method of pardon."

One whose life is consistent with the teaching of Christian Science, that wickedness is simply a delusion, would not do wrong. Evil practice is always prompted by evil thought and it is quite clear that if one's thoughts are pure, his deeds must necessarily be right.

The teaching of Christian Science, therefore, which tends to purge one's mental condition, strikes at the root of evil; and when it becomes universally adopted and practised there will be no sin in the world.

All wrong is the result of perversion, misconception, and consequent misconduct. If we believe, as Christian Science teaches, that all pleasure, profit, gain, or benefit is to be found in good, and deport ourselves accordingly, we shall cease from all sin. Therefore Christian Science is not a danger to good morals but the strongest possible incentive thereto. The danger now, as in all ages, lies in the adulteration of this Science, not in the Science itself.

ALFRED FARLOW.
Boston Times.

Christian Science does not purpose to supplant primitive Christianity nor do anything destructive to the Bible; its mission is to make Christianity more practical and to reveal the hidden treasures of God's Word.

I am a Christian Scientist because Christian Science inculcates a deep faith in God, because it gives a clear, comprehensive definition of Him and reveals His nature and essence, because it clearly outlines Christian duty and gives the Christian man a clear sense of right.

I believe in Christian Science because in proportion to his understanding of God as All in all, his trust in God, and the degree of Truth and Love which he manifests, the Christian Scientist is enabled to overcome sin and heal sickness. This Christian Science influence for good is reaching to the uttermost parts of the earth and gathering within its fold the infidel, the sinner, and the sick as is made evident in the rapid growth of the denomination.

REUEL F. GORDON.
Lewiston (Me.) *Sun.*

I am asked, "Do you expect to die?" I answer that I cannot promise you that I shall never pass through that change, and yet I don't like to declare that it is my intention to die. To sin and to die are very strong habits just at present, and although Scientists are doing good work in overcoming the evil tendencies of the times, yet I cannot make a positive statement that I shall so conquer all error, as to escape altogether its penalty, death; "For the wages of sin is death." I can say only, that to-day's problem of living needs so much consideration that its solution would escape me, were I to concern myself with future work. At this stage of progress, the whole can be proven only by inductive reasoning. Nor is this asking too much, for it is conceded in all other sciences. In astronomy, celestial distances and measurements are accepted on the basis of terrestrial computations, and in many instances the whole is granted because a part is proven. In this respect Christian Science takes no more latitude than other sciences. To the human mind, death is a mystery because nothing is known of Life.

Let us try to discover what is Life, not what is death; what is good, not evil; what is health, not disease; what is Truth, not error; what is Mind, not matter. Starting on this basis of action, we may come into possession of the key to the problem that so vexes and perplexes us. Rest assured that if you work on the wrong side of the question, the eternal Principle of truth can never swerve one iota from immutable law to protect you or save you from the pain of its violation, no matter how much you may cry to be forgiven or saved from the penalty. The only way for you to escape the punishment is to turn from your error and work right.

ALICE SINCLAIR.
Pawtucket Times.

Christian Scientists do not disregard medicine through any blind faith in God or through a fanatical effort to be true to their religion; but they do it because they have an intelligent understanding of the power of Truth to heal sickness as well as sin. They have an abundance of proof of the reliability and accuracy of Christian Science, both in their own cases of healing and in the healing of intelligent people all over the land, whose word in other matters is as good as their bond. These people testify to the fact that this understanding of Truth has healed them when the best medical aid had utterly failed.

SEVERIN E. SIMONSEN.
New Haven (Conn.) *Union.*

Christian Science does not teach that there is no sin, pain, or sickness. It declares that they are not real in the sense that God did not create them, and it is the duty of all to see their unreality as being unlike God, hence they must be false. It is granted that to the material sense when a man is sick, he is sick; when he is suffering he is in pain; when he is doing what he should not do, he is sinning either consciously or otherwise. It is knowing these things and that they do not belong to the true man that enables the Christian Scientists to do their work.

CHARES K. SKINNER.
Marshall (Mich.) *News.*

The true reason why "Christian Science mak converts" so easily "among people of all classes," and "why so many intelligent people accept it" is that "humanity's need of a Saviour" understands and welcomes the healing and redeeming Christ, the Christ of a daily living—not of a mystic, mediæval, theoretical theology,—but Immanuel, God with us. "Lo! I am with you alway." The acceptance of Christian Science illustrates anew the words of Jesus the Christ. "And I, if I be lifted up from the earth, will draw all men unto me."

THEODORE D. WARREN.
Camden (N. J.) *Echo.*

It is generally conceded that Christian Scientists have made considerable progress in the elimination of worry from their daily lives, and this is but one of its good works. Through lessening worry many of the greater problems of humanity have been simplified and the Christian Scientist therefore finds himself better able to cope with the difficulties which beset his path than before understanding this truth.

ALBERT E. MILLER.

Among the Churches.

Building Site Secured in Marquette, Mich.

First Church of Christ, Scientist, in this city has purchased a lot between Front and Third Streets which is considered one of the best building sites in the city. For some time there has been a sentiment that this society should have its own house of worship, and the purchase of the lot is the first step toward that end.

FANNY W. SACKRIDER, *Clerk.*

Progress at East Aurora, N. Y.

A few seekers after Truth, meeting in a private house for the study of the *Quarterly* Bible Lessons, saw their number increasing to such an extent that it was thought advisable to rent a hall; and two of their number being chosen as Readers, regular services were begun November, 1900. The following year, in October, it was our great pleasure to have a lecture by Carol Norton, C.S.D., and much good was realized therefrom. November, the following year, 1902, we met and organized as First Church of Christ, Scientist, with a charter membership of twelve, and it was with joy and gratitude that we saw the approach and consummation of this step in our onward march. We are most grateful to God for the way we have been guided and protected by His great love, and to our beloved Leader for her untiring, unselfish, and loving devotion to Truth.

EMILY M. AHRENS, *Clerk.*

Christian Science in Holland.

Our text-book, Science and Health, tells us (page 3) that, "Action expresses more gratitude than speech," but the desire has often come to me to tell through our publications of my grateful love to our Leader for showing a sleeping world the omnipotence and omnipresence of Love and making it possible for us to demonstrate daily, yea, hourly, the earnest desire of a pure heart.

The past two years my husband and I have been traveling in Europe, the summers being spent in Laren, a town near Amsterdam, Holland, much frequented by artists. We always hold the Sunday service in our rooms, and the first summer began with an attendance of from six to ten, mostly Americans, three of whom were Scientists. This summer our little band has been made up of Europeans and English, all earnest seekers for Truth, who accept, as fast as they understand them, the truths taught in Science and Health.

I loaned one of my extra copies of Science and Health to a Dutch lady from Amsterdam. A friend of hers wished to borrow it from her, but she said she felt the daily need of its healing truth, and was obliged to refuse to let it leave her room. For some time she has been under the care of a specialist at Utrecht without satisfactory results, but with close study of Science and Health and a few treatments, she gave up doctors, drugs, and eyeglasses, and says she has "never been so well, care-free, and happy as now."

A friend of hers who at first ridiculed Christian Science, told me later that a great change had been wrought in the physical and mental condition of the lady in question, even to the betterment of her disposition. She, too, wanted to read the book, asked the privilege of attending our Sunday service, and later came for treatment.

One evening at Villa Vandyke, a lady said to me, "Wont you demonstrate over my cold?" and added, "My eye has been very painful to-day." I talked to her of the allness of God, good, and realized for her the Truth of being. A few days later she came to my rooms to tell me that she was completely healed of her cold immediately after our talk. Her eye also ceased to trouble her, and she gave all credit to Christian Science.

I am exceedingly thankful to the *Sentinel* and *Journal* for the great assistance they have been to me in my work. All who have been helped here seem grateful for having been shown the Way as taught in Christian Science. A Dutch lady who speaks fluently four languages, has demonstrated her understanding of Science by helping herself and others. She evidences a strong desire to know more of Christian Science that she may make its blessings known to her nation.

A large per cent of the Dutch speak and read English. My sister put a copy of Science and Health in the public library at Amsterdam, and I have sold three copies here.

The seed of Truth has been sown, the soil is fertile, and "Dear Little Holland" will soon be on our list of regular Church services.—ADAIRENE CONGDON, Laren, Holland.

Progress in England.

Although Second Church of Christ, Scientist, London, was organized as recently as December, 1902, with a membership of sixty-five, the Trustees have found it necessary to look out for a larger hall to accommodate the rapidly increasing attendance at our services.

The result is that we shall start the New Year in a beautiful new hall in New Bond Street, W., the Æolian Hall, which has a seating capacity of four hundred and ten people, and one of the finest organs in London. There is also an excellent room for the Sunday School. This forward move has caused much joy to the members, whose hearts are filled with gratitude to God for His ever-watchful care and guidance.

The Publication Committee, which is at the present time in the hands of Second Church, is doing great good in furthering the cause of Christian Science. To give one instance of this, a series of articles appeared in an Irish paper which were antagonistic to Christian Science. These articles were taken up and answered by the Publication Committee. After a time the writer of the articles wrote to ask for an interview. He wanted the latest copy of Science and Health, and wished to discuss his last article with the Christian Scientist, as he had been asked to re-publish his series of articles in pamphlet form. He actually enclosed the article for correction as to facts, and at the interview he said he had the greatest respect for Christian Scientists, remarking that a well-known professor, speaking in a lecture, had styled Christian Science "The Religion of Healthy-mindedness." There have been many enquiries from all parts of the United Kingdom as the result of the work of the Publication Committee, and in this way many people have been brought into touch with Christian Science who would have had hardly any opportunity of hearing of it in any other way.

The Book Room Report was most satisfactory. From December, 1902, to the present time, one year, there have been sold three hundred and nine copies of Science and Health, and three hundred and eighty-one copies of other works of Mrs. Eddy, besides a large amount of Christian Science literature.

Our Sunday services and Wednesday meetings are a blessing to all, and there have been quite a number of testimonies given of instantaneous healing through attendance upon our services.

At the special Thanksgiving service on December 31, there were many testimonies of heartfelt gratitude to God for the blessings received in Christian Science, as revealed to us through our revered Leader, Rev. Mary Baker G. Eddy.

We have sent a subscription to the Mother Church Building fund as an expression of love and thankfulness.

GERALD H. WALENN, *Clerk.*

The Lectures.

Santa Monica, Cal.

First Church of Christ, Scientist, was crowded last night [December 18], the occasion being the delivery of an address by Judge Septimus J. Hanna of Colorado Springs on Christian Science.

Judge Hanna was introduced to the audience by Attorney George H. Hutton, who said in part,—

Those of us here who know little or nothing of Christian Science from the standpoint of Christian Scientists, occupy the unique position of jurors who have listened to but one half of the testimony in a cause in which they have been impaneled. As jurors in such a cause it would be your duty and mine, and a duty that we owe to mankind, to hold our minds free, unbiased, and unprejudiced until we have heard from both sides of the case.

We are here to-night for the purpose of listening to the other side of this question, and I ask of you my fellow-citizens of Santa Monica that in all fairness you hold your minds in the unbiased and unprejudiced attitude of jurors, while you give an hour's careful and unprejudiced attention to the advocate of Christian Science.

After the lecture Mr. Hutton again arose and spoke in part as follows:—

"We have listened to the lecturer's eloquent address and clear-cut logic and to his unanswerable arguments, facts, and quotations, and we have been impressed with his sincerity of manner. What we have heard is new to many of us, as we are unfamiliar with Christian Science from the standpoint of Christian Scientists, and it is more than we can assimilate in a single evening, but he has planted a seed that will not die; he has suggested lines of thought that we will follow; he has referred to the seventh, eighth, ninth, and tenth verses of the tenth chapter of Matthew which we will read, and whatever the ultimate result may be, I am sure that the charge that Christian Science is a fraud will not hereafter go unchallenged in the presence of any member of this audience. [Applause.] If there is any one present for whom I do not speak, let him stand up and be counted."

Then turning to the lecturer: "Judge Hanna, you have won your jury, and we thank you most kindly, most cordially, and most sincerely for what you have said to us to-night." [Loud applause.]—*The Daily Outlook.*

San Diego, Cal.

An audience, which by show people would be rated as "capacity," filled the Isis Theatre, last evening [December 21] to listen to a most pleasing address by Judge Septimus J. Hanna on the subject of Christian Science. Judge M. L. Ward introduced the speaker of the evening, and said in part:—

Less than thirty years ago Mrs. Eddy issued the first edition of "Science and Health with Key to the Scriptures," the text-book of Christian Science. The book has reached its two hundred and ninetieth edition of one thousand copies each.

Subjects of the greatest importance are treated of in that work. It treats of sickness, of health, of life, of death, of sin, of righteousness, of Christ, of God and the teaching of His Word.

A most wonderful religious organization has grown up, founded upon the teachings of that book.

I am not a member of that church, and the same is probably true of many of those composing this vast audience. We belong, however, to that class of men and women who believe in investigation, who do not reject without knowing, nor condemn without a hearing.

San Diego Union.

Springfield, O.

One of the most notable lectures delivered in this city for some time, one filled with instruction and the deepest argument, was that delivered at the Grand Opera House December 31 by Carol Norton of New York City. In introducing the speaker, County-Prosecutor J. B. McGrew said in part,—

There are probably no two things of greater interest and importance to the human race than its present and future life. These questions are generally recognized by us under the subject of religion. Religion is as old as the human race and was born with it. This religious spirit has grown with the ages and to-day at the beginning of a new century we have many creeds and many churches, and within the last thirty years has come a new faith knocking for admission, asking for recognition among the creeds of the early days, and requesting that it be given an opportunity to unravel the master knot of the human race. While founded on the life and teachings of that one who is recognized by all Christendom, as its Saviour and the Saviour of the world, its followers have made claims for it which have at times called forth severe criticism. However this may be, whether this new faith be false or whether it be true, it is at least entitled to be heard and to be given an opportunity to present its claims, and especially is this so in this land of ours where religious freedom is guaranteed. While you may not agree with all the speaker may say, while you may not be able to accept his views, yet you will all agree that nothing could be more delightful than to go through life hand in hand with health on the one side and righteousness on the other, and it is on this subject, "Christian Science, The Gospel of Righteousness and Health," that he will address you.—*The Sun.*

Davenport, Ia.

Bicknell Young, a Christian Scientist lecturer, was greeted by a large audience at the Burtis Opera House, Davenport, yesterday afternoon [January 3]. The lecture was given under the auspices of First Church of Christ, Scientist.

William Theophilus, the Davenport lawyer, introduced the speaker, and said in part,—

Public discussion tends to advance truth and suppress error. Wherever free speech is guaranteed right will ultimately prevail and wrong perish. No system of morals, ethics, or religion, when subjected to the light and to open discussion, can long endure in a country like ours, if not founded on sound principles. This is an age of progress and advancement, especially so in the world of thought and religion. Evolution is the order of the day in all things. All progress comes from right thought. Without ideals man would not be above nor any better than the brute. Ideals mark the civilized from the savage, man from the brute, truth from error. High ideals consist of intelligence and virtue. Without them there can be no true greatness. They are the images of God, the source of all virtue and intelligence, and the higher the ideal, the better and more perfect the image.

From ideals have emanated the religions of the world, and among them Christian Science. This religion is called a science and it is claimed that it brings health, happiness, and perfect peace to mankind. If this be true, then, indeed, it may well be called Science, and also an art—the sublimest of all the arts and sciences.

Probably many here, like myself, do not belong to the Christian Science Church. Let us cast aside all prejudice and listen to the speaker with unbiased minds, giving him a respectful hearing and his words careful consideration.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

An Expression of Thanks to Mrs. Eddy.

WE take great pleasure in publishing the following official communication from the Unitarian Church, which has so kindly opened its doors to our Concord brethren during the construction of the edifice presented to them by our Leader.

The fellowship and harmony which for many years have marked the religious activity of Concord is well disclosed in this letter and in the resolution it contains. Particularly gratifying to Christian Scientists is the recognition that this liberal spirit, which often found expression through the churches of Concord, is further emphasized by Mrs. Eddy's teachings. This communication, together with many other acts of Concord's representative citizens, indicates how much Mrs. Eddy is appreciated and beloved by those who are personally acquainted with her and know of her good works.

This occasion recalls Whittier's beautiful lines:—

A sweeter song shall then be heard,—
The music of the world's accord
Confessing Christ, the Inward Word!

That song shall swell from shore to shore,
One hope, one faith, one love, restore
The seamless robe that Jesus wore.

M.

Concord, New Hampshire, December 31, 1903.

The Rev. Mary Baker G. Eddy.

Dear Madam:—On Sunday, December 27, at the close of the service, Col. Solon A. Carter read to the congregation of the Unitarian Church, of Concord, your letter of Christmas greetings, and handed to the Prudential Committee of the Society your Christmas gift of a check of three hundred dollars. Mr. Frank S. Streeter in behalf of the congregation voiced their sentiments in a fitting acknowledgment of your generosity, and presented the following resolution which was seconded by Rev. L. H. Buckshorn, pastor, and cordially and unanimously adopted:

"*Resolved,* that the congregation recommends to the Society the grateful acceptance of Mrs. Eddy's generous Christmas gift and unites with the Society in sending her hearty thanks and most cordial Christmas and New Year's greetings."

Complying with the wish of the congregation, and in its own behalf, the Society of the Unitarian Church through its Prudential Committee accepts your gift and makes grateful acknowledgment of your generosity.

In offering to the members of the Church of Christ, Scientist, of Concord, a temporary church home while their new church is building, the Unitarian Society was merely carrying out that Christian spirit which for so many years has been such a marked characteristic of the religious bodies and people of Concord. More than seventy years ago, when theological lines were tautly drawn elsewhere, the old North Congregational Society offered its house of worship to the newly formed Unitarian Society for the installation of its first pastor, which offer was accepted. The liberal spirit then shown, and since often repeated, is further emphasized by your teachings. In this same spirit your unexpected and valuable gift comes with its message of Christian fellowship and Christmas greeting, for which we in behalf of the society return its gratitude and its cordial greetings.

Fraternally yours,
GEO. D. WALDRON,
HOWARD A. KIMBALL,
FRANK CRESSY,
DELIA S. MARSHALL,
GERTRUDE DOWNING,
Prudential Committee, Second Congregational (Unitarian) Church.

Self-Denial.

SELF-OBLITERATION has always held a prominent place in the thought of the followers of the Nazarene Prophet, and this is not to be wondered at in view of the fact that it was given such emphasis by him.

Among the numerous Christian sects there is no difference of opinion as to the desirability of obeying the Master's teaching, although there is a decided lack of agreement as to how this obedience can best be rendered. His teaching respecting self-denial, is thus definitely stated by the Evangelist, "If any man will come after me, let him deny himself, and take up his cross daily, and follow me." These words have touched the hearts of millions, and none would question that the world has been made better by every effort thus to "follow" Jesus. The sad thing is, that so many have misunderstood his admonition, "let him deny himself," and have made for themselves heavy crosses which it was never intended they should bear. Thus burdened they have been unable to do the one thing for which they have striven; namely, to follow Christ. Many have sought to deny themselves, while believing in the reality of the things given up. We are nowhere told that Jesus assumed burdens in order to become more spiritual, we are told, however, that he was ever removing burdens from the heavy-laden. He was inspired by a lofty purpose, and he knew that in order to fulfil it he must deny himself daily, and take up his cross.

In harmony with his example Christian Science teaches that we can not, and should not deny anything which expresses God, either in man or the universe. It shows with equal clearness that we must deny the reality of everything which does not express God, and for this we have the authority of Jesus' teaching, as well as the clear statements and deductions of our text-book, which says, "Denial of the claims of matter is a great step toward the joys of Spirit, toward human freedom, and toward triumph over the body" (Science and Health, p. 242).

Science simplifies the problem by beginning and ending with infinite Principle. The belief that we are giving up, or "denying" something real, even though it be done from a sense of duty, must ever have a depressing effect; but when we understand that we are only giving up the false for the true, then the "joys of Spirit" beckon us on and on. We are told in the epistle to the Hebrews that because of "the joy that was set before him," Jesus "endured the cross," and our text-book says, "Your good will be evil spoken of. This is the cross. Take it up and bear it, for through it you win and wear the crown" (Science and Haelth, p. 254).

The only experiences of this earthly life worth remembering are those in which self has been denied and overcome, for thus alone has true greatness been attained. The gospels tell us that when the Master was being led from Gethsemane to his trial, some of his disciples "forsook him and fled," and two "followed him afar off." May not that be said of all who seek to follow Christ along the lines of creed and dogma, rite and ceremonial? Let each answer for himself. The call of the Christ is ever the same, and

Digitized by Google

involves the same self-denying service which he gave to humanity, and for which he sought to inspire and equip his disciples.

We may rejoice that our revered Leader has been enabled so to follow the Christ-truth as to impress upon us by both her counsels and example this Divine ideal of self-sacrificing love; and with the poet we may well pray,—

Holy Spirit, Power divine!
Glow within this heart of mine;
Kindle every high desire;
Perish self in Thy pure fire!

K.

The Better Way.

CHRISTIAN SCIENTISTS who have occasion to look over the religious periodicals of the day, can but be impressed by the frequency with which they meet expressions of anxiety and solicitude upon the part of Christian writers in view of prevailing religious conditions; and as they remember their own spiritual advance through the unfoldment of the truths of Christian Science and the rapid growth of our Cause through unquestionable healing work, they experience an added sense of humility and thankfulness, and are prompted to yet greater endeavor to prove worthy of their blessings.

What can we do to awaken religious interest, to secure church attendance, and to stem the tides of unspirituality and worldliness which imperil our churches and our homes? These are the questions which press upon Christian workers everywhere, and the situation seems the more pathetic, when one realizes that it is nothing but a false human sense which withholds from these earnest, inquiring hearts the answer they long for, but do not find.

In a recent Christian review the religious outlook is considered at length by a theological professor who, as he says, was prompted to write by the statement of a worthy minister that though he had been preaching ten years he did not know that a single soul had been brought to Christ through his ministry! In trying to explain this sad fact, the writer expresses the conviction that the attention of the ministry is centered upon teaching rather than seeking the unsaved, and says,—

"Brethren, look at our preaching orders: Go ye and make disciples, and when you have made them, teach them. Not the one or the other, but the one and the other. Go and do both. . . .

"'The Son of Man is come to seek and save that which is lost.' . . . Go and seek the lost, and when the lost are found, comfort them, instruct them, inspire them. . . .

"The most subtle, and *dangerous* way of breaking any commandment of God is to bisect it, ignoring one half while obeying the other. . . . God wants obedience to His commandments; not amendments to them. . . . A partial obedience is no obedience."

It seems remarkable that any one, familiar as is this writer with our Lord's explicit command to preach, teach, *and heal*, should quite ignore that part of the gospel ministry which Jesus said demonstrates its truthfulness, and which received special emphasis in both his example, and his specific instructions to his disciples, and then proceed to declare the danger and wrong of ignoring one half of a divine command while obeying the other.

The growth of Christian Science, which has attracted so much attention and comment, is not more remarkable than was the growth of the early church, and the phenomena are explained in both instances by the solid and satisfying conviction which accrues from the practical demonstration of the healing power of Truth. And since it is apparent that this conviction can be awakened in the many by no other means, every minister of Christ who is burdened, as is the one we have referred to, with the sad evidences of the inadequacy of his present grasp of truth, must surely realize that an enlarged apprehension of the saving availability of the Gospel for which he stands, is the one and only thing that can meet the situation. No one can question the change in the spiritual status and outlook which would speedily be effected in the average parish if its minister were so to interpret the teaching of Jesus as to be led not only to accept the possibility of spiritual healing, but to commit himself to an earnest and persistent endeavor to attain unto it. And now, at a time when ministers are speaking so frequently and frankly of the deadness and ineffectiveness of church ministrations, and of the indifference of the world to religious teaching and appeal, Christian Science is lovingly reminding all of their richer inheritance and larger privilege. More than this, it is proving by its works, its crowded churches, and its rapid growth, that Jesus' command, "Go, preach the Gospel, heal the sick," is yet capable of blessed fulfilment, and that when this command is simply and humbly obeyed, the same inspiring, world-awakening results will be chronicled which were witnessed at the beginning of the years.

Christian Science expresses the one efficient and sufficient answer to the cry of the world's need when it says, in the words of our Leader,—

"Jesus taught the way of Life by demonstration, that we may understand how this divine Principle heals the sick, casts out error, and triumphs over death. . . . Though demonstrating his control over sin and disease, the great Teacher by no means relieved others from giving the requisite proofs of their own piety. He worked for their guidance, that they might demonstrate this power as he did, and understand its divine Principle" (Science and Health, p. 25).

W.

Letters to our Leader.

Philadelphia, November 1, 1903.

Beloved Leader and Teacher:—Gratitude and thanks are not all my message to-day. There is even more than this in my heart as I review the experiences of years and the memory of lost opportunities. I want to be forgiven for every thorn upon which I have caused you to tread, for every sin of omission or commission which has hampered your upward flight, for every pang you have suffered through my disobedience.

For the Concordance, the Manual, and later, the crowning blessing of all in the Teachers' Association, I cannot express my gratitude. Through fulfilling the law of love yourself, you have made it possible for those who follow you to catch glorious glimpses of the promised land, and God grant that we may not fail to enter in because of murmuring or disobedience. I want to thank you, and thank you again, for your faithful guidance and patient example. "Grace and peace be multiplied unto you through the knowledge of God, and of Jesus our Lord." To be called not only your loving but your obedient student is the earnest wish of my heart,

D. ELOISE BROWNELL.

Chestertown, N. Y., January 16, 1904.

Rev. Mary Baker G. Eddy, Concord, N. H.

Beloved Leader:—It is a joy to begin the new year with a tribute of love and allegiance to the great cause of Christian Science and to you whom God has chosen to lead, and to show us the way so faithfully, so lovingly, you who have borne the standard of Christ so high, that however clouded the hour, we could see it there strengthening, guiding us on.

In gratitude for a healing that demonstrated to me the truth of Christian Science,—the Christ-truth,—I opened a reading room in this little summer resort in the lower

Digitized by Google

Adirondacks where Sunday and Wednesday evening services have been held, filling the room with summer guests, —thereby "sowing beside all waters."

With lowly, loving gratitude I testify to many cases of healing of sin and disease, of drunkenness, profanity, consumption, abscess and carious bone, Bright's disease, ulcerated kidneys, delirium tremens, epilepsy, and many minor conditions of discord. I have had the privilege of several seasons of annual Communion services at the Mother Church, and of hearing the voice of Love speak to me through you from the balcony at Pleasant View; I have placed in the public library and reading room here, copies of your books, "Science and Health with Key to the Scriptures" and "Miscellaneous Writings," also a copy of the *Sentinel* weekly.

Hoping it might interest you I enclose this prayer on ribbon. It is an exact copy of one lost by a soldier during the Civil War, in the streets of Charleston, S. C. It was on ribbon and doubtless given by a mother to the loved one on his going to war.

I am devoutly thankful for Christian Science, the Christ-truth, and for the spiritual interpretation of the Lord's Prayer as given in our text-book.

With reverence and love,

Your loyal follower,
(Mrs.) Althea G. Downs.

Kansas City, Mo., November 26, 1903.

Rev. Mary Baker G. Eddy, Pleasant View, Concord, N. H.

Beloved Leader:—Uneducated, unhappy, unbelieving, unhealthy, uncouth, a rough railroad man, my whole life one of lost opportunities, Christian Science—the Word of God—finds me, to-day, happy, contented, prospercus, healthy, receiving the highest education that mortal man can possibly conceive, that of loving my neighbor as myself and "loving God supremely" (Science and Health, p. 167). I want to thank you. I love you and I thank our Father-Mother God for His great message, "Science and Health with Key to the Scriptures." One sweet privilege I have lost: I do want to call you my very own dear mother, but I must be obedient.

Lovingly,
John C. McQuinton.

Board of Lectureship.

Frank H. Leonard, C.S.B., has been appointed to the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass. As in the case of other members of the Board his field is unlimited. Mr. Leonard's address for letters and telegrams is 17 Battery Place, New York, N. Y.

The Bible Lessons.

In the *Quarterly* to be published in April, the last two lines of the note on the first page which now read, "The lessons in this *Quarterly* have been prepared with the 264th edition of Science and Health as a basis," will be changed as follows: "The lessons in this *Quarterly* are suited to the 264th and following editions of Science and Health." Readers who find it convenient to use for the lessons in the current *Quarterly* editions later than the 264th, will find the references generally available.

Notice.—In view of the increasing interest in the daily study of the Lesson-Sermons, which give week by week the interpretation of Scripture in the words of the text-book, "Science and Health with Key to the Scriptures," it has been decided that the pamphlet, "Scriptural References Sustaining the Doctrines of Christian Science," which is now out of print, will not be republished.

Testimonies of Healing.

It is about five years this coming March since I was healed in Christian Science. At that time I had heard Christian Science spoken of, and had even got a copy of Science and Health from the public library to look over. There did not then seem to be anything in the book that particularly interested me, and I simply glanced through it. At about the time I speak of I had a lump form in my right breast, and for a month it seemed to be getting gradually larger, until at last, through fear, I concluded to consult a physician, although I experienced no pain or inconvenience whatever. After questioning me closely as to whether or not we had any hereditary diseases in our family, he examined the lump and pronounced it a cancerous growth. I shall never forget the feeling I had when the doctor told me what he believed to be a fact. He said it could be easily removed, and the best thing I could do would be to come back in a week and we would consult about having an operation performed. I told him I would never submit to that. He said I was very foolish and must reconsider, and I then went home.

A few days before this occurrence a friend had loaned me a *Christian Science Journal* and I had noticed the name of a dear little woman whom I knew in Salt Lake City, as a practitioner. On my return from the physician's office I immediately wrote her, telling her the circumstances and asking her to help me. Her reply came at once that she was ready to help me. To this friend I owe a debt of gratitude that I think can never be paid. She sent me a copy of Science and Health, with a request that I should begin to read it, which I immediately did. I appreciate more than even the healing, the love she gave me. She wrote me two or three times a week, and such peace and love I felt I had never experienced before. In one month the lump had entirely disappeared. This I consider a marvelous demonstration. This same friend healed my mother through absent treatment when no one considered she could possibly live. These are only two of the many demonstrations that have been made for me and mine through the power of Christian Science. I have been able to make many demonstrations for myself through the divine Principle revealed by Science and Health, for which I am sincerely grateful. This is the first testimony I have ever given, and I feel I do not wish to see the last of the year without making acknowledgment of the blessings which have come to me through Christian Science.

G. C., Butte, Mont.

I have enjoyed the blessings of Christian Science for six years, and have received so much help through our periodicals that I feel it my duty to send my testimony to the Field. I was a sufferer for twelve years. At first I had some severe troubles for which I tried nine doctors, each one encouraging me to expect a cure. I had to take so much medicine that it affected my stomach, at first slightly, but gradually it grew worse until I could only take liquid food. I was in much distress and lived mostly on tonics. I tried one doctor after another, giving them all a good chance, but they could not reach my case. Then my nerves became completely shattered. I had to stay in bed most of the time for three years. I could not bear the slightest noise, and for this reason was deprived of all my friends. At last I gave up the doctors but still took lots of tonics, thinking to gain some strength in that way. I had always been taught to pray, and our minister came every week to pray with me. I often wondered what I had done that I received such punishment; then again I would think that there was no God.

When I heard of Christian Science, at first I was doubtful, thinking it was only another fad. I was told that the healing was performed without medicine, and thinking

Digitized by Google

that it was the devil's work, I tried not to listen to it, and was afraid God would only punish me more severely for trying it; but when I heard of it again, it aroused some hope in me, and I wanted to investigate it. A practitioner was sent for, and when he arrived I told him that I had always prayed to God for help, and could not understand why my prayers were not answered. He told me that I had evidently not been praying to the one true God. That seemed clear to me, and I asked for treatment. After the first treatment, I ate a good meal and there was no distress. This seemed wonderful to me. I took ten treatments in all, and kept on gaining. From that time on I ate everything that was set before me. I burned up the stomach pump and other appliances which I had been using so long. I could not at first read Science and Health, as I was German, but I have since learned to read it understandingly. We have had many proofs of the healing power of Truth through Christian Science, and have seen error's nothingness. I feel indeed very grateful to God, to Christian Science, and to Mrs. Eddy, who so bravely pointed out the way for us. It is my earnest desire to follow her as she follows Christ.

ANNA M. BAIER, Oshkosh, Wis.

It is nearly five years since I bought my first copy of "Science and Health with Key to the Scriptures," the reading of which cured me of chronic constipation, nervous headache, astigmatism, and hernia, in less than four months. I spoke through our columns at the time, of this wonderful result of conscientious study and application of the truth as taught in Christian Science, and now after four more years of health and happiness I wish to reaffirm what was said at that time.

I have had no return of those conditions, and am better prepared than ever to endorse the statement made by our beloved Leader, that "The same affection, desire, and motives which have stimulated true Christianity in all ages, and given impulse to goodness, in or out of the Church, have nerved her purpose to build on the new-born conception of the Christ, as Jesus declared himself, namely, the Way, the Truth, and the Life. Living a true life, casting out evil, healing the sick, and preaching the Gospel of Truth, these are the ends of Christianity" (No and Yes, p. 21).

Where would I be now, had not this blessed truth been brought to me by much persuasion of a very dear friend? I should certainly have been deep in the slough of despond, if not in the grave. Am I truly thankful for all the good that has come to me and mine? I try to let my works testify of that; but to those whom I do not meet in person, I can truly say, Yes; I am indeed more thankful than words can express for the glorious healing that has come to me, both physical, mental, and moral, and I also convey herein, my song of gratitude to the dear Leader who has through her fidelity to Truth enabled me to touch at least the hem of Christ's garment.

I am also thankful for myself and others for the clear revision of Science and Health, as well as for the helpful Concordance and the new edition of the Manual. Surely my cup runneth over with gladness for all these good things, and I shall try to make them profitable to all with whom I come in contact.

I also wish to acknowledge the great good that is being done through the medium of our various periodicals. It is with the greatest pleasure and confidence that I pass them along, after reading, to some one less fortunate.

B. S. JOSSELYN, Sioux City, Ia.

One of the beauties of Christian Science is that it is fitted to all our needs, under every circumstance and condition. During seven years as principal of a kindergarten and primary school, I have had many proofs of the government of divine Principle. Every teacher who has learned of this Christ-truth, knows of instances of disobedience, evil-speaking, anger, impatience, deceit, dishonesty, and selfishness, which are overcome by the understanding of Love, as real and ever-present. A few Christian Science children have been with me, and I was asked to help them, if necessary, and we have had many proofs of Love's care.

The majority of the patrons and children had not yet learned of the Truth-healing, and I always respected their position, endeavoring to follow the Golden Rule; however, there were a few times, when the impersonal healing power of Love had to be proven. One instance was so helpful and filled me with such thankfulness and reverence, that I long to share it with others.

One day little J—— was playing with the children, when I heard a loud noise as though a child had fallen on his head. Before I turned, I declared the presence and power of Love, and that "accidents are unknown to God" (Science and Health, p. 424). As I turned I saw J—— lying on his face, the children standing spell-bound. Before I could reach him he staggered to his feet, but fell again, striking his head and rolling over on the floor. As I lifted him, he gasped, and stiffened out. I took him at once into a room alone with God. For a moment fear declared that the work and responsibility were too great, but I realized that divine Love filled consciousness and there was no room for its supposed opposite; that this was the reality, that there was no other power or presence then or there. While so doing many promises from the Bible and Science and Health came to me. In about three minutes he nestled down in my arms, and opened his eyes, continuing to improve; in about ten minutes he got down from my lap and wanted to go out and play, the only evidence of the struggle being a little paleness. The teachers and children were much impressed, and my own heart returned thanks to the Giver of all good, divine Principle, for the proof that "Love is impartial and universal in its adaptation and bestowals" (Science and Health, p. 13).

This is only one of many proofs I have seen of the healing power of Truth with the little ones.

MRS. ELLEN S. ROBBINS, Mount Vernon, N. Y.

I wish to tell what Christian Science did for me that others may know what Truth will accomplish. I was attending my gymnasium class one evening when I slipped and fell quite a distance from the bars and struck my foot so as to fracture my ankle. As soon as I fell our professor came to me and started to rub my ankle back in place, but I was suffering so much that I wanted to go home, telling them that I would be all right in the morning. A short time before this accident I had had a few treatments and had cast aside a number of little complaints and thought that I could do the same with my foot, but as soon as I fell, my ankle commenced to swell and continued to swell until it was twice its natural size. They took me home and I told my mother that I was hurt, but not to worry, that I would be all right by morning.

When morning came I could not put my foot to the floor and suffered very much. Our friends came in and gave us a number of home remedies which my mother used without giving me any relief. She wanted to call the doctor, but I said that he could not help me and I would not have him. This accident happened on Friday evening and by Sunday I was in much pain: so after breakfast I asked my mother to go to the Christian Science Church and tell my practitioner about it. The lady told my mother to stop using those remedies and to know that I could step on that foot. I tried to use my foot but suffered too much, and when evening came my mother went to the home of the practitioner and she said that she would work for me that

Digitized by Google

night, and if we wanted to have the ankle examined by a surgeon to do so, but if possible to wait until morning.

The lady came to my home the next morning and had a long talk. She gave me a treatment and said that she didn't think my ankle broken, but if we wanted to call our physician, to call him. I still refused to have him, and about an hour after the lady left our home I put my foot to the floor and walked on it. I have continued to use it, and it is perfectly well. My foot was badly discolored, but in a short time the discoloration all disappeared. I am a business woman and I only lost two days from my office. I feel very thankful for what Christian Science has done for me. Several members of our family have taken up its study.—B. E. F., Des Moines, Ia.

I wish to add my testimony to that of thousands of others, as to what Christian Science has done for me. I came under its gracious influence about two and a half years ago, through the careful study of the Bible and Science and Health. My motive was to search out and show to others what seemed to me nothing but an appeal to sentimental, over-enthusiastic, and weak minds.

After studying alone for four months, I received class instruction, and finally proved the problems that at first seemed to be not only improbable but impossible. As each doubting question was answered there remained with me answers never to be forgotten, for the Bible was now a grand and interesting book, abounding in truths that were for me.

My first physical demonstration was for an ailment of thirty-two years' standing, called by *materia medica* chronic catarrh of the head, and by some hay fever. This was partially overcome after two months' treatment, so much so that I stopped all further treatments, regarding its occasional recurrence as of little or no importance. My next demonstration was over rheumatism, which resulted in about the same way. In both cases the treatments should have continued longer, but I was so near freedom from these errors as not to give them a thought. My third demonstration was for gastritis, which was relieved promptly. I had previously passed through the same symptoms and conditions under *materia medica*, and was therefore perfectly familiar with all its phases, but under Science treatment all fears and horrors were destroyed at once, and I was out attending to business on the fifth day from the time of the attack, while the former case under material treatment required nearly six weeks for recovery. I am entirely convinced that Truth is the only power and is unchangeable, always the same positive good; and when a seeming failure in Science occurs, the cause is to be found in mortal changeableness, material doubts, and refusals to believe fully, and live every day a life of obedience to Truth and Love.

I am very grateful for what understanding of Truth I have, and feel happy that no error can take it from me. My earnest desire is to demonstrate it more constantly in my daily acts, for this is the only comforter we have.

F. L. MANCHESTER, Brooklyn, N. Y.

To acknowledge the power of divine Love over all human discord, is to obey a Scripture mandate. Our obedience is imperative for unfoldment, enrichment, and blessing to ourselves and others. A true Christian Scientist is grateful for the understanding that enables him to heal the sick and sorrowing, lift burdens, and scatter sunshine all the way.

A desire to be relieved from the intense mental and physical suffering of an obstinate case of nervous prostration, led me to Christian Science.

Mine was a slow case of healing, but I obtained relief at once, and was very grateful, especially in view of the fact that an eminent physician of our metropolis had told me in reply to my anxious questioning, "If you are comfortable in four years, you need be thankful;" but he could not assure me a cure, He did his best for me, and I hold him and the other physicians who attended me in kindly remembrance.

I have been perfectly well for eight years, and can see how the hand of divine Love has led me all the way, eliminating errors and enabling me to realize the at-one-ment with the Mind that is God.

Once it would have been impossible for me to realize how, like Paul, I could be glad in tribulations, not knowing then, as now, how the overcoming led to an unfoldment to me of man's true relation to God and to his fellow-man.

When one can understand that there is no state of human consciousness, no condition in life that the light of Truth cannot brighten and bless, a gleam of its inestimable value will be recognized. In the old thought, perplexities, worries, and fears were like mountains, but in this new way, I have seen them, with accidents and various forms of sickness and disease disappear through the realization of ever-present Love.

It is a pleasure to acknowledge the patient and loving guidance of our Leader, who has made it possible in this generation for the new-old truth to be again brought to men in its Christ-like simplicity, and be made practical to heal and to save.—O. E. W., Rochester, N. Y.

Christian Science came to me at a time of deepest need. I had had a long hospital experience, being in one five different times, for surgery and special treatment. I gradually grew worse, and physicians said another operation was the only thing that could give me any relief. This I would not submit to, as a former one had failed to help me. I had taken medicine almost constantly for years, was rarely ever without a tonic of some kind, but had even given that up as useless, and just at this time, when utterly discouraged and heartsick, a friend urged me to try Christian Science. I had no faith in it and was very much prejudiced against Mrs. Eddy, but I was finally induced to go to a practitioner. While I was taking treatments the practitioner lent me a copy of Science and Health, but I did not like to read it. This prejudice, which was due to ignorance, was soon broken down, and I was healed. This surely means a great deal to one who has spent years in suffering, but that is really the least of all it has done for me. It has made the Bible a new book and old things have passed away; a "new heaven and a new earth" are in their stead. I have had the great privilege of class instruction, and for several years have been in the Science work. During that time I have seen nearly every kind of ill healed through this understanding.

My testimony would not be complete if I did not express my love and gratitude to Mrs. Eddy, and in her beautiful words in the Message of 1902 all may find the same sweet assurance which has helped me. "Our Father never destined mortals, who seek for a better country, to wander on the shores of time disappointed travelers, tossed to and fro by adverse circumstances, inevitably subject to sin, disease, and death. Divine Love waits and pleads to save mankind and waits with warrant and welcome, grace and glory, the earth weary and heavy laden who find and point the path to heaven."—SUE M. JEROME, Chicago, Ill.

The availability of Christian Science in emergencies, is to me, a most interesting phase of this beautiful religion, because it has enabled me again and again to carry my school work successfully forward in the face of suddenly presented difficulties.

One morning, after I had traveled all night and mostly through a mountainous region, I was suddenly attacked with car sickness. This seemed an unusually trying experience, because within two hours I was due at the high school in B—— to deliver a lecture to the teachers of that

Digitized by Google

city. It seemed trying because I had wanted so much to be a messenger of health and of good things, not a representative of disease, to the teachers whom I had been invited to help. While still an hour's ride from B——, and while the fear of not being able to meet my engagement repeatedly presented itself to me, the assurance of Divine aid came as forcibly as could any personal message, and infinitely more powerful, with these words, "Fear not: for I have redeemed thee!" It is scarcely necessary to add that I was immediately well. It is clear that in so far as we hear the voice of Truth, we receive the healing. The work with the teachers was accomplished without a thought of illness, and I have never experienced the slightest return of the difficulty; for which, as for many other blessings, I am grateful to Christian Science.

L. D. H., Buffalo, N. Y.

It is over twelve years since I first heard of Christian Science and took treatment. I had then been an invalid for four years, traveling about in search of health. I had been pronounced incurable by two physicians who wrote to my sister saying nothing could be done for me, I could live but a short time. I had been operated on twice for spinal trouble, which physicians said brought about other troubles.

When quite a little girl I began to manifest stomach trouble, and for years I was a slave to drugs, never being able to eat a meal without following it with a powder which we kept on hand in quantities. Finally the powders ceased to give any relief. A milk diet at long intervals was prescribed and I was fairly starving when Christian Science found me. I also used an air-cushion and wore an electric belt. All this terminated in extreme nervous prostration and inflammation of the stomach.

When I heard of Christian Science, I decided to lay aside the belt, to get along without the air-cushion, and to give Christian Science a fair trial.

My healing was slow but sure. I did not weigh a hundred pounds when I began treatments. I found relief at once, and felt less misery, less fear, and became more peaceful and more hopeful. I was under Christian Science treatment the most of one year, and the dyspepsia, stomach trouble, and many minor troubles vanished quickly. I look back now and see that it was the true bread I was hungering after. I had indeed been all my lifetime living on husks.

I am even glad that I had this hard, tedious, rough road to travel, for through it I learned to find God.

I can say with the Psalmist, "It is good for me that I have been afflicted; that I might learn thy statutes."

EMMA J. BENDER, Cincinnati, O.

I have long intended to give an experience I had, of the power of Truth over error as demonstrated at the birth of my youngest child, now nearing three years of age. We were then living ten miles from the railroad and there was no practitioner nearer than fifty miles.

I wrote asking help of this practitioner a short time before my anticipated confinement, and she directed my attention to this statement in Science and Health, page 380, "Every law of matter or the body, supposed to govern man, is rendered null and void by the law of God." This thought was a great help to me, and I clung to it. I had no way of letting her hear from me when I realized that the time had come. I did not let any one know that I was expecting the birth, until just time to call a physician and nurse, and they did not arrive until after the child was born. I was alone with God, and fully realized that there was no power apart from Him. The waves of mortal law threatened to roll over me, but I stood firm on the "rock of ages," and they broke harmless at my feet.

I was brought into Science nine years ago by being healed through the ministry of this same faithful practitioner, and have had other experiences quite as wonderful. The Christian Science God is indeed the God of the Bible, "a very present help" in every time of trouble.

MARY ALICE MORGAN, Cornish, I. T.

[Translation.]

I had suffered for six months from abdominal complaint and was so weak that it was hard for me to perform my duties. The physician's prescription brought me no relief; finally I called in a specialist, but continued growing worse and more hopeless.

Through a friend I was led to Christian Science and immediately went to a practitioner. I understood but very little of it and it seemed like a miracle when I awakened the next morning and found that I was much better. I could do my work and not get tired, because I now recognized that God is my Life and my support. After I had treatment for several weeks I was entirely healed. This was a year ago, and I am very grateful to Christian Science.

Since then I have perfect trust in the infinite love of God, and I am therefore much happier and more contented. Everything is changed for the better, in every detail of my affairs, and in every trouble I help myself with the knowledge of the all-power and kindness of God.

E. L., Dresden, Germany.

Some years ago, when I knew but very little of Christian Science, I came across a copy of "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, in one of our public libraries.

For years I had been addicted to the use of liquor, and was surprised to find one day that I had lost all appetite for whiskey and beer, not knowing at the time that the mere reading of this book could awaken such an interest in Truth as to heal the sick and reform the sinner.

I am very thankful for my deliverance from the bondage to drink in what might be called, a moderate degree.

After reading Science and Health, I took from the library other works which I ignorantly supposed to be genuine Christian Science literature, which to my great sorrow, I found after a time to be spurious. I also attended meetings of those who were not loyal to the teachings of Christian Science, with the result that I suffered intensely in mind and body, but was healed through the right apprehension of Truth. For this I am thankful, and am now very careful to confine my reading to genuine Christian Science literature.—CHARLES E. FOSTER, Brooklyn, N. Y.

For the last seventeen years I have suffered most severely from hay fever. At first it would appear in August but each year it came a little earlier until for the past five years the first week in June has found me a sufferer. During these years I have resorted to *materia medica* again and again, but with absolutely no benefit. This year, as usual, the ailment appeared the first of June, and after enduring it for two weeks I decided to see what Christian Science would do, having tried it in the past few years for many other ills with unfailing benefits. After four absent treatments the disease entirely disappeared, since which time I have been as free from it as though I had never had it.—E. M. P., Austin, Ill.

I feel that I would like to say a word for Christian Science. I have received help many times through this Science and have found it to be a practical religion and applicable to every human need. I have not the privilege of attending services or Wednesday evening meetings, but I am a subscriber to the *Sentinel*, *Journal*, and *Quarterly*, and receive much help from them. I feel very grateful to Mrs. Eddy and also to the kind friends who have been the means of bringing me to this light.

MINNIE REMINGTON, Cataract, Wis.

From our Exchanges.

Which way lies your Bethlehem and where will you look for the Christ on next Christmas morning? Seek him not in some outward form of devotion, some round of religious observance, however venerated or sacred in human estimate, he is not there. Seek him not in your own moral rectitude or sense of personal worth secured from a superior self-righteousness, he may not be there. Look not for him in the inn of accredited ecclesiastical formulas of intellectual belief or in the statements of doctrines to which you have given assent, for he himself is truth and greater than all formulas of belief about the truth. When you go to your creed be sure you have not found an empty manger. The Christ you need will be found in a lowly place, in the place where love and humility dwell. Mary and Joseph were a part of that scene upon which the shepherds looked. Jesus was closely linked to all that was beautiful in the human. Go and look into some other life and heart on Christmas day, where there is loneliness, but tenderness and love, and pour out your love and speak your word of adoration to those who wait for the divine fulfilment and there you will find your Christ.—*The Standard.*

The central need of life is that we believe that each of us is set to do a characteristic piece of work in the Almighty's work-shop, and that we shall have some sort of adequate reward if we do it in our best way.

We must have the transforming motive if we are to get a reasonable portion of contentment with our lot; and reverence for its special opportunity, and the widest spread of all great motives, that which has made history resplendent with its heroes and martyrs, is the faith which comes to the rescue when plain, every-day motives have lost their freshness, and remind the soul that it is in God's service, at God's post of duty, building not merely houses of wood and brick, but structures which defy time's corroding tooth.

The Christian Register.

Jesus did not talk in an archaic language, but in the simple vernacular of the common people. This fact is overlooked, to our loss, in nearly all the versions of the New Testament now in circulation. Christ is made to talk to us of to-day in the language of three centuries ago. This is a palpable misrepresentation of his manner of speech, which was that of the day in which he lived. Wycliffe's version was made in the ordinary speech of the fourteenth century; the version of 1611 was, to a large degree, in the current language of that period; but our modern versions are largely modeled on the version of King James's time. Some time we shall wake up to the fact that in this we are doing the word of God and ourselves a grievous wrong.—*The Examiner.*

In a cluster of "whatsoevers" indicating the principal qualities in an ideal character, St. Paul includes "whatsoever things are lovely." Perhaps it has been too much the habit in Christian teachers to overlook beauty as an essential feature of a complete life. Christ, who is always to be our model, was "altogether lovely." He was strong, true, just, and righteous, but there was no flaw in his character, no defect in his life. We should never tolerate in ourselves anything that is not beautiful.

REV. J. R. MILLER.
The Watchman.

How fond we are of thinking about what we have not, instead of about what we have! It has been well said that "some people's cast-off happiness, like their cast-off clothes, would make some other people very happy." The cheeriest lives are not those that have the most, but those that appreciate the most. Every one of us has a gold-mine of unworked joy close at hand. But gold needs searching for.—*The Sunday School Times.*

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

NOTICE.—Members of the Mother Church who have changed their name by marriage will please notify the Clerk and send $1.00 for change of name in the published list of church members. Changes will appear in the list of names semi-annually only,—July and December.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America.

It contains about thirty-eight pages of reading matter, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

Reprints from the Journal and Sentinel

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

250 Huntington Avenue, Boston, Mass., U.S.A.

ARCHIBALD McLELLAN, Editor-in-chief. JOHN B. WILLIS, Second Editor.

ANNIE M. KNOTT, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

Secretary Shaw has issued, for the use of travelers abroad, a convenient booklet containing information of interest concerning the customs duties. The following will be of interest: A resident of the United States returning thereto is entitled to bring with him free of duty articles purchased or otherwise obtained abroad, of a total value not exceeding one hundred dollars. Such articles may be for the use of the person bringing them or for others, but not for sale.

As an outgrowth of the Rochambeau mission to the United States in 1902, the women of France have offered to the United States a replica of the bust of Washington which was destroyed by fire in the Capitol in 1851. The tender was made by M. Jusserand, the French Ambassador, in a letter to Secretary Hay.

Colonel Carroll D. Wright has authorized the statement that he intends to resign his position as Commissioner of Labor by the end of this year in order to give his whole time to his duties in connection with Clark University.

The United States torpedo-boat destroyer flotilla, escorted by the cruiser Buffalo, on its way to the Philippine Islands arrived at Gibraltar Wednesday, January 27.

United States Minister Powell has recognized the provisional government of General Morales as the *de facto* government of Santo Domingo.

Foreign.

Through the good offices of the United States Department of State, the good name of Chang, former Chinese minister to this country, who strongly favored the reform movement during the Boxer troubles and who was beheaded, has been restored to his family, and the estate, which was confiscated at that time, has also been returned.

The first congress of Italian students for the discussion of moral and religious questions has just been in session at Rome. The last session was held in a hall decorated with the flags of all nations, among which the American and Italian colors were entwined. United States Ambassador Meyer presided at the session.

An official report has been made on the losses resulting from the fire on January 26 at the University Library, Turin, one of the most famous in Italy, according to which about thirty-seven hundred manuscripts, including almost all those of Oriental origin, were destroyed. The number of volumes lost has not been established.

The Canadian Government has made a contract with the Allan line of steamers for an improved mail service between Canada and Great Britain, to commence next August with two new turbine steamers. The subsidy is ten thousand dollars per round trip for the turbines and five thousand dollars for the slower ones.

An association which originated at the time of the proposed sale of the Danish West Indies to the United States, has been formed at Copenhagen to arouse the nation's interest in her outlying possessions and prevent any diminution of her territory by sale or otherwise.

The total amount of claims awarded against Venezuela by The Hague Tribunal will amount to about nine million dollars. Up to December 1 Venezuela had deposited with the Bank of Caracas about one million dollars to meet these obligations.

The American street railway system, about to be inaugurated in Manila, will call for an investment of four million dollars in equipping a street car service of forty miles. Eventually this will be extended to the suburban districts.

The new Vesuvius electric railway is working to the fullest satisfaction of the builders. Since its opening for passenger traffic in September last over thirty-five hundred tourists have used the new line.

Italy has expressed her willingness to accept silver payments for her indemnities arising out of the Boxer troubles, with the reservation that any difference may be made up later.

The German Government, after long experiments, has ordered turbine engines to be constructed for the third-class cruiser Merkur and for a torpedo boat.

Industrial and Commercial.

According to a news despatch the annual report of the Government engineer in charge of improvements on Lake Superior shows that the commerce of the Duluth-Superior harbor is the third in importance in the United States. If the sub-port of Two-Harbors is added, the traffic of the harbor is above that of any port in America except New York, with a probability that it stands fourth among the shipping ports of the world.

The figures taken by the Government for New York for 1902 were 30,000,000 tons of all commodities; of Duluth, including its sub-port of Two-Harbors, 23,800,000 tons; of Philadelphia, 21,000,000 tons, and of Boston, 18,000,000 tons. The growth of business at Duluth has been from 6,300,000 tons and $95,000,000 valuation, in 1895, to 23,800,000 tons and $190,940,000 in 1903.

The selling value of the silk produced in New Jersey in 1903 was $47,849,192. The aggregate capital invested in all the New Jersey silk mills was $24,872,624. The value of the material used in manufacture was $27,819,826. There are 165 establishments in the industry in the State—eighty-four owned by private parties and eighty-one operated by corporations. The average number of employees was 14,968 males and 12,022 females. The total of wages paid was $11,089,184, and the average annual earnings $410.86.

The Philippine trade statistics of the Insular Bureau of the War Department show that the imports of those islands during the eight months ending August, 1903, aggregated $22,266,581, and exports $20,867,313. The aggregate of exports and imports is an increase of almost $6,000,000, over four-fifths of which may be credited to shipments from the archipelago, the hemp and copper output being especially large.

The Prince of Monaco has presented to the French Academy of Sciences a new bathymetric map of the ocean floor, showing in relief its depth and formation in all the great areas. The construction of such a map has been made possible through the deep sea soundings which began about fifty years ago, and especially through the soundings made in connection with cable line surveys.

A new pipe line about seven hundred miles in length and costing, with pumping stations about $4,000,000, is said to be contemplated by the Standard Oil Company to connect the new Indian Territory and Kansas oil fields with Whiting, Ind., a few miles from Chicago.

Exports from the United States to Russia in the year just ended aggregated practically twenty million dollars, which is more than double the amount of the exports to Russia in 1901. Imports from Russia in 1903 were $10,907,315, against $7,263,874 in 1901.

The Empress of China recently brought to Vancouver a cargo of silk, raw and manufactured, valued at $1,932,000. The shipment is a record one, measuring 960 tons, and is destined for Weehawken, N. J.

A steamer has just arrived at Boston from Manila and Cebu with one of the most valuable cargoes of hemp ever brought to that port, consisting of 25,500 bales, valued at $650,000.

The total production of pig iron in 1903 was 18,009,252 gross tons, against 17,821,307 tons in 1902, and 15,878,354 tons in 1901.

General.

Practically the entire supply of camphor comes from Japan and Formosa, which is Japanese territory, and about six weeks ago the Japanese Government, owing to the threatened war with Russia, placed an embargo on its shipment. The reason for this is that camphor is one of the necessary ingredients in the manufacture of smokeless powder. About twenty per cent of the world's production goes into the manufacture of powder. The total production is between seven and eight million pounds annually. It is bought by the Government from the natives for about twelve cents a pound. It sells in this country, however, for over sixty cents a pound in large lots.

At the recent National Live Stock Convention at Portland, Ore., a unanimous vote was passed indorsing a resolution which favors the incorporation of a company of live stock men and the establishment of independent packing houses in the stock centers of the country to compete with the present packers' combine. Steps for raising a stock subscription of five million dollars are to be taken to carry out this plan.

The Wason Car Manufacturing Company of Springfield, Mass., shipped last week the first five of an order of fifteen cars for use on the steam roads in China. They are divided into two apartments, one for first-class and one for second-class passengers. The frames are of steel as a protection against insects that make ravages on wooden cars in the Chinese service.

Professor Phillips of Princeton University, who has recently conducted experiments in the production of radium, announces that this substance will soon be plentifully extracted from carnotite, an American ore found in Utah, and that it will be within easy reach of all branches of science. He used the Curie method of extraction and claims no credit.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

Selected Articles.

Perfect Results Demand Perfect Principle and Perfect Application.

To the Editor of the *Boston Herald.*

In an article entitled, "Why This Discrimination?" an editorial writer for the *Herald* has said, "What its advocates claim for Christian Science is that it rests on the will of the Supreme Creator and Ruler of the universe, a Being possessing both omniscience and omnipotence, in whose work failure is inconceivable. . . . And, if this is the case, then failure to attain the end wished for is tantamount to an assertion that the divine purposes of the Ruler of the universe can be set at naught by various human limitations."

Our good friend must note the difference between Christian Science and its student, just as he would distinguish between mathematics and a pupil thereof. Christian Science will not work out results itself. Like mathematics, it must have a proficient demonstrator. The Principle of Christian Science can never be improved; it is absolute and perfect; namely, God, omniscient, omnipotent Spirit. This is what all Christians believe concerning God, but mere belief does not work out the greater results which are possible to him who has fully complied with the Scriptural demand, "Be ye therefore perfect, even as your Father which is in heaven is perfect." The ability to heal in Christian Science is not a spontaneous gift, but a power attained by Godward progress.

A student and adherent realizes the truth of the exalted propositions of Christian Science in proportion to his spirituality. It is not claimed that this Science was obtained by "inspiration" in the sense which some seem to attach to that term; namely, that the recipient becomes passive and the fulness of divine power is received unwittingly. On the contrary, it is asserted that, in a state of active consciousness, the Discoverer of Christian Science sought for Truth and found the eternal Christ-knowledge in contradistinction to mere human opinion. This she taught her students. Then followed the necessity for attaining healing ability by practice. Science does not claim to work in opposition to law, or to effect a suspension of law, but in accord with law—God's law.

That a Christian Scientist is not "always successful" does not need to be explained on the basis "that in His own world God cannot work out His own will," for His will is always worked out. The want is on our part, and consists in a lack of ability to perceive the eternal and ever-present will of God and the consequent nonentity of that which obscures it. If our critic assumes the responsibility of reasoning for Christian Scientists, he must employ their premises; then his conclusions will be in accord with theirs.

This Science finds us where our old ways of thinking and doing have left us. Our material conditions must be overcome through spiritual growth. The state of the present generation is the culmination of ages of erroneous material belief and conduct, which cannot be set aside at once. It is but just to Christian Scientists that they be permitted to name their own standard of ability, and be judged accordingly—not by a criterion which others kindly, but ignorantly, impose.

While Christian Scientists insist that Mrs. Eddy has discovered a perfect Principle, they do not claim to be able to apply it perfectly, and all must agree that even a perfect way will not produce perfect results until perfectly used.

If Christian Scientists were claiming infallibility in healing the sick, there might be some justice in the irregular and special criticism of their failures, but they have never made any such pretension, although they do assert that they are more immune from disease, and that they obtain more ready relief therefrom through Christian Science than they did formerly through medicine. Only a cursory examination into the mental and bodily condition of the Christian Science denomination is necessary to find that they are at least as healthy and happy a people as can be found in any religious or philosophical belief, notwithstanding the fact that they have been gathered largely from a class of invalids who had failed to secure relief by other means.

The possibilities of the future of Christian Science are infinite—not through the improvement of the Principle of Christian Science, but through the increase of the students' knowledge of it.

It is said in behalf of medical practitioners, "When we fail, it is because of an ignorance which the study and experience of succeeding generations may go far toward dissipating."

In view of this admission that further knowledge is attainable in *materia medica*, is it not quite as reasonable for Christian Scientists to demand that medical practitioners shall immediately come into possession of it, as it is for our medical friends to demand that Christian Scientists shall at once possess a full realization of the truth of Christian Science and be able to practise all that it promises?

Is it not both unreasonable and unfair to demand that Christian Scientists shall obtain a full and perfect knowledge of the unseen spiritual power in thirty-five years, while medical schools, notwithstanding their four thousand years' study, are still admittedly in "ignorance" of the "visible material" which may only be dissipated by "succeeding generations"? Christian Scientists are more than satisfied with what they have gained as a result of their change from medicine to Science, and they are patiently awaiting the days and the results of a maturer understanding of their chosen way out of the ills of the flesh.

The plea in behalf of medicine is that its students have not yet attained to the fulness of its promises. I make exactly the same plea in behalf of Christian Science, adding that Christian Scientists have the advantage, in that they have a fixed Principle, which will doubtless enable them to advance more rapidly both in understanding and in application. It must be remembered that Christian Science is, indeed, a Science which must be attained by years of study and practice, and cannot be acquired by abnormal accretion.

It is said that the Christian Scientist claims "infallibility; since he who acts under the direct will of God, unless he is a pretender or self-deceived, cannot by any possibility be other than infallible."

Copyright, 1904, by Mary Baker G. Eddy.

Digitized by Google

This assumption that Christian Scientists claim to be entirely dominated by the will of God, is incorrect. It is one thing to believe in the supremacy of the Divine will, and quite another to be entirely submissive thereto and governed thereby. Even the great Master acknowledged this in praying, "Not as I will, but as thou wilt."

Christians generally recognize that if the results of prayer are limited in human experiences, it is not to be attributed to fallibility, lack of power, or unwillingness on the part of our heavenly Father, but to their inability to ask wisely and in perfect compliance with the Divine will. The logic which your writer employs would condemn the prayers of all Christians because they are not infinite in their results, on the ground that the Being to whom they apply is infallible. If applied to the general efforts of mankind such logic would condemn them all, for it must be conceded that, however insufficient may be the ways and means employed to produce a given result, there must be a perfect, divinely appointed way in which to bring it to pass, and no one is excusable because he does not perceive it and make it fully effective. As a matter of course, we ought to know all truth and be governed accordingly, but, alas, such is not the case.

It is said, "A God-given system of curing human ills must, from the logical necessity of the case, be always successful."

Does this assertion imply that medical practice is not a God-given system and that, therefore, perfection should not be expected of it? Is it the intention to admit that Christian Science is the only system which is believed to be "God-given," therefore the only one from which perfection should be expected? If medical practice is not God-given; *i.e.*, based on Divine law, it surely behooves its devotees to seek a better. If it be God-given, your writer may apply to its practitioners with perfect propriety and sound logic all his arguments in respect to Christian Scientists, and he should proceed at once to advertise all their failures.

No greater results should be demanded of the Christian Scientists than are expected of others who also claim to be working in harmony with God's will and to be employing means which are of His provision.

In connection with the story prompting this discussion, a recent issue of your paper contained the statement of a physician that a certain woman who died under Christian Science treatment "would have been saved if proper medical treatment had been given her." This is a stronger claim than any Christian Scientist makes in behalf of his ability. If, therefore, the writer is consistent with his own argument, he will hereafter publish every failure which that physician makes in his attempt to heal, because of his claim to infallibility.

ALFRED FARLOW.

Boston, January 27, 1904.

Christian Science not Stoicism.

An address delivered on January 11, in Brooklyn, by President William De Witt Hyde, D.D., LL.D., of Bowdoin College, on "Stoicism," contained some references to Christian Science which lay bare vital problems. The public is entitled to have certain distinctions made which President Hyde overlooked, or of which he may not have been aware. He stated that "Stoicism is a slight exaggeration of the truth of which Christian Science is a fantastic and extreme exaggeration." Now even a slight study of Christian Science will reveal the fact that it differs widely from President Hyde's description of stoicism. He stated: "The central principle of stoicism is that we are the sum of our mental states." Christian Science, however, follows the Scriptural teaching that the real man is made in the image and likeness of God. According to this teaching the real man, or immortal man, is an expression or manifestation of God only, and is not the sum of varying and shifting states of human or mortal mind. The real man reflects the attributes of God, which are invariably and unchangeably good. According to Christian Science, therefore, the only safe way of determining what man really is, is to study the nature of God and to arrive at a definite and scientific understanding of Him. To do this, is certainly not to indulge in any "fantastic and extreme exaggeration," for Jesus himself stated: "And this is life eternal, that they might know Thee the only true God, and Jesus Christ, whom thou hast sent."

When even a slight scientific understanding of God has been reached, and He is recognized as Spirit and as Love, omnipotent and ever-present, then comes the necessary conclusion that the real man must be wholly controlled by God, and thus the term "self-control" is seen to be susceptible of misuse and misunderstanding, if it involves any assumption that the real man can be controlled by what St. Paul denominated the "carnal mind."

This carnal mind would try to imply that immortal man is a mixture of good and evil, harmony and discord, truth and error, but such a concept is opposed to Scriptural teaching, and is a false or mortal concept of man, which disappears as Science is more clearly understood. Mrs. Eddy has stated on this point:—

"The true man being linked by Science to his Maker, mortals need only turn from sin, and lose sight of material selfhood, to find the real man and his relation to God, and to recognize the divine sonship" (Science and Health, p. 316).

Stoicism, as the term is generally used in conversation, implies fatalism, a blind submission to evil in its various forms, either as inevitable or as a species of good. Christian Science proves that evil is never necessary and must, therefore, be overcome with good, and it resolutely denies and repudiates the belief that sin, sickness, or sorrow are sent by God or are of His procurement. W. D. MCCRACKAN.

Brooklyn (N. Y.) *Times*

It is reasonable to suppose that the Christian Science practitioner who has healed the sick, knows how it was done and he will tell you that it is the "Mind which was in Christ" that heals, and those who do not know how the work was done may theorize, but the facts are not changed. Jesus healed the multitudes. He did not use drugs or material remedies; it was not his body that healed. It was his pure consciousness of God, his pure thought, before which sin and disease fled. He left this definite promise, "He that believeth on me, the works that I do shall he do also." The Christian Scientist believes in Jesus the Christ, believes that he meant what he said, and the same Mind which was also in Christ, heals to-day as it did centuries ago. Auto-suggestion, self-mesmerism, ecstatic or emotional mental states, and blind faith are not the means used in Christian Science to perform cures. The Bible says, "He sent his word, and healed them." The Christian Scientist believes that God's word heals, and he knows that God's word is not hypnotism, or exorcism, or fetichism.

Our critic thinks that Christian Science has an injurious effect upon "mind and spirit," though it may profit the body. Here again he is mistaken. Christian Science elevates the moral and spiritual tone of its followers, insists upon uncompromising purity of thought and act, raises a high standard of integrity, and demands obedience thereto. Christian Scientists are better citizens, better friends, better units in society than before they practised Christian Science. This is a fact universally recognized by all critics. What, then, does a man lose, who loves God and his fellow-man more than he ever did before.

WILLARD S. MATTOX.

Meriden (Conn.) *Journal.*

It is not the will of God which produces panics.

From our Contributors.

Preaching.

G. C. PENNINGTON.

"THE best sermon ever preached is Truth practised" (Science and Health, p. 201). Every true Christian Scientist loves our Cause and wishes to act in a manner that will command respect, not so much for the sake of his personal reputation, as for the interests of the Cause. Most of us, however, do little acts and say little things which would look very bad if a brother or sister Scientist were to do or to say them, and which would sound out of place for a Christian of any denomination. As it is the "little foxes, that spoil the vines," so it is these little things that we need to guard against.

As Christian Scientists we are being observed, and it is all the more needful that we "abstain from all appearance of evil," for by yielding to little errors, we not only make a bad impression upon those who might become interested, but we hinder our own moral and spiritual growth. There are a thousand occasions on which we can preach a whole sermon, without saying anything. Prior to coming to Truth we may have used profane language; have we quit to the degree that we do not even use slang which often borders upon profanity? Formerly we may have indulged in a little gossip, have we quit to the degree that we will not listen to it, much less repeat it? Once we may have grumbled at the "butcher and the baker," and at our servants; have we now a kindly, helpful word for them instead? Have we made a clean-cut separation from our previous bad practices, avoiding all appearance of evil? If so, each Christian act and each kind word will prove an appealing and effective sermon.

The world has little use for the long-faced Christian, but does the abstaining from these little evils necessitate this? No, but rather the contrary. Let us "See that none render evil for evil unto any man; but ever follow that which is good," showing kindness to all men and rejoicing evermore. Sometimes we are tempted to make a remark to those with whom we deal, that we would not make to a Christian Scientist. I have done this, and was afterward humiliated by the discovery that Christian Science might be judged by my folly. The lesson did me good and has made me more watchful along this line. While it is true that we should not talk our religion to those who do not wish to hear it, that by no means justifies us in saying to any, what we would not wish a fellow Scientist to hear, "For our conversation is in heaven;" that is, if we are living up to the tenets of our church, to which we have subscribed.

When we first learn of Christian Science, we are so liberated from fear and old traditional beliefs, that we are liable to go to the other extreme, and say and do things which are entirely out of reason and good judgment, because our zeal is not according to knowledge or common sense, and Christian Science often has to suffer the disadvantage until we ripen into a better understanding and commence to undo some of our mistakes. It seems that in small towns and villages there is special need of this silent preaching by good works, because we are there more closely observed.

If we are sometimes tempted to bolster ourselves up with the thought that we are as good as our neighbors, we need to inquire as to our standard of goodness. "It is Christian Science to do right, and nothing short of right-doing has any claim to the name." "The error of the ages is preaching without practice" (Science and Health, pp. 448, 241). "For I say unto you, That except your righteousness shall exceed the righteousness of the scribes and Pharisees, ye shall in no case enter into the kingdom of heaven."

In Jesus' time it was the error in human thought that criticised the Christ, and it is the same error to-day that is watching for a chance to criticise the demonstrators of his doctrine. It is therefore very important that we watch diligently, that we think rightly, and consequently talk and act rightly, not that we may be thought righteous, but that the Cause we love and represent may not suffer from our errors. "They that be wise shall shine as the brightness of the firmament; and they that turn many to righteousness as the stars for ever and ever."

The Nearness of God.

REV. IRVING C. TOMLINSON.

I HAVE been helped of late in thinking of the nearness of God. In Isaiah, 55 : 6, we read, "Seek ye the Lord while he may be found, call ye upon him while he is near." The Christ was foretold as Immanuel, God with us, and through the help given us in Christian Science, it is our blessed privilege at this time to prove that God is with us. God is indeed near us when we truly know Him and reflect His love.

It is important to know *how* He is near us. There are two ways in which a friend may be near. He may be in the same room, and we say that he is near; but only as the friend is one with us in sympathy, only as he loves us and is glad to serve us, is he truly near. Again, though he love us, our own hatred may keep him afar off. Those are near who are one in purpose, sympathy, and life.

The Psalmist says, "For that thy name is near thy wondrous works declare." When our eyes are open we find God near in the bending heavens, in the opening flower, in the lovelight that shines forth from the child's eyes. Let us train ourselves to know that God is near when two hearts beat in kindly sympathy; when a true word is spoken to an open ear; when a loving deed of kindness is welcomed by a grateful heart; when selfishness gives way to sacrifice and pride falls before humility; when resentment is banished and brotherly love floods the heart. As the poet says,—

> Then, brother man, fold to thy heart thy brother!
> For where love dwells, the peace of God is there:
> To worship rightly is to love each other:
> Each smile a hymn, each kindly deed a prayer.

Why we should be Obedient.

JACK MULOCK JACKSON.

MUCH could be written on the subject of obedience,—a key to the greatest pearl within our reach; viz., harmony, mental, and physical. At first, as children, we are obedient to our parents and teachers. Later on, when mortal mind or the human will gradually gains dominion and asserts its sway over us, we become disobedient; defy, it may be, our highest sense of right, and begin to make experiments for ourselves. This period of experimentation in our supposed entrenchment of perishable mortal mind, lasts for a longer or shorter period with each individual, according as his experience is painful or otherwise, and according as he is able to profit by the lessons taught. This experimental stage through which, as it seems, all have to pass, may, however, be made useful as a discipline.

Experience is a great teacher, and if we are wise it will show us why we should be obedient to the omnipresent law of divine Mind. We thus learn, sometimes in a painful way, that which is repeatedly taught in the Scriptures, and in Science and Health: viz., that there is not, and cannot be, any power opposed to God, and that if we had always been obedient our experience would have been painless.

Obedience does not consist in the performance of one or more right deeds, at a given time: it is the conscious effort

Digitized by Google

at all times to listen for and follow the Divine promptings. Obedience therefore is a mental condition of acquiescence or conformity with whatever may be our duty for the moment. By way of illustration I give a couple of personal experiences. Mortal mind, as most of us have discovered, is exceedingly vain, subtle, and egotistical, and has long caused me, and possibly some of my friends, to dignify with the name of great determination or resolution of purpose, what is really nothing but stubbornness, and that of the worst kind. And this I fancy is what those called it who may at any time have thought they were not my friends.

One evening last fall, after having weighed the matter with myself for months, I resolved that I would no longer refrain from testifying at the Wednesday evening meetings, should I feel prompted to do so. Upon coming to this decision, I experienced an indescribable spiritual uplift which remained with me for some time, and made me superior to all the discords of my business, which were then, to sense, very great.

Again, quite recently, after another combat with human will, I decided that I would take some part in the church services, and a similar spiritual exaltation followed. These two things which I had long mentally resisted, represented to me my highest duty at the time, and the mental act of obedience conferred upon me the greatest of rewards which we can experience here; viz., mental and physical peace.

The Snare is Broken.

E. H. W.

PAUL says, "For if I build again the things which I destroyed, I make myself a transgressor." These words give a quick and needful rebuke to the temptation to believe that an error which has been dispelled in the past has some subtle power to reappear. The Bible says, "Our soul is escaped as a bird out of the snare of the fowlers: the snare is broken, and we are escaped. Our help is in the name of the Lord, who made heaven and earth."

Truly "Our soul is escaped as a bird out of the snare of the fowlers" (mortal beliefs), and better yet, "the snare is broken," for we have been taught in Science and Health how the snare was made to seem so strong, how we were deluded, how that all the time it was ignorance of what we were and what God was to His creations, that snared (held) us.

A story is told of Lincoln, of how he handled a charge of murder preferred against a young country lad, by a man who testified that he saw the boy commit the deed in a certain beech wood near the village, that he "saw him by the light of the moon." The mother of the boy engaged Lincoln in defence. He came once to the place and was not seen again until the day of the trial. In the mean time the prosecuting attorney had made much stir among the villagers, and all had visited the spot and waited with much impatience the coming of the young lawyer who was to defend the case. Lincoln came and listened in silence to the testimony which seemed so conclusive.

In his turn he arose and asked the jury and audience to "reason together" and to remember that in the beech wood on the night stated, or even in the daytime, it was dark as night,—no ray of light could penetrate the dense foliage at that spot, in that time of the year. Again when they had digested this fact he said, "My friends, this man swears that by the light of the moon he saw this deed done." Taking an almanac from his pocket he showed them there was no moonlight at that time.

Now may not this illustration show that the office of the healer is akin to that of the lawyer. Disease is based upon the belief of Life and intelligence in matter, where Life never is, and this belief is dispelled by the arguments of truth as taught in our text-book. It is a belief in the power or the pleasure of sin, held by mortal sense that must be shattered, that must be proven false, in order to heal sin. Much earnest effort is wasted in argument with the witnesses,—phases of material sense, conditions of seeming discord,—instead of using the quick "agreement" argument with their adversaries,—false claims.

It is not the one man whom we condemn, who is or can be our enemy, it is a false claim to power in some form that frightens us. To "kill our enemy" is to destroy a false sense, even though it may seem to be speaking through a dear friend. We may well be thankful for this testimony found in the song of David, "Our soul is escaped out of the snare of the fowlers," "the snare is broken;" and for the illumination of the Scriptures found in our Leader's writings, especially in our text-book, "Science and Health with Key to the Scriptures."

Following the Trail.

H. L. TOURNY.

IN making a short cut over the mountains, I followed a faint trail, and it was all clear so long as my thoughts were intent upon it. Every sign, no matter how indistinct, had to be taken advantage of in order not to wander off to either side. After a little while I found I was not going right; mortal mind, during an absent moment, took me several hundred feet from the trail. Now it was very doubtful whether I could find the trail again by a direct return either up or down the side of the mountain. The only sure way was to return and do my work over again.

This little experience showed me clearly how perfect our work must be in Christian Science in order to reap the benefits that are promised. All false thoughts must be corrected before we can hope to advance in our understanding. We must return from our wrong ways and follow that marked out by Truth. "And thine ears shall hear a word behind thee, saying, This is the way, walk ye in it, when ye turn to the right hand, and when ye turn to the left."

[Written for the *Sentinel*.]

"Son, all that I have is Thine."

ALICE J. TILDEN.

I SEARCHED long hours for ease from pain,
For health and strength to work again,
And struggled, too, for ease of mind,
A hearty joy in being kind,
For love of all that's good and pure,
For wealth of thoughts that aye endure,
That self might be effaced in me,
And all my thoughts for others be,
Then quick this promise came, Divine,
"All that I have, my son, is thine."

For thee surcease from care and pain,
For thee success on land and main,
For thee all substance, Love, and Life,
For thee the truth with hope is rife.
And so thy thought of fear resign,
Nor fail to yield thy will to mine.
Canst thou still doubt thy Father's plan,
And dare to place thy trust in man?
There is no fear, there is no hate
For God's dear children to debate,
But only, always, Love benign,
"All that I have, my son, is thine."

The Lectures.

Colorado Springs, Col.

Carol Norton delivered a scholarly address at the Opera House Thursday evening, December 17, on "Christian Science, the Gospel of Righteousness and Health." A large audience composed of representative people heard Mr. Norton. The speaker was introduced by Rev. Alva Roy Scott, paster of All Souls' Church (Unitarian). Mr. Scott said,—

Ladies and Gentlemen:—The Christian people are confronted with the difficult but inspiring task of making the world better. Everywhere about us are disease, sin, vice, crime, and poverty. But these are not the whole of society. There are thousands and thousands of men and women who love the good life, and are giving their time, strength, and means to uplifting humanity. I believe that there are just as good people to-day as have ever lived in any age of saints, prophets, or apostles.

The task before the Christian world is to suppress the evils, to eradicate the causes producing human and social disorders. The work is more than this. It aims to overcome the evil by deepening and enriching the human personality. Religion is not a mystery, but a self-mastery. We have an example in Jesus Christ. We all desire to be known as his disciples. We accept his leadership.

I am glad to join hands with any people who sincerely desire to promote the Christian spirit and the righteous life.

I am happy in your behalf to welcome the distinguished speaker of the evening, and I have great pleasure, ladies and gentlemen, in introducing to you Mr. Carol Norton.

Colorado Springs Gazette.

Troy, N. Y.

A very large and representative audience assembled at Music Hall last night [January 8] to hear a lecture by Edward A. Kimball, C.S.D., of Chicago, on "The Cause and Cure of Disease." The lecture was under the auspices of First Church of Christ, Scientist, of this city. The speaker was introduced by F. W. Sim, who said in part:—

Christian Science is no longer a stranger among us; there are few towns in our land which do not contain a Christian Science church or society, and thousands of our fellow-countrymen in all walks of life are every day thanking God for the blessings brought to them through the understanding of Christian Science. Jesus said, "Think not that I am come to destroy the law or the prophets: I am not come to destroy, but to fulfil." Likewise Christian Science comes not to destroy any law of God or good, but to fulfil the command of Jesus, "As ye go, preach, saying, The kingdom of heaven is at hand. Heal the sick, cleanse the lepers, raise the dead, cast out devils." Christian Science brings to you no new doctrine or religion; it simply unfolds the great truths that Jesus came to teach; namely, the knowledge of God and the worth of man. "This is life eternal," says Jesus, "that they might know thee, the only true God, and Jesus Christ whom thou hast sent." "Therefore all things whatsoever ye would that men should do to you, do ye even so to them: for this is the law and the prophets." This, in brief, is the teaching of Christian Science; the rest is only its application. Few will dispute the fact that sin is the cause of all evil and misery and disease of this world, and these conditions will disappear with the overcoming of sin. The lecture this evening in dealing with the great problem of "The Cause and Cure of Disease" will endeavor to show you how to overcome evil with good, how to destroy the lie with the truth, and how to bring out health and harmony in your lives by obedience to the law of God.

The Troy Press.

Vancouver, B. C.

The Vancouver Opera House last night [January 12] was well filled on the occasion of the lecture on Christian Science delivered by Judge Septimus J. Hanna.

Judge Hanna was introduced by the Rev. John Simpson, pastor of the First Congregational Church, who welcomed him heartily to Vancouver.—*Daily World.*

In introducing Judge Hanna the Rev. Dr. Simpson said in part:—

I rejoice in the good work done by the Christian Scientists. I know many to whom Christian Science has made religion a living reality. It has given them a peace, and a vital faith which has awakened my envy. Though unable to accept Christian Science on its therapeutical side, yet I wish my friends God speed for the good it has already done to many, and is doing, especially in the way it emphasizes certain aspects of the Christian religion, which other churches are in danger of neglecting. It is high time that we remember that no one church or creed has the monopoly of Truth. No thinking man ought to be afraid of the truth, for it is the truth that makes us free.

After all, why should commerce be excluded from the domain of Christianity? Why not trade in a Christian spirit? Why not put religion first in commerce as in all else? Imagine what a great commercial nation might be, if service and not gain were made the end of trade, if people manufactured and sold for the good of man and the honor of his Maker, if every trade put self last and the public good first. But self will leave everything before it leaves trade. It is leaving,—not exactly politics,—but polity. Self must leave every art before it can approach success; it must leave every great profession too. Art followed for gain is impossible,—it carries its own death-warrant in its heart. Some day gain will cease to be the first aim even of trade.—RICHARD ROSNEY.

No one has ever heard the Bible except it has been read to him by the Holy Spirit.—DR. MCKENZIE.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

The Point of View.

THE question, "Would you rely upon Christian Science if you were seriously ill?" has often been asked of Christian Scientists, and in the conversation following this inquiry, pneumonia has frequently been cited as one of the diseases for which a physician should be called without delay. To those of the laity who have held this view, the words of Dr. Bevan before the Chicago Medical Society at its recent meeting, must come in the nature of a distinct shock. Dr. Bevan, who, according to *The Chicago Tribune*, stands high in his profession, is reported to have made the following statement:—

"Drug treatment is useless in cases of pneumonia. The medical profession, so far as medicines are concerned, can be of no assistance in the fight against this disease. The sooner the profession will acknowledge this to the public and set to work to discover some specific to save pneumonia patients, the better for all concerned. . . . A physician at the bedside is of no value, so far as giving drugs is concerned."

The *Tribune* says that, "several physicians sprang to their feet to protest against this arraignment. All had to admit, however, that there is no definite remedy known, and they based their protests solely on the contention that they might influence the patient favorably by easing him somewhat, and by the moral effect of their presence."

Consideration of the statement of this Chicago physician leads naturally to the statement of a physician quoted in Mr. Farlow's letter in another column of this issue, to the effect that in a certain case of pneumonia the patient "would have been saved if proper medical treatment had been given her." The inference to be drawn from this language is that she would have been saved by the administration of drugs, yet Dr. Bevan says, "Drug treatment is useless in cases of pneumonia," and his associates "had to admit that there is no definite remedy known, and they based their protests solely on the contention that they might influence the patient favorably by easing him somewhat, and by the moral effect of their presence."

Again referring to Mr. Farlow's letter and to the editorial to which it is a reply, we can see in the latter nothing but the formal expression of a demand that Christian Scientists shall be judged by a standard which they, as individuals have not set up for themselves. Christian Scientists maintain that the Principle of Christian Science is unfailing, and as they reach a clearer understanding of this Principle they more certainly succeed in their efforts to heal the sick. They submit in substantiation of their claims for Christian Science, evidence that it has healed sickness of every name and nature, in many instances after the commonly accepted medical systems had failed.

They claim nothing for themselves other than that, to the extent of their understanding of divine Principle, they can and do heal the sick. That their understanding is sufficient to justify their entrance upon the field of therapeutics is proved by the small percentage of failures attending their ministrations, and in this regard their standing as successful practitioners in the healing of disease is attested by the constant and rapid growth of the Christian Science denomination, which includes none but those who have had the healing power of this Christ-truth demonstrated to them.

What immediate effect Dr. Bevan's utterance will have upon the practice of medicine is problematical, but it will certainly furnish food for discussion in the technical press; perhaps it will turn more attention to the merits of the system practised by Christ Jesus and his followers. M.

The Word Illumined.

A VERY significant feature of the testimonies given by Christian Scientists in our periodicals and in our experience meetings is the frequent reference to the illumination of the Scriptures which always attends the study of our text-book.

Some years ago a prominent clergyman who was warning his hearers against Christian Science, said that one of its great dangers lay in the success which it had in interesting people in the study of the Bible. Another clergyman once attended an experience meeting for the purpose, as he frankly admitted, of finding in the service something that would justify him in his condemnation of this religion. He was deeply impressed by the silent prayer, as well as by the fervent manner in which all joined in the Lord's Prayer, but most of all by the reading of the Bible, and the references made to it by those who testified of their healing, and of the wonderful light thrown upon the Scriptures through the study of Science and Health. The selection read was from 2 Kings, 4, the story of the raising of the Shunammite woman's child. The Reader was not aware of the clergyman's presence, but read some very forceful passages from the text-book, one of which was this, "He [Jesus] restored Lazarus by the understanding that he had never died, not by an admission that his body had died, and then lived again" (Science and Health, p. 75).

It seems that the visitor had been especially antagonized by the fact that Christian Scientists are taught to deny the testimony of material sense, but he saw, what he had never seen before, that they have Scriptural authority for so doing. This Shunammite mother, who never admitted for a moment that her son was dead, who told no one, not even her husband, of the beloved and only child lying cold and still in that upper room, who went to the prophet, and in answer to his question said it was "well" with her child,—this woman was consistent in holding to the allness of God, and not once did she admit the reality of material sense testimony, even in her prayer for help. Surely none would deny that this is the faith, or understanding which "removes mountains" and "raises the dead," and it is not surprising that the minister said at the close, he was going home to read his Bible as he had never read it before, and that in future he should "judge not," lest in so doing he might give a stone where bread was needed,—the bread of Life which was undoubtedly feeding those whose testimonies he had heard.

It is said that many years ago an African chief came to England to ask the queen what was the secret of England's greatness. That noble woman took up a Bible which was at hand and said, "This is the secret of England's greatness." Victoria's answer may well be pondered by all earnest thinkers, for the understanding and demonstration of the truth taught in the Bible is indeed the secret of all true greatness in nations and individuals alike.

Never before was the Bible loved and studied as it is now in the light of Christian Science. Our Leader says, "The Scriptures are very sacred. Our aim must be to have them understood spiritually, for only by this understanding can truth be gained. . . . It is this perception of Scripture which lifts humanity out of disease and death, and inspires faith" (Science and Health, p. 547). K.

Ideals and their Attainment.

THE millennium has not been delayed because of a lack of ideals, but rather because of the ignorance and indisposition which have barred the approach to them. In all the centuries the Christian ministry has presented to men the character of Christ Jesus as the standard for all true living, and to-day this standard is recognized among all nations and peoples where it is known, as the one matchless ideal whose attainment would satisfy the universal conscience and insure the solution of both the individual and the national problem. All ethical and religious leaders are at one in exalting the example of the Nazarene, and no one can read the homilies and addresses of to-day without noting how generally and how fully the Christ-life has replaced the creedal standards of past requirement.

If, therefore, the possession of a fine ideal, the knowledge upon our part of what we readily concede we ought to be and ought to do, if this measured up to our need, the state and stage of our spiritual development would be far in advance of its present register. The fact is, that to present men with a high ideal of character and conduct may mean more of discouragement than of inspiration if they are not shown at the same time a practical demonstration of the way this ideal may be brought into life.

In his "Republic," Plato, with a prophetic vision of human possibilities which pierced the oncoming centuries, outlined a communal state which in many respects is yet far in advance of the race, but he gave no hint of the progressive steps by which that state was to be developed, and his ideal has meant very little to the progress of the race.

The writer was led to think how easily men fall into this Platonic habit of becoming so enamored of theories as quite to forget the matter of demonstration, while listening to a splendid sermon in which there was presented, with all the fervor and art of impassioned oratory, a concept of the Christian life that demanded the highest degree of spiritual sovereignty. The delineation of what pertains to the duty and privilege of Christian manhood was very beautiful, but the eloquent minister closed his discourse without having said a word as to the practical way of responding to his appeal. The heights of spiritual achievement were disclosed to our view, but we were given no suggestion whatever respecting the path by which they might be reached!

With the advance of science and the improvement of our educational system there has been a very great increase in "laboratory work" in all departments of study, and this practical exposition of the *how* of things is pre-eminently demanded in the ministry of the religious life, for here, as nowhere else, perhaps, Christian people have been tempted to become voluble and enthusiastic over that which they do not possess themselves, and which they cannot show others how to acquire. It is imperative that we always keep the true Christ-ideal in view, but as Christian Scientists the most of us need to be on our guard lest we yield to the mesmerism of unctuous theorizing about ideals, for nothing is more easily accomplished than woeful self-deception as to our own goodness, in view of our good intentions and the glibness and assurance with which we convincingly talk about good things.

If the one evil were able to plan our defeat, it would care nothing at all how much or how earnestly we talked about ideals so long as it saw that we were not earnest in our efforts to bring them into practical realization. Indeed, it might find in our self-satisfying loquacity about good, the very means of keeping us in ignorance of good.

Christian Science renders its every student a service that is above price in its insistence that our real faith is measured by our works, and that preaching without practice is a demoralizing desecration; and the gratitude which Christian Scientists feel for their Leader is never more profound and sincere than when they recall that having reached a satisfying conviction of truth through long and prayerful study of the teachings of the Master, she pressed on with untiring devotion until the practical demonstration of that truth was made for all mankind. W.

Board of Lectureship.

WILLIAM D. MCCRACKAN, C.S.B., has been appointed to the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass. As in the case of other members of the Board his field is unlimited. Mr. McCrackan's address for letters and telegrams is The Pierrepont, 45 West 32nd Street, New York, N. Y.

Letters to our Leader.

[*Extract from Letter.*]

Next Sunday marks an interesting event. The window of the Mother Church containing the picture of the God-crowned woman, east of the chancel, has never been illuminated, as it was against a small air shaft, and the light was obstructed by the wall of the adjacent residence. As you may know, many endeavors at artificial illumination were made some years ago, but all failed and the picture remained dimly lighted. The obstructing wall has been pulled down this week,—the last of the houses on the lot for the new church having been razed, and next Sunday will be the first Sunday that this picture has ever been illuminated by the full light of day.

It so happens that the Lesson-Sermon for that Sunday, "Love," contains several references to the God-crowned woman which are even stronger than any given before, as I remember, and it seemed interesting to me that this should occur on the same day, although the lesson was prepared six months ago. I hope this is symbolic of a fuller recognition of our Revelator and her Revelation!

HERMANN S. HERING.

Boston, January 21, 1904.

Boston, January 24, 1904.

Beloved Leader and Teacher:—I thought you would be pleased to learn of a very significant incident in connection with our morning service in the Mother Church to-day. The Lesson-Sermon was on "Love." To-day is the first Sunday that the window on the left of the Readers (the God-crowned woman) was fully seen in all its perfection and beauty. The buildings on Norway Street had heretofore prevented the light of the sun from shining in; but now they are removed in order to make room for our new edifice. On this beautiful Sunday morning the glorious import of the window became more apparent to all, as it revealed itself in the sunlight of this day. The lesson on "Love" with the reference as found in Revelation, which tells of the "woman clothed with the sun," was truly prophecy, it gave us more of its meaning than ever before.

Another incident occurred while the fifth section of the lesson was being read, it was this: two little birds, sparrows, came and lighted on this same window, one above the other, clinging to the outside framework. Their little forms were plainly visible from the audience room. They remained only while this part of the lesson was being read and then flitted away. To me this was a glorious omen. I think this may interest you, knowing that not even a sparrow passeth our Father's notice. May we all get the rich, grand, and deep meaning of the lesson herein mentioned. Lovingly, your student,

HERBERT L. DUNBAR.

Digitized by Google

127 W. Mt. Royal Avenue, Baltimore.
January 16, 1904.

Dear Mrs. Eddy:—In a review by John Morley of an autobiography of Mill, there occurs a passage of most imposing and majestic authority.

The prophetic words of Morley sound like a herald, a trumpet of advancing Christian Science. They should prove such a comfort and consolation as to lift from their feet as on wings, the standard-bearers of Christian Science.

The rare and inexplicable gift of the genius of John Morley has seldom found more felicitous illustration than when he states, "Mr. Mill has been ungenerously ridiculed for the eagerness and enthusiasm of his contemplation of a new and better state of human society. Yet we have always been taught to consider it the mark of the loftiest and most spiritual character, for one to be capable of rapturous contemplation of a new and better state in a future life. Why do you not recognize the loftiness and spirituality of those who make their heaven in the thought of the wider light and purer happiness that in the immensity of the ages may be brought to new generations of men by long force of vision and endeavor? What great element is wanting in a life guided by such a hope? Is it not disinterested, and magnanimous, and purifying, and elevating? The countless beauties of association which cluster round the older faith may make the new seem bleak and chilly, but when what is now the old faith was itself new, that too may well have struck, as we know that it did strike, the adherent of the mellowed pagan philosophy as crude, meagre, jejune, dreary."

I have been a close and still closer student of Science and Health, I read all the literature, and it may surprise you to learn that in a small way I begin to grow in stature. Now and then I demonstrate a little, at least to my own satisfaction, that I am in the way towards the life, light, and the truth, and that neither the dust nor the dulness of my daily life can ever wholly extinguish the light which is most within me.

Very faithfully yours,
JOHN HENRY KEENE.

To Rev. Mary Baker G. Eddy, Concord, N. H.

Beloved Leader and Teacher:—Thinking you will be interested in hearing from the Christian Science reading room in Boston, I write you,—there have been so many interesting and helpful experiences during the last six months.

The rooms are visited by all kinds of people. Some through curiosity or interest, ignorant of what Christian Science is, come in to read and learn about it. Many, after reading, enquire for a practitioner, and go for treatment, and when they revisit the rooms the great change in their countenances indicates that Truth is working in their thoughts.

A short time ago, some one who had just been reading "The Right Princess" came in to enquire if Christian Science could prove a practical help for a child who needed aid. The response was in the affirmative. The lady said she would try it and enquired for a practitioner. At the end of the week her husband came in to buy a pocket edition of Science and Health, and yesterday the two came in together. I had an opportunity of speaking with her, and she told me of the great good Christian Science had been to the three, and that two of their friends had become interested in it. They had attended the Mother Church and were greatly impressed.

Quite a number come in to study the Lesson-Sermon, and many who come in to buy the literature tell, with grateful hearts, of the glorious results of their reading. Visitors come from all over the world,—so many in the last year and a half from Australia that it makes it seem like a near neighbor. Many of these are earnest workers with a desire to increase in the understanding of Science, and they speak with grateful love of the one through whom this wonderful revelation of God has come to us.

The reading rooms are considered by all the visitors to be extremely pleasant and well appointed. As we realize the great good freely opened to all who avail themselves of the benefit of the Christian Science reading rooms, we wonder why they are not filled.

At the time of the annual meeting of the Mother Church, they are filled to overflowing, and the beauty of the Science is shown in the unity of thought which is manifested among this great concourse of people.

Dear Teacher, let me express again my gratitude for your wonderful work of love to humanity, and such generous supplies of good. The revised edition of Science and Health, the Concordance, the Manual, and the wonderful Christmas hymn which brings to us the true idea of Christmas. God is with you, and is being manifested through you to us.

Reverently and lovingly, your student,
ALICE S. BROWN.

Boston, January 24, 1904.

Foxcroft, Me., January 27, 1904.

Rev. Mary Baker G. Eddy, Pleasant View, Concord, N. H.

Dear Leader:—Feeling that it may give you pleasure to know something of the regenerative work that is being done by Christian Science in the "back woods of Maine," I would state that among our little society in Dover and Foxcroft, six men have been healed by it of the tobacco habit. The beautiful feature was that in each of these cases the healing was brought about by reading the text-book, Science and Health, and attending the Sunday service,—in no instance was special treatment given. All these men had previously tried will power and material methods in their efforts to relieve themselves of this bondage, but it was not overcome until Truth naturally and beneficently destroyed the false appetite. These men, as well as many others, testify in our Wednesday evening meetings to the innumerable benefits, physical, moral, and spiritual, that have accrued to them through their understanding of Christian Science, and feelingly express their deep gratitude to God for giving this understanding to them and to the world through you, our beloved and revered Leader. A lady of over seventy, living in this town, was healed of physical difficulties of many years' standing by simply reading Science and Health, and many others have found health after years of invalidism, through Christian Science treatment. Among the cases healed were consumption, nervous dyspepsia, typhoid fever, rheumatic fever, varicose veins, insomnia, astigmatism, and defective eyesight. If these are the "first fruits," what may not the harvest be if our workers press on faithfully, earnestly, and humbly, in the way you have shown them?

Sincerely yours,
CALEB H. CUSHING.

London, Eng., January 12, 1904.

The Reverend Mary Baker G. Eddy,
Pleasant View, Concord, N. H., U. S. A.

Dear and Trusted Leader:—Should I not write and thank you with a heart so full of gratitude that it runneth over?

You have proved to me that sin is nothing else than that the mortal willeth otherwise than God willeth, and contrary to Him.

Let no one write to you of humility, and least of all, me. The beliefs that people have of the virtues are not for you; there is but one single object for you, which is to obey your God. And my prayer is that I am learning to do this day by day, from your example and your writings, and that those writings and that example may annihilate self-love and self-hood.

Before coming into contact with your writings, I was only so far with our Master as to own and receive the his-

Digitized by Google

tory of his birth, person, and character, and this was all that I had then. I was as much without the Christ, and as much left to my own will, and as little helped by the Christ, as if I did not have Jesus even as described.

You have given me eternal liberty in giving me your writings, as those writings have given me the real Christ.

May I show my gratitude by overcoming this self-life, and increase in loving, so that some distant day I may love to love nothing but the one true and perfect good, and that simply for its own sake, and not for the sake of a reward, or in the hope of obtaining anything, but simply for the love of goodness, because it is good and hath a right to be loved.

Your truly grateful disciple,
FLETCHER L. WILLIAMS.

Dear Mrs. Eddy:—You receive many letters thanking you for your achievements. May I not write just to thank you for your life? I have benefited by your works, but in reading over the excellent article in the *Ladies' Home Journal*, I was most deeply impressed by the goodness that never ceases to labor, even though one might think you had well earned the rest after harvest.

It seems to me sometimes that my only privilege is to labor unceasingly, and that I have not the privilege of getting the reward, humanly speaking, of my efforts to sacrifice self and uplift others, but it may be only the claim of a "disappointed self-love," which so speaks. At any rate, when I considered your days, ever spent in labor, guarding all the practical details of every-day living as well as the mighty movement of which you are Leader, it caused a special sense of gratitude. I think I felt like the obscure artist who, in looking upon a great work of art, said, "I, too, am a painter!"

I could feel that I, too, am a co-worker for God, in however slight measure, and that to give *all* is enough for God's acceptance, whether or not it is accounted as of any value by the world of mankind.

I must not take more of your time, but the heart prompted utterance.

Ever gratefully,
ANNIE H. WILSON.

Lexington, Mo., November 23, 1903.

Manchester, Va., January 26, 1904.

Dear Mrs. Eddy:—One night while I slept, such a dear visit from you came to me in my dreams that I should like to tell of it. I thought you were sitting here in my home and I sat beside you in a child's chair. You held in your hand a sheet of paper on which were some figures that you were explaining to me with mathematical certainty, and I ventured to suggest that a *nine* was not a nine. You turned to me and your rebuke, as has been said of the Master, "was fearful;" but in an instant such a flood of love enveloped us that I was conscious of love only,—your love for me, and mine for you,—and I sat in silent wonderment. I cannot put in words what this experience meant to me, but it healed me entirely of the belief that a rebuke, in order to be prompted by love, must be given in a gentle and persuasive manner. For the rest that I could say, I want to put my finger on my lips and remember my blessings, and continue to "labor to dissolve, with the universal solvent of Love, the adamant of error,—self-will, self-justification, and self-love," as Science and Health (p. 242.), teaches.

Yours in love and gratitude,
MARY SHEPHERD.

When once it is revealed to us that righteousness is to be sought where the Heart-searcher seeks it, not in the material thing done, but in the spiritual spring from which it issues, we discover that it may indeed be infinite, and stretch in advance of a progressive nature, as the object of eternal aspiration.—JAMES MARTINEAU.

Testimonies of Healing.

[Translation.]

A short time before Christmas, 1900, a friend came to me one day with tears in his eyes, saying, "If you wish to see my wife once more, you must come soon, for the physicians have declared that she must die during the next day or two. There is no help for her." My wife thereupon went to the afflicted family, especially to comfort the children of the sick woman.

After her visit there she went to other friends of ours who noticed my wife's disturbed state of mind and inquired after the cause. My wife said, "Do you know of no help for this poor woman? It is so hard to see death enter this family just before Christmas." After a silence this friend remembered that a few days previous she had received a letter from Dresden, reporting a beautiful case of healing from dangerous illness. My wife read the letter and at once grasped the thought. She immediately returned to our friend and brought him the message of a possibility of help through Christian Science. Our friend accepted the offer gratefully, and commissioned my wife to attend to the whole affair.

A letter sent by special delivery reached the Scientist in Dresden at midnight—it was Thursday. On Friday my wife received a telegram saying: "Treatment begun, letter follows." Words fail me to express how anxiously we watched the outcome. When we inquired after the patient on Friday we received the answer: "It is strange, new life has entered into this almost dead body." The improvement continued slowly but steadily. Only when the family physician made his occasional visits did there seem to be a standstill. The doubts of the children, who surrounded their sick mother, were also a disadvantage to the practitioner.

To-day the woman who had been ill for years is well, the circulation of the blood is changed, she has rosy cheeks, is happy, and is grateful to God and to the faithful practitioner.

This was our first proof of the glorious truth of Christian Science. The Psalmist sings: "He that dwelleth in the secret place of the most High, shall abide under the shadow of the Almighty. I will say of the Lord, He is my refuge and my fortress; my God; in him will I trust." It is the old truth, often heard and often forgotten. If we trust in God, He will not fail us nor forsake us. The shield of true faith is the word of Truth, the protection of the Lord, ever-present divine Love. In holding to the omnipotence and infinite wisdom of God, and in relying upon His love and kindness, through prayer and mental work we shall rise above all fear and despondency. Our hearts rest in confidence and joy; cheerfully we advance as good soldiers of Christ, and we know that "God is Love."

G. N., Bautzen, Saxony, Germany.

The call came directly to me, Have not *you* something to write of the benefits you have received through the teachings of Christian Science for the *Sentinel* or *Journal*. In loving obedience I will try to do my part.

Of healing I have had sufficient to prove to me conclusively the power for good of divine Mind over bodily ailments. The first night I read Science and Health I decided to give it a fair test and began by removing my glasses. After reading for two hours my eyes felt better than they usually did with my glasses on. For several years I had not dared to have my glasses off for any length of time, as such occasions were attended with headache and inflamed lids.

For two years and a half I have not worn glasses and yet have been able to read and do fine work, even with a poor light, when those around would say, "You will ruin your eyes."

Digitized by Google

Another experience is one of much interest to look back upon, as it proves that our surroundings, however disagreeable and without hope of change, can be altered through divine Love. My father moved into our present home many years ago, and because of his business thought it impossible to move to a more desirable part of town. Years passed and property depreciated, still we seemed hopeless fixtures of the neighborhood. My father seemed wedded to the house and friends said it would kill him to move.

So things went on until we began to study Christian Science, then nothing seemed too hard to try to overcome. My sister and I started on our work quietly, as our parents seemed opposed to Science. We realized that all change is accomplished in thought before it is made manifest outwardly. One verse from the Bible came to me over and over, "In my Father's house are many mansions: if it were not so, I would have told you. I go to prepare a place for you." Then I began to have trust that the place would be prepared for us, and that no outward effort of mine was necessary, and so I was not discouraged as time went on. My father seemed unwilling to trust the business to my brother, but that thought was overcome, and in a short time the business was transferred with all peace and harmony. Then the thought of moving, which had seemed so trying to him, changed, and it was with glad anticipation that he looked for a suitable home. The parents planned to build, and learned to love the thought of another home, though still on paper, and became reconciled to leaving the old one, even looking forward to the move with joy. Truly, with God all things are possible.—L. M. W., Baltimore, Md.

After having spent my boyhood in active outdoor life in the exhilarating climate of the Alleghany Mountains, I moved to Texas and engaged in teaching, and this change of habits and climate transformed me into a semi-invalid. I seemed to have the symptoms of a dozen maladies, among which were indigestion, catarrh of the head and stomach, torpid liver, and kindred evils. I had also become a slave to the tobacco habit. I tried to give up teaching and engage in business, but everything I undertook failed, and I was unable to secure employment by which I could support my family. This, added to my ill health, brought on a state of physical and mental depression bordering on total collapse.

About a year ago I contracted what seemed to be a very serious blood disease, with most alarming symptoms. I consulted physicians, who gave me no hope of recovery. In my deep trouble, I went to God in prayer. I prayed as never before that God might deliver me from the evils that beset me. My prayer was answered. I was directed to a Christian Science practitioner of Houston, and after her first treatment a great burden was lifted from my mind. My sleep began to be sweet and refreshing, and I at once began to enjoy my food. Gradually every distressing symptom disappeared. I began the study of the Christian Science text-book, and found in it a revelation I had never suspected, and have since taken up the study of the Bible with a new zest, finding by the help of the "Key," a perpetual fountain of the water of life.

I am now teaching a school of sixty pupils, in a country village where I have all the grades up to the seventh to teach alone, and, what is most wonderful under the circumstances, I seem to be giving entire satisfaction. Any teacher who has tried it knows how hard it is, under the most favorable circumstances, to give satisfaction in a country village. Notwithstanding all this hard work, I have gained in weight twelve pounds since I began teaching. God bless Mrs. Eddy and her earnest followers in their noble work.

L. D. WASHINGTON, Houston, Tex.

I became interested in Christian Science about six years ago through my wife's healing. This was so wonderful to me that I was compelled to acknowledge that only God could bring about such results, though the world might denounce it and say it was blasphemous, and though I was opposed to what I thought were the teachings of Christian Science. My prejudice was, however, overcome to the extent that I began to read and study Science and Health in connection with the Bible, and I have continued to do so ever since, though for a long time I could not understand what I read, and but for the change I saw it had made in my wife, I think I would have given it up. This would have been a great loss to me, for through Christian Science I have come to know that the promises of God can be relied on, and can be used in practical, every-day life; that the God I worship is He "who forgiveth all thine iniquities; who healeth all thy diseases; who redeemeth thy life from destruction; who crowneth thee with lovingkindness and tender mercies; who satisfieth thy mouth with good things; so that thy youth is renewed like the eagle's;" that the great Master whom I strive to follow lived for me as well as for those with whom he was associated while on earth, and that when he said, "Ye shall know the truth, and the truth shall make you free," he was speaking to those in every age who should have the spiritual understanding of his work.

It would be ingratitude for me longer to withhold my acknowledgment of the blessings, physical and mental, which I have received through the study of Mrs. Eddy's works in connection with the Bible. It has brought health and happiness into my home, has taught me to *know* instead of believe, and has made clear my understanding of my relation to God and man.

GEO. S. POWELL, Asheville, N. C.

In 1897 I was greatly benefited by reading "Miscellaneous Writings" by Mrs. Eddy, and later I purchased a copy of Science and Health. My demonstrations have been much in the line of business, though I have had many experiences of physical healing.

One demonstration in dentistry I wish to relate. My dentist told me that I must soon have two upper wisdom teeth extracted, as they were badly decayed. A great fear came to me that I would never be able to have it done, but the next thought was, "God is All," and "Perfect love casteth out fear." Each morning when I did my mental work for the day, I declared against the seeming mountain of fear that sought to hinder a perfect demonstration; and each morning as I worked, the fear grew less and less. Finally one morning it seemed time to go and I went, still declaring the truth. The teeth were both pulled without one twinge of pain, and they came out very hard as the dentist pulled and twisted them, but no sensation accompanied it. Afterwards the gums hung down, but divine Love was the healer, and in a short time they too were normal. My heart was filled with love and gratitude to God for giving us this help in time of need.

It seems to me that our new Concordance is one of the most wonderful books I ever saw or used. The other evening some fears about superstition were expressed by a member of our household. I looked up the word superstition in the Concordance and found quickly enough statements of truth to quiet the fear.

I wish to express my gratitude for the lessons and experiences of the blessed Communion season in Boston this past summer, and for our revered Leader and guide, Mrs. Eddy.—M. P. J., Oshkosh, Wis.

Through the teachings of Christian Science we have indeed been enabled to prove that "God is our refuge and strength, a very present help in trouble."

Two of my sisters and I were in the Iroquois Theatre

Digitized by Google

the afternoon of the fire, December 30, 1903. We were seated in the front row of the second balcony to the left of the center section. The fire started directly in front of us, and when we saw the cause of the unusual excitement, we immediately began declaring Truth, and remained quietly in our seats for some little time. It soon became apparent that we must go, all those around us having left their seats, and we started toward an open door on our left, just as the terrible draught blew the heat and cinders into the theatre.

I never for an instant ceased declaring the present protection of divine Love, and we certainly were led and protected, for we came to one of the main stairways and went out of the front door without encountering any crush or crowd.

My sisters and I had our hair somewhat scorched by the heat, but beyond that we escaped unharmed, and I am most grateful for the fact that we were spared the sight of the suffering of those who were unable to escape.

Christian Science has indeed been the greatest help and comfort to me, and I cannot express my gratitude for the knowledge and understanding I have gained of a God who is our refuge and in whom we can trust.

I feel very grateful to our dear Leader for this great truth and for the many benefits I have received through it.—J. A. S., Chicago, Ill.

I united with a Christian Science Church over six years ago, and it is impossible for me to tell of the innumerable blessings I have received through the knowledge of eternal Truth gained during that time. I was healed of a hernia of thirty years' duration. I had been obliged to wear a brace constantly and endured great suffering, but Truth proved it all to be an unreality and I was freed from the bondage of error. Severe headaches and cramps of the limbs held to be hereditary are gradually but surely disappearing. I have laid aside glasses, which I had worn over twenty years, and can see well without them.

From a child I had attended another church and derived much comfort from my church connection, but when the higher thought in Christian Science dawned upon my consciousness, I felt I had found Truth indeed. Then came the struggle to break away from the lifelong associations and tender ties I had formed, and the doubts and fears that would arise, until I had put aside the old, and held steadfastly to the true and enduring in Christian Science.

I thank God for the spiritual understanding I have gained in Christian Science, and that He has guided our loved Leader to walk so closely in our blessed Master's footsteps. By her untiring devotion to God, suffering humanity is being led out of darkness into light, "and in Him is no darkness at all."—C. L. H., Brooklyn, N. Y.

Before I had a knowledge of Christian Science I was ill from exhausted nerves, and had headaches for several days at a time, when I could keep nothing on my stomach. I also wore glasses for weak eyes. In March, 1902, through the kindness of a Christian Scientist, I read some *Sentinels* and also the *Journal*.

It seemed to me from the outset that it was the religion I had long desired. I found that our God was not one of wrath but of divine Love. I became so interested and so desirous of being better that I soon found the light, and Easter saw no happier woman than myself. I sent afterwards and purchased Science and Health, and that and my Bible are now my dearest possessions.

I no longer wear glasses: my headaches are things of the past, and in most ways I am a well woman, and I hope and believe that by right living I shall be in time entirely so. But for me the joys of Spirit were much more than the physical healing. I can now understand that "eye hath not seen, nor ear heard, neither have entered into the heart of man, the things which God hath prepared for them that love Him."

May God bless Mrs. Eddy and all those who are laboring to bring this great light and truth to the knowledge of others.—JENNIE HOWARD, Altmar, N. Y.

It would be impossible for me to express in words all that the study of Christian Science has been to me, not so much in a physical as in a mental way, for when it came to me it was truly a case where "man's extremity is God's opportunity." I was taking care of a sister who had been hovering between life and death for two months, and the strain was more than I could bear. I would occasionally break down in hysterical spells of crying, and it seemed as though I could not stop. Had it not been for my sister's two children, of whom I had the sole care, I do not know what I might have done. There were times when it seemed I must run away from it all; that I could stand it no longer. Just then Science and Health was given to me, and I made up my mind that I would read it with an unprejudiced thought, and if there were anything in it that would help me in my extremity, I would find it. From the time I read the first few pages it seemed to come to me that this was just what I had been looking for all my life, and I never questioned its being the truth, although I could scarcely understand a word of it. I had such a peaceful, uplifted feeling, my troubles seemed to vanish into their native nothingness, and I had a sense that I was free.

My brother-in-law being in the drug business we were well supplied with drugs, and I had my room filled with them. I immediately gathered them all together and took them out to a room where my sister kept hers, and said to myself, I shall never need one of these again. That was a little over two years ago, and, while I have had many trials to meet in a physical way, I have never been tempted to return to the use of drugs. I had not had much faith in them for several years, but in my extremity, not knowing where else to look for relief, I still clung to them. I can scarcely remember the time when some member of our family was not under the care of a physician, and we have paid out hundreds of dollars for medicine.

I have had many wonderful evidences of God's protecting care, which are convincing proofs of His ever-presence and willingness to help us if we rely absolutely on Him.

I cannot express in words my gratitude to our beloved Leader for her patient work in giving us this truth. My daily prayer is that I may live so as to be worthy to be called her follower.—S. M. W., Seattle, Wash.

It is with great pleasure that I speak of a demonstration I had on October 28 of last year while I was motor cycling in the country. It was a very wet day and the roads were in bad condition. I was going down hill with all the power on and traveling at full speed. The road was narrow, and a little way in advance there was a farm cart coming towards me. Walking beside this cart was a little child of perhaps ten years of age. Upon my approach she took fright at the sound of the motor and fell directly where I had to go. There was no time to turn off the power and apply the brake. In order to save the child's life, I determined to run my machine into the hedge. Instead of going into the hedge my cycle side-slipped, hurling me into the air. I felt no fear as I had protected myself before setting out on my ride. I fell heavily to the ground just in front of the hoofs of the horse pulling the cart. I immediately jumped up, and although my clothes and boots were very much torn, I was all right, much to the carter's

Digitized by Google

surprise. I looked around and discovered that I was over twenty feet from my machine, which was wrecked. Both myself and the child were protected by divine Love.

I am exceedingly grateful to Mrs. Eddy, our Leader, for the truth she has opened out to us. I have been healed, and have been helped by Christian Science in many ways, and it is my constant help and support in daily life.

RUDOLPH M. MAYER, London, Eng.

After witnessing in my family a remarkable case of healing by Christian Science, I could no longer scoff at its claims nor neglect the opportunity it afforded for my own healing.

My first experience was with an eye trouble for which I had worn glasses for over two years. One of the best specialists in the East had prescribed them, and said that they would need to be worn always, as the trouble was incurable. That his diagnosis was correct, from the medical view-point, was proved by the fact that the wearing of them had done away with the very disagreeable effects for the cure of which he had been consulted.

My healing progressed slowly but none the less surely, and in about three months I had entirely discarded the glasses and for a period of over nine years I have had no need of, nor use for, them. They might well be called "dark landmarks," and surely it gave me "joy to see them disappear" (Science and Health, p. 324).

H. G. B., Buffalo, N. Y.

I would like to tell of a demonstration of the power of Truth over error. Some time ago, I had a badly poisoned finger. A doctor who saw the finger said it was a case of poisoning which would turn into eczema, and that I needed medicine very much.

I wish to state that this finger was entirely healed in about ten days through Christian Science treatment alone; no medicine or material remedy was used at all, neither did it turn into eczema. I helped along with the treatment, treating myself every morning and night, also at times in school, from which I missed not one day. A short time ago I had the grip, and Christian Science healed me in a few days. I was compelled to stay away from school only a day and a half.

I am eleven years old now, and have not taken one drop of medicine for about four years. I am very grateful for my knowledge of Christian Science.

HERBERT F. ZIEGLER, Baltimore, Md.

About a year ago a lump appeared in my breast. I consulted a physician and used his remedies for several months. At times it would appear to improve, then it would be worse than ever. In March last it became so painful that the necessary clothing was burdensome and I decided to consult a Christian Science practitioner. I took treatments for three weeks; the lump entirely disappeared and my general health improved wonderfully. Up to the present time I have felt no indication of a return of the illness and have no fear of such ever being the case.

J. C. N., Austin, Ill.

Two years ago my little boy had piles very badly for so young a child. We tried everything we knew of and at last thought that only an operation would give relief. Having been helped myself of a case of asthma by Christian Science treatment, I thought my little boy might be aided by it. We went to the practitioner with him and he was helped at once, and has no trouble of the kind now.

C. B. W., Littleton, N. H.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

NOTICE.—Members of the Mother Church who have changed their name by marriage will please notify the Clerk and send $1.00 for change of name in the published list of church members. Changes will appear in the list of names semi-annually,—July and December.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America.

It contains about thirty-eight pages of reading matter, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

German Supplements

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. The Christianity of Christ. By Rev. IRVING C. TOMLINSON.

Twelve or more to one address, each, prepaid . . . 4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus'. Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

250 Huntington Ave., Boston, Mass., U. S. A.

ARCHIBALD McLELLAN, Editor-in-chief. JOHN B. WILLIS, Second Editor.

ANNIE M. KNOTT, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

The negotiations between the United States and other Powers, and Venezuela, growing out of claims against Venezuela, are nearly completed. Eleven tribunals, whose decisions upon controverted questions must be final, have held sessions during the last six months in Caracas. Of claims aggregating thirty million dollars, about eighty per cent have been rejected and disallowed.

The superiority of arbitration over guns as a debt collector has been clearly shown by the results of these tribunals, both from the cost of collection and the just determining of the facts in many claims. The commissions or courts were mixed, the contending Governments each naming a commissioner, the third member of the court, or umpire, being chosen by some Government foreign to the claims.

An order for the first issue of the new Louisiana Purchase Exposition postage stamps, which are to be placed on sale at all post offices in the United States May 1, has been sent to the Bureau of Engraving and Printing. It calls for the printing of one-cent stamps, bearing the portrait of Robert R. Livingston; two-cent stamps, bearing the portrait of Thomas Jefferson; three-cent, with Monroe's portrait; five-cent, with McKinley's portrait, and ten-cent stamps with a miniature map of the United States, showing the territory acquired by the Louisiana Purchase.

At the religious service at a recent opening of a session of the United States Senate, conducted by Edward Everett Hale, Chaplain of the Senate, Rabbi David Philipson, a professor in the Hebrew College at Cincinnati, assisted. The rabbi in his prayer spoke of this country as the "promised land, the new Canaan, the exemplar of justice, the protector of the weak, the foe of unrighteousness, the sanctuary of liberty, the haven of peace."

Because the new Secretary of War, Taft, was met by a troop of cavalry and the same honor conferred upon retiring Secretary Root, when leaving Washington, it is learned that this honor will be requested upon the reception hereafter of all new ambassadors, to conform to the custom abroad.

The Senate Post Office Committee is reported favorably disposed toward the bill to allow authors' manuscripts to go through the mails at one-fourth the present rates. The House Committee does not appear so favorable to modification of existing rates.

Luke Wright was on February 1 inaugurated as Civil Governor of the Philippines. There was an imposing military parade. The inaugural address was received enthusiastically, every mention of ex-Governor Taft calling out hearty applause.

An immense fire in Baltimore on the 7th and 8th burned over one hundred and fifty acres, destroyed one hundred and fifty million dollars worth of property, twenty-five hundred buildings, and burned out over one thousand firms, including all the newspapers and department stores. It is estimated that fifty thousand people have been thrown out of employment.

Secretary Shaw has issued to all National Bank depositaries warning of a possible call in the near future for thirty million dollars to meet preliminary expenses in connection with the construction of an interoceanic canal.

The United States House of Representatives has so amended its rules as to give the resident Commissioner from Porto Rico additional authority equal to that of a delegate from a Territory.

The report of the Philippine Commission has been sent to the Senate. In it Governor Taft speaks hopefully of the future of the islands. He urges, as heretofore, reductions in tariff rates.

William H. Taft, ex-Governor of the Philippines, took the oath of office as Secretary of War, Secretary Root retiring, February 1. It is said Secretary Root will resume his law practice.

Foreign.

The Austro-Hungarian and Russian Governments have transmitted to the Turkish Government a memorandum, couched in firm but courteous language, making clear the duties and privileges of the two Russo-Austrian civil agents in Macedonia and their relations with the Turkish inspector-general. It amounts, practically, to a rejection of the stipulation contained in the Porte's note of January 10, who insisted that the agents in their tours of the country be accompanied by Ottoman officers. Austro-Hungary and Russia are determined that the work of reform shall not be retarded by Turkish interference, and that their agents shall travel and conduct their inquiries independently of any Turkish officer, should they wish to do so.

The Cuban Department of State and Justice has ordered the prosecution of the persons at Cienfuegos, suspected of responsibility in the defacing of the escutcheon at the United States consulate, and has notified Minister Squiers that an investigation and punishments have been ordered. Three arrests have already been made. The citizens of the place seem universally to regret the incident. The only motive assigned for the mud throwing is said to be political, to create a situation which would result in the ousting of the local officials.

Great excitement is said to prevail at both Savanilla and Cartagena over the presidential election. It is unofficially reported that General Rafael Reyes, at present Colombian minister-plenipotentiary to the United States, has been elected President. There is still much war talk at both these ports.

According to information received at the State Department all the ports of San Domingo are now in the possession of the Morales Provisional Government, which succeeded the Government of General Wos y Gil. The Jiminez revolution seems to have been stamped out.

It is announced that by May railroad trains will be running from Paris, *via* Berlin and Warsaw, to Pekin, China. Through tickets will be available. The trip requires seventeen days.

The first train on the new American railroad to Oroya and Cerropasco, Peru, has been run. It consisted of twenty cars and carried many passengers.

The English Parliament was opened by King Edward February 2 with the indoor and outdoor ceremonies more imposing than usual.

The Cuban cabinet has approved the revision of the tariff prepared by President Palma and the Treasury officials.

Industrial and Commercial.

The first shipment of foreign benzine ever imported into the United States arrived at Philadelphia recently from Rotterdam. The cargo consisted of five hundred thousand gallons of the Sumatra product in bulk, consigned to an independent concern. The benzine was refined in Sumatra, distilled in Rotterdam, is pure white and odorless. The oil trade is interested over the shipment, and it is reported likely that an attempt will be made to have a duty put on the product which will be prohibitive. Customs officials have decided to impose a countervailing duty of less than one-half cent a gallon.

Japan has ordered for shipment from Kansas City, Omaha, and Chicago, 2,500,000 pounds of corned beef; she has contracted in Cincinnati for 12,000 cases of mess beef; she is taking from a Chicago firm, in 60,000-pound monthly shipments, 800,000 pounds of mess beef. By February 15 she will have taken from this country as food for her war forces, about seven million pounds of meat.

European exports to Mexico increased seven times as much as American exports last year, which, says an exchange, shows that an imaginary line may be made harder to cross than thousands of miles of ocean.

The value of the merchandise passing out of the ports of continental United States in 1903 was more than $1,500,000,000.

General.

During the calendar year 1903, up to December 30, 619,684 immigrants—steerage passengers—arrived at New York, as against 547,197 in 1902. The increase of 1902 over 1901 was about 139,000. The heaviest immigration was during May, when 92,815 steerage passengers were admitted. Almost as many came in April. Southern Europe contributed by far the largest proportion of the total. There was a marked increase in the new-comers from Northern and Western Europe, especially Norway, Sweden, and Denmark. Italy leads all the rest.

The British expedition to Tibet is now in a totally unexplored country. The expedition is meeting with enormous transport difficulties in consequence of inaccurate information regarding the nature of the country. The natives are friendly.

A remarkable test has been conducted in Chicago with a new fireproofing substance made from sulphate of aluminum. This costs less than a cent a pound.

It is stated that the cotton crop of India will total this year about four million bales, and that this amount could easily be doubled in a few years.

By a will Oberlin College has come into possession of one of the finest private art collections in the country.

To-day women are admitted to the bar on equal terms with men in thirty-four States of the Union.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

Selected Articles.

Misunderstood Points about Mrs. Eddy and her Church Explained.

To the Editor of the *Tribune.*

Sir:—We have just read with interest the six questions propounded by "Query" in your issue of to-day, and will endeavor to answer them in a way that we hope will be satisfactory to your readers.

"First: Why were you obliged to insert in said article after the statement of the tenets of that Church, the words, 'Copyrighted by Mrs. Eddy,' etc. Would it be possible to imagine Jesus Christ as copyrighting the Sermon on the Mount or the Paternoster?"

The writer must remember that in the days of Jesus of Nazareth there was no copyright law, neither did our Master leave any written record of his own teachings. These were cherished in the memory and afterward recorded by his faithful disciples. St. John closes the book of Revelation, as if to establish the authenticity of the work, by saying, "And if any man shall take away from the words of the book of this prophecy, God shall take away his part out of the book of life, and out of the holy city, and from the things which are written in this book."

"Second: Is there any authentic record of any fairly respectable religious body being founded by a woman, and, if so, with what success?"

We do not recall that a woman has ever before been the founder of a religion so important as Christian Science, although many women have been identified with religious movements. The Virgin Mother, who gave birth to the Messiah, and the two Marys who remained loyal to the Master when he was meeting the last tragedy at Calvary while all the male followers but one failed to stand by their Lord, proves the fitness of woman to uphold the standard of Truth. Again, Queen Elizabeth established the Protestant faith in Great Britain, and in latter days good Queen Victoria won the love and respect of the entire world by her practical religious life.

"Third: Whence does Mrs. Eddy acquire the title 'reverend'? In what church was she ordained?"

In 1878 Mrs. Eddy was called to preach in the Baptist Tabernacle in Boston by the pastor of that church, and it was not infrequent for healing to result from her sermons. In 1879 Mrs. Eddy founded the Mother Church in Boston, and was called by the members to be its pastor. She accepted the call and was ordained in 1881.

"Fourth: How is it that, as a follower of Jesus Christ, she has managed to accumulate a fair proportion of this world's wealth, whereas 'He had not where to lay his head'?"

Cases are by no means rare of ministers of the Gospel acquiring wealth and receiving large salaries, but how many records have we of clergymen giving charities amounting to over $100,000 in one year? Mrs. Eddy has exceeded this amount in one year. Her wealth is obtained, not from salaries, but from the sale of her writings, and one book that costs at retail $3 a copy has healed patients who had previously expended hundreds of dollars for remedies and failed to recover.

"Fifth: It may seem invidious to remark, but to me it seems strange, that after all the great minds of the past that have devoted themselves to this subject it should be reserved to a schoolgirl in a country village to evolve a solution of this momentous problem, and it is peculiar, to say the least, that in the summing up of her pedigree and religious ancestry it is emphasized that 'her parents were both devout members of the church, and both had family crests.' Now, in all common sense, what on earth have family crests to do with religion and the 'discovery' or founding of a new religion?"

Christian Science was not discovered by a schoolgirl in a country village, but by a matured woman in the city of Lynn, Mass. It is, perhaps, as difficult for the people in this age to accept the Discoverer of Christian Science as it was for the Jews to understand that "any good thing could come out of Nazareth." Great stress is laid in the Bible on the pedigree of Jesus, tracing his ancestry to the Royal House of David.

Mrs. Eddy in early womanhood gave promise of a brilliant career. F. B. G. Corser, M. D., a prominent citizen of Boscawen, N. H., the son of the Rev. Dr. Enoch Corser, an eminent Congregationalist clergyman, and the principal of Sanbornton Academy, said of her, "My father held her in the highest esteem. She and my father used to talk on deep subjects, frequently too deep for me. She was always pure and good. She stands out in my mind distinctly as my father's brightest pupil."

In her early years she served as substitute in the seminary for the Rev. Dr. Richard R. Rust, while the principal, through illness, was unable to attend to her duties. At sixteen years of age she was a popular writer for the newspapers and periodicals. In fact, the evidences are abundant that early in life Mrs. Eddy possessed rare literary ability.

"Sixth: By the way, is this 'discovery' something like the Northwest Passage, the magnetic pole, or the heart of Darkest Africa?"

The discovery of Christian Science, like all other unfoldings that have taken place in the world, is the revelation of something that always existed, but was not known to man until some one proclaimed this fact in a way that others could appreciate and understand.

I trust that you will be able to find room for this somewhat inadequate answer to so great a theme.

RICHARD P. VERRALL.

New York, February 4, 1904.

New York Daily Tribune.

Mrs. Eddy teaches that God, infinite Spirit, is omnipresent and, therefore, the only entity, and that the physical universe is, therefore, phenomenal and not a reality in the true meaning of that word, or in the sense in which God is reality. It follows as a necessary logical corollary that the evidences of our physical senses, such as tasting, are not matters of imagination on our part, but are phenomena merely, as contradistinguished from the realities of being.

Copyright, 1904, by Mary Baker G. Eddy.

Digitized by Google

This teaching is being more and more corroborated by the later conclusions of the physical scientists, who are abandoning the former dogma in natural science that matter is real, and resolving matter, in its ultimate analysis, into non-reality or phenomena. If matter were entity, instead of phenomena, atheism would be the only logical outcome. But physical science is now proving, like the metaphysics of Christian Science, that matter is not an entity because it is not self-created or self-energized. Physical science, in other words, is demonstrating that the dynamics of the material universe—that is, the primal energy that creates and moves all its phenomena—is extra material. Therefore, as Mrs. Eddy teaches, the dynamics of the universe is Mind, or God.

When dogmatists attempt to ridicule the Christian Science doctrine as to matter, they are unwittingly assisting the falsehood of atheism with a premise, which, if true, would be a terrible argument against the existence of God as omnipresent, omnipotent, all-loving Spirit.

No one who keeps pace with the latest teachings in what are called the natural sciences, can be unaware of the beneficent fact that they are fast becoming the ally of true Christianity by helping to prove that extra-material Spirit is the creative and energizing reality of the universe. Former dogmas of some natural scientists that matter is self-evolved and self-sustained, attempting to substitute evolution in place of God's creation, were never more than wholly unsupported conjectures, and they are now substantially abandoned.

The materialistic theory that matter is a reality, using that word in its true philosophical sense and thereby negativing any need for God, has never received the support of the great thinkers of our race. CLARENCE A. BUSKIRK.

Indianapolis (Ind.) *Journal.*

Whatever there may be in the contention as to whether or not healing the sinful and sick demonstrates the truth of Christian Science, this much is certain: the sinful and sick are healed by the application of this faith, and this fact is the only evidence to the practitioner that he really understands the Science, and is the only proof to him that his argument that God, Spirit, is the only real Life, substance, and intelligence, is true; while the claim that lesser powers can produce and maintain sin and sickness, is false. It is useless to quarrel over technicalities.

It might be argued that light "has no demonstration on the plane" of darkness, but the fact remains that when the light appears the darkness disappears, and it can be demonstrated that light is real while darkness is a nonentity. For example, if a room is filled with darkness and it is light without, one might open a window or door, admit the light, and dispel the darkness; but if the room is filled with light it is not possible to admit the darkness from without and dispel the light. Thus we prove the reality of light and the unreality of darkness.

In Christian Science God alone is the Healer, but the Scientist seems to be the medium through which the truth is imparted to the patient.

The idea that six times six are thirty-six cures the belief that six times six are thirty-two, but it might be said in common vernacular, that the teacher of mathematics has corrected the pupil.

The critic, who plays the role of questioner, should not despair in his search for the rule of divine healing. If, as he declares, he has conscientiously studied this Science for a year and still fails to understand it, he ought to account for this as he would if he had studied mathematics for a year and still failed to understand it. The fault in such a case could not be justly attributed to mathematics, but to the pupil. If no one understood and none were able to demonstrate Christian Science, we might well conclude that it is not capable of being understood; but when we consider that the rudiments, at least, of this Science are fairly understood by vast numbers who are daily obtaining good results therefrom, we are forced to acknowledge that it is indeed a Science and capable of being understood and demonstrated. ALFRED FARLOW.

Boston Ideas.

One of the greatest mistakes that the critics of Christian Science make is "that the followers are impelled to throw away the experience of the ages and discredit their own senses." We are a most grateful people for all the good that has come down through the centuries. We are conscious that Christian Science could not have come to this age without the preparation that has been made for it. Science and Health says, "Whatsoever inspires with wisdom, Truth, or Love—be it song, sermon, or Science—blesses the human family with crumbs of comfort from Christ's table, feeding the hungry, and giving living waters to the thirsty" (p. 234).

Is it "pitiful" to believe in Truth, or something that others do not believe in for fear of being thought ridiculous? It is admitted that Christian Scientists are healthy, happy, intelligent people. Then what are intelligent people but those who manifest intelligence, and accept that which is genuine? ARTHUR E. JENNINGS.

Toledo (O.) *Blade.*

Christian Science has spread because of the great good that comes to those who accept it, and because of the large number of successes in proportion to the failures; and the world will judge it by its successes and not by its failures. Perfection has not yet been reached in the application of Christian Science to the cure of the sick. Because of the great benefits received many have only so recently adopted Christian Science that they cannot be said to have attained great knowledge of its application. In time, better healers will result and a greater degree of success be realized. It takes much serious study and long experience to practise Christian Science aright. CHARLES D. REYNOLDS.

Manchester (N. H.) *Union.*

A recent statement of the mission of Christian Science by one of its authorized lecturers, is appropriate:—

"Coming to this age, which is in the travail of its fierce conflict over creed and philosophy, it comes, not to join in this conflict nor engage with acrimonious competition for your favor. Even though it be stoned and reviled, it reviles not again. Its whole service is to teach men the Science of God and man, to educate them in the holy art of loving, to wipe the bitter tears away, to comfort them that mourn, to heal the sick, and to turn the footsteps of the tired sinner out of the mire of tormenting evil. It cannot quarrel. It does not know how to hate or fight."

DAVID B. OGDEN.

Exchange.

It makes no difference to the Christian Scientist whether our physical ailments are traceable to functional or organic disease or to hysteria, the fact remains that the people are healed and they give the glory and praise to God. What difference does it make, even supposing that ninety per cent of the diseases to which men are subject are imaginary, it is an unsound condition of thought which produces disease, and if Christian Science can remove this illusive, deceptive, unsound condition of things and substitute in place thereof a sound and sane condition, is it not filling an acceptable and useful place in the world? JOHN L. RENDALL.

Iowa City (Ia.) *Republican.*

From our Contributors.

"Till I Come."

BEN. HAWORTH-BOOTH.

It has been the custom of the Christian church for so many centuries to sit and wait for the personal second coming of Jesus, that the question is seldom discussed within the church whether that position of expectancy is properly authorized by the teachings of Christ Jesus himself. A close examination of his teachings would appear to point to a different purpose on his part.

His last words as recorded by Matthew were, "Lo, I am with you alway, even unto the end of the world," and when referring to his so-called "second coming," he spoke of "the day when the Son of man is revealed." The latter of these two texts would seem to be closely linked in meaning with the former, and they together would seem to point to the revelation of that which has been with us always though hidden from our eyes.

Again, the second coming of Christ is commonly considered to be the same as the coming of the kingdom of God; but when Christ was asked to signify the time when the kingdom of God shall come, he replied, "The kingdom of God cometh not with observation: neither shall they say, Lo here! or, lo there! for, behold, the kingdom of God is within you."

In a similar manner on another occasion he clearly spoke of heaven as a state of consciousness and not as a locality, for to Nicodemus he described himself as "the Son of man which is in heaven."

Paul tells us that "flesh and blood cannot inherit the kingdom of God." If that be so, how could Christ come in flesh and blood when he cometh in his kingdom?

Again, in the epistle to the Hebrews we find, "Unto them that look for him shall he appear the second time without sin unto salvation." If Christ were to return in the flesh, surely it would not have been correct to declare that only those who "look for him" should behold him; and the words "without sin" would seem utterly unnecessary in the ordinary sense, as applied to Jesus, who was ever without sin neither was guile found in his mouth. The interpretation that these words signify without the sinful flesh; *i.e.*, "wholly spiritual," would seem to be in harmony with the context, the flesh being the emblem or badge of man's mortal and sinful state.

The Prophet Malachi makes a similar declaration, "But unto you that fear my name shall the Sun of righteousness arise with healing in his wings," thus limiting his manifestation to the consciousness of a portion of the community only, and emphasizing the fact that healing the sick is again to be the sign as aforetime. Again, Paul's retrospect and forecast in his letter to the Corinthians, "Even though we have known Christ after the flesh, yet now we know him so no more" (Revised Edition), should be quoted in this connection. These passages of Scripture would lead us to conclude that only those who look for Christ with the eye of the Spirit shall see him who is with us always and has been with us always,—the eternal Christ "which is in heaven,"—spiritual consciousness.

On the other hand, I am aware that there are texts of Scripture which would at first sight seem to point to a different conclusion, such as the following: "This same Jesus, which is taken up from you into heaven, shall so come in like manner as ye have seen him go into heaven:" but, when examined, even this text does not necessarily mean that the second appearance of Christ shall be material. With all deference may we not understand it to mean, "As you have seen him before, so shall you also recognize him again." But though the Scripture declares that only to those who look for him shall Christ appear, yet it also declares that ultimately every eye shall see him, unto him every knee shall bow, and every tongue shall confess him. Thus we are forced to the conclusion that the fault lies with ourselves if we cannot see him now. He is with us to the end of the world, and God the Father of lights has given unto man "every good gift and every perfect gift" from the beginning. It lies with man to avail himself of these good things and to demonstrate the glories of the kingdom of heaven which is "within us," behind the veil of the flesh, available for all God's sons and daughters. And when through spiritual sense men behold the healing Christ, the present Emmanuel, the perfect image of the omnipresent God, the great awakening will be swift and sudden, "as the lightning cometh out of the east, and shineth even unto the west; so shall also the coming of the Son of man be."

At a great gathering in Birmingham recently, with Mr. Chamberlain presiding, Sir Oliver Lodge, one of England's greatest men of science, declared that "nothing material is permanent." Mrs. Eddy has taught us this same truth for over-thirty years. Truly the mighty atom is cast down from its high estate, and in the words of another scientist (Professor James T. Bixby), we are coming to know that "everything visible . . . is transient, if there be anything permanent it must be in the invisible sphere." The greatest master of science that ever trod this earth declared, "It is the Spirit that quickeneth, the flesh profiteth nothing."

It is a glorious fact that his promise has been fulfilled, "Ye shall know the truth, and the truth shall make you free;" free from sin, from sickness, and ultimately from death, that "last enemy which shall be destroyed." Christian Scientists declare that his promise, "Ye shall know the truth," is now fulfilled, and they speak that they do know and testify that they have seen.

What grateful thanks are due to her whose sweet purity and spiritual perception have fitted her to make manifest this truth to the world! Our hearts should overflow with praise to God from whom we receive healing and every other blessing. These were first manifested by Christ Jesus to an ungrateful and barbarous generation, and now they are to be perfected by his promised "Comforter,"—Christian Science,—which has come in his name. "Wherefore he saith, Awake thou that sleepest, and arise from the dead, and Christ shall give thee light."

"Be it Slow or Fast."

SAMUEL GREENWOOD.

The boy who struggles with a difficult problem, working hard to apply correctly the rules he has already learned, or to understand those more advanced which may be necessary to complete his work; who turns back after repeated failure to begin again with the knowledge gained from these experiences, and who at last after earnest, careful, steadfast work arrives at the correct solution, has made a scientific demonstration as well as the more fortunate scholar who, with less time and labor, may have reached the same end. The rules used and the Principle demonstrated in each case were the same; the difference in time and work was due to the degree of knowledge and capacity possessed by the two students.

The ability to understand Truth so as to demonstrate scientifically the harmonious realities of being, the universal life-problem, does not come to mortals at the beck and call of their desire. Individual, as well as national, reform includes more than is superficially evident, and neither is accomplished without labor. The human transformation, wherein the sense of sin and suffering gives place to God's spiritual idea which includes no sickness or evil, is not an instantaneous experience. The interval between the individual's awakening from the delusion and deception of evil and matter, and his realization of perfect

Digitized by Google

being as God,—good,—only, is a continuous conflict between the Spirit and flesh, and will last until God, "whose [only] right it is shall reign" supreme.

The "earthward gravitation of sensualism" (Science and Health, p. 272) weights the fluttering wings of a struggling desire for spirituality, hence the disappointed hope and the weary sense of time that often mark the early stages of progress. If the human weariness of suffering always denoted a corresponding weariness of sin, there would be fewer laggards along the road to harmony, for but little permanent progress can be made while the heart clings to the idols of self and sense, even though the hands are outstretched to God for physical help. The longing for bodily ease does not always imply the readiness to meet the spiritual demands of Truth; hence "Love is not hasty to deliver us" (Science and Health, p. 22) till the heart is willing to give up to God. But while this is so, who among us has risen to that altitude of spiritual understanding which can always discern where ignorance ends and willing sin begins? The forms and phases of human error are so many and varied, and the means whereby the unwary sense is mesmerized are so subtle and unsuspected, that one were wiser not to say of another that his healing is delayed because of sin, remembering that "all have sinned, and come short of the glory [perfection] of God."

The writer's sympathy, since knowing of Christian Science, has ever been with those who have worked and waited long and faithfully for the removal of some physical trouble but with only partial success; for in his own experience, after nearly three years of almost constant treatment in Christian Science, three years of hope deferred, the healing most desired seemed as far away as ever. Those who have abandoned Christian Science because they were not healed in a week or month, or even a year, would possibly have pitied him for his persistence, even though he had persisted with *materia medica* for ten years previous and gained nothing. Better than they could he have discontinued the treatment as useless, and pronounced Christian Science a failure. He has rejoiced for many years that he did not, however; for at last error acknowledged the omnipotence of Truth, and the trouble disappeared like mist before the sun. Oh no, no one need despair who goes to God, for "He is a rewarder of them that diligently seek Him;" and we may be sure that we shall receive first what we most need, though not, perhaps, what we most desire. Men reckon their days according to the dial, and count their years by the calendar, while God "measures time according to the good it unfolds" (Science and Health, p. 584), hence "God's time and mortals', differ" (Miscellaneous Writings, p. 117).

If we, as mortals, have wandered into that mist of error in which man is regarded as the offspring of evil rather than of good, and as subject to misfortunes and unhappiness, suffering and death, then we should labor, and labor hard, to get out. The pain and peril of this false sense should turn our hearts without regret towards the peace and safety of Truth,—true God and true man,—the right knowledge of which is eternal life. Our returning road may seem a long and weary one; we did not think that we had strayed so far from truth, from God's standard of manhood, until we sought to return. The joy of knowing that, however slowly, we are nevertheless surely on our way to the Father, —to the consciousness of harmony within us,—through a knowledge of Life instead of death, of health instead of sickness, this should outweigh all sense of sacrifice or discouragement because of prolonged endeavors. At times it may seem an endless battle with the ghosts and goblins of our former fears and sins; and again we may seem to move swiftly under sunny skies and through fragrant fields; but it is ever onward, upward, heavenward, Godward, be it slow or fast.

Those who have sought the healing of Christian Science but whose progress has been slow, very slow perhaps, who may not yet see the fruition of their hope and prayer, and whose glimmering sense of dawn may brighten, oh so slowly, need not despair, even though the heart may sadden betimes with weary wonder. The traveler plodding painfully afoot may note the change of landscape and leave it behind as surely, if not as swiftly, as he who journeys by train. No one who has striven faithfully to live the Christ-life as taught in Christian Science is to-day where it found him. He may not have received all the good he hoped for, but he has gained a treasure beyond all former knowledge, and has lost nothing which he still prizes. No one can be too grateful for having learned of the way in Christian Science, and this way does grow brighter even to the slowest pilgrim.

The student of Christian Science who may have grown discouraged because of delayed results, should remember that he is working for permanent gain, and not for the mere sense of physical ease or comfort, which may be to him as material as the dis-ease. The results sought may not always come in the form or in the time mapped out, but whatever seems to hinder the perception of God's perfect work in man is an evil, and so must finally yield to the Christian's growing knowledge of good. It is better to "make haste slowly" and thoroughly, than to rush for the pleasant pastures and be brought back to do neglected or unfinished work. To have gained through Christian Science even the first faint glimpse of the true God, the God whom Jesus knew and worshiped, is cause for constant joy, for if followed obediently it will lead us on to the full day; but to see our way through every dark and difficult place ahead with the little light we now have, may not be possible, and the wise student will no more attempt it than he would undertake to solve a problem in higher mathematics with his knowledge of the rule of three.

How can we tell who is going slow, who fast, if we have not the wisdom to equalize the influence of education, opportunities, and environment? Physical conditions are not an infallible standard of just judgment, for they do not always reveal the extent of the work required to bring thought and character into conformity with the divine ideal.

Are we advancing joyfully and swiftly along the "rugged way," rendering no obedience to sin and keeping ourselves "unspotted from the world," and because of this growth seeing mountains of disease and sorrow cast into the sea of God's oblivion to evil? Then let us give God the glory, and not wonder why our brother is plodding so far behind us.

Are we progressing slowly, yet doing with our might the best we know, giving up no opportunities to evil nor yielding to discouragement? (Science and Health, 254.) Then let us also rejoice in the little knowledge we have gained of God's perfect goodness and in our meed of Love, knowing that our work is as acceptable to God, in proportion to its honesty, as the work of those who may have gone in leaps and bounds before us.

To rise superior to the discouragements and disappointments of human sense through an unwearied faith in God and the Christian's sublime assurance of ultimate and complete success; to struggle patiently and bravely against the seeming triumph of evil, yet seeing the darkness disappear little by little; to withstand undismayed, day after day, the hereditary tendencies of disposition, temperament, and appetite, till they give up by degrees their wrongful dominion and the divine image gradually unfolds; to thus continue ever on the line of progress, measuring our pace only by the growth in purity and love, uninfluenced by physical appearances, is to move in God's time, whether human wisdom call it slow or fast.

The Lectures.

Santa Barbara, Cal.

A large and intelligent audience assembled at the Opera House, Sunday afternoon [December 20], to hear Judge Septimus J. Hanna's exposition of Christian Science.

The speaker was introduced by Hon. J. W. Taggart, judge of the Superior Court, who said in part,—

When the committee of this organization waited upon me with your request that I introduce the lecturer at this meeting, I hesitated before replying. Your committee anticipated the dilemma with which he thought I was confronted, and said, "Christian Science has reached that stage when it no longer needs an apology from any one who introduces one of its lecturers, whatever his station in life may be." So perfectly confident and assuring was his remark that I at once replied, "I shall be pleased to do so, and appreciate the honor bestowed upon me in making your selection."

But he had not divined the reason for my hesitation. It had not occurred to me that Christian Science needed an apology from me, but it did occur to me that I might be unable to justify myself to a Santa Barbara audience in appearing in such a role. I was not affiliated, or in any way connected, with your organization, and had expressed no thought that could be construed to be in sympathy with the doctrines which you teach.

After your committee retired, I began to consider whether in my own life's purpose I had anything in common with Christian Science? Yes, I thought, there was the betterment of mankind. That was common ground.

Ladies and gentlemen, I take great pleasure in introducing Hon. S. J. Hanna, who will address you on the subject of Christian Science.—*The Morning Press.*

Asheville, N. C

A large and intelligent audience greeted Mrs. Mims on the occasion of her lecture in the Grand Opera House Sunday afternoon [January 10]. Mr. Charles E. Jones, of the Asheville bar, introduced the lecturer to her audience, which gave her the closest attention throughout. Mrs. Mims' address was simple and unaffected, but through every word and graceful gesture intense earnestness was expressed.

In his introduction Mr. Jones said in part:—

Speaking of Christian Science from the standpoint of the outside world, it seems to differ from other religions in that it claims to have discovered the Science of religion. I see no reason why religion should not be reduced to a science, inasmuch as all religious truth must be due to some underlying law. The phenomena of religion can be correlated in the same manner as any other phenomena, and certain principles can be deduced from careful observation which will apply to all religious movements. Christian Science claims that the phenomena of mental healing of divers diseases are due to a certain well-defined law; that this law is purely metaphysical, and that by reason of that law its claims and theories are susceptible of practical demonstration. Many people suppose that the difference between science and religion is that one is based on facts and the other on faith. Christian Science says that the facts of mental healing by an application of its doctrines are so thoroughly established that they are indisputable. It not only advances this test of merit, but is even anxious to abide by the test. It is, as it were, on trial before the world, and you are a part of that vast jury of humanity upon whose verdict the judgment of history must rest. Nothing is fully determined until the judgment of history has been rendered, and this movement must abide by that judgment as must any other movement.

I am reliably informed that there are over a million well-attested cases of Christian Science healing and the witnesses to these facts are not like ordinary witnesses in a court of justice. They have not been called to testify in behalf of private interest and personal profit. Their testimony has been evoked by a firm conviction of the inherent truth in what they say, by a conviction that is willing to face the ridicule and skepticism of the world and the social ostracism which that often brings. Such testimony, I say, is not open to the objection of prejudice or self-interest. We must recognize the fact that these witnesses at least firmly believe in the truth of what they say. Such testimony in a court of justice would be overwhelming, coming as it does from the lips of people of undoubted veracity, hard-headed business men accustomed to detect shams and hypocrisy, men and women of the most eminent culture and recognized mental ability, doctors, lawyers, judges, writers, ministers of the gospel, and ladies above the breath of suspicion. Such testimony challenges the world to give an explanation founded upon the closest scrutiny.

Is Christian Science healing miraculous? I should say that nothing ever is, but there are many religious sects that base their claims to popular approval upon miracles. I have heard learned ministers of the Gospel advance the theory that the miracles which Jesus performed were necessary in order to startle the ignorant masses into a recognition of his Divine commission and the truth, and that once mankind had been aroused to his truth, the need of miracles vanished and the age of miracles disappeared. How utterly absurd must be such a contention in the light of the nineteenth century. Now is the age of miracles. The nineteenth century is but one long procession of startling miracles. The steam engine, the telegraph, the telephone, the dynamo, electricity, wireless telegraphy, the X-ray, and radium are every one of them convincing miracles. And one of the greatest miracles of the nineteenth century is that a lonely woman should by her unaided efforts enunciate so startling a doctrine as Christian Science and convert so many thousands of the most critical and educated people to her belief, especially in an age of enlightened skepticism permeated with the theories of Darwin, Tyndall, Huxley, and Spencer.—*The Asheville Citizen.*

Lectures at Other Places.

The Manual and Concordance.

The sense of Truth, Life, and Love, gained from the study of this Manual, has enabled me to see a case of pneumonia, of very severe form, disappear like mist before the sunlight, and that, too, within a few hours.

I feel that we cannot work and strive too diligently, or watch our thought too closely, that the rules given us in this guide-book may be engraven upon our hearts.

ELLA SHASER, Minneapolis, Minn.

The help of the Concordance is invaluable, making the study of our text-book yet more of a delight. As we see the reasons for changes made, it strengthens the heart with a knowledge of what our Leader has done and is doing for us, and brings a humble desire to make haste slowly but surely along the way of Science. The wonderful completeness of the Concordance makes it of assistance in all our plans of study. Thanks for the gift of the Manual, too,—thanks to all for the blessing of our helps, thanks to our Leader first, last, and always.

LUCY HOLTZCLAW, Chattanooga, Tenn.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

As to Advertising.

We sometimes receive inquiries as to the standing of persons who advertise themselves in newspapers and magazines as Christian Science practitioners. We answer these inquiries by saying that Christian Scientists do not advertise, and it is safe to assume that the persons who thus bring themselves to the attention of the public are not in any manner identified with our denomination nor with its healing work. The following reference to the methods employed by unauthorized persons who pose as Christian Scientists, is copied from a previous issue of the *Sentinel*:—

"It is unnecessary for us to say that methods of advertising akin to those of quack doctors and vendors of patent nostrums are not countenanced by Christian Scientists. On the contrary, they are reprehended.

"Christian Scientists have done all they properly can do in the way of advertising when they unobtrusively make known the fact that they hold themselves in readiness to respond to calls for healing sickness or otherwise aiding those who desire such services as come within their province or line of duty."

The above is as true to-day as when it was written, and correctly sets forth the attitude of Christian Scientists as being one of willingness and readiness to help those who desire their ministrations, rather than that of soliciting the attention and patronage of persons who may be attracted by a skilfully worded advertisement.

Christian Science healing is not a thing of barter and sale; it is a holy ministry into which greed, selfishness, and self-seeking cannot enter. The commercialism that bids for patronage and dollars is inconsistent with the true sense of Christ-healing and must ultimately prove to be a delusion to both practitioner and patient. Christian Scientists know that those who would avail themselves of the healing power of this Science must turn to it naturally and without undue influence.

It may be urged that unless Christian Scientists advertise, the public will not know how nor where to find a practitioner, but this will not suffice as an excuse for adopting methods not in keeping with the proper reserve and dignity which befits the high calling of our ministry. Those who are ready for Christian Science will experience no difficulty in finding help and healing. There are but few communities in which some beneficiary of Christian Science cannot be found; the churches of the denomination are many, the free reading rooms maintained by the churches are easily accessible, and a comprehensive directory of practitioners is published in the official organs of the denomination. M.

A Contagion of Good.

From hand to hand the greeting flows,
From heart to heart the bright hope glows.

The religious propaganda which Jesus inaugurated and which has constituted so important a feature of Christian history, is earth's noblest enterprise, and it has been conducted, for the most part, by men and women who have shown a degree of heroism, self-sacrifice, and devotion which has made all mankind their debtors. In all the later centuries, however, these noble people have suffered a disadvantage for which their earnestness, their sincerity, and their abundant works have not been able to make amends, and in proving through the healing of the sick, that "the best sermon ever preached is Truth practised and the demonstration thereof" (Science and Health, p. 201), Christian Science is but supplying what missionary workers have lacked, and what, had they possessed it, would have greatly increased the beneficent results of their labors.

The best missionary to suffering humanity is that brother-man who can speak definitely and unhesitatingly of his own escape from the bondage and afflictions of the flesh, through the apprehension of spiritual truth. He wins the world's attention because he answers to the world's longing, and he silences criticism because his declarations are capable of individual verification.

When the world's cry for relief from pain, and from the enslavement of the senses is met, then universal need becomes an avenue, an impelling occasion for the spread of the healing truth, and propaganda effort is replaced by a contagion of good.

This explains the remarkable growth of Christian Science which, without prestige and without missionary organization or effort corresponding to that of other religious bodies, has astonished the world with its gains, despite a mental resistance such as has not been known before in modern times.

A recent examination of the mailing lists of the Christian Science periodicals brought a surprise in the discovery that these messengers are finding their way to so many remote corners of the earth. To far and unheard-of places in little-known lands, as well as to every quarter of the civilized world, they are bearing to the pain-stricken and discouraged the hope-awakening testimony that God is indeed with men to-day as of old, healing them of their sicknesses and saving them from their sins. One has no difficulty in accounting for these interesting facts when he remembers how swiftly flies a glad conviction, and with what instant love he who has experienced the healing and uplifting power of Truth is prompted to bear to his needy brother the word of assurance and hope. To such an one the fallacy of doubt is forever revealed, and he speaks with the simple and convincing definiteness of him who said, "Whereas I was blind, now I see."

Modern facilities of travel and communication have made the world a great cosmopolis, throughout whose every ward vital ideas run and are glorified as at no other time in human history, and therefore the range and result of our faithful ministry in Christian Science is to be expressed in terms both of the spiritual authority of the word we utter, and of the speed and universality of its dissemination.

A practical illustration of the contagion of good is given in a personal letter before us in which reference is made to the rapid spread of Christian Science in the out-of-the-world mountain regions of North Carolina. Says the writer, "The power that Christian Science has to help these common yet rare country people is no less wonderful than glorious. I found one plain, simple, country household sixteen miles from the railroad, where the daughter was healed of consumption almost instantaneously, where the son was healed of typhoid fever, and where the father has been liberated from insanity of long standing; and to these good, simple people, Christian Science means nothing less, indeed, than God with them."

A fire like this can but be seen and felt for many miles around, and it lends to the clouds of our earthly night a glow of hope which lifts the eyes and cheers the heart of sad-faced sufferers in a yet larger zone.

Another private letter before us tells of the wonderful growth of interest in Christian Science in Chili, S. A., and

Digitized by Google

of the many who are asking for treatment and who, having no knowledge of English, frequently come together to learn orally of that healing gospel which has brought to very many of them "beauty for ashes, the oil of joy for mourning, the garment of praise for the spirit of heaviness." All this has resulted from the healing of a single "incurable," who in hopeless extremity came to the States to try yet another specialist's treatment, and who, when that had failed, heard for the first time of Christian Science, and turning to it "as a little child," was immediately loosed from her bondage. Rejoicing, she returned to her home to publish the glad tidings, and to-day this broad field beneath the Southern Cross is white unto the harvest.

He who attains in Christian Science to that apprehension of Truth and Love which enables him to obey our Lord's command and "heal the sick," is at once freed from all anxiety and solicitude as to the advance and ultimate triumph of this freedom-bringing gospel, and he can smile at the incredulous prophets of defeat, for he knows that "the gates of hell shall not prevail against it." W.

False Christs.

NEAR the close of Jesus' ministry he took occasion to warn his followers against the false Christs which would come in his name, claiming identity with his teaching and work, and he said, "Take heed lest any man deceive you." This showed the high value which he placed upon his teaching, for only genuine things are counterfeited, and that which has no worth is not likely to be imitated.

Before the Christian era there were many theories about God which claimed to be true, but Christ Jesus characterized their effect upon humanity in these words: "O righteous Father, the world hath not known thee." The way of error with all its resultant misery is a long one, but mortals have ever sought escape from its penalties by a short cut. That there is a true way of escape from evil is certain, else would not Christ have said, "I am the way. . . . No man cometh unto the Father but by me." He offered guidance to all when he said, "Follow me," and our Leader has spoken of this way as "the passage from sense to Soul" (Science and Health, p. 566).

Paul speaks of Christ as "the image of the invisible God," from which we can but conclude that the image or reflection of divine Truth and Love is ever with us, otherwise we are not in "the way that leadeth unto life." We must all learn, that we can reach the divine heights only by individual understanding, obedience, and experience. Inseparably connected with this lesson is another; namely, that the spiritual methods which lead to harmony are the reverse of those which spring from mortal belief, or which appeal to it.

If, as Christian Scientists, we are loyal to the teachings of our text-book, we shall never fall into the snares of error through the belief that we can find a way to harmony by adopting the views or accepting the guidance of those who are ignorant of the Christ, Truth. Again and again has the world been disappointed by "false Christs" which "deceive many." The great revolution in Europe about the close of the eighteenth century gave proof of this. Under the guise of a lofty ideal of liberty, equality, and fraternity, thousands were led away into the blackest night, and a fair land was deluged with the blood of error's victims.

Surely all Christian Scientists ought to know that mortal mind has no power to cure the evils it has caused; and that "God reigns" in the social and political realm as well as in the so-called physical. And, in view of these eternal facts, they ought also to know that perfect justice is within the reach of every one who clings unfalteringly to Truth.

We may well remember the Hebrew captives in Babylon who were not only saved from threatened destruction through their obedience to Truth, but were "set on high" above those who were confident in their place and power, and this should make it clear to us that our individual business is to love and obey God, and He will see to it that we are protected and provided for.

Our text-book says, "The Science of Christianity is misinterpreted by a material age. . . . Creeds, doctrines, and human hypotheses do not express it, much less can they demonstrate it. . . . Human philosophy, ethics, and superstition afford no demonstrable divine Principle whereby mortals can escape from sin" (Science and Health, pp. 98, 99). May we not well say of this glorious Truth which has already freed us from so much error,—

Thou, O Christ, art all I want;
More than all in thee I find.

K.

Letters to our Leader.

Rev. Mary Baker G. Eddy.

Beloved Leader:—As we have no State-appointed Thanksgiving Day in England, we held our Thanksgiving service on the last evening of the old year. After the Lesson-Sermon had been read, the meeting was kept open for testimonies. So many rose to express their gratitude to God for Christian Science, and to you as its Discoverer and Founder, that it was suggested by a member of the congregation that all present might like to unite in sending to our Leader an expression of our sense of gratitude for her life-work, whereupon the entire congregation of about five hundred people rose to their feet, and the following motion was unanimously adopted:—

"That the congregation of First Church of Christ, Scientist, London, at this their first Thanksgiving service, desire to express to Mrs. Eddy, the Discoverer, Founder, and Leader of Christian Science, their deep sense of gratitude for, and appreciation of, her life-work."

FIRST CHURCH OF CHRIST, SCIENTIST, LONDON, ENG.
C. VIOLET SPILLER, *Clerk.*

Waldorf-Astoria, New York.

Rev. Mary Baker G. Eddy,
Pleasant View, Concord, N. H.

My Dear Mrs. Eddy:—It is nearly two years since I began the study of Christian Science. I have confined my studies to "Science and Health with Key to the Scriptures" rather than relying on class instruction. From the first of my knowledge of this new truth, Christian Science has appealed to me more deeply than anything else. Science and Health has been my daily food,—my meat, my drink, and the atmosphere in which I have moved and lived. Of late I have gone through most terrible troubles, both domestic and physical. It seemed that these troubles and the persons instigating them would crush me,—that my sky had darkened with clouds so grey and cold, so heavy and depressing, that the light of hope could never pierce or rift them.

For darker and darker grew the night
In which my fettered soul was bound.

In this condition my anchor, my hope, and my all, was in Science and Health. I read it, I digested it, I lived in it. Soon the light came to me and I saw as I had never seen before,—my pains and sorrows left me. Physically, I was well as though cured by the divine touch. The detestation I seemed to have for the world passed away and I realized, as never before, Love with its warmth and life; Truth with healing in its wings, freighted with peace, success, and contentment supreme.

For in the darkness of my night
I knew my soul had been released,
And in lieu of darkness now came light.

This truth of God, this love and peace which I realized my study in religion had never brought to me before. This

Digitized by Google

allness and fulness of God's love,—this force and immensity of truth, and that wholly influenced by Love, wholly guided by Truth, showed me that I could not be harmed, that I could not suffer, that I could not sorrow. First of all, I saw that love, truth, good, health, happiness, and joy were mine, and then that I should carry this divine truth to others, which quietly and in my humble way I am trying to do. As a result of my feeble but earnest efforts a minister's wife in this city has been cured and brought to the knowledge of Truth.

I hope that I may be able with all others who see the truth, as you have seen it and spoken it, to carry forward this work,—enlightening the ignorant, lifting up the fallen, feeding the hungry, curing the sick, making happy the sorrowing, wiping away the tears.

I pray that this truth you have taught may grow and spread until it reaches and comforts all God's children. I have received great help and encouragement from Mrs. Lathrop and Miss Young of this city. Will you, my dear Mrs. Eddy, let me send you a heart full of love. Oh what a precious gift you have brought me.

Gratefully and sincerely,
FRANCES FREELAND HAGAMAN.

December 19, 1903.

Richmond, Ind., February 3, 1904.

Dear Mrs. Eddy.

Beloved Leader:—With a heart overflowing with love and gratitude to God, and to you, the Discoverer and Founder of Christian Science, may I ask you to pause for a moment that I may tell you of the spiritual uplifting received while attending the Communion service in Boston last June, and especially while at Pleasant View; an experience which can never be expressed in words.

Material sense seemed hushed, and since then I have been enabled to do better healing, I have had a larger number of instantaneous demonstrations, and realized more clearly than ever before the meaning of the Scriptural saying, "When thou prayest, enter into thy closet, and, when thou hast shut thy door, pray to thy Father which is in secret; and thy Father which seeth in secret shall reward thee openly." I realize that the proof of our love and gratitude must be found in deeds rather than words, and by following closely and conscientiously the path you have so lovingly and patiently mapped out for us.

Lovingly yours,
MRS. ALICE LUMPKIN.

A Forward Step in Helena, Mont.

First Church of Christ, Scientist, of Helena, has found it necessary to look for more commodious quarters, and God has supplied our needs. A lease has been secured of the First Unitarian Church, corner Park Avenue and Lawrence Street, and on January 3, 1904, our first service was held therein. We rejoice in this move, knowing that it is a step upward and onward.

BESSIE M. MARSHALL, *Clerk.*

Progress in Green Bay, Wis.

October 29, 1903, the first ground was turned for the laying of the foundation of First Church of Christ, Scientist. Work has commenced and the foundation will soon be finished. The architect has prepared plans for a church edifice which will have a seating capacity of above three hundred. It is expected to have the church finished during next summer. We are striving to demonstrate the truth as taught and lived by our Leader, and we gratefully acknowledge God's loving care and guidance.

MRS. M. BUNGENER, *Clerk.*

The Board of Lectureship.

THE following is a complete list of the members of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass., with the addresses at which both letters and telegrams can be sent them. Each member of the Board is a lecturer at large and may be invited by any church or Society of the denomination. Lecturers who are also First Readers give only three lectures yearly; and to save them from correspondence it is announced that Mr. Tomlinson and Mr. Miller are First Readers.

Rev. Irving C. Tomlinson, C.S.B., Concord, N. H.

Rev. William P. McKenzie, C.S.B., 1010 Massachusetts Avenue, Cambridge, Mass.

William D. McCrackan, C.S.B., The Pierrepont, 45 West 32nd Street, New York, N. Y.

Frank H. Leonard, C.S.B., 17 Battery Place, New York, N. Y.

Edward H. Hammond, C.S.D., 1901 Linden Avenue, Baltimore, Md.

Mrs. Sue Harper Mims, C.S.D., 575 Peachtree Street, Atlanta, Ga.

Rev. Arthur R. Vosburgh, C.S.B., 23 Triangle Building, Rochester, N. Y.

Carol Norton, C.S.D., Room 310, 6 Madison Street, Chicago, Ill.

Judge William G. Ewing, C.S., 2932 Indiana Avenue, Chicago, Ill.

Edward A. Kimball, C.S.D., Post-office Box 518, Chicago, Ill.

Bicknell Young, C.S.B., 41 Roslyn Place, Chicago, Ill.

Dr. Silas J. Sawyer, C.S.D., Room 462 Masonic Building, Milwaukee, Wis.

Miss Mary Brookins, C.S.B., 925 New York Life Building, Minneapolis, Minn.

Judge Septimus J. Hanna, C.S.D., 1532 North Nevada Avenue, Colorado Springs, Col.

F. J. Fluno, M.D., C.S.D., 1368 Franklin Street, Oakland, Cal.

William N. Miller, K.C., C.S.B., 6 Sumner Terrace, S. Kensington, London, Eng.

The following items taken from the annual report of First Christ of Christ, Scientist, San Francisco, Cal., indicates growth and activity in that field:—

The membership, January 1, 1903, was 204; the present membership is 282. The amount forwarded to the Mother Church Building Fund is $2,135.40. Free literature has been distributed at a cost of $335.38. Two public lectures have been given within the past year at a cost of $426. The free public reading room, maintained by the Church at an expense of $840, has been visited by 4,388 people during the year.

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

Testimonies of Healing.

It has been my privilege to attend Christian Science meetings in many different places, and it is possible that the Field would be interested to hear regarding it.

Many years ago this blessed religion came into my home, and through the study of the Science I have been enabled to apply the rules found in our text-book to the dispelling of all discordant conditions of material existence, from the healing of disease to the overcoming of sin and sinful habits, and now, after fifteen years of investigation while on the road, I am able to say that Christian Science, understood and applied, heals, regenerates, and saves.

I have had the pleasure of meeting many loyal Scientists, and also of attending Sunday service in many places and hearing the grand Lesson-Sermon. It is cheering to know that the same lesson is read in nearly seven hundred churches to-day where but a few short years ago these subjects were studied and pondered by a single individual only,—our divinely inspired Leader, Mrs. Eddy, and the sense of thankfulness fills my consciousness that I am permitted to avail myself of her teachings and that I live in the same age with her, where I not only have her living example of love to impress me with the wisdom and practical value of the Christ Science, but that, in common with thousands, I am able to demonstrate its truth.

A friend said to me some time ago, "It is an easy matter for you to be a Christian Scientist, you are never sick; you are blessed with health; you are prosperous, contented, and happy. Under such conditions I could be a Scientist." I replied, "Do you not know that I have seen sickness and sorrow, want, woe, and misery in all its worst forms? You forget that my wife and myself have 'come out of great tribulation,' and that Christian Science is what transformed us from sickness to health, from sin to righteousness, from discord to harmony. Go thou, and do likewise; embrace the revelation of perfect God, and man, as His likeness, also perfect, and realize the facts of being, that you too may enjoy these blessings."—L. L. M., Chicago, Ill.

I have long felt that I should contribute my mite to the *Sentinel*, which comes every week loaded with messages of love.

I did not accept Christian Science on account of any healing of my own, but after seeing my mother, who was fast drifting toward helplessness with rheumatism, restored to perfect health with only a few treatments in Christian Science, I thought surely this must be the truth as Jesus taught and practised it, and if so it was what I had been longing for.

This was about ten years ago and was the first I had ever heard of Christian Science. We soon got a copy of Science and Health and I began in the right way to see if Christian Science were the truth. I had no thought of studying it for bodily healing; in fact, I did not think I needed it for that, but my soul cried out for something I had not yet found. This book was indeed a key to the Scriptures.

It was not long after I began reading before I discovered that my eyes were good and strong, I could read as much as I wished, and at any time, which was something I could not do before, as my eyes had always been weak. The doctors said they never would be very strong, and that if I did not wear glasses, I might lose my sight altogether. I never gave up to wearing glasses, and now, thanks to Christian Science, I do not need them, my work for the past two years as a railway mail clerk has been a good test. At the same time my eyes were healed, I also noticed that I was entirely healed of another ailment which had been with me all my life, and which was believed to be inherited. Since that time my growth has seemed to me slow, yet when I look back and view myself as I was before Christian Science found me, and compare it with my life as it now is, I can only close my eyes to the picture and rejoice that I have been "born again" and that I have daily been putting off "the old man with his deeds," and putting on "the new man."

Some of the many things that have been overcome through the study of Science and Health, and through realizing and practising the truth it teaches, are profanity, the use of tobacco, a very quick temper which made both myself and those around me at times very miserable, and such thoughts as malice, revenge, etc. I can never be too thankful for what Christian Science has done, and is doing for me, and I can best show my love and gratitude to our dear Leader for giving to me and all the world this blessed truth, by obediently following her as she goes before and points out the way, and by daily, yea, hourly, striving to have that Mind in me "which was also in Christ Jesus."

O. L. RADER, Fort Worth, Tex.

Just four years ago I sought help from one of Mrs. Eddy's students, having been a sufferer of long standing, and I consider it the best move I ever made in my life, because it brought back my physical health, a peace of mind I never knew before, and enabled me since that time to solve every problem and difficulty that has come up in my business, as well as in my home life. When I first called upon this dear friend who has helped me so much, my hope and courage had about given out,—a stomach and bowel trouble of twelve years' standing having worn me out, both mentally and physically. As a result of this siege of sickness, my heart acted very badly; the least physical exertion would bring on palpitation and great mental depression. At times I would have to hold my head to keep it from shaking, I was in such a nervous state. My writing became wretched, and I could hardly hold a pen, as my fingers would become so cramped. I was limited in my eating to a very few things.

These are only a few of the many things that made me wretched up to four years ago, and what I did not have I feared; in fact, I feared everything. I do not think it possible for a human being to have been in a worse condition than I was. My healing was not only a most beautiful one, but a remarkable one. All these troubles have vanished like a dream. To those who are not helped quickly, I would say, Do not become discouraged, but work all the harder to get a better understanding of Christian Science. While my condition was helped from the start, it was some time before I was perfectly healed. Sometimes old conditions would come back, but only to be dispersed again. I rejoice that my healing was not a quick one, because it only spurred me on more and more to learn about this Christ-truth, and now I am so interested in it that I would not give it up for anything. In my household we have had many beautiful healings; three children in the family have never tasted a drop of medicine.

In closing, I would like to mention that the second week I was treated in Christian Science I took off my glasses after having worn them for six years for a bad case of astigmatism. The New York specialist who examined my eyes said I would have to wear glasses all my life for astigmatism. Christian Science disproved this statement, as I have not worn them for four years. To say that I am grateful to Mrs. Eddy for this truth, and to her student who stood by me so faithfully in this battle against error, is to put it very mildly.

BRUNO WEYERS, Brooklyn, N. Y.

It would be difficult for me to condense into one article the many benefits I have received from Christian Science, but I will tell of one demonstration which was to me a beautiful proof of divine protection. Some years ago, when I was on my way to Germany, I became conscious

Digitized by Google

the first day of the passage, of severe pains in my back, also that I was growing feverish and so weak that it was with difficulty that I managed to move about. My thoughts seemed so befogged and my memory so entirely gone, after a few days, that even my Bible and Science and Health conveyed no meaning to me. The one thought that seemed clear was that "God is Love and God is All" (Science and Health, p. 366), and I tried to cling to this precious thought. I went to every meal and was on deck all day. I knew of no Scientists on board and did not wish the error known, for I was sure that those in whose care I was put would insist on medical aid.

When we landed we had cold, rainy weather, and I was obliged to be out a good deal. By the time I reached Dresden, my destination, it was just two weeks since I had sailed and I had not slept a single night, and the error was voicing itself louder all the time, so that those with whom I was staying became rather fearful. I wrote to a practitioner for help, and the next evening as I was retiring, received word that she was working for me. I shall never forget the feeling of peace and love that then came to me. Like a tired child I laid my head on my pillow and slept the entire night. The next day the fever was broken, and in a short time I was quite myself again. Later on my hair came out to such an extent that those with whom I was staying showed it to a doctor and related the case to him. He declared it was a form of typhoid fever, and when he learned that I had had no medical aid, and that I was enabled to be up the entire time, he was more than astonished.

Nothing is as dear to me as Christian Science, and when I think of its infinite blessings and realize how empty existence would seem without it, my heart goes out in gratitude to our noble, loving Leader, Mrs. Eddy, through whose selfless life and patient toil we are enabled to know and demonstrate this truth.

FLORENCE LOUISE FRANK, Brooklyn, N. Y.

[Translation.]

In 1900 I was sick with the grip, a stubborn cough, and other troubles. Medicine did not help me. Then my son came and told me of Christian Science. I said that I did not believe in it but that I would try it, and I let him treat me. I immediately began to improve and before long was entirely well.

Some time later I had throat trouble. I was very melancholy and took no interest in anything. I said that I could not understand English, could not read Science and Health, and I listened to people who spoke to me against Christian Science. A neighbor brought me medicine and urged me to take it, saying that there was no reason why I should not try both at the same time. I took the medicine and besides went to a doctor. I was going at a fast rate toward my grave. Then I gave up the physician and medicine, and waited a whole year. After that I turned to Truth with my whole heart and said that I would unconditionally surrender to divine Love and that I wanted to be healed through Truth.

In two months Christian Science healed me and I thank God and our Leader, Mrs. Eddy, who has brought the truth to us which has saved my life. The Bible is my comfort and *Der Christian Science Herold* is a great help to me, for I cannot read English.

Dark days have come since, but now I know the truth, and the light always dispels the darkness. Words fail me to express my gratitude for this great blessing. I used to think that I was a burden to my family, having always throat trouble or some other disease. Now I am entirely well and know that God can heal every organ of the body.

My daughter had the same disease and my son's child, who was eighteen months old, had spinal curvature and had never been able to stand on his feet. Both were healed in a very short time through Christian Science after they had tried physicians before coming to Truth. Therefore we will give God the glory, and praise His name forever.—C. G., Campbell, Neb.

[Translation.]

With a grateful heart I send in my testimony, hoping that it may help some one else. I wish I could let the whole world know how much good has come to us through Christian Science.

I was raised in the Lutheran faith, yet I could never find what my heart longed for. My questions were never answered. Where and what is God? and where and what is heaven? One day a friend handed me a little book, "Healing through Christian Science," and in this book it was all clearly explained to me, and then I knew that "it could not have been otherwise." O how glorious, how satisfying this was! From that moment on I felt born anew.

My husband had suffered with stomach trouble for fifteen years, had tried many physicians from far and near, also electricity, different baths, etc. Just at that time he returned from a noted physician who had told him that he had cancer of the stomach. While under treatment by this physician he grew worse and then decided to find out what Christian Science could do for him.

After he had treatment for two weeks, he said, "I feel born anew, like a different man, and now I begin to live."

He could eat and drink naturally, and it gave him no more pain. He could sleep well and was contented and happy. Formerly he would eat almost nothing and could not sleep. O how grateful we were, for divine Love was reflected in the whole family!

We then took all the medicine (and we had a great deal of it in the house) and buried it. Now God is our physician, not only in sickness, but in everything that causes trouble. We have since then had class instruction and this has helped us over many rough places. I have also had the opportunity to help others to come into this glorious truth; and I pray daily that I may become a good laborer in God's vineyard.

We are sincerely grateful for all our beloved Leader, Mrs. Eddy, has done, and to all who work faithfully in Christian Science. We can best prove this by our works.

FRAU ALMA KNORR, Granton, Wis.

Six years ago this coming November I laid down my pill-box for the last time and took up the Bible and Science and Health. Six years ago I laid down my little gods that I had been hugging close, and found the only living and true God, and in finding Him, I also found peace, health, and greater happiness than I supposed could possibly be found on earth. Should I go into the details of what Christian Science has done for me, there would be no room left in these columns for other testimonies, but I wish to state briefly that I was healed of ulceration of the bowels of eight years' duration, also of female trouble in its worst forms, from which I suffered everything, and when Christian Science found me I was at the point of death, in fact, my sister-in-law thought I was dying, and ran next door to bring the practitioner with all possible speed. I had always bitterly opposed my idea of what Christian Science was. The hardest of all for me to grasp and hold was the "scientific statement of being," and when, in time, my patient helper tried to convince me of the allness of Spirit and of the bondage of material beliefs, I stoutly declared I knew I did have a material body, and it suffered, too. Then she gently and kindly said, "Now you just hold on to that sense of the body until you find something better." I then saw what a frail reed I was holding to, and I turned from it to the realization of the allness of God, and reaped the benefits of so doing.

From a sick, fearful, fretful woman, I have become strong, well, and happy, finding God a "very present help in trouble," for which I have to thank our dear Leader who has given us the key that unlocks the blessed Bible, wherein we find the "peace of God that passeth all understanding."

The *Sentinel* and *Journal* come to us as very welcome guests, and we can but look back and wonder how we ever lived without them.—Mrs. J. G. Rayner, DeWitt, Ia.

I would like to make a grateful acknowledgment for a demonstration of Christian Science made in our home.

Two children were going to school in a near-by city (Niagara Falls), and upon the way were bitten by a mad dog. After the authorities took it in charge they decided it to be a very bad case. The little girl's father was a physician, and it was decided that he should take the children to New York for the Pasteur treatment, which he did, and returned in two weeks with the children desperately sick.

The boy died a horrible death, the circumstances of which are too tragical to relate. That very day the mother of the little girl received a letter from the physician in New York who administered the treatment, telling her it would be better for her to take her child to a Christian Scientist who might be able to do something to quiet the fear, and he thought that mind had much to do with it.

The little girl, a relative of ours, arrived at our home that night in an alarming condition. We telephoned to Jamestown for treatment, and in three weeks she was out of danger and recovered perfect health and strength, and her fear of dogs was also destroyed.

We had never seen any one in so emaciated a condition as this child was when she came to us. She would not drink water—did not want to see it even. She would lie half asleep for five hours at a time and then spring up and scream, "The dogs! the dogs!" A physician on our street expressed great interest in the case and showed surprise and pleasure at her recovery.

It would be impossible for us to fully express our gratitude to God, to Mrs. Eddy, and to the practitioner who so faithfully worked for this demonstration.

Mrs. Victoria A. H. Parker, Ellicottville, N. Y.

[Translation.]

For fifteen years I had suffered with articular rheumatism, and in spite of all the medical assistance which I had employed from far and near, and the so-called natural method of healing, and home remedies, there seemed to be no help for me. I was almost unable to perform my duties, and feared that I would have to give up my work entirely.

Then some one who had been healed through Christian Science directed me to a lady to whom my relatives wrote for me, asking for help. She kindly directed us to a practitioner, and after the second treatment I was so much relieved that I could do my work and was very happy.

I am convinced that God alone, through the prayer of the Scientist, has freed me from my pain, and now I can perform my duties as formerly.

I am very grateful to Christian Science for the help I have received.—Frau Andrich, Dresden, Ger.

My second boy was tongue-tied, and my friends and the physician thought he never could talk plainly. I brought it to the attention of a friend and asked for Christian Science treatment, and the difficulty was entirely overcome.

He is now only three years old, yet he articulates as clearly and distinctly as any child of that age that I have ever known.

While I am not a Christian Scientist I am glad to acknowledge the good it has done in my family.

Mrs. Clifton J. Melrose, Jamestown, N. Y.

After many years of invalidism during which all the means known to *materia medica* and surgery were tried without any good result, I turned with little hope and only as a last resort, to Christian Science. To my surprise and delight I found myself gaining in health and strength from the first treatment. The healing was not immediate but required some months of treatment before I was restored to perfect health, though the time seemed short to me after the weary years of discouraging results with physicians and surgeons.

I naturally became deeply interested in a remedy which had so wonderfully met my great need, and I soon found that the physical healing was the very least of the many blessings which Christian Science had to offer me.

I have not only been in perfect health for over eight years, but this blessed truth has taught me how to live, to love my neighbor as myself, and to seek and find in practical, every-day results the heaven our great Master told us was a present reality.—J. M. B. H., Buffalo, N. Y.

When I read the article in the *Sentinel* for June 20, 1903, where Mrs. Eddy brings up the thought, Who shall be just? I thought, with what gladness I could join the happy throng who are proclaiming all over the land their gratitude to the Discoverer of Christian Science by which the healing gospel proclaimed by Jesus of Nazareth is brought to us.

While so many are telling of the wondrous benefits they have received from its healing power, it is with deep gratitude that I thank Rev. Mary Baker G. Eddy for the blessings it has brought to me.

Before I had the privilege of reading her writings I was wearing glasses to enable me to do work that called for good sight; after reading Science and Health, I said, If that book is true, I do not need my glasses. The proof followed. I can work without them.

Miss Lucy Keen, Plainfield, Ill.

I wish to express the deep gratitude I feel to Christian Science, and also to add my testimony as to the physical healing I have received. When I first inquired into this important subject I was suffering from neuralgia, and the doctor who prescribed for me had in vain tried to cure the very severe pain. I had Christian Science treatment and the trouble disappeared in a few days. Indigestion, influenza, and other ills have also been healed by treatment, and I am very grateful to the Scientists who have so patiently helped me. Our gratitude to Mrs. Eddy is in proportion to our realization of the infinite beauty of the truth she has given to the world. It is indeed a pearl of great price.

L. B. L., Brighton, Eng.

I wish to bear witness to the healing of my son. The doctors in Buffalo said he had inflammation of the eye-ball, and that one third of his sight was gone.

There was a spot upon the right pupil that the physician said would never go away, and that there was danger of the entire pupil disappearing.

I went to Jamestown and procured Christian Science treatment, and the sight has been entirely restored.

Mrs. W. F. Stetson, Cherry Creek, N. Y.

When I first asked assistance in Christian Science, two years ago, I was suffering from inaction of the bowels. Remedial and mechanical means had ceased to give relief,—inaction from ten to twelve days occurring. The treatment resulted in entire relief which has been lasting.

I have also experienced relief from other conditions which were thought serious, and I take pleasure in acknowledging the good that has been accomplished.

David B. Parker, Ellicottville, N. Y.

From our Exchanges.

If the garb of profession and mere doing good to be seen of men were removed, and all concerned were to appear as they are in the sight of heaven, it might be found that the criminal who stands behind prison bars is far less a thief than many a respectable church-goer who sits in a luxurious pew. The prisoner is a thief before men, but he may be forgiven by the Lord. The crime may have been committed under exceedingly trying circumstances, and may be external to his real self. He may condemn himself on account of it. He may not sanction it in his heart in the least. It may not be in his ruling love at all. But the thief in the sight of God is so intentionally, in his heart. He may not have appropriated money, but he is really no better than the one who has, because he has in his heart that principle which would lead him to do so if it served his purpose. The natural man is too dull to understand this. He thinks that if he is outwardly respectable it is all that is required.

E. D. DANIELS.
New Church Messenger.

The transgressor's life is hard in its deprivations. The question is sometimes raised whether the sinner does not, after all, get more out of the world than the true disciple. He who has turned from evil to live with God never raises that question. He knows that the earth, without peace of heart, without joy in right and sympathy with good, without the happiness of God's presence and delight of service, is a hard and narrow and unhappy place. The true and full inheritance of the earth belongs to the children of God, and to no others.

Far back, also, in every transgressor's consciousness lies the hard trial of self-contempt. He may not admit it to his thought. Conscience may be ill-educated and under careful discipline; but in the moments when he sees clearly, the sinner is self-judged. God has let us sit upon the seat of counsel, and we see what value we have put upon our souls in bartering with evil.—*The Congregationalist.*

The "good old Gospel" is not what this or that man, in some past age, or all the preachers of all the ages together, proclaimed, but what our Lord and his disciples, and Paul and other of the New Testament writers declared to be the "good news of the kingdom." It is to them, not to their fallible interpreters, that we should go with humble and prayerful hearts for illumination. Not that the research and learning and pious exposition of good men, diligent students of the Word, in past centuries should be despised; but "the good old Gospel" is the gospel of the New Testament, and to that divine source of inspiration and knowledge we should constantly return. It alone is the touch-stone by which to test the genuineness of all attempted interpretations of it.—*The Examiner.*

Religion is meant to direct conduct, and the smallest affairs of life are to come under its imperial control, and the only way by which a man can get any good out of his Christianity is by living it. It is when he sets to work on the principles of the Gospel, that the Gospel proves itself to be a reality in his blessed experience. It is when he does the smallest duties from the great motives, that these great motives are strengthened by exercise, as every motive is.—ALEXANDER MACLAREN, D.D., Litt.D.
The Homiletic Review.

I believe in God as the source of all love, so that wherever there is love, there God is.

PROF. CHARLES PROSPERO FAGNINI, D.D.
The Independent.

THE CHRISTIAN SCIENCE TEXT-BOOK.—Science and Health with Key to the Scriptures with latest revisions and additions, and numbered lines. 700 pages.

For description, price, and other information, see last page of cover.

THE NEW CONCORDANCE.—A complete Concordance to Science and Health with Key to the Scriptures. This work has been compiled from the late revised edition of SCIENCE AND HEALTH, and contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10x7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

CHURCH MANUAL.—Containing the By-Laws of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. This does not include the list of members. Price, prepaid, $1 per copy; $5 per half dozen; $9 per dozen.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America.

It contains about thirty-eight pages of reading matter, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, each, prepaid 5 00
Twelve or more to one address, each, prepaid . . . 4 75

Levant, divinity circuit, leather-lined, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, wide margins, each, prepaid 6 00
Twelve or more to one address, each, prepaid . . . 5 75

Orders for Science and Health, in lots of twelve or more to one address, may include any or all the different styles of binding.

A COMPLETE CONCORDANCE to Science and Health with Key to the Scriptures, 595 pp., 10 x 7. Bound in cloth, marbled edges. Price, single copy, prepaid . . $5 00
Twelve or more copies to one address, each 4 50

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.
Price (cloth), each, prepaid 2 25
Twelve or more books to one address, each, prepaid 2 00

Morocco, limp, round corners, gilt edges, convenient for pocket, each, prepaid 4 00
Twelve or more to one address, each, prepaid 3 75

Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, each, prepaid 5 00
Twelve or more to one address, each, prepaid . . . 4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

(THE CHRISTIAN SCIENCE WEEKLY)

PUBLISHED EVERY SATURDAY BY

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

250 Huntington Avenue, Boston, Mass., U.S.A.

ARCHIBALD McLELLAN, Editor-in-chief. JOHN B. WILLIS, Second Editor.

ANNIE M. KNOTT, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

Emperor William dined with United States Ambassador and Mrs. Tower on the 11th inst. Among the guests were George von L. Meyer, United States Ambassador to Italy, and Mrs. Meyer, Melville E. Stone, Dean B. Mason, United States vice-consul general in Berlin; Albert Ballin, General Director of the Hamburg-American Line; Henry Wiegand, General Director of the North German Lloyd Line, and the members of the staff of the American Embassy there and their wives. The diplomatic corps at Berlin regards his Majesty's presence at this dinner as a compliment to the United States, and that it is intended by His Majesty to be an unusual indication of the high position Mr. Tower has attained as ambassador to Germany.

President Eliot of Harvard University on the 7th, by previous request of the Central Labor Union of Boston, addressed a large audience representing organized labor on the question of trades unionism at Faneuil Hall. His prepared paper occupied an hour, and then for about an equal time he answered questions that were submitted by delegates. The feeling of distrust, uncertainty, and tension that pervaded the atmosphere at the beginning entirely changed as the afternoon wore on and the speaker, though speaking fearlessly, won the good will of his audience, even though he did not win them to his views. A hearty vote of thanks was tendered him at the close.

The attitude of the Board of United States General Appraisers toward pulp wood imported from the province of New Brunswick, Canada, has been clearly defined by Judge Somerville, who has just handed down a decision that no countervailing duty should be levied on pulp wood coming from that province. The controversy over this duty has attracted much attention among manufacturers.

Specific instructions have been cabled Rear Admiral Wise, commanding the training squadron in Dominican waters, regarding the protection of American shipping interests there. This action was taken as the result of the firing by a Government gunboat on lighters attempting to land a part of the cargo of the Clyde line steamer New York.

Harvard College Observatory has issued, in line with recent proposals for fuller cooperation among various observatories, two announcements recommending uniform observations of the planet Iris and more extended observations on various stars of long period.

The St. Louis loan of $4,600,000 for the Louisiana Purchase Exposition has passed the House by a vote of 161 to 95.

Foreign.

Negotiations between Japan and Russia looking to a peaceful adjustment of the differences between the two Powers failed, and war has been declared. United States Secretary Hay has issued an identical note to the European Powers, Germany, Great Britain, and France, suggesting their co-operation in requiring both Japan and Russia to confine the conflict to Manchuria and Korea and avoid Chinese territory. Great Britain has already consented, Germany has expressed her approval of the note, and France will undoubtedly reply favorably. China has declared herself to be neutral, likewise the United States and France. Both Japan and Russia requested the neutrality of the United States.

Japan has acted with characteristic vigor and efficiency, has made an attack upon Port Arthur and occupied Masampo.

The net result of the first week of hostilities, according to official reports, is that about forty per cent of the Russian war vessels have been put out of service temporarily, a considerable force of Japanese has been landed in Korea, and Russia has been put everywhere upon the defensive.

Attorney-General Longley, head of the Crown Land Department of Nova Scotia, has introduced an important measure in the Legislature providing for the protection of forests from fire. The loss last summer was estimated at over a million dollars. The new bill provides for the appointment of a chief forest ranger for each county in the province. He will be paid a fixed salary and will have the power to appoint as many deputy rangers as will be required to patrol the timber limits. The cost of the patrol service will be borne jointly by the timber owners.

Governor Dole in his annual report on Hawaii says, "At this rate, unless there should be a larger immigration of American settlers than now seems probable, the present numerical inferiority of those who may be classed as belonging to the Teutonic race as compared with the Hawaiians, will in a few years become a still greater inferiority as compared with the then American citizens of the Hawaiian, Portuguese, Japanese, and Chinese races."

Speyer & Company of New York have contracted to take the thirty-five million dollar Cuban loan. The price to be paid for the bonds is 92, two per cent above the minimum.

Reports are current in German military quarters that Russia has declared a protectorate over Tibet.

Industrial and Commercial.

The Department of Commerce and Labor of the United States, through its Bureau of Statistics, shows that the exports from the United States to Europe have grown during the period 1893–1903, from $680,000,000 to $1,087,000,000, or sixty per cent; those to North America from $125,000,000 to $227,000,000, or eighty-one per cent; to South America from $34,000,000 to $46,000,000, or thirty-five per cent; to Asia and Oceania from $31,000,000 to $92,000,000, or 197 per cent; and to Africa from practically $5,000,000 to $31,000,000 or 489 per cent; while the growth in total exports has been from $876,000,000 in 1893 to $1,484,000,000 in 1903, or sixty-nine per cent.

The import side shows a growth from Europe from $392,000,000 in 1893 to $528,000,000 in 1903, or 25 per cent; from North America from $171,000,000 to $182,000,000; or seven per cent; from South America from $103,000,000 to $113,000,000, or nine per cent; from Asia and Oceania from $102,000,000 to $161,000,000, or 58 per cent; and from Africa from $4,000,000 to $11,000,000, or 175 per cent; while the total imports show a growth from $776,000,000 in 1893 to $995,000,000 in 1903, or 28 per cent of increase.

On the basis of the average price of coal for January the miners in the anthracite region will receive for that month an advance of seven per cent over the April basis. The average price was $4.85 and the base price is $4.50 per ton. For every advance of five cents above the base, the miners, in accordance with the finding of the Anthracite Coal Strike Commission, receive one per cent advance in wages. They received the same advance in November and December.

An enthusiastic meeting of the American Road Makers was held last week at the Capitol Building in Hartford. Great interest was manifested in the meeting. Credentials were received from 1,129 delegates, representing twenty-nine States, and 670 were personally present. Papers were presented showing the progress made in various States.

The Boston Associated Board of Trade has adopted a resolution requesting the New York, New Haven, and Hartford Railroad to change its business, if not its legal, name to the New York and Boston Railroad. The other name is considered too long for business convenience.

The total gross railroad earnings for 1903 aggregated $1,755,678,836, showing the largest increase on record, $182,099,849. The railroads upon which the reports were made aggregated a mileage of 172,788 miles.

The Census Bureau estimates the amount of cotton ginned up to January 16 as 9,859,277 commercial bales. There were in active operation 30,171 ginneries.

Another cargo of eggs from Germany, amounting to two thousand American cases, or sixty thousand dozen, has arrived at New York.

General.

Statistics compiled by the Pension Department of the Pennsylvania Railroad, show that in the four years the organization has been in operation, $1,224,087 has been expended for the relief of those entitled to consideration. These expenditures do not include the cost of the department's operation, which is paid by the company.

In the four years' operation of the pension plan, 2,126 employees have been retired as pensioners from the active service of the company. Of the total number retired, 426 were between the ages of sixty-five and sixty-nine years, 348 were retired upon their own request and with the approval of the employing officer.

The management of the Uffizi Gallery has discovered eight cartoons upon which are a score of sketches and studies by Michael Angelo. The studies include two nude figures supposed to have been intended for two of the twelve apostles he wished to paint in the Sistine chapel, and two groups of figures used in his "Deluge" in the same chapel. There are also architectural sketches.

Wages in the United States on the average, says an exchange, are more than twice those in Belgium, three times those of Denmark, France, Germany, Italy, and Spain, and one and a half times those in England and Scotland.

The words of a Macedonian war anthem have been set to the tune of Yale's "Boola" song.

Between May 15 and October 15, 1903, Switzerland registered 152,553 tourists.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

From our Contributors.

"Strong Reasons."

MARY TROXELL.

WHILE much has been said concerning the financial question as related to Christian Science, I wish to give my individual testimony of benefits received in return for certain sums paid for literature, healing, and instruction. The spiritual and material cannot be weighed in the same balance, nor can material sacrifices, so-called, be counted against the gains God gives, yet it is sometimes well to consider these things.

My first expenditure was three dollars for a cloth copy of "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy. In the first reading of this book, I was turned from a growing tendency towards atheism to an assured faith in God as demonstrable Principle, and to a conviction of the truth of Christian Science which has never been shaken; from drugs and discouragement, which were all that *materia medica* could offer, to a mighty hope of help and healing. My faith in prayer and the Bible, which had been deadened by doubt and dogma, was restored on a basis of spiritual understanding, and the life and miracles of Christ Jesus were illumined. Can the value of these things be weighed or measured?

For class instruction I paid the usual fee. In return I received systematic, thorough teaching in class, and supplementary instruction in students' meetings; years of patient, tender care and counsel in personal problems and aid in treatment when in physical need, for Christian Scientists do not claim to reach at once a perfect realization of physical or mental harmony, but are grateful for the gradual overcoming of persistent disease and obstinate conditions of sin and error. I had also the privilege of going to my teacher for advice in emergencies, or in difficult cases, and in these various ways was enabled to gain for myself a clearer knowledge of the practical application of the Science of Mind-healing for the benefit of others. From the time of my first work in practice, I was also enabled thereby to earn some means towards self-support, which became in time sufficient to meet my obligations and privileges towards our beloved Cause, and thus I received back again many times over the cost of my own tuition.

For modest sums paid for treatment at different times, I have been relieved, sometimes in a single treatment, of agonizing suffering for which no alleviative had ever before been found, except a stupefying drug. I was healed at one time of an acute heart attack; at another, in one week, of a form of nervous prostration brought on, in belief, by over-work, from which I had become so weak that I could scarcely walk across the floor; at still another, in two treatments, of a badly ulcerated tooth which had produced swelling, inflammation, and intense suffering; these and many other instances, of which space forbids mention, give proof of the sustaining and healing power of Truth under trying and unusual circumstances.

I have paid, in times past, large amounts for the services of regular physicians and specialists, including consultations with oculists; from all of which I received but little relief and no permanent benefit.

For small contributions to our lecture funds, I have invariably received from the lectures large spiritual gains,—a higher understanding of the Fatherhood of God and the brotherhood of man, and an enlarged perception of the nature and scope of Christian Science work.

For years it has been my privilege to subscribe to our regular periodicals, the *Christian Science Sentinel* and *Journal*, and with unfailing regularity these faithful messengers of Truth have followed me from place to place, bringing words of cheer in dark hours, and inspiring thought in time of need,—best of all, delivering promptly and correctly the tender messages of love and wisdom from our Leader. My home would not seem like home without these familiar friends always on my table, and extra copies are always at hand for any thirsty soul coming to my door who will receive them.

Christian Scientists gladly and gratefully lend their support to their church homes and find there resting-places for quiet thought and communion with their God. I have invariably received at each Sunday service a new revelation of spiritual truth in the Bible Lesson-Sermon, and many times mental and physical healing at the Sunday and Wednesday evening services.

A By-law of the Mother Church provides for a yearly per capita tax from each member; each year when I send this small offering I pause a moment to consider anew my relationship to this church and feel that another gleam of infinite Love is realized.

Of the rich, unnumbered blessings which have followed whenever we, as a body, have been called upon to work for, or contribute to the Building Fund of the Mother Church, I can but say that they are priceless and precious. When we begin to count our spiritual blessings, they appear indeed as the stars of heaven for multitude and glory.

As each "heart knoweth his own bitterness," so in God's work "a stranger doth not intermeddle with his joy." The peace God giveth none can take away, and His joy abideth forever.

Imagination vs. Illusion.

LUCY HOLTZCLAW.

THERE are many familiar examples that emphasize Mrs. Eddy's statement in "No and Yes," page 12, that "Disease is more than *imagination;* it is a human error, a consistent part of what comprise the whole of mortal existence,—namely, material sensation and mental delusion."

The child imagines the stick he rides about the yard to have the qualities of a horse. The plan a man has in mind of a house, and the product of all inventive genius may be explained by what is called the power of imagination.

I sat in a car recently that was not moving; through the window at my left another train was moving backwards. My eyes said, We are moving forward, and as far as the evidence of the senses was concerned we were proceeding on

Copyright, 1904, by Mary Baker G. Eddy.

Digitized by Google

our journey. By looking out of the window at my right, I saw that we had remained absolutely still. This was not imagination; it was illusion,—the car was there and I was sitting in it, a train of cars was outside and it was moving, only the material sense of eyesight presented an illusion that exactly reversed the facts and made me believe something was true which was not; and until some proof came that was higher than that of the eyesight, I could but believe the falsity. We do not imagine the sun to move across the heavens—we have built up no new concept of the sun; what the senses say about it, however, is just the reverse of the scientific fact.

The ancients did not imagine the earth to be flat; obedience to the false testimony of the material senses made them believe the opposite of what has since been proved the fact; they were under an illusion or delusion. Delusion deals with unreality, that which does not exist nor cannot; when the truth is known about any illusion, it disappears.

We may imagine God to be a patriarchal-looking man, as I did once, seated on a throne, and sending disease or death or famine, riches or peace, as He was propitiated or not. Such a concept is built on the false notion that God is not Spirit and Love, and therefore it is the product of illusion.

To the material senses we live in material bodies, but all that the material senses say is false, though some of its falsities are not so seemingly apparent as others. It is the spiritual sense that detects and reverses these falsities. The man did not imagine his hand to be withered, though to the material sense of life it was so. Jesus' spiritual sense reversed the false testimony and restored the hand whole as the other.

When we attain to spiritual sense, when we know the truth, then we see the whole false fabric of the material senses, the delusion, in all its nothingness. To prove day by day the falsity of illusions is the work of the Christian Scientist.

Overcoming Fear.

LOU MORSE EARLE.

IN "Science and Health with Key to the Scriptures," and in all the other writings of Mrs. Eddy, there is nothing more frequently pointed out than that fear is the source of nearly, if not all, human woes, mental and physical, and that, in the understanding of this most important truth and the overcoming of fear, lies their destruction.

There is no material influence that so dominates and enslaves mankind, whether civilized or uncivilized, ignorant or cultured, old or young, as this fear. It is so incorporated into human nature that we are not fully cognizant of the extent of its subtle influence over mind and body until, through the teachings of Christian Science, it is uncovered to us, and then we begin faintly to comprehend the magnitude of the work before us in becoming so perfected through divine Love that all fear is eliminated from consciousness.

When we have made even a small beginning in this direction we are able to rejoice in some freedom from its enslavement, for we invariably find that each time we succeed in allaying fear of any nature through the application of the truth we have learned in Christian Science, we have also stilled the mental or physical turmoil it produced.

Recently I was able through steadfastly holding to the omnipresence and protecting care of divine Love to make so perfect a demonstration over fear (that without my understanding of Christian Science would have distracted me), as to elicit the remark from those who witnessed my composure, "I would never have believed it possible for you to be so calm and quiet, I am amazed," and none of the physical manifestations that used to follow such intense mental strains were present.

With each added proof or "sign following" we are encouraged to press on step by step to the final triumph of Truth and Love over every degree and form of fear. We see it so constantly manifested and hear it so universally expressed in such varying forms and degrees as to make us realize the imperative necessity for prompt and thorough work on the part of all those who have the understanding and ability to cope with it scientifically, and each one of those should rejoice in the possession of this understanding, knowing, as they do, that in so far as they overcome for themselves, they aid in the final and total overcoming for all; since "whatever blesses one blesses all" (Science and Health, p. 206).

Probably there is no one who does not realize the truth contained in the words of St. John in his first epistle that "fear hath torment," and who has not had that statement verified in his personal experience. Equally true and verifiable is the statement in the same verse, "There is no fear in love; but perfect love casteth out fear." It is evident from the tenor of these statements that Love is the antidote for fear, and that on this basis alone can it be overcome; therefore to be rid of the torment of fear we must be ruled by Love in every thought, thus displacing thoughts of fear. Mrs. Eddy quotes this same verse, "He that feareth is not made perfect in love," and says, "Here is a definite and inspired proclamation of Christian Science" (Science and Health, p. 410). This sets forth the fact that Christian Science also teaches us to overcome fear on the same basis and by the same means; viz., by being perfected in Love.

An Important Question.

IRA C. HUBBELL.

SECULAR as well as religious history records innumerable instances where man has asked the question, "What shall I do that I may live?"

Many persons have essayed to answer this very important inquiry, and, strange to say, few relatively have been willing to accept the only clearly intelligent answer that has ever been given.

The Bible is accepted by all professed Christians as an inspired book, in which the will of God is transmitted to men in terms that they can comprehend. Throughout the Bible we are taught that all wisdom, understanding, creative force, and manifestation are in God and are of God, and yet men pass their years groping in darkness and refuse the light, because it is not manifested in keeping with their circumscribed determination to cling to effect rather than to seek causation. The teaching of Jesus the Christ pointed ever to causation, to the absoluteness of God, and he persistently adhered to the invariable law of spiritual cause and effect. Jesus overcame all false sense of manifestation through his knowledge of the only real causation, and demonstrated the truth of his declarations by his works; but men have been entranced by the effects of Jesus' teaching rather than impelled to action which is in harmony with his teaching.

This great question was asked of Jesus by one who said, "Master, what shall I do to inherit eternal life?" Jesus answered, "What is written in the law? how readest thou?" The inquirer replied, "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind; and thy neighbor as thyself." Jesus' response is a remarkable one: "Thou hast answered right: this do, and thou shalt live." Love God with all your energy, all your power, all your might, all your thought, all your heart, and your neighbor as yourself. This will give eternal life.

At another time Jesus said, "I am come that they might have life, and that they might have it more abundantly."

And again he said, "This is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent." These are remarkable sayings.

Digitized by Google

Suppose you went to some noted man to-day and asked him what you should do to have continued happiness and good health. Quite likely he would tell you that you should take a cold bath every morning, not eat any breakfast, take long walks, join a gymnasium, be very careful not to sit in a draft, go to bed early, and avoid getting the feet wet. He might also commend some medicine. What would Jesus answer? This,—Love and obey God absolutely.

Our difficulty in doing this lies chiefly in the fact that through a false conception, reception, and understanding of Jesus' life, teachings, and works, we have not accepted the truth that if a man love and serve God only, as did Jesus, through divine power and intelligence he can do the works of the Master.

The Bible records that the early followers of Jesus healed all kinds of sickness, overcame and destroyed all kinds of evil, and even raised the dead. Paul, Peter, James, and John passed their days teaching and doing these things. Their writings left to us tell of their demonstrations of the power of Truth to destroy all forms of error, and it is a logical conclusion that we can take Jesus at his word when he says, "Verily, I say unto you, He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father."

A conscientious study of the Bible as interpreted in Science and Health by Mrs. Eddy, will bring the truth-seeker a solution for every problem that in any way concerns man, for Christian Science brings into consciousness a spiritual understanding that enables us to read the Bible intelligently and to apply its truth in our daily lives.

The writings of the Discoverer and Founder of Christian Science, have taught me of God, as have no other works, and through this teaching my former sense of mystery, darkness, and superstition, and my lack of understanding is being removed, and I am daily learning that "Godliness with contentment is great gain," that "the kingdom of God is not meat and drink," and what Jesus meant when he said, "The kingdom of God is within you."

The Child and the Dragon.

HELEN L. SWASEY.

SEVERAL years since, there appeared in an English periodical, a very striking print of a picture then on exhibition in Europe.

It represented a dragon; not the conventional type so well known in schools of art, with the head of a man, but a dragon that was all animal. Its monstrous head with protruding eyes was only excelled in ugliness by the thick body, upon which the skin lay in hide-like rolls.

The figure of the dragon formed almost a complete circle, with only a narrow space between the head and the tip of the tail, and in the center of this ring thus formed stood a little child of rare beauty, clad in white garments, with uplifted face, utterly unconscious of danger. The space in the incomplete circle was just wide enough for the little feet to pass out.

The object-lesson depicted by the artist is indeed applicable to these days, when the "besetments of evil" portrayed by the dragon, apparently surround us on every hand; but through the teaching of Christian Science the way has been shown us, "strait and narrow" yet wide enough for our feet to pass out from the animal circle, this illusion of life in matter, this self-mesmerized condition of thought, into the glorious understanding of the reality of Life as God, which reveals the utter falsity of its "supposititious opposite." The most beautiful and touching feature of the picture, was the calm confidence of the young child in the very midst of the seeming evil about her, protected as she was by the innocence and purity which were symbolized by her white garments.

Experience bids me state that I have been delivered from the subtlest "foes, within and without," by steadfastly intrenching myself in the rock-like certainty that Christian Science is the revelation of God to this age, and by knowing that obedience to the statutes of Divine Science contained in the Manual of the Mother Church, and faithfulness to the admonitions of our Leader will bring us into the "promised land" of holy living and freedom from the fetters of conventionality with all the disappointing delusions expressed by that one word, materialism.

"He that overcometh shall inherit all things, and I will be his God, and he shall be my son."

"Inexcusable."

GEORGE L. BRETT.

THIS one word "inexcusable" has without doubt saved me much suffering since trying to live, think, and act up to my highest understanding of Christian Science.

The time was that, as a business man, it seemed to be a duty to inform my customers of the failings in my competitors or in their merchandise, thinking I possibly might profit by so doing. My thought, through the teachings of "Science and Health with Key to the Scriptures," has entirely changed. I now *know* that if *I* think and talk wrongly I am bringing upon myself suffering. "Whatsoever a man soweth, that shall he also reap." Love, the divine Principle of all true being, is the power, source, and creator. So long as our thought is not in harmony with divine Love and Truth, there must be error in the result or manifestation.

When my attention was drawn to the words of Paul: "Therefore thou art *inexcusable,* O man, whosoever thou art that judgest: for wherein thou judgest another, thou condemnest thyself; for thou that judgest doest the same things," it was just what I needed,—there was no alternative, and the thought came to me, How can I expect harmony when fearing and thinking of failure?

The words of our Leader in "Miscellaneous Writings," have helped me very much, where she asks (p. 104), "How shall we reach our true selves? Through Love." No doubt we shall reach our true selves when we see man as God sees him. Our Saviour, Christ Jesus, by word and deed showed us the way. Through mortal selfishness and ease in error the way became darkened, until again, through love to God and man, our Leader, Mrs. Eddy, has brought to suffering human sense the word of Life, Truth, and Love, that he who will may profit thereby.

Following the Pattern.

J. E. FELLERS.

AN understanding of tapestry making furnishes a good lesson. The pattern hangs above the heads of the weavers. They study and watch it closely while their hands guide the shuttle and control the warp and woof. It is an interesting fact in connection with this work that the weaver cannot at any time see the right side of the tapestry until it is completed. "He can only weave and wait." He knows, however, that by studying the perfect pattern which hangs above him and by applying the rules which he has learned, he will give to his employer an exquisite handiwork when the web is loosed and the right side is turned towards the light.

In making our demonstrations in Christian Science, the physical senses present the wrong side of things and we seem to be working on that side. However, by holding steadfastly to the teachings of Science and Health, and working with understanding, the Christ idea, which is the perfect pattern, will be manifested, and we shall hear the "still small voice" whisper, "Thou hast been faithful over a few things, I will make thee ruler over many."

Selected Articles.

Healing the sick is not the ultimate aim of Christian Science. It is merely one of the necessary steps in the growth of the spiritual man. Jesus healed the sick and Christian Scientists follow Jesus, but Jesus nowhere gave out the thought that this included the whole of man's growth. Christian Science traces all discord,—all sin, sickness, and death,—back to its ultimate cause, lack of understanding of God. God is omnipotent, good, the cause of all that really exists, and on this basis Christian Science denies the reality of disease. We have schools and spend millions to overcome ignorance in our children. Has ignorance a real existence? No. It is merely an absence of truth, which has real existence, and which the Psalmist says hath a price above rubies. To a Christian Scientist, it is not logical or conceivable that God created disease, and since He did not create it, it has no real existence, but is merely a false conception manifested on the body. It is classed with ignorance which clearly has no inherent reality, being merely the absence of truth.

It will thus be seen that the basis and practice of *materia medica* and Christian Science are wholly at variance. *Materia medica* looks to material means for help in time of sickness; Christian Science to God alone and discards all material aids. *Materia medica* looks to the effects as manifested by the body and attempts to remove these by material remedies. Christian Science looks beyond and sees the fundamental error in the mortal thought which controls the body, and by the enlightened understanding gained from the study of the Bible and Science and Health overcomes the causes through prayer, and thus the effect disappears.

EZRA W. PALMER.
The Critique (Denver, Col.)

The greater part of a Christian Scientist's practice is with those who have spent the most of their lives, and generally all their cash, in treating with the drug system, and have finally, and as a last resort, turned to Christian Science, with perhaps a faint hope that something might be done to relieve their suffering.

Christian Science is doing much towards the uplifting of humanity which is known only to the beneficiaries and their immediate friends. This regenerating work includes the healing of sickness, intemperance in all its phases, dishonesty, hatred, malice, and their attendant evils; and the method employed, which is Christian Science practice, is scientific. Christian Scientists cannot truthfully be charged with neglect. No class of practitioners takes into consideration the conditions, mental or otherwise, which surround the patient, as do the Christian Scientists, and none work with more vigilance to relieve their patients from suffering and restore them to health; and the reason for their success is to be found in their perfect basis.

The application, however, is not always made with understanding, and therein lies the possibility of failure. All we ask is that we shall be judged by results as a whole.

A. V. STEWART.
Rockford (Ill.) *Republic.*

To the Christian Scientist, the proof that the inspired Word is contained in the Scriptures, is the inspiration he is experiencing in his daily life. The "breathing into" imparted by the Holy Comforter, the ever-present Christ, is unfolding within him a spiritual uplifting, destroying the demands of the carnal mind and its desires, and illumining the sacred pages of the Scriptures as they brightly mirror every experience of his individual life.

It is wonderfully refreshing to hear a minister boldly assert that inspiration is experienced to-day as throughout past ages. Such a man can better understand and appreciate the position of Christian Scientists toward their Leader, the author of their text-book. The mistake, which he comes near committing, is inferring that Christian Science is considered by its devotees as a special dispensation rather than recognizing that through years of suffering and purifying trials, disappointed by and weaned from reliance on material sense, Mrs. Eddy became receptive to the inbreathing spiritual sense of the Scriptures, and lovingly gave it to a waiting world.

NORMAN E. JOHN.
Wilmington (Del.) *Star.*

I think we shall all agree that the evils of earth, though mountains to mortals, have no weight in the sight of omnipotent God; and it is in this light that Christian Science declares the impotency of evil. It deals with sin by overcoming it, and this because there is nothing in it,—no profit, gain, or benefit; and, therefore, mortals must cease from it in order to be something, that is, be men.

If all mankind understood and applied the Christian Science teaching that an individual is a man only in proportion as he departs from evil, there would be no sin and no sinners. Men do wrong because they believe there is something in it, not because they believe there is nothing in it; and it is certain that the conduct of every man who reforms is in keeping with the doctrine that there is nothing in wrong, whether or not he be governed by a conscious adoption of such a theory.

ALFRED FARLOW.
The Boston Herald.

While Christian Science maintains the truth of Jesus' statement, "If a man keep my saying, he shall never see death," and of its Pauline correlative, "The last enemy that shall be destroyed is death," it does not maintain that, according to human experience, there is no death. Christian Scientists claim no authority or ability in advance of other Christians in the keeping of those Gospel requirements which are incumbent upon every professed follower; but they have, in a measure, proven that resistance to the discords, worries, and distresses which ultimately lead toward death, and the dwelling in confidence on the promises of divine protection and eternal spiritual life, gives greater peace and health to-day, and less fear of and inclination toward this last enemy.

DAVID B. OGDEN.
The Oregonian.

Correction.

In Mr. Verrall's article on page 371 of last week's *Sentinel*, copied from the *New York Tribune*, full names and titles should have been given as follows: Rev. Richard S. Rust, D.D., and S. B. G. Corser, A.M.

The Quarterly.

In the current *Quarterly*, page 27, Sect. III., the Science and Health reference, 539—7 to 12 should be omitted. Page 34, Sect. V., the first Bible reference should read Deuteronomy, 33 : 27.

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

Among the Churches.

The Work in Mexico City.

At our regular annual meeting in December, 1903, the president's report showed a marked advance during the year. I give you a few extracts therefrom.

The Society, which had been organized two years before, was constituted First Church of Christ, Scientist, in December, 1902, about six years from the time the first healing was done in the capital.

The church gave its first lecture in March, 1903, from which much good was derived. It was then getting ready for its second lecture, which was given January 21, 1904. October 15, 1903, services were commenced in the Spanish language, being held on Sundays at 10 A.M., just preceding the English service at eleven o'clock.

The Sunday School has been made a special feature ever since the work was planted in this field, and the classes have grown right along. The children are very receptive of the truth and try to apply it when they can, giving some very good demonstrations in class on Sundays. When the church was organized in 1902, they gave a handsome Reader's desk to the church, and they aid the Cause materially in donating literature to the circulating library. This library is an important department of the work. We have five copies of Science and Health, kindly donated by various friends, which we loan to those interested, and much good has resulted therefrom, as also from the loaning of other works of Mrs. Eddy.

Our Publication Committee has done efficient work in the local daily, *The Mexican Herald,* and also with other English papers published here. There is much yet to be done with the Spanish papers, but this work will be accomplished gradually.

The attendance at our Mexican and English services is always good, and both the attendance and membership are increasing steadily. Though only a few active workers sustain the work here, it has been continually demonstrated that God is our source of supply.

Healing and saving work is being done daily, and many are "bearing witness to Truth," both among the Mexicans and the foreigners. A number of copies of Science and Health and other writings of our Leader have been sold during the past year.—R. ERARD, *Clerk.*

Reading Room Work in Toronto, Can.

The report of the Reading Room Association in connection with First Church of Christ, Scientist, Toronto, for the year ending December 31, 1903, shows a substantial growth in the reading room work. Not only were the sales of literature much larger than the preceding year, but new avenues and channels were opened up where our periodicals are now welcomed.

Our committees whose duty it is to place our literature in the public libraries and public institutions of the city are constantly making opportunities to place it where all Truth-seekers may have free access to it. The literature supplied by these committees is stamped with our reading room address and the church address, and we learn from persons who call at our reading rooms that they were attracted there by helpful articles which they had read in the *Sentinels* or *Journals* supplied the various libraries of the city.

We keep a number of copies of Science and Health as a circulating library. These books are loaned for not more than a week at a time to persons properly recommended. By this system our text-book has reached many homes. Reports from the hotels and the steamers where our literature had been placed show that it has been appreciated there also.

Thus the work develops and broadens, and false ideas about Christian Science are replaced by truer conceptions through the perusal of our literature.

M. I. BROWN, *Secretary.*

Growth in McKensie, Tenn.

In the summer of 1897, two hungry and thirsty seekers after Truth began meeting once each week for the purpose of studying our Lesson-Sermon, and before the summer was over their numbers had increased to five. The next step was taken in the fall of 1897, when we went from our dwellings as a place of worship to the Christian Church, and in the following spring, we moved to the hall where we now worship. Out of these honest, earnest efforts have grown First Church of Christ, Scientist, which was chartered by the state in July last.

The different ministers in the town have preached against Christian Science, but it was error striking at Truth, and it has not injured us in the least. In fact, it has created an interest in Christian Science among people who had never been interested before.

Much good healing has been, and is being accomplished here all the time. Surely that happy day is well on the way which Mrs. Eddy speaks of in Science and Health, p. 55, when all shall recognize his re-appearance, and acknowledge the healing power of divine Love in what it has done and can do.—MRS. MILLIE MCKENZIE, *Clerk.*

To Build a Church in Hartford, Conn.

The Christian Science Association, more properly called First Church of Christ, Scientist, have decided to build a church edifice of their own and have been for some time prospecting for a satisfactory site. No public announcement has yet been made, but they have purchased the lot on the south side of Farmington Avenue next west of the residence of H. B. Stedman, which has been the property of Charles E. Gross, and they intend to build there in the spring.—*Hartford* (Conn.) *Courant.*

An Interesting Letter.

THE following letter, with enclosure, comes from a Christian Scientist in India.

Editor Sentinel:—Betimes our critics try to make capital out of the statement of Pundita Ramabai that "Christian Science is identical with the Hindu philosophy." It is generally understood that her statement was made upon hearsay and not upon a careful study of our text-book, nor upon an investigation of its teachings, practices, and their results.

It may be a pleasure to the Field to hear a word from one who has caught a glimpse of the Truth revealed in Christian Science, who recognizes that there is a very helpful difference between Christian Science and Hindu philosophy, and who gratefully acknowledges the same.

On receiving and reading a copy of "Unity of Good" he writes, "Thanks, thanks to my brother for a letter and *the book which will save India,* if she holds the doctrine which is taught . . . and the practical; *i.e.,* Christian Science."

Again he writes,—

"*My own brother in the supreme Love:*—Lalana cannot describe the gratitude he feels in his heart, the gratitude for what you are doing for India. India needs such a peace-bringing message as Mrs. Eddy's Message of 1901. He sends thanks, thanks to you and for your blessed organization, for the books, pamphlets, and *Journals* you sent him, but he will be glad to know that you are expanding your mission here. His joy will know its full gratification if some of you demonstrate your Science here. You who have demonstrated so long. . . .

"Love to every Scientist.

"LALANA."

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

The Undivided Garment.

FROM time to time critics rise to find fault with Christian Science, and especially to demur to the use of the word Christian in connection with it. Happily these critics have grown fewer in number, and their words receive less notice than formerly.

Webster's definition of Christianity is: "The religion of Christians; the system of doctrines and precepts taught by Christ. Practical conformity of one's inward and outward life to the spirit of the Christian religion." The Century Dictionary gives as one definition of the same word: "Conformity to the teachings of Christ in life and conduct," and as the definition of the word Christian, "Specifically, one who possesses the spiritual character proper to a follower of Christ; one who exemplifies in his life the teachings of Christ."

When it is remembered that a great part of the record of Jesus' ministry is a record of healing, it would seem that the position taken by Christian Scientists is, in this regard, consistent with at least one essential of Christianity, yet it is on this point that Christian Science differs in practice from other Christian denominations. Few critics have made this difference in practice so plain as has the New Jersey clergyman who recently said in a sermon, "Such attempts as that of Christian Science to claim for religion the work of healing are but a harking back to a discarded arrangement of things, an arrangement that kept men in bondage to superstition and ignorance, whose casting aside was a triumph for knowledge and for the welfare of man."

If healing is to be eliminated from the gospel why not expunge all our Master's words as given in Matthew, "And as ye go, preach, saying, The kingdom of heaven is at hand. Heal the sick, cleanse the lepers, raise the dead, cast out devils: freely ye have received, freely give."

The inference to be drawn from the reverend gentleman's words is that a better way than that of Jesus has been found, but we doubt whether that will find ready acquiescence from either doctor or layman. Christian Science is firmly planted upon the entire gospel of Christ Jesus, and its followers ask only for that judgment which is based upon his teachings and practice. The "daily walk and conversation" of Christian Scientists; their deeply religious trend of thought; the love which they manifest toward their fellow-mortals; the healing of the sick, must stand as their justification for the faith that is in them.

As tending to show that this judgment is rapidly crystallizing in favor of Mrs. Eddy and her teachings, we quote the following editorial from a recent issue of the *Workers Gazette*:—

"If common ideas or principles are common property, and if they always existed, like, for instance, the law of gravitation that helps every man to keep his hat on, then no person is entitled to the credit of originating them. Still, any person who discovers and shows us, or learns and shows us, common ideas or principles, and thereby benefits us, is entitled to our gratitude for helping us to realize or recover our own that was lost to us. The judge who protects our rights that have been invaded, or the neighbor who finds and returns our purse that has dropped out of our sight, merits our appreciation of his kindness and our best wishes for all the success that is due him.

"The pages of history contain the names of many men and women who have shown and tried to show (mostly the latter) the people the way to see and enjoy more of the beauty and happiness of the life that is common to all. . . . In the Science which treats of the nature of good and evil, and which is of more importance than all other sciences because the light received therefrom can be used in the uncovering and removal of error in all other sciences, the name of Mary Baker G. Eddy, we predict, will some day be duly honored by the world for helping the poorest and lowliest and meanest and most oppressed and despondent men to realize that they have a grand equal inheritance to all the good things of life which it is possible for them to enjoy on the earth."

M,

The Fostering of Fear.

MORTAL mind loses no opportunity to discover itself, and one of its latest exhibits has been honored in the press reports by the announcement of "An Exposition of the Characteristics of Consumption." This was held in one of our large cities and it is said that the gathering of experts gave all "the latest theories respecting the white death a competent presentation and discussion."

It is an interesting coincidence that just at the time that "up-to-date knowledge of this disease" was being acquired by these well-meaning specialists, an experienced physician, who is ranked "high in his profession," should be declaring in a neighboring city, that the drug system can be of no assistance in the fight against what is very frequently but the initial phase of the dread disease referred to. It having become apparent that the drug treatment of this and many other maladies is wholly ineffective, the materialist is impelled to look further for cause in order to make further experiment toward its removal. In so doing, however, he meets with so many possible and conjectured occasions of ailment that to put them in battle array and then ask poor humanity to guard against them each and all, is to beset life's every path with terrors and make it a constant scare, a ceaseless struggle to avoid the ills of which our fathers, as all concede, were happily ignorant.

This perennial prospecting for the sources of disease is called "Advanced Medical Science," and it is in good form to doff your hat in its presence, but the humorous instinct is rather irreverent, and not infrequently one has occasion to smile generously when some "knight of the quill" ventures to intimate that all scientific statements being duly considered, the outlook is becoming altogether too boogerish to be comfortable, and propounds a query like the following, which we quote from an exchange.

"Pretty soon life will not be worth living. Surrounded and controlled by prohibitions and warnings against invisible enemies, we shall soon envy the inhabitants of Darkest Africa. They know they are safe when they have the right charm in the right place, but we, poor, civilized sufferers, can never know it. The awful germ lurks everywhere, and the most ordinary precautions of cleanliness may set him loose upon us.

"Our forefathers and foremothers lived long and happily and healthily without any knowledge of germs. The parlor was dusted without fear, and other things were done which modern science tells us can be done only upon our peril. Is it possible that their ignorance was their safety, and that our knowledge or imagination constitutes the only real peril there is?"

Digitized by Google

In theoretically locating the causes of disease in matter, the devotees of *materia medica* are logically led to pry into its abnormal conditions with the hope that through chemical or microscopic analysis these causes may be discovered. They seem, however, strangely indifferent to one of the most unfortunate results of this procedure; namely, that as the mentality of the people at large comes to be dominated by thoughts of disease, their susceptibility to it is correspondingly increased.

Elaborate descriptions and detailed reports of the progress of the affliction in the case of all prominent people, are sown broadcast through the daily press, and the inevitable outcome is that state of fearsome familiarity with abnormity which, as all mental students agree, conduces to its multiplication; so that in the end it is seen that well-meaning effort because of its false basis and unwise methods, but aggravates the ills it aims to relieve.

This fear-breeding philosophy and endeavor, Christian Science would replace with the demonstrable truth that "The procuring cause and foundation of all sickness is ignorance and sin. It is always a false sense mentally entertained, not controlled, which induces disease;" and that "the cause of disease obtains in the mortal mind," and its cure can obtain only in "the immortal divine Mind" (Science and Health, pp. 411, 174). Instead of delving into inert matter to discover the source of our ills, it finds the explanation of both sin and sickness in the supremacy of material sense,—the belief of that which is false,—and for this the one efficient remedy is the apprehension of Truth. It counsels not the diagnosis and elaboration of abnormity, but the acquirement of the mind of him who knew and proved the nothingness of these enemies of our health and peace.

Thus would Christian Science effect the death of fear and the dawn of faith by awakening man to his true possession, —"a conscious, constant capacity to understand God" (Science and Health, p. 209), in the exercise and dominion of which sickness and sorrow flee away, so that with Browning he can say:—

> No Fear! or if a fear be born
> This minute, it dies out in scorn.

W.

The Avoidance of Extremes.

THE tendency of the human mind to go from one extreme to another proves a lack of the true understanding which never finds a necessity for evil in any direction. Christian Science does not admit that evil is undeveloped good, or good carried to excess. One of our early lessons is that if we are obedient to Truth we shall be divinely guided and directed in all we do. Our Leader teaches emphatically that we must learn to distinguish between "the wrong motive or the true—the God-given intent and volition—arrest the former, and obey the latter." She also says, "The neophyte is inclined to be too fast or too slow" (Miscellaneous Writings, p. 117). This shows that understanding is needed in order to avail ourselves of Divine guidance.

A few months ago, a timely warning was given in the *Sentinel*, in view of the fact that some of our members had been the victims of misplaced confidence, and had been defrauded by persons who falsely claimed affiliation with Christian Science. Although similar reports have come in recently, it is not advisable that our columns be given to statements of this kind, since the purpose of our periodicals is to tell of the power of Truth to destroy all error. A word to the wise should be sufficient.

If we ponder deeply the apostle's counsel that we "Love not the world, neither the things that are in the world," we shall not be likely to fall into the snares set by those who offer means of acquiring wealth, other than those of "industry, intelligence, and integrity." We may well be wary of those who do not scruple to use the sacred name of Christian Science in order to promote speculative schemes, which, if worthy, ought to stand on their own merits.

Further, when we are appealed to for charitable aid we certainly need much wisdom, but if we have studied our text-book faithfully we shall be prepared to deal intelligently with the conditions to be met, and escape imposition through our knowledge of "the art of dissecting thoughts, in order to discover their quality, quantity, and origin" (Science and Health, p. 462).

So long as we believe in the reality of disease we are unable to remove its manifestation, and this applies to dishonesty and poverty as well. Just here we may learn a valuable lesson from the allegory of Adam's fall into error. When he complained of nakedness, God said, "Who told thee that thou wast naked? Hast thou eaten of the tree whereof I commanded thee that thou shouldest not eat?" Those who do not understand and acknowledge the supremacy of Mind over all error, are in a poor condition of thought, and from this poverty all need to be healed. We need to know both for ourselves and others that the limitless resources of good await the true seeker, and a way to their acquirement is indicated in these words of our text-book: "diligence, promptness, and perseverance are likened to 'the cattle upon a thousand hills.' They carry the baggage of stern resolve, and keep pace with highest purpose" (Science and Health, p. 514). If we think that we do our duty by merely giving an alms, and this is often much the easiest thing to do, we may only be adding thereby to an already burdened sense; and if we give heedlessly to dishonesty, we may seriously unfit ourselves for true giving. If time is required in order to understand the conditions to be remedied, we must make this a part of our offering, and then we shall be both wise enough and loving enough to avoid the extremes of refusing aid where it is really needed, or of giving where it is not deserved.

Although the great Teacher commanded his followers to feed his sheep, and even to seek out the wanderers, he never counselled them to feed the wolves which might appear disguised as sheep; on the contrary, he frequently warned them against this devouring error, and said, "Be ye *therefore* wise as serpents." To meet the needs of this period our Leader bids us "be wiser than serpents," and at the same time she says, "Be faithful at the temple gate of conscience, wakefully guard it; then thou wilt know when the thief cometh" (Message to the Mother Church, 1902, pp. 29, 31).

K.

Appreciation of the Manual and Concordance.

THE new Manual has been a great help to me. Article VIII., Section 1, has awakened me to the necessity of being more faithful in the performance of every duty, of manifesting more promptness, more exactness.

I am indeed glad that we are required to be good English scholars, and I have begun regular school work in English, under a competent teacher. I have long felt a need of this, but have allowed others' opinions to influence me against following a course that seemed right to me. I am very grateful also for the Concordance. In contemplating the immense amount of labor necessary to give us this complete work, I feel that it will be impossible for me ever to spend another idle moment. Mrs. Eddy says, "Be active, and, however slow, thy success is sure" (Miscellaneous Writings, p. 340). What marvelous love she has for us! She proves it daily by her work.

If we are loving our fellow-man as we should, we shall strive to follow our Leader's example and "'work—work—work—watch and pray'" (Communion address for June, 1900, p. 4).—MARGARET A. VAREY, Chicago, Ill.

A Letter to our Leader.

Richmond, Va., February 10, 1904.

Dear Mrs. Eddy:—When a little girl eleven years of age I was spending the winter in New York City with my grandparents, and I had a dream which made an indelible impression on my mind. I dreamed that I was out in the street, when suddenly there came a darkness over the earth and the people commenced running to and fro in the wildest state of excitement. I inquired of the person next to me the cause of such confusion? The reply was, It is the judgment-day, and Christ is now descending.

I thought I looked up and saw the Saviour slowly descending from the clouds, and never can I forget the beauty of his countenance and the gorgeous color of his raiment.

I stood transfixed, when, lo and behold, he presently stood right beside me and laid his hand on my head. The pressure of his hand awakened me, and even for a while after that I seemed to feel distinctly his touch.

All my life since having that dream, I have wondered what it meant, and never knew until I was touched by the beautiful Christ-truth and awakened into a higher consciousness and newness of life.

My gratitude to you for bringing to light this glorious truth is too deep for words. My physical healing has indeed been wonderful, but far above that has been my spiritual uplifting, and the peace which has been brought to me by the blessed knowledge of God as Love. With the deepest gratitude to you for lifting me out of the darkness into the light,

I am lovingly yours,

MRS. HELEN I. YOUNGER.

Rev. Mrs. Eddy will Contribute $1000.

THE REV. MARY BAKER G. EDDY is deeply interested in the movement to secure a proper representation by the State of New Hampshire at St. Louis and has done her part toward making it successful by indicating a desire to give a thousand dollars to the fund in the event that the total reaches the minimum established by vote at the recent public meeting called to consider the subject. Her letter, received at this office last evening, is as follows:—

Pleasant View, Concord, N. H.,
February 10, 1904.

Dear Mr. Meehan:—Mrs. Eddy says you may put her name down for a contribution to the fund for an exhibit from New Hampshire at the St. Louis Exposition, for $1000, to be paid in case the full amount requisite therefor is obtained. Yours truly.

C. A. FRYE.

Concord (N. H.) *Patriot.*

The *Patriot* was very pleased to be able to announce yesterday that the Rev. Mary Baker G. Eddy had offered the sum of one thousand dollars towards the fifteen thousand which the commissioners deem sufficient for the creditable representation of New Hampshire at the St. Louis exposition.

The generous donation speaks volumes for the public spiritedness of this woman. There are many in New Hampshire just as well able to give, and there are thousands who would be infinitely more justified in giving. The only motive which inspires this action on her part must be her abiding love for the state, and her desire to see New Hampshire in a fitting place among the galaxy of states, as they will appear at the greatest exposition ever held in America.

Concord (N. H.) *Patriot.*

The Lectures.

St. Paul, Minn.

Bicknell Young, C.S.B., of Chicago, gave an address on Christian Science in the Grand Opera House yesterday afternoon [January 24] to a large audience, under the auspices of First and Second Churches of Christ, Scientist. Mr. Young was introduced by Howard C. Van Meter, First Reader of Second Church.—*The St. Paul Globe.*

New York, N. Y.

Rev. Irving C. Tomlinson, C.S.B., lectured on "Christian Science and its Leader, Rev. Mary Baker G. Eddy," January 29, under the auspices of First Church of Christ, Scientist. The lecturer was introduced, in a few felicitous words, by Mr. J. D. Higgins. Though the evening was a most inclement one, the large church auditorium was filled by a deeply attentive audience. Very full extracts appeared in a number of the New York papers, and *The Tribune* of the following day devoted several columns to its report, so that the lecture has reached a very large body of readers.

Correspondence.

Lynn, Mass.

Under the auspices of First Church of Christ, Scientist, of this city, a lecture was given in Lynn Theatre by Rev. Irving C. Tomlinson, C.S.B., of Concord, N. H., January 24, on the subject, "Christian Science and its Leader." There was a good-sized audience in attendance, which included many who are not of the society and who listened attentively to the address. The meeting was called to order by William H. Lewis, First Reader of the local congregation. The speaker was introduced by the Hon. Henry C. Attwill.—*Lynn Item.*

Orange, N. J.

Edward A. Kimball, C.S.D., of Chicago, lectured in Music Hall last Sunday afternoon [January 3] to a representative and appreciative audience. The speaker was introduced by W. L. Trowbridge, First Reader of the local branch church, who said in part,—

The aim and purpose of the lecture to which your attention will be invited this afternoon is one that is precious to us all; for the whole world is striving for a better knowledge of Truth, to acquaint itself now with God and be at peace. Two thousand years ago the humble Nazarene, the purest man that the world ever saw, stood in the presence of Pontius Pilate and was asked, "What is Truth?" and to-day we find mankind still closely pressing the question, and with renewed vigor; and yet, Jesus Christ said, "the kingdom of heaven is at hand." It was at hand then; it is at hand to-day.

It is the privilege of every man and woman in this community and everywhere, to seek Truth in his or her own way, but, remember, God does not withhold Himself from His creation. We bespeak your kind attention and your unbiased judgment for the lecture that is to follow. We are all members of the one brotherhood, the one divine idea, seeking the same goal, and we shall present our views to-day in the spirit of love and charity for all; and I say to you, that if Christian Science has done anything in this community or in any other, to lessen sin, sickness, and death; anything to alleviate the great burden of human want and woe and misery; if it has elevated mankind physically and morally, and brought him nearer, in his understanding, to the great heart of the Infinite, then I ask you, is not Christian Science entitled to your most impartial consideration this afternoon?—*The Orange Chronicle.*

Testimonies of Healing.

As I sit here to-night, my thought goes back to the time when I was unconscious of peace and happiness, when my sad heart had sunk far below hope or faith in any power that could lift me above the sense of discouragement in life. When I look back to that time and compare it with the present, my heart overflows with gratitude and love to God and to those dear ones who have helped me to find the true God.

At one time I belonged to an orthodox church and I took part in most of the meetings. I received a great deal of good, and I thought I was learning a great deal about God, but one thing I did not learn, and that was how to pray so that my prayers would be answered.

A little later on I thought I would take advantage of some of the so-called pleasures that came up before me daily. Because I had not received a practical knowledge of Truth, I was led by my own evil thoughts into sin, and after a short time this caused a great mental unrest, which it was impossible for me to overcome without help.

I would go to my room at night and pray as I had heard others pray at church, but when I awoke the next morning I would be in the same condition, trying to get rid of thoughts that caused me pain and sorrow, and at the same time claiming them as my own thoughts.

I knew of Christian Science but did not know that it could make me happy, still I saw that all the Christian Scientists I knew were happy. I decided to read Science and Health, as I was told it would make me happy also. I read part of it and, like many others, said I could not understand it, but I was told to read on, and it would help me any way.

I was also told to go and have a talk with a gentleman who understood Christian Science, and that this might help me to understand it. I did so and went a number of times, always receiving just what I needed, and I always came away feeling a great deal better.

One day I read these words: "Man's enslavement to the most relentless masters—passion, appetite, hatred, and revenge—is conquered only by a mighty struggle. Every hour of delay makes the struggle more severe. If man is not victorious over them, they crush out happiness, health, and manhood. Here Christian Science is the sovereign panacea, giving strength to the weakness of mortal mind,—strength from the immortal and omnipotent Mind,—and lifting humanity above itself, into purer desires, even into spiritual power and good-will to man" (Science and Health, p. 407).

Here I stopped and read the lines over and over, and I gave it more thought than anything that I had ever read. I knew that if I ever overcame this mental torment I would have to go to work, and that it all depended upon me. It had all been uncovered to me that my sin caused my sorrow, and that I must get rid of sin first. Now how was I to do this? I worked, and I tried to overcome it, but I could not see but that it was a reality until I read, "The sin, which one has made his bosom companion, comes back to him at last with accelerated force; for the devil knoweth his time is short. Here the Scriptures declare that evil is temporal, not eternal" (Science and Health, p. 569). I now could see how to do my work, for I read, "Stand porter at the door of thought. Admitting only such conclusions as you wish realized in bodily results, you may control yourself harmoniously" (Science and Health, p. 392). I did this, and as I turned away from the evil thoughts I could see that harmony was being manifested in my consciousness.

Before receiving any benefit from Christian Science at all, I had given up to the idea that my life was but a short period of torment, and would soon end in destruction, but now I have learned that God is my Life, and that this Life is always good and harmonious and endures forever.

I am glad to say that my wife and myself have had class instruction, and that we are both honestly striving to get a better understanding of God. We look to God, the giver of all that is good and true, for all our happiness.

I am thankful that I am living in this age and that I am one of the many who have joined hands to demonstrate this healing and uplifting power, as revealed to us by our dear Leader.

May God bless the Founder of Christian Science, and my dear teacher, who has toiled with me and helped me to understand Christian Science. May God also bless those who are afar off, and bring them to the fold.

CLAUDE L. BRITTAIN, Parsons, Kan.

It was the hunger and thirst for righteousness, that led me to Christian Science in 1891. I was searching the Scriptures trying to understand why the healing could not be done now as in Jesus' time, when I heard that a man in Kansas did wonderful healing by faith. I wrote to him and addressed my letter to "The Faith Healer," as I did not know his name. He replied, saying he was not a faith healer but a Christian Scientist. He sent me a *Journal* and some tracts. I read them many times, for I had at last found that for which I had long searched.

We sent for Science and Health, and O what a light came with it. I felt that God had sent it to us, and I never doubted a single statement made in this book.

We are many miles from any Christian Scientist, so have never attended the services and have not taken class instruction, but we have not used any medicine since the book came, and we have a large family.

About a week after we began the study, my husband came home, saying his foot was nearly cut off. A doctor was sent for, and he said that the joint in the big toe was fractured, said he could feel slivers of the bone, and the next two were nearly cut off. This was in February, and the doctor said he could not do any work all summer. He came back next day and dressed it, and seemed much surprised that it did not hurt any. The next morning we threw away the liniment, saying we would trust God alone for help, and this was the last material remedy we ever used. Each day we studied the Bible and Science and Health. The ninth day he walked on his foot, and in a few weeks it was entirely well, and at the same time his appetite for tobacco was destroyed. I was called to treat a friend for toothache, and error suggested that I had best not undertake this, for it would be a failure, and they would laugh at me. I went in and took up Science and Health, but was trembling so that I could hardly hold it. I opened it, and as I glanced over the words, "Lo, I am with you alway," they seemed to be written in letters of gold. This message brought a peace that passeth understanding, and the toothache disappeared. This was over twelve years ago, it was when the light first dawned upon us, and many have been the demonstrations since, proving that God is a very present help in trouble.

I have seen the power of divine Love melt away fevers of different kind, rheumatism, colds, burns, felons, sore eyes, flux, spasms, consumption, heart trouble, diphtheria, and many other ailments. "Who is so great a God as our God?"

Words cannot express my gratitude to God for His loving kindness, and to our dear Leader, who is so patiently showing us the way.

We are members of the Mother Church, and have about all of Mrs. Eddy's writings. We are yet studying the Lesson-Sermons alone, but we know the thought around us is changing.—MATILDA R. BROOKS, Ingraham, Ill.

It was not for the actual healing of physical ills that I was first brought to Science; it was rather the power claimed

Digitized by Google

for Christian Science to heal on the Scientific basis of the allness of God and the nothingness of evil, discord, and inharmony that roused my curiosity to know how God had been thus, so to speak, rediscovered amid the mass of dogma and superstition attaching to His holy name. At my wife's instance, I read "Science and Health with Key to the Scriptures" by our beloved Leader, Mrs. Eddy. I did not quite understand it at first, because I was so unaccustomed to take anything written on ecclesiastical subjects, literally, or to realize that words of hope and comfort could apply to my present state of being. My delight and wonderment,—"Why, it is literally true that God is Love, and never created discord or inharmony; they are as unreal as the mirage or as counterfeit coin!"—may be imagined.

I was verging on my fifty-ninth year when I took class instruction. Besides my share of minor ailments from time to time, I had had one serious infliction from almost infancy; viz., tendency to inflammation of the cornea of the left eye, from, I think, my fifth year until some four years ago. After my twenty-first year the attacks became acute, often confining me to a dark room for some weeks. This was followed by convalescence with a pad over the eye for some three or four weeks more. At last, so frequent did the attacks become that, by advice of a celebrated oculist, the cornea was cauterized with a red hot wire. After that, though the effects of the attacks were greatly mitigated, their frequency was not affected to any great extent. I had two in three years. It was after the last attack that I came to Christian Science, and for four years I have been quite free. I used to be bothered by acute attacks of lumbago, which absolutely crippled me for days at a time and caused great suffering on the slightest movement; also by attacks of indigestion in form of heartburn which seemed to follow partaking of certain kinds of food and which necessitated liberal doses of carbonate of soda. I did not treat myself specifically for any of the above ailments, but since taking up the study of Christian Science they have quite gone. The unlabored working of the divine Mind has been the cause of my freedom. My gratitude to our devoted Leader cannot find expression in words, for not only have my physical ills been dissipated, but claims of moral discord and inharmony have also been proved null and void.

T. H. A., London, Eng.

I wish to acknowledge the benefits I have received from Christian Science. Before hearing of this teaching I was troubled with sick headache, constipation, dyspepsia, piles, catarrh, and almost every disease to which mortals are subject. This sick headache dated from childhood, so that I could never plan any work ahead. I might do a full day's work one day and be in bed the next. The physicians told me I inherited it, and would never be rid of it. I took everything I could hear of that was recommended, but I suffered so at times, that I actually believed my head would burst open. All the medicine I ever took did me no good. Some would relieve the pain for a short time but did not remove the cause.

One day in conversation with a friend he recommended Christian Science to me, and said it had healed a relative of his of heart disease, and it might help me. This was the first time I had ever heard of Christian Science. I applied to a practitioner in Chicago, who gave me absent treatment, and advised me to buy Science and Health and study it, which I did, and I have been studying it ever since.

It is now nearly fifteen years since I heard of Christian Science for the first time, and since then I have relied entirely on the teachings of the Bible and our text-book for health and happiness. Divine Love has led me on.

I have been blessed with the privilege of class instruction, and am now able to overcome every seeming discord with the understanding of Truth. My entire healing has seemingly been slow, but I am more than grateful for this, as it has brought a wonderful spiritual advance. My "passage from sense to Soul" (Science and Health, p. 566) has not been strewn with flowers. I have had many trials that seemed more than I was able to bear, but through all, my faith in Christian Science has never wavered. At times the mist of mortal strife would quite overshadow the sense of true being, and for some moments I could think of nothing to say or do. In such times I would hold and repeat the first thought of Truth that came, and I have often been lifted out of the gloom by declaring that God is All.

I am very thankful for Christian Science, and hope to be able to realize more and more of the truth of being.

A. S. VANVALEY, Heyworth, Ill.

[Translation.]

Before I learned to know Christian Science, I belonged to those people who believe that God sends them sickness, pain, and trouble. Heretofore I had always looked to the services in the evangelical church for comfort; yet here it was taught that sickness and trouble were sent by God to try us, and that we must bear them patiently. This never gave me any comfort and I left as discouraged as I had entered. I turned to other denominations, but did not find what I longed for. When I was about to lose my faith in God, a friend told me of Christian Science. I soon visited her again and asked her to tell me more of this new religion, and that same evening I went with her to the Christian Science service. How different this was, what a deep impression the reading from our text-book, Science and Health, made upon me. What happy and joyful faces I saw. Although I must confess that I understood but very little of this first service, it gave me much to think of and I felt that it must be something glorious and wonderful.

I attended the services regularly; the desire to understand more and more grew daily, and yet it took me a year to understand the teachings of Christian Science somewhat. How frequently I struggled; it was all so new, so wonderful, that I could hardly comprehend it, and yet how happy I was to learn of Truth, to know that we need not be unhappy or sick, that God is Love, Life, good.

I had no treatment, but unhappiness and sadness left me, and peace, happiness, and joy entered in. My family noticed the change with surprise. For two years I had entirely lost my sense of taste and smell, and this was restored to me through Christian Science. I have had many small demonstrations and I use Science to overcome both great and small errors. Through Christian Science I am mentally and physically well, and my family has a happy, healthy mother who is blessed in having her husband and children with her to work and grow in the truth.

Words fail me to express my gratitude to God and to our beloved Leader, Mrs. Eddy, who has revealed to us the love of God through Christian Science. May all know and realize that this is the only right way to Truth and Life.

EMILIE GEORGI, Dresden, Saxony, Ger.

Soon after taking class instruction I was asked by a friend, "If one of your children were seriously ill do you think you would have faith enough in Christian Science to trust to it and not send for a doctor?" I felt very sure of the truth as it had been taught me, and I replied bravely, "Were one of my little ones ever so ill I *know* I should not send for a doctor," and before many days I was obliged to prove true my words. My daughter, then five years old, was taken very ill with acute bronchitis. I called a Christian Science practitioner and felt no anxiety, as I expected the case to be met at once.

It did not seem to be; rather the child grew worse daily until for five or six days she was only partially conscious and was unable to take nourishment. At last the time

Digitized by Google

came when we could not arouse her at all, and it did seem as though we were surely passing through the "valley of the shadow of death." Even at this time the thought of sending for a doctor never entered my mind, though it was suggested that it would be well to do so. I was alone with the child for a little while, and though it seemed that my heart would break, I commenced to sing that comforting hymn by our beloved Leader, Mrs. Eddy, "Shepherd, show me how to go" (Miscellaneous Writings, p. 397), and before I had finished consciousness returned to the little patient and she awoke as from a refreshing sleep. The work was done, and when the practitioner returned the little one had eaten a hearty breakfast and was playing with her blocks in bed. Through this experience I have learned never to speculate on a case of error, but to stand firmly on the Rock of Ages, knowing that we do not stand alone, for God is omnipresent and omnipotent.

MRS. ANNIE R. BEARSE, Brooklyn, N. Y.

It is about fifteen years since I first heard of Christian Science through the healing of a friend who had spinal trouble, but I did not become interested in it until about four years ago. At that time I was suffering with a gathering in my ear and had been under medical treatment for several weeks with very little relief, though the specialist who treated me said he had done all he could for me.

Christian Science treatment had been suggested by a friend several times during my illness, but I had been reading so-called mental science for several years, and could not believe that Christian Science could heal where this other had failed to keep me from sickness. Finally, in desperation and as a last resort, I turned to Christian Science for help and was healed in one treatment.

It was some time after I commenced reading Science and Health before I seemed to get a ray of light from it, but since that first ray of light dawned upon me I have never had a doubt as to the truth of its teaching, and I can now see why Christian Science heals where other mental methods do not, in that it is founded upon the Bible and brings to light the teachings of Jesus in their entirety.

I have been greatly helped by class instruction and association with Scientists who are pioneers in the work in our midst, and I am deeply grateful to our Leader for uncovering or discovering for us this wonderful truth and the method of its demonstration.—MARY V. FISK, Toledo, O.

We are often asked by those out of Christian Science, In case of accident, of what use would Science be? and I think that my case of healing will answer this question.

While working in a flour-mill in Grand Forks I got my right hand caught in a belt and pulley, and the friction of the belt ground out the inside so that the bones in the back were exposed from the front, and the muscles were all burned off, so that the doctor said the hand would have to be taken off. But I believed in Science some, so I at once called in a Scientist. I was in great pain when she arrived, but she sat down and treated me, and in less than five minutes all pain left, and I was able to wash, and eat my supper. I never lost any sleep, and the next day I wrote a letter with my hand, and in five weeks I was back to work again, my hand as well and strong as ever. I wish to add that my wrist was also out of joint and I never knew when it went back in place.

This happened about thirteen years ago, and since then I have taken class instruction, and I am thankful to my teacher for her kind guidance and care, for I owe her much. I wish to express my love and thankfulness to our Leader, Mrs. Eddy, for this truth which she has given to the world. It is indeed the bread of life which feeds and heals suffering humanity.—GEORGE E. THOMPSON, Ojata, N. Dak.

About three years ago Christian Science was brought to my attention by the young lady who has since become my wife, she having received great help from it. I was impressed by her physical healing, but more so by the wonderful truth it unfolded. It awakened an interest in the Bible which never before existed. I did not feel at that time that I had any need of Christian Science for physical healing, enjoying health that I thought above or as good as the average, but I find upon looking back and comparing the past with the present that I have been relieved of several disorders which caused me great annoyance, and, at times, severe suffering, among which may be mentioned headaches of frequent recurrence and bilious attacks.

I have also been cured of the tobacco habit, in which I had indulged for more than ten years. I wish to say for the benefit of any one who may desire to rid himself of this useless and expensive habit, that it is made easy of accomplishment through the understanding gained from the study of Christian Science, as taught in Science and Health by Mrs. Eddy.

I am thankful indeed for the little knowledge I have gained, the physical freedom it has brought, and for the larger life and possibilities it has revealed.

L. G. REYNOLDS, Chicago, Ill.

I first attended a Christian Science meeting last July, and am pleased to say that I have had a most peaceful time since, for I now know that I am God's child. I have for a great many years been surrounded by error, and have been well permeated with it, almost to my mental destruction. I was on the verge of nervous prostration, having three times during my life been obliged to go to a sanitarium for several months at a time. I had seemed to be filled with worry, hate, fear, etc., which were very extreme, and several bodily ailments were also very troublesome.

By continually reading Science and Health and other works by Mrs. Eddy I find they all are now gone.

Each day I find greater strength, and the first thing when I get up in the morning I thank God for everything, and also all during the day at very frequent intervals. I have memorized the "scientific statement of being," as given in Science and Health, and I know that I am God's child, having had numerous and convincing proofs that He is All in all. It seems that I was saved for some wise purpose, and I am very desirous of doing all I can to further the Cause of Christian Science in the right manner for the benefit of as many as may be placed in my way to show the power of Truth to make them whole.

GEORGE HARVEY PIERCE, Chicago, Ill.

[Translation.]

My servant had suffered for some time from weakness, loss of appetite, and difficulty in breathing. The physician called this condition a disease of the heart and nerves. He gave her different remedies, but she received no help. Then he wanted me to send her home for six months. I let her go home for six weeks and resolved to take her to Christian Science if she should be no better on her return.

I had learned to know and love this beautiful truth two years ago. It had brought me many blessings, many happy hours and I could nevermore turn from it.

When the girl returned, she was not better but worse, and besides her old troubles, she was afflicted with bleeding at the nose. I immediately took her to a practitioner, and in a few weeks she was entirely healed and could perform her duties. The nose-bleeding stopped after the first treatment.

We are very grateful to the dear practitioner, and every day we praise God for Christian Science, and we thank Him for our great Leader, Mrs. Eddy.—H. K., Dresden, Ger.

From our Exchanges.

The world we see depends on what we are. Often we do not like to admit this. We like rather to stand off as critics of what is before us,—men are so false, nature so hard, society so cold, the world how wrong!—quite forgetful that the vision is of the eye that sees as well as of the thing that is seen. If the light that is in us be darkness, how great is that darkness!

Or, when we admit that we are involved, with what extenuations we shake off the burden! The stars were not favorable at our nativity, we think. We quarrel with our fortune rather than criticise ourselves. Friends, let us frankly acknowledge the part we bear. If in your fellowmen you see so little to approve, if honor be so rare and virtue so exceptional and selfishness so all pervasive: if society be so heartless and nature so loveless, and the way of life so dark and hard,—depend upon it there is disease in you, which by all life's worth and beauty you are bound to cure.

A. W. JACKSON, D.D.
The Christian Register.

"Revealed." Notice how the great argument centers also in that word, and revolves about it. The Gospel is a revelation. The Bible is a revelation. That is what we continually call it. But we are constantly losing the force of these words and letting them slip from us. Revealed is the same as unveiled, where the veil is laid back and the objects which were covered and concealed are exposed to view. As Paul here says, "In the Gospel the righteousness of God is revealed for those who will believe it; and the wrath of God is revealed against the ungodliness and unrighteousness of men." It creates nothing; but it uncovers these great things of God and men, and shows them to us just as they are, and as they must ever be.

The Examiner.

Religion is a personal matter. Each individual must deal with God for himself. Others may pray for and counsel him in the things of God, but the business of adjustment between the soul and God cannot be transacted by proxy nor by men in the mass. The Psalmist proposes to relate his religious experience when he says, "Come and hear, all ye that fear the Lord, and I will declare what He has done for my soul." He sings of the providence and salvation of God as though they were his personal property.

The Christian Advocate.

No one, at all familiar with the teaching of Jesus, can doubt that he laid strong and constant emphasis upon the importance of a right heart. No amount of outward conformity, no intellectual persuasion can satisfy the claims which Jesus makes upon the human soul. A man may believe never so much concerning Christ, but if he have not Christ's spirit he is none of his. We must be born from above, must center our affections and purposes in God, if we would be citizens of the kingdom of heaven.

The Standard.

Nor is it of fatal consequence whether our parents were all they should have been. It may determine the mode of our temptation, whether we have to resist intemperance, greed, or other things. What they were may determine our trial, but not our fate. It is our relation to Moses' God that does that. Need I waste breath to say that Moses would never have been what he was but for his religion?

REV. C. E. MACGINNESS, A.M.
The Homiletic Review.

The peace of Christ is worth more than the things of this world; do our unconverted friends see that we believe that? The grace of Christ is mightier than evils; do we prove that to those who observe us?—*The Standard.*

THE CHRISTIAN SCIENCE TEXT-BOOK.—Science and Health with Key to the Scriptures with latest revisions and additions, and numbered lines. 700 pages.

For description, price, and other information, see last page of cover.

THE NEW CONCORDANCE.—A complete Concordance to Science and Health with Key to the Scriptures. This work has been compiled from the late revised edition of SCIENCE AND HEALTH, and contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10x7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

CHURCH MANUAL.—Containing the By-Laws of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. This does not include the list of members. Price, prepaid, $1 per copy; $5 per half dozen; $9 per dozen.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America.

It contains about thirty-eight pages of reading matter, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

Works on Christian Science

Written by Rev. MARY BAKER G. EDDY

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Enlarged and Revised, 1902. THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING. Cloth binding, each, prepaid $3 18

Two to twelve books (cloth only) to one address, each, prepaid 3 00
Twelve or more books to one address, each, prepaid 2 75

Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, each, prepaid 4 00
Twelve or more to one address, each, prepaid . . 3 75

Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, each, prepaid 5 00
Twelve or more to one address, each, prepaid . . . 4 75

Levant, divinity circuit, leather-lined, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, wide margins, each, prepaid 6 00
Twelve or more to one address, each, prepaid . . 5 75

Orders for Science and Health, in lots of twelve or more to one address, may include any or all the different styles of binding.

A COMPLETE CONCORDANCE to Science and Health with Key to the Scriptures, 595 pp., 10 x 7. Bound in cloth, marbled edges. Price, single copy, prepaid . . $5 00
Twelve or more copies to one address, each 4 50

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.
Price (cloth), each, prepaid 2 25
Twelve or more books to one address, each, prepaid 2 00

Morocco, limp, round corners, gilt edges, convenient for pocket, each, prepaid 4 00
Twelve or more to one address, each, prepaid 3 75

Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, each, prepaid 5 00
Twelve or more to one address, each, prepaid . . . 4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

Following the exposures of the Postal Department come the astounding details of the methods followed by the ring which secured in the Northwest a million dollars worth of valuable public lands through forgery, bribery, and fraud. The evidence, gained by an investigation covering more than a year, has been laid before the Federal Grand Jury of the District of Columbia. The method pursued was for dummy entrances to be made upon lands about to be set aside for forest reservation purposes. When this was set aside then the cheap land in these reservations was exchanged for the pick of valuable public lands. In this way hundreds of thousands of acres were fraudulently acquired.

Commissioner General Alexandrovsky has officially announced the abandonment of the proposed participation of Russia in the St. Louis Exposition. Following close upon this announcement Mr. Hajimeota, Assistant Commissioner General from Japan, announced that every foot of exhibit space that is given up by Russia will be applied for by Japan, which has ample exhibit material here, or on the way, to fill the additional space.

The House Committee on Foreign Affairs has authorized a favorable report on the Hitt resolution authorizing the President to correspond with the Governments of the principal maritime Powers with a view of incorporating into the permanent laws of civilized nations the principle of the exemption of all private property at sea, not contraband of war, from capture or destruction by belligerent Powers.

The House Committee on Post Offices and Post Roads has agreed to the report of a sub-committee raising the salaries of rural free delivery carriers to a maximum of $720 per annum instead of $600 as at present. The report agreed to take away from such carriers the express and news agency privileges which they now have.

The insurgents in San Domingo have committed another breach of international law by entering the American consulate at Samana and forcibly taking away two refugees. This, with other breaches, makes up a formidable case against the republic that may justify interference in maintaining order in the island.

Representative Shafroth, from a Denver, (Col.) district, whose seat was being contested by R. W. Bonynge, arose in the House last week and voluntarily resigned his seat, admitting that investigation showed that frauds not sanctioned by him had been practised in the election. His course created a sensation.

There is a possibility that the beautiful St. Botolph Church of Old Boston, England, may be duplicated upon the banks of the Charles River, near Boston. This is made possible by a will providing for an Episcopal cathedral in Boston.

Dartmouth Hall, about which centered much of the history of Dartmouth College, and which has sheltered Dartmouth men for four generations, burned to the ground on the 18th.

The Panama Canal Treaty was ratified on the 23d in the Senate by a vote of 66 to 14. All amendments were rejected.

Foreign.

Fifteen hundred tons of wheat and barley foodstuffs for Japan were unloaded at Vancouver from the Royal Mail steamship Empress of China, after having first been loaded on that vessel bound for Yokohoma. The ship discharged on orders from the British War Office that she was not to take any contraband goods. This is to apply to all naval reserve steamers on the Pacific in the British Register, but does not apply to steamers not in the naval reserve, which takes cargoes at their own risk.

Conditions in Venezuela are reaching a satisfactory basis. By a decree just issued, the Government has opened the ports of Guanta, Sucre, and Guiria, which were closed as a result of the revolutionary disturbances; the Government has paid the overdue allotments on account of the award of the Venezuelan Mixed Claims Commission of 1890, amounting to about seventy-seven thousand dollars.

Minister Bunau-Varilla at Washington has been notified of the recognition by Portugal of the Republic of Panama. All the European Governments having diplomatic representation at Washington, with the exception of Turkey and Spain, have now extended recognition to the Panama Government.

A treaty of arbitration between Denmark and Holland was signed February 12, to become effective when the ratifications are exchanged. It contains no limitations in regard to questions which can be decided by The Hague Arbitration Court.

India has nearly 30,000,000 acres in rice, 18,000,000 in wheat, 75,000,000 in other food grains, 1,600,000 in sugar cane, 251,000 in tea, 10,000,000 in cotton, 1,000,000 in indigo, and 300,000 in tobacco.

Industrial and Commercial.

Estimates on the cost of construction are being prepared for an electric railway from Guadalajara, Mexico, to the town of Chapala, on the northern shore of the lake bearing the same name. If built, this line will render accessible to the traveler the largest body of water in the State and one of the most beautiful in the world. The lake is six thousand feet above the sea level, entirely surrounded by mountains, and has a temperature that varies but a few degrees during the entire year.

An enterprise of considerable importance, promoted by men of national repute, is about to be inaugurated near Aiken, S. C., to engage in the manufacture of pottery from the Aiken County kaolin clay, considered the finest in the world. The clay also carries large quantities of aluminum, and a plant for its extraction will be erected.

The Pennsylvania Railroad Company has found the bids for the construction of the Manhattan Tunnel under the North River, New York, so high that it will probably build the tunnel itself instead of letting it out to contractors.

Twenty of the ninety engines ordered of the American Locomotive Works for use on the Mexican Central Railway, have reached their destination. They are a special design of the mogul type.

A rich find of onyx has been discovered in a cave in Jackson County, Alabama, and a rich surface deposit of phosphate at Scottsboro.

The log cut in Maine this winter is expected to total about 750,000,000 feet.

General.

General Peary, in speaking of his approaching trip to the North Pole, expects confidently to attain the goal of his hope and reach the Pole. He has twelve years' experience behind him. His plans contemplate a special and powerful vessel, steel sheathed, with one thousand to fifteen hundred indicated horse-power engines capable of wide steaming area; the employment to the utmost extent of a tribe of faithful and devoted Eskimos; and the use of the American or Smith Sound route. He expects to start in August, reach Grant Land in September, and in the following February make a sledge journey from the northern end of Grant Land straight across the central polar pack to the Pole itself and back, making altogether four hundred and twenty nautical miles.

An advance of five per cent in the price of diamonds has just been made by the De Beers Diamond Selling Company, according to advices from Amsterdam, Antwerp, and London. This is the fourth advance within a year. This company handles over ninety per cent of all diamonds mined. About sixty per cent of these come to the United States. Diamonds now sell about twenty per cent higher than at the time of consolidation of the De Beers mines in South Africa in the 70's.

The cities with populations above the million mark are: London, 6,581,372; New York, 3,437,202; Paris, 2,714,068; Berlin, 1,888,848; Chicago, 1,698,575; Vienna, 1,674,957; Canton, 1,600,000; Tokio, Japan, 1,440,121; Philadelphia, 1,293,697; St. Petersburg, 1,267,022; Calcutta, 1,125,400; Constantinople, 1,125,000, and Pekin, 1,000,000.

Two and one-half tons of whalebone have been sold in London at the rate of fifteen thousand dollars per ton, which breaks all records in the matter of price. It is stated that there are only four tons of whalebone in the world, all the supplies having been exhausted.

A special train on the Santa Fé road recently made the trip from Albuquerque, N. M., to Chicago, 1,663 miles, in 37 hours, 15 minutes, including stops. This is an average speed of 44½ miles an hour. Great speed was made through the mountains.

A portrait of Michael Angelo by himself has been discovered at Paris. Old engravings permit of the identification of this picture with the original of Michael Angelo. Two other portraits by himself are extant, both of them at Paris.

The building of the Alaskan Central Railroad from Seward on Resurrection Bay to Atwood, a distance of 413 miles, is said to be assured. The road will tap regions rich in forest and mineral resources.

It cost one cent a head to take the first census and seventeen cents a head to take the twelfth census.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

From our Contributors.

Overcoming Ingratitude.

CLARENCE A. BUSKIRK.

INGRATITUDE is a product of the mortal mind that is unillumined by Truth. It is always a glaring vice when exhibited by others. When we ourselves exhibit ingratitude, —and we are all thus guilty more or less frequently and flagrantly until we learn the unreality of error,—our egotism seeks to escape the eye of conscience. In this it would imitate the foolish ostrich when it buries its head in the sand and imagines that its entire body is concealed. We forget that while such petty concealments may, perhaps, deceive ourselves, they are absurdly transparent in the light of omniscience. And it is often the case when we succeed in our sophistries with our own consciences, seeming to hide our sins from ourselves, that our evasions are but transient and ineffectual; and, later on, our punishments whip us all the more severely because they are delayed. Soon or late the uttermost sands are sure to run in the glass of justice.

It seems to have been the generous hearts which have suffered most frequently and most keenly from the hemlock-cup of ingratitude. Socrates was not alone in finding his contemporaries ready "to heap ingratitude on worthiest deeds." Praxiteles was not the last to find his most beautiful statue destroyed by the malice of one he had benefited. Timon merely suffered a world-wide experience when he learned from the desertion of the parasites who had shared in his glittering munificence that sentiment which Dryden has expressed in his line, "Want gives to know the flatterer from the friend." Poor old King Lear was neither the first nor the last who has fled even into the tempest and lightning-torn darkness to find peace for a heart sorely pierced by the poisoned arrows of ingratitude. Too often, our highest motives and purest deeds are misunderstood and maligned by their beneficiaries. Too often, when we have consented to act as disinterested ladders for others tc climb by, we find curselves ignored when we are supposed to be no longer useful. Indeed, the teeth of monstrous ingratitude seem to be found nearly everywhere in the abode of mortal mind, inflicting many a wound upon the sensibilities of the generous.

Is there a tree by the casting of whose leaves into these bitter waters they, like the flow of Marah, shall be made sweet? The tree of Truth grows everywhere; it grows in every age, and never withers nor perishes; its leaves are the effectual remedy for every evil. Love moistens its roots with perpetual vigor, clothes it in beauty, and fills it with music. Whoever shall linger long enough beneath it shall find his own spiritual mightiness as divinely formed, and thus be enabled to overcome the errors of ingratitude in himself and in others.

We are taught, however, by Mrs. Eddy, that "it is easier to desire truth than to rid one's self of error. Mortals may seek the understanding of Christian Science, but they will not be able to glean from it the facts of being, without striving for them. This strife consists in the endeavor to destroy error of every kind, and to possess no other consciousness but good" (Science and Health, p. 322).

We cannot "destroy error" as manifested in our own or in others' ingratitude, except as we "possess no other consciousness but good." These be wondrous words: "Possess no other consciousness but good!" In all the years talismanic sentences have been engraven amid mystic figures; but never Delphic shrines, Roman altars, or Egyptian temples knew such words as these. They contain the implication of the primal truth,—God, good; they have power to cast out the phantoms of error; they breathe a benediction.

If we can but bring ourselves to that state in which we shall "possess no other consciousness but good," we shall have solved life's enigmas; and while we are educating ourselves to approximate this consciousness, we are climbing the holy mountains which are not peopled by the phantasmagoria of error.

If we are atheists, or if we believe that God is capable of hate, or revenge, or injustice, or that He is both good and evil and given to chance and caprice; then it follows that we must possess some other consciousness than good. The Christianly scientific concept that "God is Love" implies that all reality is good, that to "possess no other consciousness but good," is to possess the only consciousness which is true. All other consciousness must be false, or else God is not All in all.

The Christian Science concept of God takes away from us the last refuge and excuse for ingratitude towards our Father who dwells in heaven,—harmony. The more this concept becomes a part of our consciousness the less ingratitude can we feel or manifest, and the more will our consciousness overcome the sense of ingratitude in others.

Is there any reason, if the Christian Science concept of God be the true one, why gratitude towards Him should not be constantly in our thoughts? We may be untrue to God, but God can never be untrue to us. Earthly friends may turn against us. Wives, husbands, sons, daughters, brothers, sisters, all may prove ungrateful; those we trust may become traitors; wealth may vanish, and poverty and dire afflictions assail us on all sides; but God's friendship is always awaiting us, and His hand of help is always ready when we seek it. God's friendship is without variableness or shadow of turning. It awaits us in success and in failure, in riches and in poverty, in joy and in affliction. Though we abuse it, yet is it ever ready to receive us again and again when we rightly seek it. In place of our treason it gives us forgiveness and faithfulness; from our sins and follies, it points us to the paths of purity and wisdom. God is strength for our weakness, harmony for our discords, peace for our tempests. God's loving watchfulness is ever over us, God's loving care is ever around and about us. He guards the pauper and the prince alike. He is no respecter of persons. All may turn to Him in their distresses and none shall be turned away. And God's arm is never shortened. Our Father is omnipotence as well as Love. Why should we not trust in God always and in all things, and mingle with our trustfulness the perpetual perfume of gratitude?

The True Ground of Assurance.

M. L. BAKER.

Ah me, for why is all around us here
As if some lesser god had made the world
And had not force to shape it as he would?
Or else as if the world were wholly fair,
But these dull eyes of mine so dense and dim
They have not power to see it as it is.

THESE words express very much the sentiments of many thoughtful people looking for a fuller light and revelation as to what God is, and what is His relation to His creation. We who have the joy of clearer vision through the spiritual illumination which came to our beloved Leader, guiding her to give to the world our wonderful text-book, "Science and Health with Key to the Scriptures," render grateful thanks to God and to His messenger. What a joy is ours to know that God is indeed all that the Bible declares Him to be, and that it is our privilege to realize this, knowing that the mists of materiality will vanish and our vision be cleared when we are willing to forsake the beliefs which have held us in thraldom, and turn with simple, childlike trust to divine Truth. Our prayer needs to be for the fuller understanding which is a "quality of God" (Science and Health, p. 506), that understanding which will indeed lead us into all truth. Since we know that in divine Love there are no shortcomings, that in omnipotence there is no lack, that in omniscience knowledge cannot be bounded, and knowing as we do to our great joy that man as God's reflection can only reflect what He is, our effort must be to sweep from our consciousness all that hides our true being. As we go along our way, seeking faithfully to live in obedience to Truth as revealed through the Bible and Science and Health, it is a great joy to demonstrate the omnipresence of divine Love and man's right and privilege to reflect that Love, and his dominion over material sense. We read in our text-book that Science "rests on fixed Principle, and not upon the judgment of false sensation" (Science and Health, p. 128).

It has been a great help to me to have been able to prove this within the past week. An old ailment in the form of a badly ulcerated throat asserted itself. I did not at once detect the nature of the error, hence it was not met as quickly as it might otherwise have been. The tonsils were much enlarged and inflamed, and covered with ulcers. This state continued for four days. Again and again during this time, the unpleasant symptoms accompanying such a condition tried to assert themselves, but were *instantly* met by a thought of Truth. I saw how powerless was error in the presence of Truth. The whole trouble disappeared without causing me the slightest inconvenience. I ate as usual, went out in the inclement weather, and did everything as usual. The realization of my dominion as God's child was too strong to allow erroneous material belief to have a stronghold. It was a most interesting experience and I could say with Paul, "I take pleasure in my infirmities, . . . for when I am weak, then am I strong." It was a most valuable lesson to me not to make anything of a manifestation of error, but simply to know its nothingness. I had many times been utterly prostrated by an affection of this kind, and the proof which I have just had of the omnipresence, naturalness, and availability of good, the ever-operative Principle of our existence, has increased my gratitude to the Father of all good and to our beloved Leader, through whom has come to us this revealed truth.

"Thy Will be Done."

ALICE THRALL.

CHRISTIAN SCIENCE, in its teaching that there is but one good for all, restores the undivided garment of righteousness, or rightness. It countenances no partial truths, makes no concessions to the "ifs" and "buts" of material hypotheses, and it refutes the doctrine of a mixture of good and evil elements in man's constitution and development. This point established, the lessons of daily life lose their bitter pangs, for thought, looking upward, receives the divine impulse, catches a glimpse of the universality of harmony and the mighty trend of its law.

Whatever is best, whatever is the divine plan for the Cause of Christian Science, is best also for the individual Scientist, and can work out only the ends of good wherever it touches human experience, for under the law of interdependent harmony there can be no divided duty, no element of loss in another's gain. The scientific sense surrenders the guidance of human affairs to divine Principle, and the Scripture is fulfilled: "Commit thy way unto the Lord; . . . and he shall bring it to pass." We do not mould our own careers, in their events or potentialities; but "trusting God with our desires," as Science and Health declares (p. 1), they are moulded into right action.

It is axiomatic that Truth makes no mistakes. Whatever, then, proceeds from Truth, the only cause, is of the divine impulse, and must be, to its farthest bound, harmonious in relation and expression. Under this law it is "more blessed to give than to receive;" for whatever is of God can never be lost, nor can it diminish in usefulness. Thus the understanding of self-surrender takes to itself brighter joys, new possibilities, and develops them on progressively scientific lines.

This unity of good in operation is one of the lessons of the hour, and leads the followers of Christian Science in paths untrod since the early dawn of the Christian era. Individually discerned, faithfully followed, it will impel the Cause from stage to stage of progress, into the milennial dawn. The individual problem is the hastening of this consummation by consecrated effort to surrender self to God. When, step by step, this is finally accomplished, man has lost nothing, and gained much. Then will man see that every effort to bless another, even though involving sacrifice, has secured his own blessing and enriched his own understanding.

[Written for the *Sentinel*.]

The Treasure House.

MARY J. ELMENDORF.

THERE stands a wondrous Treasure-House,
Beside a peace-enfolded sea,
Wherein are riches fairer far
Than pearls of Ind or Araby.
Its strength is as the granite hills;
Its walls white as the soaring dove;
And from the sea-deeps to the stars
Is writ its name of Love.

The cloud-strewn pathway leading there
Is rough and fraught with wraiths of gloom;
Yet he who, dauntless, struggles on
Shall see the pall of shadows bloom
As Aaron's rod, with flowers of light;
And he who tramples wayside sins,
Shall tread at last that tranquil zone,
And pass within the open gates
To find its wealth his own.

Within that Treasure-House is peace;
Healing and harmony are there;
Power and truth and grace sublime;
And mankind to this store is heir.
Go, ye that walk with sin or care:
Go, ye that suffer, ye that grieve;
Before those portals watch and pray,
Knowing ye shall receive.

Christian Science.

WE have attended the services of the Christian Scientists. We have always found their meetings full of intelligent, well-dressed, attractive people, a little above the average. Without entering into any discussion as to the merits of Christian Science as a cure for disease, we desire simply to state what we have heard in these meetings.

During a period of perhaps one hour sometimes ten or fifteen people rise and offer testimony as to the benefits of the teachings of Christian Science. These testifiers are sometimes men and sometimes women, seldom boys or girls. They mostly refer to physical maladies that have been cured. Their statements are along similar lines.

Briefly summarized, they are to the effect that some chronic ailment had dragged them down; some moral turpitude had beset their life. Church and doctor had failed them. The evangelical religion and drugs had alike failed to reach the case. Since making Christian Science a study they had been restored to strength of body and peace of mind. Father and Mother, brother and sister, rise quietly and give these testimonials in the most solemn and sincere manner imaginable.

We do not doubt a word they say. We believe they are telling the truth. We might possibly offer a different explanation of their cure than they are inclined to offer for themselves. But it makes very little difference. The fact is they are cured. This, after all, is the principal fact. Whereas, they were once sick, they are now well. That is enough. We feel no disposition whatever to distrust their faith or to criticise their theories.

The result justifies the existence of such a cult. Their Sunday services are very quiet. They consist of singing hymns that convey the same sentiments and the same aspirations that would be heard in other churches, and to an onlooker it seems very much like a religious service of the most reverent character.

We wish them much success. We hope they will increase. We really believe that it would do our town good if Christian Science should wax strong and become a real power in social life. Surely it can do no harm to have something happen among us to stir our faith in the power of mind over matter, of health over disease, of truth over error, of prayer over speculation. By an M. D.

Braintree (Mass.) *Observer.*

The Rights of the Child.

To the Editor.

An editorial in *The Globe* a few days ago on Christian Science and the law, concluded as follows: "But we must recognize the separate rights of the child, and defend it when necessary, even against wrong by the parents. Recognizing the rights of a child to protection by the state, we must require that it receive, when sick, such medical aid as is endorsed by the general concensus of public opinion." Whether it is meant to refer to Christian Scientists or not, the above statements will be understood as pointing to them, and in justice to more than seven hundred Christian Scientists in Toronto, permit me to state that they are quite as careful in looking after the health of their children as any other class in the community, and obey the laws regarding contagion, quarantine, etc., as strictly as any others. That the children of Christian Scientists do not need any protection against their parents' negligence may be seen from the low mortality rate among them as compared with the rate among other children of the city. Because Christian Scientists do not believe in the efficacy of medicine as they used to, it must not, therefore, be argued that they are less careful of their own and their children's health, for, after trying medicines first, and afterwards Christian Science, they have found the latter to be more effective. The mortality rate among members of the Mother Church of Christian Science per year for the last two years has been about five per thousand, as compared with the rate of about eighteen per thousand for the city of Boston for the same period, and the rate of nearly fourteen per thousand for the Province of Ontario for the same period. C. R. MUNRO.

The Toronto (Can.) *Globe.*

Christian Scientists are neither teaching nor practising the nonsense that "your body does not exist," and that in case of accident you need no help. No Christian Scientist denies the existence of a single object in the universe, but opinions may differ as to the nature of matter.

As far as my reading has gone, I have never found any satisfactory definition of matter, except in the Christian Science text-book, and there is much to show that even natural scientists are tending to define matter in terms of mind.

Science is classified knowledge, but there are vast areas of knowledge which are conceded to be inaccessible to the physical senses. The whole domain of what are called abstract ideas is outside of their range. Christianity teaches that God is the creator and first cause of all that is, and Jesus said. "God is a Spirit" (John, 4 : 24, R. V.).

Shall not that be called science which deals with the first cause of all that is? Science cannot be limited by the uncertain evidence of the physical senses; and the problems of life and death, happiness and holiness, cannot be solved according to the vagaries of an illusive belief styled matter. The test for the man on the street is to ask himself what he really desires, and an honest investigation will lead him to discover that the height of his desire, the acme of his hope, is a purely mental, metaphysical, and abstract idea, variously called happiness, comfort, peace. He may imagine materialistic means for attaining this desire, but his goal is never matter. W. D. MCCRACKAN.

Detroit (Mich.) *Times.*

We agree with the critic that the argument "that there is no such thing as feeling, tasting, or smelling, except in the imagination of persons, is all bosh." Christian Science does not teach any such absurdity, though the uninformed may think it does. What Mrs. Eddy does say is this, "Mind alone possesses all faculties, perception, and comprehension; therefore mental endowments are not at the mercy of organization and decomposition" (Science and Health, p. 488). Remembering that by Mind, Christian Science means God, who will deny that in Him in whom "we live, and move, and have our being," are all faculties, and that they are immortal? WILLARD S. MATTOX.

Bridgeport (Conn.) *Standard.*

Every convert to Christian Science, finds that the good which he may have derived from other religious beliefs is retained and all its promises fulfilled in the degree in which Christian Science is understood. This inspires confidence and continued study, inasmuch as it is found that Christian Science has taken away none of the good but has rather enhanced the value of that which remains.

ALBERT E. MILLER.

Reading (Pa.) *Telegram.*

The triumphs of true eloquence, the most august manifestation of power on earth, are never seen except when the orator comes forth in the *simple* majesty of truth; overpowered with the weight of his convictions and the momentous import of his theme.—"Orations of the Revolution."

Among the Churches.

Growth in Helena, Mont.

The Christian Science society has taken a lease of the Unitarian Church under the terms of which it will hold services there Sundays and Wednesday evenings. The growth of the society necessitated larger quarters.

Helena Independent.

Progress in Atlanta, Ga.

Second Church of Christ, Scientist, which since its organization has been located at 122 Peachtree Street, has moved into handsome new quarters in the Grand Building.

The public reading rooms are situated in the front on the fifth floor, and the regular Sunday services and mid-week services are held in the spacious rooms of the Atlanta Women's Club, on the same floor.—*Atlanta Constitution.*

Growth in Omaha, Neb.

The Christian Scientists of Omaha, who have been holding services in the church edifice, Twenty-seventh Street and St. Mary's Avenue since 1895, are compelled to secure more commodious quarters. Pending the erection of their contemplated church structure, they have secured the use of Chamlers' Hall, Twenty-fifth and Farnam Streets, their first service to be held in these quarters Sunday. The hall has a seating capacity of six hundred.—*Omaha Bee.*

New Church Home in Iowa City, Ia.

First Church of Christ, Scientist, held the first service in its new quarters January 10. Spacious rooms in Odd Fellows Block have been beautifully fitted up and both the auditorium and reading room are very adequate and attractive.

This church was organized in October, 1903, and now has an active membership of fifteen and is steadily growing.

Items from *Iowa City Republican.*

Advance in Ashland, Ore.

The *Ashland Tribune* refers to the annual meeting of First Church of Christ, Scientist, as follows:—

A resume of the year's work showed a marked increase in interest and attendance at all services, also an addition of ten to the membership. The treasurer's report was most encouraging, as it showed all obligations cancelled and a very substantial sum in the treasury with which to start in on the work of 1904.

Distribution of Literature in Kansas City, Mo.

First Church of Christ, Scientist, of Kansas City, has tendered the public library Mrs. Eddy's works as follows: six copies of "Science and Health with Key to the Scriptures," and one copy each of "Miscellaneous Writings," "Rudimental Divine Science," "Unity of Good," "Retrospection and Introspection," "Pulpit and Press," "No and Yes," "Christian Science *versus* Pantheism," "Christian Healing," "People's Idea of God," and Communion Messages for 1900, 1901, 1902. A most courteous letter from the librarian expressing his hearty thanks for the same has been received.

Church Edifice begun in Snohomish, Wash.

The corner-stone of First Church of Christ, Scientist, has been laid and it is with thankful hearts that we witness the growth of another monument of the truth of Christian Science. The first faithful workers, who have met and overcome so many obstacles, feel their work has not been in vain, and we who have come in later can scarcely realize how great a joy this must be to them. Our Readers are efficient, and the church bids fair to prosper. The ceremony of laying the corner-stone was simple and impressive, and the text-books of Christian Science were deposited in it. We hope soon to occupy our own building.

ROSE D. HASKELL, *Clerk.*

The Work in Momence, Ill.

We are glad to report progress at this point. Among our membership we have those healed of tumor, deafness, rheumatism, hip-disease, grip, the wearing of glasses, smoking, etc. We are slowly gaining ground, three new members having joined us lately. Our average attendance is now about twenty. We have just started a building fund and look forward to the time when we shall occupy a building of our own.

Many of us have had the benefit of class instruction, and all our members desire to express their loyalty to Christian Science and to our Leader. In following her as she follows Christ, they know that they are following the lead of wisdom and love. J. VAN INWAGEN, JR., *Clerk.*

Progress in Herkimer, N. Y.

First Church of Christ, Scientist, in Herkimer was organized one year ago with fifteen members. During the year a lecture has been given by Judge Ewing and a contribution made to the building fund of the Mother Church. The room in which the services were held was found inadequate for the growing needs of the church, and a suite of rooms in a new building, including hall and reading room, were engaged.

A building fund was started during the first year of the organization of the church, the Easter offering being set aside for that purpose.

The reports read at our annual meeting have given us a feeling of gratitude and renewed our courage. Every claim of error which has threatened to impede our progress has been overcome by Truth and this overcoming has been a cause for rejoicing.—O. E. NAUGH, *Clerk.*

The New York Central Christian Science Reading Room Association.

The annual meeting of this Association was held January 19, in the Sunday School Room of Second Church of Christ, Scientist, New York. There was a good attendance and the reports of president, secretary, treasurer, and librarian were listened to with interest.

The Central Reading Room at 23 West 23rd Street, which was opened in November, 1903, under the auspices of representatives from Second, Third, Fourth, and Fifth Churches of this city, has gradually progressed in its work and much Christian Science literature has been distributed. In addition to the many visitors from the city and suburbs, there have been several visitors from distant parts of the country who have availed themselves of the privileges of the Reading Room, where all are cordially welcomed.

Several gifts to the room have been received, including a gift of literature from our beloved Leader, Mrs. Eddy, for all of which we are grateful.

The cause of unity and of the publicity of Christian Science in this city has been helped by this work, and we look forward to steady progress under the guidance of divine Mind.—R. E. CAREY, *Secretary.*

Men talk as if victory were something fortunate. Work is victory. Wherever work is done, victory is obtained. There is no chance, and no blanks. You want but one verdict; if you have your own you are secure of the rest.

EMERSON.

The Lectures.

Beloit, Wis.

Christian Scientists and their friends Friday night, January 22, listened to a clear exposition of Christian Science by Bicknell Young, C.S.B., of Chicago.

Dr. E. G. Smith, Professor of Chemistry in Beloit College, and one of the leading authorities on chemical analysis in the country, introduced the speaker.—*The Beloit News.*

Walla Walla, Wash.

Judge Septimus J. Hanna of Colorado Springs delivered an interesting and exceedingly impressive lecture in the Opera House last night [January 19] before an audience whose size was a gratifying indication to the local Christian Scientists of the interest taken in that subject.

The lecturer was introduced by Mrs. M. Anna Osgood, C.S.D., who made a speech of presentation that touched on the sphere and purpose of Christian Science and took up some phases of the work.—*The Walla Walla Union.*

Phoenix, Ariz.

Judge William G. Ewing of Chicago yesterday afternoon [January 10] addressed a very good-sized audience at the Dorris Theatre, on the subject of Christian Science. The character of the audience, though, was more impressive than its size, for the occasion was one that called out only thoughtful men and women who desired to listen to the remarks of an able man on a subject that has commanded the attention of educated people generally in recent years. Judge Ewing was introduced to the audience by Judge D. H. Pinney, well known both here and in Chicago, in short but very appropriate remarks.

The Arizona Republican.

South McAlester, I. T.

A large and representative audience turned out at the Opera House Sunday afternoon [January 3] to hear Carol Norton lecture on Christian Science. Judge G. A. Grace made a graceful introductory speech, as follows:—

Ladies and Gentlemen:—We have assembled this afternoon to hear a presentation of the doctrines of Christian Science by one of its authorized exponents. Most of you I presume, like myself, are unacquainted with the real claims and accepted doctrines of that organization, as well as with the arguments and reasons by which they are supported.

I understand, however, that in 1866, Rev. Mary Baker G. Eddy, by prolonged study of the Scriptures, discovered the fundamental principles of Christian Science, and as all science is knowledge reduced to order, she set forth those principles in a book, first published in 1875, entitled, "Science and Health with Key to the Scriptures."

That book I have partly read and can assure you that it is a work of unusual power. No one can read that book without conceding the ability of the writer, and acknowledging the possibility, at least, that the world has not yet grasped the full significance of the glad tidings of great joy announced to the Judæan shepherds; and that the church itself may not have lived up to the full measure of its privilege in doing works of love and power.

"Shall these dry bones live?" was the query of the ancient prophet; shall pain that wrings mortality, shall disease and suffering, fly away like a horrid nightmare, before the awakened mind, imbued with a new appreciation of the Master's words: "He that believeth on me, the works that I do, shall he do also; and greater works than these shall he do."

It is not impossible that new and great truths may be discovered in our day. It is certain that the great doctrine of evolution, for instance, if not first suggested, has yet been established in our own day and time. Let us not treat the new ideas that shall be presented to us to-day as such were treated in the days of Copernicus, Galileo, of Des Cartes, and of Columbus; but on the contrary, let us hear, and weigh, and consider, and, like the noble Bereans, search the Scriptures to see if these things are true.

While I know but little of the subjects to be discussed and have no decided views upon them, we are fortunate to-day in having a man with us who does know; a gentleman who gives his days and his nights to the study of this work; a man who has a mission and will give to us the results of his scholarship and study,—Mr. Carol Norton,—whom I now have the honor to introduce to you as the lecturer of the evening.—*The Evening News.*

North Yakima, Wash.

Judge Septimus J. Hanna delivered a lecture in Larson's Theatre, Monday evening, January 18. He was introduced by A. W. Hertzka, First Reader of the local church, who spoke in part as follows:—

Friends:—The lecture which you have been invited to hear this evening is given in the spirit of brotherly love, and our only reason for giving these lectures is our love for God and our desire to have all share in the many blessings which we are receiving through the understanding of God as taught in Christian Science. Jesus said, he was "the door" and "the way." Christian Scientists are not seeking to enter by some other door, nor to climb up into the heavenly kingdom by any other way than that pointed out by Jesus which "way" we understand to be the way of the cross,—the way of self-sacrifice and self-denial,—in order that we may show forth the love that is in God, not the love that is in our mortal selves. An unbiased and unprejudiced mind, however, is needed, in order to understand the truth or to rid ourselves of the errors we may find within ourselves. We need the spirit of Gamaliel, who, while not in the ranks of Christianity, said, "If this counsel or this work be of men, it will come to nought; but if it be of God, ye cannot overthrow it; lest haply ye be found even to fight against God."

We need the spiritual discernment which is able to see that if a work is of God it will stand throughout eternity, but if of man, error, and human invention, it will come to nought and has within itself the seeds of self-annihilation and self-destruction. The lecturer of the evening has not come to defend the truth but to explain. Truth needs no defence, it is its own defence. Truth does, however, need to be understood. Jesus said, "Ye shall know the truth, and the truth shall make you free."—*Correspondence.*

Coldwater, Mich.

A good-sized audience was present at the Christian Science lecture at Armory Hall [January 24], including many business men and representative citizens. In introducing the speaker, Judge F. B. Reynolds said in part,—

This is an age of independent thought, and especially is this true along the line of religion. There are a great many denominations, each having a creed of its own, yet among those denominations there is a growing liberality regarding each other. There is a natural tendency on the part of us all to think our religion is the only religion, but on consideration I am convinced that there is something good in each creed. As for myself, I am not an advocate of Christian Science and my knowledge of it is somewhat indefinite, but I welcome this opportunity of listening to a discussion of the subject, and I believe such is the attitude of all who are present this afternoon. I take pleasure in introducing to you Arthur R. Vosburgh, C.S.B., of Rochester, N. Y.—*Coldwater Reporter.*

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

A Living Christianity.

ONLY to the extent that a religious faith is able to relieve the necessities of humanity, whether these necessities be moral, physical, or spiritual, is it of value to mankind. Knowing that religion must be practised as well as preached, Christian Scientists will respond with a hearty "Amen" to the sentiment thus expressed by a writer in *The Homiletic Review:* "Religion is meant to direct conduct, and the smallest affairs of life are to come under its imperial control, and the only way by which a man can get anything out of his Christianity is by living it. It is when he sets to work on the principles of the Gospel that the Gospel proves itself to be a reality in his blessed experience."

When we read the statement, "The only way by which a man can get anything out of his Christianity is by living it," we naturally inquire, What is this Christianity which must be lived? The answer can be found only in Jesus' own words and works.

When Jesus was asked, "Which is the first commandment of all?" he said, "The first of all the commandments is, Hear, O Israel; The Lord our God is one Lord: and thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind, and with all thy strength: this is the first commandment. And the second is like, namely this, Thou shalt love thy neighbor as thyself. There is none other commandment greater than these."

Matthew says, "Jesus went about all Galilee, teaching in their synagogues, and preaching the gospel of the kingdom, and healing all manner of sickness and all manner of disease among the people. . . . and they brought unto him all sick people that were taken with divers diseases and torments, and those which were possessed with devils, and those which were lunatick, and those that had the palsy; and he healed them." And immediately after the Master had delivered the Sermon on the Mount, "Behold, there came a leper and worshiped him, saying, Lord, if thou wilt, thou canst make me clean. And Jesus put forth his hand, and touched him, saying, I will; be thou clean. And immediately his leprosy was cleansed."

In the forty days which Jesus spent with his disciples after the resurrection he "commanded them that they should not depart from Jerusalem, but wait for the promise of the Father, which, saith he, ye have heard of me," and after the Holy Ghost had descended upon the disciples, Peter and John healed the lame man at the gate of the temple, and when they were called to account for this evidence of Christianity, "Peter, filled with the Holy Ghost, said unto them, Ye rulers of the people, and elders of Israel, if we this day be examined of the good deed done to the impotent man, by what means he is made whole: be it known unto you all, and to all the people of Israel, that by the name of Jesus Christ of Nazareth, whom ye crucified, whom God raised from the dead, even by him doth this man stand here before you whole."

The healing of disease and the destruction of sin is inseparable from Christianity, for they are inseparable from the record of Jesus' ministry, and just to the extent that we can do the works which he did for the salvation of humanity can we claim that we are his followers. That this work is being done is shown by the testimony of thousands who were sick and who are now well. The article signed, "By an M.D.," on page 405 of this issue is an impartial testimonial to the fact "that the Gospel proves itself to be a reality" to those who diligently seek Truth in the way of Christ.

M.

The Divine Exaction.

THE authority of Truth is revealed in the unvarying insistence and universality of its demands. It knows no favoritism, makes no concessions, and what it requires of one it requires of all. As the sun's rays find their way into every state and condition of darkness to fulfil in every instance the same behest, so do the divine ideas hasten to the fulfilment of their one all-comprehensive duty, and they ignore not one jot or tittle of that perfect law, the entirety of which is dishonored in its least infringement.

When Jesus said, "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind," he left no place for reserve in Christian consecration, and made it clear that our responsibility is to be met only in the completeness of our individual obedience. When he said, "Preach the gospel, heal the sick," he surely spoke to all men, and in terms of equal requirement; and his commandments are to be kept by a sincere and persistent endeavor to do just the thing he names.

Christian Scientists are not exempt from the temptations of a false sense of humility, timidity, or incapacity. They are often prompted by error to assign to others duties and responsibilities which come to them, but the fulfilment of which is not in keeping with some unredeemed sense, taste, or habit; they may "feel so weak" or "so unworthy," and they thus begin to make excuse. It is certainly true that a division of labor is no less wise in the human activities which have a spiritual end, than in those which have an economic end, and that each should contribute that kind of human effort in which he is most skilled, but it is none the less true that the spiritual requirements and obligations of Christianity are imposed upon all alike. Each must meet and overcome for himself every foe of the spiritual life, and in so far as error finds in us any response to its appeal, any concession to its falsities, in so far it is revealed as our individual and yet unconquered foe. The slightest fear or hesitation in meeting a claim of disease, is evidence that a task is laid upon us respecting it which no other may assume, and this leads us to the realization, sooner or later, that every Christian Scientist must reach the understanding which will enable him to face every known enemy of health and holiness as its master.

The command is definite, unequivocal, "Heal the sick," and it places upon every disciple the duty and privilege of destroying the asserted power of every demon of disease. This is both our supreme obligation and our supreme privilege. We may wisely call for help in the time of our spiritual immaturity, or we may defer the harder problems for a day of increased understanding and experience, but to error's every challenge we must some time make answer and enter the lists armored with Truth for its defeat, and there is no discharge in this war.

The seriousness of this work before us might startle even the most courageous did they not know that it is God that worketh in us to will and to do of His good pleasure, and that the darkest, most terrifying manifestations of evil, to human sense, disappear into their native nothingness before the light of Divine understanding. "The refutation of the false testimony of material sense is no difficult task, in view of its conceded falsity. The refutation becomes arduous, not because the testimony of sin or disease is true, but solely on account of the tenacity of belief in its truth" (Science and Health, p. 396). The fight is on for every aspiring

Digitized by Google

heart, and the quickening words of the Master may be heard above the din of every earthly conflict, "Be of good cheer, I have overcome the world." The promises of God stand fast, and the demonstrations that are being chronicled in the advancement of our Cause remove all occasion for doubt as to the outcome. "Him that overcometh will I make a pillar in the temple of my God." W.

The Corner-Stone.

WITH the lapse of time many of the objections which were raised against Christian Science in the earlier days of its history have, one by one, been withdrawn. Those who are disposed to be fair, are admitting that it is a statement of religion which gives a reasonable postulate of the nature of God and a consistent explanation of man's relation to Him. It is easy for all to accept a declaration of the justice, impartiality, and mercy of God; for the advanced thought sees that these attributes are inseparable from an intelligent concept of the Supreme Being. There are, however, many who refuse to take the next step and admit that the right conception of God leads inevitably to the demonstration of Truth in the healing of the sick; indeed, it seems that there would now be little objection to Christian Science if this vital doctrine were not insisted upon.

After our enlightenment through the study of Science and Health, we wonder at our quondam blindness to the unequivocal teaching of the Bible on this subject. We find the great Teacher giving it constant emphasis as in his memorable discourses in the Temple after the triumphal entry into Jerusalem. He then quoted from the 118th Psalm, which contains a dramatic narration of the experience of one who "called upon God in distress" and was healed. This man goes up to the Temple to offer sacrifice and thanksgiving, and this is his song as he approaches the entrance, "I shall not die, but live, and declare the works of the Lord. . . . The stone which the builders refused is become the head stone of the corner." The Master cited this passage when the priests and elders demanded his authority for the healing and teaching which he was then doing, and he added, "The kingdom of God shall be taken from you, and given to a nation bringing forth the fruits thereof."

When Peter and John were brought before these same dignitaries charged with the offence of healing a man lame from his birth, Peter boldly maintained that it was the Christ-power which had healed the man, and said, "This is the stone which was set at nought of you builders, which is become the head of the corner;" and he added, "Neither is there salvation in any other." The helpless cripple could find no other salvation save this, and his presence there was the only endorsement Peter needed, for when they saw him standing by the apostles, "They could say nothing against it."

It were well to ask what Christianity would avail the thousands, who in late years have been healed through Christian Science, if this "chief corner-stone" were removed from the vast temple in which they now aspire to worship the Father, "in spirit and in truth"? It is true that at one time this healing had no place in their thought, or at most it was only the tradition of a bygone day, but the hour came when, hungry in the wilderness, or tossed perchance on a dark and stormy sea of sorrow, sickness, or sin, all else having failed, they were ready to say, "Blessed is he that cometh in the name of the Lord,"—in the name of the Christ who bore the scorn of men, but who healed "all manner of sickness and all manner of disease." Then they found that the same Christ is to-day sufficient unto every human need.

There are many who hold the mistaken belief that this healing means nothing more than relief from physical suffering, but this is far from being true. Could the world but know what it really brings to those who accept it, not a voice would be raised in condemnation, for all would recognize in this healing ministry the presence of Emmanuel, —God with us. To be healed in Christian Science means that God has been revealed as the only Life, and as we reflect the divine Life we cease to be either sick, sinful, or sorrowful, since these conditions are not to be found in God. This healing is indeed the "corner-stone," and our Leader says, "Past, present, future, will show the word and might of Truth—healing the sick and reclaiming the sinner —so long as there remains a claim of error for Truth to deny or destroy" (Miscellaneous Writings, p. 100).

K.

Letters to our Leader.

St. Augustine, Fla., February 17, 1904.

Beloved Teacher:—I am among the blossoming roses, waving palms and ferns, flowering shrubs and plants, and soothing, balmy breezes of the languid, "sunny South," and glad indeed am I to get away from the sordid atmosphere, the greed of gain, and love of money, that has seemed of late more and more noticeable and offensive in New York, as in most large cities.

I agree with the poet who said, "God made the country, and man made the town" (meaning mortal man). Certainly the country, with its sweet simplicity and expressive silences, its natural beauty and freedom, seems nearer the Creator and a better place in which to offer the heart's true worship and praise, though those who truly worship shall need neither country nor town, for "in spirit and in truth" shall they worship and adore; yet to me nature,—the song of a bird, free and soaring through the ethereal blue above, the ripple of a brook, the forest's stillness, the silent, solitary, grandeur of a mountain peak, the breadth and unfathomable depths of the ocean,—all these voice Him in unmistakable language, and bring me nearer to the great heart of infinite Love,—the rest of rests,—the sabbath day of God! Oh how we long for it,—for that peace serene, eternal, in which is "no variableness, neither shadow of turning," steadfast, unchanging,—nothing therein but the glorious knowledge of the nobility and grandeur of unselfed love! God bless thee, beloved, and, for a few weeks, adieu.

Ever your loving and loyal

ANNE.

To Mary Baker G. Eddy, Concord, N. H.

Our Revered Leader:—It is indeed with a heart full of love and gratitude that I wish to tell you of the many blessings we have received through the reading of this wonderful book and the Bible. This book is indeed well named "Science and Health with Key to the Scriptures."

From childhood I had read, re-read, and searched the Scriptures for the love and truth that passeth understanding, and to know why the healing is not done now as in Jesus' time. No; I never doubted that it could be done, but when I began to question my pastor and others it seemed they did not want to talk on that subject, and yet they would say, Leave it with God. "Yes," I would say, "but who and what is God, that you cannot tell me more about Him?"

I remember very well the first time I was made to lose all faith in the orthodox version of leaving all things with God. It was when a very dear friend had for several days been under the doctor's care with diphtheria. When I learned of it I went immediately to her. This was before I knew of Christian Science, and on Wednesday evening, as our pastor was on his way to church, he came by, stood quite a distance from the door, and said he hoped she would get along, and that he would come in but was afraid he might carry this disease home in his clothes to the children. To me this seemed so absurd, for only the Sunday before he had said from the pulpit, "Whatever you leave in God's keeping He is able to care for." It was then and there that I severed my relationship with the church and began the study of that which would prove what it said.

Digitized by Google

Thanks to this wonderful God, good, and to dear Mrs. Eddy, who, with her great patience and untiring effort, has told us who God is and what it means to trust, and that these things are not hidden but are "revealed unto babes."

MRS. ANNA O'NEAL MILLER, Omaha, Neb.

Chicago, February, 6, 1904.

Dear Leader:—A letter addressed to you from a brother in Kansas City and published in the current number of the *Sentinel* fills my heart with happiness. I am sure that every loyal Scientist rejoices at every manifestation of sincere appreciation of your noble life-work for humanity, and at the present moment I would not withhold another expression of my own gratitude.

When I was healed about two years ago of a lifelong suffering by a two weeks' reading of your book, "Science and Health with Key to the Scriptures," my thoughts turned toward Concord as naturally as a flower lifts its head to the window through which the light enters a darkened abode. I wrote almost immediately to tell you of my own happy experience, because I wished you to know how grateful I was for the priceless little book.

Since then I have been through many fiery trials, but without fear, without doubt, and no regrets,—holding firmly through storm and sunshine to the Bible, your book, and the Church. The Christ-truth which this book has revealed to my hungering consciousness has never once failed me, but I have had to learn to be obedient and patient,—unravelling the tangled skein slowly and counting all seeming defeats as gain.

To-day I count it my dearest privilege to give voice and hand unreservedly at the Father's command, to acknowledge His Christ, and also gladly to avow the debt of love I owe to the one whom He has chosen to set forth His word aright for this and all generations to come.

Lovingly and faithfully,

ERNEST C. MOSES.

Chicago, Ill., February 17, 1904.

My Dear Mrs. Eddy:—Words utterly fail me with which to express my thankfulness to you for "Science and Health with Key to the Scriptures," the final revelation of God to man. It has filled my life with unnumbered blessings, and has made the Bible an entirely new book to me, though I have been a Bible student from ten years of age. With this new thought I have made the accompanying compilation,—"The Way of Salvation,"—which I trust you will accept, as it is sent with the deepest gratitude of a loving heart, for the purity of your unselfish life, which has made your grand work possible.

Yours in Love,

ANNAH BROOKS.

The last list of donors to the Macedonian relief fund included twelve Christian Science congregations, and their donations were very substantial in many cases. Not having any domestic or foreign missionary societies, this new sect naturally must find an outlet for the spirit of altruism in some way, and to the credit of its members, be it said that they are giving generously and very generally throughout the country to the relief of the homeless, foodless, and scantily clad folk whom Turkish persecution and the rigors of a winter season have thrown on the bounty of Christendom.

The Christian Scientists' responses to this particular call come from a wider area of territory than most such appeals issued in New England, for which Messrs. Kidder, Peabody & Co. act as agents, usually tap. Cleveland, O., Bloomington, Ill., Chickasha, I. T., Fort Smith, Ark., Fort Worth, Tex., St. Paul, Minn., and Salt Lake City, Utah, are represented on the list of Christian Science Churches contributing.—*Boston Transcript.*

An Able Brief.

WE have had the privilege of reading the very able brief filed in the Supreme Court of New Hampshire, by Messrs. Streeter & Hollis, counsel for the defendant in Spead *v.* Tomlinson. The following extract will prove interesting to our readers:—

"Neither judges nor jurors can pronounce the tenets and claims of Christian Science false, because they do not and cannot know, any more than the authors of this brief know, whether Christian Science is truth or error. That is a question of opinion, and is no more susceptible of proof as a fact than the soundness or unsoundness of the divergent theories of medical men are susceptible of proof as facts. Christian Science is sincerely believed in by many thousands of men and women throughout this and other lands. The magnificent churches going up in so many of our cities show that it is gaining ground, not waning. It is common knowledge that its followers come mainly, not from the ranks of ignorance and credulity, but from the ranks of intelligence, character, and wealth. They assert that it has cured and does cure disease, organic as well as other, with as much earnestness and sincerity as its critics and opponents assert the contrary. If their claims were altogether false, Christian Science could hardly have gained the foothold that it has. It is no answer to say that such cures are 'miraculous.' The vast majority of people over whom the courts of Christendom wield jurisdiction believe that greater miracles were wrought by the Man of Galilee and his earlier disciples. It is more reasonable to believe that God is ready and willing to heal His suffering children to-day than it is to believe that He healed them once but abandoned them nineteen hundred years ago. If Christian Science is to be rejected in the courts because it is contrary to the teachings of ordinary experience, then by the same token the Christian religion must be rejected too."

It is alleged in this case that Mr. Tomlinson practically guaranteed to the plaintiff that she would be cured by the treatment administered by him, but that is controverted. As to such alleged representations and their effect, the brief says in part:—

"When the representation relates, not to a past or present truth which can be positively known, but to a matter of judgment or prediction, it is an expression of opinion in its very nature, and no verdict of a jury can make it anything else. Here the form of statement is immaterial. A statement cannot be a representation of fact unless it relates to a fact, and a fact is something capable of being known. The person addressed cannot understand that the speaker has positive knowledge, however sweeping his language, if the matter under discussion is one of which positive knowledge cannot be had. . . . The representation attributed to this defendant was an expression of his judgment relative to the success of future efforts to cause the plaintiff to be cured through the instrumentality of religion. No human being could possibly have positive knowledge on such a subject, and plaintiff knew it."

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

Testimonies of Healing.

Christian Science was first brought to my notice ten years ago through the healing of my sister, who had been an invalid for six years. My first impression was that it was good for her, but being in perfect health myself I had no use for it. Through this sister my wife became interested, and I gave her the Christian Science text-book as a birthday present. Some time afterward, to my great surprise, she told me one day that she wanted to unite with the church. This aroused me very much, for I was a member of the Baptist Church and was trying to make a good Baptist of her, but having made such a complete failure in this, I told her I would compromise with her by joining the Methodist Church, of which she was a member, if she would give up Science. She would not consent to this; then I asked her not to read Science and Health any more, and offered her ten dollars if she would burn it; in fact, I manifested the most violent opposition to everything connected with Science. For about two years we never spoke of it to each other, she always going with me to church whenever I wanted to go, but her sweet, Christ-like spirit was a constant reminder that she was the one to be imitated and not myself.

In June, 1902, my health failed, and I consulted a physician. He treated me for stomach trouble and forbade my eating vegetables. It seemed hard to give them up, but thinking he knew best I did so; I also tried osteopathic treatment, but nothing seemed to help me, and I was only growing worse. It seemed that the little I did eat formed gas on my stomach and this pressing against the heart caused fainting spells, which were becoming more frequent, occurring once or twice a week. I was afraid to try to attend to my business, as I had fainted on the street several times and had to be brought home. During a very severe attack that I had one night the nearest physician was called and he began treatment, but failed also to reach the case. The fainting spells continued, and he tried a change of diet. At last, after three months' treatment, he put me on dried beef and water. I had fallen off from two hundred and five pounds to one hundred and sixty-eight, was taking one medicine every hour, another every two hours, and still another three times a day. I at last decided there was no help for me, and that it would only be a short time that I would have to endure it, as the doctor seemed to think my heart very much affected.

One day when I was alone I came across *The Christian Science Journal* containing the account of the Los Angeles case, and read the testimony given in court by Judge Works, in which he states he was healed of stomach trouble through Christian Science treatment. I was deeply impressed. His experience recalled my own, and as I felt I had reached the place where nothing else could help me, I decided to try it. When I told my wife of my decision she manifested no surprise and soon had a practitioner come to talk with me. I asked for treatment, and when I inquired, What about my eating? she said, "Eat anything you want without fear of its hurting you." That evening I ate supper with the family, and since that time I have eaten whatever and all I wanted and have felt no ill effects.

The third day after the treatment began, the practitioner asked me why I did not go to work. Remembering the experiences of the past I replied that I was afraid, but she assured me that I could go in safety. I tried it, and had no trouble; went regularly from that day, and in a few weeks was making full time at my office. The improvement went on steadily from the first, and I soon felt myself to be perfectly well and have been now for nearly a year.

It was not long after my healing that my faith was put to a test. My little boy, seven years old, was taken with the croup in a very alarming form in the middle of the night. I had always felt great anxiety for the children when they were sick and kept remedies at hand to use in cases of emergency, some of which were still in the house, but instead of turning to these or sending for a doctor, we telephoned for Christian Science help. Treatment was given, and in about ten minutes he was relieved, and in less than half an hour he was asleep breathing naturally, and he rested quietly the remainder of the night. This was another convincing proof of God's presence and healing power for which I was most grateful, and I feel that I cannot do too much to express my gratitude for the blessings Christian Science has brought to me, in proving God to be a present help in time of need.

I have recommended this treatment to others who have been benefited, and I send this hoping that it may encourage those who are in need to seek the same source of help.—L. H. LONG, Louisville, Ky.

In the year 1888 I was healed of severe spinal trouble and also a complication of other diseases, through the understanding of God as revealed in Christian Science. I had previously been confined to the bed for eight months, six months of this time in a doctor's house in New York City, where I was then receiving treatment. It was not thought wise for me to remain there during the hot weather, so I was taken home with a nurse to wait until cooler weather, and return in the fall. Here let me say that my doctor was kind and did all in his power to relieve me. Many were the nights that I kept him, the nurse, and my dear husband working to relieve me of my suffering.

My sister and a friend begged of me to try Christian Science while I was at home, and because of their importunity I promised to do so. The keeping of that promise saved me. Just two weeks before I was to return, a Scientist came and commenced treatment. Almost immediately I began to have strength where before I had none, and on the fourth day a demonstration was made which medicine had failed to accomplish, and joy and faith came with it. A large quantity of medicine and bottles were destroyed and I began to look to God for help in every time of need. My path was not strewn with roses, but I held on to Truth. A Scientist was with me three weeks; then I had absent treatment, three months in all, before I considered myself well.

When I began to go out my friends did not know me. Then I began to tell what had caused this marvelous change, but instead of believing and wanting this truth, they scorned it. Many times I have been reminded of Jesus' saying, "Neither will they be persuaded, though one rose from the dead." It was a disappointment and sorrow not to have them believe, but God is our strength and the source of our courage, and He has said that "the earth shall be full of the knowledge of the Lord, as the waters cover the sea," therefore we know that some day all will know God aright, and that He is our Life. For the past fourteen years no medicines have been used either by my husband or myself.

One demonstration I would like to mention, because it was to me particularly fine. Quite an epidemic of diphtheria prevailed in our town. Three schools were closed on account of it, and among those who were ill was my husband's niece. One afternoon about four o'clock, I was suddenly taken with faintness and great weakness. I went to my room, rapidly grew worse, so that at six o'clock when my husband came I could not speak aloud; in fact, it was difficult to speak at all. He telegraphed to a Christian Scientist for help, and that night was a hard one,—neither of us slept. The next day I was much weaker, and the second night was much the same; but the second day, in the forenoon, my practitioner sent this telegram: "He sent his word, and healed them, and delivered them from their destructions." The manifestation of error was overcome then and there. At night this telegram was sent in reply. "He maketh the storm a calm, so that the waves thereof are still," which was literally true. In a week I was attending to my usual household duties and was out. Those

Digitized by Google

who had two and three doctors and as many nurses were ill several months. The niece I mentioned did not regain her natural voice for over a year. Another who lived near was unable to walk for many months.

Can any one suppose that after all this I do not love Christian Science, and our dear Leader, and the one who helped me? I should be most ungrateful if I did not. I am thankful that Mrs. Eddy was pure enough to have this wonderful truth of the Bible revealed through her, and to lead sin-sick and heavy burdened mortals into the path which leads Godward. She has given us a demonstrable religion which heals even unto the uttermost.

To be a better woman is my earnest desire, and that is the desire of all who call themselves Christian Scientists.

I. F. F., Ossining, N. Y.

"A just acknowledgment of Truth, and what it has done for us, is an effectual help" (Science and Health, p. 372).

On the second day of January one of the worst blizzards ever known in Cleveland was raging, but in spite of the severe storm it seemed best for me to reach my home, a short distance out of the city.

As train time drew near I found that the storm had stopped the street cars from running to the depot, so I was obliged to walk a distance of three long blocks. The wind was so severe that it blew me against buildings and I waded through snowdrifts so deep that at times it seemed as though I could not take another step, but I repeated over and over again that beautiful thought, "Divine Love always has met, and always will meet, every human need" (Science and Health, p. 494), also, "My grace is sufficient for thee: for my strength is made perfect in weakness."

It was necessary to hold my hat on with one hand, and on reaching the depot, I found the hand frozen to the hat, while the other was frozen to a little grip which I carried; neither could be freed without help. The whole right side of my face was like a piece of marble, so badly was it frozen.

Some people very kindly tried to get me to go and have ice and snow applied, but in the best way I could (for seemingly I was so exhausted by the cold that I could scarcely speak), I told them that if they would kindly find me a seat, I would be myself in a very short time. This they did.

In the mean time another young lady made the same trip, walking the same distance. On reaching the depot her condition was the same as mine, and on being told of her appearance she at once fainted away. A doctor and trained nurse were called, and at the end of an hour she could scarcely hold her head up and was the most awful looking object I ever saw.

After working in Christian Science for three quarters of an hour, my fingers, which were so stiff that they could not be moved, straightened out and became warm; my face became natural. I suffered no pain and had no swelling; all exhaustion had left, and I was as happy and bright as though nothing had happened. The only reminder of the afternoon's experience I had on reaching home, was that the hands and face were sore; but that all disappeared the next day.

I feel a deep sense of love and gratitude to God, to Mrs. Eddy, to my dear teacher, and to those who so lovingly are helping me on the Godward journey. I know that I can best express this love by earnestly striving to live the life of a true Christian Scientist.—B., Elyria, O.

When Christian Science found me I was filled with disease, an invalid of many years' standing, but very much worse just then on account of believing that one who should love us had cheated us out of our property, and thus there were added to the physical ills a deep sense of hatred for that one who had caused me and mine to suffer. I had called upon God in prayer for help, but my prayers were never answered. The one comfort I have now in thinking of the past is, that I never cursed God or turned from trying to find Him.

When Christian Science came to me I knew that at last my prayers would be heard, for I learned how to pray. The Bible teaches that we must pray believing that we have received; and through Christian Science I have learned in part what that means, and Love instead of hate rules me. I am in perfect health and those I believed had robbed me are my friends. When I demonstrate harmony in my life and home God's presence is there, and I know that God is omnipresent. When I demonstrate the power of good over the evil called sickness, I know that God is omnipotent.

I am sincerely grateful for the blessings received through the study of "Science and Health with Key to the Scriptures" by our beloved Leader; and also for class instruction. Our Christian Science periodicals always bring joy and gladness with them. My heart is filled with thanksgiving, and the hope that these words may help some dear one.

F. A. C., Buffalo, N. Y.

About seven years ago I was healed through Christian Science of an ailment from which I had suffered all my life, and which had finally developed into one of the numerous forms of consumption. The intense fear of this disease threw me into a nervous condition closely akin to nervous prostration. I knew physicians could not heal consumption, and although my friends urged me to consult specialists and try change of climate, I remembered many who had done these things only to be gathered to their fathers.

I had a few friends who were Christian Scientists, and although I had always ridiculed and scoffed at their religion, in my time of need I turned to the only thing I knew which held out any hope of a cure. I had heard that Christian Science could cure *anything*. I knew nothing of absent treatments, so struggled every day for a week before I finally reached the office of a Christian Science practitioner, one of Mrs. Eddy's students. I was healed in seven treatments. We often hear of slow healing, and I should like to express my thought as to the reason for my quick healing. I had quite a sum of money laid by, and had devoted a good deal of thought to the means by which I could regain health. When I decided on Christian Science I determined to spend all the money I had if necessary, and to be cured or to die under Christian Science treatment. There was no thought of experiment, and in case I was not healed in a certain time, that I would try something else. There was nothing else for me to try.

I cannot express the joy that came to me with that one week's treatment. I spent hours in my rooms studying the Bible and Science and Health. While I had never been a religious girl, I did believe in God and I prayed many times that if this were not the truth I might not believe in it, even for health's sake. Within two months after my healing I was using my understanding of Christian Science to heal my friends who applied to me, and I remember one case of instantaneous healing. After a three months' rest I resumed my work, a healthy, happy girl, having gained eighteen pounds that summer.

I am very, very grateful for this physical healing, but more to me is the daily help which enables me to overcome sin and teaches me to know God. May God bless Mrs. Eddy for her faithfulness.

Mrs. Annah T. Norton, Kansas City, Mo.

I am to-day alive through the teachings of Christian Science, which I know is the new-old truth that Jesus taught when here on earth.

My little boy and I live together, he being almost twelve years old. One morning I closed my kitchen up, lit the natural gas in my range, and worked all the morning.

Digitized by Google

I noticed an odor, but gave it no thought. I had my Science and Health on the table with "Miscellaneous Writings," and, as I always do, would drop down and read, then get up and continue my work.

Some time before noon I was asphyxiated, and remained an hour in a chair into which I had dropped. When my little boy came, two of the neighbors came in. I refused to have a doctor, and a young lady in the building went, at my request, for a Christian Science practitioner. I asked her to tell him what had occurred, and to say that I was all right, I thought. Very soon the practitioner came, and in the mean time they had gotten me to bed. At five o'clock I was up and dressed and went to my landlord's door, and they said they were truly glad to see me. I had told his wife when she came in to assist me to bed that Christian Science had saved me. To him I said, "They can all say what they please, but God saved me," to which he said, "I guess so." The next morning I attended First Church, and then went to the house of my cousin who had doctored me for ten years previous to my healing in Christian Science. I told the doctor what had happened, and he looked very serious and said, "What did you do?" I replied, "I used my Science and my practitioner did the same when he came."

My landlord said later, "If that door had been closed you would have been gone;" to which I replied that the door was closed, and I added, "Do you know of any material means by which my life could have been saved?" He said that he did not. Then I said, "You admit, then, that God saved my life?" and he said, "Yes."

The bedding and curtains in the flat above, and the flat below were filled with gas according to the statements of the neighbors. I am truly thankful that "divine Love is my shepherd" (Science and Health, p. 578), and through the understanding of this we can demonstrate its worth. I am truly thankful to God and "bless His holy name." My great desire is to press on and sow the seed of Truth. I am deeply grateful to our beloved Leader for her work. I knew nothing of the Bible previous to seeking Truth through Christian Science. God bless all the earnest workers in His vineyard.

MRS. LAURA E. PHILLIPS, Chicago, Ill.

I have received many benefits from Christian Science, through the healing of sickness and sin. To one of these blessings I would like to testify.

Last winter during a very cold season, when the atmosphere seemed filled with thoughts of grip, colds, and kindred complaints, which were manifested all around me, I was healed of pneumonia.

One intensely cold, windy evening I had occasion to go out, after a very busy day's work, in order to keep an appointment. I went to bed feeling very weary, and was awakened at midnight feeling violently ill. Soon the symptoms of pneumonia were manifested, and I knew them only too well, for before I ever knew of Christian Science I had suffered from them, and my grandparents, with whom I lived, had both passed on under this dread disease.

I tried to treat the case myself, and the sore throat vanished in the morning, but the other symptoms were aggravated and the fear of losing consciousness or a clear thought led me to ask for the much needed help.

The third day a practitioner sat for hours by my bedside and I knew that the disease had been destroyed. I felt that I could go out the next day, but evident fear in those around me kept me at home for a week. The fifth day I attended to light household duties.

I could but note the difference between this demonstration of Truth's power and the former treatment of the disease under *materia medica.*

Christian Science has made the way brighter, burdens lighter, and the Bible dearer to me than ever before. The Bible and "Science and Health with Key to the Scriptures" are my guide to Truth. I am trying to follow in the footsteps of Christ, and I feel grateful to our dear Leader for showing us how we can do this, and to each and every one who has contributed his share in the great work of the salvation of mankind.—MRS. LURA A. HOLLIS, Braintree, Mass.

The other evening when asked by a friend how much had been spent on physicians and material means during a long illness, previous to coming into Christian Science, I stopped for the first time to make a rough estimate, and also to consider the great difference in the amount given for help in Christian Science. Between two and three thousand dollars had been expended in seeking relief through *materia medica,* and the result was what? I was "nothing bettered, but rather grew worse,"—a complete wreck from extreme mental and physical suffering, with seemingly not a ray of light before me.

Here Christian Science stepped in, and after months of patient, faithful work on the part of the practitioner, there came slowly and surely a great change: a desire to live, instead of wanting to die; a sense of happiness, instead of sadness; of joy, instead of sorrow; of strength, instead of weakness, and of helpfulness instead of helplessness. Still the work goes on, the healing and regenerating work of overcoming the old self by the real self, made in "God's image and likeness;" and my heart is filled with a song of liberty and gladness. Do you ask what was given for this rich blessing? In money, it was about three hundred dollars, but my prayer is, that gratitude and loving work in Christian Science may some day pay the rest of the debt.

FLORENCE H. RANDALL, Brooklyn, N. Y.

[Translation.]

Since I was four years old, I have suffered with sick headache, and the attacks were severe and prolonged. I was treated by several physicians, but no one could free me from this illness. They only gave me remedies to quiet me, but after a short time the pain returned worse than before.

When I left school and went into business, this trouble grew still worse, and finally it attacked me every day. In our anxiety we did not know what to do. When we heard of Christian Science two years ago through some friends, I decided to take treatment, and with firm faith that God would heal me, I did so, and behold, what all the skill of physicians had not been able to do, was accomplished through Christian Science. I received my health and happiness! After the first treatment the pain left me, and after two more treatments the sickness had entirely vanished.

I am now eighteen years old and always feel well and happy, therefore I herewith express my sincere gratitude for Christian Science, and hope that this Christ-truth may spread more and more.

JOHANNA JACOB, Dresden, Ger.

Just about a year ago Christian Science came to me, and I am sure God sent the truth to heal me of sin and suffering. I desire to thank Mrs. Eddy for "Science and Health with Key to the Scriptures," which teaches us to overcome sin, disease, and death; and by casting out error we have heaven here and now.

I was healed of constipation of long standing, of stomach trouble, sleeplessness, and other conditions from which it seemed that I must suffer always, but which I now know that God never inflicts upon His children. It makes me glad to give my testimony, and I would say to those who are striving, Do not grow impatient, hold a clear thought, the clouds must finally disappear, and we shall ultimately overcome all discord.—CLARENCE ARNOLD, Cleveland, O.

From our Exchanges.

The only real ambitions spring from the circumstances in which our lives are set. I used to believe that my limitations would prevent me from doing anything beyond improving my mind and accepting the cup of pleasure or sorrow in whatever measure it might be dealt to me. There is no grief deeper than the consciousness that we are isolated, no ache of heart harder to bear than the thought that our fellows are crying in the darkness, and we are so fettered that we may not go to them. This is separation from the social order into which we are born, the agony of thwarted forces, a death in the midst of life. But I have discovered that the material with which we work is everywhere and in abundance. I have felt the joy of the strong man who grasps the reins in his hands and drives the forces that would master him. Our worst foes are not belligerent circumstances, but wavering spirits. As a man thinketh, so is he. The field in which I may work is narrow, but it stretches before me limitless. I am like the philosopher whose garden was small but reached up to the stars.

There are two ways in which we may work: with our own hands and through our fellow-men. Both ways are open to me. With my own hands and voice I can teach; perhaps I can write. Through others I can do good by speaking in favor of beneficent work and by speaking against what seems to me wrong.

I am still a college girl, and I can look forward to a golden age when all my plans shall have been realized. I can dream of that happy country of the future where no man will live at his ease while another suffers; then, indeed, shall the blind see and the deaf hear. HELEN KELLER.

Ladies' Home Journal.

A good deal is being said about the alienation of the working classes from the Church and the aloofness of culture, but no sensitive student of our times can fail to note the fact that the moral consciousness of the world is awakening toward the world's Redeemer. That awakening may not be churchward, but it is Christward. Three things indicate this: the respectful attitude of men of all conditions toward Christ, the attitude of modern science toward the spiritual and the unseen, and the attitude of the student body toward Christianity. The moral authority of Jesus is recognized to-day even by men who cannot interpret or who have no interest in interpreting His religious ideals. The common people hear Him gladly.

JOHN F. CARSON, D.D.

The Homiletic Review.

"ON EARTH PEACE."—When will it ever be? The angels sang their song over the world nearly two thousand years ago, but wars have multiplied as the world has grown older. And the strange thing about it is that the leading nations of Christendom are foremost in the enginery and activities of war. England is the greatest nation on earth in wealth and strength, and England must have a fighting navy equal to that of all the nations on the earth combined. The United States has a very small army and a small navy, as compared with the other great nations, but our fighting forces, including pensions, cost us over three hundred millions of dollars a year, or nearly a million dollars a day.

The Examiner.

Finally, the attempt to separate between belief and life seems to us unwise. Doubtless some fail to live up to their intellectual convictions, and others with a faulty creed set good examples of moral uprightness. But even so, there is a permanent nexus between that which a man believes and that which he is.—*The Standard.*

THE CHRISTIAN SCIENCE TEXT-BOOK.—Science and Health with Key to the Scriptures with latest revisions and additions, and numbered lines. 700 pages.

For description, price, and other information, see last page of cover.

THE NEW CONCORDANCE.—A complete Concordance to Science and Health with Key to the Scriptures. This work has been compiled from the late revised edition of SCIENCE AND HEALTH, and contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10x7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

CHURCH MANUAL.—Containing the By-Laws of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. This does not include the list of members. Price, prepaid, $1 per copy; $5 per half dozen; $9 per dozen.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America.

It contains about thirty-eight pages of reading matter, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

German Supplements

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE The Christianity of Christ. By Rev. IRVING C. TOMLINSON.

Reprints from the Journal and Sentinel

THE TRUE LAW.

Works on Christian Science

Written by Rev. MARY BAKER G. EDDY

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Enlarged and Revised, 1902. THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING. Cloth binding, each, prepaid $3 18

Two to twelve books (cloth only) to one address, each, prepaid 3 00
Twelve or more books to one address, each, prepaid 2 75

Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, each, prepaid 4 00
Twelve or more to one address, each, prepaid . . 3 75

Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, each, prepaid 5 00
Twelve or more to one address, each, prepaid . . . 4 75

Levant, divinity circuit, leather-lined, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, wide margins, each, prepaid 6 00
Twelve or more to one address, each, prepaid . . 5 75

Orders for Science and Health, in lots of twelve or more to one address, may include any or all the different styles of binding.

A COMPLETE CONCORDANCE to Science and Health with Key to the Scriptures, 595 pp., 10 x 7. Bound in cloth, marbled edges. Price, single copy, prepaid . . $5 00
Twelve or more copies to one address, each 4 50

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.
Price (cloth), each, prepaid 2 25
Twelve or more books to one address, each, prepaid 2 00

Morocco, limp, round corners, gilt edges, convenient for pocket, each, prepaid 4 00
Twelve or more to one address, each, prepaid 3 75

Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, each, prepaid 5 00
Twelve or more to one address, each, prepaid . . . 4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

President Roosevelt sent to the Senate on the 29th ult. the following nominations for the Panama Canal Commission; Rear Admiral John G. Walker, U. S. N., retired, District of Columbia, Chairman; Major General George W. Davis, U. S. A., retired, District of Columbia; William Barclay Parsons, New York, engineer of the New York Subway; William H. Burr, Professor of Engineering in Columbia University; Colonel Frank Hecker, Detroit, Director of Transportation during the Spanish-American War; Benjamin M. Harrod, Louisiana, an engineer of the Mississippi River Commission, and Carl E. Grunsky, San Francisco, a distinguished hydraulic engineer.

With a formal reception attended by art lovers from every section of the country, Boston's Whistler Memorial Exhibition opened last week under the auspices of the Copley Society. About one hundred and fifty paintings and three hundred lithographs, drawings, and etchings, gathered from every important art center of the world, are shown, among them pictures from the estate of Mr. Whistler. The exhibition is regarded as the most important art event of the present American season.

President Roosevelt on the 25th ult., signed the ratifications to be exchanged between the United States and the Republic of Panama on the Isthmian Canal Treaty. The exchanges were made the next day between Secretary Hay, acting for the United States, and M. Bunau-Varilla, for Panama. This exchange was followed within an hour by the proclamation signed by the President putting the treaty into effect.

Secretary Shaw of the Treasury Department will not issue a call to the depository banks for payments on the fifty million dollars involved in the Isthmian Canal until the Attorney General has passed upon the validity of certain points of the Panama Canal Company's title.

Steps have already been taken to replace the old Dartmouth College Hall, which was destroyed by fire recently. It will be of stone or brick instead of wood and will cost about $250,000, which the alumni will be called upon to contribute.

The United States flotilla of torpedo boat destroyers has passed Port Said on its trip to the Philippines. The trip is designed to test the seaworthiness of such craft.

Congress entertains hopes of adjourning as early as the first of May.

Foreign.

The Russian Government has abolished the censorship upon all news and other telegrams going abroad. The lifting of the embargo, which existed for generations, upon the free transmission of news from the Russian empire, came as a direct result of consideration of the subject by the Czar himself. In some respects this abolition is regarded as the most important act since the emancipation of the serfs.

Now that his fifteen years of labor for the realization of a Panama Canal have been crowned by the Canal Treaty, M. Bunau-Varilla is reported as saying he will relinquish his position as Minister of Panama at Washington and return to his home in Paris. It is thought probable that Dr. Arasomena, a prominent lawyer of Panama, will succeed him.

Large and excited crowds gathered in the streets of Colon when the news that the United States Senate had ratified the Canal treaty became known. The shops displayed Chinese lanterns and railroad offices were decorated with red, white, and blue electric lights. Fireworks and music lasted all night.

Korea has withdrawn from participation in the Louisiana Purchase Exposition and has officially notified the management of the Exposition to that effect. It is now stated that Russia, contrary to previous reports, will retain her space at the Fair.

It is reported that a formal promise has been secured from the Sultan that no steps would be taken to create complications in the Balkans so long as the war in the East lasts.

By the wording of the Constitution of the Republic of Panama, the official designation for the people of that Republic is "Panamans."

The treaty with Cuba concerning the cession of the Isle of Pines to Cuba has been allowed to lapse.

Dr. Manuel Amador has been elected President of the Republic of Panama.

Industrial and Commercial.

Persistent and systematic plans are being made to introduce the Tupelo gum on the market. If these efforts are successful, certain sections of Mississippi and Louisiana will be enriched to the extent of millions of dollars. This wood, which has been utilized only in an experimental way, is indigenous to the overflow sections of Mississippi and Louisiana, as well as along certain streams in the latter State. Tupelo gum is a recent discovery as a valuable wood product. The experiments that have been made with it have demonstrated that it is better than poplar and that it will take a mahogany finish. So successful was the test of the wood for threshing machine rollers that it is to be used largely for this purpose in the future. Tupelo gum also makes a splendid flooring, is without grain, and is very hard, a fact that makes it capable of a very high degree of polish.

A Philadelphia concern working on a rush order from the Japanese Government for locomotives, has established a new record by the construction of seven locomotives in a day. The engines are for the military railroad to connect Fusan, on the southern coast of Korea, with Seoul, the capital. The line will be about two hundred and twenty-five miles long. The order, which called for twenty locomotives to be completed within thirty days, was received late in January. Eight of them have been shipped to Fusan; of the remaining twelve, six were sent last week overland to San Francisco, and thence by steamship, while the remaining six will go by the all-water route by way of the Suez Canal. Fourteen of the locomotives are of standard gauge, while six are of two-foot gauge.

The Metropolitan Street Railway Company of New York has announced to the Rapid Transit Commission that it is ready to undertake the construction of another system of subways, connecting with its three hundred miles of surface lines, by which every resident of Manhattan Island will be able to go from his home to his place of business by underground transit for a five-cent fare. These proposed ground lines would practically encircle the island from the Harlem River to the Battery, outside the present subway. It is estimated the work will cost twenty million dollars.

An ingenious suggestion has been proposed in Belgium by which express trains may maintain full speed and at the same time receive and discharge passengers and baggage. To the rear of the train it is proposed to attach a car equipped with high speed motors. Into this car will be collected the baggage and passengers booked for the next station. This car will then be simply uncoupled and stop at that station. A corresponding car with the passengers and baggage from that station will then be started and overtake the train and similar transfers be made.

General.

Not long ago, says *The Congregationalist*, King Menes of the first Egyptian dynasty was believed by many scholars to have been mythical. New discoveries concerning him are coming to be so numerous that his biography may yet be written. Quite recently a *stele* removed from Egypt at a very early date, now in the museum at Palermo, has been deciphered. Its inscription relates to kings who preceded the time of Menes and who also survived him. It appears that in his days there were different centers of government in Egypt, with kings contemporaneous with Menes. The inscription also shows that the chronological bases of the records have to do with cycles of religious ceremonies, and that these cycles overlap the cycle of kingly dynasties. The religious and the secular periods of time were independent of each other. The period of the followers of Horus did not terminate with the accession of Menes, the beginning of the first dynasty, but at the time of the removal of the royal capital to Memphis. This makes clear a problem which Egyptologists have studied for a long time. Another important discovery is the name of Jehovah in Hebrew, without the vowels. The date of the papyrus in which it was found is quite modern, but this is the first time the sacred name has been found in Egyptian historical records.

The auditor of the District Supreme Court has filed his report on the amount and value of the prize property in the case of Admiral Dewey against the Don Juan de Austria and other vessels captured and sunk in Manila Bay, May 1, 1898. The auditor reports that the allowances of property, subject to the share of the libellant as prize, aggregates $829,733.

Yale and Princeton debating teams will discuss the Panama treaty on March 5 in their annual debate to be held at Princeton. The form of the question will be, "Resolved, That the Government of the United States was warranted in recognizing the independence of the Republic of Panama."

Prof. Giovanni Livi, director of the state archives at Bologna, has found a parchment, dated 1323, on which are two pen sketches representing Dante crowned by Bologna. This discovery will prove of great interest to those who are searching for an authentic portrait of the poet.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

From our Contributors.

In the Path.

ELINOR F. EDWARDS.

A BEAUTIFUL water color which hangs on my wall, showing a bit of woodland path in autumn, is more to me than a pleasing picture, for by it I am often reminded that I once groped in darkness, not knowing the true path or how to find it. For an unknown period I was lost in a dense wilderness. Day after day I searched in vain for some way of escape, and at night lay down in weariness and despair only to begin the search again with each return of day. Hopeless at last, and ready to die, more dead than alive, I sank in exhaustion, crying, "Help, Lord, or I perish." Lying there as in a lonely forest, pride humbled and self prostrate, I heard a voice gently calling, "Come unto me." "He that followeth me shall not walk in darkness, but shall have the light of life." With a superhuman effort I raised myself, and at that moment a single ray of light disclosed a narrow bit of path which, in my distress, I had failed to notice before. Giving thanks to God, who I knew had thus answered my first real prayer, and sustained by an angel presence whose name I afterwards learned to love,—the angel of divine Science,—I began to walk in the narrow way which I felt sure would lead me out of the dreadful wilderness of human illusions. I did not ask how long it would take me to get out of the tangle. It was enough to know that my face was turned in the right direction, and I could sing as I went along, "One step enough for me." Although I am still far from the goal, and only a bit of the path is seen before me at a time, yet of this I am certain, that it is the right way, and the only way to life and peace, and that by keeping in this path made so plain to a lost and bewildered humanity through the God-given courage and selflessness of our beloved Leader and Guide, Mrs. Eddy, I shall reach my Father's house at last. "For this my Son was dead, and is alive again; he was lost, and is found."

"I see the way now. The guardians of His presence go before me. I enter the path. It may be smooth, or it may be rugged; but it is always straight and narrow; and if it be up-hill all the way the ascent is easy, and the summit is gained" (Miscellaneous Writings, p. 347).

Separation.

JOHN L. RENDALL.

EVERY claim of sickness or sin is a claim of separation, a belief that man can be separated from God and from that which God gave him; namely, health, harmony, perfection, goodness. Paul recognized this claim when he asked, "Who shall separate us from the love of Christ? shall tribulation, or distress, or persecution, or famine, or nakedness, or peril, or sword? . . . Nay, in all these things we are more than conquerors through him that loved us. For I am persuaded, that neither death, nor life, nor angels, nor principalities, nor powers, nor things present, nor things to come, nor height, nor depth, nor any other creature, shall be able to separate us from the love of God, which is in Christ Jesus our Lord."

The effort of error to separate man from God is clearly recognized in all its subtle forms and false presentations by every active, working Christian Scientist who is learning to analyze thought, and to cleave to the true and repudiate the false. In order to do this intelligently he must have a clear apprehension of the truth about God and man. That which presents a distorted, discordant, sick, or sinning sense of man is false, because it does not conform to the right standard, because it represents as real, a misconception of man, one which God did not create and does not know.

The only separation possible is the separation between Truth and error, the gulf of which Jesus spoke, "And beside all this, between us and you there is a great gulf fixed." This gulf has never been bridged. There is no connecting link between the real and the false, the perfect and imperfect. The false estimate of man says that under certain conditions man becomes separated from Truth,—from health, harmony, and peace.

It is wise to take a firm stand and declare, as did Paul, that nothing can separate "from the love of God, which is in Christ Jesus our Lord." The Psalmist says, "For he shall give his angels charge over thee, to keep thee in all thy ways. They shall bear thee up in their hands, lest thou dash thy foot against a stone." What is this stone of which David speaks but the obstruction of mortal sense, over which the angels of His presence bear us in their hands.

Scientific Building.

BLANCHE H. HOGUE.

THE church edifices of Christian Science stand before the world as type and symbol of the Cause which they represent. Everything which man constructs may be traced to its mental cause, and every visible effect gives direct evidence of the quality of thought underlying its expression. Because all building is in accord with the motives from which it springs, it expresses the desires and purposes in the hearts of men.

The church buildings of Christian Science are being erected by the combined efforts of two classes of people: those who had previously supported religious work and worship, and those who had never before known awakened interest in the promotion of church matters. The message of Christian Science has offered to each of these great classes something which has united them in a glad effort to establish the work of this movement; and the message must be building a kindred satisfaction into the lives of these people, else it could not draw together, in a new and common purpose, such differing elements. The evident conclusion is this: that the men and women who are contributing under this new regime toward the erection of Christian Science Church buildings, are testifying to a regenerative and reconstructive experience in their own lives, and they voluntarily and joyfully co-operate in this, because they de-

Digitized by Google

sire, unselfishly, that the same liberation from the bonds of sin and disease shall enter the lives of their fellow-men.

A student of Christian Science once said, in analyzing this question of church building, "It is not money, but that process of thought which relinquishes the love of money, that is building the Christian Science churches." This strikes at the root of the matter, in that it defines the transition from sordid interests to the awakened unselfishness which delights in giving its possessions for the interest of humanity. As one's desire for the things which money can buy gives place to the desire to "seek first the kingdom of heaven," it is then a work of love to support all which tends toward the establishment of that kingdom. Christian Scientists give, *because* they love. It is wise and right to provide attractive buildings wherein their fellow-men may gather with them to know more of the Christ who saves and heals and delivers; and so they give the best they have that this may be more widely accomplished. The man who fails to give through the fear that his own supply may be diminished, is like one who dares not aid in opening his neighbor's windows toward the sunshine lest his own house should thereby be robbed of light.

In the measure that human will ceases to cherish and outline its own purposes, the obstructing "clamps" of selfish interests unclasp their hold, and the life, thus unfettered, yields its activities to the will and purposes of God. That which would conceal the "fruit of the spirit," succumbs to the applied teaching of Christian Science, and proportionately, peace and health and true generosity spring into action. It is this operation of divine law, cleansing human experience, which puts forth as part of its fruitage, voluntarily erected church buildings.

Old Testament history in its records of the building of the temple of the Israelites, chronicles that similar mental conditions preceded outward construction. The 3rd chapter of 1 Kings tells us that Solomon said in the dream which lifted his thoughts toward God, "I am but a little child: I know not how to go out or come in. . . . Give therefore thy servant an understanding heart to judge thy people, that I may discern between good and bad: for who is able to judge this thy so great a people?" The record continues: "And God said unto him, Because thou hast asked this thing, and hast not asked for thyself long life; neither hast asked riches for thyself, nor hast asked the life of thine enemies, . . . behold, I have done according to thy words: lo, I have given thee a wise and an understanding heart; . . . and I have also given thee that which thou hast not asked, both riches and honor."

From the account in the succeeding chapters, we find that the humility of Solomon's heart, his earnest desire for righteousness, and his just dealing with his people, led him to the time and the place when he could say, "Thou knowest how that David my father could not build an house unto the name of the Lord his God for the wars which were about him on every side, until the Lord put them under the soles of his feet. But now the Lord my God hath given me rest on every side, so that there is neither adversary nor evil occurrent. And, behold, I purpose to build an house unto the name of the Lord my God."

In the book of Ezra, the "children of the captivity," in their building, were subjected to the subtle arguments of the adversaries who said, "Let us build with you: for we seek your God, as ye do; and we do sacrifice unto him." And they made answer, "Ye have nothing to do with us to build an house unto our God; but we ourselves together will build unto the Lord God of Israel."

Then the people of the land "weakened the hands of the people of Judah, and troubled them in building, and hired counsellors against them, to frustrate their purpose," but wisdom and fidelity triumphed. Nehemiah tells us that in rebuilding the wall of Jerusalem it was said, "What do these feeble Jews? Will they fortify themselves? . . . Will they revive the stones out of the heaps of the rubbish which are burned?" Their adversaries came to hinder them, but they made their prayers unto God, set watchmen upon the wall, and "every one with one of his hands wrought in the work, and with the other hand held a weapon." So the wall was finished.

Paul brings this question of building into the realm of mind when he says, "We are laborers together with God: . . . ye are God's building. . . . As a wise master builder, I have laid the foundation, and another buildeth thereon. But let every man take heed how he buildeth thereupon. For other foundation can no man lay than that is laid, which is Jesus Christ."

Thus we see that the entire question of building is a mental work. With Mrs. Eddy's first effort to set forth the revelation of Truth in this century, began the first thought-building which has led to external construction. With the humility and self-forgetfulness of Solomon of old, she asked only for wisdom and divine guidance. Receiving it, she worked in quietness and patience, as the people whom God had blessed, through her, gathered in loving assistance about her. As an earnest disciple and Leader, she has proven herself "a wise master-builder," guiding all the laborers together to the one foundation "which is Jesus Christ;" and as the forces of evil were subdued in individual lives about her, and Christly character was builded into daily experience, the time came when the "wars ceased" and she might say, "Behold, I purpose to build an house unto the name of the Lord."

So, The First Church of Christ, Scientist, turned its thought toward the erection of its first building in Boston; and in the measure that the clamoring adversaries, wrong thoughts, were persistently excluded from the lives of the Christian Scientists, in the degree that they cleansed their experience with one hand in the work and the other holding a weapon, the church was builded, and its expression was but the natural outcome, in the right hour, of the Christian toil which marked the early years of Christian Science history.

The students of Christian Science know well that this reconstructive work in daily life has but begun; the foundation has been discerned, the first work accomplished, but much remains to be done in this work of erecting the perfect Christ model in individual character. Many mistakes are made because the model is not always kept clearly in view; much work done in the haste of human zeal must be undone; disobedience to the "master builder" results in faulty construction which repentant obedience alone can correct, and many trials as by fire test the quality of the work. Slowly and surely, however, the building goes on in the quiet recesses of consecrated thought. The power of the silent reconstruction which is transforming the daily lives of the honest students of Science and Health, no man can measure. Its mighty influence for good can neither be stayed nor perverted, and it must of necessity, through purified lives, bring into expression all that is needed to mark the progress and prosperity of God's work among the children of men.

Henry Van Dyke has said, in his poem "The Builders,"—

> The glory of our life below
> Comes not from what we do, or what we know,
> But dwells forevermore in what we are.
> There is an architecture grander far
> Than all the fortresses of war,
> More inextinguishably bright
> Than learning's lonely towers of light.
> Framing its walls of faith and hope and love
> In deathless souls of men, it lifts above
> The frailty of our earthly home
> An everlasting dome.
> The sanctuary of the human host,
> The living temple of the Holy Ghost.

The Search for Happiness.

L. T. HASKELL.

PERHAPS, dear reader, you have looked into many systems of healing, gone to various climates, taken large quantities of medicine, followed much advice for months and years. You may have been told that God made you sick or allowed you to become sick so as to help you to become spiritual,—a proof of His loving care. You know that all with whom you have talked have told you about health in your body. You do not expect to have this body more than a few years, then why try to find health in the temporal? Are you ready to find true health, that which no one can take from you, and that cannot be lost?

Are you seeking happiness?

Possibly you vary the routine of each day by such means as you can command,—spending your evenings socially, and on Sundays and holidays going to parks and places of amusement. You have done this for years, but have you found happiness, and are you satisfied? Are you ready to find true happiness, the kind that does not give place to sorrow, that does not make you say it is too good to last, but which is so good that you know it must last?

Is the getting of more money your principal thought?

Perhaps you believe that those who have more than you are happy; you may hear of their having such a good time, and think if you could do the same things you would be content. But how long do you reckon these so-called good times will last? Cannot you recall many who believed this lie; viz., that a good time can be had with and in material things, but who in a moment lost it all? But, suppose you expect to live on this plane of existence sixty, seventy, eighty years, do you look forward with pleasant anticipation to your eightieth birthday?

Health, happiness, money, to which add power, learning, position, and all the treasures of earth sought by the mortal thought,—surely not one is permanent or can satisfy.

The problem is, how to find the true, the real, the eternal. Are you ready to find the solution? A Science that can answer these and other questions is at hand. You must search scientifically if you would find eternal verities.

The child commencing a study of mathematics does not understand why he must solve its problems, but after he succeeds he begins to see why. Your speculations as to why you are forced to look into these questions, is a waste of time; you will not understand why, until, like the child, you make a beginning and find the solution of the many small problems which are comprised in the main one.

Years ago Jesus came, living and teaching the Science of Sciences. He proved that he knew what health, happiness, and Life are. He said, "I have yet many things to say unto you, but ye cannot bear them now. Howbeit when he, the Spirit of truth, is come, he will guide you into all truth."

His work was called Christian as it taught the Christ-truth, showing mortals the way out of mortal thought. To-day His promise is fulfilled in the Science which solves the same problems he met, and as it teaches the same Christ-truth it has also been rightly called "Christian."

In the study of mathematics a text-book is needed, and no one would send a child to a teacher who never had been able to solve mathematical problems, even if he were able to talk a good deal about how much he knew. The same common sense should be applied in the study of health, happiness, and life. "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy is the text-book of Christian Science, and if you need help in the solving of your problems, go to a practitioner or teacher of the Science and do not discuss the subject with those unable to demonstrate an understanding of it. Many who have had no other teacher than the Bible and Science and Health, have gained an understanding which has healed their sickness, relieved their poverty, their worry, overcome their desire for worldly honors, and given them a foretaste of what real happiness is. Does not a Science that has already healed thousands who had given up hope of ever being well again in this world, appeal to you? Go to any Sunday or Wednesday evening meeting and see the number of happy faces. You may see a few who come on crutches, or are pale and thin, but continue to watch these cases, and see how soon the crutches and the ailments disappear, and health and happiness take the place of the opposite conditions first noted.

We learned to respect those who gave their time in an endeavor to relieve our distresses during those dark days before we found Christian Science. And what of our respect for our revered Leader, in view of the great good already accomplished? Our gratitude for the revelation of God as Father-Mother, ever ready and able to help us, and our love for her who for nearly forty years has devoted her time and thought to giving in simple language this revelation of Divine Science, which is felt by thousands to-day, cannot be put into words. It is shown, however, in lives devoted to giving this truth to others.

What would the Christian Science movement be to-day without the wise leadership it has had? To appreciate this is to avail oneself of the means provided for our "passage from sense to Soul" (Science and Health, p. 566).

A Little Story.

REV. MARTIN SINDALL.

OUR little daughter has an old sewing machine on which she loves to sew by the hour, for you must know that her dollie needs plenty of clothes. Not long ago, while making a little garment, the doll's mamma happened in some way to get one finger under the "foot" of the needle-bar while she was running the machine at high speed. Well, the machine has been broken ever since, but the finger is all right,—now. It was badly crushed, but by the prompt denial of pain, the dear little woman was saved from suffering. That evening she got into her bed and tried to go to sleep; but this was difficult because of a sense of pain, and she began to cry. Her parents were sitting by the table reading when they heard their little girl sigh as if in pain. Mamma took the lamp and went to her, and papa began at once to voice the truth. He was alone only two or three minutes, but during that time the first four of the following lines shaped themselves in his mind. They were in the treatment which stopped both pain and crying. The last four lines were added later,—

Love is ever present.
Truth is always here:
It heals the broken body,
And wipes away the tear.
It feeds the hungry children,
And drives all care away:
It makes the darkness light,
And gives us endless day.

[Written for the *Sentinel*.]

If we Knew.

J. EDWARD SMITH.

IF I knew that a word of mine,
A word not kind and true,
Might leave its trace
On a loved one's face,
I'd never speak harshly, would you?

If I knew that the light of a smile
Might linger the whole day through
And brighten some heart,
With a heavier part,
I wouldn't withhold it, would you?

Regarding Asserted Evil.

Upon careful examination, the question of the unreality of evil discovers itself to be a question of the perpetuity of evil. Is that which is opposed to good, eternal and indestructible, or will there ever come a time when it will cease to be? Christian dogma answers that the ultimate of man is a perfect state, called heaven, wherein is no sin, suffering, or death, and it declares that man reaches this condition by dying. Here Christian Science takes issue with popular theology and maintains, as do the Scriptures, that death is not the medium by which man attains sinlessness, but that death itself, with all other forms of evil, must be overcome, because "the last enemy that shall be destroyed" for each individual, some time and some how, is death. Then if death and the train of evils preceding it and leading up to it can be destroyed, are they real? Is anything real which is capable of destruction? It should be understood that the relative terms real and unreal, as employed by Christian Science to designate the spiritual and the material, are used just as Paul used the terms eternal and temporal.

The hope of a suffering, sin-laden race, reaches out for emancipation from evil, but if evil is real, then it is eternal, and all the efforts of the centuries to lift man above it have been of no avail, and all the efforts of centuries to come will be just as vain. It is because man cherishes the expectation, in spite of everything, that in some way he will be able to outgrow a consciousness of evil, that he labors on with a show of confidence in success.

Our friend employs the illustration of something imitative or artificial, and this will serve very well to elucidate the teachings of Christian Science on this subject of evil. In order to handle the question conveniently, Christian Science has given the name "mortal mind" to all that is unlike God. It is the same thing which Paul designated by the term carnal mind, or fleshly mind, and includes all the phenomena, good, bad, and indifferent, attaching to material existence. Jesus said of evil that it was a "liar, and the father of it," that it was the author of its own statements, and that these statements were not true. Evidently then, on the authority of Jesus, God did not make evil. He is not the father of it, and since He made all that is, evil must have only a fabulous existence. It exists as a lie. Within the complex exhibition called mortal existence, evil has a place, and is real to everything else within the confines of the same phenomenal life. In this sense only it is real. From the Divine standpoint it is unreal and without creator, without any underlying fact, without support, for it is the author of itself, and the one Creator did not include it in His creation.

A metaphysical analysis of mortal mind reveals the fact that it is imitative. Jesus called evil a lie. It must be a lie about something; it is not a lie about nothing. Christian Science maintains that the elaborate presentment of mortal mind is a reversal of the truth about God, man, and the universe; that it is a poor translation of the spiritual into the material, and that a loss occurs, as it always does with every translation. In God's infinite universe everything exists, good, like the Maker. Evil is the opposite, the counterfeit, of God, or good. So, then, if we turn from evil to find that of which it is a mistranslation, we find God Himself, and when we have found Him, we know no evil; evil has ceased to be, has been proven unreal. This is exactly the mental process Christian Science urges upon the race to-day, a turning from evil and a growing toward God as the only sure means of compassing error's destruction. Paul said, "Put off concerning the former conversation the old man, which is corrupt according to the deceitful lusts; and be renewed in the spirit of your mind."

We have seen that Jesus called evil, or mortal mind, a liar, and Paul said that this same liar was at war with good. Isaiah says plainly that "they that war against thee shall be as nothing, and as a thing of nought." That which is nothing is unreal, and that which wars against God is evil hence it is unreal. The prophet Zephaniah promises thus: "Thou shalt not see evil any more." Surely if evil is real, we cannot hope to have this prophecy fulfilled.

The spiritual teachings of Scripture as to God's allness, and the consequent nothingness of evil, can only be apprehended spiritually, that is to say, it is not reasonable to expect that evil and all that evil includes can know God, or understand Him. Contending persistently for the reality of evil is synonymous with contending persistently against God, and this of itself is evil. The fundamental doctrine that God is all and that there is nothing beside Him, leaves no room for argument. If this were fully understood, there would be no desire to prove that evil has entity and reality.

Christian Science denies the reality of evil for the same reason that natural science denies the actuality of darkness, and explains that evil, like darkness, is not something, but the lack of something, the lack of good. Jesus said, "If any man will come after me, let him deny himself, and take up his cross." What self was it Jesus wanted men to deny? Would it have been reasonable or sensible for him to have asked us to deny anything that was real? It was the false self, or evil self, the carnal mind and fleshly man which Jesus demanded that we should deny, and it is in complete accord with this text that Christian Science denies sin and evil.

Now, Christian Science is eminently practical, and if its teachings as to the unreal nature of evil do not make better men and women, if it does not make some appreciable advance in the overcoming of evil, then it is not rightly understood and practised. The only way to prove there is no sin is to stop sinning; the only satisfactory evidence an individual can offer that hate is unreal, is by refusing to hate. The man who says, "I can drink or let it alone," can prove what he says in just one way,—by letting it alone. We know he could drink, but if he drinks, what proof have we that he could let it alone? The denial of sin, in Christian Science, is equivalent to cessation from sin. We will never prove evil's unreality by indulging it. It comes to this, that the man who insists that evil is real, and ridicules Christian Science for what it says on this point, is himself most anxious to get rid of evil. It probably isn't very pleasant to him, and he hopes some time to be free from it. Christian Science joins him in the expectation that sin will be utterly destroyed sometime, and says that the time to begin its destruction is now, and the way to destroy it is to refuse to sin, refuse to be evil, and to do this on the basis of God's goodness and His allness, hence the allness of goodness.

WILLARD S. MATTOX.

Hartford (Conn.) *Times.*

It should also be remembered that in commissioning his disciples and apostles to "heal the sick," Jesus set no limitation to the forms of disease which could be cured by spiritual means. He showed by his own example that there was no such limitation and taught his students to destroy every form of discord, whether mental, moral, or physical, which might come into their experience. Thus Christian Scientists, though fully aware of their own human frailties and failures, would not venture to deny the Scriptural affirmation that God heals all our diseases. Out of deference to public opinion and the feelings of their neighbors, they do not at present undertake the cure of certain forms of disease, but they have no warrant in Christianity for doubting that the requisite understanding of God's omnipotence is capable of triumphing over error of every sort.

The Lectures.

City of Mexico, Mex.

This field had its second lecture on January 21, 1904. There have been three lectures given in the Mexican Republic within a year; the first was given in March, 1903, in this city, the second on the date above stated, and the third at San Luis Potosi by the society there on January 18, 1904. All three lectures were given by Judge Ewing.

Christian Scientists are to be found in all the large centers, such as Torreon, Chihuahua, Oaxaca, etc., and we know the Field will rejoice with us that the truth is spreading in the Mexican Republic.

At the lecture on the 21st, the subject of which was "Works of Jesus as Exemplified in Christian Science," we had a fair audience, but it was select, attentive, and appreciative. The speaker was introduced briefly by the First Reader, Mr. E. C. Butler. Though Judge Ewing spoke for almost two hours, attention never lagged, and he was wonderfully impressed with the attention given him by the audience.

Last year the lecture went by unnoticed by the clergymen, but this year one of the Baptist ministers attended, and one of the Presbyterian preachers sent his respectful regrets that he could not attend. As a matter of fact, there were, the night of our lecture, three religious assemblies in session, otherwise there would have been at least a half dozen ministers with us that night. There has developed a more kindly feeling on the part of the ministers to us and our Cause, for which we are grateful.

The crowning event of all was to have the full lecture published in the Sunday issue of the *Mexican Herald*, thus giving those who did not have an opportunity to attend, the privilege of reading it, so one can see how far-reaching in its efforts for good will be this lecture. The *Herald* also gave a brief notice the morning after the lecture. We appreciate highly the *Herald's* kindness in always giving space in its columns to anything that concerns Christian Science, and we have, through our efficient Publication Committee, expressed our gratitude for this.

Correspondence.

Jacksonville, Ill.

The lecture on "The Meaning of Christian Science" delivered in the Grand Opera House Sunday afternoon, January 31, by Carol Norton of New York was attended by a well-filled house. The speaker held the close attention of his audience from the first word to the last, and every one present seemed to be greatly interested.

Miss Anna M. Bronson, a member of the local church, introduced Mr. Norton and said in part:—

We as a people are seekers after truth, health, and happiness. Christian Science has come to this world as a sweet messenger of love, bringing health, peace, happiness, and contentment. There is no subject that has been so little understood and so misrepresented as has Christian Science. It is not claimed that it is some new or strange religion, but the simple truth that Jesus taught and demonstrated.

The followers of this new-old religion are gathered from every class and condition of society; men and women of culture and refinement as well as those from the humble walks of life.

Through the understanding of this wonderful truth the sick have been healed, the sorrowing comforted, and the sinner reformed. Christian Science rests on the promises of the Master. Jesus said, "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do: because I go unto my Father."

Illinois Courier.

Milwaukee, Wis.

The Rev. William P. McKenzie of Boston lectured before an audience yesterday afternoon [January 31], which completely filled the Davidson Theatre. The lecture was held under the auspices of Second Church of Christ, Scientist, Milwaukee, and Mr. McKenzie was introduced by Fred T. Woodford, its First Reader.—*The Milwaukee Sentinel.*

Danville, Ill.

On the evening of January 28 our second lecture on Christian Science was delivered by Bicknell Young of Chicago. The lower floor of the Opera House was comfortably filled and closest attention was given the lecture by the entire audience. Many Christian Science friends from other places were present to help us partake of this spiritual feast, and their bright and happy faces indicated their gratitude for the good obtained.

Although our Society is small, the expenses were promptly met. In fact, there was more than was needed to defray the expenses of the lecture, and we had something left to buy some necessary articles for our reading room.

We have much to be thankful for in our growth, and we all have a deep sense of gratitude for our Leader who so patiently, lovingly, and prayerfully is showing us the way to heaven, harmony.—*Correspondence.*

Mankato, Minn.

Miss Mary Brookins of Minneapolis was greeted by a large audience at her lecture at the New Theatre, January 31, on the subject of Christian Science.

Miss Brookins was introduced to the audience by Attorney V. A. Tenney, who said in part,—

Ladies and Gentlemen:—We are fortunate in having with us this afternoon a lady who is capable of enlightening us on the subject of Christian Science. This is one of the most widely discussed subjects in the world to-day, owing to the fact that it has been demonstrated beyond all question that God heals the sick by His truth, as it is revealed in Christian Science to-day, in the same manner as he did when our Saviour walked and taught upon the earth more than nineteen hundred years ago. I feel that the citizens of Mankato are to be congratulated upon having this opportunity to listen to this marvelous truth from the lips of one who has devoted her life, through Christian Science, to the relief of human suffering, and one whose spiritual understanding of the inspired words is of such a character as to entitle her to a respectful hearing. I take pleasure in introducing to you Miss Mary Brookins.—*Correspondence.*

Lectures at Other Places.

Chattanooga, Tenn.—Bicknell Young, December 1.

Marshall, Tex.—Bicknell Young, December 6.

Wheaton, Ill.—Carol Norton, December 6.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects

Amendment to By-law.

The following section of the Church By-laws has been amended to read as follows:—

ARTICLE XLI.

THE MOTHER CHURCH BUILDING.—SECTION 3. The edifice erected in 1894 for The First Church of Christ, Scientist, in Boston, Mass., shall neither be demolished nor removed from the site where it was built, without the written consent of the Pastor Emeritus, Mary Baker G. Eddy.

Just Discrimination.

MAY we beg our friends of the daily press to exercise the same care in determining the authenticity and news value of articles reflecting upon Christian Scientists that they use in passing upon the merits of other matters coming to them through channels apart from their own recognized and carefully selected avenues of news-gathering. We do not refer entirely to communications for which the paper itself takes no responsibility, but to that which appears under the guise of news, and in the regular news columns. Weighed in the scale by which a newspaper man must determine what is news and what is not, these items frequently do not come up to the standard, but a far more serious offence is that they are, in the main, attacks upon persons whose standing in the community is of the best, persons who have attained this standing through exemplary life and conduct. There are but very few newspapers whose columns would not be found closed to such articles as we refer to if they were aimed at a Methodist, a Baptist, or a Presbyterian for no other reason than that his church affiliation was not approved. Neither would the question of his preference for homœopathy or allopathy be allowed to subject him to attack or denunciation, or to open the columns of any paper to a general and indefinite pillorying of the medical profession.

Perhaps the answer of those newspapers which have unconsciously allowed themselves to be used in this manner would be that Christian Science is so new that anything about it or about its followers is news. That may be true to a certain extent, but not to an extent which justifies giving space to the statements of unknown or anonymous persons who trade upon the fact that it seems possible under present conditions to secure a hearing for attacks upon Christian Scientists, no matter how unsupported they may be. The comparative novelty of Christian Science should have worn off by this time. The movement is long past the allotted twenty-one years of infancy, and has taken its place among the recognized religious denominations of the world, and its practice of healing by prayer is so well established and has proven so successful that it is being generally accepted. The fact that it has seemed necessary for Christian Scientists, like all who step out of the ruts of common and generally accepted theories, to "run the gauntlet" of public misrepresentation until they had definitely taken their place in the public thought, does not warrant the continuation of such refinement of cruelty after even so poor an excuse has become "stale, flat, and unprofitable."

All we ask is that the same discrimination be used where Christian Science or Christian Scientists are said to be involved that is used in all other cases. We do not mean to be understood as alleging that all newspapers are careless in this matter, for we know many that are most punctilious, and yet even they are sometimes imposed upon. To those, however, who have not reached the point of careful and impartial discrimination we say, in the words of Jesus, "Many good works have I shewed you from my Father; for which of these works do ye stone me?" M.

Unchristian Resignation.

THE promise of future justice never removes the sting of present wrong, and he who seeks to lighten human burdens by such attempted amelioration will be justly judged by the world as practically condoning offences which he ought to condemn.

We were led to think of this recently on reading the following bit of counsel to workingmen, which appeared in the editorial columns of a religious weekly. After speaking disapprovingly of a given form of labor agitation, the writer says,—

"Fill the position allotted to you by Divine Providence, and be resigned to His will; suffer an injustice for Christ's sake, but do no man wrong; practise self-denial and carry the cross, and you shall wear a crown for eternal life."

Quite apart from any question as to the right or wrong of the methods workingmen may employ for the advancement of their class interests, it should be recognized that they are not incapable of detecting any element of cant or inconsistency which may enter into this kind of unsolicited religious advice. They are not incapable of seeing that divine Providence cannot be the author or supporter of any form of injustice, whether it be direct as in the open violation of personal rights, or indirect as in the withholding of a fair chance,—that equality of opportunity to profit by earth's generous provision for all legitimate human needs, which inheres in the Christian declaration that all men are brothers, the children of one common Father, God. "A selfish and limited mind may be unjust; but the unlimited and divine Mind is the immortal law of justice, as well as of mercy" (Science and Health, p. 36).

The average man sees clearly that to endure indefinitely the injustice of man to man, would be to consent to and thus foster a wrong which God has ever condemned, and that if it be a gain to perennially suffer injustice, then injustice must be a good thing for its victim, and in so far it cannot be an evil! He who hopes to quiet agitation and beget patience and forbearance by such specious reasoning, will meet with disappointment. Christian Scientists may often be in great uncertainty as to the moral significance of political and economic movements, and hence be compelled to reserve judgment respecting them, but their concept of God and His government saves them from the error of heaping contempt upon Christianity by counselling a struggling fellow-man to be submissive to manifest wrong, as to the Divine Will, and with a view of securing a heavenly crown thereby.

There is no injustice in God's universe and no wrong, and when the confusing strifes and contentions of human history are recognized as the fruits of material sense, of the ignorance and false belief of mortal Mind,—then we shall be able to work effectively ourselves, in the interest of civic and economic righteousness, and wisely and sympathetically to counsel our brother men, so far as they may be prepared to listen, respecting those divinely appointed means of righting wrongs, which most surely advance both the individual and the communal welfare. W.

Scientific Abstinence.

At this season, when the question of abstinence has a prominent place in popular thought, it may be well to ponder its relation, in the light of Christian Science, to the moral and physical welfare of mankind. It is surely clear that we can never be benefited by abstaining from that which we believe to be good, and in this enlightened age all should see that self-discipline which does not appeal to the intellectual and moral nature, can be of no real value. It can also be seen that sensuous pleasures lead to a dependence upon the material, which is unworthy of man's higher nature, and that in the degree of our spiritual supremacy we shall not suffer from their deprivation.

We learn from the Bible that when Moses went up into the mount to receive the law, he was without material food for forty days and nights, but so far from showing any ill effects from this long vigil, his face manifested such radiance that the people could not look upon it. In the 103d Psalm we read that God heals all our diseases and sins, and so crowns our life with His tender mercy, that our "youth is renewed like the eagle's." It also says, "He made known his ways unto Moses." Was it not this glorious revelation of divine Love which so sustained Moses that no other nourishment was needed? Again, we are told that when the prophet Elijah was in peril from the enemies of Truth, he was divinely sustained in the wilderness, as was Moses, and for the same period.

Our text-book says that "the New Testament narratives are clearer, and come nearer the heart" (Science and Health, p. 501), and through them, we learn from the story of Jesus' temptation the truer meaning of abstinence. He was then at the beginning of his career, and he had to prove for himself as well as for all who should follow in his steps, that "man shall not live by bread alone, but by every word that proceedeth out of the mouth of God." It is evident that in this struggle the Master gained such an understanding of the application of truth to all human need as was never before attained. He proved for himself that man really lives by Spirit, not by matter, and the immediate results of his decisive struggle were the healing of "all manner of sickness and all manner of disease," and the preaching and teaching of the truth which makes free.

At that time it was believed, indeed the majority still believe, that man lives by matter, and not by Spirit. The Bible teaches, however, that he does not, and Christian Science declares that the attempt to live without "the bread of life" can only result in years heavily burdened with the needless beliefs of sin and suffering.

Is it not strange that professed Christians should have so little hesitation about doing without the spiritual food which, according to the Bible, is all-sustaining, while they admit the necessity for regularity and system in partaking of the material? Are not Paul's words applicable to this state of thought, "For this cause many are weak and sickly among you, and many sleep"?

It is interesting to note what is said by the apostles on this subject. Peter, who was so familiar with Christ's teaching, says, "Abstain from fleshly lusts which war against the soul," and Paul's counsel is to "abstain from all appearance of evil." This scientific abstinence is not for certain seasons, but for all time, and it begets a healthful appetite for all that upbuilds and strengthens man's spiritual nature. When we learn to abstain from evil thought and evil speaking, our Leader's grand words will be fulfilled, "eternal Truth will be understood. . . . The lusts of the flesh and the pride of life will then be quenched in the Divine Science of being; in the ever-present good, omnipotent Love, and eternal Life, that know no death" (Miscellaneous Writings, p. 182).

K.

Letters to our Leader.

Brighton, Mass., February 23, 1904.

Rev. Mary Baker G. Eddy.

Beloved Leader and Teacher:—Your precious letter came with Spirit-inspiring encouragement to plod quietly on. I rejoice to know that my previous letter occasioned you gladness. We are enjoined to "Serve the Lord with gladness" and to pray, "Make us glad according to the days . . . wherein we have seen evil." Your previous message was, "The waves beat in vain against such as build upon the Rock of Christ." Its sense is to me impregnable, imperishable, impersonal Truth, the vitality of all being, Principle, wholeness, and love.

As "Thankful Hearts" reported in the *Sentinel* (June 21, 1900), both my dear wife and myself have repeatedly and quickly healed like cases, both in children and adults. Since removing hither, I was called to visit a gentleman in his bed, with the most oppressive beliefs of grip and diphtheria. He was relieved of much suffering and fear after the first treatment, and on the third day, he was enabled to go to the city.

My wife was telephoned for and went to another town, to combat the dread that a second child would be taken away with the seeming that removed an infant a few weeks since with what the doctors called diphtheria. On her arrival the child could not speak. After treatment, she used her recovered voice, in insisting that the practitioner and Science and Health be sent away. Further "demonstration of the Spirit" brought the little one to the lap of her healer with conscious gratitude, "clothed and in her right mind," —perfectly and instantly healed. She has reflected the healing Love ever since.

My wife's brother's case was called hopeless from Bright's disease. One evening he asked, "What are you reading?" His sister replied, "Nothing that will interest you." He responded, "What is good for you is good for me; read it." It was your "Unity of Good." It completely healed him, and he is rejoicing in Christian Science. While a Reader in New York, I was led to correspond with a couple in California, the man eighty, the woman seventy. They wrote me recently, rejoicing that they had Science and Health, *Quarterly*, *Journal*, and *Sentinel*, and studied the Lesson-Sermons in their remote mountain home, and to attest the good done, they saved up ten cents at a time until it reached five dollars which they sent to remunerate me for those services five years ago. That means much, as they work from dawn to dark. But the word comes, "In this rejoice not, . . . but rather rejoice, because your names are written in heaven." So we set to our seal "that God is true," and "Rejoice evermore," as we see the dawn of what Spurgeon used to tell us; viz., "When that American religion is understood and the sick are healed and the sinner saved, while that 'little book' (Science and Health) is preached and read, it will lick up every other religion like one of their prairie fires." With much love, in which my wife unites, I am your disciple,

GEORGE TOMKINS.

City of Mexico, January 26, 1904.

Rev. Mary Baker G. Eddy, Pleasant View, Concord, N. H.

Beloved Leader:—We write to tell you of another beautiful demonstration we have had, as we know you will rejoice with us. We have just had the privilege and the benefit of a second lecture in this Field, the first having been given in March, 1903, and the second on January 21, 1904, making two lectures on Christian Science in Mexico's fair capital in less than a year. In fact, it is the third lecture in the Republic of Mexico within one year, one having been given at San Luis Potosi on January 18, 1904. All three lectures were delivered by Judge Ewing, and we know the "Gospel of Healing" he preached will touch many a con-

Digitized by Google

sciousness in this great republic and awaken many to the understanding that God is All in all, and that He can heal and save now just as He did through Christ Jesus.

Enclosed you will find a brief notice of the lecture on Friday, the day following, and a full report of same in Sunday's issue of the *Mexican Herald*, January 24. We appreciate the *Mexican Herald's* kindly attitude and its willingness always to publish anything that concerns our Cause.

Much healing is being done here by the workers in His vineyard; and every phase of sin or sickness overcome, whether within ourselves or for others, enables us to rise into a higher understanding of Life, Truth, and Love, and this brings with it a better appreciation of what you have done and what you are daily doing for mankind.

With much love from our branch of the Mother Vine, we are, Yours in Christ,

R. EVART, *Clerk*.

First Church of Christ, Scientist, City of Mexico.

The Christian Science Movement.

THE pamphlet bearing this title has been revised by its author, Mr. Norton, so as to be up to date in its statistics, and additions have been made giving some of the recent important deductions of natural scientists in regard to matter. This pamphlet will be found useful for distribution where information is needed in regard to the purport of the Christian Science movement.

In Joplin, Mo.

First Church of Christ, Scientist, through its Board of Directors, has presented our free public library with the following works by Mrs. Eddy.

"Science and Health with Key to the Scriptures," "Miscellaneous Writings," "Retrospection and Introspection," "Unity of Good," and "Pulpit and Press."

The books were gladly accepted by the Library Board, and their appreciation was expressed in a very kind letter of thanks.—*Correspondence.*

In Evansville, Ind.

We organized as a church in July, 1903, with twenty-one charter members, and an attendance of from forty to fifty. We are all very grateful to our dear Leader, Mrs. Eddy, for her wonderful guidance, and especially grateful for Science and Health, the new Manual, and all the other valuable literature which she has so lovingly provided for us, and which enables us to know what steps to take for the advancement of our Cause. Much literature has been circulated in the city. Our Sunday School has donated Science and Health and the *Sentinel* to the public library, and a Bible and *The Christian Science Journal* to the reading room.—MARY MUNTZER, *Clerk*.

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

Testimonies of Healing.

I am very grateful for the benefit I have derived from the understanding of Christian Science. It is now almost two years since I first set foot in this beautiful home of God's children, and I must say that although I did not at the time believe in the Bible and had no faith in Deity (for I had never had the right concept of God) yet I was deeply impressed with the first service I attended, and went away feeling that this was truly the gospel of love and good-fellowship I had so often heard about. From that day a strong desire to know all that this Gospel of Love teaches and to benefit by the understanding derived from its teachings impelled me, and I must say that I have been amply repaid and have never regretted the step taken.

I think it must have been due somewhat to my earnest desire to know the truth, that I have been able to help myself by its application almost from the very beginning. The tobacco habit, which I had for twenty-five years and against which I had struggled many a time, but without success, left me at once and all desire for it is gone, also the desire for whiskey became a thing of the past. The mental and spiritual uplifting were, however, the grandest of all demonstrations. I have learned to love the Bible and to look for Truth in that blessed book, and I have reached a new understanding of it by the aid of "Science and Health with Key to the Scriptures" by our beloved Leader, Mary Baker Eddy. I feel very grateful to her and also to my dear practitioner and other friends who have helped me to gain this understanding.

To me it is certainly the greatest privilege to be a Christian Scientist, even if I have yet but a limited knowledge of the truth and its application, but I have a strong and ever-growing desire to know more of it. It has not only been the means of bringing about a mental, moral, and physical change in me, but it has also been a great help in a business way as well, and I have had some beautiful demonstrations in that way. One thing for which I am most grateful is the overcoming of quick temper which caused me much trouble. With this error I had to struggle longer than with any other, but finally Truth conquered and I rejoice in the victory. My sight, which was also very bad and necessitated the use of glasses for almost five years, has also been restored, and I can now see to read the finest print without the aid of glasses. For this also I am grateful. We have had other demonstrations of truth in our family, one of which I will mention. My eldest daughter's left foot had turned at the ankle so that she walked on the outer side of her shoe. The trouble was caused by rheumatism, and although it had been manifest for over six months it was entirely cured in one week's treatment. My children ask for Science treatment for their ailments, and are helped at all times.

"Ye shall know the truth, and the truth shall make you free." I have come to realize in the fullest sense how true this is, and I often think upon the words of a brother member who remarked as we were signing the church register, "We will now sign the Declaration of Independence." It certainly is independence from all material law; and is a life of liberty in our God-given domain where error has no power, and peace, love, and harmony abide forever. How beautiful it is to have this safe abiding-place where Love rules and governs man and brings him in close communion with his Creator.—O. F. F., Chicago, Ill.

I longed to be a better Christian and prayed earnestly for several years, asking God to guide my feet into paths of righteousness and peace. Christian Science came to me in what seemed to be a very dark hour. I had searched for truth in orthodox churches till I was "weary and heavy laden." I worked in one church thirteen years, and from

Digitized by Google

that went to a mission that believed in faith healing, but was not satisfied, and still kept on asking for light.

At last, when our text-book was put into my hands, the great light did come,—it was just what I had been asking, looking, and waiting for. It was food for my soul, health for my body, and I lived on it for weeks. In a few weeks a disease of twenty-three years' standing and other chronic troubles entirely disappeared, and I have never had the slightest return of any of them. This great blessing came through reading "Science and Health with Key to the Scriptures" by Mrs. Eddy. During class instruction I was troubled with three very discordant teeth. I told my teacher about them, and a few days before the close of class they were entirely healed. The dentist had said that all of them were so nearly gone they could not be saved. Two healed over so the cavities could not be found, and I am wholly unconscious of any sensation in the other.

Since coming to Christian Science a babe was born to me under perfectly harmonious conditions. The third day error wanted to creep in with a sense of suffering, and the demand that I keep still to avoid further trouble. "Miscellaneous Writings" was under my pillow. I took it up and turned to the hymn (p. 396) written by our Leader,—

O'er waiting harpstrings of the mind
There sweeps a strain,
Low, sad, and sweet, whose measures bind
The power of pain.

Instantly the sense of pain vanished. I got up, dressed myself, and have been perfectly well ever since; whereas before, there was more or less discord, confining me to my bed two and three weeks.

Our little boy of five years was healed of spinal meningitis in four days. Christian Science is our only medicine, our only preacher, our only physician.

I wish to express my gratitude to our dear Leader for the wonderful book, Science and Health, that has brought to my life health, peace, and joy, and a wonderful spiritual uplifting, such as nothing else was able to give. I wish also to express my thanks for the message, "Now and Then" by our Leader. A great unfoldment of obedience in the ever-present now, has been given me,—never to put off till to-morrow what is to be done now,—"Now is the time in which to experience that salvation in Spirit and life. Now is the time for so-called material pains and material pleasures to pass away" (Science and Health, p. 39). Through the realization of this great fact I have been enabled to heal instantly the sense of pain in a tooth for a little girl. I thank God daily for sending this great light to the world for the benefit of mankind.

—MRS. ELLA PRYOR, Los Angeles, Cal.

I was brought up under the influence of a church that adhered closely to the literal interpretation of the Bible and the observance of outward form and ceremony in its worship. When I was grown we moved into a community where there was no church of this denomination. A few years later, wishing to identify myself with Christian work and workers, I joined another church, and, so far as I knew, led a life consistent with its teachings and practices.

Moving again, I became troubled and anxious for fear I was not living up to the letter of the Bible. Truly desiring to be a Christian and to be confident and peaceful in my religious thought, I prayed earnestly to be guided to do the right thing. When in my mental struggle I reached a point where I was willing to make a complete surrender of self and walk in the way which I had preferred not to take, Christian Science was brought to my notice, and I began at once to study it. It attracted me and held me, and I could not explain why. I was shocked to learn that the forms and ceremonies, the non-observance of which had caused me so much distress, were observed only in their spiritual signification and application. Then there was a mental contest over every point in which Science differs from the old views; but as I gained understanding of the spiritual import of the Word through the study of our text-book, the fears and doubts all melted away. Now I rejoice that we may know that our religious thought is based upon divine Principle. "The Spirit itself beareth witness with our spirit, that we are the children of God."

Several months after I began to meet and talk with Christian Scientists, I determined to try Christian Science for physical healing, for I very much needed help. I shall never forget the feeling that came over me on my return from my first treatment. My thought was, "Now I am in the hands of God," and I had a sweet sense of rest, peace, and hopefulness. In some respects, I realized benefit from treatments at once, but the ailments which seemed the worst were very slow in yielding. They seemed to disappear only as I grew in understanding and gained victories over self. I have no doubt the slow healing was best for me, as it kept me studying to learn how to overcome.

I have seemingly had very much to bear since I accepted Christian Science, but through all I have been thankful that I was led to know something of this truth which never fails to give help and comfort.

I wish also to acknowledge that the more I study Christian Science and the better understanding I have of its wonderful power and adaptability to all the needs of mankind, the more do I appreciate and love our Leader and the earnest workers who are so faithfully meeting the demands of the time.—HANNAH G. MILLER, McPherson, Kan.

In the later part of August, 1903, at two o'clock in the morning, I was roused up suddenly from sound sleep by my telephone bell ringing loudly. I sprang from the bed quickly, in a dazed condition of thought, and struck my right foot against the leg of a large chair, and broke the third toe off short at the second joint. For a moment I could not think (seemingly), and the pain was to mortal sense so great, it was terrible, but I soon rallied, and I realized quickly and clearly the Truth of being. I then walked on the heel of that foot to the telephone, to know what was wanted. It was a call for quick help, and I replied that I would do what I could. I walked back through a long hall to my bed, and sat down on the side of it and realized the Truth of being, for the one calling for help. I then got into bed, and brought the toe, which was hanging straight down, up on a line with the others. I then pressed my left foot against it, to hold it up, and worked in thought. Later I fell asleep and knew no more of the toe until I arose in the morning, when, putting the foot on the floor, I was reminded of what had happened in the night, for again the sense of pain was terrible. I quickly declared the truth, and again walked on the heel to my dressing room, sat down and put on my stocking, and pressing the toe up in its natural position, I put on my shoe, and after both feet were dressed I arose to walk. Error screamed, You cannot do it, but I realized quickly that Mind is master, and I walked on the foot, and kept walking until all pain ceased. I kept the shoe on all day, but when at night I took it off, error again tried to assert itself to prevent me from walking.

Again the strong, clear declaration of the Truth of being mastered the situation, and I rested well through the night without any pain. In the morning error again appeared, but for the last time, for I put on my stocking and shoe, and went all day without any discomfort or pain, and on the third day the toe remained in its normal position, and has given me no further trouble. I had refused to talk about the accident, and did not look at the toe, but placed it where it belonged without looking at it. I refused to recognize the thought that error could manifest itself.

M. E. CRAWFORD, Cleveland, O.

[Translation.]

I have abundant reason to make acknowledgment to God for the blessings which I have received through Christian Science.

About two years ago I had become so weakened and miserable through bilious attacks, that I had to remain in bed. Sight and hearing diminished perceptibly, and I could no longer partake of food. A physician was called, against my wish, and after two weeks he declared that tuberculization had formed in my stomach. He said that on account of my advanced age, he could not perform an operation, but that the conditions were such that my stomach might entirely close.

There seemed to be nothing left for me to do, but to befriend myself with thoughts of death. We were just then moving into a new dwelling, and on entering my sick chamber I said to myself, This will be my death chamber. But God has helped me and He showed me that through Him, and in Him alone, we find help and comfort for everything.

That night, after having listened to the words of a practitioner, I turned to Christian Science and asked for treatment. Through the words and the treatment of the Scientist, there was such a result produced that, after two weeks, I could eat everything without feeling harm from it. After six weeks, the treatment was discontinued. I was healed, and am now again a contented woman, enjoying life. Almost two years have passed and I have had no return of the old trouble. Though I have had hard experiences during this time, I have proof that I have gained spiritually, for I have been born anew, thanks to the beneficial effect of Christian Science.

I hardly need to add that I have since then become a grateful and convinced adherent of Christian Science, am firm in the Christ-truth, and immovable in faith toward God, who alone can bestow health and true contentment.

FRAU A. HINDEN, Zurich, Switzerland.

As I had been placed in the ranks of the so-called incurables, I feel that if such as I keep still, "the stones would immediately cry out."

I was attracted to Christian Science by the spiritual benefit received by my brother, but I was very skeptical about the physical healing and especially resented the application of Christian Science to children.

This human opinion was of course founded on ignorance of Christian Science, but I had a great desire to be tolerant and thought if grown people believed and trusted in it they should be unmolested in their attempt to worship God according to the dictates of their own conscience. In my heart I really pitied them. I said it is too good to be true.

I had suffered a long time and had submitted to a surgical operation in the hope of health. I received no benefit but a complication of other troubles that the physician said was the outgrowth of such difficulties. Finally I was told that my case was incurable. I then sought help in Science, having absolutely nothing else on which to rely. I was wonderfully benefited by the third treatment and fully convinced of the efficacy and great blessing of Christian Science to children. I was certainly willing to be as a little child and was very like one in helplessness. I rejoice with those mothers who are so blessed as to have a knowledge of the truth while they are caring for their young children. It would have saved me so much.

After being healed in Christian Science I met the physician who told my husband and myself of my condition. He seemed surprised to see me so well, and asked me about it. I told him how I was healed. He said, "Well, I assure you it was my honest opinion that your case was hopeless." I did not doubt that, and now consider that the words he addressed to me which brought such a chill to my heart at the time, were of inestimable value to me.

Now my highest ambition and dearest hope is to be able to live so that I may prove worthy of my blessings.

MRS. ANNA M. FIGUET, Kansas City, Mo.

About a year ago, while at work on a building, I met with an accident. A fellow-workman and myself were carrying some heavy timber, when I stepped upon a board which broke under my weight precipitating me through an opening. Falling about ten feet, I struck my back on a joist, which rendered me partially unconscious, and to sense pretty badly used up. The accident happened about 10 A.M. As soon as possible I tried to realize that there were no accidents in divine Mind and that I was God's perfect child. I then returned to my labor and worked the remainder of the day. During the day the men who had seen me fall suggested that I might be injured internally, and that night I suffered intensely and could not turn over without assistance. In the morning I arose and dressed with great difficulty and went to call on a practitioner to receive treatment.

After talking a short time I felt greatly helped and in twenty minutes was entirely relieved, feeling like a new man. I then left the house, running down three flights of steps. I went to work after dinner and did not lose any more time, nor experience any more pain or suffering. I am indeed thankful for this truth which is being given to the world through Mrs. Eddy for the uplifting of mankind. I have been able to realize the power of Truth in many ways since, not only for the physical but for the spiritual need as well.—B. C. VINCENT, Pittsburg, Pa.

Jesus said, "The kingdom of heaven is like unto leaven, which a woman took, and hid in three measures of meal, till the whole was leavened." I used to wonder, in the old thought, what those words meant, and I never could understand, but now it is different, for the old things have passed away, and all things have become new. The leaven has been hidden in my consciousness, by our Leader, through her wonderful book, "Science and Health with Key to the Scriptures," and it is working.

My experience in Christian Science covers a period of only one year and a half. Prior to that time I practised medicine in New York City for fourteen years. I have spent years in hospital work, at the hardest kind of labor and study to acquire the knowledge and experience necessary to cure disease and to alleviate suffering.

During the past eighteen months I have seen more people who have been cured of hopeless ills, more suffering alleviated, and more real help received in time of trouble than in the whole fourteen years before. For this experience and for the light that has come to me I thank God. To our beloved Leader, Mrs. Eddy, my gratitude is unbounded. I am a member of First Church of Christ, Scientist, in New York City and I am very thankful to all those who have lovingly and wisely helped me thus far, up "the rugged way."

SARAH A. FRENCH BATTEY, M. D., New York, N. Y.

I desire to add to the many others my testimony of the power of God to heal through the understanding of Christian Science. I was told I had consumption, and my friends would look at me sympathetically and say to each other, "She cannot live six months;" and I did not care very much whether I did or not, as I had just lost my husband, who had the same disease that I was suffering with, and life did not seem worth living. But I was led to the home of Christian Scientists in Glen Rose, Texas, where I read Science and Health, and was healed in a very short time. When I returned to my home in Arizona my friends wondered at my looking so well. I have also been healed of indigestion.

Digitized by Google

constipation, erysipelas, neuralgia, and other ills which I cannot mention.

My little boy had a running sore on his neck which was treated by different physicians, and he took, or had applied, many kinds of medicines for two years. None of these things had the slightest effect, but he was completely healed by Christian Science.

It is nearly five years since I began the study of Christian Science and I am now strong and well.

Since coming to Chicago I have had class instruction from one of our dear Leader's students. I am very grateful to God for leading me into this blessed truth, and my daily prayer is that I may be a better Christian Scientist.

MINNIE MCNULTY, Chicago, Ill.

I feel that I would like to express my gratitude for the many blessings which have come to me through the knowledge of Christian Science. Although I can only relate a few demonstrations over minor things, such as toothache and rheumatism, which latter was healed instantaneously in one treatment given by my wife, yet the spiritual and moral change in my thoughts and mode of life is wonderful.

From being restless, discontented, and always craving for excitement, I have been changed into a happy and harmonious man. I am still learning more and more the truth and helpfulness of Jesus' statement, "Ye shall know the truth, and the truth shall make you free." I may add that the discernment of this glorious truth has enabled me to free myself of the tobacco habit of twenty-five years' standing, and also of the taste for alcohol for nearly as long a time. I have not yet been privileged to receive class instruction, but feel certain my need will be met in that respect.

In conclusion I offer my heartfelt and loving thanks to our dear Leader, Mrs. Eddy, for the glorious revelation of Truth she has given to the world in her book, "Science and Health with Key to the Scriptures."

ESTRIDGE HEARD, Boldre, Hants, Eng.

It is now nearly five years since I was healed through Christian Science, and during that time I have enjoyed most excellent health without the use of any material remedies. Prior to that, I was for a number of years in very poor health; not confined to my bed, but always in pain, dragging about by the exercise of great will-power.

I have never seen the dear Scientist who was the means of my release from that bondage, but the work was effectually done by absent treatment. I was then in Colorado, and until very recently had never attended a Christian Science service. I took all our periodicals, however, read all our dear Leader's published writings, and have been a faithful student of Science and Health and our Lesson-Sermons.

From childhood I had been very familiar with the Bible, and revered and loved it, but it has new beauties to me now, and the cheer and comfort derived from the understanding of Christian Science have been of untold value to me. It has helped me in every way. My heart has a constant song of thanksgiving to our loving Father for all His blessings and mercies, and especially for this new light given to us through His faithful servant, our beloved Leader, Mrs. Eddy.—MRS. M. F. W., Chicago, Ill.

While I did not take up the study of Christian Science for the purpose of being lifted out of sin, this is exactly what transpired. I was lifted out of sin,—sinful thoughts and deeds. I do not mean to imply by this that I have overcome all sin, but I have been freed from sin to an extent beyond what I thought possible before I knew anything of Christian Science. I have been helped out of many slight physical troubles but they are nothing compared with the good I have received spiritually.

Since attaining some understanding of Christian Science I have proved its power to destroy evil, not only in cases of sickness, but also in discordant conditions of business and in manifestations of jealousy and hate, and as I work all the while for a higher understanding of Truth and Love, this effort is always rewarded by clearer and clearer views.

I would express my gratitude for what Mrs. Eddy has done toward helping me "o'er the hillside steep" (Miscellaneous Writings, p. 397), but mere words fail. It is, however, a source of much pleasure to know that I can express my gratitude by living in accord with her teachings, by following in her footsteps.—C. L. B., Dubuque, Ia.

I have long felt a desire to tell what Christian Science has done for me, and hoping it may be of some help to others, I send this testimony. It is now eight years since I was at what seemed to be death's door. The physicians said I was too weak to stand an operation for tumor, and as I had consumption I could live only a few days.

Then it was that Christian Science came to my aid, and through the healing and uplifting power of Truth I was able in a few weeks to take a short journey, and while my healing seemed slow, Truth was victor and the words of Isaiah were fulfilled, "They that wait upon the Lord shall renew their strength."

Since then, through the study of the Bible and Science and Health, I have learned in a degree something of this glorious truth which has enabled me to overcome discord and physical inharmony for myself and others. I humbly and gratefully thank God and our beloved Leader for this gospel of Love. I am also grateful to my teacher and to all who have helped to lift me out of darkness into the light.

NANNIE C. MCCLAIN, Sedan, Kan.

I came to Christian Science for healing from nervous prostration and dyspepsia, with all their accompanying train of ills, and from a deplorable mental darkness that was "without God and without hope."

I had inherited these troubles and believed that I must die from their effects. I had actually reached the state where I was perfectly willing to depart, feeling sure that the next condition—if perchance there be one—could not possibly be any worse, nor my suffering, either mental or physical, be any more unendurable than here.

I was healed immediately of the dyspepsia, although the mental depression and fear of my food did not yield for some weeks, but it gradually faded out, even as the memory of an unpleasant dream. My one desire since then has been to keep my mental world a place of purity and peace, where Love reigns supreme. I find very true the words of our beloved Leader: "The warfare with one's self is grand; it gives one plenty of employment" (Miscellaneous Writings, p. 118).—MAUD WINTON BEALER, Jamestown, N. Y.

When papa and mamma came to Science I was a very little girl, not quite four years old, and was under material treatment for my eyes which, to mortal sense, were badly crossed, and my sight seemed very poor. The doctors said an operation was the only help there was for me, but we heard of Christian Science at that time and I attended the Science Sunday School, and although I did not have special treatment for my eyes, it was while I was put under treatment for blood-poisoning that my eyes became straight.

I wish I could tell all that Christian Science has done for me, but I should not know where to begin, so can truly say, Science is all in all to me and I use it when in school, at play, and at home, and am happy every moment. I am now ten years old.—ALMA LARBEY, Brooklyn, N. Y.

From our Exchanges.

Multitudes in our own day, as in all the past, are "seeking rest and finding none" in many of the most agreeable pursuits of life. Disappointments come when the aim is not realized. We need to understand, amid all such disappointments, that an inner spirit that sets us in open and intimate and constant relations with the brightest and best side of the world we live in, is a sure source of repose and peace. There are many things in which we find pleasure that so happily fill the time as to make us forget the passing hours. But this forgetfulness does not bring what we need. The one supreme source of repose and peace to the soul that has entered into the higher sphere is the gift of the spirit of God, that sufficeth its deepest want, proffers a divine companionship, and makes it sensible of its greatness and sure of its immortality. In God is our rest; because in Him do we find the goal of our aspirations and the crown of our hopes. He is our life; He is our portion; He is our exceeding joy. God is our home and our heaven. Apart from the Infinite Life we are in a restless and despairing orphanage; while in oneness and love, and a constant presence of Him in the soul, a true content and a profound gladness shall arise, as the fruits of the earth grow and ripen in the summer's sun. Great peace have they that love God's law. Greater peace have they that dwell in that inner calm of the universe in which God Himself is revealed.

The Universalist Leader.

Our life is more than our words. When Jesus said, "Ye are the salt of the earth; ye are the light of the world," he was probably not thinking of the testimony we should utter, but of the life we should live. That passage follows the Beatitudes. We are salt and light if we are meek and merciful, pure in heart and peacemakers. Our words are finally useful only in so far as they express and interpret our lives, and so give consciousness and clearness to the unconscious impressions men have gained of us. If our words do not formulate what we are, or at least what we long to be, they are a deceit for others and a snare for ourselves. Thunder makes a noise, but lightning is the real force and the cause of the thunder. The lightning of our life must precede the reverberations of our words.

Sunday-School Times.

Men may be cultivating a bit of greensward and a few pretty flowers on their lawns in front of their doors, but that scant cultivation does not always give intimation of the tangled wild wood of the back country. What men are when away from the public stare—when alone; what they would be under stress of great temptation or great provocation; what are the unsubdued wilds of their natures where noisome creatures burrow and great passions hibernate and savage instincts hide in covert,—alas! it is these things that are often overlooked and may well give every man concern! What would the man be, with these savage latencies appealed to and evolved, is the question.

SAMUEL H. HOWE, D.D.
The Homiletic Review.

Men who are not doing business on Christian principles do not want Christ's presence. He is a constant rebuke to their unrighteousness. But wishing him away does not send him away. If he is not present as a Friend, he is present as a Judge. Jesus Christ is a factor in human society of which the world cannot rid itself.—*The Examiner.*

It is not a new revelation that we need, but ever new light on the old revelation, and a new heart to live up to the light given.—*The Examiner.*

THE CHRISTIAN SCIENCE TEXT-BOOK.—Science and Health with Key to the Scriptures with latest revisions and additions, and numbered lines. 700 pages.

For description, price, and other information, see last page of cover.

THE NEW CONCORDANCE.—A complete Concordance to Science and Health with Key to the Scriptures. This work has been compiled from the late revised edition of SCIENCE AND HEALTH, and contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10x7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

CHURCH MANUAL.—Containing the By-Laws of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. This does not include the list of members. Price, prepaid, $1 per copy; $5 per half dozen; $9 per dozen.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America.

It contains about thirty-eight pages of reading matter, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

German Supplements

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. The Christianity of Christ. By Rev. IRVING C. TOMLINSON.

Reprints from the Journal and Sentinel

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea: 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

By direction of the Secretary of War, and on behalf of the Government of the Philippine Islands, the Bureau of Insular Affairs of the War Department has invited bids for three million dollars of the temporary certificates of indebtedness of the Government of the Philippine Islands. These certificates are issued under authority conferred by an act of Congress entitled "An act to establish a standard of value and to provide for a coinage system in the Philippine Islands."

It has been decided at a conference to place the statue of Frederick the Great, a gift from the Kaiser, on the terrace of the War College Building at Annapolis, with those of Alexander the Great, Cæsar, and Napoleon which the United States Government will provide at its own expense. The arrangements made are highly satisfactory to the German ambassador.

Secretary Hay and Señor Quesada, the Cuban minister, have signed a new treaty confirming Cuba in the title to the Isle of Pines. To guard against a lapse in the Senate, as was the case with a previous convention, the treaty just signed was purposely framed without the designation of any special period of time within which ratifications must be exchanged.

Mr. Powell, United States Minister to San Domingo, has been informed that insurgents at San Pedro de Macoris seized the tugboat Burro, belonging to the Clyde line of New York, and armed her. The Clyde liner Cherokee en route to Azua de Compostela, was convoyed by the United States training ship Hartford.

After a long trial, before Judge Pritchard in Washington, four of the men indicted in connection with the postal service frauds have been convicted. Two years in the penitentiary and a fine of ten thousand dollars has been imposed in the case of three of them. The fourth will receive a lighter penalty.

The monthly comparative statement of the Government receipts and expenditures show that for the month of February, 1904, the total receipts were $45,895,406, and the expenditures $42,654,772, leaving a surplus for the month of $3,240,634. For February, 1903, the surplus was $5,250,000.

Congress is expected to consider a bill to authorize the Philippine Government to guarantee four per cent interest on an issue of $40,000,000 in bonds for the building of new railroads. Governor Taft is strongly in favor of the project.

The flotilla of United States torpedo boat destroyers, bound for the Philippines under convoy of the auxiliary cruiser Buffalo, passed Perim outward bound March 4.

Foreign.

The Hague Arbitration Tribunal has decided that the three Powers which blockaded Venezuela—Great Britain, Germany, and Italy—have the right to a preference of thirty per cent of the customs duties of La Guayra and Puerto Cabello.

In an interview United States Minister Bowen is reported to have said, "The tribunal was called upon to establish a new principle in international law; namely, that all creditor nations should be treated with equal consideration, and that preferential treatment should not be obtained by blockades and bombardments. The tribunal refused to establish this principle, and the other principles now recognized as sound by international law were also at first rejected. We must therefore have patience."

Election returns for Cuba indicate that the Liberal Nationalists elected 15 Congressmen, the Conservative Republicans 11, and the Moderate Nationalists, a party peculiar to Santiago, 5. While 20 of the 31 Congressmen elected are so-called Liberals, half of this number are said to be opposed to the principles declared by the Havana Nationalists and the result of the elections is therefore generally regarded as a victory for the moderate element in politics.

The Venezuelan Congress met last week and the presidential message was read by Castro himself. He asked the Venezuelan people to accept the decision of The Hague Arbitration Tribunal giving preference to the claims against Venezuela of Great Britain, Germany, and Italy. The president's message revealed the financial resources of Venezuela to be much greater than previously had been supposed.

After long negotiations the German steel syndicate has finally been organized. The original plan was for a syndicate of the entire German steel industry, but this project was found to be impossible. Negotiations now completed include twenty-six of the largest concerns in the country.

It is stated that the Venezuelan legation in Washington will be closed, although Minister Hernandez has not been recalled. Up to last summer Venezuela had been without a minister at Washington during four years. Pulido represented the interests of the republic as secretary.

The British North American and cruiser squadrons now manœuvering in West Indian waters under Admirals Douglass and Fawkes, will return to England this month, steaming at full speed from Bermuda to Portsmouth.

It has been definitely decided that Hawaii will make no exhibit at the St. Louis Fair. The sum of thirty thousand dollars which the Legislature appropriated for an exhibit will be returned to the treasury.

A despatch anent Colonel Younghusband's expedition to Tibet announces that Great Britain has bound herself not to menace the independence of Tibet, and that Russia has given a like assurance.

Reports from Tokio declare that Japan has granted permission for fifty-three foreign newspaper correspondents to accompany the Japanese forces. Seventeen of these correspondents are Americans.

The latest despatches received from Bogota assert that Joaquin Velez was elected President instead of General Reyes, who was previously announced elected to that position.

An arbitration treaty between Great Britain and Spain has been signed.

Chile has recognized the independence of Panama.

Industrial and Commercial.

The exports of manufactures from the United States for the month of January amounted to $38,213,352, while the highest January record on any former occasion was that of 1900, when they were $35,586,940. For the seven months ending with January they amount to $250,214,936, and the highest record for that seven months' period in any preceding year was that ending with January, 1901, when the total was $239,564,064.

Commerce between the United States and Porto Rico during the calendar year 1903 amounted, in round terms, to $22,000,000. In 1897, the year prior to annexation, it amounted to $4,162,912. The commerce of Porto Rico with other countries amounted to over $6,000,000, thus making the total trade of the island more than $28,000,000 in the year just ended.

Negotiations which have been going on at New Orleans will result in the establishment of a regular line of steamships sailing from that port to Cape Town and other South African ports. The first sailing will take place this month, and thereafter there will be regular monthly sailings.

Despatches from Denver state that quantities of pitchblende rich in radium have been found in the Wood mine in Gilpin County, Colorado. Tests thus far indicate that the pitchblende found there is even better than that which Professor and Mme. Curie have been working with.

Some excellent lands, including twelve townships of the Red Lake Indian Reservation in northwestern Minnesota and a part of the Rosebud Reservation, about 416,000 acres in Gregory County, South Dakota, will be opened for settlement in a few months.

The Maine corn pack last year was 381,202 cases compared with 367,200 cases in 1902. The total pack in the United States in 1903 was 4,751,146 cases, against 4,288,664 cases in 1902.

The Armour Packing Company has bought Sir Thomas Lipton's Chicago plant, in consideration of $250,000.

The port of Boston for the year 1903 stood second in imports and fourth in exports.

General.

The Scotia Scientific expedition to the Antarctic Ocean cruised about five thousand miles to the South and east of the South Orkney Islands, and in this region located a deep sea of an almost uniform depth of 2,500 fathoms. The deepest sounding was 2,739 fathoms, or 16,434 feet.

A report favorable to the purchase of a site for a post office building in New York City has been made by the Senate Committee on Public Buildings. An appropriation of two million dollars is asked for the acquisition of the site.

The largest sum ever drawn in a single draft is said to be that making the final payment of indemnity to Japan from China, drawn in May, 1898, on the Bank of England. The amount was £11,008,857. 16s. 9d.

There is $300,000,000 worth of English money invested in submarine cables.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

From our Contributors.

Law.

FLORENCE L. KENT.

It seems strange that the world persists in thinking it can go on living in a hit-or-miss, happy-go-lucky kind of way and have harmonious results.

All are agreed that it would be foolish for a person who was unwilling to abide by the rules of arithmetic to attempt to solve its problems, nor would we expect the composer to make a correct composition unless he were willing to conform to the rules of harmony. A large part of the world, however, has been blindly living along from day to day, breaking God's laws at every turn, and vainly expecting things somehow to right themselves. On the other hand, many have patiently submitted to all kinds of discordant conditions without realizing that these are as unnecessary as is discord in music or mistakes in mathematics. To be sure, it requires study and persistent application to eliminate all errors, but we have courage to begin our work when we learn that errors are not inevitable.

The teacher says to a pupil in mathematics, You have a basic law and rule which you must always use, though you may not get a perfect result the first trial or the second. You certainly can do nothing without adhering to this basic law and rule as given. When, however, it comes to the Science of Life,—the most important of all sciences,—we find people unwilling to admit that there is a right and scientific way which is in accordance with law, and which will bring about correct results.

The refusal to admit this implies a belief in one of two things, either that there is no intelligent government of the universe, or that this intelligence is not reliable.

Our Leader defines salvation as follows: "Life, Truth, and Love, understood and demonstrated as supreme over all; sin, sickness, and death destroyed" (Science and Health, p. 593). Can we imagine a more perfect or satisfactory fulfilment of law? It is possible for us to realize this, and at once, if we are willing to work for it, and we should be inspired to reach out for the laws which must govern us in our work, and find them.

How shall we demonstrate that Life is supreme over all? The Bible tells us that to be spiritually minded is life and peace, and that "the fruit of the Spirit is love, joy, peace, long-suffering, gentleness, goodness, faith, meekness, temperance." In the proportion that we are bringing forth this fruit, are we proving that "Life is supreme over all," and in the same proportion we destroy the carnal mind which is death. John says, "We know that we have passed from death unto life, because we love the brethren." Thus we can clearly see that we may prove Life to be supreme over all by acquiring that mind of Christ, which is not subject to material law. In speaking of this so-called law, Paul says, "For the law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death."

How, then, shall we go to work to prove that Life and Truth are supreme over all? Jesus said, "I am the way, the truth, and the life." On page 474 of Science and Health we find, "To Truth there is no error; all is Truth." If Christ is of Truth there is no error in him, and therefore if we let that Mind be in us "which was also in Christ Jesus" there will be no error in us; all will be of Truth.

It remains for us to demonstrate that Love is supreme over all. How do we prove that a house will shelter us from the storm? By living in it. In the proportion that we live in Love are we protected from hatred, anger, fear, etc. This brings to our notice the new commandment of Jesus which includes all the law. It is "That ye love one another, as I have loved you." We must be willing to lay down our false sense of life with its material pleasures, pains, beliefs, and laws, and the false self which constantly wars against spirituality.

Mrs. Eddy says in the Annual Message of 1902, "Since God is Love, and infinite, why should mortals conceive of a law, propound a question, formulate a doctrine, or speculate on the existence of anything which is an antipode of *infinite* Love and the manifestation thereof? . . . The knowledge of life, substance, or law, apart or other than God—Good—is forbidden."

Our text-book says, "To be 'with the Lord' is to be in obedience to the law of God, to be absolutely governed by divine Love, by Spirit, not by matter" (Science and Health, p. 14).

Meddling with the Ark.

W. C.

When Uzzah put forth his hand to steady the ark there can be little doubt that his intentions were good, for the oxen had stumbled and the ark seemed to be in great danger, and David's disturbance over Uzzah's death is easily explained. In like manner we believe that a great many, if not the majority of, well-meaning people are acting in good faith as they put forth their hands to keep the human body from disaster when alarming symptoms appear. It is not always easy, when we seem to see health failing, to realize that we are in God's care and that the responsibility for our safety rests with Him. The punishment comes no less surely, however, to all those who try to do what infinite Mind alone can accomplish. From the days of Adam and Eve, whenever humanity has sought to nourish itself by the use of forbidden fruit, the result has inevitably been death, and there are countless numbers, even in this enlightened age, who in their anxiety to prop up God's creation, suffer constant torture through fear which is greatly increased by the belief that danger can be averted only by their own effort.

This explains the fact that physicians are frequently the unwitting cause of much unnecessary suffering. In an honest endeavor to avert serious results, the doctor often feels impelled to suggest the possibility of a greater danger than he really anticipates. We doubt if one half the suffering thus occasioned can ever be imagined by those who have not experienced it.

The history of one who began to put forth his hand to

steady the ark, but who foresaw the consequences in season to save himself, is illustrative of this, and we give it just as it occurred, although the narrator is so ashamed of his folly that he prefers to withhold his name and simply give the incidents as a warning to others.

Mr. L—— and a very intimate chum roomed together for several years in a boarding house in one of our large cities. Their attachment was like that of brothers. The friend had a succession of colds which finally developed into a severe cough that did not respond to customary remedies. Friends became alarmed, and to please them specialists were consulted. The patient was apparently not at all alarmed, but the cough was exhausting, causing much loss of sleep, and the patient faithfully followed all the prescriptions but without sensible gain. Finally a mutual friend, a young physician who had become very much interested in the study of tuberculosis, took the case in hand and insisted upon an examination of the sputum. After several trials he reported a discovery of bacteria and enjoined upon Mr. L—— the necessity of informing the patient, and of immediate action. He stated that there was no remedy known to the medical profession, and that the only chance for prolonging life, to say nothing of recovery, was to go to Colorado, New Mexico, or the Adirondacks at once. It was midwinter, but so strenuously did the young doctor urge the matter that the patient was hurried off to the Adirondacks. Now comes Mr. L——'s curious and significant experience.

The enlightenment he received concerning the subject of tuberculosis caused him much discomfort. The Board of Health sent him printed instructions as to the necessity and method of fumigating the room after his companion was removed from the house, the physician having been obliged by law to report the case. Mr. L—— carried out the instructions to the letter, holding his breath all the while. He held the bed clothing at arm's length, and handled everything that had belonged to the friend as though it were a poisonous viper. For some time after his friend went away he was careful to restrain his breathing whenever he had to remain in the room for any length of time. He began to sleep with his window wide open, a thing he was not accustomed to, but as his friend had to do it at the sanitarium he thought it best thus to avoid danger for himself, and the window was left open most of the time. As a result he suffered with severe colds and every time he coughed he was reminded that this might be the beginning of the dread disease. When he was out of doors he would take deep inhalations, and as a result strained the muscles about his chest so that he began to have severe pain in that locality. That settled it, he was now sure that the fatal malady had seized him. He watched himself in the mirror and was positive that he saw signs of failing health. He dropped a penny daily in the slot machine, watched his weight, and noticed a gradual falling off. Strange to say, when he consulted the physician, instead of dispelling all fears, the doctor, who was probably as much alarmed at the symptoms as Mr. L—— himself, only added fuel to the flame by suggesting more precautions, including occasional visits to his office to take temperature, etc., and this from no mercenary motive, for as a friend he had refused to receive compensation for his service, and his effort to save the ark, which seemed to be in danger, was certainly sincere.

Previous to his friend's illness, Mr. L—— had been somewhat interested in Christian Science. He had read considerable of the literature and attended many of the testimony meetings at a Christian Science church, but as his roommate did not take kindly to the subject he refrained somewhat from becoming a pronounced student. But the truth had taken root, and one day when returning from a visit to the doctor, a realization of his foolishness came to him with all the force of a conviction. He saw clearly that his labored effort to protect himself was but the futile endeavor to steady an ark whose safety he had far better commit to God's keeping, and from that moment he withdrew his hand and so escaped the fate of Uzzah. Instead of riding on the outside of electric and steam cars at very great discomfort, as he had been advised by the physician, he now occupied a comfortable seat. He also began to breathe freely and enjoy his room, whether the windows were open or closed, and thus to save others from the discomfort of the intrusion of his personal whims.

Every Scientist can anticipate the result. There could be but one. Mr. L——'s fine appearance occasions frequent remarks and is a constant testimony to God's generosity in the giving of health to those who are willing that He should care for His own, and in His own best way.

Proving our Position.

SUSAN B. FRITZ.

A GENTLEMAN once came to me with a question which is often asked by people who know but little of Christian Science.—"Do Christian Scientists claim there is no evil or sin?" After carefully explaining to him, that we recognize any condition of error, only to destroy it, his response proved how clearly he understood the explanation, which, when repeated, has thrown much light upon the subject for others. After listening attentively, he said, "Yes, now I see very plainly. The conditions would be similar to one in which I found myself a short time ago. I was teaching school in the mountains. While there I received a letter from a lawyer who was located in a large city a few miles away, and who wrote to the effect that the interest was due on a loan which had been given on some property several months before.

He said, "I wrote to the lawyer that I owned no such property, consequently did not owe him any interest." The lawyer wrote a second time; to which the man paid no attention. Then a third letter came threatening that if he did not pay the interest within a few days, legal proceedings would be taken. He said, "I never owned the property, therefore never secured a loan on it, hence could owe him no interest. But he claimed I did, and I would have to prove my identity or the lawyer would make me some trouble at least, even if it were not serious."

Error is sometimes just as persistent. It makes all sorts of claims upon us: That we are in bondage to laws of health, to laws of climate, to sin, sickness, and suffering of every sort, and it is our work to prove our identity as children of God. Now according to Christian Science "Man is not matter,—made up of brains, blood, bones, and other material elements. The Scriptures inform us that man was made in the image and likeness of God. Matter is not that likeness. The reflection of Spirit cannot be so unlike Spirit" (Science and Health, p. 475).

Then it is our business to "classify sickness and error as our Master did, when he spoke of the woman, 'whom Satan hath bound;' and find a sovereign antidote for error, in the life-giving power of Truth acting on human belief, a power which opens the prison doors to such as are bound, and sets the captive free physically and morally" (Science and Health, p. 495). Through reflecting the Divine qualities we prove the unreality of error, and establish our rightful heritage as children of God, subject to no law but His law.

We also expose the falsity of error, that it is wholly illegitimate, that it seeks to usurp the throne of God, that it does not in reality exist, and furthermore has no right to exist, for God is good. He made all that was made, and a loving God certainly could not make error or anything unlike Himself.

According to Webster, error is, "A departing or deviation

Digitized by Google

from the truth; falsity." The most expedient way in which to dispose of a "falsity" is to establish the truth. If a room were dark and we wanted light, we would not work with the darkness, or wonder whether it were going to vanish through the door or the window; we would simply bring in the light.

Error cannot itself enter through the door or window, some one must become an avenue or channel for it. If no one uttered a word of error and no one thought an erroneous thought, either of fear, sickness, malice, hatred, revenge, selfishness, or criticism, these errors could not exist. Then what would we have? The reign of harmony.

It is beautiful so to live, or even to strive so to live, that the command, "Thou shalt not kill" is no longer needed, for we no longer bear the malice or hatred which kill. We will all do a grand and beautiful work, if, whenever we see or hear of error we immediately know for ourselves the truth about the case; namely, that evil or error has no power. We may always know that man is a child of God: that he is strong, because God is his strength; that he is harmonious, for he is governed by God; that he is lovely, for God is Love and man is like (or the likeness of) God. Then will we be doing as Jesus told us to do, we will "Judge not according to the appearance, but judge righteous judgment."

"Who Did Sin?"

J. W. WATKINS.

About the time I became interested in Christian Science I was employed in an office where my patience was sorely tried and my understanding put to a severe test. The chief of the office was a person who, to human sense, was very irritable, fault-finding, and unkindly critical. No one in the office seemed to be able to perform any duties in a manner satisfactory to him. His language was severe and inconsiderate. To me this was a new experience and I often felt that I must resign my position, as I thought I could not endure it much longer; but I resolved not to retreat in the face of the enemy.

One evening my wife suggested that I take the matter up mentally and overcome the sense of inharmony. I at once began working, as best I could, to realize that man as God's child could not be made a channel through which a sense of error could manifest itself. Weeks and months passed without change of condition. At last I recalled a passage in Science and Health, p. 454, which reads, "Human hate has no legitimate mandate and no kingdom. Love is enthroned." I at once said to myself, and with great satisfaction, "This applies exactly to that other fellow," and I worked with renewed vigor, some weeks longer. One day it dawned upon my consciousness that the passage above quoted might be for me and not for the "other fellow." Self-examination revealed the fact that I was not entertaining a surplus stock of love, and I went to work to correct my own thoughts,—to clean my own windows and set my own house in order.

Not long after, the person referred to was absent from the office for some days, and I learned that he was sick, as was frequently the case. The day that he returned to the office I met him and spoke to him pleasantly, and asked if he had been suffering with a cold. He replied very pleasantly, "Oh, no; I have indigestion very severely." I asked him what he had been trying for it. "I have tried everything," was his reply. I said that he could not have tried Christian Science, or he would not be suffering so. I talked with him a few minutes, and he said he would read some of our literature. I sent him a *Journal*, and a few days after he came to my desk and said with a pleasant smile, that he had not found time to read the *Journal* I sent him, and did not think he needed it, as he was all right; and he had no more attacks of indigestion.

Some months later, he was called to another city to take a position there, and before leaving, he called me into his private office and told me of the contemplated change. I told him I was sorry that he was going. He looked at me a little surprised and asked, "Are you sorry to have me go when I have treated you so unkindly?" I replied, "Yes; you never were unkind to me. It was not you." He said, "Yes, I was unkind, and I am sorry; for you were always faithful and your work was satisfactorily performed." He shortly after wrote me a very kind letter.

I leave those who read this to decide for themselves for whom my demonstration was made,—myself or "the other fellow." If unable to decide, read what our loving Leader, Mrs. Eddy, says in "Miscellaneous Writings" under the heading, "Love your Enemies." If we turn the searchlight within ourselves and look away from the other man, we shall discover that we have no enemies, but that a "man's foes shall be they of his own household."

Compassion.

GERTRUDE G. NEWTON.

Many times of late my thoughts have dwelt upon the compassion of Christ Jesus. In our early work in Christian Science, have we not found ourselves striving to abide by its letter, and in such an unbending spirit as to give out the impression that we were cold, hard-hearted, and unsympathetic? Perhaps if we examine carefully our state of thought we shall find that much of this may have been due to fear for ourselves,—fear that we would not be thought scientific by older Scientists, or that the world might not recognize us as Christian Scientists.

When we turn to the Christ-way as found in the gospels, we learn that although Jesus fed the multitudes spiritually, he did not ignore their bodily want, but lovingly met it in a way that expressed a love which they were capable of appreciating at that stage of their growth.

Many helpful suggestions may be found if we study the account of the breakfast on the shore of the Galilean Sea. Christ Jesus had met and conquered death. Finding some of his disciples struggling with their labor problems, he did not suggest that they come to him and talk over spiritual matters, nor did he refer at this time to his wonderful victory, but he directed them how to work out the problem at hand. When this was accomplished, the mighty conqueror of the last enemy offered his disciples the breakfast which he had prepared for them. Let us gladly take his yoke upon us and learn of him, for he is "meek and lowly in heart."

While I was working out these suggestions and trying to seem scientific, some of my dear friends found it hard to rely entirely upon Truth for help. This attitude of thought was, however, wholly destroyed, and the barriers broken down completely, when I realized that I was trying to express love in my own way and not in the way that would best meet their need at the time. Then when I strove humbly to serve and to assist them lovingly in their problems, when I ceased to bring to their attention my little victories and my sense of the right way, when I removed my personality out of their light, I was no longer an offence, a stumbling-block, but a stepping-stone.

Dear fellow-workers, may we draw nearer to the true compassion shown by our Master, the compassion which has been lived and practised by our Leader, and commended to us in the words, "Let the world, popularity, pride, and ease concern you less, and *love thou*" (Message, 1902).

He who shall best explain the law of God, and best apply it to human things, is your legitimate ruler. Love him and follow him. But you have not, and cannot have, any Master save God Himself. To accept any other is to be unfaithful and rebellious to Him.—Mazzini.

Christian Science for Children.

To the Editor of *The Eagle*.

Sir:—I have just been reading in your issue of the 24th your comments upon the question of Christian Science as a treatment for minors. You say: "The point at issue is whether the child shall be given recognized medical treatment or what is deemed by the Scientist mental treatment."

Will you kindly allow me to say that this may be the mistaken issue, but it is certainly not the correct one.

A parent is the natural guardian of his child, and to him should be left the choice of a remedy for its ills. If a neighbor believes that the Christian Scientist parent, in his dependence upon this Science to the exclusion of medicine, is neglecting the child, it becomes the duty of that neighbor to prove that Christian Science is not a safe remedy, or what is equivalent, permit the Christian Scientist to introduce testimony establishing the efficacy of Christian Science.

If we are to be left to the mercy of public opinion and every new discovery, invention, or remedy must remain unused until it becomes popular, there can be no progress; for how can a thing become popular whose introduction is prohibited? Incidentally I would say here that Christian Scientists ask only the privilege of treating their own and those who apply to them for assistance.

Inasmuch as the mortality rate of Christian Scientists is much lower than that of any other class of individuals, the actual evidence is in favor of the efficacy of Christian Science.

The only plea that could be made in favor of a dependence upon Christian Science on the part of an adult is that to do so is profitable to the patient, and this same plea is justly made in behalf of the child.

It must not be assumed that a Christian Scientist is laying aside his only hope of recovery; it must be noted that he is substituting in lieu of medicine what he has proved by practical experience to be a more effectual remedy not only for the adult but as well for the child. Let critics disprove this fact if they would make out a case against the application of Christian Science for children.

No state statute is intentionally made for the protection of any particular therapeutical system, but is intended to guard against neglect, so the question at issue is not what constitutes popular opinion, but what constitutes a good remedy for the sick. ALFRED FARLOW.

Lawrence (Mass.) *Daily Eagle*.

The preacher rightly argues in his sermon that our duty to pray to God for assistance does not excuse us from using the means and methods for curing sickness which God intends us to use and has placed within our reach for us to use. But when the preacher argues that we should assist our prayers with drugs, we answer that he is guilty of a *non sequitur*, unless it be taken for granted that God intends us to use drugs to assist our prayer. Upon what authority does the preacher take this for granted? He wholly fails to state in his sermon. If we take Christ's teaching and example as our guide in the matter, surely we are taking the best guide from the standpoint of the Christian believer. Do Christ Jesus' teachings and example show us that God wishes to aid the efficacy of our prayers to Him for assistance, with drugs and material methods? No. They show that Jesus depended solely upon spiritual methods. Sometimes his using the mud-and-spittle on the blind man's eyes has been instanced to the contrary. But this is a puerility, else he would have used it on the other blind men whose sight was restored through his ministry, and the apostles would have used it, and the medical profession would now be using it. The Bible teaches us that God is the "Great Physician," and that it is "in Him we live, and move, and have our being;" and the Bible nowhere teaches us that our prayers need to be aided by pills, and that drugs and divine help, if used together, are more trustworthy than the latter alone. Yet the preacher mentions Christian Science slightingly because it teaches absolute dependence upon God's loving kindness. Is a half-dependence upon God and the efficacy of prayer intended to be urged by the preacher?

Shall we leave the teaching and example of Jesus out of the inquiry, and try to ascertain God's intention in respect to the use of drugs from authority or experience solely human? Even if the preacher bases his opinion of the necessity for drug medication upon his reading and observations apart from the Bible, he will soon find that the medical profession itself is largely at sea in the matter. Did God intend forty years ago that the doctor's lancet should assist prayer in sickness? Does the preacher believe that only a score of years ago the doctors added to the efficacy of prayer by denying water to fever patients and by administering potent drugs in typhoid cases? If so, he differs from the doctors of to-day, as well as from Christian Scientists. If God intends the drug doctors to be His allies, why does He permit them to change their methods so often, as well as their drugs? Are these mistakes a part of the Divine intention that men shall use drugs to help the therapeutical efforts of the Great Physician to whom omnipotence and omniscience belong? CLARENCE A. BUSKIRK.

Indianapolis (Ind.) *Journal*.

Christian Science maintains that God is Mind, and therefore Mind is individual, one, and infinite. If this is not true, what did Paul mean when he admonished the early Christians to have the same Mind which was also in Christ Jesus? If man has the same Mind that Christ has, all men have the same Mind, and the unity of God's creation is apparent. For this desirable condition Christian Science is laboring, and it is surely a laudable enterprise, since Paul entreated his hearers to do this very thing.

The Christian Scientist is surprised to find a preacher of the gospel, or good tidings, who criticises us for ascribing to God all power, all presence, and all knowledge or science, and denying that evil, sin, suffering, and death are instituted by Him, or have any existence in His perfect universe. It is certainly not good tidings to a weary world to insist, with a persistence worthy a better cause, that sin and disease are actualities, and that we cannot escape them. Jesus came to destroy the works of the devil and he spent all his time healing sin and sickness and overcoming death. Then sin, sickness, and death must be the works of the devil. Jesus called evil a liar, and the father of lies; then the devil's works or offspring,—sin, sickness, and death,—are lies. So Jesus called them and so Christian Science labels them, and as he destroyed them, so they can be destroyed to-day by the same Mind which was also in Christ Jesus.

WILLARD S. MATTOX.

Hartford (Conn.) *Courant*.

The attempt to take away from a citizen the right to pray for himself or the right to pray for another when that person requests, is contrary to the spirit and intent of American institutions. Christian Scientists earnestly believe and know that the power and goodness of God are sufficient to conquer disease as well as sin. They are content to rely on God, a happy privilege, which no fair-minded person should for a moment deny them. EZRA W. PALMER.

Denver (Col.) *Daily News*.

We are continually closing the doors against the angels of opportunity because they wear a garb that seems menacing or repellent to us.—HAMILTON W. MABIE.

The Lectures.

Brooklyn, N. Y.

Edward A. Kimball, C.S.D., delivered a lecture at the Bijou Theatre, Brooklyn, N. Y., Sunday afternoon, January 10. The lecture was given under the auspices of First Church of Christ, Scientist, of Brooklyn, and was well attended. The lecturer was introduced by Mr. F. H. Leonard of Brooklyn, N. Y.—*Correspondence.*

Bay City, Mich.

The Ridotto was well filled with an attentive audience yesterday afternoon [January 31] when Bicknell Young, C.S.D., delivered an interesting lecture on Christian Science. In a few well-chosen words he was introduced by John E. Simonson, who said in part,—

The lecturer of this afternoon will deal with the doctrines of Christian Science, a subject of great moment and much importance to us all,—a subject that is receiving the best thought of some of the ablest thinkers of the present day.

It is claimed for Christian Science that it not only heals the sick and destroys sin, but also makes mankind nobler, better, and happier. If these claims are true, it will be conceded by all that Christian Science is the most practical, and at the same time the most beautiful religion extant.

Whatever your opinion may be on the subject, all that we ask is that you treat what is said fairly, listen attentively, and judge impartially. *The Times.*

Ogden, Utah.

Judge Septimus J. Hanna lectured at the Grand Opera House, January 31, to an exceptionally large audience on the subject of Christian Science. He was introduced by Judge A. W. Agee, who said in part,—

Just why I should have been asked to preside this evening, and to introduce to you the distinguished speaker who is to address us, has not been entirely clear to me, and, though it may not be entirely to my credit, I confess that I have a very vague and indefinite understanding of the doctrines and teachings of Christian Science; but, my friends, it seems to me that the injunction to "prove all things; hold fast that which is good," comes to us with peculiar force and interest in this wonderful age in which we live. Prejudice has ever been the foe of human progress and human advancement, and so we are apt to wrap around us the cloak of self-righteousness and say that we are right and everybody else is wrong.

Who can circumscribe the human mind? Who can set a limit to the knowable? Who can point out a plan for the line of demarcation between the finite and the infinite? Who can say what may, or may not, be accomplished by the means which God has placed within our power? Martin Luther and Alexander Campbell, two of the most prominent figures of the age, were looked upon by a large portion of the religious world as heretics. These men were living in advance of their age. So I say, and believe, that to every question that comes up it behooves us to give careful, candid, and conscientious consideration to what may be presented.

The lecturer comes to us to-night to speak on the Principle, doctrines, and teachings of Christian Science. Some have said this is a new discovery; I am not sure that this is correct. I am not sure but what it may be as old as the days of the apostles, therefore I bespeak to-night a candid and careful consideration of this question. Whether new or old, it is one of transcendent importance to the human race; so let the prayer of every one here to-night be, "Lead, kindly Light."—*Correspondence.*

Among the Churches.

A New Church Edifice in Washington, D. C.

A telegram from Mrs. Mary B. G. Eddy, the Discoverer and Founder of Christian Science, was the chief feature of yesterday's [February 28] red-letter day for the Washington Christian Scientists, when First Church of Christ, Scientist, held its first services in its new church home, formerly St. Paul's Methodist Church, Fifteenth and R Streets northwest. The telegram was as follows:—

Concord, N. H., February 26, 1904.

First Church of Christ, Scientist, Washington, D. C.

Beloved Brethren:—I have nothing new to communicate—all is in your text-books. Pray aright, and demonstrate your prayer; sing in faith. Know that religion should be distinct in our consciousness and life, but not clamorous for worldly distinction. Church laws, that are obeyed without mutiny, are God's laws. Goodness and philanthropy begin with work and never stop working. All that is worth reckoning is what we do, and the best of everything is not too good, but is economy and riches. Be great not as a grand obelisk, nor by setting up to be great,—only as good. A spiritual hero is a mark for gamesters, but he is unutterably valiant, the summary of suffering here and heaven hereafter. Our thoughts beget our actions; they make us what we are. Dishonesty is a mental malady that kills its possessor, and a sure precursor that he is mortal. A deep sincerity is sure of success, for God takes care of it. God bless this dear church, and I am sure that He will if it is ready for the blessing. MARY B. G. EDDY.

Pleasant View, Concord, N. H.

The seating capacity of the church, about eight hundred, was totally inadequate, fully a hundred were standing, and as many more were turned away for lack of room.

Mr. W. D. McCrackan of New York City, a member of the Christian Science Board of Lectureship, delivered an address. Captain John F. Linscott, a former First Reader of the Church, gave a short talk, and Edward Everett Norwood, present First Reader of Second Church, also gave a short talk.

There were Scientists present from Baltimore, Philadelphia, New York, and Boston, as well as from surrounding towns. It was a cheerful, happy congregation, and all were filled with enthusiasm and congratulations upon the demonstration made. The unity of thought and action of Christian Science was strongly manifested and apparent to all.

Washington Post.

The addresses delivered on this occasion will be published in part in the April issue of *The Christian Science Journal.*

First Church, Grand Rapids, Mich.

Modestly situated upon the corner of two of the leading residence streets in the city, is the new church building of our city's Christian Science organization, and it is at once a fine tribute to the good taste and correct judgment of those who have caused the structure to be built and a superior example of high grade, dignified, and ornate architecture which, in its daily lesson to the public, cannot fail to strengthen and carry forward all thoughts, impulses, and efforts toward God and the beautiful, as taught and exemplified by the Master.

Grand Rapids Board of Trade Bulletin.

We act as if we were alone in the world fighting a solitary battle against an invisible foe; as a matter of fact, there is no unseen foe and our only battle is with ourselves.

HAMILTON W. MABIE.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

New By-law.

The following new By-law of the Mother Church has been adopted:—

ARTICLE XXVI.

PRIVILEGE OF MEMBERS.—SECTION 13. Members in good standing with the Mother Church who are members of the faculty, instructors, or students in any university or college, can form and conduct a Christian Science organization at such university or college, provided its rules so permit. Also members in good standing with the Mother Church who are graduates of said university or college, after leaving college, may become members of the organization by application to, and by the unanimous vote of the active members present, if the rules of the university or college so permit. When called for, a member of the Board of Lectureship may lecture for said university or college organization.

The St. Louis Fair Fund.

Mrs. Eddy would have Trebled her Generous Contribution.

THE following letter to the editor of the *Monitor* is indicative of the feeling of one of New Hampshire's most noted, generous, and public-spirited natives, and is indicative also of the feeling of many others who were interested in securing a suitable New Hampshire exhibit at the St. Louis World's Fair:—

Pleasant View, Concord, N. H., March 7, 1904.

Dear Mr. Moses:—The report that the effort to raise $15,000 for the St. Louis exposition is abandoned, saddens me. It is the mistake of the century. People in the highest ranks of office, professions, and society I have interested in Concord by simply telling them that New Hampshire received the premium on schools from the World's Fair in Chicago.

In the United States the Southrons are courteous, kind noble. Their honor is their standard, and they never drop it. We of the North should appreciate this, and return friendship for friendship.

I offered $1,000 towards raising the requisite sum for New Hampshire's representation at the St. Louis exposition and I would have three-folded that money sooner than have failed to obtain the sum required. MARY B. G. EDDY.

Concord (N. H.) *Monitor.*

Available Christianity.

As the world learns more of Christian Science, learns that it is Apostolic Christianity, it will realize, as have Christian Scientists, that the healing of sickness is but incidental to this present knowledge of God, which saves unto the uttermost, even as it was in Jesus' time. Then we shall see the end of the prevalent misconception of Christian Science, which regards it as simply a means or method of healing sickness without the use of drugs or other material remedies. When this is understood by those who are at present under a misapprehension of the all and ultimate of Christian Science, they will know what is meant by Christian Scientists when they declare that their religion is of practical use and value to them in the affairs of every-day life.

Jesus' sayings to some whom he healed show that to him sickness and sin were equally abnormal, and he healed both on the same basis. This he made especially clear in his rebuke to the Pharisees, "What reason ye in your hearts? Whether is easier to say, Thy sins be forgiven thee; or to say, Rise up and walk? But that ye may know that the Son of man hath power upon earth to forgive sins, (he said unto the sick of the palsy,) I say unto thee, Arise, and take up thy couch, and go into thine house."

The cure of envy, jealousy, hatred, revenge, and all the "works of the flesh" enumerated by St. Paul in his epistle to the Galatians, is just as much the field of Christian Science labor as is the cure of disease, the difference in practice, however, being that the sick are anxious to be healed while the sinner is unwilling to abandon his sinful habits so long as he believes that they contribute to his pleasure.

One of the denominational tenets, formulated by Mrs. Eddy, to which Christian Scientists have subscribed is: "We solemnly promise to strive, watch, and pray for that Mind to be in us which was also in Christ Jesus; to love one another; and to be meek, merciful, just, and pure" (Science and Health, p. 497).

This promise is not for special and particular occasions, but is for all time and all circumstances. The person who constantly and prayerfully desires to have in him that Mind which was in Christ Jesus and thus love his fellow-men, and to manifest the virtues of meekness, mercy, justice, and purity, cannot help but escape the entanglements and irritating incidents of the ordinary business, professional, or social life.

The right understanding of God and His universe, revealed in Christian Science, heals the sick, quenches the desire for sin and its supposed pleasures, and logically saves mankind from all that seems to beget dishonesty, malice, resentment, and revenge. With these evils eliminated from daily life, the pursuits which engage the attention of humanity are freed from the disappointments which make up so much of human experience.

It will be admitted by every thoughtful person that when the desire to deal justly and generously with all becomes universal, injustice and avarice will be unknown; and as humanity conforms to the code of morals which Jesus taught, the ideal state of society will be ushered in. M.

A Correction.

SOME years ago a relative of our Leader and Teacher, the Rev. Mary Baker G. Eddy, a member of the McNeil family from which Mrs. Eddy descended, reported that the Right Hon. Sir John McNeill, G.C.B., of Edinburgh, Scotland, was her ancestor.

The source of information seemed to be authentic, and the statement was accepted and used in good faith by writers on Mrs. Eddy's genealogy.

Mrs. Eddy has had this matter carefully investigated and having obtained no positive proof that the Right Hon. Sir John McNeill was her ancestor, she requests that all others writing upon her biography shall in future observe this correction.

General John McNeil, who is known as the hero of Lundy's Lane, was a relative on Mrs. Eddy's father's side of the Baker family, and he was the brother of President Pierce's mother. This is probably the line of McNeils to which Mrs. Eddy belongs. Mrs. Eddy herself has no special interest in these subjects.

Letters to our Leader.

Concord, N. H., February 24, 1904.

Dear Beloved Leader:—As you know Christian Science is now in Geneva, Switzerland, and that is why my sister and self are in this country,—to know more of it and so show our gratitude to you, not only with our lips, but by our lives of loving work.

Last year I went through Mr. John Lathrop's class and this year my sister has just finished in Mrs. Lathrop's, and we want to be loving, loyal, and obedient workers for the great Cause, for which you have labored long.

We have come to Concord purposely to-night to tell your dear people here what Christian Science has done for us, for ours, and for the little handful of followers in Geneva.

We saw Mr. Tomlinson this afternoon and are glad to know him, and he thought you would like to hear how my little children of eight and nine years are striving and have already brought two of their schoolmistresses into our midst.

We are grateful for what you have given us in "Science and Health with Key to the Scriptures;" and my husband is now able to translate the Sunday lessons direct from Science and Health into French.

We love the hymns of the Christian Science Hymnal, as we sing those in English. We also appreciate the *Sentinel* and *Journal* and the new *Herold,* and we know when it is the right time we shall have a journal for our French people. For all these we thank you, and our prayer is to live the life which most approaches the Christ.

We hope to be able to catch a glimpse of your dear face to-morrow, while on your daily drive, and that your carriage will pass so slowly that we may be able to see you, and tell our loved ones in Geneva about it. They already love you for what you have done and are doing.

With much affection, we subscribe ourselves,

Yours in Truth,

MRS. MARGUERITE C. VOUGA and MLLE. VOUGA.

Phœnix, Ariz., February 16, 1904.

Dear Mrs. Eddy:—It is with a heart filled with gratitude that I send my first acknowledgment for the blessings received through Christian Science. Eight years ago I was healed of what the doctors called an incurable disease, and since that time have been brought through many seemingly dark places by the understanding of this glorious truth. I had the privilege of seeing and hearing you at the time of our last annual Communion, and these words which you gave us, "Trust in God, and have no other trusts," have been a shining light on my pathway ever since.

I will tell you of a demonstration I was able to make after the Communion. I went to Winnipeg to visit my parents, who were not Christian Scientists. A few days after my arrival, my nephew was brought to that city for an operation on his knee which had been injured several months before in a football game. The doctor in charge was unable to effect a cure, and said he would never get well unless he had this operation, which would keep him in the hospital from three to four weeks. One member of the family urged him to try Christian Science, which he did.

His limb had been carefully bandaged, and on retiring the second night, he afterwards told me, this thought came to him forcibly, "If I am going to trust in God, I have no need of this bandage," that he immediately took it off, and found the next morning that he could walk perfectly without it. In one week he returned to his home with a new Science and Health and *Quarterly*. He has never had any further trouble, and writes me, "I am so proud of my book, and so glad to see all those man-made laws go down."

I want to thank you for Science and Health, the Manual, and Concordance. I also send thanks for the *Quarterly*. All these have taught me how to find my daily bread.

Very gratefully yours,

CATHERINE RUMNEY.

Decatur, Ill., February 23, 1904.

Rev. Mary Baker G. Eddy.

Dear Leader:—Among the many instances of the acceptance of Christian Science of which you are cognizant, I think perhaps the following is unique.

There is a very dear woman living in Shattuckville, Mass., Mrs. Maria Pike, youngest daughter of a Revolutionary soldier, who will reach the hundredth anniversary of her birth next month, and what I wished so much to tell you is that she has Science and Health and other Christian Science literature and has been studying them for several years. She is bright, is interested in the topics of the time, and is able to read, write, and sew.

She lives in her own home, which was built a hundred and forty years ago, and is happy and contented; living, not in the past, but in the now. With sincerest love and gratitude for your work for the world,

Yours with deepest loyalty,

SARAH A. DURFEE.

Birmingham, Ala., February 24, 1904.

My Dear Mrs. Eddy:—I wish to tell you how much I appreciate your work and that wonderful book which was given to enlighten us all. I have passed through such ordeals and with all have realized so many beautiful things that I feel as though I might speak of them to you. I have been teaching music in a little town in this state, and in this work have had some beautiful experiences. I wish to tell you of this demonstration which came about while I was giving a vocal lesson. I was explaining at the board a problem in cadential progression. Each cadence completes a defined thought, which is marked by the curve. The thought occurred to me that the curve was an element of the circle, and the circle is symbolical of completion, unity, and in music a composition as a whole represents this. Afterwards I remembered your own thought about the circle in Science and Health, and now you see how beautifully Science reveals all things.

Lovingly yours,

AMALIE D. LAWTON.

New York, N. Y., February 28, 1904.

Dear Mrs. Eddy:—I thought it might give you pleasure to know of a demonstration of one of your five-year-old followers. He came home from kindergarten with flushed cheeks, feverish, and complaining of a pain in his stomach. I treated him, but he vomited several times before bedtime, and after a restless night commenced vomiting again in the morning. This continued some time, and he still seemed feverish. Finally, after strangling and gagging he lay back among the pillows, and between his gasps (with no suggestion from me) he sang, "God is Love, God is Love, yes I know that God is Love." That was the last time he vomited and he began to improve from then on until he was well the next day.

One thing I noticed was that instead of choosing his usual bedtime prayer, the 91st Psalm, or the 23d Psalm, or the Lord's Prayer, he wanted me to sing, "O'er waiting harp-strings of the mind."

To me this was all very beautiful, and my heart went out to you in gratitude for giving to this little child as well as all of us such a beautiful concept of God. Since the coming out of the new Manual, I have begun a thorough course in English, also in English literature, but high above all I prize my Bible and Science and Health.

Though this may never reach your eyes, it has done me

Digitized by Google

good to write it. Gratitude is more than words and I would prove mine by my life.

With love,

MAY BARRIS.

Hamilton, O., October 8, 1903.

Beloved Leader:—To-day while thought is filled with joy newly born, for another demonstration of Love's power, I feel such a sweet sense of "love more for every hate," and I thank you, dearest on earth, for having taught me this, not alone through your glorious poem and other writings, but by your consecrated life of love. My whole endeavor is to follow all the way.

How kind of you, in the midst of all your work, to answer my letter. It brought me comfort beyond the human, for I felt I understood your meaning when you wrote, "together we will praise God." That heavenly day on your beautiful grounds, June 29, was a peaceful benediction to all. The sweet words of loving counsel fell from your dear lips like great love-drops upon my head, and I could but think of these words, "to obey is better than sacrifice."

Words can never tell for me the thought of my heart, full of thanksgiving for our new guide to the haven of Spirit,—the Mother Church Manual, so wondrously replete with Love, wisdom, and justice. May I learn truly to obey, loving and serving God and thee.

Another beautiful case of healing through the reading of Science and Health has come to my notice. The woman was informed by her physician and surgeon that she would have to walk the rest of her days on crutches. She read "the little book" for one week, when crutches were discarded, all pain had vanished, and again, as always, Truth conquered laws of mortal making. She is now learning to "lean hard upon God."

Prejudice is waning and the chosen of the Lord are returning. For all this I am very, very grateful. My whole heart cries out, "Blessed art thou." To infinite Love and to thee do I owe my life's endless homage.

With faithful devotion, lovingly thine,

NELLIE VICTORIA FRESHMAN.

Portland, Ore., February 19, 1904.

Mrs. Eddy.

Dear Leader and Teacher:—Because of the true way pointed out to me through "Science and Health with Key to the Scriptures," I have learned how to live, to work, to pray, to study the Bible. I see the sick raised up, the poor have the gospel preached to them, and sinners are saved. These are the only proofs of my gratitude that I can offer you for the great good which has come to me and my family through Christian Science,—God's dear blessing to all mankind.

God has blessed you for your Christian faithfulness, and does bless us all through this spoken word of Life.

I remain, very sincerely,

HENRY D. JANES.

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

Testimonies of Healing.

I did not turn to Christian Science because of physical healing, but as the result of observing in the daily lives of some of my childhood friends, how it was possible to live so near to God that fear and doubt could have little part in one's experience.

Eighteen years ago an only brother lay at death's door, as the result of an accident, and we dared not trust him to the care of Christian Science when it was suggested to us, but rather did all that we thought could be done in the regular way, only to see our dear one pass from us. I could but be impressed at that time with the unfailing love and kindness expressed in the comforting words of assurance from those who had stepped out from our loved orthodox church for this strange, new teaching, wherein it was affirmed that there is in reality no pain, no death, no sorrow. I will say that our friends in the old church did all that human love and kindness could do to lighten our burden, while believing in the reality of what we were passing through.

However, on comparing results, I could but liken their kindly efforts to the sympathy of Job's three friends who "made an appointment together to come to mourn with him and to comfort him," while the words of compassion born of the scientific interpretation of our Master's teaching according to Science and Health by Mrs. Eddy, brought true comfort which resulted in the willingness to empty our bottles of the old wine, that we might be supplied with the new,—that of Spirit.

At this time a copy of our text-book, Science and Health, was placed in our home. It healed the wound of sorrowing father and mother, and we feel sure saved the mother from mental darkness. For the past seventeen years, with the Bible, it has been our daily study. During this time Christian Science has been our only remedy, and at times the demand upon Love has been very great.

At one time, as the result of a runaway, my father was brought into the house seemingly beyond human aid. Through the help of Christian Science he was in a few hours restored and the next day took a twenty-mile drive with the same horse. An old friend, a physician, told us that he had lost a patient who was injured in exactly the same way, in less than an hour after the accident occurred.

About four years ago while visiting at my home, my father was ill and seemed at death's door for weeks. We did not name the disease but its manifestation was a breaking out into angry sores of the lower limbs, from the foot to the knee. It did not at first seem to yield to Science treatment, but rather kept getting worse until it reached nearly to the bone, although the pain was in a measure mastered.

The only thing done in a material way was bathing and bandaging for cleanliness. Just as the sores were healed an abscess formed, and the cavity from which the discharge came was the size of a finger, and nearly that depth. Here again the family was brought face to face with the "last enemy," but in what a different state of thought. No question then as to trusting the loved one with God. The entire family felt that nothing human could save him, some firmly believed and the others earnestly hoped that Christian Science would prove the victory of Truth.

The prayers were answered, and one month from the time of what appeared to be the crisis, our father was *en route* for his home, a journey of a day and night.

While visiting the family last summer on my return from our communion service at the Mother Church, I saw him quickly recover from an attack of cholera morbus, and to-day though having passed the "three score years and ten," he takes an active part in daily transactions, and I trust is quite awake to the necessity of proving that Science is not only curative but is preventive as well.

After sixteen years of experience in the study of Chris-

Digitized by Google

tian Science I can truly say that God has been good to us in giving to the world Christian Science at this age through our beloved Leader, Mary Baker Eddy.

A. F. D., Omaha, Neb.

It is now some few years since "Science and Health with Key to the Scriptures" by Mrs. Eddy was placed in the hands of a member of our family, who was known by all our friends as a confirmed invalid, with the suggestion that at least it could do no harm. The book was read indifferently at first, then with increasing interest and power, and finally the quiet, silent, and effectual work of Truth was made manifest, by the invalid's restoration to health so that she could do things which she had not done for twenty-five years.

This silent, impersonal, and Christ-like work appealed to me as the greatest evidence of "Emmanuel, God with us," I had ever seen, and led me to look further into the subject myself. The reading and study of the text-book was soon followed by class instruction, and it was with a feeling of deep gratitude and the consciousness of having found "the pearl of great price," that I worked in the Master's vineyard and proved for myself and others "the power of the Word" (Miscellaneous Writings, p. 398), when spoken with authority.

Those who have not been consciously healed of what the world terms incurable disease, may often be tempted, perhaps, to think that their testimony is not worth writing, and yet I know that a habit overcome, a higher standard of life reached, a conscious breaking of the thousand and one laws of false material sense through the power of Truth, is no less a proof of God's power to heal than is the destruction of a cancer. For several years when testifying to what Christian Science has been to me and what is has done for others, I frequently prefaced my remarks with the statement that "I did not come to Christian Science for the physical healing," and I know now that was said with a degree of pride which one day called for destruction, for we learn in Christian Science that every phase of mortal belief, physical, mental, and moral, must be met and overcome.

Last winter as a result of not sufficiently guarding myself against the effects of "a growing sense of the odiousness of sin, and by the unveiling of sin" (Science and Health, p. 366) in one's own consciousness, one of the dread beliefs of mortal mind, acute, and accompanied with intense suffering, manifested itself. Its usual course covers several weeks, and the mortal law which follows says that one does not entirely recover from its effects for several months. Within a week the condition was entirely broken, and within three weeks I was out driving in a sharp winter wind.

It has been said "false claims appear to Christian Scientists in order to disappear," and perhaps one never feels more grateful for the silence and eloquence of Christian Science than when disease has been proven an illusion and powerless to claim you as a victim. "The healing of the seamless dress," I have learned is ever "by our beds of pain," and one realizes that the undivided garment of righteousness—right thinking—is only worn as we meet and destroy, through the power of the Christ-truth, every false belief of the flesh. This truth enables one to bring forth the "beauty of holiness," the fruits of the Spirit, and to prove that "the kingdom of God is within you." "Blessed is the people that know the joyful sound: they shall walk, O Lord, in the light of thy countenance." A deeper sense of gratitude to God, to our beloved Leader, and to all her faithful and loyal followers, who by every least proof of "the power of the Word" have helped me to do better work, and enabled me to point the way to others, fills my thought with joy unspeakable.

Lillie Olin Burckett, Brooklyn, N. Y.

It is about three and a half years since I first learned of Christian Science. Six months prior to that time an experience had entered my life which caused me to lose confidence in both God and man as I then understood them, and each day there was a moral wrestle not to end the hopeless outlook my future on this earth presented. I was awakened from this lethargy by the cure through Christian Science treatment of a chronic disease from which my mother had suffered for twenty-five years, and gradually I learned that God is Love and God is All. Where heretofore I had seen nothing but darkness I learned to know that there is always the beacon light of Love and Truth before our understanding. Where heretofore there had seemed to be nothing sure except unhappiness and death, I learned to know that there is no reality in unhappiness and that God is Life eternal. Although I did not espouse Christian Science on account of any personal physical healing until its light had begun to brighten my path, I had suffered from an annual cold which came each fall, and which invariably settled on my chest, filling many weeks of each winter with suffering. I also suffered from chronic catarrh of the stomach. The stomach trouble entirely ceased about two and a half years ago and the annual cold failed to appear since my understanding of God's love and power, through Christian Science.

My nephew, a growing boy of fifteen years, sprained the ligaments of his ankle while skating. The local doctor after keeping his foot in a cast for some time told us that he would have to wear iron braces and heavy calfskin shoes until he grew to be twenty-one years old at least, an opinion in which a specialist agreed, and for nearly a year the boy did so, being compelled to forego all manner of sports which would require the use of his feet. When my mother was cured by Christian Science my sister felt impelled to rely upon the same power for her son. After two weeks of treatment the iron braces and heavy shoes were dispensed with, and since that time, now about three years, my nephew has been perfectly free from the law which *materia medica* had imposed upon him.

Christian Science is a source of daily strength and wisdom for me, and I am very glad and very grateful that it has entered into my life.—Alice Morgan, Westfield, N. J.

Christian Science has brought me happiness such as I never expected to realize. I was doubtful as to true happiness until my first experience in Christian Science, over three years ago, and that was in physical healing. The fear was utterly destroyed and the manifestation of error quickly disappeared. The change from three weeks of almost constant pain and fear, to perfect peace, joy, and health, was to me wonderful.

I am very grateful for the healing, and for having been started aright in the study of Christian Science by a sincere and loyal worker. Blessings are mine daily, and my heartfelt love goes to our dear Leader for this knowledge of Truth which brings freedom. What a boon it is to the anxious mother-thought. It seems difficult to find words to express the peace it has brought to me,—the joy I realize when I think of my children as God's image and likeness, and that there is no need for worry or anxiety. The overcoming of this form of error through Christian Science means very much to me. Little did I realize that mortal mind was trying to rob the children of their birthright through my fear.

Errors of many years' standing have been overcome in my household through the study of Science and Health,—severe headaches, constipation, fistula, enlarged neck, malaria, bronchitis, grip, corns, ingrowing nails, an ill disposition, etc. Whenever pondering as to ways and means, matters of business, or the government of children, there was a habit of biting the nails. I began to see that this was caused

Digitized by Google

by an anxious thought back of it all, and when the anxious thought was uncovered, the habit of forty years was broken.

I feel the most loving gratitude to all who have helped me along the way, also for our Christian Science literature, and unbounded gratitude for the understanding of the Bible that comes through the study of the Lesson-Sermons in the *Quarterly*. "Thanks be to God, which giveth us the victory."—IDA B. LAMKIN, Ypsilanti, Mich.

I wish to express my gratitude for what Christian Science has done and is doing for me. Ten years ago I was clerking in a shoe store, and after working three years I was so run down with dyspepsia that I had to give up my position and try outdoor exercise,—camping out, etc. I tried four different doctors but kept growing worse till about ready to be put in the grave. As there seemed nothing else to do I tried Christian Science, and to my great surprise I was healed in four days and was able to eat anything on the table, and in four weeks I gained thirty-six pounds.

Four years ago when I started in business, many said my business would not last two weeks, some said five or six months, for, to sense, my means were limited. It is now four years next month, and my sales are increasing every month. For this I certainly am thankful and give Christian Science the whole credit, for it does teach that a man can do an honest business and succeed. The Scripture says, "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." This passage and promise gives me great peace and comfort, for it was proved true by the great Way-shower, Jesus, when he multiplied the loaves and fishes and showed to the whole world that divine Mind is the source of supply, and that every good and perfect gift cometh from God. I could not get along without Christian Science; it is my daily guide and comforter. It does prove that if we trust in the Lord with all our heart and lean not unto our own understanding, He will direct our path. It would take pages to tell what this Science has done for me, but I find that the best way to express my thanks is to strive to be more Christlike, to be more willing to forgive and ask to be forgiven, to love my neighbor as myself; and these "fruits will prove what the understanding of God brings to man" (Science and Health, p. 496) here and now.

AUGUST KRANERT, McGregor, Ia.

From my earliest recollections I suffered from catarrh, which had been inherited. As the years went by, instead of improving, it grew steadily worse,—medicine did not cure it, although I tried many remedies, the disease spread until I was in a very bad condition. By the time I was twenty-one I could not breathe through my nose, either during the day or at night, because the disease had affected both nostrils so that one was entirely closed and the other nearly so. It was impossible to sit in a warm room without suffering great discomfort; the hot summers were a sore trial; damp days could hardly be endured, and a strong light affected my eyes so severely as to cause headaches. In fact, the disease was a constant annoyance.

At this time I had two operations on the nose, but after they were over, I could breathe no better than before, and all the old, annoying conditions were present. Soon after this Christian Science came to my notice by the healing of a friend and I determined to try it for myself. I was treated in Science and the troublesome conditions soon disappeared. I found I could breathe naturally as other people do. Some time afterwards the disease itself disappeared. I weighed at that time only one hundred and twenty-five pounds, but soon afterwards I gained over thirty pounds in weight, and I have been well ever since, though that was over five years ago.

For the healing of this disease, which though not considered dangerous, was yet very disagreeable and annoying, I am grateful. I am, however, more grateful for the spiritual awakening which has come through an understanding of the Bible as unfolded in "Science and Health with Key to the Scriptures" by Mrs. Eddy. My heart is filled with gratitude to our beloved Leader, whose unselfish life and untiring labor in behalf of mankind has made possible in these days a return of the primitive Christian healing.—J. W. M., New York, N. Y.

In the spring of 1897 a friend asked me to try Christian Science, and my response was, "Christian Science cannot help me."

In the winter of 1898 I was in a home where a lady had a shock. A doctor was called and came for a few days. He said nothing could help her, that she could live only a few days, and might pass away in a few hours. He could do nothing for her. A Christian Scientist who lived near was called in and came each day for a week. At the end of the week the lady was perfectly healed, her face and limbs being in their normal condition.

As I saw this lady growing better each day and heard the Christian Scientist read, I thought perhaps I could be helped. I had been sick for nearly eight years with stomach trouble, and catarrh of the head. I had tried all sorts of remedies and had the best doctors in the city, and could find relief for only a short time. The doctors did not think I would ever be well again, and a specialist said I would never be healed of the catarrh.

I asked this Christian Scientist if she would take my case. She talked with me for a few minutes and said that God had not given food power over me, that I could eat whatever I desired, that it would not hurt me. I was healed then of the stomach trouble, and have been able to eat everything I wished ever since. A little later the catarrh disappeared. During the first and second year, the fear of a return of the trouble had to be met a few times. No one can realize what it means to be free but those who have been bound. This truth has also brought God so much nearer to me.

Words fail to express my gratitude to Mrs. Eddy for "Science and Health with Key to the Scriptures" and all our Christian Science literature.

CHARLOTTE C. NICKERSON, Providence, R. I.

I wish to express my gratitude for what Christian Science has done for me. It was in April, 1884, that I first heard of it, and after listening for two evenings to talks on Christian Science, and learning what it would do for sick and suffering humanity, my husband urged me to take treatment. I did so, and was healed in three weeks of troubles from which I had suffered for many years, for I had never been strong.

When I commenced taking treatment I was advised to get Science and Health, which I did, yet I wondered how the reading of a book could aid in healing disease. As I read, a new light began to dawn on my thought, although I did not grasp its meaning at once. I saw, however, that the book taught us how to look to God for help in a way I had never known before.

About two years after being healed my husband and myself had the privilege of class instruction, and we have had many opportunities of proving this truth.

I might mention many cases of physical healing, but while these seem so wonderful to material sense, the spiritual help that has been received by us is far greater and more wonderful.

I thank God that He has given us a Leader who, through her love and self-sacrifice, is showing us how to do the works that Jesus said we could do. This line from one of Mrs.

Eddy's hymns is ever my prayer, "Shepherd, show me how to go" (Miscellaneous Writings, p. 397).

MRS. A. P. WATSON, Boston, Mass.

The Master said of those who understood his teaching, "If they drink any deadly thing it shall not hurt them." This was proven true to me early last spring. My oldest daughter brought home some candy and treated us all with it. The children were late for school, so they just took one candy apiece and ran on.

After dinner I sat down to mend with the candy by my side, and ate seven or eight pieces, one after another. Soon I began to get very fearful, I didn't know what it meant. I stopped my mending at once, took my Science and Health, and worked mentally against the fear until I felt better, but it still seemed as though something dreadful was coming. I worked on until after supper, then I discovered what it was. The children came home and told me of their experience with just the little they had eaten, and I still worked on, trusting in God.

About midnight I was awakened, and I seemed to be boiling, the foam coming out of my mouth and other conditions being equally alarming. I was indeed put to the test, but the still, small voice said, "Fear thou not, for I am with thee." In the morning I started down stairs as usual to get breakfast. When I got down I knew nothing more of myself for some time. My husband saw me coming but paid no attention, not knowing anything of my trials. He said that I sat on a chair, stooped over, and fell, striking the side of my face on the floor, and there I lay as one dead. He quickly called my daughter; then raised me up on the chair, stood beside me in silent prayer, my daughter on the other side reading Science and Health. This is what I saw when I became conscious again, and no words could express my joy. I knew I was healed, and more than that, I knew what my family would do in time of trouble. This satisfaction I cannot express.

MRS. AMANDA E. LAY, Burlington, Ia.

I wish to tell of what Christian Science did for me at the birth of my last baby. I sent for the Scientist who was to be with me, and told her that I felt the time had come for the baby to be born, but I had no pain. After she was with me a short time I told her I was waiting to have some pain. She smiled and said everything would be all right. About this time my mother, who is opposed to Christian Science because she does not understand it, came into the room and declared that I must be suffering, as it was impossible for a child to be born without pain, and while she was there I did suffer. She went out, and after a few minutes baby was born. I had suffered with soreness of the breast severely at previous births but this trouble was entirely overcome.

I had occasion to have three teeth extracted. I had always had a great dread of having dentistry done, and could not seem to overcome the fear, so asked for help. I made an appointment and when the day came I went as free and happy as if I were going to church, and the teeth were taken out with practically no pain.

For these and many other proofs of God's loving care I feel deeply grateful.—B. S. H., West Somerville, Mass.

When a child twelve years of age, I united with an orthodox church. I loved it dearly, and was thoroughly satisfied with the religious teaching I had received, until, through my own suffering and that of others, I turned to Christian Science and found what was lacking. I have seen the beneficial effects of this truth upon every member of my immediate family. I have witnessed the healing of malaria and typhoid fever, acute gastritis, erysipelas, and throat and other diseases, through Christian Science. If I find my understanding is not sufficient to meet an ailment, I am obedient and do as we are advised in Science and Health, page 420, I "call an experienced Christian Scientist" to aid me, and the trouble is quickly met. I feel very thankful for Christian Science and to Mrs. Eddy through whom it has come to the world. I am also grateful to my dear teacher who has been so loving and patient with me.—IDA S. PAGE, Kansas City, Mo.

I am often reminded of the years I spent under the yoke of the taskmaster, sadness. It is now eight years since Christian Science was introduced into our home, and I shall not attempt to number the blessings and real joys I have had during this period. Our precious text-book, Science and Health, is answering all my questions as to the whys and wherefores which were constantly confronting me, and which no one could answer satisfactorily.

The Bible was a closed book to me, seldom taken from its place among other books. Now, I love to read it, and believe in its teachings, because part has been proven true to me.

I am truly grateful to our beloved Leader for giving her wonderful books to a suffering world. I am also grateful for our periodicals including *Der Christian Science Herold*. They all help to feed us as the manna fed the children of Israel in their journey through the wilderness.—MRS. AUGUSTA J. LILIE, Chenoa, Ill.

It was three years ago last January that we first heard of Christian Science and began the study of Science and Health. The first healing in our family was that of my husband, of a very bad case of sciatic rheumatism. Since then many diseases have been destroyed through this teaching. It has proved a great blessing to me in many ways besides the curing of physical ills, showing me that God is not a far-away God, but is the ever-present, divine Principle, whom all may understand.

I have five children; the youngest, now eight months old, was born under Science treatment, and he is a fine, healthy boy. I am most thankful for the help received during that time through the power of Truth.

My greatest desire is that my life may be such as will prove my gratitude to God, to our Leader, Mrs. Eddy, and all the dear ones who have been so faithful in helping me to understand this blessed truth.

MRS. JENNIE M. TEANEY, Greenfield, Ill.

[Translation.]

Just before I heard of Christian Science, I had given up hope of ever being healed of asthma, from which I had suffered for seven years and which was then constantly growing worse. I must confess that I believed it to be almost impossible that this trouble, which almost drove me to despair, could disappear as quickly as it really did. I then spent a great deal of time studying into this truth which brings us so much happiness. In a very short time I thought that the sun was shining much brighter, that everything looked more friendly than usual, and through this I realized how ill I had been before.

That the understanding of Christian Science performs miracles is indeed true, and I wish that every sick and every well person might find the same great happiness that I have found.—A. GRANDE, Zurich, Switzerland.

One of the many blessings that have come to me through Christian Science, is that my husband has been spared to me from that dreadful ailment, blood poisoning. The verdict of *materia medica* expressed a wonder that he had not died. It was nothing but the truth as taught in Christian Science that saved and healed him from sin, disease, and death.—MRS. FULA RAMSAY, Detroit, Mich.

From our Exchanges.

The *Detroit Journal* thus reports a lecture by the Hon. Carroll D. Wright,—

The religion of manhood and morality is the agency toward which Carroll D. Wright, United States commissioner of labor, looks hopefully for the solution of the labor problem. His views, the result of years of experience and effort, were heard by a large audience in the Jefferson Avenue Presbyterian Church. Capitalists and workmen gathered to hear the commissioner's lecture.

Legislation Mr. Wright regards as only an alleviation of the ills of labor. Laws in regard to factory inspection, accident liability, sanitary betterment, and shorter hours are good, but more educational than final. Arbitration he praised, and spoke of its good effect during thirty years, but this he also discarded. In the case of great labor troubles, such as the coal strike, the public has a right to intervene, he said. Socialism he discussed last and pronounced it a good thing in an individual way, but unsuited to broad application. The real solution he outlined in the following sentences:—

"In religion, we find the highest form of solution yet offered. Next to religion, comes constructive evolution, that evolution which believes in the potency of effort.

"A new struggle for life is going on and a new self-interest has been created—one that makes a man put his family above himself, his country above his family, and mankind above country."

The greatest need of to-day is the opportunity of hearing the voice of God. That voice is speaking in this year of our Lord as distinctly as it has spoken in every year since man began to reckon time; the trouble is that men do not listen; in the noise and rush of the age they do not seek the silence and the repose in which the still, small voice becomes audible. . . . We shall not find peace by escaping from our age into cloisters nor by evading its hard conditions; we shall find rest and refreshment and keep our souls alive by spiritualizing work and making room for God in the world He has made and of which He is always the master.

The Outlook.

It seems to be harder for most people to admit that progress is possible in morals than to concede the inevitableness of change in all other human affairs. Economic progress we expect, we even demand. Progress in enlightenment we accept as a matter of course. Even scientific discoveries, that upset long cherished beliefs, we grow accustomed to. But our rules of morality we somehow regard as unalterable.

The Independent.

There is more in the Bible than the words of which it is composed. Its words enshrine a spirit and exhale an atmosphere. A man may profess the greatest reverence for the words of the Scripture and his speech and his point of view may betray total unresponsiveness to the genius of the Christian revelation.—*The Watchman.*

Above everything else, the pulpit should be sincere. Men should be able to look to it with confidence for genuine convictions. Nothing will so weaken its power as the suspicion that its utterances are merely professional, not the honest proclamation of the truth as the preacher understands it.

The Examiner.

Nothing can take the place of personal righteousness; there is no substitute for it. It is basic to all things good, personal, political, social, civic.—*The Universalist Leader.*

THE CHRISTIAN SCIENCE TEXT-BOOK.—Science and Health with Key to the Scriptures with latest revisions and additions, and numbered lines. 700 pages.

For description, price, and other information, see last page of cover.

THE NEW CONCORDANCE.—A complete Concordance to Science and Health with Key to the Scriptures. This work has been compiled from the late revised edition of SCIENCE AND HEALTH, and contains about eight thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10x7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

CHURCH MANUAL.—Containing the By-laws of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. This does not include the list of members. Price, prepaid, $1 per copy; $5 per half dozen; $9 per dozen.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America.

It contains about thirty-eight pages of reading matter, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

German Supplements

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

Between seven and eight hundred delegates to the World's Fourth Sunday School Convention to be held at Jerusalem, April 18, 19, and 20, sailed from the North German Lloyd pier at Hoboken at 3 P.M. March 7 on the specially chartered steamer Grosser Kurfürst, for a seventy-one days' cruise of the Mediterranean. They represent nearly every State, Territory, and province on the North American continent. A similar contingent sailing from England will meet the American party in the Mediterranean, and in all between twelve and fourteen hundred delegates will attend the convention.

Philippe Bunau-Varilla, who recently resigned as minister from Panama to the United States, sailed for Havre last week on the steamship La Loraine. He is reported to have said, "My mission is accomplished, and the success of the canal is now assured. I have worked for ten years with only one end in view—the connecting of the two oceans by a great waterway." It will take about seven years, he thought, to complete the canal. With the United States pushing it he believed that the work would go on rapidly, and that there would be no dearth of labor.

The House Committee on Appropriations last week received a proposition to equip the Government Printing Office with typesetting machines. The specific proposition was for the committee to place in the sundry civil appropriation bill, now being prepared, an item of $154,000, which, it is asserted, will pay the purchase price and supplies for forty machines. It is estimated that it will take two hundred machines to equip the office, and the plan proposed is for the purchase of from forty to fifty machines each year until this number has been secured.

The President has directed the transfer of John Barrett, present Minister to the Argentine Republic, to be Minister to Panama. W. W. Russell, at present chargé at Panama, has been made Minister to Colombia, and Arthur W. Beaupré, now Minister to Colombia, has been made Minister to Argentina to succeed Mr. Barrett.

President Roosevelt has fixed the salaries of the Isthmian Canal Commissioners at $12,000 per year and in addition thereto $15 per day while they are on the Isthmus.

Foreign.

Owing to the reports of a hitch in the Panama Canal negotiations, Ambassador Porter last week invited President Bo to call at the embassy, where they held a lengthy conference. M. Bo maintained there was not the slightest obstacle to the completion of the transfer of the Canal Company's property to the United States. M. Bo particularly emphasized the need for concluding the transfer before April 25, saying that every formality, legal and otherwise, would be effected before that date. Government influence is decidedly favorable to winding up the transfer, and will not encourage new protests or obstacles.

The official copy of the decision of The Hague Tribunal in the Venezuelan cases has just been received at the State Department. The cost to the United States for its share of the expenses of the tribunal will amount to eighteen hundred dollars. The Government must also pay fees of its own special counsel in the case. The total of the claims allowed against Venezuela is in the neighborhood of ten million dollars, about half of which goes to the allied Powers. The estimated thirty per cent receipts of customs dues which Venezuela is to apply to the payment of these claims is about four hundred thousand dollars per annum, so that it may be nearly ten years, unless business increases, before the non-allied Powers would begin to receive their awards.

The plans for President Loubet's trip to Rome are practically completed. The programme includes a gala performance at the opera April 25, and a reception at the Capitol April 26. The President will entertain King Victor Emmanuel at the French embassy April 27. At Naples the President will witness a naval review.

An additional vote of $350,000 for the British exhibit at St. Louis, making a total of $750,000, is included in the civil service estimates for the coming year. These and the revenue department estimates amount to $233,952,835. With the already announced estimates for the army and navy totalling upwards of $325,000,000 it appears that the full estimates will show an expenditure for the year 1904–5 of about $710,000,000.

The Chinese Government has granted the application of the State Department for exequaturs for Messrs. Cheshire and Davidson as United States consuls at Moukden and Antung, respectively. These officers are now at sea, on their way to the East. Upon their arrival at Shanghai they will wait for further instructions from the State Department before proceeding to their posts.

The Grand Trunk shareholders, at a meeting held in London, March 8, ratified the agreement with the Canadian Government for the construction of a Grand Trunk line to the Pacific. The decision was arrived at only after a prolonged discussion.

Industrial and Commercial.

An electric railway is to be built between Morelia, the capital of the State of Michoacan, and Guadalajara, the principal city in the State of Jalisco, Mexico. The length of the road will exceed one hundred and twenty miles.

The Mexican Railway has applied to the Secretary of Public Communications and Works for permission to establish electric traction on the section of its road known as Las Cumbres de Maltrate, where the heavy grade requires two locomotives to haul an ordinary passenger train. The electric power will be generated at a large fall on the Atoyac River.

An electric traction system is to be constructed in the mining town of Pachuca, located in the State of Hidalgo, and having a population of about forty-two thousand inhabitants. The Hidalgo Railroad Company, which operates a steam road between Mexico City and Pachuca, is completing the purchase of the mule tramways about twelve miles long, and the same are to be electrically driven.

The Pennsylvania Railroad Company has awarded the contract for the construction of the two North River tunnels between the Manhattan shaft, near Eleventh Avenue, New York City, and the Weehawken shaft on the Jersey shore, to the O'Rourke Engineering Construction Company of New York.

The contract for the four East River tunnels between the First Avenue shaft, New York, and a point in Long Island City, has been awarded to F. Pearson & Son, Limited, of London, England. This company has had extended experience in subaqueous work, notably the Blackwell Tunnel under the Thames in London. They have recently finished the Great North City Tube lines in London, and are carrying out the heavy harbor improvement at Dover, England.

A statement issued by the Silk Association of America covering raw silk statistics for the season, shows that dutiable silk imports in the customs districts of New York, Philadelphia, Boston, Hartford, Fairfield, Chicago, Cincinnati, and San Francisco for the last three months of 1903, had an invoice value of $8,489,000 as compared with $7,238,950 in the corresponding period of the year before Of the total, $1,872,364 was the valuation of piece goods paying specific duties; $1,901,465 of piece goods paying fifty per cent ad valorem. Most of the other goods were taxed from fifty to sixty per cent.

Around the meeting point of the States of Kentucky, Tennessee, and Virginia a great coal development is under way and a vast amount of work is promised for the coming spring and summer; long-planned railroad extensions to penetrate the more remote sections are now materializing, and coal territory is eagerly being sought after.

General.

The population of Japan was estimated at 43,152,998, according to the last census, taken in 1898. There are four classes in the following proportions: Imperial family, 53; nobility, 4,551; gentry, 2,105,696; common people, 41,050,568. In these figures are included 17,573 Ainos, of Hokkaido, 70,801 Japanese living abroad, and 12,664 foreigners. In addition, however, there are 3,000,000 inhabitants of Formosa, so that the present population is estimated at 50,000,000. Hondo, the chief island, is the most densely populated part of the empire, having 381 people to the square mile, and its southern districts have 475 inhabitants to the square mile. Of recent years there has been a rapid concentration of population in the cities. There were seventy-eight towns, according to the census of 1898, having a population of 20,000 or over.

The complete form of a mastodon has been discovered at Hillside, on Quartz Creek, according to a despatch received by the Seattle *Post-Intelligencer* from Dawson, Y. T. It was imbedded thirty feet in the earth when found, and the use of a steam thawing plant was necessary to unearth the immense animal. The hair and the skin of the beast are in a perfect state of preservation, and the big tusks, which remain fastened to the skull, are in good condition. It is estimated that the skeleton is worth about fifty thousand dollars. The mastodon was discovered buried in an old channel, well in the zone of almost perpetual frost, which accounts for its excellent preservation.

The class-day committee of the senior class of Harvard has issued a report suggesting the holding of the Harvard exercises on class day in the Stadium instead of at the statue, as for the past six years.

Prime Minister Zarnardelli of Italy says that foreign tourists annually spend sixty million dollars in his country, and that Rome lives entirely on her visitors.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

From our Contributors.

The Keeping of the First Commandment.

IDA L. WOOLWORTH.

As Christian Scientists, we are many times asked to state in a word what Christian Science teaches, and I always refer such inquirers to our church tenets.

It is now nearly five years since I really came to know what this great truth of Christian Science possessed for me, and as the years have passed, and each day has seemed to unfold new light, I have grown to feel that all of Christian Science is expressed in just two sentences. One of these sentences is familiar to all Christendom, and it is known as the First Commandment: "Thou shalt have no other gods before me." The other sentence is found in our text-book by Mary Baker G. Eddy. It is this: "Divine Love always has met, and always will meet, every human need" (Science and Health, p. 494). Let us consider these two statements impartially, and see if from them we cannot draw lessons which are the basis of all true living.

Many of us learned this first commandment at our mother's knee, and perhaps some did so with a sense of relief, because it was so much shorter than the second. As I grew older, and long before severing my connection with the orthodox church, the first commandment had grown to embody all the other commandments, but how little I realized, even then, its true meaning.

Until it was understood in the light of Christian Science, the Old Testament always seemed severe to me, filled with Thou shalt nots. In fact, until Jesus came preaching a gospel of love and good will, the thought of God seemed one of negatives, but our great Master, and his sincere and devout follower, our loved Leader, have emphasized the affirmatives of Scripture truth. Mrs. Eddy has said, "This first commandment is my favorite text" (Science and Health, p. 340), and if we look into its meaning carefully we shall see that it is really the foundation upon which all true building must rest.

We have always had a deep sense of pity for our brothers and sisters in far-away countries who have made themselves gods of wood and stone, and then worshiped them; we have given much in money, and many brave and noble men and women have sacrificed a great deal to go to them and tell them of a better way. But we in Christian lands have seen, in our day and age, the making of many idols; we have seen strong men and women bowing down to other gods, though not realizing that they were serving idols. In the light of Christian Science, we know that the idols which mankind worship are but mental concepts,—the belief in power apart from the one God.

The subtle forms in which these suggestions present themselves to thought are myriad, and they sometimes seem to be related to a noble and laudable purpose. A young man or woman desires education and culture, and surely our Father means that all His children shall have the best, but so easily does the desire for material knowledge become uppermost in thought, that in the pressure of this twentieth century, such an one may really grow to worship a god more subtle and dangerous than any idol ever worshiped in foreign lands. So, too, a business man may start with a laudable desire to succeed in commercial enterprise, he finds, however, that business competition is more intense than ever before, and he realizes that the utmost concentration of thought and energy is demanded, and as the years pass he builds a mental god of seemingly great influence.

One more example will suffice, and perhaps this is the one least easily recognized. The world has long looked upon the patient bearing of physical suffering as a virtue, but as revealed to us in Christian Science we see that it is not really a virtue, for when one settles down to the belief that his own condition, or that of some loved one, is something which cannot be helped, he has admitted the existence of a power apart from God. To put it in a word, the moment we believe it to be within the power of any material thing to affect in any way our real life, that moment the thing has become a god. At this point our second sentence links to the Old Testament negatives its strong affirmation.

Here let me briefly state how this promise first came to me. I did not come to Christian Science for the so-called physical healing. I had been a member of an orthodox church from girlhood, and I am always thankful for the many precious lessons learned there, for they helped to prepare me for the coming of a clearer sense of Truth, yet I had never found one thing which I felt would satisfy all my longing. Many times I chided myself because I could not find this something, but in vain I studied my Bible in search of it. Science and Health was placed in my hands, and as I read it, some parts appeared beautiful to me, but others I felt required a higher ideal of life than I could attain. A year or more after I commenced to read Science and Health, my thought was centered one day on this statement: "Divine Love always has met, and always will meet, every human need" (Science and Health, p. 494). I knew then that I had found that for which I had been seeking so many years. There have been many problems to work out, many tests to meet, and oftentimes I have not met them as I would desire; but through every experience, that one sentence has stood out like a sentinel, has shone like a star, and no matter what the temptation, I have never completely lost sight of it. I here desire to say humbly, and yet with a great sense of love and gratitude, that had our beloved Leader given us no other written word, that one sentence would indeed have proved itself a "Key to the Scriptures."

To some people a negative statement seems to take away something; an affirmative to give something; so this last sentence seems to bring to us a great and precious gift. In a way the entire orthodox world believes that God is Love, but we learn as almost the first lesson in Christian Science, that we must prove what we say we believe.

As the truth unfolds to us we come to know that God is the one intelligence, and that there can be no intelligence, no learning, no true culture, which does not spring from the one fountain-head. As we begin to see that Love meets

Copyright, 1904, by Mary Baker G. Eddy.

Digitized by Google

our need in this respect, we realize that never before had this longing been truly satisfied.

Again, when we come to realize in all our financial affairs, be they great or small, that divine Love is the source of all supply, we have learned a lesson which nothing can take from us. We have freed ourselves from much of the care and mental anxiety which take away all happiness and freedom from life. Then we may truly say with James that, "Every good gift and every perfect gift is from above."

There have come to each one of us experiences,—so-called heart-aches and seeming heart-breaks,—when, no matter how close the human love, we have needed something deeper, something which would bring back the sense of sunshine. Only as truth unfolds to us that divine Love reflected in love is the one thing which will satisfy every human desire, can we ever know true happiness. At best human love is never quite at rest; there is always the fear that something may take it from us, that we may stand alone some day in the shadow of a great sorrow. As we become conscious that divine Love meets every human need of love, and that all true love is a reflection of divine Love, we can confidently say with John, "There is no fear in love; but perfect love casteth out fear."

The human need for which the whole world is seeking relief, is the need of healing. Our land is filled with hospitals where noble men and women are endeavoring to ameliorate suffering, and we, as Christian Scientists, have for them high respect and affectionate regard; but here, too, must be learned the deeper lesson that this pressing human need, divine Love will also meet. Nineteen centuries ago Jesus proved this truth as he walked among men in Judæa, and he left the promise, "He that believeth on me, the works that I do shall he do also." More than thirty years ago, the author of Science and Health demonstrated the present possibilities of this healing. Since that time, through the knowledge of God and His laws as revealed to us in our text-book, thousands have proved for themselves and are daily proving the truth of the Scriptures, "He sent his word, and healed them."

It is only as we work out the truth of Love's affirmative statement that we can intelligently obey the First Commandment, "Thou shalt have no other gods before me." If to some hungry and weary one these two sentences may come with a portion of the help they have brought to me, I shall be very grateful. They will indeed bring to such a one the true sense of Life, and the rose just opening in all its beauty and purity, will then be a type of the unfolding of Truth's idea as revealed in Christian Science.

Musings.

M. B. L.

ENSCONCED in the open-armed hospitality of an easy-chair, I sit before the cheerful fire this cold winter's night, and am thinking. The friendly curtains shutting out all sense of chill, the opal-tinted light of the lamp, the fragrance of a vase of freesias, all suggest summer, though bitter cold claims dominion without. The tireless pendulum, heard through so many years of mortal experience, has changed its plaintive note of, "Time is, Time is," to "Good is, Good is," and in thankfulness I ask, "What shall I render unto the Lord for all his benefits toward me."

Quickly comes the obstructing thought, "Don't write anything for the Christian Science papers until you have something convincing to say; you well know that one obnoxious ailment has obstinately refused to be cast out. The work you have done on it, the money you have paid for treatments, should remove mountains if this Science be science. When you are healed of indigestion, then give thanks." But I will not listen to this tempter. Mortal mind, that was ignorantly impregnated with a false mental science at the commencement of the search for Truth, must pay the penalty to the uttermost farthing, but I will be a warning to others, I will write and give thanks to Christian Science and to its Discoverer for the true conception of God and man, and for the numberless blessings which have flowed therefrom.

The clock ticks on just as it did fifteen years ago; where were my thoughts then? In the darkest night of error, filled with fears, disturbed with doubts, and deluded by false hopes; striving unsuccessfully to please my pastor, to meet the incessant demands of society, to work for the destitute, and to be a wise mother to my children, a helpmeet to my husband. Fear of winter cold, or spring winds, of summer's heat, of autumn's fruit; fear of the night time with its woeful traditions of croup and burglars; fear of the day time, with its cares and accidents, all made life a mockery. Nervous, remorseful, hysterical, but always hopeful, I struggled on. The shadow of death, the last enemy, hid from us a darling babe, and taught me the helplessness of medicine or human love to preserve our dear ones; then began my search for a living, ever-present God.

I can never be grateful enough that the nightmare of sorrow so awakened me that I was at last ready to accept the true idea of God and man. We are a happy family now, we love each other and our neighbors. We strive to unfold in the true consciousness each day. We are gaining dominion over fears of every sort.

Where we studied physiology, hygiene, and homœopathy in the dim past, we now feed upon the word of God; and its substance, as found through the teaching of Science and Health, sustains us. The Great Physician heals us and the return we make to Him helps to support our Cause. Now we wish only to obey God and to please our Leader in following our highest sense of good.

The fire is getting low, and the clock ticks on. In the melodious chimes that mark the hour, I hear the prophecy of the harmonious "days that are hastening on," when Love and Love's idea will rule from sea to sea, and time be dissolved in the understanding of eternity.

Come Out and be ye Separate.

ARCHIBALD WINNE.

THROUGHOUT the history of the children of Israel we find a conspicuous separation from the customs and practices of other nations, and this was made necessary by their laws and the teachings of their prophets. And so throughout the history of the world down to the time of Jesus the Christ, every person connected in any way with the religious rites and ceremonies of worship, bore some distinctive mark, or abstained from some of the common practices of the people, as a law of separation from his fellow-men. While this meant much to these people, the entrance of our Saviour upon the scene with his teachings and practices so directly opposed to the theological opinions then prevalent, brought with it a separation of another character and type. This teaching called forth from such as the faithful Paul the earnest exhortation, "Be ye not unequally yoked together with unbelievers," which was followed by the much misunderstood command, "Wherefore come out from among them, and be ye separate, saith the Lord."

As in former ages, so on down through the intervening years to the present day, the generally accepted sense of these words has been material in its nature, and therefore impracticable. To literally separate ourselves from all others not known and fully recognized as Christians, and to mingle only with those who are, would be, at least for the present, a physical impossibility, besides being contrary to the life and practice of Christ Jesus, who was a friend of the publicans and sinners. But, by applying the spiritual intent of the apostolic command, as explained by our

Digitized by Google

Leader in "Science and Health with Key to the Scriptures," we not only have separate thoughts and a new understanding of the Science of being, but we have different views concerning God and man and their relation to each other, a clearer sense of the nothingness of evil and of the nature of prayer. We have a daily experience of the activity of a living Christ, and this continuously develops within us the understanding of Life which is eternal. We have also the convincing assurance of its being the truth in the fruits that follow,—the healing of the sick and sinful through our obedience to this spiritual injunction.

To separate ourselves from the world spiritually and mentally, as taught in Christian Science, may remove from us friends of old who in thought and act made sin and sickness a reality from which the truth has set us free. Should we then hesitate to obey the command, Come out, and be separate from this deadly material thought, even though we may lose to sense those who are bound to us by ties closer than even friendship? Our text-book says, "Christian learners must live under the constant pressure of the apostolic command, to come out from the material world and be separate" (Science and Health, p. 451). Jesus says, "For what is a man profited, if he shall gain the whole world, and lose his own soul [sense]?"

Some may say that such radicalism would not only bar us from the world's society, but would retard our Cause, but in fact it will really hasten the separating process. Our Leader says, "Attempts to conciliate society and so gain dominion over mankind, arise from worldly weakness. He who leaves all for Christ forsakes popularity and gains Christianity" (Science and Health, p. 238). The truth of this Science, and the life of those who practise its teachings are by divine law so separated from the carnal mind, through its enmity toward Spirit, that nothing less than divine Love can effect the healing work.

To those living in strict obedience to the command, to be separate from the world, without compromise by contact with the "unclean thing,"—the material thought of this world,—the apostle brings the all-inspiring promise, "and I will receive you, and will be a Father unto you, and ye shall be my sons and daughters, saith the Lord Almighty."

The Demand of the Hour.

PRINTHIA T. MILLER.

ONE of our poets has said: "Where real perfume is, the flower need not be sought, for the scent will disclose its whereabouts. The nettle may need to lift its head, but not so the violet." What is most required in Christian Science to-day is true simplicity. The need is for genuine workers, not talkers, and to accomplish much we must have order. Pope has said, "Order is heaven's first law," and Mrs. Eddy tells us in "Retrospection and Introspection," p. 108, that "genuine Christian Scientists are, or should be, the most systematic and law-abiding people on earth." Christian Science heals the sick, and it is our business to know this for ourselves and our suffering friends. If we work faithfully every day, and are honest and obedient to our Leader, we shall follow her, knowing that she is obedient to God. In this way we shall be prepared for every trial and we need never fear.

One of the essentials in Christian Science work is to renounce personal sense; another is to remember to be grateful for all the good we know and are able to do. We should never forget for a moment that this glorious truth has come to us because of Mrs. Eddy's untiring devotion to God, her love for humanity, and her desire to bring peace and love on earth. We know that Christian Science is the Word of God to this age, and it is therefore our business to be true, honest followers; working always for Principle and never for personality.

I long to express my gratitude to Mrs. Eddy for her splendid example of loyalty and obedience to God. It is through this that we have learned the way of deliverance from sin and suffering. My gratitude to our faithful Publishing Society for the splendid standard they have maintained is second only to the gratitude I feel for the continual blessings which we derive from our text-book and from the other works of our beloved Leader. The messages of Truth and Love which our periodicals contain, as well as the stimulus they bring to awakening thought, should at all times spur us on to better effort.

An Appreciative Letter.

H. H.

THE accompanying letter is sent with a few words that may explain the circumstances which called it forth.

Last fall a young man, who is the organist in one of our Christian Science Churches, told me one evening of his interest in the Olivet House, Chicago, where they do settlement work similar to that of the Hull House. This young man had become interested in the mission some months prior to this time. He ascertained from a class of seventeen young men, who were placed under his charge, and whose ages ranged from seventeen to twenty-four, that they would be very much pleased if he would organize a band. He had the material in the way of instruction all provided for, but the instruments seemed to be a stumbling-block as he did not know which way to turn to secure the money. A little good Science work was done, and within a week he was told to go ahead and purchase the instruments, as the money was in sight.

We find in doing good even to those who have little or no sympathy with Christian Science, owing in most cases to ignorance of the subject, that we can in the end bring about good results under the guidance of Principle. We also find as we advance, that the truth as taught in Science and Health is permeating and reaching much deeper than is seen on the surface; that is to say, very many more are coming into a full knowledge of Truth through the deeds of Christian Scientists than through professions.

My Dear ——:—The instruments have arrived and we look forward to the actual as well as theoretical beginning of the work of the orchestra next Friday. We all appreciate fully how much we owe in this matter to your personal interest in the good work of the settlement and your ability and energy in pushing it along in the face of such obstacles as necessarily confront us everywhere. But we also appreciate fully the generosity of the good friends who have of their means made it possible to purchase these instruments. I know that this was done in a spirit of purest Christliness. Indeed, I sometimes think that our other people have a lesson to learn from our Christian Science friends; that is, the lesson of the breadth of the "Love of the Christ," a love broad enough to fill all the hearts of mankind without respect to person or creed, and big and strong enough to wipe out all sectarian lines and inaugurate the real brotherhood of man.

It has been my privilege to know many of the adherents of the church of Mrs. Eddy, and while not agreeing always in matters of interpretation, I have always found them most ready to clasp hands and join heartily in all movements looking to the amelioration of human condition.

Then let us pray, that come it may,
As come it will for a' that,
That man an' man the world o'er
Shall brithers be an' a' that.

Pardon this hasty note and believe me, ever yours,

T.

The Lectures.

Franklin, Pa.

Edward A. Kimball, C.S.D., of Chicago, spoke to a large and fashionable audience in the Opera House on Monday evening, January 18, on the "Beneficial Effect of Christian Science," under the auspices of First Church of Christ, Scientist, of Franklin. The speaker was introduced by Prof. Charles E. Lord, of the Franklin High School.

Franklin News.

Pueblo, Col.

More than a thousand people heard Judge Septimus J. Hanna expound the doctrines of Christian Science at the Grand Opera House last night [February 16]. The lecture was given under the auspices of the local Christian Science Church. In the audience could be seen people of all classes and denominations, and the intentness pictured on the faces of business men, clergymen, physicians, lawyers, and the large number of women, told the story of stirring thought within.

The introduction was made in a graceful manner by William Vassie, First Reader of the Christian Science Church.—*Pueblo Star-Journal.*

Miami, Fla.

The lecture delivered yesterday afternoon [February 7] by Judge Ewing of Chicago at the First Presbyterian Church, on Christian Science, was attended by a large audience and was interesting and instructive.

Judge Ewing was introduced by Dr. W. W. Faris, pastor of the Presbyterian Church, who said in part,—

When this building was erected the conference was held at which it was understood that it would be a useful thing, of practicability, to have a series of lectures from distinguished representatives of the various religious faiths, but nothing of the kind has seemed feasible as yet. But when two weeks ago the request for the use of this house to-day by Judge Ewing was made, the former arrangement was recalled and we at once gave our consent. . . . We are glad to show Christian courtesy to-day to him and to those whom he represents, and I take pleasure in introducing Judge Ewing to you.—*Miami Metropolis.*

Emporia, Kan.

Carol Norton of New York gave a lecture on Christian Science to a well-filled house at the Whitley Opera House yesterday [February 21]. In the interest of fairness W. A. White, who is not a Scientist, introduced the speaker. Mr. Norton is a polished speaker and, what is unusual with polish, he was earnest and convincing. Mr. Norton talked about two hours.—*Emporia Daily Gazette.*

The introductory words of Mr. William Allen White, the well-known writer, were in part as follows:—

Ladies and Gentlemen:—A religion is known by its works, and a man's soul is best known by his face and his outward demeanor. A man's face reflects his soul and the soul of man is reflected in his creed. One thing I have noticed about these Christian Scientists,—one of whom I am not, —is that they have faces that are serene and beautiful. I do not mean in the sense of symmetrical beauty, but there is a certain serenity in their faces that is not found in the faces of the people of any other cult or creed on earth. The Christian Scientist seems to wear his religion in his soul and makes it part of his daily life. I do not understand the creed of the Christian Scientist, and I am ashamed that I do not know it better, but I am proud to stand here to-day in the interest of fair play and introduce one who does know that creed, Carol Norton of New York City, who is officially authorized to bring this creed to the people of Emporia. It is with great pleasure that I introduce him to you to-day.—*Correspondence.*

Wilmette, Ill.

Under the auspices of First Church of Christ, Scientist, Hon. William G. Ewing delivered a lecture on Christian Science to a large and attentive audience in Wilmette Hall on Friday evening, February 19.

The speaker was introduced in a very happy manner by our fellow-townsman, Attorney Albert C. Wenban, who spoke as follows:—

Many centuries ago, when England was divided into several small kingdoms and Eadwine was the King of Northumbria, Paulinus, a follower of Augustine, came there bearing the message of a new faith. The wise men, or Ealdormen, of Northumbria, were summoned by the King in council to deliberate upon this new religion,—Christianity.

And it is recorded that an aged Ealdorman, drawing his illustrations from their crude life, said, "So seems the life of man, O King, as a sparrow's flight through the hall when you are sitting at meat, in winter-tide, with the warm fire lighted on the hearth, but the icy rain-storm without. The sparrow flies in at one door, tarries for a moment in the light and heat of the hearth fire, and then flying forth from the other vanishes into the wintry darkness whence it came. So tarries for a moment the life of man in our sight, but what is before it, what after it, we know not. If this new teaching tell us aught of these things, let us hear of it."

The historian says that to the finer minds among these warrior statesmen, the charm of this new faith lay in the light it threw on the darkness which encompassed men's lives, the darkness of the future as of the past. To those followers of the religion of Woden and of Thunder life was not of so great value, its environment was strife, its atmosphere was mystery, its end was death, or if existence beyond, then more strife. If a new faith to-day is to appeal to thoughtful men and women, it must embody all the salient doctrines of Christianity, and its charm will be not so much in dispelling the mystery of man's origin and future as in dealing with the problems of the life that is, making it worth the living, and by so doing fitting it for a life that is to be. All these modern appliances and conditions which, conjoined, we call civilization, have increased life's value and made complete living more important. If Christian Science has aught that teaches us to make our lives still more valuable, more fit for existence beyond, more as they were intended to be, if you have reclaimed to the oasis of the finite known a narrow strip from the infinite desert of the unknown, then mankind to-day must say not only, "We will tolerate," but in the words and spirit of that old Ealdorman, that earnest truth seeker of yore, "Let us hear of these things."

You are especially fortunate in having to address you on this important topic, one who has achieved much in the field where close analysis and accurate reasoning are requisite. I doubt not he will bring to bear the same vigor of mind, the same acumen and accuracy which made him a distinguished member of the Chicago bar and an honored judge upon the bench of our county. It gives me pleasure to introduce Judge Ewing.—*Correspondence.*

Logansport, Ind.

An event of more than usual interest in religious circles was the lecture delivered at the Dowling, Sunday afternoon,

Digitized by Google

January 17, under the auspices of First Church of Christ, Scientist. The affair attracted a large audience. Bicknell Young of Chicago was the lecturer.

Mr. Harry G. Tucker, who opened the meeting, introduced Judge Clarence A. Buskirk, who spoke in part as follows:—

Like the gentleman who was just speaking to you, I was brought into Christian Science by the work which it had performed, not for myself, but for a member of my family, one of my daughters. It is not alone from that experience of nine years ago, when my oldest daughter was restored to the arms of her mother, her sisters, and myself, but it is also from repeated observations in my own family and among others during the past nine years, as well as from the study which I have given the subject, that I am able to come before you this afternoon as one who is firmly convinced of the absolute truthfulness and trustworthiness of the teachings of Christian Science. My friends, we live in what perhaps I might describe as the fatted age and country. No other age or country in the world's history has ever known the material prosperity which is now surrounding us. The genius of physical inventions has filled our homes with comforts and luxuries which were unknown and undreamed of even by our fathers and mothers. Now I have no disposition to depreciate the value of a reasonable ambition, or the legitimate getting of money and place, but I do wish earnestly to ask you the question: Are we sufficiently awake to the moral and spiritual dangers which always accompany lives of material fatness? Are we not too prone to shut our eyes to the melancholy lessons of history, those stern lessons which teach us that the accumulation of wealth, with its selfish incidents and surroundings, seems almost sure to lead to individual and national degeneracy?

I ask you, is it not a startling, imperative need among us, that we shall adopt altogether different and higher ideals in life? Is it not apparent that the ambitions for money-getting and place-getting, which are perfectly proper so long as they are kept in legitimate bounds, are overcoming this country of ours until we are become a nation of idolaters, the gods of our idolatry being dollars and worldly places? These are faithless and cruel gods. We need nobler ideals in our lives. Our children cannot become good men and women without them. We are recreant unless we teach our children, by precept and example both, that character-building is more important than fortune-building. Money is always a menace, and is often a curse, to a man of base, unworthy ideals. Now, my friends, one of the main seeming obstacles to the growth of Christian Science is the fact that it wages unceasing warfare against our cherished idolatries, teaching with stern insistence, "Thou shalt have no other gods before me," and insisting upon the omnipotent and omnipresent good, or God. No truth has ever perished from the earth because of opposition. Jesus taught a scientific Christianity, using the term "science" in this higher sense. The teachings of Christ could not be true if they were not scientific. When we accept basic Christianity as true, it follows there must be a Science of Christianity, or Christian Science, and that it must be found wholly apart from man-made creeds and theologies.

The adherents of what is known in modern days as Christian Science, are humbly and sincerely seeking to follow the teachings and example of the Nazarene in the overcoming of the phenomena of sin and sickness. They may meet with a tremendous opposition, but so did the Nazarene; and the fact of the opposition proves the fact of the necessity for Christian Science with its anti-materialistic teachings in this age of materialistic tendencies. Christian Science has come to stay. Its growth has been great and rapid, and its growth is also steady and sure.

Logansport Journal.

Rich Hill, Mo.

One of the largest and most intelligent audiences ever assembled in the Rich Hill Opera House gathered there Sunday afternoon, February 14, to hear Carol Norton C.S.D., expound the doctrines of his faith and explain the meaning of Christian Science.

The speaker was preceded by Postmaster J. K. Martin in the following remarks,—

Some no doubt will be surprised that I, a Methodist, should have been invited to introduce the lecturer, and some few no doubt will be surprised that I accepted the invitation. To all such I have this to say, that it only proves that we are not now living in the dark days, when ignorance, superstition, and prejudice held sway, but that we are in the morning, the bright, sunlit morning, of the twentieth century, which at its opening is so full of life, of energy, of thought.

Friends, we are in a progressive age. If you close your eyes to the educational, to the religious conditions with which you are surrounded, some day, some morning, you will awake to find yourself relegated to the rear, for this grand old world of ours will have hurried on many years in advance of you.

No, friends; let us keep up with the times, let us keep step with the music of progress, let us not be cowards, let us listen, let us investigate, and above all, let our prayers be, deliver us from the parching, shriveling, dwarfing effects of prejudice.

I for one believe in the present. I think we ought to extract all the happiness out of the present we can get. If there are any good things to be said, I want to hear them; if there are any good things to eat, I want a few; if there are any roses blooming by the roadside, I want to see them; if the air is filled with sweet fragrance of flowers, I do not want to close myself up like a clam in its shell, but I want to be in a receptive mood, so that I can absorb a little as I pass by.

Friends, I know but little about the theories of Christian Science, I know that as an organization, it has quietly but most assuredly made wonderful progress in the last few years.

I have with my own eyes beheld some of its most practical results. I have seen man in his lowest estate, down in the depths of degradation, bound and re-bound by bonds of appetite, of habit, and of sin, until it almost seemed that he was beyond redemption. I have seen the influence of these mild mannered people reach out and somehow, through that unseen power of love, take hold upon him and place him upon his feet. I have seen the bonds that bound him broken asunder, the shackles of sin fall off, and the man made free. Instead of darkness there was light, instead of sorrow there was joy. Friends, a religion that does this at least merits a respectful hearing from intelligent people, and I want to congratulate this splendid audience upon the fact that we have with us this afternoon, a scholar, a student, a distinguished gentleman who will speak to us with authority upon this subject. It is with pleasure that I now introduce to you Mr. Carol Norton of New York, who will lecture to you upon the subject, "The Meaning of Christian Science."

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Interesting Letters.

THAT Christian Science is the religion of Christ Jesus is the position taken by Christian Scientists, and under the leadership of Mrs. Eddy they are demonstrating the same Principle taught by him. That Mrs. Eddy's teachings have not been readily accepted is, in a sense, not surprising, in view of the materialistic tendencies and beliefs of the centuries which have elapsed since Christians expected to heal the sick through their understanding of God as taught by our Master; but, fortunately for humanity, this unbelief is being gradually dissipated through an increasing spirituality, for which Christian Science is responsible.

The document quoted in the following letter, which Mrs. Eddy recently received from a well-known resident of London, is of great interest, because through it Mrs. Eddy's reiteration of the gospel of Christ Jesus is corroborated by the words of the Master himself:—

"Listen, John, beloved of my Father, foolish men thus say in false accusation that my Father fashions their bodies of clay; but by the holy spirit he made all the powers of the heavens, and it was through false accusation that the saints were found having mortal bodies of clay, and by reason of this they were betrayed into death."

London, 18 February, 1904.

Dear Leader:—I am enclosing herewith a copy, in Latin, together with a translation, of one of the uncanonical gospels, which was discovered in so interesting a way, and confirms so remarkably the teachings of Christian Science, that I think you will like to read it.

I should like to tell you, first, how it was found; and then, a little about the manuscript itself.

A friend of mine, Mr. Woodward, who will soon be a member of First Church of Christ, Scientist, London, had been studying an early edition, the 3rd edition, of Science and Health in the British Museum. After returning the book to the attendant, he found he had still a little time to spare. We had often talked over the necessity for the exercise of discrimination in reading books which were not absolutely scientific, and thinking over this he endeavored to realize that he could only choose a book which would be of profit to him. Then walking over to the shelves round the great reading room, which contains many thousands of volumes, he took down a book and carried it over to his seat.

On opening it he found that it was a reprint, in Greek and Latin, of several uncanonical gospels, and consulting the list of contents, he found one in Latin, attributed to St. John, and began rapidly to read. Almost at once his eye fell on the passage which begins: "Audi Joannes, dilecte patris mei;" "Listen, John, beloved of my Father, foolish men thus say in false accusation that my Father fashions their bodies of clay: but by the holy spirit he made all the powers of the heavens, and it was through false accusation that the saints were found having mortal bodies of clay, and by reason of this they were betrayed into death."

He was so struck by this that he copied down the Latin, and brought it to me the same evening. The more we thought over it, the more remarkable it seemed, and Mr. Woodward was so interested in the matter that he hunted through London until he at last found two second-hand copies of the book, which he purchased for himself and me.

It is from these copies that the translation now sent to you has been made, and it has been checked by Mrs. Butler of Cambridge, who, in addition to being the First Reader, of the church at Cambridge, is one of the most distinguished classical scholars in the university.

With regard to the gospel itself, very little is ascertainable concerning it. The original has completely disappeared; and this earliest known version occurs in one of the collections of writings known as the "Acta Inquisitionis Carcassonensis," from which it was copied into Thilo's "Codex Apocryphus." That it was early looked upon with suspicion by the Roman Church is clear from the following note in one of the manuscript copies: "Hoc est secretum Hæreticorum Concorezio portatum de Bulgaria a Nazario, suo episcopo, plenum erroribus."

One of the greatest scholars in Europe, whose opinion I was able to ask on the subject, hazarded the opinion that it was a fourth or fifth century copy made from a Greek original for one of the African bishops, in which case the text would probably be fairly uncorrupt.

The word *ossop* which occurs in the description of Satan is of no known language. Mrs. Butler suggests that it is a transcriber's error for *ossom*, a kernel; "invenit, suum ossop, quod est genus ignis," would then read, "he came upon his own kernel, which is of the nature of fire." This, however, is of course from speculation. A mediæval reader has left a note to the effect: "Cujusnam linguæ sit vox *ossop*, alii videant," what language *ossop* may be he leaves to another.

The passage concerning the two fishes yoked for plough ing is obviously taken from the fourth book of Esdras, in the Vulgate, chapter 6, and 49 seq, when their names are given as Behemoth, or in the Latin Henock, and Leviathan: the animality and the cunning of mortal mind.

I do not think I would say anything more on the subject of the manuscript, but I would like to express, however inadequately, something of the joy that Christian Science has been to me during the past six years, and not the least part of this joy has been in being able to read the Bible, no longer with the cold criticism of agnosticism, but with a dawning perception of its beauty, its vitality, and its truth, which is coming to me as I begin to understand, no matter how faintly, the meaning of the words, "Thou shalt have no other gods before me."

Yours very gratefully and lovingly,

FREDERICK DIXON.

We are also permitted to publish the following very interesting extract from a letter received by a friend from his brother in England:—

"A search in the British Museum made by Christian Scientists resulted in some writings being brought to light, recording conversations between Jesus and John. They are, I understand, in Latin, and the ancient records of an African Church. Having been examined by some Museum authorities, they are believed to be authentic. When published, they will astonish the world and emphasize the correctness of Mrs. Eddy's pronouncements in Science and Health.

"One conversation is: John asks Jesus if there is a material body. Jesus answers, No. John asks Jesus if there is a material earth, creation. Jesus says, No.

"The writings are to be carefully examined, and will doubtless be brought before the world in due course. Doubtless there is a good deal more on record, which we will learn about when ready for it."

Letters to our Leader.

Sheldon, Ia., February 23, 1904.

Rev. Mary Baker G. Eddy, Concord, N. H.

Beloved Leader:—Words but feebly express my love and gratitude to you for the glorious truth you have revealed to this age.

About fifteen years ago I heard of Christian Science. Up to that time I had never experienced peace of mind or body. From childhood I had a sense of intense fear, which at times seemed almost unbearable. This caused sick headaches and other ailments, and had failed to receive the slightest benefit from *materia medica*. I really felt as if I was "without hope and without God in the world." I believe it is fifteen years this spring since I had the blessed privilege of entering a class taught by a loyal student, and never from that time to this day have I experienced the slightest return of that fear or of other ailments caused thereby.

The truth in Christian Science opened to me a new world wherein "old things are passed away; behold, all things are become new." I can say in the language of the Psalmist, "O Lord, thou hast brought up my soul from the grave: Thou hast kept me alive, that I should not go down to the pit. . . . Thou hast turned for me my mourning into dancing: thou hast put off my sackcloth, and girded me with gladness."

In Christian Science I am learning to know God, and this God is perfect Love which casteth out all fear. I wish to say in closing, that I had the precious privilege of attending the communion in the Mother Church in 1901, and was one of the many who visited your beautiful home at Pleasant View and listened to your words of love which have never left me.

Reverently and lovingly,

GRACE THOBURN.

Boston, February 26, 1904.

To Rev. Mary B. Eddy.

My Dear Leader:—I wish I might tell you *all* the peace and joy which your dear poems in "Miscellaneous Writings" have brought to me from time to time, but none are more sweet and tender than these lines on page 391:—

> That when a wrong is done us
> It stirs no thought of strife:
> And love becomes the substance,
> As item, of our life.

From the great heart of Love, these words came to me one day, and also the inspiration which enabled me to pray from within, "Father, forgive them, for they know not what they do." My prayer has been answered, and a manifestation of divine Love came to-day from one of the number in word and deed. My heart is so full of gratitude to our God, and to you, His patient Messenger, that I felt the natural impulse to impart some of this joy to you. It is only one "item" of the rich blessings which are mine in striving to follow the guidance of Science and Health, and our impersonal teacher, "Miscellaneous Writings," which you have given to the world.

May I be ever faithful. Tenderly and lovingly,

Your student,

E. SNELL.

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

Selected Articles.

The Cure of a Blind Man.

That the curative power was not in the clay is evident from the fact that the blind man whose eyes Jesus had anointed with spittle and clay was commanded to go and wash. If clay and spittle were a curative for blindness in Jesus' time, why is it not so still? Besides, if this were a material cure, why did the materialistic Pharisees cause such an uproar about the affair? Why did the man who was healed say, "We know that God heareth not sinners; but if any man be a worshiper of God, and doeth His will, him He heareth. . . . If this man were not of God, he could do nothing"? Or why did Jesus say, "For judgment I am come into this world, that they which see not might see; and that they which see might be made blind"? Jesus often declared that a material age requires a material sign as an evidence that something is being done.

Just as the spiritually blind Pharisees were willing enough to recognize that a cure had been wrought upon the blind man, and were anxious enough that God should have the praise, but rejected the form and manner through which the divine presence wrought the healing, so still does the material thought cling to matter as the divine and true method of healing, and reject the power which is from above.

CHARLES D. REYNOLDS.

Granite State News.

Scientific Teaching.

In his conversation with the woman of Samaria at the well, Jesus not only revolutionized the Samaritan ideas of worshiping God in a particular mountain, but he also spoke in favor of a departure from the ancient Jewish custom of worshiping God at Jerusalem, offering as his reason therefor his clear and pointed definition of God as Spirit.

In the Twentieth Century New Testament this basic lesson of Christianity is put in the following language: "But a time is coming, and indeed is already here, when the true worshipers will worship the Father spiritually, with true insight; for such is the worship that the Father desires. God is Spirit; and those who worship Him must worship spiritually, with true insight."

Jesus was well aware that he was giving the Samaritan woman a new idea of worship; this understanding of the Being to be worshiped differed from hers as well as from that of the ancient Jews, and he indicated his realization that what he taught was new by the statement, "But the time is coming, and indeed is already here, when the true worshipers will worship the Father spiritually." The expression, "true insight," shows that he expected mortals to gain a new and more spiritual understanding of God. He knew that when such a knowledge came to mankind they would no longer believe that God was a limited person with a residence in some special locality, but would understand Him as infinite, everywhere present Being, who could be worshiped spiritually in one place as well as in another. Hence he said, "Neither in this mountain, nor yet at Jerusalem."

This understanding of the Master has been perceived by Mrs. Eddy, and is the basis of the wonderful Science which she has discovered. It is as apparent to all discerning Bible students familiar with her teachings as it is to her, that Christian Science is founded upon the sayings of the great Master; that she has taken his abstract teaching as her basis, and upon this she has elaborated and has built a scientific religion which can be demonstrated by all honest students in the overcoming of sin and sickness.

Jesus taught certain things concerning God, and advanced

Digitized by Google

deductions therefrom which are in exact accord with the teachings of Christian Science. For example, he said, "It is the Spirit that quickeneth, the flesh profiteth nothing." This declaration concerning the unprofitableness of matter was based upon his knowledge that Spirit alone makes possible the existence of all created things.

By such instructions the Master manifested that he knew certain things about God and creation. What he knew must surely have been Christian and Christ-like; in other words, Christianly scientific; such knowledge is properly called Christian Science. Inasmuch as Jesus practised what he taught, and results were forthcoming in the destruction of sin and disease, he proved beyond cavil that he was a Christian Scientist.

Mrs. Eddy is correct in her statement, "Jesus of Nazareth was the most scientific man that ever trod the globe" (Science and Health, p. 313), because he was the most correct in his teaching. In the light of supreme intelligence, true Science is that which is true in the sight of God, whatever estimate may be placed upon it from a human standpoint.

ALFRED FARLOW.

Boston Times.

It is said by a critic that "Christian Science takes half of life and calls it the whole life." In theology it is admitted that life is eternal; in the theology of most orthodox churches it is also freely admitted that the life preceding the so-called fall of Adam and Eve was a perfect life,—the real, primal state of God's spiritual perfect man. Christian Science claims this perfect life to be God's gift to man, and does not admit that the fallen, sinning, sick, and dying race of Adam and material existence constitute life. Life or God is eternal. This being true, there can be but one Life. Material claims to life are considered false in Science, since they lapse into death, proving themselves inconstant, unreal. Science and Health by Mrs. Eddy, states, "All forms of error support the false conclusions that there is more than one Life; that material history is as real and living as spiritual history" (page 204). Man in the image and likeness of God cannot help being perfect and deathless. But the sinning race of Adam does not present any proper image and likeness of God, hence the Scripture, "They which are the children of the flesh, these are not the children of God."

Century after century, it is stated, "noble seekers after truth have pushed upward from absolute ignorance concerning the human body." With all due respect to those who cling to the medical profession, we would ask, now that we know about anatomy, so-called food laws, hygiene, etc., is disease obsolete, or even materially lessened? and to whom shall mankind resort for healing when the physicians have given up their cases? Is there an appeal to a higher power? If so, why was not the higher power sought first, rather than last? If one turns to God as his friend and is healed through the efficacy of prayer in Christian Science, is not the system good, or even better than the one that could not heal him?

M. COULSON FAIRCHILD.

Newark (N. J.) *News.*

Writers who criticise the literary productions of Mrs. Eddy and the Publication Committee will observe that what they write is in a kindly spirit, free from mud slinging and all abuse. They argue instead of abuse. Those who contend with them should do so in the same kindly spirit, answering argument with argument, advancing theory and facts against their theories and facts. This is eminently fair and sound. The theory of Christian Science is being widely discussed, pro and con, has even been in the courts in efforts to suppress it, and this alone makes it a subject for fair discussion.—*New York Advertiser-Gazette.*

Testimonies of Healing.

[Translation.]

Remembering the manifold blessings which I have received through Mrs. Eddy's writings and our periodicals, I wish to express my gratitude for the same to God, who led me to Christian Science.

Over two years ago I heard the words Christian Science for the first time from a student, while I was on a journey in Switzerland. I was then very miserable physically, and was also mentally depressed, although I had employed physicians and used baths for years.

After this student had told me of her own healing, she advised me to buy the text-book, Science and Health. I sent for it and began my study. Although I have quite a good command of the English language, the book was hard to understand, yet an inward impulse made me continue my study. I soon decided to go to Berlin, which in my state of health seemed a great undertaking, but contrary to my expectations all went well.

I can never forget the feeling that came over me during and after the first treatment; it was such a feeling of peace and rest. The simple service and the beautiful hymns impressed me very much; my health improved, but very slowly, yet I regained my joy in life.

My difficulties gradually disappeared,—indigestion, susceptibility to cold, and nervousness. I learned to know that because we are created in the image and likeness of God and He is perfect, we, as His children, manifest perfection if we realize our birthright,—our dominion over the misguiding senses.

I have been successful in having small demonstrations; for instance, some time ago, I had an attack of sick headache which was overcome in a quarter of an hour through reading in Science and Health. Another time I experienced a clear proof of the ever-presence of God. In leaving the street car I rose before it stopped and fell full length in the car so that a gentleman had to help me up, but I instantly remembered that God's child cannot be harmed and went safely on. When I reached home, however, I felt a pain in my left shoulder as if it were sprained. I treated myself to the best of my understanding and later on asked for help which I received, and after two days all bad effects had disappeared. The third demonstration was a case of impersonal healing. My niece complained of a severe cold while I visited her. I denied it as we do in Christian Science. A week later she visited me and said, "My cold has disappeared in a remarkable manner, I believe I must thank you for it, because I have never been freed so quickly." I am not only helped physically, but I feel that I am being inwardly transformed.

We cannot be too grateful to Mrs. Eddy, who has revealed this precious truth and given it to us. Since June, 1903, I have had the blessing of becoming a member of the Mother Church, and at the same time I joined First Church of Christ, Scientist, in Berlin, Germany.

We have just received the February number of *Der Christian Science Herold,* and I wish to express sincere gratitude for myself and many other Germans, to the Publishing Society, for the German translation of our Bible Lessons contained therein. This will be an effectual help and a blessing for many.—E. W., Berlin, Germany.

It was not for physical healing that I came into Christian Science, but because I recognized it immediately as the teaching of Christ Jesus,—primitive Christianity,—but my healing came afterward. In one treatment by a loyal student of Mrs. Eddy I was healed of a serious trouble which, I had been told by two physicians, I would carry all my life. Since that time I have been climbing, slowly but steadily, up the hill of Science, and have many times been enabled to help others as well as myself through the un-

Digitized by Google

derstanding that "There is no life, truth, intelligence, nor substance in matter. All is infinite Mind and its infinite manifestation" (Science and Health, p. 468).

About eighteen months ago my brother's four children came to make their home with us, and one of them had a large sore on the side of his head, which had resisted all kinds of remedies put on it by those who had had the care of the children before they came to us. The little fellow was heartily tired of it, and told me that they were just preparing to take him to the hospital for treatment. He said that he was told to persuade me to send him to a hospital in our city. Instead, I immediately commenced Christian Science treatments, and in two weeks there was no sign of the sore left. The children soon learned the beautiful truth that God is All, and to rely entirely on Him when they seemed to be hurt.

Although the ability to help others is so beautifully satisfying, it seems but a small thing when compared with the spiritual uplifting one experiences through the study of Christian Science. The study of Science and Health leads, step by step, from darkness to light, and teaches the student how to "Abide under the shadow of the Almighty." Our text-book is most certainly a Key to the Scriptures, for it explains the Bible as nothing else ever has done, making it a new book, one that can now be understood by all who study the two together. Mrs. Eddy has made it plain what God is, and what man is, giving us a God whom we can love and serve and obey.

I am very grateful to our dear Leader who has led the way through the stony wilderness, and made it clear to all humanity how to follow in the footsteps of our blessed Master. I most heartily thank my loved teacher in Christian Science, the friends, and the writers in our periodicals who have been the means of leading me into the light of Truth.—Mrs. Mary B. Archbell, Crescent City, Cal.

[Translation.]

I was very glad when I heard of the publication of our *Herold* for the especial benefit of those who cannot read English.

It is five years this spring since I began to read Christian Science. I was at this time very miserable, a wreck, both physically and mentally. All my life I had been weak and ailing, even when I was not under medical treatment I would daily take my material remedies, and always had to diet and study hygiene; nevertheless I grew worse instead of better. I had very little faith in Christian Science when I wrote to the practitioner for treatment. We were sixty miles apart and I had never seen her, yet within two weeks I was transformed so that I hardly knew myself; I felt well and happy; I could sing and laugh, work and sleep; it seemed as if a great load had been lifted from me.

I had written to the practitioner that I was sick from head to foot, that I had suffered since childhood with headache and backache, which constantly grew worse. My eyes had also caused me much trouble; for years I had worn glasses for far-sightedness, weakness, astigmatism, etc. I had changed the glasses several times, but could never find any to suit me. I had suffered much from catarrh, throat, stomach, liver, and kidney trouble, and had an ailment since childhood which did not allow me to run or lift anything heavy. All my diseases were chronic. For constipation I had to take medicine daily. For years I had palpitation of the heart, which increased so that last winter before I came to Christian Science, paralysis of the heart set in. I was so weak, and so troubled with insomnia that I thought my end had come, often expecting not to live until morning. My nervous system was all in disorder. I was cross and suspicious, I troubled myself about everything. But God be praised; He has opened my eyes; He has shown me how to cast all my burdens upon Him; He has shown me that I am His child.

I was raised in an orthodox church, and had always called myself a Christian, but I was never satisfied; and I had always longed for something better, for the spiritual peace which is promised in the Bible, but it was, so to speak, a closed book for me until Science and Health unlocked it for me. How can I help being grateful to Mrs. Eddy or fail to express my gratitude.

All these five years, I have stood alone in my faith in our family, although my daughter had accepted the physical healing; but since last autumn she has taken up the study and is now much interested and very happy in this blessed truth, which, as Jesus promised, makes us free from all bondage.

I wish to express my sincere gratitude to our Leader and to all the faithful workers.

Frau Marie Juergens Henschel, Hutchinson, Minn.

I wish to send my word of praise for the wonderful light that has come to me through Christian Science. I had many prayers answered before the revelation of Truth through the study of Science and Health and class instruction, but it was a faith without understanding, and so unsatisfactory that I cannot remember the time when I did not long for something better than I had found as a member of an orthodox church. I was always a Bible student, and felt that as professing Christians we did not rely upon God's promises nor really believe it possible that they were all meant for us in this age. At last my prayer came to be, "Father, give me the truth, but no error;" and for three years that cry went out, and was answered, as every earnest, honest prayer will be; and I found the truth in Christian Science.

Although I did not seek Christian Science for the healing, I was troubled with what one of our best physicians pronounced heart-asthma, which caused great suffering, so that I was unable to lie down at night, sometimes for hours, and often through the day breathing would be difficult. This, and many other ailments have been destroyed, and others are being overcome daily, so I am not only able to help myself but others as well.

"Who is so great a God as our God?" How can we be grateful enough for the many blessings that come to us through Christian Science. Among the many is this better understanding of the Bible. When I think of what it means to be conscious of the ever-presence of good, and to realize that in Love, "we live, and move, and have our being," my thought goes out in gratitude that one was pure and unselfish enough to have such a revelation come to her, and brave enough to give it to those who were seeking and striving for Truth. For a long time I have wished also to express my appreciation of the help and wisdom that is shown in our periodicals, giving us just what we need at the right time, and so helping us to give to others.—Mrs. Ida D. Bragg, Cleveland, O.

Christian Science came to me when I was a miserable woman chained with muscular rheumatism, so-called, and with nothing to look forward to but an invalid's chair. I had tried almost everything for help, but found no relief. I was treated in Science and found my freedom in a very short time, and never have had any return of the trouble.

I had worn a truss for hernia constantly for twenty-five years when I was told I could be healed. That seemed too good to be true. Treatment was begun, but I did not remove the truss. One day I began to think how I was limiting God's power, and in the morning I thought I would try to go without the truss. I soon found, however, that I would be obliged to wear it. Later in the day I was treated and was asked if I was not ready to remove the

Digitized by Google

truss. I said, "Yes, come what may, I will take it off." I did so at once, and from that moment to this, which is now fourteen years, I have never known anything more of the hernia.

Some weeks later I was going on a journey in which I would be on my feet a great deal and the tempter came and said, "You had better take that truss with you." I thought a moment, then got the truss, and put it in the stove. That brought the victory,—perfect freedom. I have been healed of many ailments since. I was wearing glasses when I began class instruction, but I was able to leave them off, and for the last two years I have not used them. I find I am able to study the Concordance, which at first seemed too fine print for me. That difficulty has been met, and I can study it, for which I am very grateful.

I wish I could express in words the gratitude I feel to Mrs. Eddy for giving us Science and Health, and to my dear teacher for leading me to the understanding of Christian Science, and to know that thoughts are things, and that right thoughts bring right things.—C. P., Brooklyn, N. Y.

It is nearly three years since I began the study of Christian Science, and no words can express the joy and uplifting which I experienced as I realized that I had found the truth for which I had prayed. I was dissatisfied with the church of which I had always been a member, and was unable to receive help from my own understanding of the Bible, which I had only read from a sense of duty. It was a great comfort to find that, with the aid of "Science and Health with Key to the Scriptures" I was able to enjoy the reading of the Bible.

The greatest blessing, I think, which I have received through Christian Science is the spiritual uplifting that it brought to me. Many ailments have been overcome through Christian Science treatment. For a long time I was a great sufferer from neuralgia, which was cured after two treatments. I also suffered agonies from indigestion for four years, and would wake up nearly every night with it; a short time after I began this study, the indigestion entirely disappeared and I have had no return of it. I was healed of train-sickness instantaneously.

Before hearing of Christian Science I was very nervous and was afraid almost to speak to any one; but, to a great extent it has been overcome and I am trying to realize each day that "there is no fear in love," and "God is Love."

I can only show my gratitude to God, to our Leader, and to all those who have helped me to understand this blessed truth, by striving to live it and to bring others into the light.—F. J., Quainton, England.

Words cannot express how thankful I am that Christian Science found its way to Charleston. Seven years ago I heard the first talk from a Christian Scientist, and had two treatments for severe pain in my head and back. I had used external remedies but had no relief. It was said to me to try Christian Science. I did so, and two treatments had the desired result.

I took class instruction seven years ago this March. While in class my teacher asked me to take off the glasses, which I had worn for over ten years. I could not read even large print without them. Five days after class, I read Science and Health, also handwriting, and have had no need for glasses since. I read, write, and sew by lamplight when necessary. Best of all, Christian Science has brought me happiness and health, for many other ills have disappeared, among them, dyspepsia, headaches, and neuralgia.

The members of my family have been much benefited. One of my sons took class instruction and we are members of the Mother Church, also of First Church of Christ, Scientist, in Charleston. I am trying to be grateful that I have been called to others to tell them the glad tidings of the healing power which belongs to God alone.

I can never do enough for the blessings which Christian Science has brought to me. I thank God for revealing to Mrs. Eddy the Science of being, and I love her for her faithfulness in bringing it to us.

MRS. SOPHIA MILLER, Charleston, S. C.

I desire to tell others how wonderfully I am assimilating this blessed Science, which gives me such freedom from sorrow, sin, sickness, and trouble of any kind. Just three years ago I knew but little of Truth, and was scarcely able to walk at all. Now I am in perfect health, made over new.

Although very near ninety, according to mortal reckoning, I feel younger, stronger, and happier than I ever did. Forty years ago, my memory was so poor that I sometimes had to ask the servant who came to the door the name of the family which I went to visit, and had to "keep up" with the demands of society by means of wine and other mortal delusions. Now I am growing stronger every day, both in mind and body, and am so happy. I walked home lately from church, although the street cars had to stop on account of the snow falling heavily, but on my return I sat down and studied the Lesson-Sermon for the next Sunday, feeling "strong in the Lord, and in the power of his might."

I study Christian Science a great deal, and as I do not sleep much, the understanding and spiritual meaning come to me in the night. I think it makes me strong instead of weak not to sleep a great deal. I am awakening fast out of dreamland. I live in Love, I love every one and every one loves me. God has indeed blessed me and I am so grateful. I am also thankful to Mrs. Eddy, that noble woman, and to all who have helped me to advance in Christian Science.

M. F. T., Saginaw, Mich.

The first ray of the true light—Christian Science—came to me sixteen years ago after many years of suffering and invalidism. The last hope in material help had failed. The words that told me of this blessed truth were to me the sweetest I had ever heard. I had great faith in prayer, and believed that God did answer prayers when offered trustingly.

I had never heard of Christian Science, and when told it was the same healing that Jesus taught and practised, I said, "It can heal me, I must have it." I was so comforted by this assurance that it was the Christ-healing, that the healing began even before I wrote to the Christian Scientist, one of Mrs. Eddy's students in Chicago, who gave the treatment. Although greatly benefited from the first, my healing was slow.

Two years later I had the privilege of class instruction from Mrs. Eddy. I cannot recount the blessings that I have received physically and spiritually since coming to Christian Science. Divine Love sustained me in the face of many trials, by the realization that God—Mind—is All in all and is supreme.

I have been able to overcome many ailments and difficulties for others, and it is my most earnest prayer that I may reflect more and more of the one Mind that heals.

MRS. C. V. W., Taylorville, Ill.

I was able to have some few months of treatment and occasional visits to a dear Christian Science practitioner whose loving ministry proved very helpful at that time, as well as on many subsequent occasions. If she had not been most patient she must have given up the task, for all sorts of troubles seemed to hold me in bondage. Once or twice, perhaps more, I have seen the effect of the truth upon others who were held by physical ailments, and I would most gratefully acknowledge that whenever this has occurred

Digitized by Google

it has nearly always been the outcome of a strong realization of Love; so I have been able to ascribe all the power to divine Love,—Spirit,—the All in all.

I am conscious of much that remains to be done in all directions so far as I am personally concerned, but the knowledge that we can and will attain unto "the mark for the prize of the high calling of God in Christ Jesus," is a constant inspiration. This knowledge I have begun to receive and believe, through reading and endeavoring to put into practice the teachings of Christian Science as given in Science and Health by Mary Baker Eddy. I have never met and probably never shall meet this lady, but I seem to know and love her through a sense of the same love for my fellows which has characterized her life and her books.

E. D., London, Eng.

The great good to be derived from reading our Christian Science literature came to me very forcibly while reading some of the articles recently. The testimonies were helpful,—all breathe the same spirit of love, and I would like to add mine.

From childhood I had been a constant sufferer from what the doctors called a gastric trouble which caused indigestion, heart and brain trouble, and many other ills. At last I could not retain any food in my stomach, and life was fast becoming a burden. At this time Christian Science was brought to my notice. I knew nothing of it, and when a good neighbor told me that it would help me, I turned away from it, afraid that it would disturb my religious faith. The suffering became so great, however, that I went to her again, determined to give it a trial, and the first treatment entirely healed me. Words fail to express the joy I felt when this wonderful light first dawned upon my consciousness. I was really a new creature, "old things" had "passed away" and all things had "become new." The Bible admonition to eat what is set before us was literally fulfilled by me.

It is more than ten years since this great revelation of Truth came to me, and since then I have had no sickness but what could be met and overcome in a short time, and, what is more of a blessing than anything else, is the joy of helping others. I have seen almost every phase of error disappear before the searchlight of Truth, and words fail to express the sense of gratitude I feel for all these blessings.

My heartfelt thanks go out to Mrs. Eddy for giving this truth to the world. We can never repay her. Only by helping others can our gratitude be shown. I am very thankful for the *Sentinel* and *Journal*. They are reaching many homes, where no thought of divine Love has ever entered before.—Celia V. Read, Detroit, Mich.

About four years ago I was healed in Science of an ailment which had been pronounced chronic by the best doctors I could find. I had suffered intensely for nearly a year, it being necessary to use opiates a considerable portion of that time. It was only when the last physician whom I consulted said he felt that he could do nothing for me unless I would have an operation performed, that I yielded to the persuasions of friends and consented to have treatment in Christian Science. In about two months and a half, much to my astonishment and joy, I was healed.

I would also say that it had been necessary for me to wear glasses for a few years up to this time, but before the trouble had disappeared, for which I had particularly sought help in Science, I found to my great surprise that my eyes were perfectly healed, my glasses proving to be a hindrance rather than a help. I can say further, that since coming into Science my general health has been better than ever before.

For all these blessings and the many other benefits which I have received, I wish to express my gratitude to God, also to our Leader and to all who have helped me, through their understanding of Truth.—E. Q., Brooklyn, N. Y.

It is now nearly nine years since Christian Science was brought to me. For five and a half years previous I had been a complete nervous wreck, filled with fear and despair.

I was unable to sleep without the use of opiates, and ate but little beside health foods. I was afraid to die and without courage to live. The God that from childhood I had been taught to fear, seemed so remote that I was not able to reach Him. Such was my condition when a loving friend brought this message of Truth to me. It was my last resort and I accepted it.

With the first treatment I was entirely healed of insomnia, and in a short time was able to eat anything I wished. One by one all the ills of the flesh disappeared until to-day I am "every whit whole." Not only for the physical healing am I thankful, but for the spiritual understanding whereby I know that my God is not a far-away God, but is ever-present divine Love.

Agnes M. Hoyt, Jamestown, N. Y.

A few weeks ago I attempted to catch one of our horses which had escaped from the stable, and just as I was about to take her by the forelock, she turned and kicked me high above the knee, throwing me some distance with great violence. I had a clear sense of the ever-presence of God, and arose at once. The limb swelled and the flesh turned black the size of a large saucer. The swelling was nearly gone in a few hours and I felt no soreness in walking, but there seemed to be a claim of internal injury with attending hemorrhages, which became so serious I had to remain in bed. I called for a practitioner and the whole trouble disappeared in five days' treatment.

We read in the June, 1902, Message of our Leader to the Mother Church, "A danger besets thy path?—a spiritual behest, in reversion, awaits you." This was proven to me by the new light that came to my consciousness through the power of divine Love.

Mrs. Lura A. Hollis, Braintree, Mass.

Christian Science healing was brought to my notice after years of invalidism. Members of my family have become interested in this truth and greatly benefited thereby. I was induced to try it for neuralgic headache, which seemed to be a dominant condition with only brief intervals of freedom.

I was treated four weeks, and it is now more than a year since I have had a return of the disease. During the first few months after the treatment one or two slight suggestions of the old symptoms were immediately met and overcome. To-day I rejoice in being able to attend to business, and life has a new outlook. I gladly and gratefully bear witness to what Christian Science has done for me. I have its textbook, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, and expect progress in the line of its teachings.—George Parsons, Gloucester, Mass.

I was sick for over two years and was given up to die by those in charge at the State Institute. I had what they called bone cancer, and suffered with sick headache brought on by indigestion. I also had catarrh, for which I had been doctored many years.

I heard of Christian Science and commenced treatment at once. In less than two weeks I was entirely free and could truly "run, and not be weary," "walk, and not faint." My disposition was also changed, and I learned to turn away from many of those things which before seemed pleasing to me. For this I give God all glory. I am very thankful to all those who have helped me on in the understanding of Life, also to my teacher who has made many things clear to me, which have since been very helpful.

C. H. Lyon, Puyallup, Wash.

From our Exchanges.

It is not, on the face of it, easy to understand why a gross and notorious sinner should be nearer to God's kingdom of grace than the intelligent and cultured transgressor whose outward life conforms to the standards of decorum. But to some chief priests of his time, the very teachers and religious leaders of the people, Christ said, "The publicans and the harlots go into the kingdom of God before you;" and then he went on to reason the case with them. The most notorious sinners repented at the preaching of John the Baptist, and believed his message; but the chief priests believed not, either before or afterward, and hence rejected the divine overtures that came to them.

The vile man, who lives, so to speak, in the gutter, can be easily reached by the appeals of the Gospel. What he is, is known to all men. He conceals nothing, denies nothing, and often he does not pretend to justify his manner of living as to speech or conduct. The self-righteous man, on the other hand, is an adept in self-justification. He is ready to condemn the notorious evil-livers, and just as ready to insist upon his own morality, while the professors of Christianity are probably accused of hypocrisy.—*The Examiner.*

Very much has been said and written in the past thirty years about a "new theology." There has been a large demand for a restatement of the cardinal doctrines of our holy religion, the allegation being that the statements made by the fathers need revision to keep pace with the advanced thought of this progressive age. I do not care to enter into the merits of this discussion, but there are some thoughts that always flit through my mind whenever I read or hear of this demand for a revision of our theological statements.

And, first of all, it is conceded that if by *theology* we simply mean a systematic statement of human *theories* concerning divine *facts*, then it follows that each teacher, if he be worthy of his position, will make his own theology, and in some sense it will be new in each individual case. But if by a new theology it is meant that there has been any essential change of the facts, then I beg leave to interpose a demurrer

REV. C. W. BROOKS.
The Examiner.

All the other works that can be accomplished by a Christian church are utterly trivial and secondary compared with the work of being the instrumentality for a deep and vital change in the hearts of men. That is the supreme thing that the churches should pray for and work for. When men ask with a sneer what is the church doing, there is no answer quite so conclusive as to point to a selfish and perhaps a scoffing and rebellious spirit transformed by the grace of God into a reverent and adoring disciple of Christ.

The Watchman.

I do say that if you are to succeed in the ministry you must believe that God is in His world, comforting, strengthening, guiding, forgiving, cleansing, inspiring, and uplifting man, and working out through all the turmoil and confusion of life a kingdom of God which is righteousness, and peace, and joy in holiness of spirit.

L. A.
The Outlook.

The real question with every man is not, "What could I do under different conditions?" but "What can I do under these conditions?" The task of the thinking man is not to evade difficulties by creating an ideal world, but to find a divine order in this actual world.—*The Outlook.*

Every day should be sacred. There should be no break between Sabbaths. The cable of divine motive should stretch through seven days, touching with its sanctifying power every hour of every day.—*The Watchman.*

THE CHRISTIAN SCIENCE TEXT-BOOK.—Science and Health with Key to the Scriptures with latest revisions and additions, and numbered lines. 700 pages.

For description, price, and other information, see last page of cover.

THE NEW CONCORDANCE.—A complete Concordance to Science and Health with Key to the Scriptures. This work has been compiled from the late revised edition of SCIENCE AND HEALTH, and contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10x7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

CHURCH MANUAL.—Containing the By-Laws of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. This does not include the list of members. Price, prepaid, $1 per copy; $5 per half dozen; $9 per dozen.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America.

It contains about thirty-eight pages of reading matter, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

German Supplements

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. The Christianity of Christ. By Rev. IRVING C. TOMLINSON.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

The Supreme Court of the United States handed down an opinion last week in the case of the Northern Securities Company in favor of the Government. Justices Harlan, Brown, Brewer, McKenna, and Day rendered the decision for the Government, while Chief Justice Fuller and Justices White, Peckham, and Holmes dissented. The opinion was read by Justice Harlan. He declares in his opinion, that Congress has complete power to control inter-state commerce; that the Sherman Anti-Trust Law is constitutional; that this law forbids all combinations in restraint of trade or commerce; that the union of the two great parallel transcontinental lines operating in the same territory is a manifest curtailing of competition and is in restraint of trade. With the question of the economic wisdom of the law, Congress, not the Supreme Court, has to do. The opinion firmly establishes and confirms the right of the National Congress to control and regulate corporations.

Between seven hundred and one thousand miles of railroad is Secretary Taft's estimate of the needs of Luzon, made before the House Committee on Insular Affairs. The annual charge of four per cent on the cost of this would be only about one million dollars, which, he thinks, the islands could handle easily with the increased business that would result and the increased value of the property to be taxed.

Favorable reports were made from the Senate Committee on Foreign Relations on the following nominations: John Barrett, Minister to Panama; Arthur M. Beaupré, Minister to Argentine Republic; William W. Russell, Minister to Colombia; Nelson O'Shaughnessy, secretary of the Legation at Copenhagen, and Henry W. Schoemaker, secretary of the Legation at Lisbon.

Before the House Committee of Insular Affairs Secretary Taft advocates terms of ten years at least for American judges appointed to the Philippine bench because of the unfamiliar conditions presented and not covered by their home experience. The present salaries of $7,500 for the Chief Justice and $7,000 for the Associates he considered inadequate compensation.

The cruiser Buffalo and the torpedo boat flotilla arrived at Bombay on the 17th from Aden, a run of over sixteen hundred miles through the Arabian Sea. The fleet will next visit Colombo, Singapore, and Sandakan, and then proceed direct to Manila.

The Senate has passed a bill appropriating forty thousand dollars towards the erection of a memorial to the landing of the Pilgrims at Provincetown, Mass.

Foreign.

The Austrian Minister of Foreign Affairs is said to have authorized the publication of the following declarations which he made officially to the French, British, and Italian ambassadors: "The Russian and Austrian entente on the subject of Macedonia is firmer than ever. A perfect understanding exists on the subject of the modus vivendi in Macedonia, and of Turkey's application of the reforms proposed by the two Powers and accepted by the Sultan. Russia and Austria are determined to use all influence and even to resort to extreme measures to obtain the fulfilment of the Sultan's promises. They insist that full powers shall be accorded the heads of the international gendarmerie. The rumors that Austria is mobilizing troops are wholly unfounded."

The Assembly of the Republic of Panama has passed a resolution authorizing the sale or charter of the two Government gunboats, since they are now considered unnecessary; has fixed the salary of the President at $1,500 and $6,000 for entertainments; and the size of the standing army, including officers, at 250.

It is rumored that Colombia has given up the idea of invading Panama. Public opinion in many parts of the republic favors the recognition of Panama.

Lord Curzon of Kedleston, the viceroy of India, is expected to sail from Bombay, homeward bound on a holiday trip, April 3.

The city of Havana is to contract a loan of twenty-eight million dollars for paving and sewering the city.

Industrial and Commercial.

The commissioner appointed by President Roosevelt to carry out the recommendations of the second international American conference, held in Mexico, two years ago, with regard to the Pan-American railway, has submitted his report to the State Department by which it will be transmitted to Congress. The second conference created a permanent committee with headquarters in Washington, of which former Senator H. G. Davis of West Virginia is chairman, and Andrew Carnegie is a member. The other members are the ambassador from Mexico and the ministers from Peru and Guatemala. Commissioner Pepper spent a year in visiting the various countries, and his inquiries covered the general subject of trade opportunities that would result from railroad building, as well as actual railway construction.

The report says that the general project of an inter-continental line, which ultimately will place New York and Buenos Ayres in through railroad communication, is receiving much encouragement. At the present time about forty-eight hundred miles are lacking, and the estimated cost of construction is placed at one hundred and fifty million dollars.

The value of the domestic exports of the United States last year was $1,392,231,000, a total larger than that of any other country. The United Kingdom shows a total for domestic exports of $1,379,283,000; Germany, $1,113,313,000; France, $820,671,000; The Netherlands, $732,975,000. In imports the United States stands third, the United Kingdom first, Germany second, The Netherlands fourth, and France fifth.

Of the foreign commerce of the United States 72 per cent, $1,029,256,000 was to Europe; fifteen per cent, $215,483,000, was to North America; to South America, $41,138,000; to Asia, $58,359,000; to Oceanica, $37,468,000; to Africa, $38,437,000. The largest total export to any one country was to the United Kingdom, followed in order by Germany and Canada.

The first regular train on the Shan-Tung railroad, built under German auspices, arrived at Si-Nan-Fu from Sin-Tao on the 15th, having covered the distance, 252 miles, in fourteen hours. The train was decorated with Chinese and German flags.

Great progress has been made commercially in Korea during the past quarter century under Japanese influence. The total commerce in 1902 was about $17,000,000. The imports at the port of Chemulpo alone amounted to $1,250,000.

It is predicted for the Georgia peach crop this year that it will be the largest and finest ever grown.

General.

The offer of Andrew Carnegie to provide funds for a union engineering building as a home for the American Society of Mechanical Engineers, American Institute of Mining Engineers, American Institute of Electrical Engineers, and the Engineers' Club of New York, has been accepted. Mr. Carnegie has placed at the disposal of the three national engineering societies and the club the sum of $1,500,000 for that purpose. The recipients have provided a site on West Thirty-ninth and Fortieth Streets, between Fifth and Sixth Avenues, on which the erection of a building probably twelve stories in height, will be begun July 1. The three national societies will have their headquarters in it and several kindred organizations have made requests for accommodations therein. It will contain four or five auditoriums of different sizes.

In minerals, Russia is one of the richest nations in the world. Her mines are still largely undeveloped, although they contain large quantities of gold, silver, iron, copper, platinum, zinc, salt, and coal. Iron and coal are found together in Poland and the Donetz coal basin. There are also iron mines near Moscow, in Finland, and in the Ural Mountains. Pig iron is produced to the amount of 3,000,000 tons a year. In 1899 the production of steel amounted to 1,318,000 tons. The coal in European Russia is laid in horizontal strata that are hard to work, and although the mines produced 12,000,000 tons in 1899 Russia is compelled to buy coal from her neighbors. Gold is found chiefly in Siberia.

India is a startlingly illiterate country. Out of a total of 140,496,135 women only 543,495 are able to read and write, and only 197,662 are under instruction. The total number of illiterates recorded is 246,546,176, leaving 47,814,180 of both sexes unaccounted for, but of these only 12,097,530 are returned as able to read and write. Only 3,195,220 are under instruction.

The largest searchlight in the world has just been completed and tested at an electric plant in Schenectady, N. Y. The machine weighs seven thousand pounds, is of 5,250,000 candle power, and projects a beam of light seven feet in diameter. It is said it will be used for advertising purposes at the Louisiana Purchase Exposition.

It was only two years ago that Japan's first university for women was founded. It began with but a few students, but it already numbers over eight hundred students. Women from all parts of the country, both married and unmarried, and varying in ages from twelve to thirty-five years, are there matriculated.

Grimsby, Great Britain, is said to be the biggest fishing port in the world. Over one hundred and sixty thousand tons of fish were brought in to its wharves last year.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

From our Contributors.

Steadfastness and Strength.

WILLIAM B. TURNER.

In our eagerness for spiritual attainments, let us take heed that we do not fall into the error of thinking that we can lift ourselves unaided, or in any way force our growth.

Mortals, as mortals, do not hold the initiative in their process of salvation. Our Leader has said, "Meekness, moderating human desire, inspires wisdom and procures divine power" (Miscellaneous Writings, p. 360), the power of the Christ; and that "through this redemptive Christ, Truth, we are healed and saved, and that not of ourselves, it is the gift of God" (Message to the Mother Church, 1901). Patience, temperance, and perseverance are necessary to reach the goal. "He that believeth shall not make haste," says Isaiah; and we can remember that we abate no whit of true earnestness in our endeavor to do away with the restless anxiety and over-seriousness which so frequently pass for spiritual advancement, and which never help but invariably hinder.

"The best spiritual type of Christly method for uplifting human thought and imparting divine Truth, is stationary power, stillness, and strength" (Retrospection and Introspection, p. 117).

Jesus, imbued with the Spirit, and "without measure," left to earth an example of the "way;" and this example will unfold with time, until time shall have melted into eternity; but "no advancing modes of human mind made Jesus; rather was it their subjugation, and the pure heart that sees God" (Miscellaneous Writings, p. 361). It is the Christ who lifts us spiritward; that consciousness which knows within itself the true and right idea of all things and all relations, as they harmoniously and eternally are; and, knowing, rejoices in measureless love at the forever understanding that all these things are good.

In proportion as the wondrous fact is grasped of men, that this consciousness is ours; that though ever greater, it is ever one with all that identifies us with the good and the true, we shall be found manifesting the "likeness" which declares us sons of God.

This is the revelation to individual consciousness of Immanuel, which revelation discloses and demonstrates through man, the ever-presence and activity of the Christ.

Some measure of this grace is each moment unfolding to those who look for it. It is coming to you,—to me; and the measure of the moment is sufficient for the moment's need. They already know this who "look up" and "believe."

Do we ask how it is that we shall know it when the saving Christ draws nigh? We shall know it through the heraldry of thought; through thoughts which are faith-filled, trusting, and true, through thoughts which are holy, selfless, and pure; thoughts of forgiveness, of gratitude, love; of fortitude, patience, courage, and strength,—these are the heralds of his coming; for through these angels of the advent sounds his voice: "'Lo! I am with you alway,'—watch and pray" (Miscellaneous Writings, p. 389).

We listen and begin to understand. Paul understood. He learned through prayer, obedience, and experience, that the only way to spiritual health, holiness, and heaven lies in "casting down imaginations, and every high thing that exalteth itself against the knowledge of God, and bringing into captivity every thought to the obedience of Christ."

Christian Science is teaching us how to walk this Christ-way; and our heritage from God, through which we are enabled to triumph in every earthly experience, is gradually being unfolded.

No need to be fearful, no need to peer furtively into the future or look askance at the present. Through abiding in Christ-like attitudes of thought, with confidence that this will bring us through, we shall find our strength, and the secret of the wondrous works of primitive Christianity.

Do evil suggestions appeal to our hearts at times? They are illusions, not true thoughts. Having no warranty from God, they are idle, self-begotten threats of a suppositional opposite, all possibility of which, omnipotence excludes. Through every change of circumstances we shall do well to hold to the fact that there is no real power outside of good, and trust to this implicitly. Before the embodiment of good in consciousness all evil suppositions must give way; and the privilege and opportunity of proving this in a demonstrable and scientific manner have fallen to our lot. Evil suggestions carry with them the elements of their own dissolution, in thought and action. They have no proper identity; for, as has been said, they come not forth from God, and every falsity, following the inevitable law of error, becomes self-destroyed. We may give ear, then, to that devout disciple of the seventeenth century, Francois Fénelon, when he says, "Fear nothing but to fail God, and fear not even that so far as to be distressed about it;" for this would tend to rob us of that peace and assurance with which the Word of Truth would first invest us, that through such ministry we may be prepared to listen to what further unfoldments God may have for us.

Good thoughts, if sought and cherished, will flow naturally into our hearts and minds, and, if discerned and apprehended, even in a small degree, in their scientific import, and Christianly put into operation, they become spiritual impartations from divine intelligence, bearing with them strength and clearness of vision. Each one of them, if watched and watered in the garden of the soul, will outlive and live down a multitude of mischievous propensities which, like brambles, would choke the good vines of our spiritual endeavor.

Let us make ready, in this way, "good ground" in our consciousness, to the implanting of pure ideals and noble aspirations. In such seeding lies redemption at the harvest time.

Through all life's changes, comes the call, "Abide in Me," and if willing to heed this call, and to follow in the way of his appointing, which way the Bible and Science and Health is ever making clearer to us, we shall more and more fully apprehend, and learn to utilize, the invaluable lessons which come to us through our human experiences, in every deep and conscientious effort to put into daily, hourly application

the gleanings of such study; and God will unfailingly bless our effort with fulfilment of His promise. This doing, "Now is the day of salvation," and yet in our flesh we shall constantly see more of good.

The Wilderness of Belief.

HARRIET L. SLINEY.

ONE of the story books of my childhood contained an allegory which was very interesting to me. It ran as follows:—

Bordering one side of a prosperous village was a dense wood which the village people for generations had been taught to fear and shun.

No one who entered this wood was ever seen or heard from again, and companies who sought to follow lost companions and solve its mystery never penetrated more than a short distance. They always came back affrighted, and gave up the search.

Thus it came about that a rich forest of trees, and access to beautiful adjacent country was shut off for years from the surrounding inhabitants.

In course of time, a young farmer took up his residence on the farther side of this wood, and in order to reach the village he must needs pass through it. At first the prospect did not alarm him; but as the time approached when he must take his products to the village, the stories that he had heard about this place began to throng his memory and he shrank from the journey. However, there was no alternative, and summoning all his courage, early one morning he started. He arrived at the village safely, and having made the trip once, he made it again and again.

When the villagers became aware that he had passed through the wood unharmed, they were amazed, and began to inquire into the secret of his escape.

He told them that shortly after he entered the wood he was terrified by dreadful scenes and sounds, but not daring to look to right or left, he kept his gaze straight ahead, and began to repeat passages of Scripture. By unwaveringly holding to this course he reached the village in safety.

When reading this story, I used to wonder how it was that such a simple thing as repeating verses of Scripture could preserve a man's life, but in later years it has become clear to me as I have come to understand God,—good,—to be real, positive, ever-present, all-power; and evil,—devil,—to be unreal, negative, nowhere, nothing; and this demonstrable truth is illustrated in the above story.

"Thoughts are things," and contradictory thoughts cannot occupy the same consciousness at the same time. The spiritual is always dominant over the material; the positive over the negative. Our beloved Leader teaches us that, "good thoughts are an impervious armor" (*Christian Science Sentinel*, February 8, 1899), and the understanding of this, enables one to banish from the body the disease that would consume it, since every thought has a corresponding manifestation and disease is but "an image of thought externalized" (Science and Health, p. 411). Having the God-given power to control our thought, we may thereby control our bodies harmoniously. Thoughts of health and thoughts of sickness do not dwell together. When one appears the other disappears; and if we experience disease it is evident that we have not yet succeeded in holding our thought firmly and constantly to good. "Seeking is not sufficient. It is striving which enables us to enter" (Science and Health, p. 10). Paul said, "Let us not be weary in well-doing: for in due season we shall reap, if we faint not."

We should still be struggling hopelessly against pain, disease, and other mortal limitations, knowing next to nothing of the spiritual universe lying all about us and within our reach, all its limitless possibilities spreading fair before our gaze, were it not for the laborious search and unselfish toil of the God-inspired woman who gave us the "Key" which unlocks the Scriptures and thus makes plain and safe the path which leads to man's rich heritage, his dominion over all the earth.

Our Reasonable Service.

ALLEN L. CLARK.

IF, to use the words of the Psalmist, we are dwelling "in the secret place of the most High," and are not merely resorting to it when the occasion seems to require, then we shall experience that peaceful sense of abiding "under the shadow of the Almighty."

Jesus said, in the Sermon on the Mount, "But thou, when thou prayest, enter into thy closet, and when thou hast shut thy door, pray to thy Father which is in secret; and thy Father which seeth in secret shall reward thee openly," and we read in Science and Health, "The habitual struggle to be always good, is unceasing prayer" (page 4).

This, "unceasing prayer," this constant dwelling "in the secret place of the most High," is the reasonable service which we, as followers of Truth, are expected to give. And for this perpetual service we have a beautiful promise given in the fifteenth chapter of John's gospel, "If ye abide in me, and my words abide in you, ye shall ask what ye will, and it shall be done unto you."

Were we to struggle habitually to be good we would not be asking ourselves, "How shall I know when God is leading?" for we should come naturally and instinctively to recognize that leading and no other. How apt are these words of Henry Drummond, "Probably the most of the difficulties of trying to live the Christian life arise from attempting to half live it."

Our Literature.

M. A. O.

I WONDER if we realize the amount of good that may be done in the loving distribution of our literature. The following extract from a letter just received, may give to some of our travelers a new thought of sowing the seed by all waters and remind them that "God giveth the increase," and that His word never returns void.

"I had to go down the railroad about four miles to do some work the other day and walked back, and on the way I sat down by the side of the Sacramento River to rest and to watch the fish. While sitting there the train passed by, and a lady threw out of the car window the July number of *The Christian Science Journal*, and what a blessing it was to me. I sat there until I had read it almost through before I started on.

"On the first page was the poem, 'Upward,' written by our Leader, Mrs. Eddy, which I learned by heart. This gave me new life, for it was the first *Journal* I had seen for months. I will try to live up to our teaching for I know that it is all love."

I am sure the lady whose love to God prompted her to give a *Journal* to a weary brother will be glad to know the good it accomplished. Through the study of Science and Health this brother was healed from a diseased ankle bone, which kept him in the hospital much of the time, and overcame the desire for tobacco. About two years ago he gained his freedom from a life sentence in a penitentiary. He had been studying Science and Health about three years before his release. Since then he has been trying to provide a home and maintenance for his family. Being alone at this time and away from friends the closing words of our

Digitized by Google

Leader's poem came like a shower of blessings to a thirsty land, giving indeed new life and vigor.

My course like the eagle's, O still be it high!
Celestial the breezes that waft o'er its sky,—
God's eye is upon me, I am not alone
When onward, and upward, and heavenward prone.

Christian Science Journal, July, 1903.

A Clearer Light.

W. DAVIDSON.

WE cannot but feel what a difference the study of Christian Science has made in the appreciation of the Bible. Formerly, it seemed an extraordinary collection of more or less beautiful stories, told in dignified and beautiful language, but it seemed to be of no practical value for the present time. Now we regard it in quite a different light. Christian Science shows it to be a very mine of wealth to mankind, as regards health and morals.

The teachings of the greatest helper humanity has ever had, have been made clear to this age by the Discoverer and Leader of Christian Science, whose revelation of truth in Science and Health has made it possible to understand the two commandments, to love God and to love one's neighbor, and to turn our understanding of these commandments to practical account in the destruction of all evil, sin, disease, and even death itself, till man shall emerge from the hypnotic dream of material existence, and eventually find himself in the image and likeness of God.

It seems as if the way in which Christian Science helps us may be summed up in a paragraph of the spiritual interpretation of the Lord's Prayer: "Infinite Love is reflected in love" (Science and Health, p. 17); or in other words, as we do good, we shall receive the help of good.

The beautiful words of the prophecy of Isaiah, 9 : 6, which heralded the advent of the Messiah, seem applicable to the appearing of the Christ-idea in Christian Science. Without doubt it is wonderful, and it is counsellor, all the time. It reveals to us the mighty God,—good. It makes us understand the nature of the everlasting Father,—Spirit,—and it brings within measurable distance the reign of the Prince of Peace,—the reign of divine Love.

Consecration.

CHARLES J. PRENTISS.

WHEN speaking to the students gathered at her home at Pleasant View in June last, our Leader said, "Trust in Truth, and have no other trusts." There has not been a day since I heard those words from the one who knows whereof she speaks, that they have not been pondered, and their import grows greater as time passes. There comes constantly to the worker a temptation to try some other way than this, and if one is not watchful, he will be working from the standpoint of the "natural" or mortal man, which will result in confusion and final despair. With what joy can one turn to infinite Mind with "the assurance which comes of understanding" (Science and Health, p. 223), and say, "He shall bring it to pass," and in turning to this source of supply, we find that which is needful, and see again the wisdom of having no other trusts.

Since that day at Pleasant View I have consecrated myself anew to trust in the Lord with all my strength, and lean not unto mine own understanding. A short time ago when at a business meeting, there seemed some anxiety about the welfare of the business. Then the thought came, Your Saviour is Truth, "Trust in Truth, and have no other trusts." I mentioned to the other students that we were given a way to meet every condition scientifically, and should have no other way. The condition was met, and again I realized that "He shall bring it to pass: and He shall bring forth thy righteousness as the light, and thy judgment as the noonday."

As one who has indeed been led beside still waters and made to lie down in green pastures, who has felt something of what it means to love one's neighbor as one's self and to pray for one's enemy, to have an overflow of heart that desires my brother to share the same joy, I count myself most happy in that I am privileged to accept Mrs. Eddy's invitation "drink with me the living waters of the spirit of my life-purpose,—to impress humanity with the genuine recognition of practical, operative Christian Science" (Miscellaneous Writings, p. 207).

In thus doing, I find the Cause of Christian Science to be my Cause; its success, my success; its Leader, my Leader; the brotherhood of man to be my brotherhood; the law of Love to be my law, and the God through whom Christ Jesus overcame the world to be my God.

Could I ask for more than to know whom I have believed, and to see daily the answer to my prayer for understanding, which is given in the sick who are healed and the sinner redeemed? Surely I can do no better than to follow the way our Leader has pointed out, which is to "Trust in Truth, and have no other trusts."

True Government.

MARIAN W. HERING.

"THE Christianly scientific man reflects the divine law, thus becoming a law unto himself" (Science and Health, p. 458).

The above statement from the pen of our Leader sounds the keynote of true government, government not by one mortal over others, but of individual man by divine Principle in accordance with Christ's demand, "Deny thyself." The revelation of Truth promises infinite blessings "to him that overcometh," even that he "shall inherit all things."

As the strength of a nation or of any body of people resides in the character of its members, and the strength of individual character results from obedience to divine law, which is possible only through the overcoming of that mortal-self mind which is enmity to God, so true government is established among men through growth in Christian character and in no other way. God does not work through force, personal opinion or undue influence, and therefore these means are not to be commended. Their tendency is toward disintegration and weakness, rather than toward that unity and strength which is secured through individual freedom, patience, and brotherly love. These will enable us to work for the common good, to keep pace with our neighbors, neither crowding them nor falling behind, but walking in that charity which "suffereth long and is kind," and which is not "puffed up."

[Written for the *Sentinel*.]

The Daughter of Jairus.

EUGENIA BEATRICE MABURY.

WHAT means this radiance falling round,
And through the mist whence comes this sound:
"O maid! I say to thee, arise"?
Upon me gaze those grave, sweet eyes;
And though my thoughts a-flutter stray,
Thy truth-compelling voice obey
I must. O wondrous Man of God,
Whoe'er thou art, with mercy shod
And Love divine, thy glory now
I know. Sublimity thy brow
Encrowns, so mighty yet so meek!
Great life-renewer, to me speak!
Art come to call me from the dead,
Along Life's pathway to be led?
From out the shadows where I trod,
E'en so I come, O Son of God!

Selected Articles.

The Christian Basis of Unity.

"To-day the loving, laboring, praying ministers of the gospel are crying, "Back to primitive Christianity, back to Christ for Unity." This unity is possible, but it must be in the way of his appointing; that way is straight and narrow, but it is plain and simple when understood. Jesus said, "I am the way." He proved himself to be the way by "healing all manner of sickness and all manner of disease among the people." He said, "The works that I do, shall he do also."

Our union with God and each other, our atonement, must be wrought out through faith in His word by doing the works which he did, thus keeping his commandments and proving our faith by our works.

Let Christendom demand that they be taught how Jesus and his disciples healed the sick, and let the shepherds in Israel go to God in humble prayer, laying all their theology and beliefs at the feet of Christ, Truth, that they may be taught of God, how to obey the commands of the Master, perpetuating the kingdom of heaven on earth, by doing the works which he did.

If every one who calls himself a Christian, would strive to have the faith and love that heals the sick, then there would be no need of creeds or man-made doctrines, but Love, that is God, would fill every heart and life, and the only creed would be Love, and the commandments as summed up by the Master, love to God and man, would be the foundation that is laid, and that is to be the eternal Rock on which the whole world can and must unite, in order to work out in harmony and unity their eternal salvation, bringing the kingdom on earth in answer to Jesus' prayer, "Thy kingdom come. Thy will be done in earth, as it is in heaven."

EDWARD H. CARMAN.
The Christian Union.

It is truthfully said that if it were not for the omnipotent God back of all visible phenomena no results could be obtained through medicine, faith-cure, or Christian Science; but we would add that it is a demonstrable fact that the Divine Power can be reached more efficaciously when the human media are set aside. It is commendable that those who believe in the use of medicine should ask God to bless the medicine, but those of us who have undertaken the practice of Christian Science have proved that we may do still better by trusting God unreservedly. We are convinced that the success of our present prayers, as compared with that of our past petitions, is due to such implicit reliance upon the divine Mind, as excludes all material remedies.

It has been suggested that to turn one's back upon the material means and methods which have been so marvelously developed in recent years is to "turn one's back upon God." According to this logic one ought to affirm that in forsaking the time-honored remedies of the past we have turned our backs upon God, and that when in the future we shall have outgrown the material remedies which are now in vogue, and they shall have been replaced by better ones, we shall then be turning our backs still more directly upon God.

On the other hand, if it be proper to give up the imperfect medicines and practices for those which are better, perchance the forsaking of medicines altogether to depend upon God, as we have learned to do in Christian Science, may not, after all, be turning our backs upon God, but simply following the leadings of progress and turning our faces toward God.

Inasmuch as the use of medicine is largely experimental, however efficacious and many of the drugs now in vogue are likely to give place to others in the course of progress, on the ground that their use has been really a misuse, it is scarcely safe to assume that the employment of any of the material remedies now in our laboratories is in the Divine order; while it is always in the Divine order to trust God and regard Him as an ever-present help in trouble.

ALFRED FARLOW.
Pittsburg (Pa.) *Despatch.*

Mrs. Eddy teaches that for a man to be free is to be "guided rightly, and governed by his Maker, divine Truth and Love" (Science and Health, p. 106). All the mental work of true Christian Scientists is of necessity in this line and leaves one always free from any personal control and more under the guidance of the law and power of God, who always acts upon each individual directly, and not through the medium of another's personality. The office of a Christian Science practitioner is, as it were, that of a messenger to tell another of that which the other has not yet known; namely, of the infinite presence, power, and love of God governing all. It is as if one should bring to a man in the dense shade of a forest a message of the bright sunshine awaiting him outside. The Christian Scientist appeals from an unjust law, which would make him subject to evil in its myriad forms, to the law of God, which is a higher law and which sets him free,—it is an appeal, so to speak, from the lower court, wherein evil usually prevails over good, to the higher court, where good always prevails over evil. As the Apostle Paul said, "The law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death."

ABBOTT EDES SMITH.
Herman (Minn.) *Enterprise.*

The question is asked why Christian Science could not inoculate people, if it can cure them. The question is a most important one, and I wish I could give the widest publicity to the answer. It is a self-evident proposition in physics and in metaphysics, that the same fountain cannot send forth both sweet waters and bitter. If Christian Science heals, it is morally and logically impossible for it to make sick or kill. If Christian Science practice is the cause which results in an effect called health, that cause can never be expected to manifest itself in such an opposite effect as disease. If the mind that heals can also tear down and destroy, what protection has the human race from such an eccentric, unreliable, and altogether evil mixture. It is undeniably true that Christian Science is the gospel, the practical, daily ministry of good-will, and this peaceful practice can never be wickedly perverted, for the moment an individual seeks, mentally or otherwise, to revenge himself and cause suffering, he ceases to be a Christian Scientist.

WILLARD S. MATTOX.
Waterbury (Conn.) *American.*

The practice of Christian Science, is a form of pure Christianity, relying absolutely upon God, Spirit, as the source and basis of its healing, and upon the teaching and practice of Jesus Christ as the only guide for its achievements. Therefore, the medicine of Christian Science is spiritual and its practice Christian.

We have no record of Jesus studying pathology or anatomy, or of his disciples, save one, Luke, who was formerly a physician, but who subsequently gave up medicine to learn the practice of Christian healing under Jesus' teaching. Nor have we any account of Jesus having to diagnose any case physically; yet he healed every form of disease and sin, by the power of God, Spirit, and said to His followers, "The works that I do shall ye do," and "These signs shall follow them that believe."

JAMES A. LOGWOOD.

The Lectures.

Hamburgh, N. Y.

There was a large audience at Kopp's Opera House last Friday night [January 15] to listen to a lecture on "The Beneficial Effects of Christian Science" by Edward A. Kimball, C.S.D., of Chicago. A special train from Buffalo over the Erie Railroad brought about one hundred and sixty Scientists from Buffalo, Tonawanda, and Lockport. Others from Eden and adjoining towns, with the local members and other people of this village, greeted the speaker with a well-filled house.

The speaker was introduced by Mr. Perry M. Thorn of this village in appropriate and well-worded remarks.

Erie County Independent.

Minneapolis, Minn.

Several hundred people were unable to secure seats at the Metropolitan Opera House yesterday afternoon [February 21] on the occasion of a lecture on Christian Science by Bicknell Young of Chicago. The lecture was under the auspices of Third Church of Christ, Scientist. Rev. A. N. Alcott, pastor of All Souls' Universalist Church, introduced the lecturer, saying in part:—

I am not a Christian Scientist; I am a Universalist. A Universalist is an eclectic, or he could not be a Universalist. This means a spirit of hospitality to all earnest inquiry and a willingness to investigate and hear all sides of all questions of interest and importance.

In this broad spirit of hospitality to all seekers after truth, and in this spirit of willingness to hear and investigate all sides of all questions, I now have the honor and the pleasure of presenting to you our friend, Bicknell Young of Chicago, who will address you on the subject of Christian Science.

Minneapolis Journal.

Mobile, Ala.

Last night [January 26] at German Relief Hall there was a good-sized audience to hear Judge William G. Ewing of Chicago lecture on Christian Science. The judge was introduced by Mr. A. C. Harte in a few well-chosen remarks, and talked for about an hour and a half, during which time he received the undivided attention of his auditors and created a favorable impression.—*Mobile Item.*

The introductory remarks of A. C. Harte, secretary of the Y. M. C. A., were as follows:—

Ladies and Gentlemen:—One of the finest phrases ever used is the Anglo-Saxon phrase "fair play." In the physical realm men have learned the value of fair play and demand it. No man will permit the big dog to take the bone from the little dog, or the man with the strong arm, the meat from the man with the weaker arm. In the mental realm the rule does not yet hold. In fact, when men with strong minds outwit and overcome those with weaker minds or more limited opportunities, we call it shrewdness, business sagacity, ability, etc. But the spirit of the Galilean is among us, and more and more his followers are standing for mental as well as physical fair play, and whenever a body of men earnestly believe anything, the world is getting ready to be willing to hear them. Fair play now demands that every honest man be given an honest hearing. The only time when one can rightly refuse to listen in patience is when that patient listening results in injury to others.

The lecturer this evening has before him a most inspiring audience. There are here, first: many earnest friends, who wish him great success; second: many who are opposed to that which he advocates: third: the indifferent. No audience could be more inspiring than one thus made up. I therefore take pleasure in presenting to you Judge William G. Ewing, the lecturer of the evening.—*Correspondence.*

Schenectady, N. Y.

At the Van Curler Opera House yesterday afternoon [February 28] local people who are interested in the advance of Christian Science in this country listened to one of the lecturers on that subject. Prof. F. S. Hoffman of Union College introduced the Rev. A. R. Vosburgh, and said in part:—

The truth is that every man is born a worshiper. He must have a religion of some kind. The only option he has is in the selection of the kind to which he will devote his powers.

Another striking fact of history is that religion has always been the most potent single factor in the civilization of every race and individual.

In view of these considerations, we ought to welcome heartily any serious, thoughtful man who has a message to give us on this all-important theme. Such a man, I believe, we have with us to-day in Mr. Vosburgh. I am sure that you will give him your undivided attention, and that we shall all be greatly benefited and inspired by what he has to say to us.—*Schenectady Gazette.*

Salt Lake City, Utah.

A record-breaking lecture audience greeted Judge Septimus J. Hanna at the Salt Lake Theatre last night [February 7] to hear his address on Christian Science. The theatre was literally filled from pit to dome, and several hundred were turned away on account of the lack of room.

The lecturer was introduced by Rev. Elmer I. Goshen, pastor of the First Congregational Church, in an earnest plea for fairness. Mr. Goshen spoke as follows:—

The century that has just closed has been sung because of its achievements in the industrial and mechanical world, but I prophesy to-night that when the adequate history of the particular period in which we live shall be written, historians who will stand far enough removed to see things as they are with a perfect understanding, shall say that the epoch is characterized by a growing spirit of catholicity, truth, and breadth.

In the generations that have just preceded us, when men differed in opinion, they looked at each other with glittering eyes, and because they could not always see the great truth, faith, and light, they therefore sacrificed their dearest friendships, impugned motives, and maligned each others' characters. Let us thank God that the day is here when we can differ, when we can stand fair for things which we believe, when we can accord to our fellow-men that which we demand for ourselves,—the right to interpret truth as we understand it, and when we can look each other honestly in the eye and say, "May the blessing of God be over you, my brother."

It is a subject for congratulation that so large a company as this can gather, not for the discussion of mechanics, not for the discussion of things material, not for the consideration of the wealth of mines nor the treasures of the mountains, but for things that make for the exaltation of character, those things that stand for the ideal and the spiritual. I congratulate those who have the meeting in charge, and it is my pleasure to introduce to you Judge Hanna, who will speak to you upon the subject of Christian Science.

Salt Lake Tribune.

There is only one real failure in life possible, and that is not to be true to the best one knows.—FARRAR.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

General Association of Teachers in London, Eng.

Letter to Rev. Mary B. G. Eddy and her Reply.

WE are pleased to be permitted to publish the following loving letter received by our Leader from the members of the General Association of Teachers recently organized in London, also her inspiring reply.

LETTER TO MRS. EDDY.

London, 19 February, 1904.

Beloved Leader and Teacher:—We the undersigned members of the Teachers' Association in London do hereby wish to express our gratitude to you for the great privilege you have granted to us in establishing the Association of Teachers through the instrumentality of which we now are enabled to demonstrate greater unity of thought, and for the future the certainty of uniformity of action. We also wish to express our gratitude to you for emphasizing the fact that nothing can take the place of healing in Christian Science, and that this must be done quickly and wholly as you have told us in the new Manual.

We are also deeply grateful for, and rejoice in the spiritual perception reflected through your consciousness, realizing what it has done for all mankind in the past, and will do in the future.

We remain, Beloved Teacher in Truth and Love, your loyal and loving students,

MARJORIE COLLES, C.S.D. F. L. MILLER, C.S.B.
GERTRUDE DUNMORE, C.S.B. VICTORIA MURRAY, C.S.B.
DUNMORE, C.S.B. MILDRED MURRAY, C.S.B.
W. N. MILLER, C.S.B. E. BLANCHE WARD, C.S.B.

MRS. EDDY'S REPLY.

Earl of Dunmore and the Teachers' General Association, London, England.

Beloved Students:—Your letter and dottings are an oasis in my wilderness world, they point to verdant pastures, and are already rich rays from the eternal sunshine of Love lighting and leading humanity into paths of peace and holiness. Your "Thanksgiving Day," instituted in England on New Year's Day, was a step in advance—it expressed your thanks, and gave to the "happy new year" a higher hint. You are not roused to this action by the allurements of wealth, pride, or power; the impetus comes from above, it is moral, spiritual, divine. All hail to this higher hope that neither slumbers nor is stilled by the cold impulse of a lesser gain! It rejoices me to know you know that healing the sick, soothing sorrow, brightening this lower sphere with the ways and means of the higher, everlasting harmony—brings to light the perfect, original man and universe. What nobler achievement, what greater glory can nerve your endeavor? Press on, my heart and hope are with you.

"Thou art not here for ease or pain,
But manhood's glorious crown to gain."

Yours in Christ,

MARY B. G. EDDY.

Pleasant View, Concord, N. H., March 7, 1904.

"Believe that ye receive them."

MUCH has been said from the pulpits of the Christian churches within the past few years about the necessity for "a great religious revival," and there has been considerable speculation as to the manner and time of its coming, but the hope and expectation finding expression in this way has been quite indefinite both as to time and manner. To a careful observer, however, it must be manifest that this looked-for and hoped-for revival must include or be accompanied by greater faith in the efficacy of prayer. If prayer is not considered efficacious in all our affairs, there is little use in praying, because we must always be in doubt as to whether our prayers are within the scope of that which is a proper subject for prayer. If it were possible to conceive of a good gift which is beyond the power and inclination of our heavenly Father to bestow upon us, then would our prayers and preaching be vain indeed.

The attitude of a very large proportion of mankind upon the question of prayer is a most certain indication of the need of spiritual awakening, and to know what this attitude is we have but to turn to the columns of the daily press, not so much to read what is said by the types as to read what is said between the lines.

A case in point is that of the newspaper comment upon the fact that during the recent great fire in Baltimore, the Christian Scientists of that city prayed for the extinguishment of the fire and for the saving of life and property. Between the lines we can read that the comment has not been so much due to the fact that these people engaged in prayer, as that they expected their prayers to be answered, for we cannot conceive of any Christian people neglecting to pray, individually or as a body, when face to face with such a calamity.

Another recent case is that of a vessel which reached port after a very tempestuous voyage, and in the newspaper account of the hardships experienced by those on board, it was stated that during an unusually severe hurricane the crew abandoned their labors and engaged in prayer. The news item was flavored with the not uncommon thought which almost sneers at any belief in the efficacy of prayer in times of dire need, and the fact that the vessel had safely weathered the hurricane and was in port did not seem to mitigate in any degree the implied censure of the crew. In this case we read between the lines that the question of whether they prayed with understanding or without it was not at issue.

As these newspaper articles have aroused no protest, may we not be pardoned for supposing that they disclose the general thought about prayer and its efficacy when viewed from a material standpoint, notwithstanding the almost universal theoretical acceptance of prayer as a good thing and a great comfort "when not carried to extremes," a phrase which has been used by some of our critics when expressing a *quasi* approval of Christian Science.

Let those who are looking and longing for "a great religious revival" turn their gaze toward Christian Science, and they will find that it is already here.

Jesus taught his disciples, "What things soever ye desire, when ye pray, believe that ye receive them, and ye shall have them," and in so far as our prayers conform to this requirement we shall find that a "great religious revival" has taken place in our own hearts. M.

The Songs of Christian Science.

IT has been well said that only those of "a positive and unquestioning faith are moved to sing," and in keeping with this thought it is not surprising that the poetry of the last generation should be found almost barren of stirring and effective religious lyrics, since it was distinctly marked as an age of doubt.

Digitized by Google

With every great religious awakening, however, there has come a burst of inspiring song. This was peculiarly true of the Wesleyan movement, which sang its way into the hearts of the common people of two continents, and gave a new impulse of praise to the entire Christian world.

Christian Science is not lacking in this incidental evidence of the positiveness and joyousness of its faith. Strangers coming to our services are invariably impressed with the freedom and gladness of our songs, and find in them a proof of the wholesome and uplifting nature of "this new religion." They soon come to know, too, that the hymns which are most loved and most frequently sung by these people were written by the Leader of the movement, and they bear away with them not infrequently some healing line from "Shepherd, show me how to go," "Saw ye my Saviour?" "O'er waiting harpstrings of the Mind" or "Blest Christmas morn," which lingers with them as a lasting benediction. These winged messengers of Love and Truth are preaching the gospel throughout the world, and bringing to hungry hearts everywhere sweet remembrances of that Good Shepherd, that sinner's Friend, who stilled the waves of human discord and sorrow in days gone by. Into the homes and business haunts of the people these glad visitants are bringing joy, and strength, and healing, and heaven alone can compass the significance of their ministry of faith, and hope, and peace. W.

True Parentage.

TILL the time of Christ Jesus the world had but faintly recognized the divine Fatherhood, the prevailing conception of God being that of a ruler or a judge; but how different was his teaching on this vital question! He seldom spoke of God except by the tender name of Father, and when they were "slow of heart" to apprehend such a relationship he said, appealing to their human sense, "If ye then, being evil, know how to give good gifts unto your children: how much more shall your heavenly Father give the Holy Spirit to them that ask him?" On one occasion they mockingly said, "Where is thy Father?" and he replied, "If ye had known me, ye should have known my Father also." And what wonderful things he told them of the Father! of His mercy, His compassion, His bounty, His infinite provision for all their need. He told them also how they should draw near to Him, that they must enter into the closet and shut the door, that they must exclude all evil thought, that only as His likeness could they commune with Him,—all malice, hatred, and impurity banished from their thought. He told them that the Father was the source of all life, all truth, all love, and he gave them proof of His ever-presence in the overcoming of whatever denied the allness of divinity. He also said that when his personal ministry should cease, this all-wise, all-loving Father would send the Comforter—the Spirit of truth—to lead all men into the understanding of Truth and Love.

In accordance with this gracious promise, God is to-day understood in the light of Christian Science as nearer and dearer than any earthly parent, and the way is made clear whereby we may trace our relationship to "our Father-Mother God, all-harmonious" (Science and Health, p. 16). As God, Spirit, is neither sick nor sinful, His children cannot be,—they are perfect because their "Father which is in heaven is perfect."

There are many who miss the unspeakable joy of realizing the protecting love of our heavenly Father, because they do not see how He can care for "the whole family in heaven and earth." They are wont to think of earth's millions as separated from God, as independent toilers, but they should remember that even in human experience there are years in the life of every one, from birth to maturity, when the thought of the individual has little or nothing to do with his support, and yet he is most tenderly cared for by parental affection without thought or effort of his own. Should not this teach us that above and beyond our insufficient human sense is the eternal Mind, comprehending and supplying all our need,—the omnipresent "fatherhood and motherhood of Love"? (Science and Health, p. 519).

Many are now becoming deeply conscious of divine Love brooding o'er them and leading them step by step out of the darkness of material religion, out of hopeless sickness and sorrow into the sunlight of Science, wherein they will be able to say with the Elder Brother, Father, I *know* "that thou hearest me always." Our Leader says, "Only as we rise above all material sensuousness and sin, can we reach the heaven-born aspiration and spiritual consciousness which is indicated in the Lord's Prayer. . . . 'Our Father which art in heaven'" (Science and Health, p. 16). The beloved disciple says, "He that is born of God doth not commit sin," and we find the explanation of this statement in these words, "The divine children are born of law and order, and Truth knows only such" (Unity of Good, p. 28). K.

The Communion and Annual Meeting.

MANY inquiries regarding the Communion and Annual Meeting of the Mother Church are being received, therefore it seems best to announce to all that a general gathering such as has taken place in past years is not contemplated this year. When our church edifice is built, then you can better afford the cost of coming, and we can better accommodate you.

It is not intended that services shall be held in any place other than the Mother Church edifice, no preparation for the accommodation of visitors will be made, and the railroads have not been asked to give reduced rates.

Board of Lectureship.

John Freeman Linscott, C.S.D., has been elected a member of the Christian Science Boartd of Lectureship of The First Church of Christ, Scientist, in Boston, Mass. Mr. Linscott's address is Room 321 Bond Building, Washington, D. C.

Letters to our Leader.

[*Extract from Letter.*]

I thought you might like to hear about our "overflow meeting" at the Mother Church. Last evening there was a testimony that I thought would be especially interesting to you. A gentleman from Scotland said that many years ago he was offered a drink "to keep him warm," and from that time he had an appetite for liquor that he could not overcome. He came to this country hoping for relief, but it still pursued him continually. His bible was the *Boston Herald*, and one day he saw in its columns a reply by Alfred Farlow to an attack on Christian Science. He procured Science and Health and the result was the "depraved appetite" left him. He did not strive against it, but it simply ceased to be. He was also healed in like manner of rheumatism, with which he had been afflicted many years. At the close of his remarks he gave a beautiful tribute to the Discoverer and Founder of Christian Science. Others spoke of being healed through reading Science and Health and expressed gratitude and love.

I often wish you might be at these meetings and hear of the fruits of your incessant, loving labor of which the world has only a faint conception.

I am, as ever, your loving student,

E. E. WILLIAMS.

Chelsea, Mass., March Seventeenth.

Digitized by Google

Baltimore, Md., March 16, 1904.

Beloved Leader:—I thank you for those beautiful words in your letter to Mr. Moses. You have discerned what the sons and daughters of our fair South land hold most dear, but I want to tell you that we are learning a sweeter courtesy and kindness, and a truer nobility through your precious teachings. We are learning in humility that our honor cannot drop but the standard be raised higher through the recognition that to all belong the honor of Divine sonship.

We of the South who have seen the Truth in Christian Science, turn with grateful hearts to you on your watch-tower at the North, and know that the most glorious gift to the world to-day is the standard planted in our hearts by your hands. Lovingly yours,

LAURA TURNBULL.

Bradford, Pa., March 10, 1904.

My Dear Mrs. Eddy:—How I have longed, and do long, to see you, dear, the one to whom I owe so much, and how many times I have thought of writing you, but with the thought of writing would come the temptation "not to-day," and so I have put it off until now when it seems I must obey the call.

I think that of all you have written "My heart knew its Redeemer" has meant the most to me. The first time I read it, I felt an assurance that you really did know and that you were conscious of God's presence. I have read the article "Emergence into Light" over and over again, and each time I read it, it seems more beautiful. Now I see, not that God loved you more, but that you loved God more, because you have proven it to this sin-sick and sorrowful world by your faithfulness and by the fruits of your labor; by the love you have demonstrated to God and to all mankind. You saw and recognized the One Shepherd and One Fold, and through your obedience to God we are all blessed. The way has been made so plain that all are without an excuse if they do not go and do likewise. The blessings of your teaching have been more to me than I can ever tell, all I can do is to try to live it, and in that way prove that I do understand a little of this wonderful truth.

I have had some very beautiful demonstrations over sin and sickness, and do thank you from the very depths of my heart for Christian Science and its beautiful teachings. I have never placed my name in the *Journal*, as I felt I wanted to be sure I was worthy and could do my work in Science.

Yours with all the love I can express.

MRS. GERTRUDE B. BROWNE.

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

WE again remind our friends that the Editorial Department has nothing to do with the business affairs of the *Sentinel*, and that orders and remittances should be sent to The Christian Science Publishing Society, 250 Huntington Avenue, Boston, Mass.

Testimonies of Healing.

In grateful acknowledgment for the many blessings received through Christian Science, I would like to tell something of what it has done for me.

I would also like to relate a very encouraging experience I had the first time I gave my testimony in a meeting, which will show that we cannot tell what good we are withholding from others by not giving to them what we know is true, and has helped us.

Several years ago in our church in London, England, after many struggles, I got up to speak. I knew that I had been healed and could say so. I got up in fear and trembling and told of my healing, but have never been able to remember just what I said. To my great surprise, a lady came up to me after the meeting and asked me if I could lend her Science and Health,—the book I had spoken about. She said she was much interested in what I had said and would like to come and see me. She did so, and told me she was the wife of a physician. She had a few treatments and was healed after being pronounced incurable by her husband and other physicians, and after that she came quite frequently, bringing some others to be healed for whom the doctors could do nothing. I could tell of many beautiful demonstrations that came through that testimony given with such great timidity.

About a year after, a gentleman in the church said to me, "Your first testimony given here was just what I needed, and I cannot tell you how much it helped me." I have only spoken of this hoping it will encourage some who have never spoken.

When I first heard of Christian Science I was a great sufferer and turned to it really expecting nothing from it, for I did not then know what it meant. I was asked by a professional nurse who knew of my condition to try it. She said she was healed of dyspepsia in one treatment, after she had tried many doctors and gotten no relief. I said I would try it if she would write to a practitioner for me. She did so, and I commenced to take absent treatment, and studied Science and Health. I was very much surprised at the results.—I began to get better right away, and soon saw that I needed Christian Science not only for the healing, but for my every-day life. I took class instruction, and about a year after that I gave the whole of my time to the work. When I look back and remember the many obstacles that had to be overcome before I could do so, I know that nothing but divine Love could and did remove them.

I worked on, hoping each year to be able to attend the annual Communion at the Mother Church. A friend said to me, "God has provided all that is necessary for your growth in Christian Science, and error cannot keep it from you." That helped me until the demonstration was made. I was in Boston for the Communion and stayed there about four months. I feel, like all other English students who make this demonstration, abundantly repaid for the effort. I have had many helpful experiences during my stay in America which I know will be useful to me in my future work.

I feel deeply grateful to our Leader, Mrs. Eddy, for all she has done, and is still doing, to make our way in Christian Science easier.—ADA LAURENCE, Riverside, Cal.

After years of invalidism I have regained my health through Christian Science and am now able to do easily work which I have never before been able to accomplish.

From a child I had been ill a great deal and was never allowed to do any hard work, as an attempt was sure to be followed by weeks of illness. I was under the care of a physician much of the time, was given a great deal of medi-

Digitized by Google

cine, and could never attend school regularly on account of illness.

After teaching a little over a year my health failed completely. I had nervous prostration and for a year and a half was under treatment by different physicians. One of these was a specialist in New York who employed hypnotism as an aid to treatment.

At this time I took a position where I had the care of a number of children, but was unable to resume my work of teaching. In this work I was associated with two Christian Scientists. The life which they led was such a contrast to mine that I meditated much upon the cause of this difference. They were always well and happy and were able to do their own work and to assist me with mine. I was full of fear, morbid, and unhappy. Many days I was obliged to leave my work and go to my room and rest, as the symptoms of nervous prostration had returned.

I had been brought up in the church and was devoted to it. In this hour of need I turned to it more earnestly and tried by constant prayer to find peace and health. My prayers were answered for I was led to Christian Science.

For a long time I regarded this new religion with suspicion, indeed I felt so much prejudice against it that I would often leave the room when the subject was mentioned; but the example of my two good friends was constantly before me and I was forced to admit to myself that they had a practical religion the results of which were apparent every day, while my religion failed to help me.

One day I was very ill and in great pain. The medicine which I always carried with me brought no relief. By evening I was so much worse that it was said a physician must be sent for and I was asked which one I preferred. For some time I had been convinced that Christian Science was the truth, but pride had prevented me from admitting this, or that I had been wrong in opposing it. After a few moments of earnest prayer to be led aright, I asked them to send to a Christian Scientist for treatment. Upon receiving treatment every vestige of pain left me. I arose and dressed, feeling well and strong. This was fourteen years ago, and I have never taken medicine since. I left off my glasses and also recovered from a partial deafness. At one time I was very ill with fever and it was overcome in one day. At another time I had all the symptoms of consumption, which were overcome in two weeks. I have been able to resume teaching and to take up a course of study.

My family were so accustomed to think of me as not being well or strong that they could not believe that I had been healed and it was not until my strength and endurance were put to a severe test that they could admit that such a thing had taken place. I was called to take care of a relative who was ill and under a physician's care. The position was a very trying one, as I had charge of the medicine, of the household, and of various business matters besides. This was a kind of work to which I was entirely unaccustomed. Sometimes I was on duty day and night, but through the help of Christian Science I was able to do the work faithfully, and to the entire satisfaction of my family. Here was the weak member, the one who had been a burden to the others, who had been cared for, doctored, and protected, able to earn her own living and to care for those who had formerly nursed her. It was indeed a marvelous thing to them and they gratefully acknowledged that Christian Science healed me.

Through the teachings of Christian Science my life has been transformed from one of sickness, misery, sorrow, and disappointment, to one of health, happiness, and usefulness. Only by faithfully following its teachings can I in the least express my gratitude to our dear Leader, through whom the healing power of Truth has been revealed.

FRANCES G. FULLER, Herkimer, N. Y.

I am thankful for the great benefits derived from Christian Science. I was a victim to the drink habit, contracted when a youth. I was then living in Belfast, Ireland, and held a responsible position. Further advancement was given me in the promotion to a position in a branch office of the firm where I was employed. I left home when about twenty years old and got into fast company, and being away from a loving mother's restraint, I fell and lost my position. At this time the appetite had complete control. I thought by breaking away from former associates and starting life afresh I would overcome the temptation. I therefore concluded to come to New York, where I obtained positions time and again but lost them through this curse, and for fifteen years this was a periodical occurrence.

About two years ago I happened to meet a friend whom I had not seen for possibly five years, who enquired into my well-being and asked me the cause of my not being employed. I confided in him, when he told me the next time I felt tempted to come to see him, that he had something which would heal me permanently. I did not know anything of Christian Science at this time, nor that he was a Scientist. When in course of time I felt that I should again fall, I thought of this gentleman and concluded to call on him. I found him at home and told my trouble, when he immediately went with me to a practitioner who took up my case. I thank God that in two weeks' treatment I was perfectly healed. I am glad to state in connection with this that since I embraced Christian Science my whole life is changed,—I have a better home, for when Science found me I was out of employment; now I have a good position, have moved into a better house, and God, who is the source of all supply, has supplied my every need.

I am truly grateful for the gift of so many blessings, and as I study Science and Health I learn more of divine Love. I take pleasure in attending church and Wednesday evening testimonial meetings regularly and have met with very warm friends amongst the members of the church. I thank God and Christian Science for what I am to-day, and should this feeble testimony aid any one afflicted as I was, and be the cause of his applying for help in Science, I shall be thankful.—FRANK P. HUNTER, Wilmington, Del.

Thankfulness for what we have fits us to receive more As a result of the study of Mrs. Eddy's book, Science and Health, we look to God for our guidance, for help in time of seeming trouble, and to the one "Great Physician" in seeming sickness, and we never look in vain. If we believe that God healed all the cases that are spoken of in the Bible and yet do not believe He heals to-day, we do not believe the Bible, even though we say we do.

I feel the deepest gratitude and love to our Leader for bringing a knowledge of this saving truth to the present age, and I thank God that I was able to receive the message and not reject it. Through it I have been enabled to see God and His Christ in a new and more glorious light than ever before, and to see God's work as good, as He declared it to be when He had finished it.

I would like to tell of a demonstration of the power of Truth, which came to us recently. A little boy was playing about the house with his cousin: in moving a chair from one side of the room to the other he picked it up and raised it over his head, and as he did so the chair struck a heavy globe on a gas jet, knocking it off. It came down upon his bare head, striking him just over the forehead with much force.

From the other part of the house we heard the crash and at once declared that there were no accidents in the divine Mind. The lad came into the room with his handkerchief to his head, but he declared that he was not hurt, although the senses said that the handkerchief was soaked with blood. He was told to "cling steadfastly" to the thought that he

Digitized by Google

had not been harmed, and that he was free from any law of accidents. The voice of authority stilled impotent fear for all of us, for God was there and we realized this truth as never before. Very shortly the handkerchiefs were thrown aside, and the matted hair was the only evidence that there had been an accident. No more was said about it, but we knew, with the confidence which comes of many helpful experiences, that the work had been done.

The next morning the matted hair was washed, and not a trace, not a scar, not a mark of any kind, could be found by the lad, who was joyous beyond expression at this proof of the omnipotence of divine Love.

MAY ORANGE GLIDDEN, Malden, Mass.

[Translation.]

With a feeling of profound gratitude to divine Love who has led me to find the way of truth or Christian Science, I wish to relate some of the experiences which my dear family and I have had in Christian Science.

If I cast a glance into the past, it all seems like a chaotic dream. Sickness was our constant companion. My father suffered for years with stomach trouble and other diseases which manifested themselves, causing discord in our otherwise happy family life. It is impossible for me to name the amount of money which we spent for medicines without receiving any benefit therefrom. I myself had heart disease and therefore needed great care. Besides this I suffered at times great pain in my right foot which I had sprained when I was ten years of age.

We first heard of Christian Science through a friend of my mother, who spoke very convincingly of the healing power of Truth which had freed her from a severe liver and bladder disease.

We at first attended the meetings and then my father took treatment. I shall never forget the day when, moaning with pain and leaning upon my sister's arm, I entered the practitioner's room. After the treatment the pain had almost entirely disappeared, I walked home, and after several weeks' treatment was entirely healed. Shortly after that, my father was also healed. My mother was healed of a severe cough which troubled her every winter, and my sister was healed of rheumatism.

It is now a little over two years since we came to Science, and I can say that during this time I have used no material remedies and have enjoyed perfect health. Many beautiful demonstrations have brought me nearer to God. A life without Christian Science is now impossible to me. For this pure, beautiful teaching we express our unending gratitude to Mrs. Eddy and give the glory to God.

For the last proof of our ever-providing divine Love, expressed in the last number of our *Herold*, which contains the Bible Lessons in German, I here express my sincere gratitude.—FRIEDA CARL, Berlin, Germany.

For more than thirty years I suffered from chronic inflammation of the stomach, and neuralgia. I was unable to eat any solid food for many years. For one year I lived on milk curded with pepsin, and when that failed, I believed, as well as my friends, that I could live but a short time longer. The doctors said they could do nothing more for me. Then I was asked to try Christian Science, but I had no faith in it, for I supposed it would fail, as every other remedy had. I had no idea what it was, but I had been told that Christian Scientists were heartless, and that they did ridiculous things; still, as a last resort, I consented to try it to satisfy my husband, and I am sure that he was as skeptical as I, that I could get any help in that direction. When, however, a practitioner came to me she made it so clear that God did not make evil, and that He fills all space, that I lost all sense of sin and suffering, and found the God who is Love, and that healed me.

The next morning I ate pork steak for breakfast, without any bad effect from it but with a good deal of relish, and for eight years I have eaten whatever I want without harm from it. I have taken no medicine of any kind since I was healed. Previous to that I was a slave to medicine.

I thank God for this great truth that has been revealed to me through our Leader, and for the kind and loving patience that my practitioner has had in showing me the way.

I also thank God for the privilege of receiving class instruction, and for my teacher's faithfulness and patience in helping me over difficult places.

L. E. BURRELL, Brockton, Mass.

For twenty years I hardly knew a well day, I was miserable most of the time. Although I was able to be around and attend to some of my household duties, I was far from well. I doctored, and tried several kinds of patent medicines, but all to no avail. Three years ago I went to a physician, who told me I had the gout in both feet, and also congestion of the spine. I took his medicines and treatments for some time. At the same time a relative of mine became interested in Christian Science, and began attending the services. I went with her just for company's sake. I well remember how I carried my bottle of medicine with me to the church so that I might take it at the regular time. I became much interested in Christian Science and thought it a beautiful religion, but I was not willing to give up my material remedies.

The following spring I had a severe attack of the grip, which I had had regularly for five years. Then I decided to trust to Christian Science alone. I gave up the use of all medicines and read Science and Health, which this relative had given me. In a short time the grip was overcome. Gradually the other old ailments, for which I had doctored so long, disappeared. To-day I can say I am a well woman, able to do all my housework. I took no treatments but was healed by attending all the services and meetings, and reading Science and Health together with the periodicals. I thank God for this blessed truth which makes free indeed, and I am grateful to Mrs. Eddy for revealing it to us.

MRS. LIZZIE J. PAGE, Chicago, Ill.

I have had the help and protection of Christian Science for seventeen years. Neither the services of a physician nor medicine of any kind has been used in our family in that time where both were very frequent visitors in the years previous. It is about ten years since I became interested to look into Christian Science for myself, and it is stating the case mildly to say that I have been repaid a thousandfold for the time and thought I have given to it. Without giving way to self-condemnation I realize that if I had been more faithful in the application of this truth and used it more constantly, that the results would have been greater in proportion. I have been freed from many small physical annoyances, such as headaches, colds, fatigue, etc., and have grown generally more rugged under its influence. Even greater has been its value in a business way where it has increased my confidence in my rightful ability to perform the work put before me. It has largely destroyed a strong disposition to worry and a seemingly strong tendency toward spells of "the blues."

I thank Christian Science directly for my increasing prosperity as well as general happiness, and recommend it to any who seem to be lacking in either or both of these, as well as those in need of physical healing. I feel personally grateful to Mrs. Eddy for her faithful work in giving this great truth to the world, and to all the faithful workers who have helped to promote the growth of our Cause.—M. G. TRUMAN, Chicago, Ill.

Digitized by Google

About seven years ago my wife had a friend to visit us whom I had only met once, and that when she was about twelve years old. I had been in business prior to her coming, but I had fallen into the habit of drinking and had lost all, and it appeared that drink had gotten control of me; but while our friend was visiting us I had tried not to let her see me while I was intoxicated.

At last, however, I was down town one night, and was drinking. Our friend had been talking to me about Christian Science for several weeks, and I arose from where I was sitting in a saloon and started for home to ask for treatment. There was an electric light in front of our door that made it as light as day, and the Scientist and my wife were sitting on the porch as I came reeling in through the gate. I said that I had come home to ask for treatment for drunkenness. I told the Scientist that I did not want to drink, but it was beyond my control, and every effort to stop had proved a failure with me. She assured me that she would do all she could for me, and I am happy to say that from that moment to the present time I have not had the least desire to drink. I had also used tobacco for thirty-seven years, both chewing and smoking, and in a few days my appetite for this was all gone.

I feel sure that I owe my present existence to Christian Science. I feel that it was a Godsend to me and my family. I rejoice that Christian Science found me when it did.

P. A. MAYES, Pittsburg, Kan.

I never had heard of Christian Science until I went on business to the home of a student. She being anxious to spread this blessed truth spoke of her healing. I asked her if it was a faith-cure. She said, "It is the understanding of God which brings faith to us; it is Christian Science." She gave me two *Sentinels* to read. I took them home, and the first piece I read seemed to inspire the thought and give me a desire to know more about it. So I kept on reading, searching, and asking her questions. She told me to get Mrs. Eddy's book, "Science and Health with Key to the Scriptures," and that the understanding of this book would satisfy my desires and show me the way to the kingdom of heaven; so I got the book and can say that I have been healed of a tumor and other ills, and I have not taken a dose of medicine since I began to read our literature. Shortly after I got the book my daughter became interested in it, and was also healed of several ailments.

Three of us began the study of the Sunday Lessons, we being the only ones for some time, but through the healing of a woman of heart trouble others became interested and now we have a nice room where we hold our services.

If there is one thought that I am thankful for, it is the harmony and unity that exists here among the seekers after Truth. It has been a good work, and it would take pages to tell all that has been done, and the good work still goes on.—MALINDA LEWIS, Mechanicsburg, O.

When the Christian Scientists of North Carolina appeared a year ago before a joint meeting of the medical boards of the House and Senate of our legislature, for the purpose of discussing a bill to prohibit the practice of Christian Science in our state, one eminent physician stated that he knew it to be impossible for Christian Science to cure certain diseases which he mentioned. We were all filled with joy when we quickly ascertained that every one of these diseases had been destroyed either for or by the Christian Scientists present, even though we were only twenty-four in number, but God is never without a witness.

In the seven years since I first became interested in Christian Science through a very thorough and quick healing of lifelong ills, I have had abundant and blessed proof of the unchanging and omnipotent love of God as unfolded to us in Christian Science, and I can say in grateful humility, that I do most tenderly love and revere our beloved Leader, the one pure, unswerving, and consecrated life, through which this inspired revelation of Truth has come to our age, to lift the burdens from the heavy laden, to heal the sick, to quicken the spiritually dead, and to point the way to the source of all good—God, infinite divine Love.

ELIZABETH EARL JONES, Asheville, N. C.

During the last few months I have received Christian Science treatment for a structural injury which seemed to have been occasioned by a fall a year ago.

I had not a surgeon's diagnosis and so cannot give technical terms for the ailment, but my back began to trouble me and part of the spine was sore and swollen. The pain and soreness through the side, back, and ribs became for a while more and more intensified. It seemed as though there must be a misplacement of the ribs, for I could not bend from the waist. One hip grew out, and my arms, from the shoulders, were drawn backward. I walked with difficulty, being oftentimes thrown down by some misstep and unable to rise without assistance, and this was attended with great suffering. All of these different phases were overcome without any material remedies whatever.

To say that I am most grateful to Christian Science and its Leader expresses but poorly the sense of indebtedness of my family and friends as well as myself, for this proof of the Christ healing as again revealed to us through "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy.—CORA ELLEN MILLER, Gloucester, Mass.

I have seen testimonies from other little girls and boys, so I would like to tell of a demonstration I had one morning at school. We were having examinations, and they were very hard. The one in arithmetic was the hardest, and I could not do it. I stopped working and declared my understanding of Truth, that God is Love, and I His child, and that I could do the arithmetic. I commenced again and finished in a very short time. When the papers were examined and given back, I had the highest marks in the class.

I am very grateful to Mrs. Eddy for Christian Science. I am twelve years old, and have been a Christian Scientist all my life. I have had a number of good demonstrations, and like to read those given in the *Sentinel* and *Journal*.

HAZEL AUSTIN, Winnipeg, Man.

For months I suffered intensely from sciatic rheumatism, whether walking, sitting, or lying. I could not lie on my right side in bed, and I was obliged to give up my work as nurse. After ineffectually applying material remedies for months, I was treated in Christian Science, and within two weeks I was healed.

This proof of healing was such an assurance to me of the truth of Christian Science that I have since withdrawn from my former church, where healing of the sick is not practised, and have united with the Christian Science Church.—MRS. MARY E. WONSON, Gloucester, Mass.

[Written for the *Sentinel*.]

The Battle Call.

JANET T. COLMAN.

OUT to the front, ye tried and true warriors!
Out to the front at duty's loud call!
Out to the front, where the battle is raging!
Out to the front, to arouse one and all!

Up to the heights, with God-given courage!
Up to the heights when temptation seems strong!
Up to the heights, where divine Love is victor!
Up to the heights, where Truth rights all wrong!

From our Exchanges.

So it is with many excellent people; they are blind to higher ideals and are perfectly happy. "Better let well enough alone,"—this is exactly what our good habits are continually saying to us, making us feel, as Paul felt when he was a Pharisee, that we are already quite as good as we can be. We nestle down in our cosy corner of good habits and let these shut out the vision of something nobler, just as the little hills round about a pleasant country home may shut off the view of a great mountain, and the people nestling among those hills may think that nowhere in the world is there anything grander than those hills; and they never take the trouble to go beyond the little hills and climb the great mountain. So it is that our real virtues may be like those little hills, hiding from us something nobler and making us self-righteous.

And when we are blinded in this way by our good habits and cherish no generous aspiration, but are perfectly content to stay where we are and applaud ourselves for our virtues, what greater blessing can God send us in His infinite wisdom than to let us be suddenly tripped up by some cunning temptation, and thus have an experience of our moral weakness and know what it is to feel shame and repentance and a longing for a better life! Jesus saw far more to hope for in the publicans and sinners than in the respectable and self-righteous people of his day.

REV. CHARLES A. ALLEN.
The Christian Register.

When the Lord cometh, not at the end of the world in a chariot, upon the clouds, but like a thief in the night, upon the wings of his spirit, "two men shall be in the field: one is taken, and one is left; two women shall be grinding at the mill: one is taken and one is left." That is, when the spirit passes through the world, selecting those who are to be the servants of the Master and the citizens of his kingdom, two men or two women will be working side by side at some humble task. The voice that speaks of truth and love and devotion, above the din of the world or the noise of the grinding, shall find response in one and no echo in the other. The line of classification will not be between those who happen to be at the prayer meeting when he comes and those who are not. It will be between those who are children of the spirit and those who are not, wherever they may labor or rest or pray.—*The Universalist Leader.*

Any one who is leading a life on earth that embodies divine truth, is by such a life showing that truth, though no one beholds it, is like a lighted candle which shines whether seen or not. Spiritually, to show one's principles is simply to live them outwardly; that is, to have them wrought into the deeds of the body. To show how great things God has done unto us is to make that acknowledgment a practical thing in life, without reference to outer witnesses.

New-Church Messenger.

THE WEDDING SUPPER.—They heard the message, but they would not come. Some made light of it and went about their business quietly; others vented hate and cruelty upon the messengers. The outlook is still upon the Jewish world as Jesus found it. God was ready, men were unready—and for the spiritually unwilling then and now the kingdom of God waits, the opportunity passes by.

The Congregationalist.

The Church of God needs nothing so much as the baptism of the Holy Ghost. This Spirit is in the Church at all times, even when its members are cold and lukewarm. But His power is not always manifest.—*The Christian Advocate.*

THE CHRISTIAN SCIENCE TEXT-BOOK.—Science and Health with Key to the Scriptures with latest revisions and additions, and numbered lines. 700 pages.

For description, price, and other information, see last page of cover.

THE NEW CONCORDANCE.—A complete Concordance to Science and Health with Key to the Scriptures. This work has been compiled from the late revised edition of SCIENCE AND HEALTH, and contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10x7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

CHURCH MANUAL.—Containing the By-Laws of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. This does not include the list of members. Price, prepaid, $1 per copy; $5 per half dozen; $9 per dozen.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America.

It contains about thirty-eight pages of reading matter, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

Reprints from the Journal and Sentinel

THE TRUE LAW.
SERVICE AND STIPEND.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

It is reported that Secretary Taft contemplates a return to the Philippines in the near future. The trip to be taken will be of great importance to the Filipinos, as it will mark the first step toward self-government for the islands. The Philippine law provides that two years after the completion and publication of the census of the Philippines, in case a general and complete peace, with recognition of the authority of the United States, shall have continued in the territory outside of the Moro country, the President may direct a general election in the Philippines for the choice of delegates to a popular assembly of the people of the islands, which shall be known as the Philippine Assembly.

The Government of the Philippines will then be placed in charge of two houses, the Philippine Assembly, elected by the people, and the Philippine Commission, appointed by the President. The Legislature so constituted shall also choose two resident commissioners to the United States to look after Philippine interests. Before this election can take place, however, the President must be satisfied that a proper condition of peace has prevailed.

The Philippine census is now practically completed and will soon be ready for promulgation.

Two points have developed in connection with the Isthmian Commission. One is that the headquarters of the Commission probably will be on the Isthmus of Panama instead of in Washington; and the other, that part of the time of at least five of the Commissioners may be devoted to private interests. Admiral Walker, Chairman of the Commission, and General Davis, the army member of the body, will devote their entire time to the canal work. Legislation now pending before Congress provides for the appointment of a governor of the American zone in Panama. Should it be enacted into law, it is quite probable that General Davis may be designated as the governor of the canal strip, a position for which his Philippine experience would well qualify him.

The freedom of the city of Edinburgh was presented to Joseph Choate, the American ambassador, last week. The Lord Provost said the honor was conferred in recognition of the recipient's high personal qualities, his public gifts, and the services he had rendered in promoting the friendship that exists between the empire and the American republic.

The House Committee on Merchant Marine and Fisheries has authorized a favorable report on the Frye bill extending the coastwise laws of the United States to the Philippine Islands to July 1, 1905, without amendment.

Foreign.

The influx of settlers into Canada during the present year promises to break the record of the year 1903, when about one hundred and thirty-five thousand immigrants from all sources came to the Dominion to establish new homes. The immigrants who arrived last year were of a better class than those in any preceding year in the history of the country, and it is expected that those who will land in Canada this year will be as desirable settlers as those of 1903.

Professor Edward H. Strobel, general adviser to the Government of Siam, has arrived at Bangkok, Siam. Professor Strobel is Bemis professor of international law at Harvard and was formerly secretary of the United States legation at Madrid, United States Minister to Chile, third Assistant Secretary of State, United States Minister to Ecuador, and arbitrator in the Freraut claim between France and Chile. He is on leave of absence of two years from Harvard.

The State Department has received formal notice from the Chinese Government denouncing the Chinese exclusion treaty, and this convention will expire on December 27 next unless replaced by another treaty by that date. Had the notice not been served the treaty would have continued in force for another term of ten years.

The list of applications for the issue of $25,000,000 of 2½ per cent stock created under the Irish Land Act of 1903, the issue price of which is 88, has been closed. The loan was over-subscribed seven times and is quoted at one-quarter per cent premium.

The house in which Verdi, the composer, was born at Busseto, near Palma, is to be sold by public auction. The house is the property of the Marquis Pallavicino, who is now in reduced circumstances.

It is the opinion of the French Public Minister that Colombia has no case against the Canal Company and the liquidators of the old company.

A press despatch declares that it is believed at Paris that a triple alliance between Japan, China, and Korea has been formed.

Industrial and Commercial.

During the past month the *Manufacturers Record* has announced the formation of 87 financial institutions, either banks or trust companies, in the South and Southwest. Of this number 31 are national banks, the remaining 56 having State incorporation. In Texas alone sixteen were organized, fourteen of them being national banks. In Georgia there were ten and in Tennessee seven, none national, and in Missouri there were eight and Kentucky six organized, half the number in each State being national. Most of these new banks are institutions of small capital, designed to meet the demand for banking facilities resulting from the rapid development of the country.

The Automobile Club of the University of Pennsylvania, composed of many amateur chauffeurs of the city, has invented and constructed an automobile. The machine was made in the engineering laboratories of the University, and will soon be given a trial. Its construction has been conducted with great secrecy. Those who have been permitted to see the machine declare that it conforms in every way to the laymen's ideas of what an automobile should be.

As the result of the operations of the reciprocity treaty between the United States and Cuba, and the steady upward price of sugar, scarcely any of the sugar crop, it is said, will be held in the storehouses, as was formerly the rule, the planters shipping the entire output. A large proportion of the sales are for future delivery, and when the grinding season terminates, practically the entire yield will be marketed.

Goods valued at $9,000,235 were shipped to Alaska, exclusive of British Yukon consignments, during the year 1903, according to the annual report of the collector of customs at Seattle.

The South in 1880 had but 20,500 miles of railway. Now it has 55,000, which represents an increase of capital of $1,500,000,000.

General.

The archæological excavations made in the Island of Delos by the French School at Athens, are advancing so satisfactorily, says the *New York Tribune*, as to justify the prediction that the ancient commercial town of Delos will, after a few months' labor, become a Greek Pompeii. Already four ancient Greek houses have been discovered, together with their remarkable mural decorations, mosaics, statues, domestic implements, and relics of the daily life of well-to-do Greek families during the second century B.C., at the period when Delos was the central commercial mart of the Ægean. Hitherto the aspect of the ancient Greek dwelling house was known only by descriptions and allusions of authors, but owing to the brilliantly successful excavations made during the last twelvemonth, house after house has been brought to light under such favorable conditions as to enable its complete reconstruction with an accuracy of detail that has aroused the keenest interest in scientific circles in Paris.

Delos, according to the official report to the French Institute, is the only ancient Greek city that remains almost intact, having been protected by piles of granite and marble from the ravages of time and of pirates. The upper stories only of the houses have fallen, and the walls remain standing to a height of three or four metres. The streets, the sewers, and the gardens of the ancient city may all be distinctly traced. There are upward of a hundred ancient houses, varying from the sumptuous residences of the prosperous merchants to the modest huts of the workmen. The great warehouse in the southern part of the city has just been unearthed and is one of the finest specimens of architecture of the period.

Last June a well six metres deep was found filled with tablets of bronze and marble upon which were found twenty ancient inscriptions deemed of great value. A whole street along the ancient quays has been brought to light. Fronting upon this street and arranged with precision and taste are seven large houses of wealthy merchants, with spacious courtyards, superb windows, magnificent columns, and provided with a sewage canalization worthy of a modern up-to-date sanitary municipality. Ninety-two inscriptions have been discovered, and some of these are long and complete.

The Cunard Steamship Company has decided to adopt turbine engines for its new fast steamers, which will be built under agreement with the Government. Exhaustive tests ashore and afloat have been made which furnished a large amount of valuable information hitherto not acquired regarding the relative economy of the different types of engines.

It has been announced that hand or tourist cameras, not mounted on tripods, are to be allowed on the World's Fair grounds at St. Louis without charge, and unlimited snappings of buildings, exhibits, and persons will be permitted by the Exposition officials.

The railroad postal service costs the United States forty million dollars yearly.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

From our Contributors.

Legislation in Kentucky.

L. H. JONES.

THE Kentucky legislature which has been in session at Frankfort since the first of January has just adjourned. The physicians have been industriously at work most of the term, trying to get some additional protective legislation. After much contention among themselves they finally agreed on a bill which provides that, "Authority to practise medicine under this act shall be a certificate from the State Board of Health [constituted wholly of M.D.'s, except one osteopath]; and said board shall issue a certificate to any physician, who has passed a satisfactory examination before it, in the branches of medicine as taught in reputable medical colleges," etc. Section five provides, "Any other person applying for authority to treat the sick or injured, or in any way to discharge the duties usually performed by physicians, whether by medical, surgical, mechanical, or 'psychic' means, shall apply to the State Board of Health, who shall examine them as to their competency in such manner as they shall deem fair and best, but such examination shall always include anatomy, physiology, and pathology, and the term, 'practice of medicine,' as used in this act, shall be construed to be the treatment of any human ailment or infirmity by any method; but this act shall not include trained or other nurses, or persons selling proprietary medicines protected by patent, when not traveling as a troupe or troupes composed of two or more persons."

It might be difficult to explain why it should be thought more dangerous to the "public health" for a Christian Scientist, who does not administer drugs of any kind, to practise the healing art, than for a vendor of these nostrums, who may know nothing whatever of the nature either of the disease or of the remedy he recommends.

The wording of the bill was most subtle, and the thought had gone out everywhere that it did not apply to Christian Science, and this thought had infected even Christian Scientists, and when the real intent of the bill was discovered some of them said, "It is too late to do anything." Something was done, however, and that quickly. One of the Scientists went to the telephone, as soon as a copy of the bill could be seen, and asked the chairman of the Senate committee before whom the bill was pending for an opportunity to be heard, and received a flat refusal, the chairman saying it was absolutely impossible for his committee to hear anybody else on that bill. But next morning bright and early the Scientist was in Frankfort, and meeting the chairman on the street was finally granted fifteen minutes' time to make a statement for the Christian Scientists before the committee which was to meet that afternoon at three o'clock. Later the date for the hearing was changed, which gave time for notifying the Scientists at other points in the state. Knowing that the time to work most effectively against a bill is while it is pending before its committee, nothing was left undone to make the work at the hearing as complete as possible, and when the committee filed into its room that beautiful afternoon they found to their evident surprise that it was pretty well filled with Scientists from different parts of the state. Quite a number were present from Louisville, Lexington, and Winchester. The chairman stoutly announced that our time would be strictly limited to fifteen minutes, and asked the spokesman for the Scientists what there was in the bill that they objected to. The subtle character of the bill was manifested in the fact that, although the committee was composed of some of the brightest men and some of the ablest lawyers in the Senate, it was some time before they could seem to understand that the proposed law might be so construed as to include the spiritual healing work of Christian Science, and thus make it unlawful for the Christian Scientists to discharge their religious duties. He was reminded that a Christian Scientist could no more refuse to pray for one who asked for his prayers than could a member of any other church, and that if his prayer should be answered it would be a case of spiritual healing, which to some might seem to be prohibited by the fifth section of the bill. The attention of the committee was called to the fact that every exertion of the Divine will in the government of the universe, every prayer of a Christian mother's heart, would thus fall within the prohibitions of the bill. That if the Saviour were to come to Kentucky as he came to Palestine, with this bill interpreted to include spiritual healing and enacted into a law, he could be arrested under a warrant taken out by the State Board of Health, and that the seventy who were sent out to heal, and the twelve apostles, were they here to-day, could be sent to prison for doing their beneficent work. These statements appeared to arouse the committee, and they asked a great many questions, but kindly allowed the time thus taken up, in addition to the fifteen minutes assigned for the hearing.

Several witnesses were on hand to give their testimonies of healing in Christian Science, and it was thought best to occupy all the time possible with these testimonies; for, after all is said, we have to fall back on the testimonies of healing in Science as the most convincing evidence of its truth and worth.

One of our witnesses, a gentleman, testified to having been healed of the morphine habit of eight years' standing, in less than a week. He said that the taking of the drug was immediately stopped, which, under material treatment, results in almost certain death. A lady testified to having been healed in a few treatments of what several consulting physicians had diagnosed as a virulent case of cancer. At the last consultation the doctors agreed that her only possible chance was an operation; but her family physician said that as she would die on the operating table, it would be just as well for her to die at home, and told her husband that all that he could do for her was to make her as comfortable as possible. Then she turned to Christian Science. Another lady testified to having been healed of two cancers and of consumption. A lady testified to a case of mental surgery in the complete healing of a broken wrist, which an X-ray examination disclosed to be a very bad case of fracture, and of which the doctors said she could not expect ever to have the use of her wrist again. A gentleman testified to having been healed of the liquor habit of many years'

Digitized by Google

standing, which had been fastened on him as a boy by taking alcoholic medicine for the chills.

Before the hearing had progressed far, the chairman, a big-hearted, broad-minded specimen of gallant Kentucky manhood, proved to be as responsive to a sense of justice and fairness as he had been brusque and forbidding at the outset. He asked the Scientists whether they would be willing to have the bill amended by striking out the word "psychic," and adding, at the close of section five, the words, "the provisions of this bill shall in no wise apply to Christian Scientists," and being assured that it would be entirely satisfactory, he noted these amendments on the bill. This was the Senate Committee on Judiciary, the most important committee in either House, and it decided in a very few minutes after the hearing to report the bill with the amendments suggested in favor of Christian Science, and the bill was so reported and passed both Houses of the Kentucky legislature with scarcely a dissenting vote.

Thus the brave old state has taken her rightful place with the other states, which not only refuse to legislate against Christian Science, but distinctly declare the right of Christian Scientists to do the work of Christian healing without let or hindrance from any source.

Though victory seemed assured, it was thought best to follow up the work by distributing some well-selected literature among the members of the legislature, and so a large number of the pamphlet, "The Los Angeles Case," were ordered and one of them, with other literature, was placed on the desk of each member, with the words stamped on it, "Take this home with you." It was a great opportunity to correct false views about Christian Science in the old state, and it appears to have been well utilized, for we have heard of many good results in various directions, all traceable to this occasion and the work that grew out of it. It is hardly necessary to add that everybody is happy over this recent manifestation of the overruling power and beneficence of divine Love.

When Doctors Disagree.

SAMUEL GREENWOOD.

THE world's thought has been controlled so long by its medical and religious systems that any practical departure from them is looked upon as dangerous folly on the one hand and heresy on the other. These man-made systems have endeavored to pilot humanity over the troubled waters of earthly experience, but the battered bark still continues the buffet of wind and wave. Adrift on the sea of error, driven hither and thither by its pitiless storms of suffering and want and crime, shall man or angels deny that Christian Science has come to the rescue with the same Christ-truth that stilled the tempest, that gave peace to troubled hearts, and opened for mortals the way to God's kingdom on earth?

The universal agreement among the adherents of these human systems regarding the necessity of matter for the expression of intelligence and life, reveals their disagreement with the spiritual teaching and practice of him who was at once the most successful physician and effective preacher the world has ever known; while their internal disagreements exemplify the limitations that beset all material theories and endeavors. They are engaged in a warfare with conditions which are but the logical conclusions of the premise upon which all human systems are based; namely, that man is legitimately a material animal, subject to the control of animal propensities and demoralizing passions, and surrounded by the constant chance of pain, disease, and death.

The medical doctor agrees with his ecclesiastical brother, that Christianity has nothing to do with the healing of the body; and so he rests his hope and effort on nothing higher than matter, making it at once the source of mortals' blight and blessing, their tyrant and their saviour, their life and their death. At the very outset he virtually makes that supreme—a god—which opposes the reign of divine Spirit in man; and his healing efforts are but so many attempts to propitiate this devastating and destructive deity. The failure of these long ages of matter-worship to assist the salvation of mortals is seen in the fearful sacrifice of human health, happiness, and life still offered up in the service of this unappeasable, unpropitiable false god.

The ecclesiastical doctor agrees with his medical brother, that the healing of disease is no factor in the saving of the soul; and so he leaves the suffering body out of his ministry, and attempts the redemption of mortals' sinful sense through the terrors of an inconceivable hell or the allurements of a prospective heaven. That this method of preaching the gospel is not in accordance with the model given to the world by Christ Jesus is seen in the general absence of power over evil and disease.

The Christian Science metaphysician agrees with his medical and religious brethren that the human sense of both soul and body is in need of salvation; but he disagrees with them that Christianity is not concerned with the healing of a sick body, or that the practice of true healing has no part in the redemption of a sinful sense of being. In his understanding of Christianity, healing the sick and preaching the gospel are united in one ministry, even as our Master commanded. The Christian Scientist in his practice differs radically from his medical brethren by forsaking matter entirely, and looking solely to God, divine Mind, for the cure of his patient. Because he has found divine power superior to any invention of man, he has abandoned material aids as unnecessary.

The ruling systems of religion and medicine may agree in their disagreement with Christian Science and in withholding their consent to its legitimate existence; but the upholders of these systems have the welfare of mankind at heart, and because the opposition to Christian Science is based on ignorance and misapprehension rather than conviction and reason, the brightening light of Truth and Love will dispel it, and unite all minds as well as hearts with the mission of Christian Science. In this two-fold mission of "Physician and Redeemer" Christian Science has come to the rescue of mortals because human helplessness and need are calling for a higher way.

When doctors disagree why should not the patient have the right of decision, whether for the cure of his body or the ease of his mind? These disagreements among medical men as to the cause and cure of disease leave the poor patient traveling from one sharp experiment to another, from one unfulfilled hope to another, until despair and death are often left to complete the work of ignorance. If the accepted systems now in vogue for the treatment of disease fail to relieve the stricken body, or if the dogmas and creeds of popular religions are unable to destroy the mortal's love of sin and to lead him into love of right living, then why should not this victim of physical and moral misery have the privilege of turning unmolested to Christian Science, if it hold out to him the hope of freedom, and if it has given reasonable evidence of its ability to save? Humanity requires but one school or system if that one can demonstrate successfully how it may be delivered from evil.

If *materia medica* has had the right to fail and go uncondemned all through the ages of its history, why should not Christian Science have the right to succeed when the despairing invalid, the helpless sinner, or the struggling Christian rest their choice in God alone as their physician? When even the doctors disagree as to what is good or what is bad in medicine, or even if it is good at all, what unperverted sense of justice would compel its use by those who disagree with it entirely? Those who have need to be

Digitized by Google

healed have surely as much right to disagree with the doctors as to their employment of them, as the doctors have to disagree with each other as to the efficacy or the choice of remedies.

It is a gratifying sign of the times that many of our broader-minded physicians, in advance of their more conservative brethren, are recognizing in the healing work of Christian Science not a menace to their profession, but the promise of a higher and more successful way of dealing with the sufferings of mortals. Those who understand best the so-called science of material medicine know best its inability to conquer the giant of disease and death. Such physicians as these have no fear of any encroachment on their work by Christian Science, and it is only the human clinging to materialism and the traditional prejudices growing therefrom that prevent their generous investigation into this spiritual and Christian method. And many of our doctors theological, whose Christianity is broader than their creed, and whose love of humanity has overflowed the bounds of sectarian prejudice, are awakening to the breadth of hope and depth of promise contained for the race in Christian Science. These are perceiving in it, though perhaps dimly, the kindling dawn of that light of Truth for whose coming the noble hearts of all ages have worked and prayed.

To their brethren who adhere to differing forms of religion and healing, and who may disagree with their teaching and practice, Christian Scientists gladly hold out the fellowship of a common love for mankind and the earnest hope of moral and physical freedom. Their work is not to pull down the good that has been done, nor to discredit the humanitarian efforts of those who may differ from them, but it is to build upon the foundation of their Master's word and work a scientific, Christian life that shall minister to the sick as well as to the sinful, and that shall light, here and now, the storm-tossed and heavy laden of earth to the shelter and rest of heaven.

Entering upon a New Experience.

ANNIE MARIE BLISS.

THERE is a fascination about many phases of country life which appeal especially to the city bred, and sharing with others this enthusiasm, I gladly accepted an invitation to visit a poultry farm and observe the hatching process.

All my preconceived ideas upon the subject were far afield. I had fancied that, in the old-fashioned way, the hen broke the shell and instantly a fluffy ball of down tumbled out and began to run about.

So I was a bit anxious at the unexpected picture which greeted me in the large number of wet and struggling little things lying around on the netting in all stages of semi-activity. I first noticed a shell that was but slightly cracked, with the appearance of a little bill at the point of fracture. As I looked, a convulsive action inside told of the struggle to gain the outer air.

Turning to another I saw a little fellow resting in his shell overcoat with mouth open and breathing fast. Another with heroic effort had just shaken himself free, and was trying to stand upon his little yellow legs which wobbled dreadfully.

As I saw so many of these gasping little creatures I eagerly offered my help. Couldn't I break those shells? Couldn't I dry their wet down? Oh, couldn't I do something! No. I was assured they were all doing well, and that my interference would prove fatal. So I patiently waited and kept watch upon their movements.

Going back to the first little one whom I had left breaking his shell I found him working and resting by turns, but there was now less shell and more chicken visible. Beside him was a little brother really standing upright, running his bill over the wet down, trimming it and shaking himself into a proper degree of fluffiness. If a too vigorous shake toppled him over he would scramble up again and continue his work.

Some were gaping and picking up gravel. The first thought with many, after finding themselves in a new world, was evidently that of food. I was gladdened to see one, more brisk than the others, who began to peck at the opening crack of another's white shell, thus showing an early effort at brotherly kindness.

Thus each chick had to burst his own shell and work his way; to try again and again with apparent failure before he could stand alone, then walk, then scratch, taking each progressive step in its order, and before I left I was rewarded by seeing my little "disappointments" expand into the downy puffs I had originally expected to see.

In this incident I found many reminders of my former and present views of the development of a Christian Scientist.

I had thought that all sufferers were freed from disease and discord, and at once were ushered into harmony, living henceforth in sweet security, free, strong, and glad, with no more anxious thought or weariness. But after I myself had struggled with all the strength I could realize at the time, and had burst the shell of materiality, which, though thin, had served effectively as a prison; after my first breath of the pure air of spiritual life, I found that somewhat of the shell of material sense still clung to me, and that it meant work to shake it off.

The first efforts to stand met with defeat, and repeated efforts were necessary even to balance myself. Cheered on, however, by those who were near and who had learned to walk alone, I soon gained the confidence that lent strength to uncertain movement. Feeble efforts gave place to steady action until I stood alone, no longer dependent upon material support.

If tempted to look back, wearied with the thought of the task before me, my gaze rested on nothing but a broken shell into which I could not return. There are no backward steps in truth, and so I faced the light and resolutely set to work, in thought and deed, to earn the right to be called a Christian Scientist.

How often we long to break the shells of others, and our zeal to do so before the time is apt to bring us disappointment, until we learn to be patient and let them learn how to work out their own salvation. We have, however, the glorious privilege of nourishing the immature thought with reflections of divine Love until it breaks its own shell. Every effort brings greater freedom; more air, more light; every faltering step taken is leading to firmer understanding. Knowing this we are content and leave them to "emerge gently from matter into Spirit" (Science and Health, p. 485).

What a great joy to see our "disappointments," after their hard work, step out clothed in the beauty of holiness, reflecting the sweet qualities we had hoped that they would manifest, and thrice glad are we to see them quickly turn to assist weaker brothers near them, who are just beginning to hunger after spiritual food.

Our Easter joy is but the awakening to a clearer consciousness of our infinite possibilities, and as God's children we go joyfully about our Father's business, glad in our clearer understanding of the resurrection-life.

[Written for the *Sentinel*.]

A Fragment of Prayer.

MARY J. ELMENDORF.

GUIDE, Father-Mother God, into the light,
Out of the shadows into harmony.
Give me the quickened heart to understand.
Thy stars make pathways through the lonely night;
And bid my faith, in all things formed by Thee,
Behold the gracious imprint of Thy hand.

Selected Articles.

Christian Science and the Baltimore Fire.

Editor of the *Star*.

My attention has just been called to a short article in your good paper of the 10th, taken from the Richmond *Times Dispatch*, to the effect that the Christian Scientists of Baltimore "threw thoughts" upon the fire instead of water, and that their property was saved. No doubt all who call themselves Christians know that the greatest comfort and blessing of our lives is the certainty that God is our great Source and resource, "a very present help in trouble."

If a good Methodist, or Presbyterian, or Catholic, or Baptist, were to have rejoiced and thanked God that his prayers had been answered, and that he and his family and his possessions had been saved from that dreadful conflagration, would our correspondents and editors have been so lacking in reverence as to make light of the matter? Would they have allowed it to be said in their columns that such worthy Christians had "thrown prayers" upon the fire?

Then why say this of earnest followers of the Master who subscribe to the lofty teachings of Christian Science which impress upon them the necessity of dwelling in God and depending upon His loving, unchanging care in every hour of need?

The Bible is full of instances recorded where men have been saved from a fiery furnace, from boiling oil, from wild beasts, etc., because they leaned on their God, our God. I do not believe there is a body of people in Baltimore or elsewhere who appreciate more keenly the noble, valiant efforts of the fire departments in doing their work, but while rendering unto Cæsar his dues, let us not forget to render thanks to God also, or be tempted into making jests about the faith of others who do obey the Scripture.

The seeming successes of Christian Science are no doubt the cause of much misrepresentation, both of the Cause itself and of its prominent representatives, but Christian Scientists are patiently awaiting the time, not far distant, we trust, when all may know, from experience, the touch of this holy truth that has healed, blessed, and brightened our lives both within and without.

Allow me to thank you for the space you have given me.

Very truly yours,

ELIZABETH EARL JONES.

Wilmington (N. C.) *Morning Star.*

[In the same issue of the *Star* there was published Mrs. Eddy's letter regarding the abandonment of the effort to raise money for a New Hampshire exhibit at the St. Louis Exposition, copied from the *Concord* (N. H.) *Patriot*. This letter appeared in the *Sentinel* of March 12.]

A Word from Manila.

We are in receipt of copies of the Manila (Philippine Islands) *Cable-News*, containing an excellent portrait of our Leader and quite extended reference to Christian Science, including an editorial which expresses a good deal of humor and quite as much misapprehension respecting the subject. In answer to this last, "A Student of Christian Science" writes in part as follows:—

There lived years ago the great Nazarene teacher who understood so well the law of health that he was able to heal all manner of disease; he understood so much of Life that he was able to destroy death; he knew so much of the law of supply that he was able, with a few small loaves and fishes, to feed five thousand people; he had such a concept of Mind and its laws that he was able to walk on the water, still the tempest, and finally rise from the grave.

What did that mean to the world—to humanity? What does it mean to the world, to humanity, to-day? Does it really mean anything to us to-day? Was it merely the display of extraordinary power bestowed on him in a supernatural way, or was it the understanding of a Principle of which we may gain some understanding, and of which he came to teach mankind? It certainly must be the latter, for the apostles were all flesh and blood "like as we are," many of them humble fishermen that he picked up at the seashore, and yet after being taught, they were able to heal the sick, and lame, and blind, and even to raise the dead. And those students who never came in contact with Jesus personally did "many wonderful works."

But you may say that was for that time and those people only. Does not Truth stand as an eternal fact, of which all may gain knowledge? Shall we say that because Bach, Handel, Mozart, Beethoven, and the great masters of music are on earth no longer, that we cannot gain some knowledge of the basic law of harmony of which they had such a perfect understanding that it has flooded the world with music?

Hear these words of the Teacher: "Go ye into all the world, and preach the gospel." "Heal the sick." If it is impossible or impractical now to heal the sick as he did, it must also be impossible or impractical to preach the gospel as he did, for the two commands stand side by side and are of equal importance.

Why do we speak of Jesus and his disciples? Because, as in all the practical affairs of life, we look for results, and Jesus brought about the best results in the healing of disease that have ever been known to the world; so did his students. He healed diseases which the world had held and to-day holds to be incurable, and so did his students.

We, with our love for humanity and our desire to lift it out of its disease and suffering, have built hospitals, administered drugs, and used the knife, but he, with his understanding of a better and more effectual way, recognized Mind as causation and said, "Thy faith hath made thee whole." He said, "The words that I speak unto you, they are spirit, and they are life." Consider for one moment this definition of life,—knowledge of God. If life is knowledge of God, death must be a lack of the knowledge of God.

Mrs. Eddy says, "Mind, not matter, is causation. . . . You embrace your body in your thought, and you should delineate upon it thoughts of health, not of sickness. You should banish all thoughts of disease and sin, and other beliefs included in matter" (Science and Health, p. 208).

She then shows us how to correct these thoughts and their effects: "Look away from the body, into Truth and Love, the Principle of all happiness, harmony, and immortality. Hold thought steadfastly to the enduring, the good, and the true, and you will bring these into your experience proportionably to their occupancy of your thoughts" (Science and Health, p. 261).

I myself am a minister's daughter. I was raised in the Church and love it, but I was all my life a delicate, sickly child, and still I read in my Bible the words of Jesus: "Preach the gospel." "Heal the sick." I knew that my father preached the gospel, but what about the other words, "Heal the sick." Over and over these words rang through my mind, and I felt that Jesus intended that it should be done as he did it and taught his students, and they were men as we are; then it must be possible; and finally Christian Science healed me when I was at death's door, and it has healed hundreds and thousands, and if sometimes we fail, we then work more earnestly for a knowledge of Him who forgiveth all our iniquities; who healeth all our diseases.

Let us put the emphasis of life in the right place. It is not *wanting* something, but *being worth* something.

The Lectures.

New York, N. Y.

A lecture on Christian Science was delivered by Frank H. Leonard, at Third Church of Christ, Scientist, on Thursday evening, March 3.

Charles E. Burnham, First Reader of Third Church of Christ, Scientist, in introducing the speaker of the evening, said in part:—

The subject to which you are asked to give your attention is one which is commending itself to thinking people throughout the civilized world, and which merits the respect of every earnest seeker for Truth, for what it has done and is doing for humanity. Christian Science is giving "light to them that sit in darkness;" it is giving courage to the despondent, hope to the despairing, health to the sick, and salvation to the sinful. Could any greater blessing be given to mankind!

Harlem Local Report.

Geneva, N. Y.

A cultured audience which nearly filled Smith Opera House yesterday afternoon [March 6] greeted W. D. McCrackan of New York, who delivered a lecture on "Christian Science and the Brotherhood of Man," under the auspices of the local Christian Science Society.

Rev. George Cross Baner, pastor of First Universalist Church, presided at the meeting and introduced the speaker. He said in part:—

There has come a time when all sects and creeds have recognized that, while there may be fundamental differences of opinion, each and all have some things in common which bind them together. While I may not agree with Mr. McCrackan in all things, we are one in that we are both striving for the brotherhood of man, the fatherhood of God, and the creation of His heaven on earth. Hence it is a pleasure for me to introduce him to you.—*Geneva News.*

Princeton, Ind.

A good-sized audience assembled at the Court House Tuesday evening [March 1] to hear a lecture on Christian Science by Bicknell Young of Chicago.

The lecturer was introduced by Hon. M. W. Fields who said, in part, that any creed which may be started will have its adherents and its opponents. "The Christian Science doctrine bases its claim for consideration in that it applies all the principles taught by Jesus Christ. There is no difference in the orthodox religion and the Christian Science creed. They have the same religious and moral precepts which tend only to a higher plane of Christian living. But Christian Science goes farther. Christ not only saved the soul but healed the body, and the principles taught by him while on earth are upheld by the Christian Scientists to-day because he commanded his disciples to heal the sick and preach the gospel. Disease was then healed according to Divine law, and it is held that that law is still potent. No fair-minded man can gainsay that many thousands of instances of healing are matters of record to the credit of Christian Science. I am one who is willing to learn more of this creed."—*The Clarion-News.*

Lectures at Other Places.

Auburn, Neb.—Carol Norton, February 23.
Downer's Grove, Ill.—Carol Norton, February 26.
Marion, Ia.—Judge William G. Ewing, February 28.
Terre Haute, Ind.—Bicknell Young, February 28.
Vincennes, Ind.—Bicknell Young, February 29.

Among the Churches.

Grand Forks, N. Dak.

The committee for the distribution of Christian Science literature report that the works of Mrs. Eddy, together with copies of the Christian Science periodicals, have been placed in the public library of Grand Forks. A courteous letter of thanks for the same has been received from the directors of the library.—*Correspondence.*

Land for New Church Building in Chicago.

The members of Fifth Church of Christ, Scientist, have purchased ground upon which they intend soon to erect their new church building. The property is on Madison Avenue, seventy-five feet north of Forty-ninth Street, and has an area of one hundred and twenty-one by two hundred feet.—*Chicago Record-Herald.*

Church Organization in Manitowoc, Wis.

Hereafter the local Christian Science Society will be known as First Church of Christ, Scientist, as articles of incorporation have been filed with the Register of Deeds. The object of the organization is given as promoting "religious, charitable, and educational purposes."

Manitowoc News.

Beginnings in Marion, Ia.

About three years ago the work was begun in this place. Those interested, although few in number, were earnest and active. We are a Society of eight only, with ten to sixteen in attendance at Sunday services held in a hall. The Wednesday evening meeting is held at the home of the First Reader. Through divine Love we have been able to contribute ten dollars each quarter to the Mother Church Building Fund, also a contribution to the State Publication Committee.

Christian Science literature has been freely distributed. Science and Health has been placed in the public library and county jail.

Another blessing has been given us through divine Love in the lecture by Hon. William G. Ewing, February 28.

We do not forget our Leader, Mrs. Eddy, whom God has called, and who has done so much for mankind by giving them a higher understanding of Truth through our textbook, "Science and Health with Key to the Scriptures."

MABEL TABASINSKY, *Clerk.*

A Church in Missoula, Mont.

Following closely upon the announcement in these columns that the Christian Scientists of Missoula had formulated plans for the construction of a church, the committee in charge announce that they have secured one of the most desirable sites in the city for such a structure and that work will be rushed so that the first services may be held in the new building on Easter Sunday.

While it is not expected that the building will be commodious enough for a permanent house of worship, it will do for the present needs of the congregation, and when the growth of Christian Science in Missoula demands a more pretentious and larger structure, there will be ample time and funds to provide one.—*The Missoulian.*

We can do without Bible or church; we cannot do without God; and of Him we are sure. All that science and criticism can urge cannot shake the self-evident truth that He asks me to be true, just, merciful, and loving, and because He asks me to be so, I know that He is Himself what He requires of me.—WHITTIER.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Song.

Constancy.

MARY BAKER G. EDDY.

[Written many years ago.]

WHEN starlight melts to morning hue,
I miss thee as the flower the dew,
When noonday's lengthening shadows flee,
I think of thee, I think of thee.

Thus evening memories reappear,
I watch thy chair and wish thee here,
Till sleep my failing fancies free
To dream of thee, to dream of thee.

Since first we met, in weal or woe
It hath been thus and must be so,
Till bursting bonds our spirits part
And love divine hath filled my heart.

Watchfulness Required.

THE need for Christian Scientists to be awake to the subtle manner in which attempts to secure legislation against them are being made, is well illustrated in the recent proceedings before the Kentucky legislature, and we cannot be too emphatic in warning our people to be on guard against such attempts. The policy generally pursued by those who heretofore have sought such legislation has been to incorporate into the laws regulating the practice of medicine some strained and arbitrary definition by which they hope to include every system of healing, and thus include the practice of Christian Science without specifically naming it. We do not mean to be uncharitable, but a reasonable explanation of this course seems to be that by adopting such a plan it is expected that the true intent of the proposed legislation will not be disclosed to Christian Scientists nor to the legislators who otherwise would protest against a manifest violation of individual liberty.

It would seem that in the instance referred to, the plan was successful up to a certain point, but suffered defeat in the end because both Christian Scientists and legislators finally became aware of the purpose of the bill.

Much credit is due to the Christian Scientists of Kentucky who, by their prompt action, made clear to the Senate Judiciary Committee the intent and purpose of the definition of the phrase "practice of medicine" in the bill then under consideration, and to the members of the committee for their generous response when it was pointed out to them.

In consequence of the testimony offered by the Christian Scientists present at the hearing, the committee was also convinced of the healing power of Christian Science and voluntarily proposed an amendment by which Christian Scientists were especially exempted from the operation of the law, which was subsequently enacted.

Our correspondent in writing of the hearing before the committee says,—

"Several witnesses were on hand to give their testimonies of healing in Christian Science, and it was thought best to occupy all the time possible with these testimonies; for, after all is said, we have to fall back on the testimonies of healing in Science as the most convincing evidence of its truth and worth," and in reading this we were reminded of Jesus' words, "Ye shall know them by their fruits. Do men gather grapes of thorns, or figs of thistles?"

Christian Scientists are much pleased that Kentucky has taken its place with the steadily increasing number of states in which the practice of Christian Science is specifically or inferentially recognized, but it is not for them alone that a victory has been won; the public at large is equally interested, or should be, whenever an attempt to create or intrench an unjust monopoly is under consideration. M.

"I say unto thee, Arise."

IT is the mission and end of Christian education to bring the spiritual meaning of the great facts of religious history into individual experience, to epitomize and embody in man the providential leadership of mankind. We reach the true interpretation of the life of Jesus only as we come to apprehend that since he lived our life for us, and thereby became our Way-shower, all the supreme events of his history are to be brought within the embrace of our human consciousness until we shall have gained that comprehensiveness and enrichment of experience to which he referred when he prayed, "I in them, and thou in me, that they may be made perfect in one."

It thus transpires that while the hope and confidence of the believer in historic Christianity may be supported for the most part by his conviction of the truth of the objective works of the Master, the faith of the believer in Christ is grounded in his own subjective experience of these works. The one finds a degree of assurance and satisfaction in the acceptance of the healing of the blind man, or in our Lord's great Easter victory; the other, a peace and joy which passeth knowledge in the achievement of spiritual vision, the conscious resurrection from the domination of materiality, the demonstrable presence of Immanuel.

"Because I live, ye shall live also." "The works that I do, ye shall do also,"—this is the distinctive teaching of Jesus that every temptation, every struggle, every ascension of his earthly career is to be repeated in ours, and Paul's "all things are yours," surely compassed this thought of the rehearsal by each, upon his lesser stage, of every act of the Nazarene's consummate life. The individual Easter call of the Master, "I say unto thee, Arise," takes on a deeper and richer meaning, therefore, as we come to understand that it appoints for each this re-living of the Christ-life, and that his mandatory appeal is addressed to every unit of the human consciousness. Every sense, every faculty, every sentiment, every expression of the individual life shall hear his voice and come forth from its entombment in mortal sense, be emancipated from both its inherited and its acquired fetters of habit, impulse, and tradition, so that man, God's child, may, in every event and in every hour, ascend triumphant with his Lord.

All those who accept the fact of the resurrection, recognize it to be the explanation of all antecedent religious history, as it is the inspiration of all subsequent, but its larger, more impelling significance has dawned upon those who through Christian Science have come to think of it as a possible daily experience, the constantly recurring demonstration of the sovereignty of Life, Truth, and Love, over every law and assertion of human sense. "What a faith-

Digitized by Google

lighted thought is this! that mortals can lay off the 'old man,' until man is found to be the image of the infinite good that we name God, and the fulness of the stature of man in Christ appears" (Miscellaneous Writings, p. 15).

As the sunshine calls the seedlings until, yielding to light, they rise to bless and gladden the world, so comes the voice of Truth to human aspiration; and as not before since the springtime of the Christian era are the beginnings of good—the longing and hope of the human heart—now springing up in flowers and fruitage by the way. In unnumbered lives the word spoken in Christian Science has named the day and hour of resurrection from the bondage of sin, sickness, and death, and to all who have come to this awakening, the lilies which lend their fragance and beauty to grace the Eastertide bring a new and more inspiring sense of life and light and joy. They have arisen, and in their unflecked purity and sweetness they fitly symbolize the ascending thought which, freed from trammel and limitation, shall ultimately attain to the glorious spiritual supremacy which was manifested on Easter morning. W.

Nature and Science.

PHYSICAL sense does not discover the evidences of spiritual existence, yet no one can deny that even a degree of spiritual perception gives nobility to aspiration, and stability to effort, and that it unfolds capabilities which otherwise would remain dormant. With our healing in Christian Science there comes a wonderful consciousness of divine Life and Love,—an emancipation from the bondage of error and an awakening perception of the reason why material ways and means may no longer be employed to bring about harmony. Though these means may not always be morally harmful, they do not call into action the mental energies which are such a marked characteristic of the healing work of Truth. Our Leader says, "Science is an explication of nature" (Science and Health, p. 83), and the following incident illustrates the value of nature's lessons when we recognize that infinite Principle governs all.

One springtime a butterfly chrysalis in its winter wrappings was placed on the writer's desk, and she noticed that narrow bands of paper had been pasted around it, so that it seemed impossible for the creature to break forth when the time came for it to fly. The hasty conclusion was reached that this was a manifestation of a boy's thoughtless cruelty, but it was soon learned that some one had been experimenting, and had prematurely opened one end of the case. This would have been disastrous to the little creature, for only by the efforts put forth in emerging through a very small aperture, is it developed and strengthened, and the wings in particular prepared for their free life. The paper wrapping was therefore intended to remedy the mistaken kindness which had been tampering with the natural process of unfoldment.

The lesson proved most helpful, and was often recalled as the seemingly dead thing lay there for several weeks. At last, however, on the day before Easter, a beautiful butterfly was seen floating about the house, and it soon found its way out into the April sunshine. No one had seen its emergence from prison, and when it went forth into the "wide, wide world" no one knew how it was to be cared for, but the Master's words were remembered, "Your heavenly Father feedeth them."

This nature-lesson viewed in the light of Christian Science gave a hint of the mental processes which are needed for the unfoldment of spiritual capacity, and showed that Life is all-sufficient to sustain the awakening sense,—to give it strength and energy whereby even the body finds its redemption, as Paul expresses it, and thought escapes from the imprisonment of material belief. Our Leader says, "Only through the sore travail of mortal mind, shall soul, as sense, be satisfied, and man awake in His likeness" (Miscellaneous Writings, p. 15). Truly "it doth not yet appear what we shall be," but God knoweth, and Science reveals the process and the end, which will come without haste and without delay.

The hand which bears creation up
Shall guard His children well.

K.

A Letter to our Leader.

New York City, March 15, 1904.

Beloved Leader:—One Harvard graduate is deeply grateful for the By-law which means so much for college men. Regret that he was not sufficiently awake when in Cambridge to realize the pearl of great price you were then heralding in Boston, gives place to gratitude that the glorious light of Truth comes eventually to all.

At vesper time last Sunday afternoon, over the upper West Side in New York City, there floated the chimes of an "orthodox" church, and the tunes played were yours. And as "Saw ye my Saviour" rang out on the still air, one's individual experience proved that the question would be answered and that those long asleep in scholastic theology and collegiate darkness would ere long hear universally proclaimed the Saviour you have revealed to us.

Gratefully and reverently yours.

CHARLES H. PIERCE, H. U. '93.

To Rev. Mary Baker G. Eddy, Concord, N. H.

Science and Health presented to Library at Oxford, England.

London, England, November 6, 1903.

Mrs. Eddy:—I believe the enclosed correspondence may interest you. First Church of Christ, Scientist, presented a copy of the latest edition of "Science and Health with Key to the Scriptures," when the acceptance thereof was thus assured.

The Union Society is the chief debating society of Oxford University and is well frequented. It contains a library, well stocked and constantly receiving new volumes.

It is indeed a joy to think that truth has been admitted, whereby those who seek may find. I am,

Respectfully yours,

CECIL L. EDWARDES.

The following is the correspondence referred to in Mr. Edwardes' letter,—

The Library, Oxford Union Society,
February 25, 1903.

Cecil L. Edwardes, Esq., Chetwode Manor, Buckingham.

Sir:—I am requested by the librarian to acknowledge the receipt of your letter of the 23rd inst., which will be considered at the committee meeting to be held on Saturday 28th inst. I am, sir,

Yours obediently,

T. H. HINE, *Library Clerk.*

Oxford Union Society, 28 February, 1903.

Dear Sir:—I am requested by the Library Committee to express their thanks to you for your kind offer of Mrs. Eddy's book, which they accept with pleasure.

Yours truly,

J. L. BROOKS, *Clerk.*

Churches Losing by their Own Offspring.

In an address delivered before the Baptist Social Union of New York, the Rev. Dr. Russell H. Conwell declared that the churches are rapidly being submerged. There is no real growth in membership, Dr. Conwell said. Churches are uniting and disbanding and churches are moving from down town to suburban points, with loss in power and numbers.

"And it's all the fault of the churches," he explained. "The blame alone is theirs. They are being submerged, swamped, as it were, by organizations they themselves started.

"The Young Men's Christian Association is a continued permanent protest against the failure of the Church to do what it ought to do, and it would have no existence had the Church done as it ought. The churches started the hospitals, gave them their right of existence, now there is scarcely a denominational or even religious hospital to be found.

"And look at the colleges. President Harper says Chicago University shall be no more Baptist than he can help, and there is Princeton, hardly Presbyterian any longer. The Church of God is being lost sight of everywhere, and she suffers in consequence.

"If she is to get back the ground she has lost, the Church must recognize that teaching the ignorant, healing the sick, and preaching the gospel are three indissoluble things, each one her duty, and each one necessary for her salvation."

Philadelphia (Pa.) *Evening Telegraph.*

Easter Day.

LETITIA VERTREES PULLMAN.

"Awake! put on thy strength, O Zion!" for Easter Day
has come;
The new-born earth from bondage loosed, no longer blind
and dumb,
Has seen the brightness of the glory of the risen Star,
And on this happy morn, across the eastern sky, the bar
Of coming light illumines man, and lifts desire
To holier thoughts and deeds, and song caught from celestial
choir.

"Awake! awake! put on thy strength, "O child of God!
And thou shalt be with truth and love and understanding
shod.
And with the consciousness of the eternal Christ baptized
In Him, shalt be no more a worm, rejected and despised.
The Comforter has come, and we have learned the song, and
sing
Of joy triumphant, for the earth has now received her King!

Notice.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

Clerk of the Mother Church.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to William B. Johnson, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

Testimonies of Healing.

Christian Science was brought to my notice about five years ago by my sister, who urged me to give it a trial. Her loving solicitations were, however, unheeded for months, because I deemed her views fanatical and the Science a system of faith cure. At last, however, when medical skill had been exhausted and hope almost abandoned, I yielded in sheer desperation, and she gave me a few treatments, with the result that I was perfectly healed.

I had suffered from chronic nervous debility all my life, a condition resulting from intense physical suffering in infancy. Two years before my healing, and while a student for the ministry in an Indiana college, I suddenly collapsed, and during that entire time I was a helpless, pitiable wreck. Truly I was without "hope and without God in the world." Medicine had failed and my theology gave me no ray of hope for physical or mental relief, while the meagre chances held out by my church for final victory over besetting sins caused me to shudder for the future. In four weeks after receiving my first treatment I assumed a position of responsibility, and since then have been constantly under intense mental and physical strain without disastrous results. My healing has been tested again and again under circumstances which I never dared think of meeting in the old thought, and its permanency repeatedly proved.

So complete and so gratifying was my healing that I at once began to investigate the Science. And the search during the intervening years has been indeed, to use our Leader's own words, "sweet, calm, and buoyant with hope" (Science and Health, p. 109). A striking contrast, indeed, to the depressing influence and stultifying effect of old beliefs instilled into thought during years of helpless floundering amid the maze of orthodox creeds and doctrines.

My first step after deciding that I had at last found what would satisfy, was to identify myself with the church. Class instruction from one of Mrs. Eddy's students followed, and in due time, after many struggles, doubts, defeats, and triumphs in the effort to master evil in myself, I am at work in the Master's vineyard, a minister of the gospel, indeed, but in a higher and holier sense, obediently striving to obey our Lord's dual command to preach and heal. Numerous demonstrations of healing, both in myself and in others, have resulted. One such circumstance of healing in my own personal experience I desire to speak of especially.

In the latter part of June, while attempting to light the natural gas burners in the furnace, I ignited a quantity of gas which had accumulated without my knowledge in the body of the furnace. As the drafts were all closed at the time, and my face was pressed close within the open door, I received the full force of the resulting explosion directly in my face. The concussion was so great, I may add, that the tightly fitting lid of the cleaning vent in the smoke flue was blown off and into an adjoining room. My face and both hands were frightfully burned.

As I hastily extricated myself from this literal "fiery furnace," and dashed the flames from hair and eyebrows, error took advantage of my confused state of mind to whisper into thought, "Now you can't lead that Wednesday evening meeting." This aroused me to a sense of my need, and I communicated my condition to my teacher at once. In due time a reply, brief but to the point, and one which speedily silenced error's cruel taunt came back. She simply declared, "Matter cannot resist Mind." One treatment did the work.

In forty-five minutes the pain, by that time grown intense, began to abate, and the inflammation in the large, angry blisters on each wrist could actually be seen going down. Two hours later, after a refreshing nap, I resumed the duties of the morning and completed them without the least

Digitized by Google

inconvenience. That same evening I was enabled to conduct the Wednesday evening meeting in perfect harmony, and again on Sunday, in the absence of the First Reader, I read with the same freedom. The manifestation which appeared during the interval, but which had almost entirely disappeared by Sunday morning, attested the severity of the burn.

This was indeed a remarkable case of healing and was so conceded even by those not in sympathy with Science. Truth certainly has proven to be, in this and numerous other cases, my physician. The regenerating influence, however, of Truth acting as Redeemer, has wrought more radical and far more important changes than this. I must say of Christian Science, the messenger of Truth to my consciousness, as the pilgrim in Mrs. Eddy's allegory said of the Stranger, "The sight of thee unveiled my sins" (Miscellaneous Writings, p. 327). And as the work of healing, physical and moral, goes on day by day, my debt of gratitude to our Leader and to my teacher grows greater and greater. This debt, indeed, I have long since concluded can be paid in but one way: by loving, unfaltering obedience, remembering the Master's words, "If ye love me, keep my commandments."—R. STANHOPE EASTERDAY, Indianapolis, Ind.

At the age of three years I had a very serious illness which resulted in almost stone deafness. I remained in that condition for fourteen years,—still no better. My father at last wished me to consult a good physician in London to see if there might be some hope of a cure. So to London I was taken to a very eminent physician in Soho Square. After he examined me he said he might possibly relieve me by performing an operation which would consist in the scraping of the nose and throat, but he could not promise a cure, as both the drums of the ears were completely gone. To perform the operation would cost sixty guineas. When my father heard the verdict he refused to give his consent.

Then I remember that only three weeks after, my sister, who had visited America a few months previous, and there heard of Christian Science, received a letter from a Christian Science practitioner in Buffalo which was read to me, but I could not understand it, though it struck me as being very beautiful. It seemed hardly credible to think that divine Mind was all and matter nothing, that every manifestation of disease could be destroyed by the understanding of God,—Truth, Life, and Love. However, on hearing that my sister possessed a copy of Science and Health, I said I would read it.

The understanding came very slowly but every time error tried to assert itself I used my understanding of Science, proving for myself the all-powerfulness of God and the nothingness of error. The first month after reading Science and Health my hearing was almost perfect, but through fear and beliefs the deafness seemed to return as bad as before. After six months I took treatment, thinking I was insufficiently advanced to conduct my own case. Though my understanding improved whilst undergoing treatment, the claim did not yield though bad breath was completely destroyed. Then one day the conviction came to me that I ought to work out my own salvation. At first it was a severe struggle to give up treatment, but at last I took my stand. I found I had to look into my consciousness to see if there were anything there opposed to good, and very soon laziness, stubbornness, and selfishness were found where activity, gentleness, and love ought to be. By the clear realization and practice of Mrs. Eddy's words "God rests in action" (Science and Health, p. 519), these moral errors were destroyed. Though the work was slow I am not sorry, for patience must "have her perfect work." This often cheered me when I was despondent. Whilst the work was being accomplished in overcoming moral errors, the sense of deafness gradually began to be replaced by the understanding of the all-hearing Mind, until now I am able to hear ordinary conversation. I must also add that during all my life I have had a discharge from my ears, the doctors saying there were abscesses in the head, but through Christian Science they have been cured. Influenza, scalds, neuralgia, constipation, have also yielded quickly to Science treatment.

I cannot express in words all that Christian Science has done for me; it has completely changed my life, making me healthier, happier, and brighter. I am so grateful to our dear Leader for giving to the world this beautiful religion of divine Love which is for all mankind. Obedience to the rules in her book, Science and Health, will bring to all, health, joy, peace, and plenty.

EVELINE M. EGAN, Cambridge, Eng.

Christian Science found me for and with anything and anybody that was against the Bible. I was, so I thought, associated very closely with agnostics on the subject of religion, and was a strong advocate of evolution along with Darwin, Huxley, and others on that of science. I carried on this line of investigation for a number of years until I found Christian Science. From earliest boyhood the more profound subjects were always engaging to me, but of all the interesting subjects Christian Science stands pre-eminent as the most profound I have ever had the fortune to meet.

When Christian Science was first mentioned to me as something I needed, I said in reply that I needed nothing like that, because I was never sick. The Science, I suggested, was probably a beautiful religion, but I doubted its ability to heal. Here is the result of my investigation of its teaching.

I had used tobacco for fifteen years, and the appetite left a few years ago. I am absolutely free from any wish to smoke. I have learned to read the Bible with some sense of its true import. I think I would stay up all night rather than to be without reading the lesson. I am a member of the Christian Science church, the first church I ever joined, and the three weekly services always find me present. I gained forty-five pounds in less than nine months. My usual weight was one hundred and eighteen pounds. Now I present an appearance of healthful manhood. The elevation of the standard of thought has been the greatest attraction to me. The beauty and breadth of the Scientific thought, untrammeled with human limitations, ever appeals to me. I have learned some lessons in charity,—in refraining from criticism,—I find I am not so ready to judge others as before. I withhold my condemnation and feel better satisfied in remaining silent, even when it seems right to condemn, and let Truth have its free and perfect work, knowing this to be much better than mine.

I have all Mrs. Eddy's works and many Christian Science pamphlets, tracts, etc., besides our periodicals. These, with the Bible and dictionary, constitute my private library. At last I am satisfied; I have found more in Science and Health than in all the other works I ever read. I have a kind feeling for all, which I never had before. I am calm under criticism, and do not feel antagonistic under meddlesome suggestion. These things, these experiences, teach me that Christian Science is the Truth-cure. What a noble thought is the Truth-cure! Not faith-cure. No faith in matter, theories, or persons, but faith in Truth. We know Truth by what it does. Nothing but Truth could ever have accomplished with me what has been done in Christian Science. The standard is high in Science but the results are sure. Mrs. Eddy asks that she be followed so long as she follows Christ, therefore our duty is plain to live the Christ life, and it will necessarily follow that we shall be faithful to our friends. I offer this in a spirit of gratitude.

F. R. W., Salem, Ore.

Digitized by Google

It is several years since I received the first help from Christian Science, and since that time I have not looked to medicine or any material means in time of physical need. I was not at the verge of the grave with some so-called incurable disease, but for the most of my life I had been sick and discouraged, suffering much from weakness and mental depression. During these years I was usually under some form of medical treatment.

When the Christian Science text-book, "Science and Health with Key to the Scriptures," came into our home, through the advice of a distant relative into whose family wonderful healing had come through this treatment, all experimenting with material remedies and treatment of the poor body ceased, so far as I was concerned. One beautiful morning in the summer of 1889 I seated myself for the first time with a copy of Science and Health, conscious of great need of healing, both mentally and physically. After reading a few pages I felt my heart bounding with joy, and instead of nervous prostration there was strength and freedom. There was also such eagerness to tell my friends what I had found, though not understanding, as yet, what had so quickly wrought this change.

Since that glad day I have not for a moment doubted the truth of Christian Science, and through its teachings I have been enabled to prove many of God's precious promises, which under former teaching seemed vague and impracticable. It was more than a year after I began reading Christian Science literature that, after a number of unsuccessful efforts, I finally had the pleasure of seeing and talking with a Christian Scientist, the first whom I had ever met. Soon three members of our household began attending Sunday services in a neighboring city and have since united with the Mother Church and a branch church, having previously received class instruction.

Before I learned how to apply Christian Science in daily affairs, nearly everything which I attempted in the line of study or usefulness in any vocation, proved a failure, as lack of strength prevented long-continued work or close application. By diligently studying Science and Health, thus learning to work and to pray scientifically, many obstacles have been overcome and good results brought out spiritually, mentally, physically, and financially. Every day is full of benefits, every day a Thanksgiving Day.

MRS. E. L. P., Utica, N. Y.

I desire to tell what God has done for me and mine through this blessed truth which is redeeming mankind from the yoke of bondage. Nearly nine years ago I became very ill with what the physicians called nervous prostration. From July till October I was growing worse every day in spite of all that our best physicians could do.

At that time an eminent physician and surgeon was called, and an operation decided upon, which took place about the last of October. From that time until the first of the December following I lay unconscious, gradually growing weaker, until the doctors and all said it was a matter of only a few hours when I should pass on without regaining consciousness.

At that time a dear friend heard of my great danger and begged of my husband to try Christian Science, which he was very willing to do, for it was like a drowning man catching at a straw. We had never heard of Christian Science, but the practitioner came at once with this friend, who has since said that if she had then seen me she would never have had the courage to recommend treatment, for it seemed as if it were raising one from the dead. I heard the voice of Truth, however, and to-day I am glad to bear testimony to this fact, that God does love His children and has through our Leader made it manifest to us. I can never be grateful enough to God for this truth; only my life work for Him can testify to it, and I feel that, too, is the best way to show my gratitude to our beloved Leader who has "scaled the heights" before us and stands to-day beckoning us on, and guiding and cheering us with her teaching and example.

I would add for the benefit of some who think they must have faith in this truth before they are healed, that I was treated for two weeks before I regained consciousness, but I was gradually being lifted up. To the many other demonstrations of God's wondrous love I can bear grateful testimony. For my dear teacher and the friends who have been so kind and willing to assist us, I hereby express my thanks.—MRS. JENNIE FISHER, Marshall, Mich.

As an expression of gratitude for the many blessings Christian Science has brought to me, I wish to give the following testimony. About fourteen months ago, while visiting a friend, I was taken violently ill with all the symptoms of pneumonia. Several years before I had had this disease and with nearly fatal results, and since that time had more or less fear of its return, and like Job, the thing I feared came upon me.

After passing through a night of intense suffering, a practitioner, seventy miles away (we lived in the country) was sent for. She arrived in a few hours and found me, to mortal sense, in a most alarming condition. Both lungs were attacked, and breathing was so difficult and painful that every breath was a struggle. After her arrival the relief was almost instantaneous, and in a short time I was able to lie down and sleep peacefully. In three or four days I was up and around as usual and took quite a long drive during which a heavy shower of rain fell, and although I was quite well protected from it, a great fear of relapse came, and the next day it seemed necessary to send for the practitioner again. She came and there was no relapse, and in a short time I was as well as usual.

Years before, when suffering from the same disease though not in so severe a form,—under *materia medica* I was confined to my bed about three weeks, had the most sparing diet, took quantities of medicine, including a great amount of whiskey to stimulate me. Under Christian Science with much more severe symptoms, I was up in three days, and with no medicine but Truth.

For this, and the many other benefits I have received and am daily experiencing, I am thankful to God. I wish to express my gratitude to our dear Leader, Mrs. Eddy, for the blessing Christian Science has been to me.

MRS. H. R. P., Minneapolis, Minn.

I wish to speak of a demonstration made over a sensitive tooth which had been reminding me for some time that it needed attention. Upon consulting a dentist I found that the filling had become loose and had dropped down between the teeth, where it had been for some time. After I was advised of the size of the cavity and the extremely thin covering of the nerve, I made an engagement with the dentist and left his office.

When the appointed time came I asked a Christian Scientist for help and went again to the dentist's office. After making the preliminary arrangements, he took down the drill and proceeded to prepare the cavity for filling, stopping at intervals to enquire if it did not hurt me, but upon being assured that it did not, he would resume his work. When finally he put his finger on the tooth, he exclaimed, "That must have hurt you, for the tooth is hot," but when reassured that there was no pain he proceeded with his work, muttering something about it being "very strange."

Some time after this he told another member of our family that he did not believe I had any nerves; but the demonstration was complete, I suffered no pain. Not only in this case, but many times have the material senses yielded to the power of divine Love. We are all very thankful to our Leader,

Mrs. Eddy, for her revelation of Christian Science to the world.—D. F. N., Cleveland, O.

I desire to express my gratitude for what Christian Science has done for me. Fifteen years ago I was a physical wreck. When I had reached the point where I thought I could never be well, this truth was brought to my notice. I had never heard of it, but my kind friend explained the healing power of Truth to me and said she would treat me if I were willing. I consented, but had no faith that it would do me any good. To my great surprise, however, in less than twenty-four hours I was healed of rheumatism, from which I had suffered severely for many years.

In a short time after my healing I had the privilege of class instruction from one of Mrs. Eddy's students. Since that time I have been a student of the Bible and Science and Health, and an earnest worker in our Master's vineyard. After my healing, the medicine chest was emptied of its contents and never again has there been a drug given to a member of our family. We have had many temptations in the form of sickness, such as measles, typhoid fever, scarlet fever, whooping cough, and mumps, but divine Love has proved a present help in every time of need.

Words are inadequate to express my gratitude to Mrs. Eddy and the dear one who so kindly showed me the way out of darkness into light.

MATTIE M. BOYLES, Enid, O. T.

Though perhaps still manifesting some form of physical inharmony, are we truly grateful for relief along other lines?

This was my case. Much had been overcome and I promised myself to acknowledge publicly my healing, but the suggestion was that I wait until the demonstration was wholly made. That this was erroneous was uncovered immediately and I began to think of the many causes for thankfulness I had, and soon realized that the trouble was gone.

After suffering many months with severe nervous trouble and all the fears and depression attendant upon that disease, I came gradually into health and happiness again.

It was with many fights against error, and in entire dependence upon Truth that I realized my freedom from bondage, and for this freedom, and to the one who has shown us the way I am most thankful.—G. E. F., Detroit, Mich.

Every day I rejoice and am exceeding glad that I can demonstrate the truth, not only for myself but for others, My heart fills with gratitude and love for Mrs. Eddy who has done, and is doing so much for us all, and I truly thank all those who are laboring with her in the Field. This teaching helps me every day to live a purer and nobler life.

Christian Science found me a wreck both mentally and physically. I was afraid of everything, especially at night. The mental discord was so great that I feared some night I might awake and harm my dear ones. My whole body seemed to be in constant trouble; but thanks to my practitioner and teacher, who expressed so much patience (for my healing seemed very slow), I am now established in Christian Science. I pray every day that I may rise into higher and holier consciousness.

JEANNETTE T. WELLS, Fall River, Mass.

I cannot find words to express my gratitude to God, and also to Mrs. Eddy, to The Christian Science Publishing Society, and to all those who have helped me to understand this great truth which indeed makes men free. The physical benefits have been great, but the spiritual uplifting means so much more, and my greatest desire is so to live as to prove my gratitude.

In a very dark hour the cup of cold water was given me in Christ's name, and by the faithful study of Science and Health I was changed from a poor, miserable, complaining invalid to a healthy, happy, and useful woman. Each number of the *Sentinel* and *Journal* brings some help, and so many things have been explained and made plain by reading them that I look forward for their coming with great pleasure and feel I cannot be too grateful for them.

MRS. STELLA L. BERRY, Newton, Kan.

"Cast not away therefore your confidence, which hath great recompence of reward. For ye have need of patience, that, after ye have done the will of God, ye might receive the promise. For yet a little while, and he that shall come will come, and will not tarry." These words came to me in an hour of great need and were as the balm of Gilead to my weary, waiting heart. I accepted them as from the very mouth of God, and once more has been demonstrated the scientific fact that "Human hate has no legitimate mandate and no kingdom. Love is enthroned" (Science and Health, p. 454). *We have* received the promise in Divine Science and he that shall come *has come,* and it is our privilege right here and now to demonstrate this truth.—M. C. W., Chicago, Ill.

My heart goes out in deepest gratitude for blessings received through Christian Science, because I was healed seventeen years ago of many ills, after I had been treated by *materia medica* and was "nothing bettered but rather grew worse." These blessings increase daily as the unfoldment of Truth and Love is realized.

I am unspeakably grateful for our literature, and especially for the Concordance and the new Manual so lovingly provided by our revered Leader, Mrs. Eddy. Surely it is the "table in the wilderness;" and my constant prayer is that I may daily so reflect divine Love that others shall glorify our Father-Mother God.

A. E. W., Omaha, Neb.

Christian Science has healed me of chronic stomach trouble, rheumatism, the tobacco habit, drunkenness, sensuality, evil desires, dishonesty, and mental depression. It has given me a firmer hold on life, faith in God and in man in His image and likeness, love, peace, joy, contentment, and it has made the future bright with hope. For all these blessings I desire that my life may bear witness of my gratitude, for words can never express it. I give this testimony because it is just that I should acknowledge publicly what this teaching has done for me, as evidence to others of the truth of Christian Science.

H. S. BACKUS, Chicago, Ill.

I desire to return thanks for the many benefits received in Christian Science. I have been healed of neuralgia which I had for twenty-five years. Every spring I would have weeks of suffering and would take morphine every hour. I was also healed of other serious troubles. For months I could not lie down, the palpitation was so severe and my fear so great that I often thought I was passing on. But I was healed through the Christian Science treatment that is taught in Science and Health by our Leader, Mrs. Eddy.

MRS. GEORGIANNA GRIFFIN HOYT, Oneonta, N. Y.

Awake! thou sleeping child, and know the stone
Is rolled away! The tomb has not concealed
The truth that makes thee free! Do not bemoan
Thy fate as sad! The risen Lord revealed
The Father's will—that all mankind above
The seeming clouds should rise, and cease the strife,
For death its deathblow has received,
And Love has given to man—*Eternal Life.*

BELLE M. HURST.

From our Exchanges.

More and more the Christian world is coming to believe, what we think a correct interpretation of the Gospels makes clear, that Jesus is not the Saviour by virtue of his vicarious suffering for the world's sin, but he saves through his influence upon the minds and hearts of men and women. He is steadily, and with constantly increasing power, saving the world by the truths that he taught, by the character he achieved, by the example he presents, by the spirit he imparts. He is the Word of God in the sense that in him was embodied and expressed the truth, wisdom, and love of God as these have reference to man in this world. He is the mediator of that truth, that love, that spirit which, when accepted and made operative in the life, unites the believer and doer to the Father in a vital moral and spiritual fellowship. Thus the at-one-ment between the two is accomplished. The believer becomes a new creature in Christ. Old things—old and erroneous ideas, old and false views of life, old and unrighteous ideals—have passed away and new conceptions of self, of life, of God and duty now rule the inner world of thought and feeling and motive.

The Universalist Leader.

A Christian will confess Christ with his mouth, but the loudest profession of religion and the most beautiful religious talk are not true and genuine unless they are accompanied by a life of well-doing. "Not every one that saith unto me, Lord, Lord, shall enter into the kingdom of heaven, but he that doeth the will of my Father who is in heaven."

Our Lord gave us an example that we should follow. He "went about doing good." On one occasion he took with him Peter and James and John, and went apart into a mountain to pray; and as he prayed heaven came so near that the summit of the mountain was lighted up with the glory of God, and he was transfigured, while heavenly visitors appeared on the scene holding converse with him. At that moment there was an unhappy father at the foot of the mount seeking help for his demoniac son with groans and tears. The land was full of misery and the world was full of sin, and Jesus could not be restrained. He must needs minister to suffering humanity. He said, "I must work the works of Him that sent me while it is day." Let us go and do likewise.—*The Christian Advocate.*

In a true sense Sunday is no better than any other day in the week. In a true sense every day in the week is sacred time, and every proper employment sacred. There is profound truth in the saying attributed to Christ, who saw a man working on the Sabbath, and said to him: "O man, if thou knowest what thou art doing, blessed art thou; but if thou knowest not, thou art a transgressor and accursed." Here is the whole philosophy of Sunday occupation.—*The Examiner.*

It seems manifest to those who have lived half a century and who recall the social conditions of an earlier age, that a far healthier moral and religious tone prevails among the people of this country than was formerly the case. It may be called a new philosophy of life, unwritten, unformulated, but even more potent than if it had been reduced to rules.—*The Christian Register.*

Springs of happiness are hidden and ready to break forth in every nature; and with every advance in goodness and greatness new streams are waiting to flow. The joy which all men crave lies always within the invisible circle of the heart; it is never found in the world without; and, once found, the world, which is powerless to bestow it, cannot take it away.—*The Outlook.*

THE CHRISTIAN SCIENCE TEXT-BOOK.—Science and Health with Key to the Scriptures with latest revisions and additions, and numbered lines. 700 pages.

For description, price, and other information, see last page of cover.

THE NEW CONCORDANCE.—A complete Concordance to Science and Health with Key to the Scriptures. This work has been compiled from the late revised edition of SCIENCE AND HEALTH, and contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10x7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

CHURCH MANUAL.—Containing the By-Laws of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. This does not include the list of members. Price, prepaid, $1 per copy; $5 per half dozen; $9 per dozen.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America.

It contains about thirty-eight pages of reading matter, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

National.

The Senate Post Office Committee has made an important change in the Post Office bill as it came from the House. The House raised the salary of rural carriers from $600 to $720 a year as an offset for taking away the privileges as canvassers for newspapers and express companies.

The Senate Committee has adopted the following wording:—

Carriers shall not solicit business or receive orders of any kind for any person, firm, or corporation, and shall not, during their hours of employment, carry any merchandise for hire.

Provided, That said carriers may carry merchandise for hire and receive subscriptions for and deliver newspapers, magazines, and other periodicals for and upon the request of patrons residing upon their respective routes whenever the same shall not interfere with the proper discharge of their official duties and under such regulations as the Postmaster General may prescribe, and not otherwise: And, provided further, That no carrier shall refuse to deliver or to take orders or subscriptions for any merchandise, newspaper, or periodical requested by any patron on his route, subject to the regulations of the Postmaster General.

The treasury surplus of receipts over expenditures for the month of March was about three million dollars. This brings the total for the nine months of the fiscal year up to between seven and eight millions. Secretary Shaw's forecast of a surplus of fourteen million dollars for the entire fiscal year seems likely to be justified.

The Panama Canal Commission sailed for Colon last week.

Foreign.

General Reyes has left Paris and sailed for Colombia. He is reported to have said, in commenting upon the relations of the United States with Colombia, that he was opposed to war throughout; that there would be no recourse to war, and that he was desirous of avoiding the placing of any obstacle in the way of carrying out the canal project, which would result to the benefit of Colombia by increasing business activity in that section and inducing the investment of American capital. Concerning the differences between the United States and Colombia and Panama, he believed they could be arranged honorably to all concerned.

It is reported that the Governments of Italy and Austria have concluded a complete agreement regarding affairs in the Balkans, by which the *status quo* in those states is assured, both Powers pledging themselves not to undertake territorial occupation. They have also decided upon the manner of the assignment to the different Macedonian vilayets of the international gendarmerie created under the Russo-Austrian reform scheme. The Italian gendarmerie will be entrusted with the occupation of the vilayet of Monastir.

It is officially announced in London that Lord Curzon of Kedleston, Viceroy of India, has been appointed Lord Warden of the Cinque Ports, in succession to the late Marquis of Salisbury. This office is one of great dignity, which, while no longer carrying with it any emoluments, provides its holder with one of the most picturesque country seats in the United Kingdom along with a number of perquisites. The residence in question is Walmer Castle, built by King Henry VII. as a fortress for the protection of the Kentish coast, on the cliffs of which it is situated.

By a decisive majority of 316 to 269, the French Chamber of Deputies last week passed the Government bill for the suppression of all forms of teaching by the religious orders. This supplements and completes the work begun by the former premier, M. Waldeck-Rousseau, in 1901. The new law does not make any distinction between authorized and unauthorized congregations, but sweeps away the whole fabric of teaching by religious orders, thus in effect substituting the system of state schools for those heretofore conducted by the orders.

It is probable that six hundred Porto Rican teachers will visit the United States and its summer schools in July and August. The United States is to furnish the sea transportation on some of its transports, and it is expected that public generosity will contribute toward meeting the other expenses, which will amount, it is stated by Commissioner Lindsay, to about sixty thousand dollars.

A press despatch says that the British Thibetan expedition has commenced its advance on Gyangste. When the expedition reaches that place, General Macdonald will again attempt to enter upon peaceful negotiations with the Thibetans, even if the latter oppose the progress of the expedition by force of arms. The movement is being made with the utmost confidence.

It is reported that the Khedive of Egypt will visit the United States for the St. Louis Exposition. He will first go to Constantinople, thence travel to Europe, and probably embark at Havre.

It seems probable now that the foreign diplomatic representatives may return to the capital of Servia since the King has removed from his Court the last of the regicides.

Industrial and Commercial.

The *Tradesman's* review of industrial progress in the South for the first quarter of the present year, ending with the month of March, shows a total of 1,346 new industries reported from the Southern States. This is an increase of forty-nine over the last quarter of the year 1903, and an increase of sixty-nine over the first quarter of last year. The review for the quarter just ended shows that 261 wood-working industries were established, that line of industry leading all others. Next in importance are natural gas and oil companies, of which ninety-three new ones were organized during the quarter. There were sixty-one new telephone companies, sixty ice and cold storage plants, fifty-two electric light and power plants, forty-six cotton and woolen mills, forty-five compresses and gins, thirty-nine flour and grist mills, forty development and improvement companies, thirty-four iron-working plants, thirty-three oil mills and refineries, thirty water-works plants, thirty-six hardware companies, thirty-four brick and tile works, eight rice mills, fifteen tobacco factories, twelve phosphate and fertilizer factories, two paper and pulp mills, three glass factories, one tannery, one engine and boiler works, and miscellaneous new industries.

A giant three cylinder locomotive, which it is the intention to exhibit at the St. Louis Exposition, was tested on the military railroad recently in Berlin in the presence of a large company of civil and military personages. The engineer of this locomotive rides on its forward part and communicates with the fireman through a speaking tube. The front and rear cones of the locomotive diminish the resistance. The locomotive alone attained a speed of eighty miles an hour, and of sixty-two miles an hour when drawing six vestibule passenger coaches. The trial proved the possibility of introducing a sixty-mile schedule without any change of roadbed or rolling stock.

An oil combine, with headquarters at Toronto, is announced in the latest issue of the Ontario official gazette. The new combine takes the name of the Canadian Consolidated Oil Company. The capital stock is put at fifteen million dollars, divided into ten thousand shares. The companies entering the combine are largely engaged in refining American oils.

C. S. Ting and Chung Heung, Chinese manufacturers from Hong Kong, China, are in this country buying knitting machinery. They have spent some weeks at a machine factory studying machines and learning how they should be operated. They are purchasing both hosiery and underwear machinery from various makers. There is not a knit goods manufactory in China, it is said, and these men will be pioneers in that business.

There are in the State of Georgia between 1,600 and 1,800 peach growers, and more than 1,000 of these have orchards which will bear fruit this year, approximately 8,000,000 trees. It is estimated that the number of carloads of peaches to be shipped from that State the coming season will reach 5,000. The largest crop on record was that of 1898, when 2,500 cars were shipped.

General.

Many of the prominent men of Japan are Christians. To this creed belong one member of the Imperial Cabinet, two judges of the Supreme Court, two presidents of the lower house of Parliament, three vice-ministers of State, and many officials in the lower ranks. In the present Parliament the President and thirteen members in a total membership of three hundred are Christians. In Tokio three of the great daily papers have Christian editors.

The offer of twenty-five thousand dollars by M. Deutsch of Paris as a prize for the first flying machine to make a flight in a circle of one kilometre has been duplicated by Ernest Archdeacon, and appeals have been made to the press for further contributions.

In addition to the one hundred and fifty thousand dollars offered by the World's Fair to the winners of the æronautic contests, a change in the rules has been made by which prizes in the shape of testimonials, medals, and the like will be offered to those contestants who have not won cash prizes, but have made meritorious performances in the balloon or airship.

The "Ajax of Sophocles" is to be given in New York by men and women picked from the Greek colonies in the city. This play was similarly given in Chicago last year under the auspices of the Hull House.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

From our Contributors.

A Complete Defence.

WILLARD S. MATTOX.

THE story of Achilles is interesting from the standpoint of Christian Science. As every one knows, Achilles was a Greek hero, whose exploits in the Trojan war are celebrated by Homer. It is related that when he was born, his mother desired for him a special favor from the gods on Mount Olympus. She asked nothing less than that he should be invulnerable to all attack, which was a particularly shrewd request. In response to supposed instructions, the mother of the prospective warrior dipped him in the river Styx, holding him by the heel. This, it was alleged, made him invulnerable except in the heel, which was not touched by the water. In later years, he performed prodigies of valor and always escaped injury, until one day he was shot in the heel by a poisoned arrow, and died.

I take it we may receive some instruction from ancient mythology, when we understand that mortal mind was the same then as it is to-day, and that the mythical accounts of ancient heroes were efforts to depict this human mind and its frailties. It is very apparent that every mortal has his "Achilles heel," some faulty condition of thought. It is evident that any attack to be successful would have to be directed against the weakest spot. It also seems to be the especial business of evil to deliver its attack there. We need not be surprised at this. Evil would cease to exist if it did not claim to act intelligently. If we are fully satisfied that the situation is fairly presented in the foregoing propositions, the wise man will set about doing two things. He will first ask himself, "Where is my most vulnerable place?" and finding it, he will proceed carefully to protect himself at this point.

This is another way of stating what we know so well, in theory, to be the daily work of the Christian Scientist. Our Leader, whose wisdom has explored all these devious ways, gives us the benefit of her discoveries. She says, "Learn what in thine own mentality is unlike the Anointed and cast it out" (Miscellaneous Writings, p. 355). We are vulnerable wherever we are unlike the Christ nature. When we have brought every thought into subjection to Christ, there is no more temptation. The suggestions of evil assail us on every side, but we most frequently suffer defeat at the point of our least resistance.

Jesus, the ideal man, was impervious to attack at all points. He said, "The prince of this world cometh, and hath nothing in me." When mortal mind talks to us, how much of its own does it find in us? How many of its claims upon us are we allowing? How much of our bodies do we yield to its claims? How much of our lives do we give up to the prince of this world? The 91st Psalm describes the man who has no "Achilles heel," who is safe in the secret place, who is fearless, who knows he cannot be attacked successfully at any point. This man, of whom it is said that no evil shall befall him, has cast out of his consciousness all thoughts that are not God's thoughts, has purified himself, "even as he is pure," and has lifted his thought above the impress of an evil suggestion.

The first duty, then, is to discover where we are most exposed. Ignorance does not keep out the enemy. Mrs. Eddy describes this process in Science and Health, p. 392. "Stand porter at the door of thought. Admitting only such conclusions as you wish realized in bodily results, you may control yourself harmoniously." Have we discovered through which mental door the one evil intrudes itself upon us most often? Do we know our weakest point? It may be a moral question, it may be belief in heredity, it may be any one of the myriad beliefs that body can be diseased. Is it temper, irritability, lack of self-control, churlishness, sullenness? Then let us work hardest to strengthen our defence at these points,—sweeten existence by patient obedience to the loving guidance of a wise and tender Parent. If we do not want irritated and angry conditions in the body, we must abide always in peace, serene in our love for God and man. Is it self-will, pride, greed, lust of anything—of money, power, or place? Then we must needs devote much prayerful work to the healing of these blemishes. Do we believe that our body is strong in every organ and function but one? Then we need to know that divine Mind governs all His creation, not omitting any part. Is some one's personality especially attractive or repellent to us? Then the fatherhood and motherhood of God needs to be better understood and the brotherhood of spiritual ideas must be more clearly realized. Do we fear matter in any of its forms? Do we love matter in any of its forms? Then every thought has not been brought into subjection to Spirit, and there are weak places in every joint of the armor.

Does mortal mind harp most upon the string called appetite, in whatever form that claim may manifest itself? Do we fail to progress because of instability and vacillation? These are some of the doors through which error reaches one or another. There is a wide door called sensitiveness, and it is variously known as love of approbation, self-consciousness, vanity. Do we care too much for what "people" think of us or say of us? Do we belong to a religious family and a long established church, and do we fear what any one would say if we made a change in our habits of thought? Then we need to know that God is more to us than any earthly interest, and that nothing short of a full surrender to Him will usher us into a complete realization of harmony,—heaven.

Christian Science bids us be honest with ourselves, fearlessly and relentlessly hunting down every abject, earth-born thought, and ridding ourselves of it as rapidly as may be. This work need not be confused with self-depreciation, for we learn to discard evil as no part of the God-created self. Nor need we publish the results of our self-examination. If we know the faults and are working to destroy them, it suffices. The task is not dispiriting, for thus saith our God and Saviour, "I will seek that which was lost, and bring again that which was driven away, and will bind up that which was broken, and will strengthen that which was

Copyright, 1904, by Mary Baker G. Eddy.

Digitized by Google

sick." Observe, it is God who will do the strengthening, for He is the healer of all our diseases, and He is faithful to perform all that He has promised. Paul says, "Take unto you the whole armor of God, that ye may be able to withstand in the evil day, and having done all, to stand." Any man, with the *whole* armor on, may righteously expect to stand triumphantly. That is his reasonable reward for having on a whole armor. But let not him who is slovenly in his defence, or who is content with only a few pieces of the whole armor, wonder why he suffers, and why the fiery darts of the enemy so often find the exposed parts. "Clad in the panoply of Love, human hatred cannot reach you" (Science and Health, p. 571). No poisoned arrow will find its mark in us while we are dwelling in the consciousness of good. This is our strong defence, and there is none other.

The New Understanding.

LOUISE DELISLE RADZINSKI.

Understanding is a wellspring of life unto him that hath it.
Proverbs, 16:22.

The Scriptures are very sacred. Our aim must be to have them understood spiritually, for only by this understanding can truth be gained.—*Science and Health*, page 547.

THE aim referred to in these words of our Leader, she has faithfully pursued, and the pursuit has been blessed indeed, for, wherever there are students of Christian Science the testimony is given that through her works a new understanding of the Scriptures has been gained. How often we hear such declarations as these from patients and students, "Even if I had not been healed of my sickness I would be grateful to Christian Science for the new spiritual life it has given me through its understanding of the Bible." "Now I can read my Bible and enjoy it; it used to seem to me a book of condemnation and wrath; now I understand it to be the text and amplification of the law of Love." "Above all, I thank Christian Science for the Bible, which, before I read Science and Health, was a closed book to me; now it is my joy."

What Christian Science practitioner could not continue in varying phrase the same pæan of love and gratitude that fear of the law has been destroyed by the understanding of Love, a belief in wrath changed to a sense of protection and safety?

A man whose face was furrowed by deep and anxious pondering of the Scriptures on the old lines of interpretation, testified to the unsatisfying result. After listening to some passages from Science and Health he looked up with a new light in his eyes, and said, "So ye'll no teach a limited election and an unlimited damnation? It is good news to a weary man. I'll take the book." He took it and read it, and its message freed him from the bondage of narrow, cruel beliefs that had made his life bitterly sorrowful.

Another man gave this testimony: his father was professor of ancient languages in one of the German universities, and early grounded him in Latin and Greek. The lad found the study of the Scriptures of absorbing interest, and diligently compared the various texts and translations. In all of them, however, he missed something that he felt sure they should express; what he found repelled him by a sense of harshness and of limitation. His desire to find this missing sense he could not name, drove him to deep study of the more ancient languages; from Hebrew he went to Arabic, Sanscrit, and various dialects in which, he was told, precious books of the Law were written. He studied and sought vainly in the treasures of ancient lore for the message he knew God has for man, but which man seemed not to have received, or if received, not to have understood, and in despair of learning more from books he devoted himself to teaching. Coming to America shortly before the war with Spain, he went to Cuba with the United States troops to teach Spanish to some of the officers. On his return to Florida, where he had left his wife, he found she had been very ill during his absence, and had been tenderly cared for by people who did not use medicines, but who relied upon Divine help for healing. "This," said she, "is the book they study; I have been reading it; it teaches concerning the Principle by which they work, and I believe you will find there what you have sought all your life."

He questioned his wife closely as to the mode of treatment she had received, and when satisfied there had been no hypnotism used in her case, he read the book, "Science and Health with Key to the Scriptures," prayerfully and, as he expressed it, fearfully, fearing that, like so many he had read, it might leave him unfed and unrefreshed, yet hoping he had found the treasure he had so long sought. "I soon found," said he, that "it was unlike any book I had ever read. Without pomp of language, simply as a mother talks to her children, the author gives the inner meaning of the letter that had baffled me with its hard limitations. I am convinced that this book was written through inspiration, for it would take a man a life-time to gain as intimate a knowledge of any one of the ancient tongues as the author of this Science and Health evidently has of the ancient texts of the sacred books. It is not the work of the human intellect; only Spirit could teach it, and I shall devote myself to its study."

It is through this God-given understanding of the inner meaning of the Scriptures that Mrs. Eddy has been enabled to lead us from the confusion and darkness of material, human science, to the clear light and firm foundations of divine Science. Through this understanding we apprehend the love that lies behind the letter; we learn that "God is a consuming fire" to the beliefs of error that beset us, to the sense of sin, not to the sinner; that His wrath is kindled against the claims of malice, not against their victims. We also learn that the "jealous God," who punishes transgressors of His law unto the third and fourth generation, is the zealous, the vigilant God, watching over His children lest they stray from the safe defence of the law He has established for their protection, and not as an instrument of vengeance. "Who is so great a God as our God?" as revealed through Christian Science?

Understanding is no longer crippled by the limitations set by the mortal-mind belief of a personal, anthropomorphic God. It rises free, unrestricted, to the highest realms of thought, on the mighty pinions of wisdom, of knowledge, of Science, so that we may now say fearlessly, gratefully, and lovingly, with the beloved apostle, "And we know that the Son of God is come, and hath given us an understanding, that we may know Him that is true, and we are in Him that is true, even in His Son Jesus Christ. This is the true God, and eternal life." And may we not add, Blessed be God that He has given us His true and faithful servant to be our guide and help to the new heaven of the true understanding of divine Love—and blessed may she be of God and men, who, by her pure heart and true thought, has been fitted to bear this message of Life, Love, and Truth to a waiting, longing world.

Practical Considerations.

C. S. K.

THE question is often asked, "Where does the Christian Science denomination get the money to build and maintain such handsome churches free from debt?" and a prominent minister is quoted as having said that the Christian Scientists certainly deserve great credit for the loyal support, both moral and financial, which they give to their churches.

Of course we all know that the large financial contributions come as voluntary expressions of love and gratitude

Digitized by Google

from the many who have been healed or helped in some way by Christian Science, but this explanation often gives rise to another query, as to how the contributors themselves can afford to be so liberal, since while the majority of Christian Scientists seem to be in comfortable circumstances, yet there do not appear to be more wealthy people among them than may be found in other denominations.

Light is thrown upon this subject by a testimony given at a Wednesday evening meeting, in which a gentleman said that he had been a sufferer from a so-called incurable disease for ten years, had been under the care of skilful physicians, had taken the most powerful medicines, had traveled vainly at home and abroad in search of relief, and had paid out an average of five hundred dollars a year in doctors' bills, drugs, and traveling expenses. Finally he came to Christian Science, was healed in a short time, and at a total outlay of about thirty-five dollars, which sum included a pocket edition of Science and Health.

Another instance in point is that of a man who had been a steady user of tobacco and liquor for about twenty years, and who did not average less than a dollar a day for these luxuries, to say nothing of other expensive habits which usually go hand in hand with them. This man had been in Christian Science less than one month, when both habits entirely left him, and that, too, without the exercise of will power and without a word being said regarding them to the practitioner who was then treating him for a physical trouble. It might be well to add that five years have elapsed since then, and there has been no desire on his part for either liquor or tobacco since.

These are only two of many similar cases which might be quoted, to say nothing of those who have been taught to solve the problem of poverty and financial limitations by learning that God is the true and only source of supply; but they may explain why Christian Scientists can afford to be, should be, and are liberal to their Cause.

Certainly, "he who runs may read." To the writer it seems to be a plain, practical proposition, with only one side.

[Written for the *Sentinel*.]

Out of the Gloom.

ED B. MOSS.

Out of the gloom of centuries past
There cometh a day of light:
From man-made creed to humanity's need
Is the voyage from wrong to right.
The clouds of error are floating by—
Sunlight is flooding earth and sky.

Far from the shadows of false belief
We rise to the truth of Life:
From error's sway to the better way,
Wherein there is no strife.
Following Him who the path hath trod
We journey onward and up to God.

Into the turmoil and care of life
There cometh a day of peace:
We lose the thought by error wrought,
And bid all sorrow cease.
For the Christ, the truth has come again
Into the hearts and lives of men.

Learn that to love is the one way to know
Or God or man: it is not love received
That maketh man to know the inner life
Of them that love him; his own love bestowed
Shall do it.

JEAN INGELOW.

Selected Articles.

The Inconsistency of Human Beliefs.

Few realize the inconsistency of the accepted beliefs of the individual until they undertake to formulate them into a system and make them harmonize with a given rule. To illustrate: The physical senses positively and uncompromisingly deny the existence of Spirit, yet Christians hold rigidly to the belief that there is such a being as the Holy Spirit, notwithstanding that in so doing they are discrediting the sense testimony.

Christian Science, consistently with the proposition that God is Spirit, affirms that the creation of Spirit is spiritual, and, therefore, is not material; yet some of the same thinkers who have already repudiated the material testimony in order to believe that God is Spirit, throw up their hands in horror at the inevitable deduction therefrom, that matter is unreal, though it is only another form of the declaration that creation is spiritual.

If Bible students believe in the validity of sense testimony, they will be unable to accept the Scriptural teaching concerning God as Spirit. If, on the other hand, they adhere consistently to the Scriptural teaching, "God is Spirit," accepting only such ideas as are in harmony therewith, they will have to repudiate the testimony of the five senses and they will thereby endorse Christian Science.

It is certain that the testimony of the material senses, and the understanding based upon the Biblical teaching that God is Spirit and Spirit made all that was made, are directly antagonistic, as Paul declared in his statement, "For the flesh lusteth against the Spirit, and the Spirit against the flesh; and these are contrary the one to the other;" and we are called upon this day and every day to choose which we will serve both in theory and practice.

It can be readily seen from a careful examination of the teaching and conduct of our Lord that he had infinite respect for Spirit and no regard for matter, for he said, "It is the Spirit that quickeneth, the flesh profiteth nothing."

Whether or not we believe in the unreality of matter and the nonentity of sin, our conduct must be in accordance with the assumption that there is nothing in either, if we would advance spiritually.

ALFRED FARLOW.
Boston Times.

Replies to Dr. Peters.

To the Editor of *The North American*.

In his efforts to prove that Jesus the Christ advocated the use of medicine, Dr. Peters, in his sermon of Sunday, as reported by you the next day, made use of statements which history fails to support. Surely Dr. Peters does not wish to be taken seriously when he contends that Jesus was accompanied on his travels by a physician in the capacity of a sort of "family doctor." History bears no record of Luke ever having been with the Saviour, much less was he one of the disciples. What presumption to claim that he who was able to raise the dead needed the help of drugs and medicine at any time to restore him and his companions to health.

Never having been a student of Christian Science, Dr. Peters is not in a position to explain its attitude toward physicians. As a matter of fact, Christian Scientists are no less appreciative of the generous, self-sacrificing labors of physicians than is Dr. Peters, or any one else, for that matter. While preferring for themselves to trust in the power of God through prayer to preserve them from bodily ills, Christian Scientists realize the need of persistent and enlightened effort toward alleviating the sufferings of mankind. The adherence of Christian Scientists to their chosen method of cure is born of an experience which may be termed both collective and individual, and which justifies their loyalty to that which has been proven to them to be the better way.

Digitized by Google

Many physicians have become converted to Christian Science just as we believe that Luke, "the beloved physician," became a convert to Christianity, if, indeed, he was an M.D. They are none the less physicians for having advanced to a higher plane of practice, any more than was our Saviour less than the "Great Physician" because he healed the sick through spiritual means in preference to the material.

In Christian Science churches the pulpit is reserved for the weekly reading of a lesson compiled from the Holy Scripture and the Christian Science text-book, and the temptation to attack the religious beliefs of one's neighbors is thereby removed. This also necessitates the use of the columns of the public press for the truth concerning this faith when its tenets are attacked. This is the only excuse that can be offered for seeming to continue a discussion of this topic.

ALBERT E. MILLER.

Philadelphia, March 23. *The North American.*

The study of Christian Science should teach one that the mental and moral attitude of the patient and family is a large factor in bringing out the results desired, and their conscious or unconscious fear of death is the most potent enemy to contend against. It often happens that when this is destroyed in the family alone, the trouble is met.

It is necessary to understand something of the true man and his relation to God before we can realize the meaning of the words that "Life is without beginning and without end." We believe that God is Life, and we believe that God's man, His image and likeness, can never die any more than God could become extinct. Jesus taught that it is Spirit that quickeneth; the flesh profiteth nothing. At the same time we recognize the mortal claim of death, though perhaps we are careful in speaking of it,—certainly in the presence of the sick.

Jesus did not regard death as did others. He spoke of Lazarus as "sleeping" and of the damsel in the same way, showing that he regarded death as a dormant mental condition, from which the victim could be awakened by the declaration of the Truth of being.

There is no Christian Scientist but has a deep sense of sympathy for all who are in sorrow, yet the faith in Truth of those who have had similar experiences, is not lessened but increased, for it has taught them as nothing else could, that their "Redeemer liveth," and, because he lives, they know that "just on the other side" the dear ones have taken up the thread of life's problem anew.

CHARLES K. SKINNER.

Detroit (Mich.) *Chronicle.*

In the public ministry of the Great Physician there is no record that he worked in conjunction with the medical profession of that time. His understanding of divine Metaphysics seemed equal to every emergency. Christian Science has fallen into no mistake in rejecting the assistance of *materia medica,* for the reason that Spirit and matter cannot co-operate. The students of Christian Science are still outgrowing their limitations, and although they are making commendable progress, none are more conscious than they of the great need of spiritual growth. In order to comply with the full requirements of Christian healing, the teachings of Christ must be incorporated into the daily life of the practitioner.

In this age of mental reformation, in which the traditions of the fathers are gradually yielding to a more spiritual era, Christian Science is the most emphatic indication of this progressive tendency, and when better understood will be recognized as the only true method of reclaiming the birthright of man and establishing the kingdom of God on earth.

RICHARD P. VERRALL.

Buffalo (N. Y.) *Commercial.*

The Lectures.

Cheyenne, Wyo.

The Christian Scientists of Cheyenne have reason to feel greatly flattered at the reception given Judge Septimus J. Hanna of Colorado Springs, at Keefe Hall, Sunday afternoon [February 28].

Judge Hanna was introduced by ex-United States Senator Carey, who said in part:—

Since the coming of the Son of Man many denominations have sprung into existence. If these are founded on the life and teachings of Christ, then each is for the advancement and happiness of humanity, and, freeing our minds of prejudice and bigotry, we may rejoice at the existence and growth of each.

Formulative Christian Science is comparatively new. Scarcely a generation ago did Mrs. Eddy give to the world the benefit of her thought and investigations. Mature in years, she still lives, works, and enjoys perfect health. It is said over a million of people read that which has emanated from her pen. Many thousands have studied her teachings and have been convinced, and those who have but casually given them consideration are satisfied that a good Christian Scientist cannot have a bad heart, and cannot be other than happier by reason of this newly founded denomination of Christian religion. It is founded on that Bible which is accepted by all Christendom. It induces study, the study of the Bible. It has brought contentment and happiness to thousands who have accepted it.—*The Wyoming Tribune.*

Quincy, Ill.

Before an audience which filled the lower floor of the Empire Theatre yesterday afternoon [February 7] and which listened most intently for an hour and a half to his able exposition, Carol Norton of New York City, spoke on "Christian Science, the Gospel of Righteousness and Health." The audience was composed of representative citizens, people of thought and intelligence, of every religious belief, and it is no flattery to say that the lecturer held their most constant and respectful attention, and it was conceded by all a most able, logical, and impressive presentation of the religious movement which is commanding to-day the attention of the civilized world. His address was one of the cleanest-cut, most forceful and impressive that we have ever listened to, and the audience left, if not convinced of the truth of this gospel of righteousness and health, at least satisfied that it was worthy of further study and most respectful consideration.

Mr. Norton was introduced by Judge Charles B. McCrory as follows:—

Ladies and Gentlemen:—It is indeed pleasing to be afforded the opportunity of introducing to this audience this afternoon a sincere man,—a man who has traveled thousands of miles and delivered hundreds of lectures in behalf of a Cause and a faith in which he sincerely believes.

It is one of the privileges of the American people—indeed, one of the recognized traits of the Anglo-Saxon race—to think and believe in politics and religion as one pleases. It is one of the sentiments, as I understand, of the faith of which the gentleman speaks, that every man is expected to do his duty (duty towards uplifting humanity).

Protected by these privileges and prompted by this sentiment Mr. Norton will deliver to you the message of the Christian Scientist, and though some of us differ from him, yet I have with confidence assured him that he will be received here this afternoon by a courteous, intellectual, and appreciative audience, and it is with equal satisfaction that I assure you that his lecture is well worth the hearing.

The Quincy Herald.

Among the Churches.

The Work in Winchester, Ky.

First Church of Christ, Scientist, through one of its members, presented Mrs. Eddy's book, "Science and Health with Key to the Scriptures" to the Winchester Public schools, and the Kentucky Wesleyan College, and received grateful thanks for the same.

In February, 1903, we had a fine lecture. It was enjoyed by all present, and helped to remove the prejudice regarding Christian Science. We express gratitude to our Leader and to the faithful and obedient ones who are now working in our Father's vineyard.—G. D. Fox, *Clerk.*

Prospective Church Edifice in Lincoln, Neb.

First Church of Christ, Scientist, of Lincoln, has purchased the vacant lots on the southeast corner of Twelfth and L Streets. These lots, 100x142 feet, will make a centrally located and fine site for the church edifice which this congregation proposes to erect in the near future. The corner selected is not on a car line, but is only one block from some lines, two blocks from two other lines, and only three blocks from the principal street of the city, along which nearly all the cars pass. This site is one block south of the largest Methodist Church in the city, one block west of the First Congregational Church, and two blocks from the First Presbyterian Church.—*Lincoln* (Neb.) *Star.*

Growth in Portland, Ore.

We have been crowded out of our church home, which we own, and have secured the use of the Scottish Rite Cathedral, the finest building of its kind in the West, a building erected by the Masons for their exclusive use. The kindliness, courtesy, and hospitality of the Masons deserves especial mention, for they have put themselves out to accommodate us, and this without stint; and from our hearts we say, "God bless you." The first Sunday [February 28] we held services in their hall we had the hardest rain and wind storm in twenty-two years, yet our congregation was double what it had ever been; our Wednesday evening meetings would have crowded the capacity of our church; and although our expenses have nearly trebled, the need has been met,—another proof of God's goodness and abundance.

W. A. Lee, *Church Clerk.*

Practical Work in Owosso, Mich.

The little band of Scientists in this place, numbering twenty-three members, send this report of work done at the county jail. A committee was appointed to visit the jail every week, distribute literature, and talk with the inmates. Four copies of Science and Health have been placed there, and are being read with much interest. Services have been held every two weeks for the past ten months. The attendants at these services are supplied with Hymnals and *Quarterlies;* some join in the hymns, the responsive reading, and the Lord's Prayer. They look forward gladly to our coming, and several have expressed a wish that we might have service every Sunday evening. Those who have taken part in this work feel amply repaid for their labor of love.

We have been able to place a good deal of literature at the Michigan Central Railway Depot in addition to what has been distributed at the jail, and at our reading room.

W. F. Welper.

Progress in St. Joseph, Mo.

We have secured the Tootle Theatre for our regular Sunday services, as our congregations are already such as would tax the capacity of our former quarters at Unity Church. Many strangers are present at each service, and express themselves as being deeply impressed with it.

Services have been inaugurated in South St. Joseph, where meetings are held in a hall in the new English Building every Sunday evening at eight o'clock. There is a good attendance with increasing interest.

Literature is being furnished to the jail and workhouse, and a service is held at each of these places as often as practicable. Neat receptacles are placed in all hotels and other public places throughout the city, which are visited each week by a committee on distribution and are kept supplied with literature. Our current periodicals are furnished regularly to the free public library, also to the Carnegie branch in South St. Joseph. The growing interest in our text-book, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, is evidenced by the fact that the two or three copies each now owned by the above-named libraries, are never allowed to remain on the shelves, but are eagerly sought by patrons of these institutions. In view of the apparent demand, we have determined to offer these libraries six more copies at once. Several copies of Science and Health which constitute a circulating library at our reading rooms, are all in the hands of borrowers. We are grateful to God for opening the way to a broader scope of usefulness in His service, and our hearts go out in thankfulness to our revered Leader, who, through untold self-sacrifice and unceasing labor, has made it possible for this age to touch the hem of Christ's "seamless dress," and begin to know God aright.

George D. McKay, *Clerk.*

The Work in Los Angeles, Cal.

The increasing interest in the Cause of Christian Science is seen in the large attendance at our services (Second Church of Christ, Scientist). At present we cannot accommodate all who would come, but in a few weeks we expect to occupy a new auditorium with a seating capacity of about nine hundred.

During the year we have purchased a new church building site, with a frontage of one hundred feet and a depth of one hundred and sixty-five feet, at a cost of $13,500, and our necessity urges us not long to delay building. We have also pledged $5,000 to the Mother Church Building Fund.

A lecture delivered by Judge S. J. Hanna, Sunday, December 13, in the new Mason Opera House, gave further evidence of the interest of the public. Two thousand were seated, all the available standing room occupied, and hundreds were turned away.

The reading rooms are well located, and much frequented by strangers.

We have from time to time contributed copies of Science and Health to the city public library, to meet the increasing demand for this book. There are now in the library twenty-one copies of Science and Health for circulation, and the city librarian's report shows this book as one of ten most in demand.

The interest in the Sunday School work is marked. The teachers are deep students of the Lesson-Sermon, and the percentage of attendance is steadily increasing. The membership of this church is at present two hundred and seventy-one, with an attendance of more than six hundred.

In reviewing the work of the year, we see very much to encourage us.—*Correspondence.*

Notice to Branch Churches.

Each branch Church of Christ, Scientist, is requested to send, on or before May 1, a report of its total membership as it stood April 1, to William B. Johnson, C.S.D., Clerk of the Mother Church, 239 Huntington Avenue, Boston, Mass.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

A New By-law.

ARTICLE XIX.

TEACHING IN SUNDAY SCHOOL.—SECTION 4. Members of the Mother Church in Boston, Mass., shall not teach, nor allow members of their church to teach, scholars in the Sunday Schools who are more than fifteen years of age.

Jesus' Works not Supernatural.

THE following extract is the closing paragraph of a sermon preached by a prominent clergyman in a Western city and reported in a local paper,—

"We conclude, therefore, that miracles are possible, they are probable, and the evidence that Christ interposed his will in the course of natural law and did things not attributable to such law, is overwhelming. These works were for the authentication of his mission in the world, and while wrought in the material realm, they have their counterpart to-day in the spiritual. Jesus is still opening blind eyes, cleansing leprous hearts, giving strength to the impotent, and making the dumb to sing praise. He is now the Physician of souls, as he was then the Physician of the bodies of men."

This sermon as a whole may fairly be taken as a statement of commonly accepted beliefs concerning the healing ministry of Jesus, and inasmuch as it was intended as an expression of opinion in support of the authenticity of the Scriptural record, and is a plea for the possibility and probability of the miracles of the New Testament, it can be accepted as the utterance of one who is in sympathy with our Master and his teachings. In view of this intention, and with Jesus' words in mind, "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do," we naturally might expect this clergyman to urge upon his hearers that the healing work which accompanied the preaching of the Nazarene and his disciples is a vital part of modern Christianity and should be as familiar to Christians to-day as of yore; but he does not do so. On the contrary, he tells them in substance that God, the omnipotent and omniscient creator of the universe, had made a mistake; that in order to correct this mistake it became necessary for Him to employ extraordinary measures, that the miracles of the early Christian era were designed solely to attract the attention of humanity to the Messenger whom He had sent to save mortals from sin, and that when this was accomplished the physical healing ceased. We think this is a reasonable interpretation of the sermon when the above quotation and those which follow are considered.

"In the dim past God pronounced everything that He had made good and very good, but it has not continued ideal, but in a remote epoch in man's history his progress was violently interrupted; his career was checked in its course, and the end for which he was created was suddenly thwarted. His free will, which was the highest endowment of his nature and made him most like God, became the source of his greatest misery. By his own choice, he departed from God into a state of lawlessness and death.

"From this state he had not the power in himself to extricate himself. There was nothing in his nature—no germ of good—that could ever propagate itself into a state of righteousness.

"Nothing in natural law could ever operate upon either his physical or intellectual nature, to effect the desired restoration. But if such a remedy could have been found he would have lacked in himself the disposition to apply it for the accomplishment of the end.

"Under such conditions, what was naturally expected of God? When man sees the ruin of his works, and has in his power the possibilities of repair or reconstruction, he at once sets about the work, and does not confine himself to the processes that were employed at the first, if others meet the ends better.

"And is it not probable, when God should see the work which He had pronounced good, ruined by the volition of His creature, involving the everlasting ruin of man and the loss of a kingdom, that He would interpose for the restoration of the same, and that if it could not be done by natural processes that He would resort to supernatural?

"If God be one we conceive Him to be, certainly there is no other conclusion to be reached."

Since the sermon was intended to convince mankind that Christianity is true, we sincerely hope that it strengthened the faith of those who heard it, but we wish the preacher had grasped the full import of Jesus' ministry, and had told his hearers that these marvelous works of our Lord were not supernatural, but strictly in accord with the divine law, and that they are possible now; and to the extent that the Principle which actuated Jesus is understood and demonstrated, they are being accomplished. Happily the truth of Christianity does not depend upon theory or argument; it is based on Principle, it has a rule capable of demonstration if we follow our great Wayshower. All question of the probability and possibility of the works attributed to Jesus by the Scriptures is eliminated by the accomplishment of similar works to-day through following his teachings, and as we learn sufficient of his method to do these works we will be saved from accusing God of having made a mistake, which, when He had gained greater wisdom through experience, He proceeded to correct by supernatural means.

The teachings of Christian Science are consistent with the omniscience and omnipotence of God, and maintain that He is "without variableness or shadow of turning." As to the healing of sickness in Jesus' time, and to-day, Mrs. Eddy writes in Science and Health (Preface, p. xi.),—

"The physical healing of Christian Science results now, as in Jesus' time, from the operation of divine Principle, before which sin and disease lose their reality in human consciousness, and so disappear as naturally and as necessarily as darkness gives place to light, and sin to reformation. Now, as then, they are not supernatural, but supremely natural. They are those 'mighty works,' which were the sign of Immanuel or 'God with us,'—an influence ever present in human consciousness, and coming now again, as was promised aforetime,—

> **To preach deliverance to the captives [of sense],**
> **And recovering of sight to the blind,**
> **To set at liberty them that are bruised."**

Letters to our Leader.

Boston, Mass., April 2, 1904.

Rev. Mary Baker Eddy.

Beloved Teacher and Leader:—On the return of the Easter season our thought instinctively turns to you with a deep and grateful sense of love,—to you as the only one who has enabled us to understand in a proper degree the true meaning of the Easter-tide. It is to God and to you we owe whatever we have seen and proved of the Scriptures and the meaning of the resurrection.

We hope that your heart will be refreshed and cheered by the consciousness which must be yours of the enlightenment that has been given to the world by your teachings, life, and demonstrations.

Lovingly your students,

IRA O. KNAPP,
WILLIAM B. JOHNSON,
JOSEPH ARMSTRONG,
STEPHEN A. CHASE,
ARCHIBALD MCLELLAN.

Concord, N. H., April 3, 1904.

Beloved One:—Gratitude to thee, who hast rolled away the stone from our grave of sense and given us the resurrected life. The day dawns. The nets *are* being cast on the right side.

How good of you to give us the dear poem that appeared in Thursday's *Patriot*. It was indeed Love's springtime greeting and has gladdened many a heart.

I rejoice over the wonderful testimony of the "Uncanonical Gospels" of which Mr. Frederick Dixon wrote you, as given to us in the *Sentinel*. What marvelous confirmatory evidence of the reality of your divine revelation is being uncovered in these progressive days.

I thank you for sharing with your children in each number of the *Sentinel* your precious letters. They are helping us to be more loving and true.

You know, perhaps, that we unite with our Unitarian friends in supplying the beautiful Easter decorations of the church. Is it not a happy omen?

Lovingly,

IRVING.

Washington, D. C., March 19, 1904.

Rev. Mary Baker Eddy.

Beloved Teacher:—You will rejoice to know that our church, last evening, unanimously voted to unite the two reading rooms in Washington by invitation from First Church, and I am chairman of the committee to arrange details. All feel it to be a long step towards unity in every sense of the word, which will come as we are ready for it, and demonstrate it by our own love and good deeds. God is with us, thank Him, and thank you for it.

Our dear Cause in Washington was never so prosperous and firmly established as now, and the unity of thought and action exemplified, and the impersonal love expressed by all is something extremely gratifying.

It is with a heart full of loving gratitude to you, my dear Teacher, that I write these good things, because it is by your love, self-abnegation, toil, and purity that they have been possible.

Lovingly yours,

EDWARD E. NORWOOD.

Brooklyn, N. Y., March 31, 1904.

Rev. Mary Baker Eddy, Concord, N. H.

Beloved Leader:—As the resurrection celebration draws near and we are reminded of its peculiar significance, our thought turns in loving gratitude to you for the many sacrifices and vast achievements that only love, loyalty, and obedience to God could accomplish. We know it will cheer you to learn of the increased unity, brotherhood, and steady advance of the cause of Christ in this field. The signs of spiritual awakening and arising from the dead were never so favorable as at present.

There is much good healing being done, and we will speak of one case which came to us recently. About five weeks ago a lady was lying in the hospital here and the physicians said her only chance for recovery was to have one of her limbs amputated. This she refused to allow, and her thought turned to Christian Science as a possible means of escape. After a few days' treatment she was removed to her home, and in less than four weeks was entirely healed.

Lovingly your followers,

MR. and MRS. A. E. VAN OSTRAND.

Ottawa, March 29, 1904.

Beloved Teacher:—Will you further bless me by accepting the enclosed Easter gift towards your home church? Not as a tithe or as a thousandth part of what I owe you, but in remembrance of the sacred associations in my life with Concord. I find as time passes that my sense of gratitude and love to you grows larger, and I would not have it otherwise. That must always remain a debt unpaid.

In this connection I recently had to me a beautiful example. I had retired for the night, but instead of sleep, there came to me a flood of thankfulness and gratitude to God for all that your beautiful life is and has been to me and mine, and to the whole world.

I think I realized more clearly than ever before the glorious import of that life and work, and the inestimable privilege of being one of your students. From this "mount of vision" the telephone called me for help for a suffering one, and as the messenger told of the symptoms and suffering of the patient, my consciousness was so filled with gratitude and love, that I was able for the time being to know that divine Love and its idea *is*, and there is naught else beside.

I was not surprised next morning to be told that almost at once after asking for help the patient was free.

May all the blessings that you have bestowed upon others, return tenfold to you at this Easter time. My husband and children join me in love.

I am your grateful and obedient student,

ELIZABETH HIGMAN.

Sunny Bank, Manhasset, L. I., March 28, 1904.

Mrs. Eddy.

Beloved Leader:—In an hour of fear, doubt, and anxiety, when hope waned, and when the odiousness of unbridled sin nearly overwhelmed my dawning faith in true Science, I had such a demonstration of the allness of God that I thought perhaps it would rejoice your heart to hear it. I visited my old home last spring, and while there an old servant who has been in our family for over fifty years was stricken down with a seeming attack from the heart, head, and stomach.

The collapse took place in my room and her heart-rending appeal to save her brought to me such a sense of utter helplessness that I cried aloud, "I cannot do it," when instantly came the realization of Truth, and again I cried, "No, I cannot, but Christ can, and I am here to declare it;" and I did, and, dear Leader, that woman was healed!

Do you wonder that I love Science and consequently love you when I know that it was the revelation of Christian Science which enabled me to declare Life to the utter destruction of death? I am poor in expressions of gratitude, I feel that my life must be the expression of my love and my gratitude to God and to you.

Lovingly,

IDA RUTH STEWART.

True Brotherliness.

THE congregation of First Church of Christ, Scientist, of Houston, Tex., has grown to such an extent as to necessitate an increase in the seating capacity of the church building, and while the question of obtaining temporary quarters pending the enlargement of the building was under consideration, the following letter was received from the Hebrew congregation. The loving thought which the letter discloses will be appreciated by Christian Scientists everywhere. These good friends declined to accept any compensation for the use of their building, on the ground that they "did not believe one religious body should charge another anything for the use of its church."

The letter and reply express the spirit of true brotherliness.

Houston, Texas, March 14, 1904.

Mr. Jas. D. Sherwood, City.

Dear Sir:—The Board of Officers of the Hebrew Congregation Beth Israel take pleasure in tendering through you to First Church of Christ, Scientist, the use of the synagogue on Crawford Street and Franklin Avenue, in which to conduct your Wednesday night and Sunday services, for such period as you may find necessary.

Respectfully,

J. N. TAUB, *Vice-President.*
H. J. DANNENBAUM, *Secretary.*

Houston, March 15, 1904.

Mr. J. N. Taub, Vice-President Hebrew Congregation "Beth Israel," Houston, Tex.

Dear Sir:—I am just in receipt of your communication of the 14th inst., in which you advise me of the action of your Board of Officers, tendering to First Church of Christ, Scientist, this city, the use of the synagogue in which to conduct the Wednesday evening and Sunday services.

I can, kind sir, but faintly express to you the deep sense of gratitude that is felt by our congregation to yours for this true expression of brotherly affection, in which the helping hand of the oldest religion on earth is extended to us in loving kindness. This deed is prophetic of the coming of that universal brotherhood which shall unite all men and kindreds and nations in the worship of one God who is Father of us all.

Again thanking you and your dear congregation for your loving kindness,

I am, sincerely yours, etc.,

JAMES D. SHERWOOD.

Semi-annual Lecture of the Mother Church.

THE semi-annual lecture on Christian Science, under the auspices of the Mother Church, will be delivered by Bicknell Young, C.S.B., a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass., in Symphony Hall, corner Huntington and Massachusetts Avenues, Thursday evening, April 14, 1904, at eight o'clock. The lecture is free and the public will be cordially welcomed.

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

Testimonies of Healing.

[Translated from the Spanish.]

Thinking it my duty to make public my cure through Christian Science, I herein relate the facts as they transpired.

In the month of March, 1903, I felt a slight pain in my head, which went on increasing. Alarmed by this, I consulted a physician, who prescribed for me. As I saw myself no better, but on the contrary quite weak, I consulted another doctor. This gentleman followed the same lines as the first, and his treatment, as may be imagined, brought even worse results. As my debility continued, I then consulted a very famous pharmaceutist in the quarter where I live. With this gentleman I had better results. He said I was suffering from a severe general debility which had affected my lungs; this I believed, as I felt pain in my lungs and passed most miserable nights. I was convulsed with coughing, and thus day by day I was growing worse and worse, until I found myself completely prostrated, without energy for the slightest task.

Finally I consulted another doctor. At this time my health was very bad. I suffered from great pain in my lungs, expectoration of blood, fatigue, copious perspiration, and in short, all the symptoms of pulmonary disease, as the doctor declared it to be. With his remedies I felt some relief, above all with the one of which I took fifty grammes a day. By the aid of this medicine my cough was reduced, the pain in my lungs lessened, also the expectoration of blood, and I even began to sleep better. But this improved condition lasted only so long as the effect of the drugs lasted. Then my cough would return with renewed force, the pain would be sharper, and the expectoration of blood more abundant. Thus it was after every use of the drugs: first a calm, then worse pain than before.

When the doctor was convinced of the inefficacy of his prescriptions, he advised me to seek the purer air of the country, believing it very hard to cure me in Santiago. What could I do, sick and without means to meet the expenses of a trip to the country? I lost all hope and saw only death before me, and the thought of those I should leave behind added greatly to my burden and sorrow.

In this state I found myself when God remembered me. And to think that I had not remembered Him! I had now been ill five months when there came to my house a friend, whom I had known but a short time. She told me of a lady who could cure me in Christian Science if I would have faith in God, who is the world's Great Physician.

I promised her to go to the lady the following day. It was Saturday and raining hard, but I went, notwithstanding the doctors had warned me not to wet my feet. Fearing nothing, for I was confident that I was in God's care, I arrived at the house of the Christian Scientist. She talked much to me of the good deeds and the power manifested through Christ Jesus, which I had not ignored, but rather neglected. She told me of many healings, among them her own. So great was the faith and confidence that I saw in her, that from that day I was another man, and anxiously awaited my perfect healing. I remember that to prove to her and to myself my faith and confidence, I promised to begin work the following Monday, a thing also prohibited by the doctors.

I fulfilled my promise. I went to work, I abandoned drugs, I did all that the practitioner told me to do, and awaited my healing with a faith such as I had never had before. That glorious day was not long in coming. In from twenty to thirty days I was well and strong to do work.

Now I am happier because I have learned to live in the faith of Christ, and because I can be more useful to my family and fellow-men by telling them of my healing through the Christ-Science.

Digitized by Google

Now, dear readers, I close this testimony, advising you never to lose heart in the illness and troubles of this life, nor to consult any man whatsoever in your sickness or pain, but always consult God, and with absolute faith, who said not in vain that by faith the mountains can be moved from one place to another.

Always consult God in all that is necessary and you will find your prayers answered. Ask and you will *receive*, and knock and it will be opened to you.

Read the Bible, not as you would read a newspaper, to forget it all to-morrow, but read it with the new understanding gained through Christian Science. Make yourselves learned by its contents, retain it in your minds and preserve it by means of the practice of good deeds and you will be more happy than you ever were before.

JERARDO OLGUIN VACA, Santiago de Chile.

Fifteen years ago a copy of Science and Health was loaned to a member of our family, and although none of us were in especial need of physical healing we became intellectually interested in Christian Science. Unitarian teaching had given us an easy tolerance of all human philosophies and religions, and we readily accepted in theory the proposition that God is Mind, and that Mind creates and governs all. I myself was young, arrogant, and well satisfied with my treasures on earth; but I took pride in speaking patronizingly of Christian Science as teaching much that was good, although of course no liberal-minded person could accept the whole of any one doctrine. I did not, however, honor Science and Health with my personal attention, preferring to dabble in latter-day theories of evolution, physiological psychology, etc. The use of medicine was gradually discontinued in our family, and we came to depend entirely upon what we called "Christian Science with Mrs. Eddy left out." Into this false teaching we were led by intellectual arrogance and self-will, which so deified themselves in our consciousness that we believed that God was showing us the way.

Although repudiating the movement and the church organization, certain members of the family continued to read Science and Health from time to time, and to this fact we owe our deliverance from darkness. My older sister first "came to herself" and found the strait and narrow way back to our Father's house. At the time when she joined the Mother Church in Boston I was teaching in another city where I knew no Christian Scientists and none who were interested in "science falsely so-called." My sister gave me a copy of Science and Health in which I promised to read a little every day. The light of Truth thus admitted to my thought began presently to reveal some of the errors existing therein,—the inconsistency of claiming to understand what I could not demonstrate; the arrogance of expressing an opinion on a subject which I had never really investigated; the self-righteousness of refusing to accept spiritual guidance from those who had proved by their works that they possessed a fuller knowledge of Truth than I. It gradually became clear to me that those who make the most rapid progress in any line of thought are in the nature of the case leaders, while those who advance more slowly are of necessity followers, and will so continue until they succeed in bringing forth works as mighty as those more advanced.

In a comparatively teachable condition of thought I finally went to a prominent member of the Christian Science organization in this city and expressed my desire to investigate this subject for six months in order to convince myself if it were the truth. She freely agreed to help me, and I began to study the Lesson-Sermons and attend the services. The mental conflict which I was undergoing had already manifested itself in certain disturbed physical conditions, particularly in a nervous affection of the stomach and heart. This soon culminated in nervous collapse, with accompanying symptoms of grip. Then Truth, having broken down the barrier of human consciousness, proved itself my refuge and my fortress. Under Christian Science treatment these conditions disappeared almost immediately, and I was enabled to continue my school work without interruption; nor have I missed an hour from it through sickness during the three years which have passed since that time. Three members of our family are now members of the Mother Church and the rest are on the way. We no longer ask, "What is truth?" for Christian Science has given us the answer. It is my greatest joy to realize that only as a little child can one be admitted to the kingdom of heaven,—that when a knotty problem presents itself the answer is to be found not through human intellectual perception but through the demonstration of spiritual goodness,—that likeness to the Father which enables us to "see Him as He is;" and in so far as we become pure enough to see Him we see and understand what He creates, "all the glories of earth and heaven and man" (Science and Health, p. 264).

I thank God that He has enabled me to see the truth about our Leader and to acknowledge my love for her and my delight in following her, even though it be "a great way off." Only the glorification of self in one's own consciousness can prevent the recognition that God alone is glorified in her.—ROSEMARY BAUM, Utica, N. Y.

[Translation.]

Whenever we receive a new number of our *Christian Science Herold*, the thought comes to me to do my duty to God and relate my experience in Christian Science, that others may read it and be led to join this Christian army where all evil is being destroyed. We read in the Scriptures that God made all that was made, and it was good. The right understanding of this destroys all evil.

Five years ago, my husband was much troubled with rheumatism. He had tried everything but without avail. Then one Wednesday evening he went to the Christian Science Church, and after he had attended the third meeting, the rheumatism was gone. When I saw that, I went with him, but when the people began to mock me, I stayed away. This, however, had no effect upon my husband, except to make him stronger, and he attended the meetings as often as he possibly could. It disturbed me, for he had never gone to any church, and I then thought, What do I care for the world? I shall also try to please God,—yet I only did what pleases the world.

Then all my ailments, which had almost disappeared while I attended the Christian Science service, returned. I must have help, and my husband gave me freedom to choose, so I chose a physician and medicine. The doctor came, but could not ascertain what ailed me. I grew no better and went to another physician, but instead of getting better, I grew constantly worse. Then my husband asked me to try Christian Science. I consented and had one treatment, but could not believe that I must take no medicine. The next day I went to a third doctor. He told me I had stomach trouble and should eat just as little as possible, dry bread only. He stated that I was in a bad condition, the disease might become chronic, that I would have to suffer for years to come, and must drink no water. I was very hungry and thirsty. My husband then said, I might eat what I liked, it could do me no harm, but that I would feel better for it. I did so and felt better.

During this time, my husband had taken class instruction without telling me of it. He gave me a supplement to the *Christian Science Sentinel*, which was published in German, and at the same time he took me to a Scientist for treatment and I was healed in two treatments. I could not read English, nevertheless I now went to church and attended the meeting.

I was filled with a great desire to know the truth, and just then the first number of *Der Christian Science Herold*

Digitized by Google

was published. My joy is unspeakable, words fail me to express my gratitude. An entirely new life governs our home, which we owe to God through Christian Science.

FRAU ANNA PLOPP, Sheboygan, Wis.

While never an invalid, I, too, have felt the healing power of Truth. For years I suffered from sick headache in a severe form, and Christian Science healed me, without treatment, by giving me a higher, better understanding of the laws of God. For this release from pain I am truly thankful, but it is for the spiritual awakening whereby I have been enabled to discern the true meaning of the Scriptures, that I wish to express something of my love and gratitude, not only for the Cause of Christian Science, but for its Founder and Discoverer as well,—our dear Leader, Mrs. Eddy. I have heard many testify that until thus awakened, the Bible was to them a sealed book. Just what it was and is to me may be best shown by the following incident.

Several years ago my husband and I were active members of a little social club that met once a week, and, as I remember, it took us just six days to prepare for a meeting of this club; and as I remember also, it was not all pleasure. The time came when we said in our hearts, "This, too, is vanity." But still seeking pleasure on a material basis, we formed a little whist party and called it Blake's Bible Class. At the time, I thought this was smart, but have since had the grace to be ashamed of it; and yet it serves a purpose in showing the difference between the old life and the new, for in writing to one of our friends who had left the city, I told him of our acceptance of Christian Science as the truth, in these words, "Blake's Bible Class has become a reality, and in it we find our first and greatest pleasure, for Christian Science gives understanding instead of blind belief." For six years now, and more, I have been a student of the Bible, and have found both pleasure and profit in it.

Elijah healed the sick and raised the dead nine hundred years before the coming of Jesus, thus proving that the Christ has neither beginning of years, nor end of days. Nineteen hundred years have passed since the birth of our Master, and in obedience to his command, Christian Science is again manifesting the majesty and might of God, in healing the sick, the sensual, the sinner. Then, in the words of Paul, "Why should it be thought a thing incredible with you, that God should raise the dead?" "For the promise is unto you, and to your children, and to all that are afar off." The promise of what? The descent of the Holy Ghost, the spiritual understanding that enabled Elijah to say to the poor widow, "Thy son liveth." "There is no death" (Science and Health, p. 428).

MRS. LEILA E. BLAKE, Kansas City, Mo.

In June, 1895, I went to Jamestown, N. Y., to try Christian Science treatment. I had no faith, but to please a relative decided to give it a trial. I had worn out medicine, and after a serious operation heard this decision: "We can do no more for you except to give you something to deaden the pain. You must be careful about overworking and careful about walking, or it will cause peritonitis," and this occurred three different times. I had also been told one lung was entirely gone and the other had a large cavity; besides the muscles about the heart were so thickened that my heart might stop at any moment.

I began treatment and bought "Science and Health with Key to the Scriptures" by Mrs. Eddy. In two weeks I was healed of constipation, and headaches due to a weak spine. I also wore glasses, the result of grip, and one day my practitioner found me reading Science and Health with them. She said, "Man's sight is in God, and you will find you do not need them." I replied, "I have just paid twelve dollars for them; besides, I have been told they were very becoming." Nevertheless, I removed them and was healed.

I was conscious of many ailments dropping away but there were still so many left, that had the practitioner not been full of loving kindness and patience I should have been discouraged. For three months Science and Health seemed to be a sealed book to me, but my helper declared "the light will come."

It was fully a year before all evidence of the consumption that I had inherited from both parents had disappeared, and left me free from pain and fear. I wish to express my gratitude to our Leader, Mrs. Eddy, for this great benefit, and this knowledge of God. I have learned, if a pain overtakes me, to put it out and shut the door in its face. And best of all, I have learned that God is Love.

M. E. K., Jamestown, N. Y.

I have long wished to express my gratitude for the priceless gift of Love in our revised Science and Health. After the first reading of our text-book some years ago, these two characteristics remained uppermost in my mind, —its purity and common sense. During the following years of study and demonstration, I had a constant desire so to adjust its teachings to the details of daily life that I could meet every man on his own mental plane, and as told of the Master, take him by the hand and lift him up.

In the mean time, severe experiences resulted in such confusion of thought on this subject that I was almost overwhelmed with doubts and tempted to give up the task as hopeless. Many questions had to be laid aside for a clearer exposition from some source, either in confirmation or in the correcting of misconceptions. Mental and physical prostration followed, the recovery being very slow, but when the time was fulfilled, the new edition of Science and Health came with such loving assurances that it was like a flood of sunshine after a winter's storm, and peace and health became established. Later, it was my pleasure to look over some early editions of Science and Health, and I found with joy the same divine Principle stated in true and strong terms, and this proved that when understood a different wording could not obscure the light.

Another blessing for which to give thanks, has been the *Sentinels* and *Journals*, also the *Quarterlies*. With these, and the unerring guides provided by our dear Leader in her writings, including the Concordance and Manual, no earnest student of to-day can have excuse for going astray in understanding and applying Christian Science to the needs of human life.—MISS JENNIE W. BACON, Oakland, Cal.

I became interested in Christian Science about two years ago through the healing of my husband. He was a sufferer from lung trouble, and had been doomed to die by the numerous physicians who had attended him. Since then I have had overwhelming proof of the power of divine Love, and know that it does meet all human need. Three of our family received class instructions about a year ago, and it has been our great privilege to help others as well as ourselves.

A short time ago a number of friends had been invited to lunch with us. When I awoke on that morning it was to find that an old ailment of years' standing—sick headache —was holding me down with an iron grip. My first thought was to telephone, asking them to postpone their visit, but my next thought was, "Divine Love always has met, and always will meet, every human need" (Science and Health, p. 494). Not being able to overcome the condition myself, I sent word to my teacher who helped me. The healing was instantaneous. In less than half an hour I was up and dressed, feeling as well as ever.

When our friends arrived at noon they never dreamed that only a few hours before I had not been able to raise

Digitized by Google

my head from my pillow. Under *materia medica* these attacks lasted at least twenty-four hours. I thank God for Christian Science.—D. M. N., Cleveland, O.

I wish to express my gratitude for the benefits received by myself and other members of the family from this Christ-truth. It is now two years since I took up the study of Christian Science. I promised to look into its depths if I could receive help for my eyes. Although I had little or no faith, I took treatment and was healed in less than a week. I was treated absently for a severe case of astigmatism of a number of years' standing, glasses having been my constant companion for almost four years.

Since I have studied "Science and Health with Key to the Scriptures" by Mrs. Eddy, I have been awakened to a spiritual understanding which I never before knew the Scriptures contained.

I have been relieved of neuralgia of the face with which I was attacked every spring, also an old enemy called quinsy. I have had only a slight attack which was overcome in a few days, where before I was laid up from one to two weeks, and had a return of it every time there was the least sign of any cold.

I have found in Christian Science freedom to worship God, and I cannot help offering my gratitude to Mrs. Eddy who has labored so unselfishly for us.

Miss Gertrude Brewster, Akron, O.

I wish to speak of the great benefits I have had through Christian Science. I had a trouble come on me which baffled six of the best physicians I could find. I could not get any help from them or their medicine while I was under their care, about five years, growing worse all the time until I became helpless, not even able to feed, dress, or help myself in any way. The doctors called my trouble creeping paralysis.

My sister, as a last hope, took me to a Christian Scientist in Fall River. As I could not walk, they took me like an infant from the carriage to the cars, and that way to the office of the practitioner, and the same way back. He gave me great encouragement and hope, and I can truly say that inside of three months I was perfectly well and could work as well as ever. I was free from all discords and bad feeling, which after these many years have never returned in any form.

I thank God daily for His goodness, and I thank Mrs. Eddy for giving to the world Christian Science. I also thank my practitioner for his faithful labors in Christian Science, which is the way to health.

Darius Perry, Marston Mills, Mass.

About four years ago at the midnight hour I was suddenly awakened out of my sleep to behold a mother weeping over her darling baby. To mortal sense the little one was passing away, she was as pale as a corpse. I knew something must be done, and done quickly.

Knowing something of Christian Science I began to reason thus: King Asa sought not to the Lord, but to the physicians: and Asa slept with his fathers. I also realized these words to be true: "Yea, though I walk though the valley of the shadow of death, I will fear no evil: for thou [Love] art with me." The battle which was waged between the power of Mind and material sense soon proved a complete victory on the side of Truth. In less than an hour our baby turned over in bed and patted me on the cheek.

I believe that Jesus' words are as true and demonstrable to-day as when spoken nineteen centuries ago. He said, "I am come that they might have life, and that they might have it more abundantly." I wish to express gratitude to God and to our Leader for her pure thought, to my teacher for class instruction, and to all Christian Scientists who have helped me with their beautiful thoughts of Truth and Love.

G. D. F., Pilot View, Ky.

It is four years since I first heard of Christian Science. I knew at once that it was the truth and just what I was searching for. I began the study of "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, and since then Truth has been the only healer in our family. I have asked for help from a practitioner but twice.

There has scarcely been a day since coming into Science that there has not been a call for the help of Truth. I will name some of the diseases that have been healed through Christian Science,—bronchitis of twenty years' standing, nervous prostration, indigestion, biliousness, chronic bowel trouble, croup, and chills and fever.

Words cannot express my gratitude to Mrs. Eddy for all the good that has come to me through Christian Science and to all the friends whose testimonies in the *Sentinel* and *Journal* are so helpful. We do not have the privilege of attending church; we are alone in the work here.

Mrs. Dora Locke, Senath, Mo.

I desire to tell of some of the blessings that have come to me through Christian Science. I had consumption and knew there was no help for me in medicine. A friend who had been greatly benefited by Christian Science wished me to try it. I did so, took two weeks' treatment and was healed.

When a child I was afflicted with nervous headache which they said I had inherited, also scrofula. One by one these ailments yielded to Science without any return, for which I am very grateful.

Through the assistance of my practitioner and Science and Health I commenced to understand the Bible which I never had understood before. I have devoted considerable time to the study, but no time was ever spent by me to greater advantage; and, of course, much happiness is realized from the knowledge that we can cast our burden upon the Lord.—R. Emma Meeker, Chicago, Ill.

I am filled with gratitude to God for Christian Science. I was afflicted with flux, heart trouble, and asthma for about thirty years prior to taking this treatment, which has cured my many diseases.

I wish to avail myself of this opportunity to testify to all mankind of God's blessings, which have come to me through Christian Science after I had tried all kinds of material treatment to no avail. I now rejoice in a God who is able to cure all the maladies of the human family.

William G. Bootman, National Military Home, Kan.

[Written for the *Sentinel*.]

Truth's Paean.

EMILY HOUSEHOLDER.

One note with endless range
Vibrant with infinite change
All music holds;
One law of harmony
And all the latent melody
Of sound unfolds.

One Soul reflected infinitely
Imaged in varying degree
All life contains:
One law of love, and free
And full, triumphantly
Rings out Truth's pæan.

From our Exchanges.

It is a marked feature of religious literature, and of secular as well, both in England and in America, that there is a call for a revival of religion. The dying out of the old theology seems to have involved a decadence of religious sentiment. This was perfectly natural, because theology and religion were esteemed to be so nearly identical. It needs no close scrutiny of the churches to discover that things which have heretofore made part of the religious diet have become indigestible to both clergy and laity. Somehow, in connection with the evolution of opinion, there has come about a very remarkable change as to the expectation of salvation. The fear of eternal punishment and the effort to be saved therefrom hardly find expression now even among the most conservative. There still lingers among the creeds a modified set of expressions concerning everlasting punishment, but these are tolerated, because in one way or another they can be explained away. Any conception of an infinite God who occupies eternity with the unending punishment of those who, more or less, have rebelled against His will, finds little toleration in the most arrogant pulpits. Individual salvation, in the modern acceptation of the word, has been shifted from escape from an angry God to escape from the lower self into the growth of a higher character, from selfishness to service.

The Christian Register.

Utilize, then, to the full the gift God has given you of making friends. Think less of what you may get out of a friendship than what you may put into it. Turn to spiritual account your happy student comradeships, your business friendships. Do not bore your friend with formal religion, but let him not fail to know that the deepest thing of your life is your friendship with Christ which enables you all the better to cultivate your human friendships. For there are no friendships—and I speak as one who for many years has been blessed therewith far beyond deserts—like those between persons trying to live under the inspiration of Christian hopes and the Christian ideals.

REV. H. A. BRIDGMAN.
The Congregationalist.

If Christianity is to vindicate its divine origin and authority to the average men and women of to-day, it must be because of what it does to-day rather than because of what it did a few or many centuries ago.

The hold that Christian Science has upon many minds arises largely from the fact that they believe that through it something is done here and now. The historians of the early church assert that the spread of Christianity in the first century was largely dependent upon the miracles of healing wrought by the primitive Christians and by the moral transformation wrought in the characters of those who accepted the Gospel.—*The Watchman.*

Every voice of conscience summoning to virtue or restraining from vice, saying, Thou shalt, or Thou shalt not; every regret for a misspent past, every sorrowful "I have done the things which I ought not to have done and I have left undone the things which I ought to have done;" every inspiration to a higher, nobler, and better future, calling from the heights above, Follow thou me—yes, every incentive to generous or unselfish service and self-sacrifice for another, every impulse toward humanity of pity for the sorrowing or of mercy for the erring, is the voice of God speaking within us.—*The Outlook.*

A sincere and consistent Christian is a living Bible, an epistle of God seen and read of all.—*The Examiner.*

THE CHRISTIAN SCIENCE TEXT-BOOK.—Science and Health with Key to the Scriptures with latest revisions and additions, and numbered lines. 700 pages.

For description, price, and other information, see last page of cover.

THE NEW CONCORDANCE.—A complete Concordance to Science and Health with Key to the Scriptures. This work has been compiled from the late revised edition of SCIENCE AND HEALTH, and contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10x7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

CHURCH MANUAL.—Containing the By-Laws of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. This does not include the list of members. Price, prepaid, $1 per copy; $5 per half dozen; $9 per dozen.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America.

It contains about thirty-eight pages of reading matter, and is valuable as an authorized representative of the movement.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

250 Huntington Avenue, Boston, Mass., U.S.A.

ARCHIBALD McLELLAN, Editor-in-chief. JOHN B. WILLIS, Second Editor.

ANNIE M. KNOTT, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

To make the final payments to the Panama Canal Company and the Republic of Panama it is probable that another call on the banks for about $20,000,000 will have to be made. Secretary Shaw already has withdrawn $30,000,000 to meet the payments of $50,000,000 and has about $56,000,000 in the Treasury that is available. To take $20,000,000 out of that sum would leave a balance smaller than is considered prudent, as it is the opinion of the Treasury officials that the balance should never be allowed to fall below $50,000,000.

After a conference between Ambassador Porter and W. A. Day and Charles W. Russell, representing the United States Government at Paris in the transfer of the Panama Canal property, it has been arranged that the signing of the contract shall take place at the United States Embassy. The date of the signing will probably be about April 25, following the ratification of the agreement by the stockholders of the company.

The members of the United States Canal Commission received an enthusiastic welcome on their arrival at Panama last week. They were met at the railroad station by a number of special commissioners representing the Government of the Republic. At the palace the meeting between President Amador and the Canal Commissioners was most cordial.

The Census Bureau last week issued a bulletin which gives the estimated population of the United States for 1903, exclusive of Alaska and the insular possessions of the United States, as 79,900,389. This is an increase of 3,905,814 since the census of 1900.

The Post Office appropriation bill was laid before the Senate last week and the two million dollar appropriation for the post office site at the Pennsylvania Terminal in New York was adopted without division.

Secretary Hay and Señor Quesada, the Cuban minister, signed a treaty of extradition on the 6th.

Foreign.

The failure of the Cuban budget to include the necessary appropriation for sanitation in accordance with the terms of the "Platt Amendment" has resulted in American citizens, resident there, bringing the matter to the attention of the diplomatic and consular representatives of the United States accredited to the Cuban Republic. Minister Squires is expected to bring these complaints to President Palma's immediate attention and insist that, in future, civil governors and municipal mayors shall show a disposition to comply with, rather than evade, duties assumed by the republic under the "Platt Amendment."

News has been received of the successful inauguration of the new railway line between Athens and the Greco-Turkish frontier. The proceedings were presided over by the King of Greece and members of the Royal family, who went to Chalcis in a special train.

The line is 270 miles long and will ultimately extend to the Ottoman frontier. It has a branch running to Chalcis, opposite Thebes, on the one hand, and another leading to Lamia-Stylis, near Thermopylæ. It will connect Athens with Thebes, Livadia, Dadi, Lamia, Domoco, Pharsalis, and Larissa.

The Mosely Commission has issued its report on the educational system of the United States. It covers every department of American educational work, and especially praises manual training, co-education, and the sanitary and hygienic conditions of the buildings and schoolrooms.

The Anglo-French colonial treaty, including the agreements relating to Morocco, Egypt, and Newfoundland, has been signed.

Industrial and Commercial.

Bishop Spalding of Peoria, a member of the Anthracite Coal Strike Commission, before the House Committee on Labor last week, urged the plan of arbitration contained in the Foss bill. The bill provides for a permanent board of arbitration to which shall be referred disputes between labor and capital.

Bishop Spalding said it was not his opinion that the proposed tribunal would never be called upon to determine the question of what is a legitimate profit on the investment of capital. Its province would be to settle disputes as to hours, treatment, and pay of employees by the employer. "I would say," he continued, "as Sherman said of war, that the strike is hell." Men who had been out on strike went back to work injured morally, and not the same men. The Bishop said he did not believe in sympathetic strikes. The strike, he replied, when asked if he would deny labor organizations the right to strike, was the one weapon of labor organizations, and to deny that right would be to deny the right to organize, but the great object sought, he added, is to bring about peaceful settlements without strikes.

The American Academy of Political and Social Science convened in Philadelphia last week for its eighth annual session. Delegates from many cities assembled at the Manufacturers' Club and nearly all great corporate interests were represented. The chair was occupied by Frank A. Vanderlip, former Assistant Secretary of the Treasury. The subject for consideration during the session was "The Government in its relation to industry," which was sub-divided and taken up in detail. The first branch of the topic was "the Government regulation of banks and trust companies."

Secretary Taft has received a cable message from Governor Wright saying that under the existing laws of the United States citizens of the Philippines cannot protect their inventions in the United States by caveat and the United States Patent Office refuses to issue patents to such citizens. The Senate Committee on the Philippines has been requested to add a section to the present Philippines bill which shall give the people of the Philippines the same right to protect their inventions that is given to citizens of the United States in this country.

Transportation managers estimate that Nome and the lower Yukon districts in Alaska will call upon the United States for not less than one hundred thousand tons of freight during the coming season. Seventeen vessels, steam and sail, already are engaged for the trade. Contracts placed indicate that the rush to that region this year will be greater than in any previous year.

An immense deposit of nitrate of soda at Chihuahua, Mexico, has been discovered and acquired by a private party there. An analysis shows that the percentage of nitrate is sufficiently high to make the deposits of great commercial value.

The steamship Romanic has just brought in its cargo an immense map of the valley of the Nile, in Egypt, done in plaster, which is to be set up at the St. Louis Exposition to represent that famous valley and its irrigation.

In North Tarrytown, N. Y., a clay deposit has been found containing millions of tons of terra cotta clay. One of the largest and most modern plants along the Hudson will be built on this site this summer.

Twelve camels including a baby, and one gazelle were part of the cargo on steamer St. George, which recently arrived at New York from Algiers. They are to be a part of the Algiers exhibit at St. Louis.

Conservative estimates place the spring clean-up of gold at Nome, Alaska, at $1,250,000.

General.

Siberia has always been regarded as a cold and desolate country, where summer and vegetation were comparatively unknown, but the building of the Trans-Siberian Railroad opened the world's eyes to its wonderful agricultural possibilities, and especially to its rich and luxuriant grazing. It is said that more than one thousand butter factories were established there within three years after the railway was opened, and already the exportation of butter has reached the enormous proportions of ten million dollars a year. To foster this important industry the Government has undertaken to furnish free instructions, on a large scale, in butter making and dairying.

The Ferrocarril Central del Peru is the highest railway in the world. In eight hours it takes passengers from the tropics to the eternal snows at an altitude nearly equal to the top of Mont Blanc, the highest summit in Europe. It cost forty-five million dollars to build this road. In one place it was found necessary to drain a river by means of a tunnel and use its dry bed for the tracks.

The original manuscript copy of the first book of Milton's "Paradise Lost," which failed to reach the reserve price of £5,000 at a recent auction in London, has been sold privately to an American collector. The price is not divulged, but it is obviously more than $25,000. The copy is a thin quarto volume of seventeen leaves.

Texas leads every State in the Union in railway mileage. It shows 11,294.59 miles, Illinois is second, with 11,229.56, and Pennsylvania third, with 8,927. The latter is up to June, 1903, while the figures of Texas and Illinois are up to January 1, this year.

The receipts of the recent Whistler exhibition under the auspices of the Copley Society of Boston were $16,200. The net balance is expected to reach about seven thousand dollars.

The pay of a Russian lieutenant is about two hundred dollars a year, of a captain about three hundred, and of a major four hundred and fifty.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

From our Contributors.

Attempted Legislation in Iowa.

JOHN L. RENDALL.

A MEASURE recently introduced in the Iowa Legislature illustrates the necessity for careful and prayerful watchfulness upon the part of Christian Scientists. This measure was labeled, "A Bill for an Act to regulate the practice of Psychiropathy." This looked innocent enough at first glance, but investigation of the provisions of the bill led to energetic action.

Section 5 of said measure defines psychiropathy as follows: "The term psychiropathy is a compound word, derived from the Greek, the meaning of which is, treatment by the mind and hand. Thus any person employing the influence of the mind, by suggestion or otherwise, or who uses the hands by making passes, applying them to the patient, or in manipulation for curative purposes, is practising psychiropathy. Therefore, the systems of healing commonly known as mental science, divine science, . . . or any other system of drugless therapeutics other than osteopathy, are hereby declared to be the practice of psychiropathy, as within the meaning of this act."

Section 4 provided that none should practise other than those having a diploma from a legally incorporated school of psychiropathy.

While it is true that Christian Science was not specifically included in the bill, it was quite evident that the intention was to include it, and the framers of the bill thought they had done so; and as the provisions of the bill made it impossible for Christian Scientists to accept it, the necessity arose for a specific exclusion from its operation.

A Christian Scientist appeared before the Senate committee and requested that the bill be so amended as to exclude Christian Scientists, and for the following reasons: Christian Scientists are not asking for any special legislation. They are a Christian denomination who believe in the teachings of Scripture relative to healing the sick, and that said teachings are practically applicable to the needs of humanity at the present time. With them, healing the sick and the sinful is accomplished by "one and the same metaphysical process" (Science and Health, p. 210).

Herein lies the distinguishing difference between Christian Science and other so-called methods of mental operation; viz., that Christian Scientists recognize but one Mind, God, while other systems claim minds many, and attribute mind healing to the so-called laws of psychic phenomena, so that in theory and practice they are diametrically opposed one to the other.

The position taken by the promoters of this bill is one well known to Christian Scientists, who are constantly called upon to define their position. The belief of "mind in matter," sometimes designated as the "sub-conscious mind," to which some people attribute healing power, is as distinct from infinite Mind, on which Christian Scientists depend, as is darkness from light.

Mrs. Eddy, the Discoverer and Founder of Christian Science, says, "To heal, in Christian Science, is to base your practice on immortal Mind, the divine Principle of man's being; and this requires a 'preparation of the heart and an answer of the lips from the Lord.'" "The Science of healing is the truth of healing. If one is untruthful, his mental state weighs against his healing power; and similar effects come from pride, envy, lust, and all fleshly vices" (Rudimental Divine Science, p. 19).

As Christian Science does not teach the methods included in the bill, and as Christian Scientists cannot accept the provision of the bill or conform to its requirements, and as Christian Science has been proven to be of inestimable benefit to hundreds of citizens of the State of Iowa, any measure which will by reason of their inability to accept its provisions deprive them of their religious rights, is necessarily unjust. It is therefore respectfully requested that the bill under consideration be so amended as specifically to exclude Christian Scientists from its operation.

We are pleased to say that the bill was killed in the committee.

What is Christian Science?

ISIDOR JACOBS.

As we see the benefits resulting from Christian Science treatment in our own cases or the cases of others of which we have positive and undoubted knowledge, as we read in our periodicals of innumerable cases healed through Christian Science after so-called medical science had failed, we are no longer surprised at its rapid spread, or that the question, "What is Christian Science?" should be so frequently asked. Sometimes the questioner answers himself, and from his own prejudiced standpoint, without investigation or mental reservation. The answer which the questioner thus conjures up in his own mind does not surprise those of us who formerly were bitterly antagonistic to what we supposed Christian Science to be, and we now know that, with no understanding of the subject, we were ready to declare what Christian Science stood for, without realizing that to answer the question intelligently and justly, a correct knowledge of the subject is required, from all of which it is apparent that Diderot was right when he said, "Ignorance is less distant from Truth than prejudice."

During the great trial that left its imprint upon the civilization of the world, Pilate asked the Master, "What is truth?" and that question, which has been so fraught with significance to the human race, has come down through all the ages. No doubt the rabbis of that day answered the question from their own limited sense of things. He who had come to announce the allness of Truth, to fulfil and not to destroy the law and the prophets, was publicly crucified through prejudice in its worst form. So those who represent Truth have had to suffer in all ages through ignorance, bigotry, and superstition. Truth itself could never suffer, for the eternal verities of being are undisturbed. Crushed to earth, truth rises and overcomes error in its every form and phase.

When, therefore, the question is asked, "What is Christian Science?" we need but to point to its results, the mani-

Digitized by Google

fest proofs of its efficacy. He who honestly and without prejudice, inquires, "What is Truth?" will find that Christian Science is the manifestation of Truth, the ever-operative, Principle, omnipotent and omnipresent universal divine God. On this Principle rest all religion, science, and truth. A proper understanding of Christian Science reveals, not only in the physical realm but also in the mental and moral, the workings of this Principle, hence the successful results of the application of truth to all human conditions and needs.

We need not, therefore, be surprised at the rapid spread of Christian Science among people of all classes, particularly among men prominent in business and professional life, who have seen the vast benefits accruing from the utilization of the spiritual law involved. The spiritual uplift, the sorrow turned into joy, the dispelling of ignorance by the light of understanding,—the manifold blessings that are coming to mankind in general and to the individual in particular through the understanding of Christian Science, demonstrates that it is destined to effect a very great change in the mental, moral, and physical conditions of the race. Christian Science is here, it has come to stay! Christian Science based upon a divinely scientific Principle, from which all science, all that is good, has its origin, is leaving its imprint on the civilization of to-day, and as absolute reliance is more and more placed on divine Principle, the rock upon which Christian Science is founded, the spiritual uplifting of the people will prove the best answer to the question, "What is Christian Science?"

The Cup of Salvation.

BEN HAWORTH-BOOTH.

It has been the custom of the modern church to attach more and more importance to the celebration of the Lord's Supper or Holy Communion, and to-day this celebration is regarded by numbers of good Christians as the principal and all-important part of their religious observances. Let us consider a moment whether the Scriptures warrant such an understanding of Christ's instructions.

In their respective gospels neither Matthew nor Mark lay any stress upon the celebration of the last supper of Jesus. They merely describe it as the celebration of the "Passover," which was customary at that season of the year, and entirely omit any such injunction as "This do in remembrance of me." On the other hand, it is true that Luke uses this phrase, but Luke had not been present at the Last Supper; indeed Luke, in his preface, expressly disclaims to have been an eye-witness of any of the events which he records in his gospel. He wrote his account of these events many years later, probably in Rome and almost certainly whilst he was a close companion of Paul. He reflects in his gospel much of the teaching of Paul, and the fact that he did so is indicated in the tradition (Eusebius) according to which Paul alluded to the work of Luke in the expression "my gospel." Luke was truly a historian, and appears to have relied upon Paul largely for his data, and it must be remembered also that even Paul had not been an eye-witness of the Last Supper. John was such an eye-witness, but John, the disciple "whom Jesus loved," does not describe the Last Supper at all, possibly because he feared that too large an importance might afterwards be attributed to the material celebration; but on the other hand, John gives us a full discourse on the all-importance of the spiritual bread of Life and the spiritual communion of the body and blood of Christ. "Except ye eat the flesh of the Son of man, and drink his blood, ye have no life in you." It is possible to place a spiritual interpretation only upon these words, for in verse 63 we find, "It is the Spirit that quickeneth; the flesh profiteth nothing: the words that I speak unto you, they are spirit, and they are life."

It is John's record of the spiritual communion of the body and blood of Jesus Christ which is accepted by Christian Scientists as their guide to Life eternal, and it is to the writings of Paul that we must turn to find the chief authority whereon other churches rely for their present attitude on this subject.

Paul wrote his first epistle to the Corinthians in answer to certain inquiries by letter, and also to correct certain schisms and disorders which prevailed among them. Thus we find him upbraiding them for having turned the celebration of the supper of the Lord into a drunken orgie, and he gave emphasis to his reproof by telling them that the proper celebration of that supper was the outcome of Jesus' own requests and injunctions. "One is hungry, and another is drunken. What? have ye not houses to eat and to drink in? or despise ye the church of God? . . . I have received of the Lord that which also I delivered unto you, That the Lord Jesus the same night in which he was betrayed took bread: and when he had given thanks, he brake it, and said, Take, eat: this is my body, which is broken for you: this do in remembrance of me."

It seems that Paul knew that his Corinthian brethren were incapable of understanding the meaning of the spiritual communion with Christ described by John. Living as they were in a material existence, far away from John's idealism,—the life of the Spirit,—Paul could only tell them as much as they could understand, could only feed them with spiritual food as much as they could assimilate. It was the best that he could do for them under the circumstances of their gross materialism.

We may thus find the source of Luke's account in the influence of Paul, so that Paul would appear to be responsible for the present material interpretation of the Scripture record of the last supper of Christ Jesus, which obtains in so many of the churches.

The use of the emblems of bread and wine would not be objected to by a Christian Scientist so long as it appeared that these emblems were aiding the recipient to drink indeed the spiritual wine of Christ's cup and to be a partaker of his cross-bearing,—so long as they might appear to help him to walk in the Spirit and to crucify the flesh with its affections and lusts. But these emblems are regarded by a Christian Scientist as memorials only, and therefore when he realizes that Christ is indeed with us always, even to the end of the world, he feels that "if a friend be with us, why need we memorials of that friend?" (Science and Health, p. 34). We thus conclude that the emblems of bread and wine are no longer necessary, no longer a help to us; we feel that if the supreme importance now attributed by some people to these emblems were intended by Jesus surely those disciples who were both eye-witnesses and historians would have given some indication of that intention; we feel that the silence on this matter of the beloved Apostle John, who leaned on Jesus' breast at the supper, is of great import; and we therefore adopt the spiritual interpretation of communion with Christ as described by John, striving to be partakers of the spiritual bread and wine, of his spiritual body and blood, that we may indeed be one with him, hid with Christ in God.

"Our Eucharist is spiritual communion with the one God. Our bread, 'which cometh down from heaven,' is Truth. Our cup is the cross; our wine the inspiration of Love,—the draught our Master drank, and commended to his followers" (Science and Health, p. 35).

"The children of the Lord are all taught of Him," and these will be brought to discern their brethren, whatever may be the outward barriers that may tend to keep them separated in the body. It is lamentable, therefore, that any who love the gospel of our Lord Jesus Christ should allow the opinion of others or the bonds of sect to cloud their spiritual vision.—*Anon.*

Selected Articles.

A Clergyman's Letter

THE following letter and editorial appeared in recent issues of the *Calumet and Houghton* (Mich.) *Daily Mining Gazette*. The letter was written from Denver by Rev. John B. Whitford, former pastor of the Lake Linden (Mich.) M. E. Church, and we understand the editorial is from the pen of Mr. Homer E. Guck, managing editor of the *Gazette*.

Both letter and editorial serve as way-marks in the progress of the Christian Science movement up to its present position of honor and prestige, and they reflect credit upon their broad-minded writers.

REV. MR. WHITFORD'S LETTER.

Having incidentally made a reference in a former article to the spacious and magnificent temple of the Christian Scientists now nearing its completion, and having been told of their wealth and intelligence, I yielded to the solicitations of friends and went to their prayer meeting one Wednesday night. What I saw and heard were to me a revelation. I have seen nothing comparable to it in Denver. The size of the audience astonished me. The capacity of the building was tested to the utmost. Nor was this exceptional, but a common occurrence. Imagine a building of such dimensions as the Calumet M. E. Church filled in every part, gallery included, and you have the vision. I have not seen such a prayer meeting since my boyhood days in Cornwall, when the great chapels were filled with jubilant and songful people. But what about the people? Radiant faced, joyous, exhilarant, optimistic, and expectant as the skylarks in the morning. They gave every evidence of culture, refinement, and wealth. It is not extravagant to say that Christian Science in Denver represents some of the very best from all the churches. It is a confluence of many streams, a gathering of many forces, a concentration of diversified experiences.

Promptly at 8 P.M. the service commenced. There was a hush, a profound quiet like the coming of night on a ruined city. As the strains of the organ, like soft, enchanting lays, filled the building, the atmosphere seemed laden with reverence, ideality, sublimity, and God. All the conditions were favorable to the hallowed ministries of silence and to serene contemplation. The very air seemed quieting and healing, as though angels were winnowing it with their wings. Then came the opening hymn, with its choral and full-throated melodies. What a volume of song! But it was stately, majestic, reverential, suggestive of other kingdoms and a diviner world. Here again I was reminded of the congregational singing across the sea. Following this choral outburst of refreshing and uplifting song came the reading of the Holy Scriptures in a natural and impressive manner. And how the people listened. They listened as if for the first time the simple and oft-repeated words had condensed broad areas of light into flashes of brilliant and iridescent beauty. After a careful survey of the audience I could not discover the slightest trace of indifference or irreverence. Everywhere there was order, devotion, harmony, as though the people were under the sovereignty of munificent and boundless Love.

Readings from "Science and Health with Key to the Scriptures" then followed. After this order of exercise there was perfect silence. Had a stranger crept into the room with no particular liking for the things of the Spirit, he would have been caught and held in sweet captivity as Blondel's sweet song caught and charmed the ear of the lion-hearted prince. This silence was as full of thought as space is full of ether. After a few minutes of silence, the audience broke out into the Lord's Prayer like a great chorus. The volume, the sweep, the majesty and grandeur of the prayer seemed to melt all horizons, dissolve all boundaries, and I looked out into the illimitable vastness of worlds. The very dome of the sky seemed lifted, and amber streams of gladness went rippling along the firmament and sparkling to the edge of the remotest constellations. I have listened to the great orators and have seen thousands swayed to and fro as they poured forth melodies plaintive and tender, tumultuous and overwhelming, but the Lord's Prayer uttered by a thousand voices, deep, full, measured, and musical is a rare experience.

Another hymn and a brief address and we are in that part of the meeting devoted to testimony or demonstration; and those who stood on their feet revealed in a moment that they had a message to deliver. Several of them quoted from the Bible with exquisite felicity. At the close of the testimonies another hymn was sung and the people went their several ways, a great throng like unto a Sunday audience addressed by some famous preacher. Even Mark Guy Pearse of London, England, with all the Methodist churches to draw from, did not face a finer audience while in Denver. And yet at this mid-week meeting there is no preaching, no paid quartet of trained voices, no sensational advertising, and the edifice is not large enough to hold the people.

At this service and all the services, there is no preponderance of women over men. Both sexes seem to be equally divided. The men are intelligent, sagacious, and far-seeing business men. Many of them have large interests under their control. They represent the professions of the city. Some of them with whom I have conversed have read widely, traveled extensively, and were at one time members of the orthodox churches. Those who think Christian Scientists do not equal in intellectual measurement the other sects have only a superficial knowledge of the subject. I have not seen a more cultured audience in many a day than the one I saw the other night, and I have not heard saner testimonies in any meeting. As I saw this multitude of people, the most of them once members of orthodox and liberal churches, I could not refrain from asking, What is the secret of Christian Science and where is its magnet? It has been assailed, ridiculed, and branded as a heresy. Scores of writers have vehemently denounced it as anti-Christ. And yet the truths I heard that night hover in the van of the race, live in the proudest chisellings of the sculptor, and breathe in the deepest thoughts of the poet.

Mark Twain, in an elaborate article in a great review, hurled his keen and glittering darts of wit at it [Christian Science]; and when his wit, piercing as a two-edged sword, failed, he pounced upon it the flaming petroleum of his ridicule, and still it is unconsumed. Other leviathans of the sea of controversy have attacked it, but it lives and grows in the very teeth of opposition. It has its being in something more substantial than poetic dreams of human perfectibility. Did it have no rootage in reality it would pass away like the mottled splendor of the sea after the sun is out of sight. Without discussing its philosophy, I simply note it as a fact to be reckoned with. It is here. Is it here to stay? Will it gradually absorb the strength of the churches and make orthodox creeds more intolerable to the expanding intellects of the age? Does it present a fine thought of God and man and proclaim a richer constellation of truths? Or, as a system of thought, will it yield to another more refined and ethereal? Whatever the future may reveal, not one glint or ray from the central orb of truth will be quenched. Isms, sects, cults are but scuds of foam upon the boundless deep. But the great and wide sea of humanity, heaving, tossing, now tremulous with liquid gold, then dark with fearful frowns; now tragic, then comic, will remain, and no sect will ever be so broad as to minister to all its creeds. Each sect is a segment of the circle and not the circle itself. They sustain the same relations to the allness and wholeness of truth that leaves do to a forest and single notes to a symphony. Christian Science claims

Digitized by Google

to be more of this circle than any other sect. Posterity will decide, and the decision will be reached in the electric light of the historian's impartial pen.

EDITORIAL IN *The Mining Gazette*.

In this present day when there are creeds innumerable and when religious teachings are at variance on so many points of apparent vital interest, it is surprising what a number of people there are who are gradually getting away from church regulations and are breaking the strings that formerly tied them to this or that particular church organization. At the same time it is evident that there are a good many people who are now believing that their religion is cheerfulness of disposition and happiness of heart. There are some who say that they pay no attention whatever to dogma or to creed, but who devote their lives to the search for the true happiness, and who make a joyful countenance of all importance to their religious and workaday life.

Yesterday *The Mining Gazette* published a letter from a Methodist minister who was formerly located in the copper country, and who has a wide circle of friends and acquaintances in the copper country. The minister told of his experiences with the Christian Science folks of Denver, and the letter was a revelation of the status of the science organization in Denver. The comments of the Methodist minister on the conditions and on the church were surprising in that they had nothing but praise for the Christian Science people he met, and praise and commendation for their religion and their services.

It isn't so many years since any person who espoused the Christian Science cult was looked upon with something like unto dread and fear. People considered the organization one of hypnotists and people working under strained conditions of the mind. But gradually this feeling has disappeared with the growth of the cult and the investigation of the people. Christian Science is no longer looked upon as something to be despised, but rather to be appreciated the more as it is understood.

The words of praise which Rev. John Whitford has for the organization attract all the more attention coming as they do from one who has been educated in the Methodist Church and whose heart has been wrapped up in his church work. His views have always been liberal, and his remarks on the status of Christian Science in Denver are therefore attracting more than ordinary notice.

A Plea for Fair Judgment.

To the Editor *Northern Christian Advocate*.

Dear Sir:—My attention has just been called to an editorial in your issue of February 11, in which you class Mrs. Eddy under the head of "Successful Pretenders," and her followers as "novelty-loving people" who "cannot be induced to put their faith into sound Christian doctrine," and as being "fanatical followers" who "hand over all the property that they possess, and then leave honest debts unpaid."

In another editorial in the same issue you quote and approve a line from Shakespeare, saying that it is "Charity, gently to hear, kindly to judge." I am therefore convinced that you will gladly let your readers hear and judge for themselves.

I wish to put in evidence a specific case, my own: I was born a Jew. From boyhood, however, I have lived altogether with Christians. In this way, although my training had been orthodox, my views changed and through the study of the teachings of Jesus I became convinced of their redemptive value and power, and that he was indeed the Messiah. I then for many years sought diligently, attending services of most denominations to find a body of Christian people whose chief purpose was to "love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind" and "thy neighbor as thyself," which Jesus particularly commanded. I was compelled to see that in nineteen hundred years the followers of Jesus had not learned this basic and primary lesson, which I felt to be the loadstar of Christianity. Was it strange to look for this? Was I a "novelty-loving" man, Mr. Editor?

After many years, with an invalid wife, myself sick and discouraged, my wife met a woman who told her of Christian Science and loaned her its text-book, "Science and Health with Key to the Scriptures," which, as its name denotes, interprets—is a commentary on—the Scriptures. Neither of us had read the Bible in the immediate past. We commenced to do so by this new light and were both healed; my wife without any treatment and I being treated only a few days.

We attended the services of these people and a very humble gathering it was. We found a love manifested there, not only for one another, but for those who misunderstood and therefore "despitefully" used them, which convinced us that these people were striving to live a Christian life.

We were in no hurry to unite with the church, wishing to be sure of our ground, nor were we urged to do so, and it was not until about two years had elapsed that we united with it. Was this fanatical?

I know all the Christian Scientists in Syracuse, and many in all parts of the country. I don't know one who has handed over all his property to anybody. I don't know one who does not pay his honest debts as fast as he can.

My case is one of thousands in which Mrs. Eddy's teachings have been fulfilled. She is therefore no pretender. Her only source of income is from the sale of her published books. The price of the text-book is no higher than that of other commentaries which I have, bound in a like manner and about the same size, and her works can be read by any one free of charge at any public library—all of which have been supplied with them by the Christian Science denomination—as well as at any Christian Science Reading Room.

Sincerely yours,
C. I. OHRENSTEIN.

Northren Christian Advocate.

There is a vast difference between practice based upon blind faith alone, and practice founded upon a demonstrable, scientific knowledge. An appeal to facts, that is to say to results, commends itself to the rational judgment of thinkers. Christian Science rests its appeal upon facts, upon what it has accomplished in its curative practice. The healing in Christian Science flows from a precise and definite knowledge of the Principle of existence,—the changeless, underlying laws of being. It is this certain and provable understanding which differentiates Christian Science from all other systems of healing without drugs or material methods, and which separates it from a practice based only on the hope of cure, without a scientific understanding as to how that cure is effected. It should be understood that not every system which claims to heal without material medicine is Christian Science.

Appealing to facts, we find from vital statistics, that the children of Christian Scientists are as well cared for as others who employ drugs in maintaining the health of their children. Christian Science parents should not be judged harshly because they rely upon what they have proved to be a satisfactory and safe method of healing. In many instances these same parents have previously tried other methods, and have not found them wholly adequate. Thus they are competent to judge of the relative advantages of both systems.

The Lectures.

Bloomington, Ill.

The Grand Opera House yesterday afternoon [February 28] was well filled with people who gathered to hear Mr. Carol Norton in his lecture on Christian Science. Mr. Norton was introduced by President Felmley of Illinois State Normal University, who spoke as follows:—

Herbert Spencer has pointed out that in its progress toward the truth in any field of inquiry human opinion passes through three stages: the unanimity of the ignorant, the disagreement of the inquiring, and the unanimity of the wise; and, furthermore, that the second of these stages is the parent of the third.

If we were in complete possession of the truth, further inquiry would undoubtedly be harmful, but so long as a portion of the truth is still to be found, no better method for finding it can be devised than a multitude of independent seekers pursuing their researches in every possible field; for when each hits upon a new thought based in some degree upon fact and reality, he is eager to study its relations to other truth, he is fertile in expedients to test its correctness, he is tireless in his efforts to establish it, and merciless in his criticism of theories or assumptions inconsistent with his new discovery. Thus by a sort of composition of forces we move forward to the larger view. By the aggregation of truths and the elimination of error we gradually build up a body of reliable and established doctrine.

The American people in their institutions have always recognized this fundamental law of progress, they have cherished a free platform and an unmuzzled press as a vital element in our national life. Even in the field of religion, in our relations to the unseen world, where the consequences of error seem to some of us so disastrous, where the poor gropings of humanity seem at times to yield only feeble and uncertain results, where we often feel it is best to lean on the authority of Holy Scripture or Holy Church, to listen to the teachings of inspired prophet or consecrated priest,—even here, nevertheless, we recognize the same law, we believe that human reason is one with divine reason, and that at the bar of reason all truth will stand revealed. Accordingly, if any man of intelligence and serious purpose believes he has gained a clearer insight into the divine purpose and method, and comes with his message before an American audience, he may expect and will receive a patient, respectful, and impartial hearing. We believe in the apostolic injunction to prove all things and hold fast that which is good. We have assembled this afternoon in this spirit, and I take great pleasure, ladies and gentlemen, in presenting to you Mr. Carol Norton, who will address us upon "The Gospel of Righteousness and Health."—*The Pantagraph.*

Boulder, Col.

Judge Septimus J. Hanna of Colorado Springs must have been exceedingly well pleased Sunday afternoon, March 6, when he faced that large audience which came to hear him talk on Christian Science in Masonic Temple Hall.

W. R. Rathvon in his introductory speech said in part:—

The lecturer does not come to represent any crusade against theology or medicine. He does not come to beseech you to renounce your lifelong beliefs. He does not come seeking to alienate you from your churches nor to shake your confidence in anything which you have found worthy of it. On the contrary, you may learn from him that his religion imposes upon its followers the broadest toleration, the greatest catholicity towards the views of those from whom they differ. It teaches in effect that every man is entitled to the undisturbed possession of his own religious beliefs and the employment of his chosen school of healing, without hindrance or interference from any other man. And to those who find their spiritual needs supplied through their present religious affiliations, Christian Science does not say "You are altogether wrong" but it does say instead "God be with you."

But to the myriads of sin-sick, suffering, and sorrowing ones who are to-day groping in darkness, baffled and buffeted from one false hope to another, Christian Science throws open wide its doors with loving welcome. Its sweet assurances are but the echo of those age-enduring words that were wafted over the blue waters of Galilee centuries ago. "Come unto me, all ye that labor and are heavy laden, and I will give you rest."

And has Christian Science made good its promises?

Ask the many thousands of healthful, happy people to be found all over this broad land, who once hovered in hopeless, helpless misery at the dismal door of death, until snatched away and led into the bright sunshine of health by the loving ministrations of Christian Science. Ask that peaceful army of men and women who twice each week throng the hundreds of Christian Science churches that have quietly sprung into being in the last two decades,—churches where people gather to worship devoutly and praise Him "who forgiveth all thine iniquities; who healeth all thy diseases."

To learn somewhat of the Principle and practice of this new-old religion we are gathered together this afternoon. I have the pleasure of introducing to you Judge Septimus J. Hanna.—*Boulder County Herald.*

St. Joseph, Mo.

Mr. Bicknell Young delivered a lecture at the Tootle Theatre, March 6. The theatre was filled by a large and highly interested audience. The lecture was given under the auspices of Second Church of Christ, Scientist, and the lecturer was introduced by Mr. B. R. Vineyard, a prominent attorney and member of the bar of St. Joseph.

Mr. Vineyard's speech of introduction was as follows:—

Ladies and Gentlemen:—What a grand thing is the gift of speech to man. How much grander still is the gift of thought to him. But the grandest of all, perhaps, is the gift of the religious sentiment, which sooner or later springs with more or less fervor in almost every human breast.

To know is well; but to feel is better, especially if the feeling comes from the blessed assurance that the convictions of the heart are right. In this life, and doubtless also in the life beyond, I am persuaded to believe that the heart is esteemed to be of greater value than the head. But when the head and the heart are both right, we rise to the highest level of human happiness and human usefulness.

We have with us to-night a speaker who comes to address us along the lines of religious thought and religious conduct. From the reputation which has preceded his coming, I am sure that we shall not only be highly entertained but highly instructed as well. I take great pleasure in introducing to you Mr. Bicknell Young of Chicago.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

An Easter Gift.

THE munificent contribution from the six Christian Science churches in Chicago reached Mrs. Eddy at Easter; it may or it may not have been planned, but it was a most happy way of expressing love. The number of people represented in the gift is, in round numbers, forty-five hundred; but the great charm of the incident is that they were all of one mind, all the Christian Scientists of the city of Chicago joining in the demonstration. The following excerpts from the letter which accompanied the gift express the gratitude of those into whose lives Christian Science has brought health, holiness, and gladness:—

"Christian Scientists of Chicago, members of the several churches of Christ, Scientist, and their congregations, unite in tendering to you the gift of ten thousand dollars for the furnishing of seats in the auditorium of the new church edifice of First Church of Christ, Scientist, of your home city, Concord, New Hampshire.

"The opportunity for making this offering has been welcomed by our people with joyful acclamation, and they ask that you will accept this present as a token of grateful appreciation of the benefits of Christian Science and of deep, tender, and lasting reverence and affection for you, the Discoverer and Founder.

"The sum thus tendered for this object represents the heartfelt, earnest desires and hopes of a great body of people in this western metropolis, looking toward the accomplishment of your 'life purpose,' which, defined by you in your own most forceful words, is 'to impress humanity with the genuine recognition of practical, operative Christian Science.'

"Our deepest convictions, hope, and faith concur with yours; our ceaseless prayers to God sustain you and your Cause."

This splendid gift was acknowledged by our Leader in the following letter, replete with gentle, loving helpfulness, counsel, and benediction:—

MRS. EDDY'S ACKNOWLEDGMENT.

To the six Christian Science Churches in Chicago, Illinois.

My Beloved Brethren:—I have yearned to express my thanks for your munificent gift to First Church of Christ, Scientist, in Concord, of ten thousand dollars. What is gratitude but a powerful *camera obscura,* a thing accumulating where love, memory, and all within the human heart is there to encourage it.

Is it not a joy to compare the beginning of Christian Science in Chicago with its present prosperity? Now six dear churches are there, whose members not only possess a sound faith but that faith possesses them. A great sanity, a mighty something buried in the depths of the unseen, has wrought a resurrection in your midst, and leaped into living love. What is this something, this phœnix fire, this pillar by day kindling, guiding, and guarding your way? It is *unity,* the bond of perfectness, the thousandfold expansion that will engirdle the world,—unity, that unfolds the thought most within us into the greater and better, the sum of all reality and good. This unity is reserved wisdom and strength; it builds upon the Rock 'gainst which envy, enmity, or malice beat in vain. Man lives, moves, and has his being in God, Love; then man must live, he cannot die, and Love must necessarily promote and pervade all his success. Of two things fate cannot rob us; namely, of choosing the best and helping others thus to choose. But in doing this the Master became the servant,—the grand must stoop to the menial, there is scarcely an indignity that I have not endured for the cause of Christ, Truth; and returned blessing for cursing—the best help the worst, the righteous suffer for the unrighteous,—and by this spirit man lives and thrives and God governs.

MARY BAKER G. EDDY.

Pleasant View, Concord, N. H., April 11, 1904.

Healing Essential.

WE print in another column a letter from a minister of the Methodist Church, written after he had attended a Wednesday evening meeting in one of the churches of our denomination, and it is interesting to note the impression the meeting made upon him. He writes, "The truths I heard that night hover in the van of the race." "I have not heard saner testimonies in any meeting;" and of the people who comprise the congregation he writes, "Those who think Christian Scientists do not equal in intellectual measurement the other sects, have only a superficial knowledge of the subject."

These meetings were established that the public at large might learn of the practical and beneficial results of Christian Science practice, that suffering humanity might know that ours is indeed a gospel with signs following, and what this gentleman saw and heard is not different from what may be seen and heard by any unprejudiced person sufficiently interested to attend one of these meetings.

Mr. Whitford had an opportunity to see and talk with the persons who testified of their healing, and no doubt he was competent to judge, in a general way at least, of their health, and he seems to have been satisfied with the evidence presented, although some of our critics have disputed the value of such testimony because it is not accompanied by the certificate of a doctor of medicine. The contention of these critics is that Christian Scientists are without technical knowledge and therefore unable properly to diagnose disease; but they forget that the great majority of cases cited at these meetings are cases which were diagnosed by physicians and unsuccessfully treated by them before the patients turned to Christian Science and were healed.

Christian Science has been scoffed at and maligned by such critics, its theology has been questioned, its cures have been doubted, and its followers have been misrepresented; but the stately progress of the healing work has not been hindered by these criticisms, which, however learned they may appear, are in fact purely theoretical. These academic critics have from time to time proved to their own satisfaction that Christian Science is absurd and harmful, but while they have been doing this, Christian Scientists have continued to heal the sick, reform sinners, and bind up the broken-hearted. A fact, established by testimony, is worth more than any number of theories, and so long as the sick are healed by Christian Science, so long will there be irrefutable proof of the truth of its teaching.

When the divine nature of Jesus' origin and ministry was questioned, he referred to his mighty works, calmly assured that they were sufficient to establish the validity of his claims. His answer to John's messenger, "Go your way, and tell John what things ye have seen and heard; how that the blind see, the lame walk, the lepers are cleansed, the deaf hear, the dead are raised, to the poor the gospel is preached," was a declaration that these works should be sufficient to convince any honest inquirer of the genuineness of his professions, and in this regard, as in all others, Christian

Scientists will make no mistake in following our Master's example when the divine mission of Christian Science is challenged. M.

The Signs of the Times.

IT is difficult to keep pace with the advance of a more consistent and liberal thought respecting the fundamental doctrines of Christianity, and heresy hunters must be in despair of ever being able to cope with what they are in the habit of naming "an alarming situation." As an interesting illustration of the emancipation of thought from the trammels of theological dogma, we quote the following from a recent work on "Christian Faith in an Age of Science" by a member of the faculty of a prominent denominational university. It is but one of many evidences of the change which is taking place in religious thought.

He says, "Let us fairly recognize that inspiration does not mean omniscience, and that errors in detail on the part of the Biblical writers, especially on subjects outside the sphere of morals and religion, do not invalidate the claims of Christianity as a revelation. . . . In a spirit of purely literary and historical criticism we can then consider what the original writer of the two narratives in Genesis and what the compiler who put them into the Pentateuch probably believed and probably intended to teach; . . . whether the order of events was intended to be an order of time, or only an order of thought; whether the second narrative was conscious allegory, or myth, erroneously believed by the writer or the compiler to be history."

Regarding prayer he writes,—

"We cannot believe to-day that if God has purposed up to a certain moment to do a particular thing He will change His mind and decide to do something else in obedience to the dictation of our prayers. Such a notion would imply either that God's wisdom was so imperfect that our prayers could convince Him of the desirability of a change of plan, or that His purpose was so weak that He could yield to our simple importunity. The man who believes that God will change His plan in obedience to prayer, and still dares to pray, must be possessed of sublime hardihood. If I could fancy that God was willing to abdicate the throne of the universe in my behalf, I would not accept the tremendous responsibility."

These sentiments may be met with protest by a limited number of the clergy in the evangelical churches, but undoubtedly a much larger number would privately, if not publicly, endorse them. This means that a stupendous change is taking place in religious thought, and that with the passing of the domination of the religious dogma of their fathers, an ever-increasing body of the people is becoming accessible to the appeal of Christian Science.

A sincere desire to be good and true lingers with multitudes who can no longer stand for the faith they once professed, and to this abiding impulse must be added that longing for health and for content of mind which opens many a door to those who bring again the good tidings of possible escape from pain, and sorrow, and unrest of heart. Surely Christian Scientists are called by many and impressive considerations to "arise and shine," for to each and all of them the light of life and the opportunity of life has come.

To be indifferent to this opportunity is to prove altogether unworthy of the blessings which are ours in Christian Science, while to meet it is to manifest a degree of wisdom, love, unselfishness, humility, and common sense that will make us unique among men. In such an hour it is well if we remember that the demands of Truth are never beyond our capacity for good, that they express the highest compliment that can be paid humanity, and that the reward of faithfulness is a joy that is "unspeakable and full of glory."

W.

Seedtime.

AT this season the earth is being prepared for seed-sowing, and there is something very touching in the familiar process which ever recalls our entire dependence upon the divine presence and activity, since it is "God that giveth the increase."

We are told in the Bible that long before the human eye rested upon the fair face of nature, the divine law and order were established, the creative Mind had decreed that the earth should bring forth grass, herb, and fruit tree, each yielding fruit "after his kind, . . . and it was so." We know that this is true to-day as at the dawn of creation, and in the light of Christian Science we trace the working of this law in the mental and moral realm, as surely as in the so-called physical. Christ said, "A good tree cannot bring forth evil fruit, neither doth a corrupt tree bring forth good fruit," and he employed this figure to show the difference between his teaching, and that of the "false prophets." He said, "By their fruits ye shall know them."

The world has long since recognized the wisdom of applying the law of cause and effect in agriculture, but in ethics it has blindly disregarded it,—it has sown thistles, and looked for figs. When Christ Jesus looked out upon the vast field,—the world, with its appalling misery, its sin, disease, and death,—he likened it to a field sown with tares, and said, "An enemy hath done this," but he also said, "Behold, I have given you power, . . . over all the power of the enemy." Again he said, "He that sowed the good seed is the Son of man," and the gospels tell us of the healing seed which was sown in his ministry, and which brought forth fruit unto eternal Life.

It is said that some grain was found in the pyramids in recent times which had been buried there for centuries, but that it soon sprang up when put into the soil. It has also come to pass that the good seed of spiritual healing which yielded such precious fruit nearly two thousand years ago, has been brought to light through the loving toil of one who explored the buried chambers of spiritual knowledge and experience, long closed in by the desert sands of material theories and beliefs. This seed has been dropped into the soil of human hearts which had been furrowed deep by suffering and watered by tears, and great is the harvest of joy which has already sprung up, "some thirty, some sixty, and some an hundredfold." The tares are rapidly disappearing before this oncoming harvest, and the time is not far distant when it will be deemed a crime to drop into human thought, under any pretext whatever, a seed of belief in sin or sickness, since it will assuredly bring forth fruit after its kind.

Modern human history has witnessed the establishment of a school of medicine from which are disseminated spiritual ideas of health, holiness, and happiness; and these will assuredly "be fruitful, and multiply, and replenish the earth, and subdue it,"—subdue all that has not God for its Creator. In the impressive words of our Leader, "Science must go over the whole ground, and dig up every seed of error's sowing." "A germ of infinite Truth, though least in the kingdom of heaven, is the higher hope on earth,—but it will be rejected and reviled until God prepares the soil for the seed" (Science and Health, pp. 79, 361).

These beautiful lines of Bonar may also be recalled at the springtime, with profit,—

Sow truth, if thou the true wouldst reap;
Who sows the false shall reap the vain;
Erect and sound thy conscience keep,
From hollow words and deeds refrain.

Sow love, and taste its fruitage pure;
Sow peace, and reap its harvest bright;
Sow sunbeams on the rock and moor,
And find a harvest home of light.

K.

From a Member of the Mother Church.

Editors Christian Science Periodicals.

Dear Workers:—Please accept my thanks for the timely announcement that there will be no general gathering this year, as in past years, at the Communion season.

I was led to take the kind hint, and decided at once to act,—make my demonstration just the same, and send to the Building Fund of the Mother Church the amount I should use to make the trip to Boston.

Thinking this may be a helpful suggestion to others, I send it in a spirit of love. Surely if we all made this demonstration we would not need another reminder that our pledge to build this church had not been fully met, and that now is the time to meet it.

I love the Cause, and was one who stood in the rising vote to do my part in the building of this church. I have always had to fight that evil,—limitation,—and this form of error seems so real that I have had to work hard in the past to provide the means to go to Boston. I have been there four times, and was thinking I would not go this year, when my thought was suddenly changed by the notice in the *Sentinel*.

Our Society have done what they thought they could. Now it is for each individual to be honest with himself, and ask, Have I done what I could? I know I have every true Christian Scientist's thought as a help that I shall be able to make a perfect demonstration; *i.e.*, send the *whole* cost of the Boston trip. I shall do this with a heart overflowing with love.

Your sister in the truth,

C. A. D., Gloversville, N. Y.

The following excerpt is from the address of E. S. Morrow, Second Reader of First Church of Christ, Scientist, upon the occasion of the interdenominational service in connection with the dedication of St. John's M. E. Church, Davenport, Ia.

"All appreciate the loving thoughtfulness in being called together to-day in this beautiful edifice to worship the God who is Love and offer thanks with all others for this prayer in stone, 'whose builder and maker is God,' erected and dedicated to Him,—a most befitting monument of trust in the Giver of all Good.

"We behold its completion and rejoice with them in this wonderful result. It is another testimony proving the power of Christianity, which binds all in a closer bond of brotherly love, for it is the gift of God, and brings to mind the words of John the Revelator, speaking to the various churches: 'He that hath an ear, let him hear what the Spirit saith unto the churches: To him that overcometh will I give to eat of the tree of life, which is in the midst of the paradise of God.'"

Notice.

THE Field will please take notice that the authorized periodicals of the Christian Science denomination are published by The Christian Science Publishing Society, Boston, Mass.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

Testimonies of Healing.

I am very glad to have the opportunity of telling all who may see this testimony of what Christian Science has done for me. Physically, I have been healed of diseases too distasteful to remember and almost too numerous to mention. I will speak of some of them, however, with a desire to help others.

I was ushered into this existence heir to nearly every ill that flesh can inherit, and at the time I began Christian Science treatment I was so affected by those diseases peculiar to the feminine sex that I could not walk a block in comfort; I could not stand five minutes with ease; I can scarcely remember an hour free from the backache, and I had not walked up a flight of stairs in years without painful, often serious, results. One of the portions of the Adamic inheritance which earliest came to me was a kidney and bladder trouble, which made my whole life a burden, for the attacks came on with the slightest exertion, cold, or anxiety, and often lasted for weeks. After marriage this developed into a chronic urethritis, from which I suffered untold agony. It is needless to say that my general health was deplorable, and after the birth of my babe I became a physical wreck, spending most of my time and means wandering from place to place, from one doctor to another, in search of relief. The relief was only temporary, but the memory of the kindness and courtesy of these attendants will remain with me always, as it was more helpful than any of their medicines.

During the past ten years I think I have sought the aid of nearly every known material remedy, such as electricity and many kinds of hygienic routine, including baths and massage, and the daily use of a stomach pump was also included in this routine. I went through two painful, serious, and expensive operations successively for the same purpose. Both of these the surgeons conceded were failures, and a noted specialist told me several months later that they had been a positive injury to me, but advised me to have it done again. I did not know anything else to do, and was considering the third operation, when I was told of Christian Science, and as a "last hope" I was persuaded to try the treatment.

I told the practitioner to whom I presented myself that if any faith on my part was requisite for the success of the venture, it would be useless to proceed. I shall never forget the kindly light in his eyes as he replied, that there must be a little faith in my consciousness, else I would not have come at all. My answer shows my exact mental condition, which I recall with regret; I said that I had been so schooled that I had no faith in God or man, and, as I had always followed explicitly the directions of my physicians, I would give his method the benefit of the same obedience. He seemed satisfied with the latter assurance, and after his first treatment I found myself much more ready to receive the explanations given, even anxious to hear, but I was amused at the prescription, which included only citations from the Bible and Science and Health. These were written on the detached back of an envelope, which I preserve as a keepsake, for before I reached my home, only a short distance away, all irreverence had vanished, and I was eager to read what the message would contain, because I was sure that it would be a message of comfort,—and so it was. I immediately memorized all the references indicated upon the envelope, read far into the night, and went to sleep praying a new prayer.

The next morning I easily climbed two flights of stairs to reach the practitioner's office, beside walking a mile there and back. This alone convinced me that Christian Science demonstrated the power of Divine healing, and when its teachings were explained to me, I grasped and clung to them.

Digitized by Google

The first treatment enabled me to walk anywhere I wanted to go and do anything I needed to do, within reason, and after a month's treatment, with a close study of the Bible and Science and Health for a guide, I was entirely healed of the kidney trouble and all the other diseases, and had learned enough to keep myself free from pain. After having gone through a class and spent a great part of my time in the study of Science and Health, I rejoice in the privilege of helping others through an understanding of divine Truth and Love and receiving help from the same source.

My physical healing has been a marvel to all who know me, and I appreciate it as only one can who has spent many years in bondage to disease, but my freedom from sins over which I had wept as incurable is, to me, the most glorious deliverance. During all those years of wandering I sought also, but in vain, that Love for which all mortals are seeking, and early joined an orthodox church, but while I appreciate most sincerely the patient and beautiful examples of helpfulness expressed by the two pastors who held the charge during my membership, I did not find there that which I sought, and drifted through many creeds and isms into agnosticism as well as invalidism, until, fifteen months ago, I was led to the door of Life,—Christian Science. I found that this teaching contained the possibility of the realization of all my hopes, that my steps had at last been directed into the straight and narrow path to walk wherein reveals a way so broad that the whole race of redeemed mortals may follow it and enter into the kingdom of God.

Before the understanding came to me of what God is, and what man is in His image and likeness,—what my real inheritance is, before I found the Christ, and knew the real mission of Jesus, I was utterly miserable, and longed for the relief which I believed death would bring. At times I have been tempted to end a life which I knew not how to use for the good of any one; now every hour is precious with golden opportunities of helping my sisters and brothers and myself nearer to the divine Love whence cometh every good and perfect gift.

I would that I could call every sinning, sorrowing, suffering one on earth to this fountain where he may wash and be made whole and clean, and there are gleaming reflections of Love everywhere, there is healing and redemption for every mortal and the day of salvation is at hand. All else that I could say is simply this: Christian Science has led me to the one God known to us as Life, Truth, and Love.

I am profoundly grateful to God, and this gratitude naturally extends to Mary Baker Eddy, the Discoverer and Founder of Christian Science, who revealed Him as He is to a waiting age. To this brave woman I give the loving recognition which her work deserves, and to every one who has made possible the coming of this truth to me, I would express my sincere thanks.

ANNIE B. HOUSEMAN, Macon, Ga.

"He sent His word, and healed them." "He spake, and it was done: He commanded, and it stood fast." "He is the Rock: his work is perfect."

Oftentimes the questions are asked of the healing by Christian Science, "Must one have faith in it to be healed?" "Is the healing permanent?" "Can chronic diseases be healed?" And it is with a heart overflowing with love and gratitude to God, to our beloved Leader, and to the one who so clearly and lovingly brought to my consciousness the all-power of God that I would bear witness to the "might and permanence of Truth" (Science and Health, p. 215).

After ten years of suffering, having broken down in health at the very beginning of college life, with every ambition and hope shattered because of ill health; after experimenting with various remedies, change of climate, specialists, I at last went to a hospital for three months on the promise that at the end of that time I would undoubtedly be able to resume light work. I then returned to my home, and within one week was in worse condition than ever before, the new physician telling me that with the best of care, electric baths, medical baths, and absolute rest from care and worry, I might be able to leave my bed in a year from that time. In this hour of darkness and desperation a friend asked me, "Won't you now try Christian Science?" I said to her in the bitterness of my soul, "Yes, Christian Science, or anything else, and the quicker it kills, the better," for my thought was full of ignorant prejudice toward the very words. I knew nothing whatever either of its teaching or practice, but supposed it was all that superstition and ignorance had said. I mention this to show that my initial question may be answered in the negative, for who "can stay his hand, or say unto him, What doest Thou?"

My first words to the practitioner were, "I want to hear nothing whatever of Christian Science, and the quicker you kill, the better." She replied, "Do you care to take a treatment while you feel this way?" I answered, "I will take a treatment now or never. I shall never feel any other way." She closed her eyes and the first treatment was given. That was six years ago last July, and from that day to this I have never spent a day in bed because of sickness. Three weeks from that day I took a position at the work which seven physicians had told me I could never again take up: viz., stenography and typewriting, and in those six years I have had but three weeks' vacation.

The cause of my suffering was spinal trouble which the doctors predicted would terminate in paralysis, therefore any work which involved the use of the arms was forbidden. I also was told I could never walk long distances or go up and down stairs, etc. After taking my position I regularly walked sixty blocks each day, and oftentimes more. In fact, "Every law of matter or the body, supposed to govern man" was "rendered null and void by the law of God," and I had entered "the land of Christian Science, where fetters fall, and the rights of man are fully known and acknowledged" (Science and Health, pp. 380, 226).

Needless to say, with such a proof of the healing power of Christian Science, I desired to know what did the healing, and was then told of our text-book, "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, and with prejudice dispelled by fruits made manifest, gratefully, humbly, and lovingly I began the study of that storehouse of treasures, and only those who have had such an experience can know the unfolding of the truth during that year, and can understand me when I say that the physical healing, perfect, permanent, beautiful as it is, is the smallest part of that which this blessed message of Truth and Love has brought into my life. The following Communion Sunday, January, 1898, it was my happy privilege to become a member of Second Church of Christ, Scientist, of this city, which I have indeed found to be a "tabernacle for a shadow in the daytime from the heat, and for a place of refuge, and for a covert from storm and from rain."

I had been an earnest worker in an orthodox church since a child, but this last experience had been so dark that it seemed as though my one and only prayer for many months had been that I might not lose my faith that there was a God, and this fear only added to my despair, for the same verses which now bring the healing thought were familiar to me then, and had been sought and studied during all this trial, but with no relief: but Christian Science not only taught me that there is a God, but *proved* to me that "God is Love, and God is All," (Science and Health, p. 366), and that through the recognition of this truth the shadows of fear and human thought are forever dispelled in the bright sunshine of that perfect love which casteth out fear. More than this, it not only healed me, but taught me to "understand God and *how* to turn from matter to Spirit for healing: *how* to leave self, the sense material, for the

Digitized by Google

sense spiritual; *how* to accept God's power and guidance, and become imbued with divine Love that casts out all fear" and to "*know* that God is the only Life" (Miscellaneous Writings, p. 194).

It were vain indeed to attempt to express in words the gratitude felt for such healing as this, and now as I look upon our beautiful church building, our "psalm of gratitude," and read, engraven upon its corner-stone, the words "Purity" and "Healing," I feel truly that only in a life that reflects the power of Truth and Love for which these words stand, can I express what this Church means to one brought out of the depths of darkness into the love, the light, and freedom therein received, the "glorious liberty of the children of God."—A. M. D., Minneapolis, Minn.

Words cannot express my gratitude for what Christian Science has done for me and my family. Eight years ago a loving husband was suddenly taken away, leaving me with three little children, the youngest only a month old. My home had been everything to me, and I had depended upon my husband in every way, so that the anxiety and responsibility of bringing up my children, and the sorrow over my loss soon made me a physical and mental wreck. I suffered in many ways, and was so weak that I could walk only a few blocks without exhaustion. Many days I could sit up only an hour at a time. All was darkness, sorrow, and pain. I was a church member, and kind friends in the church did all they could to console me, yet I could think of nothing but death as a release for me and my children.

I was in this condition when a friend spoke to me of Christian Science. How eagerly I drank in the words of Truth; and what a light came when I was told that God did not take my husband away, but that it is our ignorance of God which brings all our sorrow, sickness, and death. After having treatment for a short time, my burden of grief, anxiety, and fear rolled away, sorrow was turned into joy, and my health improved at once. My children, who before this were always ill and troublesome, began to have better health and to be more harmonious in every way. My own fears were replaced with trust and confidence in the ever-present protection of God.

Friends were surprised at the great change in me and my family, for where they had before always found us in sickness and trouble, now they saw us happy and well. I have gained about thirty pounds in weight, and for several years have done my own housework, and I have found time for Christian Science work as well. Truth is healing me and my children of sin,—much that we never knew before was sin, and it is a great joy to me to see the children working as they are taught in Science to overcome fear, impatience, self-will, and selfishness, trying each day to be more obedient and put on more of the Christ-likeness. They usually meet whatever troubles they have without my help, and they always work mentally a few minutes every day before going to school to know that they reflect the one intelligence *now*. Science is teaching us how to live and keep our thoughts right, and we need Truth every day to guide us in the right way. The Bible has become a new book to me, and I am daily proving that its promises are true, and that this word of Life does heal the sick. No medicine but the truth has been used in my family for six years, and it has healed us of all our diseases.

My heart overflows with gratitude to Mrs. Eddy for her faithfulness and unselfishness in giving the truth to sorrowing and struggling humanity as she has received it from God; and for her dear book, "Science and Health with Key to the Scriptures," I can never be thankful enough, for it brings to the world the true meaning of the Bible, and shows us the remedy for every ill. I am also grateful for the *Sentinel* and *Journal*, and as a German, especially so for *Der Christian Science Herold*, which is supplying a great need among the Germans. My prayer is that I may live a life which reflects Truth.

MRS. ANNIE L. STEPHAN, Berlin, Ont.

Christian Science has proved to me that "the word of God is quick and powerful," for nothing but this word of Truth could have freed me from the material laws under whose bondage I had served for many years.

I first heard of Christian Science from a friend in Europe who knew that I was afflicted with several distressing ailments which the best specialists both in America and Europe had failed to relieve. I was at this time returning to my home in Boston, and I told my friend that, as I should never again try *materia medica*, I would perhaps look into Christian Science.

In proof that the good seed sown is not lost, but is sometimes seemingly slow to bring forth fruit, I did not seek the healing truth for eighteen months after my return, but when I once made up my mind to trust to Spirit instead of matter, I very quickly found my freedom from these discordant conditions to which I had been a slave so long. Besides this, I was completely and perfectly healed of far-sightedness, for which I had been treated by four eminent oculists, all of them agreeing that I must always wear glasses. I had suffered great pains in my eyes, scarcely ever knowing what it was to be unconscious of discomfort, in spite of having most faithfully worn the glasses for seven years. In a few weeks' treatment I was also freed from this condition of slavery, and in the six years that have gone by since then, I have been as unconscious of my eyes as when a child.

This beautiful healing is but the smallest part of the wonderful spiritual awakening which Christian Science has brought into my life. Where once doubt, fear, and discouragement were my daily companions, now, peace, joy, and hope reign.

From never having been interested in religion, I can truthfully say that the Bible and our precious text-book, Science and Health, are my nearest and dearest treasures.

Can we ever be too grateful and obedient to our beloved Leader, Mrs. Eddy, whose purity and consecrated life have enabled her to give this new-old truth to a waiting, weary world? My gratitude extends also to all her faithful followers, who have helped me and are helping others onward and upward.—MINNA TRAIN, Brookline, Mass.

Three years ago I read a lecture on Christian Science in order that I might show the fallacy of it to my wife, who seemed interested in the subject. To my great surprise I found it in accord with my best thought. Science and Health was loaned me by the same kind Scientist to whom the copy of the lecture belonged, and I started reading it with the determination to be just, although I felt that each succeeding page must reveal its sophistry. Before reading ten pages its logic impressed me so that I experimented by laying aside spectacles used eight years for chronic astigmatism, and have never used them since nor felt their need. Although mortal sense had loudly asserted that the trouble with my eyes was insurmountable, that I might go blind, would make a laughing-stock of myself, etc., no sooner had the uselessness of my glasses been demonstrated, than it half convinced me that my eyes had been cured before the glasses were laid aside.

Casting about for a more convincing proof, I felt that if cured of the desire to smoke, which I had acquired eighteen years before and to which I had been a slave for at least ten years, there could be no discounting that. What will-power had repeatedly failed to overcome was annihilated completely and almost instantly. Medicine, which for many years I had used quite regularly, has never since been used, nor desired. Strictly speaking, I am not a Scientist, but

Digitized by Google

with a slight understanding of divine Love gained through Christian Science, have come such great and manifold blessings that I would be worse than ungrateful not to make some acknowledgment.

Among other manifestations of this power has been the recent disappearance of a hernia of nearly twenty-five years' standing, pronounced incurable by an able surgeon, yet I seem to be still in the gray dawn of that light which is the Life of men. It appears egotistical to dwell upon my own case, but these are facts that are impossible of contradiction, and to me remarkable.—F. B. C., Philadelphia, Pa.

In grateful acknowledgment to God's obedient servant, our dear Leader, I testify to what Christian Science has done for me. When a small child I was terribly burned over the back and stomach by scalding water. The physician said I might not live, and if I did live that I might never entirely recover from the nervous shock. I suffered from weak nerves and at times from improper action of the kidneys, stomach, and heart.

At the beginning of my sophomore year at the University of Wisconsin, my brother became so interested in Christian Science that he decided to study law, and not follow out his intention of studying for the ministry. I was bitterly opposed to the stand he took. It was, however, but a few weeks later that I was compelled to leave college on account of nervous prostration. Through the letters of my brother and a dear friend in Science I became interested in it, and when I returned to college the following year I went to the Christian Science Church, and since then have attended regularly.

Through Christian Science I have overcome colds, the stomach, kidney, and heart trouble, and weak nerves. I am now perfectly well and strong. It was not an immediate change; but through the patient and helpful counsel of a dear Scientist I gradually gained a firm hold of this beautiful and practical truth. Christ, Truth, now means more to me than all else, and my great desire is to live it and always manifest good.—M. G. Montgomery, Detroit, Mich.

In the fall of 1896 my husband, who worked in a shop, accidentally struck his left hand on an emery wheel, making a large hole in the hand and severing the cords. He went to a doctor and had it dressed, then he came home and told me. I immediately wrote to a Christian Science practitioner, and the next day received word that he would do all he could. The doctor told my husband not to use his hand, and to keep it in a sling, which he forgot to do. He used his hand for all kinds of work, and the doctor did not dress it again. In three weeks he was at work in the shop, the hand well. What has always surprised me was the fact that three days before it healed up we could lay a small marble in the wound. All who spoke to me at the time said that his hand would never be straight, but it is, and he has never had the slightest trouble from it. That is only one of many cures that we have had in our family, for all of which I thank God, and also Mrs. Eddy.—L. J. B., Marlboro, Mass.

In this way of Science we soon learn there is no standing still, no going backward to our starting-point. Until the understanding of God dawned upon my consciousness in Christian Science, it seemed almost beyond hope that I should ever find the path which leads to heaven,—harmony. The need, however, became so great that it compelled effort, and effort means progress. No matter how great has been the demand, the supply has never failed.

For years error has kept me silent, but my heart is so full of gratitude that no longer can it be repressed. Thank God for our beloved Leader, whose brave, true life is always an inspiration; for the faithful friends who have lightened and encouraged me along the way, and for our literature which cannot but bless us. It is sowing Truth's seed in many hungry hearts.—E. H. S., New York, N. Y.

Having received so much benefit from reading the testimonies of others, I feel it a duty and a privilege to express my gratitude for what Christian Science has done, and is doing for me.

Although I knew of Science some four years ago, it was not until recently that I realized the benefits of doing our own work, which we must all come to see sooner or later.

To me the physical healing is very wonderful but the spiritual uplifting which comes purifying and cleansing is the greatest of all. I wish to express my gratitude to all those who have helped me to grasp and hold to this great truth. My heart is filled with gratitude to our Leader, Mary Baker G. Eddy, for all that she has done and is doing for us all.—Amadeus Behr, Brookline, Mass.

When passing through the deepest waters of my life, the truth came to me through a Christian Scientist, and I was led to drink at the fountain of divine Love. This gave me a taste of the knowledge and understanding for which I had been seeking so long. It has come late, but I am very thankful that it has come. I have not tasted medicine since reading Science and Health, and find myself free from many of my old chronic troubles. I have also had many beautiful demonstrations of the power and presence of divine Love.

I can never express the love and gratitude I feel for our dear Leader, Mrs. Eddy; for all the good she has done for us. May God's choicest blessings be hers.

Julia O. Schriver, Phoenix, Ariz.

I had catarrh of the stomach ten years, took medicine nearly all the time, doctored with specialists three years, but received no permanent relief. Finally my condition grew worse, and two years ago I decided to try Christian Science. I was under treatment only three weeks when I was cured, and have not used a material remedy or lost a day's work by sickness since.

My wife and daughter were sick most of the time, using medicines, but to no avail, until we studied Science and Health. We feel very grateful to God and to our dear Leader, Mrs. Eddy. It seems as though there had been a great cloud lifted from our home.

L. B. Hoard, Jamestown, N. Y.

It is with a heart full of gratitude to our beloved Leader for giving this wonderful truth to us that I write. I was without hope and without God in this world, burdened with sickness and sin. The Bible and Science and Health are now my daily companions,—a never-ending supply, and my very best friends.

My only desire is for more understanding to know how to separate truth from error. I am very grateful for help, even though it be in the form of rebuke or censure, anything that will help me to live the truth.

Mrs. Carrie P. Craven, Jamestown, N. Y.

My wife and I depend on Christian Science for every need, and our child, now over four years old, has never had a drop of medicine of any kind. While we have had some good quick demonstrations, for the benefit of those who feel discouraged with slow healing, I wish to tell of a case of eczema that only yielded after eighteen months of patient work. When the demonstration was finally made, however, it was complete.—Walter C. White, Prescott, Wis.

From Our Exchanges.

Christ is the way to Christ, and the sooner we enter that way by appropriating his teaching and growing into his spirit, the sooner shall we come to that end that is the true attitude for the soul and its true rest and joy. It is this that Paul calls "looking unto Jesus," and that Peter calls "setting the Lord ever before you." These are expressions that signify the coming to Jesus in the true spiritual meaning of the words. For whatever lifts us up, and refines us, and improves our tempers and inward states, is carrying us gradually, even if remotely, that way. Whatever brings us near to the high level whereon he stands, nears us to him. Whatever betters us in the spirit of our lives, so that we are made more like him and the Father who sent him, and the final perfection of the glorified, is virtually a means of approximation and victory. The verities and obediences, however practised, lead up and lead on from less to more and from lower to higher, even to that point wherein we shall reach the measure and stature of the fulness of Christ.—*The Universalist Leader.*

While it is absolutely true that we cannot save ourselves by any effort of our own, it is also true that our will must co-operate with the will of God in the process of salvation. God cannot save those who do not want to be saved. His Spirit may strive long with a reluctant soul, but until that soul yields its opposition and willingly receives Christ, it will not find salvation. When in that memorable walk to Emmaus, the disciples came to the village whither they were bound, Jesus "made as though he would go further." He would not enter without invitation. But how quickly he responded to their desire that he should abide with them! So, gladly, he enters every heart that invites his presence; but he will not force his way in, an uninvited guest.

The Examiner.

God has given every encouragement to us to make known our needs to Him. To the man or woman whose heart is right with Him He says, "And it shall come to pass that, before they call, I will answer; and while they are yet speaking, I will hear." The truth of this may be proved by any one anywhere, who may will to do the will of God. Denial of the efficacy of believing prayer in securing definite answers from God is one of the indications of the prevalence of unbelief in the heart of men and women who call themselves by the name of Christ, yet in practice deny his everlasting power and divinity.—*Pacific Baptist.*

If men were to be judged solely by their achievements and not at all by their struggles, who could hope to stand in the awful light which streams from the divine judge of all men? The saints who were once a little company, have become an unnumbered host, gathered out of all nations, calling themselves by all names, stating their faith in many forms, but all devoted to the service of God through the love of man.—*The Outlook.*

To look for the best, not because the world is good, but because God is working in it to bring about His purposes, which cannot but be good; to cultivate the social love which seeks the best in man, to count discouragement a forgetfulness of God, and idleness an ingratitude, this is the way of courage and of joy, which is at once becoming and rewarding to the children of God.—*The Congregationalist.*

When religion, or re-allegiance to God, lives in the heart, we easily see that it must manifest itself in life. Really, the man's religion is what the man is. If the Christly spirit and power have taken hold of him, it will bring forth the fruits in him which were seen in Jesus Christ.

The Examiner.

THE CHRISTIAN SCIENCE TEXT-BOOK.—Science and Health with Key to the Scriptures with latest revisions and additions, and numbered lines. 700 pages.

For description, price, and other information, see last page of cover.

THE NEW CONCORDANCE.—A complete Concordance to Science and Health with Key to the Scriptures. This work has been compiled from the late revised edition of SCIENCE AND HEALTH, and contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10x7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

CHURCH MANUAL.—Containing the By-Laws of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. This does not include the list of members. Price, prepaid, $1 per copy; $5 per half dozen; $9 per dozen.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, and is valuable as an authorized representative of the movement, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago Ill.

CHRISTIAN SCIENCE. Is it Christian? By MRS. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

National.

A bill prepared by Secretary Taft has been passed by the House providing a civil form of government for the Philippines. It provides that all bonds issued by the Government of the United States or the Government of the Philippines shall be exempt from taxation either by the Government of the United States or the Government of the Philippines. Five per cent bonds to the amount of ten million dollars are authorized for public improvements in the Philippines. These bonds are to be approved by the President and Secretary of War, and are to be used to provide for port and harbor works, roads, bridges, provincial and municipal schools, court houses, and penal institutions.

Five per cent municipal bonds also are authorized to carry on municipal improvements, such bonded indebtedness of any one municipality not to exceed ten per cent of the assessed valuation of property in such municipality.

The land measurements, which in the original act were in acres, are changed to the metric system, which prior to that time prevailed in the islands.

The provision for guaranteeing earnings on railroad capital to be invested on the islands is regarded as an important step toward advancing the civil conditions in the islands.

Examinations of candidates for the Cecil Rhodes scholarships from various American colleges occurred in a number of States last week. The results of the examinations are to be sealed and sent to Oxford and the committee's selection must be from the list returned from Oxford. To win the scholarship the successful candidate must possess literary and scholastic attainments; fondness for and success in manly outdoor sports, and qualities of manhood, truth, courage, devotion to duty, sympathy for and protection of the weak, and kindliness, unselfishness, and good fellowship. The winners of the scholarships will go to Oxford University in October of this year.

The first Oxford scholarship to be awarded in America under the terms of the will of the late Cecil Rhodes has been announced by the faculty of the University of New Brunswick at St. John. The recipient is Chester Martin of St. John.

The torpedo-boat flotilla commanded by Lieutenant Chandler, consisting of the torpedo-boat destroyers Decatur, Bainbridge, Barry, Dale, and Chauncey, under convoy of the cruiser Buffalo, reached Cavite, Philippine Islands, on the 15th. This flotilla left Hampton Roads December 12 and has completed a cruise of over fifteen thousand miles. The trip has proved the seaworthiness of this type of vessels, about which much doubt has been entertained.

Foreign.

Since the American Steamship Line began calling at Plymouth, England, to leave passengers and mail, the old rivalry between the Great Western and the London and Southwestern Railroads has been revived, much to the advantage of both passengers and mail. The Great Western last week made a record run between Plymouth and London, 235¾ miles, in four hours and eighteen minutes, including two stops.

The Sublime Porte has entered reasonable objections to the demands of the Austro-Hungary reform scheme that two hundred and sixty commissioned and non-commissioned foreign officers be enrolled in the Macedonian gendarmerie. The matter has been before the ambassadors of the Powers interested and a compromise to twenty-five is probable.

The Hungarian Premier and Minister of the Interior proposes to introduce in the Diet a bill for the establishment of a steamship line from the port of Fiume to New York, to meet the requirements of the immigration law. The negotiations between the Government and the Cunard Steamship Company will be laid before the Diet at the same time.

The British expedition under Colonel Younghusband to Lhassa, the capital of Tibet, has reached Gyangste, which is only forty or fifty miles distant from the capital. The expedition, which is pacific in its nature and has no ulterior designs on Tibet, has met with some armed resistance from the natives.

The French Government has just purchased for the National Gallery of the Luxembourg two pictures by American artists—an Oriental painting by the late Edwin Lord Weeks of Boston, and a blue and white interior, showing the fireplace of the Bradley mansion in Boston, by Walter Gay.

Industrial and Commercial.

In an interview Professor Sir William Ramsay is represented as declaring that radium, instead of being a primeval substance which has been slowly disintegrating since the world began, is merely a temporary phase of matter, an unstable resting point in a series of transmutations, of which nobody knows the beginning, or end, or meaning. Experiments made by himself and Professor Soddy tend to show that it would all disintegrate and vanish eleven hundred and fifty years hence. The rate of disintegration does not depend upon the quantity existent. It would all vanish, whether it measured a cubic inch or a cubic mile, forming in the process other substances, the only one at present known being helium. It is obvious, therefore, that radium must now be in the course of production. If it had been an original deposit it would have disappeared long ago. It was the merest speculation to discuss how it was produced. Nobody knew, but possibly it came from uranium.

According to the present outlook the New York subway may not be completed until fall instead of June, as was hoped, and it is possible no trains can be run until well along in the winter. The construction work of the subway itself and of tracks could be completed by June, it is thought, but the power house at Fifty-ninth Street with its seven huge generators is behind. As only two of these generators have been put in place, and it takes six weeks to put together each set of the generating machinery, and five of these at least are needed for a beginning, it will be mid-August at the earliest before the machinery necessary to give power for the train service in the subway will be ready.

Charles Baskerville, professor of chemistry and director of the laboratory in the University of North Carolina, announced last week before the Chemists' Club in New York City, his discovery that thorium, hitherto known as one of the seventy primary elements, is a compound substance. Dr. Baskerville has resolved thorium into two new elements. He has named one of these Carolinium, after the State; the other Berzelium, in honor of the Swedish chemist who, nearly a hundred years ago, discovered thorium. He has the good fortune to be the first American chemist to discover a chemical element. Dr. Baskerville's discovery is the result of ten years of research.

A compilation of new cotton mill enterprises reported throughout the South during the first three months of 1904 shows that the total is not equal to the record for the first quarter of 1903 by about 88,000 spindles, but is ahead of the last three months of that year. About 150,000 spindles, representing an investment of $3,000,000, are to go into established plants, while 50,000 spindles are for six new mills, four of which are promoted by experienced manufacturers. South Carolina leads in spindle additions, its total being 124,656, or over 60 per cent of the aggregate for the quarter.

Articles of incorporation have been filed with the Secretary of State for the National Farmers' Exchange, with South Dakota headquarters at Pierre and offices in Chicago, and a capital of fifty million dollars. This corporation has for its purpose coöperation in the handling of all products of the farms, or in other words, a "farmers' trust." The incorporators are Western men.

General.

The old locomotives of the Baltimore and Ohio Railroad and several other antiques of the older roads of this country, which were donated at the close of the World's Fair to the Field Columbian Museum, are to be put on exhibition at St. Louis. The Baltimore and Ohio exhibit will include thirty-eight full-sized working reproductions of locomotives covering a period from the earliest to 1848, and also nine original locomotives, comprising types in use from 1832 to 1876. The Chicago and Northwestern Railroad will send the Pioneer, the first locomotive to be used west of Chicago. The Mississippi, the first locomotive to be used in the Gulf States, will be contributed by the Illinois Central Railroad.

An inmate of the poorhouse at Nantes, France, an old man, while digging in the garden recently, unearthed an antique vase decorated with paintings and containing two thousand gold pieces of the Gallo-Roman period. The vase will be sent to the Louvre in Paris, and the coin, estimated to be worth to-day forty thousand dollars, will be divided among the finder and his fellow paupers.

The authorities of Harvard University have decided to go ahead at once with the construction of Emerson Hall, the new building for the Department of Philosophy. It was first intended to break ground last May for the building at the time of the celebration of Emerson's birthday, but it was found impracticable.

John S. Sargent has been chosen to paint the portrait of President Eliot of Harvard, presented to him on the occasion of his seventieth birthday. The portrait will be life-size, and when completed will be placed in the living room of the Harvard Union.

Since immigration to the United States was first recorded officially, twenty-two million people have come to the United States. Five millions have come from Germany and four millions from Ireland.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

From our Contributors.

"Help Thou mine Unbelief."

CLARENCE A. BUSKIRK.

As I was emerging from boyhood I read one day a strong and beautiful poem whose lofty thought enshrined in noble words lingered in my memory for a long time, but in the passing of many years it seemed to have disappeared wholly from my conscious remembrance. A few days ago I came across the poem and read it again. Except as modified by the changes wrought in myself by time, much of the fervor of my former admiration was renewed; the fogs seemed to lift from my memory, and all the attendant circumstances as well as the ardent impressions of its first perusal arose vividly before me. It is evident that the event had therefore never been obliterated from what I may call my unconscious memory.

According to the teaching of psychology, it is not improbable, indeed it is quite probable, that all the impressions made upon our mentality, including our imagination, reason, emotions, even our prejudices, are more or less indelible, however unconscious we may become of their possession. Our beliefs may and do undergo many conscious transformations, but it is very probable that the impressions of all our former beliefs remain with us, and that they continue to have some influence over us. I cannot conjecture how much or how little the reading of the inspiring poem in my impressionable boyhood may have affected my subsequent life; but I am entirely sure that it did affect it to no inconsiderable extent, and I feel equally sure that every false belief I have ever cherished, as well as every impure and vicious emotion or imagination I have ever entertained has affected my subsequent life to no inconsiderable extent. The hosts of our beliefs continue to haunt us, and are more or less recognizable. Their shadowy hands help to build the structures of our lives. We are truly fortunate if the lines in Henry VI. do not apply to us,—

> Their shadows seem
> A canopy most fatal.

In Mark, 9, we read of the man who cried out to Jesus, "Lord, I believe; help thou mine unbelief."

These words show that the man was conscious that his belief had not attained the full stature of an absolute conviction, and that, therefore, the residual unbelief which continued with him, and which he regretted, could be helped. Do any of our mere beliefs attain the full stature of absolute convictions? Do they ever free our consciousness entirely of residual unbeliefs? Careful introspection will show us that these important questions must be answered in the negative.

A valuable instance showing how far a transformation in our mere beliefs can go occurs with Shakespeare. A study of Hamlet's soliloquy shows that when it was written Shakespeare strongly inclined to agnosticism. His last will indicates, however, that he subsequently became a Christian believer, though there is nothing in all his writings to show that he ever attained an absolute conviction. If he had done so it is safe to assume that it would have been plainly evidenced somewhere in what he wrote, for his pen had too universal a touch for anything so important to have escaped it. That mere theological belief falls short in its transforming influence upon character and conduct is abundantly shown in the history of our ancestors. Their religious belief evolved many splendid qualities, but it did not always evolve the gentleness and love for our fellow-men taught by the Nazarene.

The student of Science and Health does not need to be reminded of the distinction between belief and understanding, vividly pointed out many times, in its different bearings, in our text-book. Two quotations must suffice for this article. "Nothing is more antagonistic to Christian Science than a blind belief without understanding, for it hides Truth, and builds on error" (p. 83). "Belief and understanding never mingle. The latter destroys the former" (p. 276).

Belief implies the possession of doubt. To understand excludes doubt. We cannot know except we understand, and we cannot understand except we prove. These propositions, however phrased, are familiar to Christian Scientists; and their daily importance cannot be too much emphasized. Iteration is frequently a most useful form of emphasis.

"Lord, I believe," implied doubt; hence it was proper for him to add, "Help thou mine unbelief!" And right here we discover one of the chief weaknesses in the halved Christianity which merely believes, but cannot demonstrate, after the example of Christ Jesus, the verity of its belief. What would be the world's opinion of a professional mathematician who should announce his belief in a theorem and yet never be able to prove its correctness? At first, his supposed authority as a learned man might suffice with many; but in due time the prestige of his authority would be destroyed by his lack of a demonstration that his teaching was correct. The authority of the teachings of even a halved Christianity has been very great. But time passes, and the Christianity which cannot prove itself true in accordance with the command and example of our Wayshower, cannot meet the tests and demands of the twentieth century.

How stands the case with Christian Scientists? Possibly to some of them the proofs have once been given, but years have passed, and having neglected to keep their lamps trimmed and burning, the twilight of mere human belief, peopled with scurrying doubts, has seemed to enshroud them. The spiritual perception which once came to them as a visitation of light has become darkened, although, like the music of the forgotten poem, its unperceived influences must forever remain as a benefaction. If unrebuked, the false testimony of the physical senses and the psychological effects of former erroneous beliefs, being hostile to the spiritual life which was realized through understanding and demonstration, can but work them injury; and their faith in Christian Science is likely to become only a matter of thought-habit, rather than an irradiating light to sweeten and guide their lives. What is the remedy for this unfortunate condition? Renewed and diligent seeking for

Copyright, 1904, by Mary Baker G. Eddy.

Digitized by Google

spiritual understanding and for the proofs of its correctness. Only as we prove the truth can we obtain and retain the truth. The "good fight" is ever with us; we may be victors to-day, but that does not mean that we can slothfully lay aside the weapons and the warfare, for the influences of our old beliefs, and the falsehoods of physical sense, seem never to desert the battlefield.

Let us remember ever the admonition of Jesus, "What I say unto you, I say unto all, Watch!" There can be no real occasion for discouragement. Darkness is but nothingness, and the shadows which are troubling consciousness are but shadows at last. Truth is the eternal ever-presence, and all who seek with the whole heart shall surely find!

The Church.

FLORENCE W. FLOURNOY.

THE symbolism of human achievement is revealed clearly to the student of Christian Science. Each day's experience is a symbol of our thought, its story a parable which illustrates the working of our mentality, even as the Mind of the Master was portrayed in his beneficent words and work.

> Our to-days and yesterdays
> Are blocks with which we build;

but the law and explanation of our individual building must be clear in thought, an expression of the Science of Mind, if our structure is to stand its test. Paul tells us in 1 Corinthians that "the fire shall try every man's work of what sort it is."

Thus are our churches to be built. Each step is to be taken individually, in daily living, while the governing law remains hidden in the sacred sanctuary of our understanding. All outward expression is but a symbol. Each heart creates its own temple, as faith in matter falls before the recognition of the nature and power of divine Love.

Science and Health tells us (p. 241) that "the corner-stone of all spiritual building is purity." This corner-stone must be laid in the heart of every one who desires to be a member of the true church, and each one must do this work for himself. We must clear a place for this stone, we must excavate until we reach and rest on the solid rock of pure, God-given purpose. This will secure us that unity of motive, of understanding, and of results which gives stability to our structure. Furthermore, our foundation must be laid upon the solid rock of demonstrable truth, that the tempest-tossed seas of false systems may not disturb it. Firmly set, cemented, strong, this foundation of the Christ consciousness resists the temptations of mortal sense and stands firmly for the good.

We are now ready for our walls of salvation, the saving of our bodies, our homes, our circumstances, the superstructure of Christian consciousness. It shall have gates of praise, the tower shall tell of aspiring faith, the roof of that divine wisdom which is our sure protection.

As this fair structure is built, we become representatives of the great Cause of Christian Science which demands for its temple the transformed heart of humanity. Anxious consideration for the outward manifestation of the church may retard its spiritual unfoldment in thought, even as constant thought of the body hinders physical healing. We need to lift not only our church but its officers until they become symbols of that which eye hath not seen nor ear heard. We must know that the true spiritual idea equips, leads, and supports "the structure of Truth and Love" (Science and Health, p. 583).

The endeavor to achieve this goal will fit us to make our noblest contribution to the church militant, and when this spiritual undertaking shall have been accomplished we shall manifest individually the church triumphant.

The Value of the Truth.

GERTRUDE E. MERIAM.

DIVINE SCIENCE,—the little book in the hand of the angel, what a priceless treasure! Can its value be estimated by human standards? and yet, its price is sometimes criticised. In what consists its value? Is it not its high quality of thought, and the sacrifice required to bring it forth?

The demonstration of Divine Science by Jesus cost him much, and we must have a true conception of his work for humanity, in order to understand his words. This is revealed to us in Science and Health, through which we gain a spiritual sense of the Word; the Bible is illumined to our apprehension, and its teachings made practical in the healing of all our ills.

We must also have a just sense of what it has cost our dear Leader, to bring to us this message of Life. Persecution has followed every effort to give to the world the knowledge of Truth. Our text-book says, "When Christian Science and animal magnetism are both comprehended, as they will be, at no distant date, it will be seen why the pioneer of this Science has been so unjustly persecuted, and belied by wolves in sheep's clothing" (Science and Health, p. 104).

In the Bible we read, "Be in pain, and labor to bring forth, O daughter of Zion, like a woman in travail: for now shalt thou go forth out of the city, and thou shalt dwell in the field, and thou shalt go even to Babylon; there shalt thou be delivered; there the Lord shall redeem thee from the hand of thine enemies."

The "little book" has been brought to us through much tribulation and great opposition; none can know how much. Our Leader calls it "the precious volume."

A Wood-Carver's Lesson.

M. E. B.

HERE was the beautiful piece of solid mahogany, just home from the carpenter's. The wood fairly shone, and this perfect polish was necessary, as the carving I wished to do was to be an outline design. I quickly transferred the design and took up my outlining tool for work.

It slipped, and would not enter the smooth surface, and as I pressed harder, what was my dismay to find an ugly uneven scratch, and I saw that instead of a true polish, there was a thick coat of varnish covering the wood. No carving could be done till that was removed, and how to do it was the question.

Wood alcohol would dissolve the varnish, but on mahogany it leaves a white stain, so I tried sandpaper, then scraped it with a knife, but neither did the work, so, as a last resort, I tried the alcohol. This softened the varnish so it could be rubbed and scraped off, but there were the ugly white spots wherever the alcohol had touched the wood. The board seemed to be ruined. But, I reasoned, it is solid mahogany, it can't be spoiled by that treatment, it can't really be injured by what is on the surface. So I poured on oil, and kept rubbing it in, until the white disappeared entirely and a polish, real and enduring, brought out the beautiful grain in the wood.

This may illustrate what happens to some of us as Christian Science dawns on our consciousness and we stand before the Divine carver. Looking at us superficially, our friends might say, That character is well polished, it will reflect only Truth and Love. Ah, but when the surface is tested it is found to be but a counterfeit. Love of self, resistance to Truth, pride, and self-will rebel against the tools Love would use, and we see plainly the mockery of the surface gloss.

The carver knows the real man is beneath this false exterior, so with infinite patience He begins to remove the outer sham. As outsiders look on they may say, Don't try this,

Digitized by Google

don't give up that, you will injure your reputation, you will leave a blemish of weakness if you give up your will, no one will look out for you if you don't look out for yourself, etc. But Love, the "universal solvent," will dissolve the sham, infinite patience will rub away self-will, self-love, pride, and all the rest.

What if it does hurt? what if you do seem to be scarred and seared by the process? Love beholds the real man all the time. If we patiently continue the cleansing process, using plentifully of the oil which our Leader defines to be "Consecration; charity; gentleness; prayer; heavenly inspiration" (Science and Health, p. 592), the real character will be revealed which the master Workman may use at His will.

A Reminiscence.

ELIZA BRUCE RYAN.

SINCE coming into Christian Science I have often wished for "the pen of a ready writer" that I might express the gratitude I feel for the many blessings which have come to me through the understanding of Truth as revealed in our inspired text-book, Science and Health.

I live near the Mother Church, and from my windows there are beautiful views of it, and when I am alone, in the silent watches of the night, I can look across to this symbol of all that stands for Principle, and meditate upon the wonderful changes which have come into my life since I watched the building of this church from the foundation until the day when its finial was put in place.

While I listlessly watched the workmen, I little thought of the influence the beautiful tower with its chime of bells calling to meditation and prayer would henceforth have upon me when a few months later I should become a member of that church,—then unknown to me. Since then, through these nine years, with the exception of four weeks, this granite tower has been my daily companion. Through all the varying changes of light and shade it stands out a quiet monitor, sometimes in the moonlight, in sharp relief against a pale sky with a single bright star shining conspicuously above, reminding me that "the star of Bethlehem is the star of Boston" (Miscellaneous Writings, p. 320). I rejoice that I was born here and that I am privileged to be numbered among those who are taking part in this mighty movement of the ages. My thought always turns in deepest reverence and gratitude to our Leader, through whose night-vigils, self-sacrifice, and toil this has been made possible.

This beautiful gray tower has been the witness of many days and nights of struggle in my passage from anguish and despair to serenity of thought, until at last the unhappy, discontented woman whose tearful eyes first gazed so hopelessly upon its uprising, now surveys her transformation with awe, and having been brought into the haven where she would be, stands with eager feet and joyous heart, a faithful sentinel, awaiting the outspreading of its "walls sublime," and praying that she may always follow humbly and worthily in the path marked out for the guidance of the flock which ever look lovingly to the Mother Church.

Science and its Demonstration.

JULIA S. KINNEY.

WEBSTER'S definition of the word science is, "accumulated and established knowledge, which has been systematized and formulated with reference to the discovery of general truths or the operation of general laws; knowledge classified and made available in work, life." Perhaps the best definition of Christian Science that could be given in a few words would be the knowledge of Truth classified and made capable of being used in the problems of life.

In the Christian Science text-book, Science and Health, Mrs. Eddy, its author, has systematized and formulated the truths contained in the Bible, has explained God's laws and their operation in the destruction of sin, disease, and death so clearly that all may learn this Christ method and apply it to their daily needs, verifying Jesus' words, "He that believeth on me, the works that I do shall he do also."

To-day we find many ready and willing to admit that Mrs. Eddy is an advanced thinker, and that her works contain many truths; but too many make the mistake of thinking that they can gain an understanding of Christian Science by reading other authors who have undertaken to write upon what they are pleased to call Mind-Science. Such persons fail to recognize the fundamental distinction and difference between Mrs. Eddy's writings and those of others; viz., that while the many portray high ideals, her writings alone reveal the Principle which, when understood and applied, makes these ideals possible of attainment. Christian Scientists are not satisfied with reading and dreaming, they are impelled to strive earnestly, intelligently, constantly to make their lives holier and better in every way. They are grateful to Mrs. Eddy because she has not only presented the mark of this "high calling of God in Christ Jesus," but has by her own demonstrations blazed a way which, if faithfully followed, will lead to the heights of spiritual overcoming.

She might have felt that she had done enough in giving mankind Science and Health, and that if they could not understand and demonstrate it, this would not be her fault, but theirs. Instead of this, however, she has been, and still is, untiring in her efforts to have all enjoy the blessings of this wonderful truth.

Semi-annual Lecture of the Mother Church.

AT the lecture given in Symphony Hall on Thursday, April 14, by Bicknell Young, C.S.B., of Chicago, every seat was taken, and hundreds remained standing throughout its delivery. The subject of Christian Science was presented in a convincing as well as reverential manner, and the closest attention was given by the large and thoughtful audience. The lecture will appear in the next issue of the *Sentinel*.

[Written for the *Sentinel*.]

Trusting.

MARGARET FLORENCE MC AULAY.

O WEARY heart and steps that slow
Along life's pathway come and go,
Fear not, the Master trod alone
The thorn-path leading to a throne.

Though footsteps burdened be with years
Of ungained hope and bitter tears,
Fear not, nor shrink the rugged way,
It leads thee into perfect day.

Fix thy firm gaze upon the star
And nothing can thy gladness mar;
The thorns to roses turn, and bless
Thee with their loving, soft caress.

What though the shadows seem to fall
Dread o'er thy path and darken all;
O fearful heart! be still, and know
Love's lamp still burns with steady glow.

Deem not because this mortal mind
Doth thy true vision seem to blind,
That aught by either night or day
Can dim Truth's bright resplendent ray.

The True Mind Healing.

There is a wide difference between healing that is wrought upon the basis that the curative power, God, is matter and Spirit working in unison, and healing that is wrought upon the basis that the curative power, God, is Spirit, Mind, Life, Truth, and Love. The logical deduction of the former is evolution—the commingling of the animal and the spiritual in a fleshly body; from the latter the conclusion follows as logically as four follows the postulate two times two, that the creation is wholly a mental or spiritual unfoldment wherein matter, sin, disease, and death have no part. Since matter and evil are not present in the premise it cannot appear as a reality in the conclusion.

When Christian Scientists speak of healing the body through Mind they do not refer to the so-called human mind but the divine Mind, God. Now here is where the critic, speaking from his standpoint, has failed in his effort to understand Christian Science and therefore misrepresented it. Christian Scientists deny the reality of matter and disease just as men ordinarily deny the imputation that five could possibly be the manifestation or child of two times two, and have the fruits as proof, just as the mathematician has the proof that four is a legitimate and real product while five is illegitimate and unreal, no matter how firmly one may think he believes it. Truly does the poet, speaking of the way things appear before our material senses and mindful of what the Scriptures say of God and His real creation, declare, "Things are not what they seem."

Christian Scientists deplore the tendency to explain the Bible materially, and to drag the mission of Jesus down to the level of mind cure and magnetic healing. Jesus constantly taught that the works which he did were in his Father's name and were evidences that the things which he understood and taught were true. They were not theories which he had himself invented, but truths which have their origin and foundation in God.

CHARLES D. REYNOLDS.
Granite State News.

The Value of Religion.

Religion should be valued for what it accomplishes as well as for what it promises.

Heaven is the realm or state of the normal, God-made man,—not merely the ultimate but the primitive condition. It is known and enjoyed by the spiritual man, God's own image and likeness. It belongs to the here and now and is the answer to our Lord's prayer, "Thy kingdom come. Thy will be done in earth, as it is in heaven."

It is the purpose of religion not only to prepare one for heaven, but to create or restore heaven itself.

Christianity is the religion of Jesus Christ and is regarded by all believers in Christ as the true religion, because it is the direct and practical way from earth to heaven; that is, out of a discordant material condition into a harmonious spiritual state. Hence the Master said, "I am the way, the truth, and the life: no man cometh unto the Father, but by me."

The way from the imperfect to the perfect state was well known to Jesus; it was the way of understanding; it was clearly perceived and perfectly demonstrated by him; hence he could speak with authority and say with positiveness, "I am the way."

Any form of religion which tends upward and onward and makes its adherents better is worthy of credit.

There might be a thousand varying, indirect ways to reach a given destination, but only one direct way. One might spend a lifetime in wandering about and trying different ways; while he who correctly understands will take the direct course at once. If one experiments with an ill-chosen course, he learns something at least; he finds out that that particular course is not the right one and is saved the ordeal of trying it again. In this behalf some one has very aptly said, "We learn the truth by the things we suffer." If we take the wrong course, the lack of success which follows convinces us of our mistake. If we take the right course, the success which follows is convincing that we have chosen aright.

We learn by every act whether it be good or bad, and therefore the world is compelled to progress.

Many have spoken earnestly and appreciatively of the happy and hopeful state of mind which characterizes Christian Scientists and have noted their unusual freedom from petty as well as serious vices. These results ought to receive their full recognition and be properly credited in estimating the value of the Christian Science religion.

Promises of heaven hereafter which are not accompanied with some degree of harmony here and now, are like mining prospects which never begin to pay dividends.

ALFRED FARLOW.
Boston Times.

In dealing with the subject of healing and when discussing the question of what constitutes the best method of treating the sick, the Christian Scientist speaks from a somewhat broader experience than does his neighbor. Not only has he, as a rule, experimented largely with medicine, but, profiting by experience, he finds more efficacy in appealing to God direct.

Christian Science is based on common sense. It teaches that the heavenly Father is a very present help in time of trouble. Further than this, it insists that God can and does answer prayer. The Christian Scientist takes God at His word. He believes that the promises in the 91st Psalm can be trusted implicitly. The teaching of our Saviour appeals to him as a practical plan whereby human want and woe can be lessened, if not entirely eliminated, and the happiness of mankind thereby increased.

While entertaining the greatest respect for physicians and clergymen, and for the noble efforts put forth by them to lessen the distress of their fellow-men, the Christian Scientist believes that there is a better way than theirs.

To constantly assert the supremacy of good over evil is one of the ways in which the Christian Scientist believes that progress can be made God-ward.

God will indeed help those who help themselves. But unless the effort is made in the right direction and is supported by the right understanding, there can be little hope that His protecting care will be available. To claim this protection in all its fulness, here and now, instead of waiting until the hereafter, appears to the Christian Scientist to be the better way. Jesus said, "I am the way, the truth, and the life." His healing was at all times accomplished through the use of spiritual means alone, and so was that of his disciples.

The Christian Scientist knows from experience that reliance upon God alone is far more efficacious than any attempted mixture of prayer and medicine can possibly be.

ALBERT E. MILLER.
Reading (Pa.) *Eagle.*

Our critic states that "the defect of Christian Science is that it ignores or seems to ignore the principle of the Cross. Not in denying, but in accepting pain, is oftentimes the noblest way to encounter it."

Christian Scientists do not construe the taking up of the cross as a mere resignation to suffering, but a rising superior to it, on the ground that Jesus would not have healed disease if it had been God's will for it to remain. He came to destroy the works of the devil, and he evidently classified sickness as one of them.

The Lectures.

Los Angeles, Cal.

Edward A. Kimball, C.S.D., of Chicago, delivered a lecture on Christian Science yesterday afternoon [April 10] at Hazard's Pavilion in this city before a large audience composed of many of the leading and most intelligent citizens of Los Angeles, together with large numbers from outside towns who came from their homes purposely to attend the lecture. The speaker was introduced by Hon. Will A. Harris, in an eloquent and impressive address, commending Christian Science and its teachings, and Mrs. Eddy, its Founder, for her work. Hazard's Pavilion, with a seating capacity of over three thousand, was crowded by interested listeners, and the closest attention was given the lecturer throughout a most earnest, impressive, and able exposition of Christian Science.

Following is Mr. Harris's introduction:—

I am not a Christian Scientist, but for this organization, whose Leader is one of the purest, noblest, and best women in the world, I entertain the profoundest veneration and respect. The lofty character of Mrs. Eddy is a continuing inspiration to right living and elevated thought.

That Christian Science has become a great force for the accomplishment of good in the world, no well informed, and unprejudiced person will deny. As I understand it, a profound, underlying declaration of the Christian Scientist is that evil is not necessary among men, that it is unnatural and can be eliminated. Christian Science teaches that men should exclude thoughts of evil from the mind and dwell only in thought upon the good and the beautiful. Surely one who teaches and practises this beautiful doctrine should not be discouraged even by those who think differently.

One who thinks no evil can do no evil. It was the knowledge of evil that brought sin into the world. It is not my purpose, however, to discuss the teaching of Christian Science. The distinguished gentleman who will address you will do that much more ably than I could hope to do it. I cannot refrain, however, from telling you that I heard one of the world's greatest preachers say, only a few months ago, that Mrs. Eddy was one of the purest of women, and that Christian Scientists were doing great good in the world.

I desire also to express my gratitude for giving me an opportunity to preside over this meeting. A movement that brings together Jew and Gentile in an organization whose descriptive word is Christian is prophetic of a new era for mankind, an era whose central thought will be love.

I take great pleasure in introducing Mr. Edward A. Kimball of Chicago, Ill.—*Los Angeles Times.*

Longmont, Col.

Judge Septimus J. Hanna delivered an address upon the subject of Christian Science at Dickens Opera House, March 7, to a large and appreciative audience. Judge Hanna was introduced by Judge H. M. Minor, one of the leading lawyers of our city, who presented the speaker in a few preliminary words as follows:—

Ladies and Gentlemen and Fellow-Citizens of the City of Longmont:—I am not here for the purpose of advocating Christian Science or of denouncing it. I am not well enough acquainted with the subject to be competent to commend or condemn, but I know enough about it to know that it is a subject that has been before the public for some years and has attracted the attention of the thoughtful and scientific writers of our country. It may be that Christian Science is not all that is claimed for it by some of its most enthusiastic supporters. It may be that Christian Science methods have not always resulted in the healing of the sick and their restoration to health. But even if that be true we should not condemn it because upon the same theory all the medical schools of the land, and all the graduates therefrom, and most prominent physicians would be condemned; for none have become so well skilled as to be able to furnish an infallible remedy for all the ills to which mankind is subject.

As I understand Christian Science and what its adherents claim for it, the great objects and purposes of its followers are to bring mankind back into that natural and cordial relation with the Creator that existed before sin entered into the world; its methods are not only a panacea for the soul, but a remedy for the ills and afflictions of the body; and when man is brought into the proper relation with his God and conforms his actions to the divine rule, he follows in the footsteps of the meek and lowly Nazarene; his actions are correct, his thoughts and meditations are pure and holy, he keeps his passion subdued and under proper restraint, all of which tends to give him a stronger, healthier, and more robust physical being. And in this way Christian Science comes as a redeemer, not only for mankind in the future, but a restorer of mankind to his normal relations and conditions in this life.

So whatever we may think of the question, let those of us who have not taken time to examine it carefully, dismiss from our minds this evening any prejudices, if any there be, and patiently listen to the address that is about to be delivered to us by the speaker of the evening. I take great pleasure in presenting to you Judge Septimus J. Hanna.

Correspondence.

Kalamazoo, Mich.

Carol Norton lectured on "The Meaning of Christian Science," at the Academy of Music, March 6, before a large and representative audience. He was introduced by Cora E. Downer as follows:—

Ladies and Gentlemen:—The lecture you have been invited to hear this afternoon is for the purpose of correcting existing misconceptions of Christian Science, and of affording you an opportunity to learn somewhat of its meaning, although in the brief time allotted him it will be impossible for the lecturer to enter into a technical explanation of the subject.

Christian Science finds the solution of the problem of human existence in Spirit and its laws, not in matter; and many of the foremost scientific men of the age are coming to the same conclusion, their researches confirming Paul's statement, "Things which are seen were not made of things which do appear."

In an address before the Royal Society of Edinburgh last summer, Lord Kelvin said, "It is not in dead matter that we live and move and have our being, but in the creating and directing power which science compels us to accept as an article of faith." "Modern geologists are coming, I believe, once more to a firm acceptance of something beyond mere gravitational, chemical, and functional force."

Christian Scientists, together with all Christians, call this power God, and wisdom bids us "get understanding" of His law, which gives spiritual conquest over mental, moral, and physical discords.

We have with us this afternoon one who has been so benefited by Christian Science that he relinquished a professional career to become an exponent of its doctrine. I bespeak for the lecturer and for his subject your careful, earnest, and unprejudiced attention. I have the pleasure of introducing Mr. Carol Norton of New York, who will address you on "The Meaning of Christian Science."

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

A New By-law.

ARTICLE XXVI.

CHURCH ORGANIZATIONS AMPLE.—SECTION 13. Members of this Church shall neither be makers nor members of organizations which exclude either sex or are not named in the Manual of the Mother Church. God separates the tares and wheat to garner the latter in His storehouse.

Carol Norton, C.S.D.

THE following tribute from the pen of Mr. Alfred Farlow expresses in part, at least, the love and admiration felt for the high qualities of our brother and co-worker by thousands who knew him through his far-reaching and successful efforts for the advancement of our holy Cause. His quick recognition of the good in others, and his firm faith in its ultimate triumph everywhere, seldom failed to awaken a responsive thought wherever it touched, and many were thus led to seek the divine Principle of Christian Science which he always acknowledged as the source of all true optimism and the foundation of the brotherhood of man in which he so firmly believed.

Because he represented a noble type of true manhood he was keenly appreciative of the advancing idea of true womanhood, and ever held in the highest reverence our beloved Leader, whose teachings had shown him the way to that right understanding of God and man which is indeed "life eternal." Referring to Mrs. Eddy he says, "She stands foremost among religious teachers and reformers for purity of spiritual thought, ethics, language, and works. Simplicity of thought and teaching, and the logic of Truth are her weapons of peace." His words which follow are deeply significant at this hour, "Truth is always the 'Ancient of Days.' The central facts of life remain unchanged; but our mortal sense of man as the idea of the infinite Mind, advances and ascends."

With tenderest sympathy we record the accidental death of our beloved friend and brother, Carol Norton, C.S.D. The lives of the great and good live after them.

Mr. Norton was born in Eastport, Maine, where he spent his early days and where he is still much loved. In his boyhood he engaged in mercantile business, which he plied with remarkable success, while bending his efforts towards the ministry. He had unusual religious proclivities and, while yet a youth, the truth and beauty of Christian Science appealed to him. In the midst of a successful business career, he left all to aid in the propagation of this religion which touched him so deeply and which assured him of the healing and saving power of our Master's gospel. He was an indefatigable worker and this achieved for him marked success in his Christian ministry as it did also in his business affairs.

Mr. Norton was a graduate of the Massachusetts Metaphysical College, having been personally taught and qualified for his mission by its President, Rev. Mary Baker G. Eddy, and in 1897 he was elected one of the Executive Members of the Mother Church, The First Church of Christ, Scientist, in Boston.

As a public speaker, he was forceful, eloquent, and convincing, possessing a remarkable vocabulary, a musical voice, and most pleasing address; and these qualities, with his kindly, noble heart, his unswerving honesty, sincere convictions, moral courage, and his love of the good, pure, and true, especially fitted him for his later work. Indeed, his talent was so marked that at the early age of twenty-seven, he was appointed to enter the lecture field as one of the leading exponents of Christian Science, and in that capacity he won a national reputation. Everywhere he was regarded favorably and affectionately by Christian Scientists; he had remarkable executive ability and won for himself a warm place in the hearts of the general public. His clear apprehension and elucidation of Christian Science made him an excellent teacher and he was held in the highest esteem by our beloved Leader, Mrs. Eddy.

Mr. Norton was becoming well known as an author. He was a relative of the poet Longfellow, and from childhood was gifted with those traits which tend to greatness, and he faithfully improved his talents. He would have been a great man anywhere; and Christian Science helped him to attain rapid distinction, for it taught him how to rely upon divine Love. He was ever the champion of individual freedom and human rights.

Though departing this earth life in early manhood, Mr. Norton has accomplished more than is usually expected of older men. His noble example and the truth he imparted, will live on to propagate and fulfil his earthly mission. He "fought a good fight," he "kept the faith," and he will ever live in our fondest memories.

A Deepening Interest.

A PROMINENT editor is authority for the statement that from the editorial standpoint, Christian Science is not of as much interest as it was a few years ago; and while this statement may be true from his point of view, it does not alter the fact that the public is certainly more interested in the subject than ever before. There is at present a greater eagerness for authentic information about the teachings of Mrs. Eddy and their bearing on the practical problems of existence than at any previous time.

From the position of the newspaper man, only that which is unusual can be classified as news, and the progressive journalist is ever in search of something so far removed from the routine of daily life as to escape all possibility of being commonplace, and in the sense that Christian Science has become well known and its adherents have increased with great rapidity, it has become commonplace; this may account for the opinion quoted. Nevertheless, the subject has not lost interest for newspaper and magazine readers: on the contrary, their interest has increased, but along different lines. Those who were in the habit of looking upon Christian Science as a nine-day wonder, are now regarding it seriously, and their effort is to acquire reliable information.

The experience of those in a position to know of this interest is in support of the proposition that the number of persons seeking enlightenment has increased many fold during the past decade. Additional evidence of this increasing interest is shown by the greater number who attend the official lectures given under the auspices of the churches of the denomination. Still further evidence of this demand for a correct knowledge of Christian Science is presented in the numerous calls for Mrs. Eddy's book, Science and Health. It is no infrequent happening for this book to be in the list of those in greatest demand by the patrons of the libraries in all the larger cities. In other words, the reading and thinking public is taking Christian Science more seriously, and in a more sane and sensible way. Individuals are more inclined to investigate for themselves than they are to read

Digitized by Google

sensational news items or articles by writers whose only claim to impartiality must rest upon their utter ignorance of the subject, and who have at best only a theoretical belief about it.

To sum up: not a few editors are finding their readers less interested in attacks upon Christian Science, and some of them have not yet adjusted themselves to the fact that articles by Christian Scientists which truly present this religion are meeting with more and more favor. The public is losing interest in the opinions of those who have no practical knowledge of Christian Science. It is probably true that not many people would care to listen to the opinions of a stage driver upon railroad matters, but this does not mean that the views of a railroad superintendent would be unwelcome to those who are interested in any question pertaining to modern transportation. M.

Self-righteousness.

Thou wilt bind the stubborn will,
Wound the callous breast,
Make self-righteousness be still,
Break earth's stupid rest.

MARY BAKER G. EDDY.

SO-CALLED liberalism in religion says that if a man lives up to his own standard of right, he is doing all that is required of him. Again, there is a strong tendency in the human mind to set up moral, religious, or medical standards for others, quite oblivious of the fact that a universal standard of right must have always existed, and that the sooner it is known and obeyed, the better for all mankind.

In the book of Judges we are told that at one time "every man did that which was right in his own eyes," and this has been the case to a large extent ever since. Is it not true that mortals attempt to justify whatever they do, thus giving a sop to conscience with the hope that they may evade the demands of absolute right?

It has generally been supposed that the "unco guid,"—the very religious,—are most prone to self-righteousness, but theirs is simply a distinctive kind of self-righteousness, while that of others is not perhaps so easily recognized for what it really is. The libertine boasts that he is actually better than the church-goer who has not overcome all his errors, in that he makes no pretence to goodness.

On close analysis, it will be found that self-righteousness is a characteristic of mortal mind by which it suffers from self-deception in the midst of its most palpable failures, and while justifying all its errors goes out into deeper and deeper darkness. St. Paul describes this condition very forcefully when he says, "For they being ignorant of God's righteousness, and going about to establish *their own* righteousness, have not submitted themselves unto the righteousness of God." Some one has ventured the statement that self-righteousness was the only phase of error which Jesus did not succeed in overcoming in others, and that when he uncovered its false claims it took revenge by bringing him to his trial and crucifixion.

In reviewing the character and earthly life of our Lord, we see that he never measured himself or others by human standards, but always directed thought to the only standard, —divine perfection. When this standard is faithfully kept in view there is certainly no room for pride or self-satisfaction, nor is there any place for false humility which presupposes conditions that are neither instituted nor controlled by divine Mind. In the healing processes of Christian Science, sin is most effectually uncovered to us, and we learn the folly of contending for that which is not ordained of God. Paul said, "I bear in my body the marks of the Lord Jesus." By many this statement has been taken to refer to the scars of Jewish scourge or of Roman spear, but may not its truer meaning be, "I bear in my body" the evidence of health and holiness, "the righteousness which is of God by faith" wherein we "worship God in the spirit . . . and have no confidence in the flesh."

Our text-book says, "Blindness and self-righteousness cling fast to iniquity" (Science and Health, p. 448). True righteousness, with its attendant joy and peace, is the "fruit of the spirit;" of sin overcome, not excused or defended, whatever be its nature. In the epistle to the Romans we read, "Christ is the end of the law for righteousness to every one that believeth,"—Christ, Truth, the only model for thought, word, and deed. K.

Notice.

No classes will be taught in the Board of Education before December next.

Board of Lectureship.

HON. CLARENCE A. BUSKIRK has been elected a member of the Christian Science Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass. Mr. Buskirk's address is 221 Monroe Street, Princeton, Ind.

Letters to our Leader.

Maquoketa, Ia., April 5, 1904.

Dear Mrs. Eddy:—"Out of the abundance of the heart, the mouth speaketh," and our hearts are filled with gratitude to God and to you, our beloved Leader, for all the blessings which Christian Science has brought into our lives.

Through the study of "Science and Health with Key to the Scriptures," the word of God has become to us a treasure store of knowledge, by which we gain an understanding that leads us into the kingdom of heaven or harmony, where man finds his God-given dominion over all things, through the divine law of Love.

We thank you for your unselfish labors, which are a constant rebuke to the selfish sense that grows discouraged over seemingly unrewarded labor.

We have many demonstrations given in our services, of help and healing received from the reading of your books. We are especially grateful for the new Church Manual, and earnestly desire to be obedient to its by-laws, not only in the letter, but in the spirit also.

In behalf of the Christian Science Society of Maquoketa,
MRS. SARAH HUSBAND, *First Reader.*
MRS. R. W. CONWAY, *Clerk.*

Toronto, April 11, 1904.

Rev. Mary B. G. Eddy, Pleasant View, Concord, N. H.

Beloved Leader and Teacher:—There is a little incident in connection with a class which I taught recently that I think might be interesting for you to hear about. Usually when teaching I have enjoyed any of the lessons better than the first one, owing to an apparent shyness on the part of the students at the opening lesson, which disappears in the subsequent ones.

Upon opening this class I seemed impelled to define your position in the beginning, instead of leaving it, as formerly, until about the fifth lesson; when tracing out the footsteps of Truth it seemed to come in as a natural sequence, and the thought was apparently ready to receive it. I rather feared doing so at such an early stage of the instruction, but the prompting was so strong that I felt I must obey; and the result was I never had such a lesson in all the years of my teaching. At the close of the class I had a beautiful present accompanied with an address, in which they stated that it was surely a season of sitting "together in heavenly places in Christ Jesus." I feel that this was largely due to promptly breaking the mesmerism of jealousy over the "Prophet of God" to this age.

We have been patiently waiting for instruction about the convening of the Canadian branch of the Teachers' Asso-

Digitized by Google

ciation, but seeing from the *Sentinel* that the English branch has met, it occurred to me that perhaps we ought to write and see if there is anything we should do in that connection.

Awaiting your instructions about the Teachers' Association, Mr. Stewart joins with me in loving regard,

ISABELLA M. STEWART.

Dear Mrs. Eddy:—I feel I must write and express my grateful acknowledgment of the blessings I have received through the study of "Science and Health with Key to the Scriptures," and "Miscellaneous Writings." My dear Leader, you have opened the very portals of heaven to mankind. Words can never express the love and gratitude I have for you. Each day I try to follow in loving obedience the way mapped out in Science and Health, and to be a loyal soldier of Christ, Truth. My desire is always to have the door of consciousness open to Truth and Love, and that I may listen, and catch the echo of God's voice to you.

I do feel that we who are still in the wilderness of "belief" should continually "Praise the Lord for his goodness, and for his wonderful works to the children of men;" and also, that praise must be expressed in loving gratitude and joy, for having such a dear Leader. If we fail to do this, it seems to me the very "stones would cry out."

The new heaven and earth which St. John beheld, is now appearing in consciousness, as the result of your unselfishness and faithfulness in giving to the world God's message given you. The whole creation will owe its redemption "from the bondage of corruption into the glorious liberty of the children of God" to your laborious, unselfish toil, and loving sacrifice. Again let me express my overflowing heart of love and gratitude, and may I ever be found worthy to be called a loving, faithful disciple of Mary Baker G. Eddy.

Gratefully and lovingly,

ADELAIDE B. ROSE.

Hornellsville, N. Y., April 12, 1904.

Boston, Mass., April 11, 1904.

Precious Leader:—I must write and tell you that my heart overflows with gratitude for the great love felt while visiting Concord last summer. I was staying on one of the hills not far from Concord, and when Saturday came I thought I would run down to Concord and attend church. While there I saw you twice, Sunday and Monday. It seemed as if all the summer was lived in those two days. Such a sense of love came to me, such freedom; doubt all swept away. I knew that I was God's child. I saw God's interpreter to man as never before.

As I journeyed back to the hills I sang with David, "The Lord will give strength to his people; the Lord will bless his people with peace." "Be glad in the Lord and rejoice." And more than that did I sing. That is a small part of my song, as the hills seemed to dance for very gladness.

I cannot tell you how much I thank you for all the good that has come from thee to me; and as there are other ways than words, God grant that I may improve them.

MARY ELEANOR RAYMOND.

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

Testimonies of Healing.

Hoping that thereby some one may find encouragement to seek help through Christian Science, I gladly give this testimony. I had heard of Science some years before accepting it, in fact, many of my dear friends were believers and followers, and had been healed thereby.

About a year and a half ago I was compelled to give Christian Science a test, not wholly for my own relief, but to prove its virtue before consenting to have one whom I held most dear, place herself under treatment. I called upon a practitioner, and after a short talk on the fundamentals of the religion and the foundation of its claim that the healing power of God is at hand now, as in ancient days, I decided to give it a trial, conditionally.

At that time I was suffering from almost every ill to which mortals are subject. For fifteen years I had been troubled with constipation, so badly that it was necessary every night, and sometimes oftener, to take medicine of some kind. I therefore told the practitioner that he could try one of my minor ailments (referring to the above), but that I should continue my medical treatment for my other troubles. He said this was an unusual proposition, and one most practitioners would be loth to undertake, but inasmuch as my views of God were so much in line with those held in the Christian Science church he would take my case. Had I been honest, I would have been healed during the first week's treatment, as I know the effect of the work done was manifest the first day, but I would not accept it, therefore the *one* talent given me was taken away. I was faithful, however, in not resorting to any material help for *that* trouble, but at the end of the week I was brought face to face with this question, "Have you been honest, have you given them a fair trial?" The answer was "No;" "Then what have you if you go back to your old way?" "Nothing." "Now what will you do?" The decision was to be honest with these people and trust God to the best of my understanding. With that decision all medicine, and some that I thought very precious, was thrown away, and I went to my practitioner and told him I was ready to trust all to God.

During the treatment that followed I was healed of my bowel trouble, and have had no need of medicine since. I then commenced to read Science and Health, and at first it appeared to me a jumble of repetitions and contradictions. Finally I came to these words: "Christian Science must be accepted, at this period, by induction. We admit the whole, because a part is proven" (Science and Health, p. 461). This was my guide and stay, so when I came to a part I could not understand I would pass over it, and go on, or retrace and come back to it again. In this way the objectionable and apparently unsurmountable barriers were overcome, and the road made more smooth.

During the first week I used my glasses, which I had worn about fifteen years, and in taking them off to clean them, the thought came to me, If what this book contains is the truth, I don't need these glasses. In God must be the only sight and He will give me sight and light. I laid them down and started to read. Error tried to tell me I could not, but I held to the point that my sight was in God, and that I *could* read, and suddenly everything cleared up just as though it had been a very cloudy day, and the sun had suddenly come out. I then found sight and light; and that most perfect. In the course of an hour or so, error tried to tell me it was all imagination, and surely enough for a few moments everything was confused again, but I had the light once, I knew it was there, and that I could not be again blinded. For the first few days I had a number of such experiences, each one with less fear as to the result. I have never had my glasses on since that night, and to-day I have better sight than I ever had. My trouble was astigmatism, for which, every year or so, I had to have new glasses.

Digitized by Google

The most serious ailment I had was calculus formation in the kidneys, from which I had suffered more or less since boyhood. This condition became so bad that I had attacks of cerebral congestion "caused by poisonous accumulations in the blood through the improper acting of the kidneys." Finally an operation was performed. This was unsuccessful and I soon drifted back into the same old thought and condition, where Science found me. I am now enjoying perfect health and although I have some struggles these are dispelled by the understanding of the power of infinite Mind. I have been helped in so many ways that I feel I can never say enough for Christian Science, nor fully express my gratitude for the good I have received through the *Sentinel*, the *Journal*, my teacher, my practitioner, friends, and above all, Science and Health. Through its study the Bible has become a book I love to read, and from which I now can gain understanding: "whereas I was blind, now I see." It is the greatest blessing of all to be able to see spiritually; it has indeed placed all things in a new light. My constant and unceasing prayer is for greater light and understanding.

W. HARRY ESSER, Little Falls, N. Y.

I have been a constant reader of the *Sentinel* since I began investigating Christian Science and taking treatment for physical ailments, and have received great encouragement and help by reading the testimonies of physical and spiritual healing. In every issue I look for some testimony from this section of the country. Who can tell what blessings are in store for us in testifying for Truth?

It is over twenty-one months since I came to Christian Science for physical healing, and when I look back over that time, and realize how much I have been benefited and how greatly my life has been changed, I scarcely know what to write that will do justice for the blessings received.

Those of my friends who know me and read this testimony can corroborate what I write.

Before taking treatment I was a physical wreck, suffering from rheumatism, pulmonary trouble, and hemorrhoids, contracted prior to 1861. Those complaints were aggravated during my service in the Civil War to such an extent that I had been an almost constant sufferer. I had become so miserable from stomach trouble which manifested itself with the older ailments that I was convinced there was very little help for me in *materia medica*.

At this time a dear friend whom I had been telling about my condition, told me that I did not need to suffer thus. In this declaration I saw a gleam of hope, and being told there was a Christian Science practitioner visiting there at the time, I consented, rather reluctantly, to have a talk with her on this all-important subject. That afternoon I took the first treatment for stomach trouble, bought a copy of Science and Health, and commenced to read it carefully and prayerfully, along with my Bible. Twice a day I read portions of both, asking my heavenly Father for light and understanding. In a few weeks the stomach trouble was gone; one after another of the old troubles have been overcome by Truth, and to-day I enjoy better health than I have for years.

I experienced an equal blessing in my spiritual life. I had been a member of several different denominations, where circumstances placed me in the last thirty-five years or more. I tried to live up to their creeds and doctrines, but as I look back over those years, I see too much formality and personality in them. I thank God that to-day I love the Bible and "Science and Health with Key to the Scriptures" above all other books.

My heart goes out in gratitude and love to my heavenly Father for His great love to me, and to Mrs. Eddy for her untiring labors and undiminished love for humanity, and to all Christian Scientists who have offered me a helping hand.—GEO. W. BLANK, Pottsville, Pa.

[Translation.]

I give this testimony with a grateful heart to God for what Christian Science has done for me and my family. In the summer of 1903, after the birth of my child, I suffered terribly with cramps of the stomach. All medical aid failed to bring me relief, and finally nothing could alleviate the great pain. At first the attacks appeared once in about two weeks, and then every three or four days and lasted longer, sometimes twenty-four hours. I finally had but one wish, to find freedom through death, for I felt how my strength was diminished. I was only a burden to my family, and our otherwise happy home was filled with an atmosphere of melancholy.

One night, while I was suffering the greatest agony, my husband heard of a lady who healed without administering any medicine. I had no faith in such miracles but wished to see her. She was called that same evening and arrived after ten o'clock while I was suffering terribly. I remember so well the look of her dear face as she comforted me.

During the treatment a peaceful rest came to me (I had hardly been able to lie still, I was so nervous). She advised me to have something to eat that same evening, and assured me that food could not hurt me and I would sleep quietly. I obeyed, thinking that I could suffer no more than I had suffered while fasting. About ten minutes after the practitioner had left the house, I fell into a peaceful, quiet sleep. Not less astonished I awoke the next morning feeling that all pain had left me. The practitioner came again at nine o'clock, and after the treatment asked me to rise and take a little walk in God's beautiful sunshine. I did so, although it seemed at first as if I could hardly stand up, but gradually strength came. At first I could not believe it possible to be entirely healed, yet after three months all disease had disappeared into its nothingness. Since then I have felt well and happy. I eat what I like, and suffer no discomfort therefrom.

We have had other beautiful proofs of the healing power of Christian Science. An abscess opened after one treatment. My husband was healed of severe rheumatism through absent treatment, and my ten-months-old child, who had in an unguarded moment swallowed some hair from a bit of fur which caused terrible vomiting for four days, was also freed through Christian Science.

We cannot thank God enough for all He has done for us, and we also wish to express our gratitude to our dear practitioner who with perseverance and patience has showed us this beautiful path of peace.

MADAME W. W., Clarens, Switzerland.

When I think of testifying to what Christian Science has done for me, I know not where to begin nor what to say; it is beyond human expression. First of all, it has given me a new heaven and a new earth; second, it has enabled me to find the God who is an ever-present help. Without Christian Science I should have been in the very depths of despair through grief, separation, and loss, where human help and hope could never have reached me. I can say I have been through the fire untouched. I can only show my gratitude to our Father-Mother God, and to the Discoverer and Founder of Christian Science by consecrating my energies to this Cause.

I wish to speak of a recent demonstration. My little boy in playing with the cat fell on her in such a way that, through fear or pain, she bit him just above the joint of the thumb. He came screaming to me, and I held strongly to the truth. The crying soon ceased and I heard no more about it. This happened about seven o'clock in the evening, and during the night he cried out once in such a way that I knew there was more work needed, a stronger realization of the Truth of being. There was no further disturbance until the afternoon of the next day, when he complained again of the thumb, and screamed with pain when his arm

Digitized by Google

was touched. I then noticed that his entire hand was much swollen, and he said it hurt him almost to the shoulder, and expressed great fear of the pain extending up and into the other arm. He thought it was blood poison, and that it would be the end of him; he said lots of people were taken to the hospital for blood poison. It was clear to me that his fear must be met. I had to destroy some fear in my own thought, as error put forth such a seemingly strong argument. That I was able to turn from the fear and know that Truth is the only reality, was worth all I have sacrificed to gain it. By the steadfast knowing of Truth and by obedience to the one law, he was very happy the next morning to show me he could move his fingers. He had perfect use of his hand, the pain was entirely gone, and before the close of the second day the demonstration was complete.

While I have great reason to be thankful for many victories over error in various ways, I feel a special sense of gratitude for this recent demonstration.

I am indeed thankful to have found a religion that can fill my life so completely, and also to know that we do not have to die to find heaven. We can taste of the joys of Soul here and now.—MAMIE M. HAYDEN, Salem, Ore.

I was led to investigate Christian Science by a dear friend whom I had learned to trust when I was a child. When she found me I was hopelessly miserable. I had from childhood been afflicted with bilious attacks and nervous sick headaches, and as I grew, other diseases were added. When my friend sent me some tracts, I was suffering from nervous prostration, internal troubles, dyspepsia, and insomnia. I was so extremely nervous that the rustling of the pages of a newspaper would cause me intense suffering. For many years I had not eaten food that had a particle of white flour in it, and rarely drank anything but hot water. I could never ride or travel on the cars without suffering from car-sickness. I was also in constant dread of cyclones or tornadoes, keeping awake night after night in order that I might rouse the family and neighbors in time to escape to the cellar; but, thanks to Christian Science, all this has been changed.

By reading and studying a tract, which my friend had sent me, in the hope of discovering in its pages the wonderful healing power which she had told me was to be found in reading Christian Science literature, I learned that God is omnipresent Life and Love, and this was such a delight to me, that I found myself constantly dwelling on the words, "In the secret place of the most High:" and in less than two weeks I was the picture of health and happiness.

I lost no time in securing a copy of Science and Health, and many times when I have seemed to fall back, my daughter would bring the "little book," and sitting beside me would read over and over the words which I had marked, "Be firm in your understanding that the divine Mind governs, and man should reflect His government," and "Man is never sick; for Mind is not sick, and matter cannot be" (Science and Health, p. 393). In a few moments I would be up, entirely free, and giving praise to omnipresent Love for the victory.

I wish I could find words to express my thanks to all the kind friends who have helped me; and especially to my dear teacher. I truly hope that I may show my gratitude to God for our beloved Leader by continually trying to "improve the moments," and thus gain more of the understanding of omnipresent Life and Truth and Love.

J. M. M., St. Paul, Minn.

[Translation.]

After having delayed for so long, I at last resolved to relate my experience that others may know of the blessing which Christian Science has brought to me. Thirty years ago I was taken ill and was under treatment of six physicians. The last doctor called my disease consumption of the spinal marrow.

I was in bed for fourteen months, after that I was up and around but remained an invalid for twenty-two years and was never without medicine. I was told of Christian Science but did not then accept it, because no one could tell me what it was. Later on, a relative advised me to accept it, and said that the healing was effected through prayer. I told him that I could pray myself. The physician came again and declared that he could do no more for me. This was my last visit from any physician. My time had come and I did find the help.

A lady visited me and advised me to accept Christian Science, saying that she herself had been healed through it. She gave me some light on this subject and said that it was all contained in the Bible. I was then ready and said that this was just what I had been seeking. I begged to have a practitioner sent to me very soon. She came and spoke kindly to me and I then received treatment. After the third treatment I rose from my bed, but finding that I could not stand on my feet I sat down on the bed. The family went to dinner and I was alone. Suddenly the thought came to me that I would like something to eat. I forgot that I had been unable to stand up, but walked to the door and asked for something to eat; until then I had partaken of very light food. Thus my healing went on and I have never again used any medicine. My healing caused great surprise. When some one asked what healed me, I answered that God was my physician.

I wish to say that I love Christian Science. God has sent me the light, for which I am very grateful. He has sent us Mrs. Eddy, who has put this light back on its candlestick. I also wish to express gratitude for *Der Christian Science Herold*, which is a great help to me.

MARIA ARENDT, Plymouth, Wis.

I should like to tell of a little demonstration that may help some other mother in kindred need. My boy, aged fifteen, attended a school where an infectious child's disease had made its appearance, and one morning he showed all the symptoms of the sickness. I helped him to meet it with the truth of Christian Science, but my chief fear was for the younger children, and for a little time it was very great. Then I took up Science and Health, and studied it till I gained some sense of these words, "Mortals can never understand God's creation while believing that man is a creator" (p. 69). When I saw how the mother fear goes out to the children and brings them into the bonds of sickness, Truth at once released them, and gave them the "liberty of the children of God." I found that I could hold all the household, three of whom did not belong to the family, in the same sweet sense that God is the only creator, and in a few days the sickness had completely disappeared from our home; no one having succumbed to the fear of infection.

It was a great lesson to me, and I commenced dimly to understand how our fears bind our beloved ones, and that Christ, Truth, is continually saying, "Loose him, and let him go." Many times since, when my children have been away from me,—at school, or holiday making,—I have turned my anxious thought for their safety into glad recognition that God is the only creator, and all His children are safe in His care.

During the last five years we have had many demonstrations in our home of the wonderful power of Christ, Truth, over all forms of error, and my heart goes out in loving gratitude to our beloved Leader, Mrs. Eddy, for her unselfed love to all mankind.—H. M. V., Sydney, N. S. W.

Digitized by Google

Six years ago a bunch appeared upon my flesh, at first very small, but it became larger till it was nearly as large as an English walnut. One day I found it much swollen, inflamed, and very sore. I wrote to a friend who is a practitioner of Christian Science for advice and help, as my husband and daughter wished me to apply something to draw it to a head, thinking it a boil. The practitioner replied that she had seen such things beautifully demonstrated over by Christian Science, and she would advise letting Mind take the entire care of it, which I did.

Two days later the practitioner called and said there was no occasion for a poultice, even in the old thought, as the bunch was all ready to burst, and another day would probably end it. The next evening a strange sensation passed over my whole body. After retiring I felt a slight moisture in this place, and called my daughter to investigate. She exclaimed, with great surprise, "There is a great hole now; whatever was there is gone."

Much surprised, I arose and felt something drop, which proved to be a tumor, hard and clean. After this the flesh healed at once.

I am very grateful for this proof that the statement of Science and Health is true; namely, "Christian Science is always the most skilful surgeon" (p. 402). I am also grateful to my faithful practitioner who aided me in proving it.

G. H., Somerville, Mass.

I desire to express my gratitude for the healing which came to me in Christian Science. A year ago last August, I was to mortal sense, at the point of death, having undergone an operation for gall stones and appendicitis eight months before, which left me in a dreadful condition. The prostration was so great, I wished to die. I had the best of doctors, who did all they could for me, but they could not help me. My side healed up, but I could not eat or sleep. I cannot describe my suffering.

A friend told me of Christian Science,—that it could help me. I thought I would try it, but had no faith in it; for I did not see why God could heal me in that faith, as I had prayed so earnestly out of Science for my recovery.

I see now that I was looking to a far-away God. What beautiful words those are in Science and Health, where it begins, "Take heart, dear sufferer" (p. 573). I shall never forget all they meant to me, when I was so sad. I have often thought that Mrs. Eddy knew how much we needed those comforting words. I have a deep sense of gratitude and love to her who has shown us the light, and to the dear practitioner and the friends who have helped me in Science. My desire is to live nearer to God. I have been able in many ways to help others, for which I am thankful.

SUSAN STARTUP, Rockford, Ill.

Having been in Christian Science about two years and a half, I thought it time to express myself in regard to the manifold blessings received both spiritually and physically. Without Christian Science I would without doubt have passed away, from the fact that I had very bad heart trouble. This is now gone.

I had nearly all my life tried to be a Christian, but I had a terrible appetite for intoxicating drinks which would cause me to stumble and fall in my Christian walk and work; but, thanks be unto God who giveth us the victory, the overcoming of this is one of the numerous blessings received through Christian Science, and I hope that some one who is battling and struggling against this awful curse may read this testimony and turn to Christian Science and be saved.

God has blessed me in many ways since I have been in Science, and I can exclaim with David, "Surely goodness and mercy shall follow me all the days of my life."

I thank God for the raising up of Mrs. Eddy to make known this glorious truth, and I am grateful to my teacher and all the kind friends who have helped me in any way toward the attainment of good.

JOHN T. WRIGHT, Glenelg, Md.

Not for physical healing did I at first become interested in Christian Science, though I have experienced many beautiful and instantaneous demonstrations of the power of Truth over error in this respect, but from the first moment that I read the words of the "little book," Science and Health, I knew it was the truth for which I had all my life been longing. Three years ago last March I first heard the words that set me free from false belief in material gods, and at the present time I desire to express my deep gratitude and appreciation for Christian Science,—the truth that is setting at liberty "all nations, and kindreds, and peoples, and tongues."

Words fail to express my appreciation for the Christian Science literature, and the many testimonies of healing in the *Sentinel* and *Journal* are a wonderful help to me, but more especially do I prize the words that now and then appear in them from our beloved Leader. Her letter to the teachers in the *Sentinel* of October 31 was especially impressive to me. Such words of love, wise counsel, and timely admonition are an unalloyed blessing. I desire to assimilate her teaching and grow thereby, and so be able to demonstrate for myself and others the glorious truth as taught by this faithful friend,—"so kind and true and tender." God bless dear Mrs. Eddy, is the sentiment that comes welling up from a deep sense of love and gratitude.

A. E. F., Chicago, Ill.

I feel I cannot longer refrain from expressing my gratitude to God for the great blessing Christian Science has brought into my life by the change it has wrought in my health, and also my disposition. I am also most grateful for the *Sentinel* and *Journal*, with the helpful words they contain, and the comfort and strength I receive from the lessons in the *Quarterly* are inestimable.

May God bless our dear Leader, Mrs. Eddy, and all who are laboring for the cause of Christian Science.

A. M. W., Brookline, Mass.

For twenty-six years I had suffered with bladder trouble, so bad at times that I could neither straighten up nor walk. I have been sick in bed for weeks at a time and would scream with pain. I was doctored for months at a time, but suffered untold agonies. I had given up sewing for years, and could not do my housework. I was treated one week in Christian Science and am completely healed.

MRS. ANNA BYERLY, Meadville, Pa.

I Prayed, Thy Kingdom Come.

I prayed, Thy kingdom come! For winter long
Had held the frozen earth in fetters bound;
And wretchedness and misery, war and wrong,
Age after age, did in the world abound.
I prayed, Thy kingdom come! And lo! the spring
Came with its warmth and joy to glad the earth.
New Hope the sight did to my spirit bring,
That Man at length should share the quickening birth.
For He who worketh thus great Nature's change
Works in the heart His miracles of power,
Than those we see more marvelous and strange!
Have faith in God, and wait His promised hour.
For He who doth the quickening springtime send
Will sin destroy, bring suffering to an end.

JONES VERY.

From our Exchanges.

There are many lessons to be received from this Gethsemane of our Lord, and one among the many is this: If we mark well the history of moral greatness in all ages we shall see that it is made to stand in the midst of any and every Gethsemane of trial; and that the triumph on Olivet only foreshadows a universal victory of a kindred righteousness. It is a Gethsemane in which each one of us stands when inclination diverges from duty; when a lower love crosses the track of a higher; when a passion impinges to disturb the direct and free movement of a principle along its appointed path; when the Siren of temptation sings at one ear and the voice of God calls at the other. The pathway we shall make out of our Gethsemanes will be backward and downward or forward and upward, as the main drift of life is along the lower nature or the higher. The lesson of Gethsemane is this, again, that character is tested not only in our favorable moments, but also when it would seem that stress was laid upon us amid the most unfavorable environment.—*The Universalist Leader.*

I believe we are on the verge of a mighty revival of faith in a future life,—a faith which will make that life more real to men than it has been for many a day,—a faith so different from the old that it will come to men with the power of a new discovery. It will be based on evidence internal and evidence external that will satisfy at once the longing soul and the inquiring mind.

REV. WILLARD B. THORP.
Chicago Tribune.

To have made an honest effort is as great as to have succeeded. The result if fortunate is inspiring to us, but the exertion, the putting forth of our little powers, has made a permanent mark for good on our characters. He who glories, even in his own heart, over his triumphs, has yet another victory to win, and that is the conquest of his individuality. Most people hold personality in too high esteem.

The Congregationalist.

Much is said and written about apostolic or primitive Christianity nowadays, but our modern life goes right on, and whenever there is an appearance of apostolic fire and fervor, a deluge of cold intellectualism and denial of the power of God is poured on to extinguish, or at least subdue and make conventional, the religious life. A characteristic mark of the apostolic church was that it magnified the name of the Lord Jesus.—*Pacific Baptist.*

Religion which has become institutional, sabbatic, a something which hovers over a man, or is round about him, instead of being a moral and transforming power at work within him, is not the Christian religion. The very nature of Christianity is that it is a ministry to men. It was thus in its founder, and is thus in all its participants.

The Examiner.

How much power has God? Power to cause the dead to live? Yes, yes. He has all power. Paul wrote to the Ephesians that his prayer for them was that they might know, "what the exceeding greatness of His power to usward who believe according to that working of the strength of His might which He wrought in Christ, when He raised him from the dead."—*Pacific Baptist.*

Every day is a judgment day. Every time the sun goes down the life of every person who has reached the age of accountability is judged. By multitudes this fact is not so impressed upon their minds as it should be to make it operative for good.—*The Universalist Leader.*

THE CHRISTIAN SCIENCE TEXT-BOOK.—Science and Health with Key to the Scriptures with latest revisions and additions, and numbered lines. 700 pages.

For description, price, and other information, see last page of cover.

THE NEW CONCORDANCE.—A complete Concordance to Science and Health with Key to the Scriptures. This work has been compiled from the late revised edition of SCIENCE AND HEALTH, and contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10x7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

CHURCH MANUAL.—Containing the By-Laws of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. This does not include the list of members. Price, prepaid, $1 per copy; $5 per half dozen; $9 per dozen.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement.

It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, and is valuable as an authorized representative of the movement, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

Twelve or more copies to one address, each 4 50

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.
Price (cloth), each, prepaid 2 25
Twelve or more books to one address, each, prepaid 2 00

Morocco, limp, round corners, gilt edges, convenient for pocket, each, prepaid 4 00
Twelve or more to one address, each, prepaid 3 75

Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, each, prepaid 5 00
Twelve or more to one address, each, prepaid . . . 4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* PANTHEISM. The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

250 Huntington Avenue, Boston, Mass., U.S.A.

ARCHIBALD McLELLAN, Editor-in-chief. JOHN B. WILLIS, Second Editor.

ANNIE M. KNOTT, Assistant Editor.

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

George C. Martin of the geological department of Johns Hopkins University has been selected by the National Government to lead an expedition into Alaska for the purpose of making a minute investigation of its coal and oil fields. It is said the Government has information of great importance, not only to the Navy, but to the people of the United States. The expedition will also make explorations of comparatively unknown portions of the great peninsula and compile maps and secure geological specimens.

Dr. Martin will select the ablest geologists and coal and oil experts he can induce to join him. The expedition will start the middle of May, going direct to Seattle and thence by mail steamer to Kadiak, the old Russian capital.

The Honorable William H. Hunt, Governor of Porto Rico, whose recent appointment to succeed Judge Knowles as United States District Judge in Montana has been confirmed by the Senate, has been in Washington in conference on matters in Porto Rico and will soon return to the Island to settle affairs there, after which he will assume his seat on the Montana Bench.

The special session of the Hawaiian Legislature, which was convened for the purpose of providing funds for the territorial expenses, has adjourned after accepting without material change all the recommendations of the Governor.

The Isabella Stuart Gardner Museum in the Fenway, Boston, has acquired the Degas' portrait known as "The Woman in Black," painted in 1867. It has been called by John S. Sargent one of the masterpieces of the nineteenth century.

It is said that Mr. Carnegie's contribution of five million dollars for a heroes' fund brings his contributions to various benefactions to a total of over one hundred million dollars.

The resolution of the Panama Canal Company shareholders ratifying the sale of the canal to the United States for the sum of forty million dollars was adopted at Paris on the 23d. There were only five votes against it.

The Boston Latin School last week celebrated its two hundred and sixty-eighth anniversary.

The payroll of the United States Navy amounts to twenty million dollars a year.

Foreign.

The portrait of the Dowager Empress, painted by an American artist, and which is to be exhibited at the St. Louis Exposition, was shipped from Pekin last week with impressive regal ceremony. It is contrary to Chinese traditions to have the likenesses of their semi-sacred rulers made, and the innovation caused a sensation in the Chinese Court. The painting of the portrait was suggested, and the consent of the Empress was obtained by Mrs. Conger, wife of the United States Minister to China.

The loss by the fire which destroyed the wholesale district of Toronto last week will, according to conservative estimates, reach twelve million dollars. The area burned embraces fourteen acres. The total number of buildings destroyed is 122; firms affected 222, and fully 10,000 people are thrown out of employment.

What is termed the finest collection of arms and armor in the world, belonging to the Duke de Dino, has been bought by the Metropolitan Museum of London for four hundred thousand dollars. The collection includes the best purchasable arms and armor the Duke could find during the last thirty years.

The world's fourth Sunday School Convention opened last week in a huge tent outside Herod's Gate, at Jerusalem. The attendance included eight hundred Americans. Numerous Turkish officials and Greek, Armenian, Roman, Jewish, and other priests are honored guests of the delegates.

Surveys, which have just been completed, for a ship canal across Russia to connect the Baltic and Black Seas, show that the distance will be 1,468 miles and the cost $180,000,000.

Industrial and Commercial.

Exports of manufactures from the United States seem likely to make their highest record in the fiscal year which ends with the month of June, 1904. In the eight months ending with February, for which the Department of Commerce and Labor, through its Bureau of Statistics, announces the figures of exports of manufactures, the total is $20,000,000 larger than in the corresponding eight months of the fiscal year 1900, which was the record year in exports of manufactures. For the eight months ending with February, 1904, the total exportation of manufactures was $288,400,924, against $268,537,972 in the corresponding months of 1900.

The Seaboard Air Line Railway has awarded to the South Baltimore Car Works a contract for 500 box cars of 60,000 pounds capacity each. The cars are to be ventilated and adapted to general freight business. The approximate value of the contract is $500,000. The purchase of these cars will give the Seaboard a total of about 4,500 box cars, in addition to its other large freight equipment.

It is reported that the Standard Oil Company has planned to lay a pipe line from Texas to New York with branch lines radiating to the entire oil fields. Refineries will be erected at convenient intervals. The cost of pumping oil is said to be about one-tenth of that of shipping it by rail.

General.

Signor Giacomo Boni, a famous archæologist, who is directing the excavations of the Roman Forum, has made what is considered the greatest discovery of many years.

He came upon a place where there was an altar dedicated to Marcus Curtius, a patriotic Roman youth, who in 362 B.C., to placate the gods, jumped, completely armed, on horseback, into a chasm which had opened in the Forum and which the soothsayers declared could not be filled except by the sacrifice of the chief wealth or strength of the Roman people. After Curtius' sacrifice, tradition says, the chasm immediately closed up.

The opening into the chasm found by Signor Boni is formed by twelve large stones, roughly sculptured. The archæologist also found a hole which contained sacrifices made in later years to young Curtius.

The great importance of the discovery lies in the fact that it confirms an event which many historians looked upon as mythical.

The water lily of the Amazon, says an exchange, has very elusive habits. The buds open twice—the first time just a chink at the tip, in the early sunrise hours. On the following evening it spreads its four sepals so rapidly that one can see them move. But the big white bud among them remains unchanged until four o'clock in the morning, when it hurriedly spreads its blossoms wide open, remaining in this condition only half an hour. Within the hour it has nearly closed, and by another hour and a half the entire flower has been drawn under water by the coiling of the stalk.

John C. Merriam, professor of paleontology at the University of California has discovered in the fossil beds of Shasta County, California, so rich in the remains of extinct prehistoric animals, what appears to have been a family entirely unknown to paleontologists and has named it the Thalattosaurus. It is a huge sea lizard and is estimated to have been seven feet long. Originally it was a shore form, but became after a long period a marine animal. Professor Merriam says the remains represent not only a new species, a new family, and a new genus, but a new order.

A teacher in the missionary school at Tabriz, Persia, writing to friends in Oklahoma and telling of a shipment of books, etc., received from home, said, "Last night I picked up an American history and found forty pages about the Revolution torn out. They will not allow anything like that to pass through. The Sultan will not allow such Sunday School lessons as Absalom's rebellion to be studied. Instead of publishing such lessons they put in a lesson from a Psalm.

The life of a deep-sea cable is from thirty to forty years. The main portion lies in a bed of ooze two miles or more beneath the surface of the water, and is practically imperishable. In shallow water cables are attacked by sharks, swordfish, sawfish, rocks, and anchors. In the Firth of Forth thirteen ships' anchors were once found entangled in a length of four miles of cables.

The world's best timekeeper is said to be the electric clock in the basement of the Berlin Observatory, which was installed by Professor Foerster in 1865. It is enclosed in an air-tight glass cylinder, and has frequently run for periods of two or three months with an average daily deviation of only fifteen one-thousandths of a second.

The first fellowship ever won by a Chinaman at Columbia University has been awarded to Ching Yung Yen for exceptionally brilliant work in the school of political science. He is only 23 years old and is a graduate of the Imperial Tientsin University. His fellowship was won in constitutional law.

It is the estimate of well-posted lumbermen that there are enough logs on the bottom of the Menominee River belonging to the different lumber companies to supply the largest sawmill on the stream for several years, if they could be recovered.

The criminal branch of the Court of Cassation has granted the appeal of Alfred Dreyfus for a revision of his trial at Rennes.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

Semi-annual Lecture of the Mother Church.

We give below a condensed report of the lecture by Bicknell Young, C.S.B., member of the Christian Science Board of Lectureship, in Symphony Hall, Boston, April 14. The immense audience, which completely filled the large hall, gave the closest attention to the speaker, who was introduced by Mr. Alfred Farlow in the following words:—

Friends:—We are here for a candid consideration of one of the most serious subjects of our age; one which involves not only the health, happiness, and general welfare of the present, but the hope of the future.

The rapid progress in all lines, the frequent discoveries and inventions, affording constant surprises in novelties, have cultivated in the public mind a condition of expectancy and toleration which is quite prepared to give a hearing to all new subjects. And, since we have before us a representative audience assembled from the advanced thinkers of New England, I can trustingly bespeak for our guest your most sincere and earnest attention.

He is one of the many distinguished professional men who have left all to spread the gospel of Christian Science. He is a member of the Christian Science Board of Lectureship and is, therefore, an official lecturer of the church which he represents.

It is with great pleasure that I now introduce to you the speaker of the evening, Mr. Bicknell Young of Chicago.

Mr. Young said in part:—

Christian Science may be briefly defined as the Science of all that relates to God. It is to be attained through spiritual growth and understanding. It implies sincerity of purpose as well as the best intellectual effort on the part of those who would apprehend it, but upon a higher plane of thought and upon a more enduring basis than would be demanded by any other subject. We do not undertake to give at this time a demonstrable knowledge of this vast Science, for that you must seek the pages of its text-book, "Science and Health with Key to the Scriptures" written by the Discoverer and Founder of Christian Science, Rev. Mary Baker G. Eddy. If I may but succeed in correcting some false views, or in removing some prejudice; if hope be uplifted, and expectation brightened; if some heavy heart be made lighter or some sorrow or sickness less painful; if here and there some one, touched by the spirit of the hour, should be led away from those thoughts which make for sin, disease, and death, to those which disclose holiness, health, and life, and thus acquire a better understanding of all that is meant by the word salvation as revealed in Christian Science, the loving desires of those who provided this lecture will have been realized.

Accepted theories have rejected the possibility of a scientific knowledge of God and His laws. Indeed, the association of the words Christian and Science has at first excited the derision of prevailing belief and then aroused its scorn and abuse. Yet to-day the universal truth as taught in Christian Science has stirred human thought to higher views and expression, even while the source of them is not acknowledged. The wonder is, in view of all Christian Science has accomplished, that there should be anybody left who is not interested.

The Discovery.

Mrs. Eddy discovered the Christ Science, or Christian Science, through a personal experience which could leave no doubt as to the divine nature of the understanding which came to her. Upon this point let me quote from her book, "Science and Health with Key to the Scriptures."

"When apparently near the confines of mortal existence, standing already within the shadow of the death-valley, I learned these truths in divine Science: that all real being is in God, the divine Mind, and that Life, Truth, and Love are all-powerful and ever-present; that the opposite of Truth, —called error, sin, sickness, disease, death,—is the false testimony of false material sense—of life in matter; that this false sense evolves, in belief, a subjective state of mortal mind which this same so-called mind names *matter,* thereby shutting out the true sense of Spirit" (p. 108).

She afterward tested her discovery thoroughly by healing all manner of cases, not only in instances of ordinary sickness, but also in those which were considered incurable and hopeless, and many of them in one treatment. In due time her discovery became known, and finally, after thoroughly proving its unquestionable scientific value, she published the book already mentioned, by means of which others have learned to do the same blessed work.

Nothing could be happier than the name Christian Science, which Mrs. Eddy gave to her discovery. It is at once exact, definite, and appropriate, and is justified by more than thirty-seven years of remarkably successful practice.

True Science and Prayer.

Is it not true that almost anything in relation to mere material hypotheses may take the name of science unchallenged? How is it, therefore, that those things which relate to God, Spirit, and His laws, which are based upon eternal facts and must therefore be unquestionably scientific, immeasurably more so than all other things, are relegated to the realm of belief? Any question as to the science of the Christian religion must be forever settled by any one who cares to look the matter squarely in the face. Jesus never failed in anything that he attempted. He healed all diseases, whether called curable or incurable, and without the use of drugs or any other material remedies. He fed the hungry, saved sinners, and raised the dead, all by the power of Spirit. He overcame the death of his own body, and finally rose to the full realization of his natural image as the son of God, the son of Spirit. In other words, he overcame all the laws of material existence in that which is most appropriately called the Ascension. These works have been called miraculous, but there is no evidence to show that they were miraculous to him. On the contrary, they illustrated the unchanging nature of God's law, the law of good, and proved its absolute power over all evil. His method reflected the infallibility of God. Could anything be more scientific than that? That it was Christian, no one will dispute; that it was unfailing and therefore scientific in the highest sense, the facts prove. It was both Christian and scientific,

Copyright, 1904, by Mary Baker G. Eddy.

Digitized by Google

or Christian Science, and it must be still the same. If it healed the sick then, it can do so now, and the fact is, it does so in the thousands of instances in which it has been and is scientifically applied. He knew that he had a certain way of doing his works and that it could be learned. He said that those who believed in his name should do similar works, and the best interpretations indicate that to believe in his name meant to understand his teachings. He also declared, "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go to the Father." As explained in Christian Science the words, "I go to the Father," relate to his exalted thought, which Paul describes as "the mind which was in Christ Jesus;" and which was continually seeking God, and when we always go to the Father in this way, as he did, we shall realize the promise.

It is self-evident that nothing can be more scientific than "knowing." Jesus said, "Ye shall know the truth, and the truth shall make you free." Paul said, "Pray without ceasing." Can there be any doubt about the scientific nature of prayer? Christian Scientists believe in this ceaseless prayer. Humanity has prayed in some way always, and always more or less vainly, until it would sometimes seem as though prayer had become merely a formal habit, yielding some comfort, perhaps, but barren of practical results. Is it not clear that there must be something the matter with a prayer which is unanswered? Do people in general expect an answer to prayer? Suppose for a moment that all prayers were answered. Could human language depict the chaos that would ensue? Is it not certain that an all-wise and infinitely loving Father could never answer a prayer involving any sort of harm or discomfort to any of His children? Could a mere selfish petition ever be answered? It is related of Solomon that he prayed for knowledge or wisdom with which to do his work, and that God was so pleased with his prayer that He gave him not only knowledge but riches and honor above all men that had been before him. Jesus said, "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." His prayers resulted practically. He said, "I knew that thou hearest me always." Is it sacrilegious to say that his unfailing prayers were scientific? He ascribed all power to God. He said, "There is none good but one, that is God;" "If I do not the works of my Father, believe me not." To-day similar works are done in a similar manner, not because of personality either in his time or in ours, but because thought that is in accord with the divine nature is reflecting Love and is about the Father's business quite as much to-day as it was two thousand years ago. Christian Science teaches a logical, legitimate, and Christ-like prayer, and heals the sick by means of this prayer and by no other means whatsoever. Two of its essential features are, first, the recognition of the universality of good, and, second, the knowing "Thou hearest me always."

God and His Law.

Jesus said that he came to fulfil the law. What law? No doubt he meant the law of God, which to his hearers was embodied in the law of Moses. Christian Science does not proclaim a new God or a new law, but comes declaring the same God and the same law that Jesus declared, the one infinite, eternal God, and His good and unchangeable law. Christian Science amplifies, broadens and uplifts our thought concerning God by declaring that He is Mind, divine Principle, and these definitions are most appropriate, for Mind and divine Principle indicate the very nature and essence of Deity. Mind agrees with the universally accepted declaration that God is infinite intelligence, and brings the divine fact of the omnipresence of God more clearly to our consciousness. Divine Principle shows that God is unchangeable, perfect, and eternal in volition and action. Could any word more fully express the nature of Him "with whom is no variableness, neither shadow of turning"? What is the use of words if indeed it be not to produce clear thought in relation to a given subject? No words can change God. They only help or hinder humanity's attempt to understand Him. Personal is one of the words that has hindered. Christian Science does not deny the personality of God as some have supposed, but it must of necessity deny that Infinity can be humanly personal. To speak of God as personal in the same sense that we use the word humanly is nothing less than sacrilege. God must be infinite personality, and no other thought of His personality should be entertained. Again, to make a picture of anything and worship it as God, would at once be called idolatrous. Is it less so because the picture is mental? St. John says, "No man hath seen God at any time." Evidently St. John meant that God could not be discerned nor pictured by the physical sense.

The omnipotence, omniscience, and omnipresence of God have been declared for ages, but the full import of such teaching has not been analyzed, nor have its logical results been acknowledged. The Latin prefix, *omni*, means all. Placed before such words as potency or power, science or knowledge, and presence, when used to define Deity, it means all power, all science or knowledge, and all presence. As Science and Health well asks, "How can there be more than all?" Therefore, whoever affirms the omnipotence, omniscience, and omnipresence of God, denies all other power, knowledge, or presence; and since God is admitted to be good, such an one virtually denies any power, knowledge, or presence to evil. In fact, he denies the reality of evil, a thing for which Christian Scientists have not infrequently been condemned by those who say they believe in the omnipotence, omniscience, and omnipresence of God.

Christian Science declares in accordance with the Scriptures that God is Life, Truth, and Love. The law that Jesus came to fulfil was the law of this ever-present, all-knowing, all-powerful God, who is good, who is Life, Truth, and Love, and whose law must conform to His infinite goodness. Does this God, who is Life, Truth, and Love, send disease, sin, and death? Does God, who is infinite good, do evil? Does God, who is infinite Love, cause the afflictions and sorrows of His children? Just consider for a moment: If you were all-powerful, and could establish law and enforce it, and could do away with all evil, would you do it, or not? Would you not rejoice to see no more suffering among these little ones, no more terror or sorrow in mothers' hearts, no more grief-bowed heads, no more pain-racked bodies? And "Shall mortal man be more just than God?"

Evil Accounted for.

One of the most erroneous ways of accounting for evil, especially when manifested as sickness or death in the instances of good people or blameless children, is to ascribe it to the inscrutable wisdom of God. Inscrutable indeed would be the wisdom that is infinite Love and Life, and that could cease His infinity long enough to afflict His children with disease and death. Christian Science takes no part in any such lame and illogical attempt to account for evil. Indeed, the infinity of God, or good, would be thereby obliterated, for God would cease to be good to the extent that He cognized evil, cease to be infinite, therefore no God. Because sin, sickness, and death are not good, they could not originate in God, the Mind that is holiness, health, and Life, and they have, therefore, merely a fabulous existence far apart from truth, or science, or God. Sin, disease, and death with all the human beliefs and theories that accompany them, Christian Science classifies together and denominates the whole conglomeration of falsehoods as mortal mind. In Christian Science this fictitious mortal mind, as a general belief or universal false claim, is utterly divested of all supposed influence, power, or law to cause or perpetuate disease; and God's law of wholeness, harmony, and health to man is established.

CHRISTIAN SCIENTISTS BELIEVE IN CHRIST AND SALVATION.

It has sometimes been asked if Christian Scientists believe in Christ. Who is a believer, the one who preaches merely, or the one who practises? Who believes in a science such as the science of numbers, for example? Surely, it will be answered, he who trusts his affairs to it. Who believe in Christ? They who only say they do, and fail to do the works of Christ? or they who trust absolutely in the teachings of Jesus and strive to do the works that he commanded? I say without fear of successful contradiction, that of all people on earth, Christian Scientists believe most absolutely in Christ. They utterly repudiate the aspersion that they are un-Christian. They accept the teaching of Christ Jesus without reservation. Orthodox religion, on the other hand, rejects the healing power of the gospel and attempts to explain its failure to obey the command of Jesus to heal the sick, by saying that it was intended for his time only, although there is nothing in the Bible to justify such an assumption. Hear this: "And as ye go, preach, saying, The kingdom of heaven is at hand. Heal the sick, cleanse the lepers, raise the dead, cast out devils." If one of the commands of Jesus was intended for his time only, then all were, and the whole Christian religion falls to the ground. The fact is, the healing power continued to be exercised in the early Christian church for about three centuries, and was then lost through the introduction of ecclesiasticism. Jesus did not say that Christ would leave the earth when he left it. He declared the eternity of the Christ. "Before Abraham was, I am." "I will not leave you comfortless: I will come to you." His career reveals the power of God to govern man righteously here and now.

The steps of salvation in Christian Science are not unusual or peculiar. As in the teaching of other evangelical denominations, there must be, first, the admission of sin, or conviction; second, sorrow for wrong doing, or repentance; and, third, reformation,—a corrected life. Theoretical belief, however, limits salvation to the cessation of sin, and the hope of heaven after death. Christian Science declares that the love of sin must be destroyed. Because God is sinless, sin has no divine authority, no real existence; and it makes this utter denial of sin for the sole purpose of overcoming sin. It includes in salvation exemption from sickness, want, worry, and woe, as well as from sin. In short, salvation in Christian Science touches everything that prostrates hope or interferes with happiness. Again, in Christian Science salvation is not a death process. It is not a matter that can be postponed. The problems of life are not solved in that way. Jesus said, "If a man keep my saying, he shall never see death." Would he have said that if death were necessary to salvation? The world has been taught to believe that by dying it could save itself the trouble of living rightly. Christian Science teaches that salvation is a way of righteousness. The supposition that heaven is attained through disease and death is a theory at once mysterious and wretched, and so repugnant to every normally minded person that every one naturally desires to avoid such an experience, even with a theory of salvation attached to it and the efforts of all theories of healing as well as the prayers of theology are intended to prevent a person from dying. The path heavenward is truly straight and narrow. None know this better than do Christian Scientists, but this path is not strewn with ashes, neither does it ultimate in disaster. When we learn that the fulness of religion may be attained here and now through Truth and Love manifested in a daily life at peace with God and man, and that such a condition brings heaven to earth, we begin to cheer up. We see that we may speak of God and His laws without sadness or any sense of mystery. If God is our divine Parent, He is our best friend. Salvation is therefore a joyful experience, and heaven a natural condition that may become a present and welcome reality. Heaven cannot be less than satisfaction and perfect harmony, and it cannot be more. The Psalmist says, "I shall be satisfied, when I awake, with thy likeness."

FOUNDED ON THE BIBLE.

Christian Science is founded on the Bible. The text-book of Christian Science is what it purports to be, and includes, as its title indicates, a key to the Scriptures. Mrs. Eddy says, "For three years after my discovery I sought the solution of this problem of Mind-healing; searched the Scriptures, read little else; kept aloof from society, and devoted time and energies to discovering a positive rule. . . . In following these leadings of scientific revelation, the Bible was my only text-book" (Science and Health, pp. 109, 110).

The Bible has become a new book to us, and the most interesting book in the world, through the light which Christian Science throws upon it.

Science and Health is a commentary upon the Bible. Other denominations have commentaries, but no other book in the world has ever revealed the power of Truth to heal the sick, and enabled people to learn the Science of the Scriptures by which this healing is achieved. The numerous cases of healing accomplished by the perusal of this book are so authentic as to be beyond question. Thousands of people have testified to such healing, and some of them have done so under oath, in courts of law, and their testimony has not been in the least shaken by cross-examination. Some of these cases involved the most terrible diseases known to mankind. No material system has ever succeeded in healing a cancer, but Christian Science has healed hundreds of them, as well as other so-called incurable diseases, such as locomotor ataxia, tuberculosis, epilepsy, and others considered less dangerous but equally incurable, such as asthma, hay fever, St. Vitus's dance. Christian Scientists, as well as other people, know such instances. It is not pretended that there are no failures as yet in Christian Science practice. It would indeed be surprising if, with all the error that confronts it, our new-born understanding should reach the height of infallibility at once. Christian Science, however, is exact Science, and we expect that its unfailing power will be more and more proven as we grow in grace. In the mean time, it is, to say the least, unbecoming for advocates of material systems to demand no failures of us, while they view with complacency the immeasurably greater proportion of their own. The healing power in Christian Science is not attained through any new Bible, nor through any strange interpretation of the old one, but through the truth contained in that old Bible, our Bible, your Bible and my Bible; and Christian Scientists have none other. Jesus said, "Search the Scriptures." Christian Scientists are joyfully obeying this injunction, and through Christian Science they are realizing in a great measure the fulfilment of the promises contained therein.

PREVAILING SYSTEMS ARE MYSTERIOUS.

Mortals are in a state of superstition about God and man, about heaven and earth, about sickness and health, about life and death, and, indeed, well-nigh every other conceivable condition or thing. Furthermore, all prevailing theories, whether religious or scientific, have looked for cause in matter, for God in His opposite. Is not this the very acme of superstition? The self-evident impossibility of finding truth in error seems to have escaped human reason until Christian Science came to reveal it. The superstructure that has been reared upon such theories is well represented by the house in the parable which was built upon the sand, and when the winds and waves of adversity, sickness, or sorrow, beat upon it, it crumbled. Popular science is as unscientific in this respect as popular religion. After the most elaborate investigations, endless research, and almost superhuman perseverance, it invariably arrives at a point where it can only say, "This is unknowable." Is it not clear

Digitized by Google

that both theories end in self-confessed failure, the one in a mysterious belief in the amalgamation of good and evil, the other in the mystery of the unknowable? Any person who has followed either or both with the hope of having his reason satisfied, or his belief in eternal life confirmed, has found his condition best described in the words from Fitzgerald's translation of the Rubaiyat:—

> Myself when young did eagerly frequent,
> Doctor and saint and had great argument,
> But evermore
> Came out by that same door,
> Wherein I went.

Christian Science begins where such theories leave off. It declares that God, Life, Truth, must be knowable, and in reality is the only knowable, because Truth is all there is to know. It shows that if there is anything about religion that is true it must be based upon facts. If based upon facts, the facts may be known, since to speak of unknowable facts is to express a contradiction in terms. A knowledge of God must therefore be not only possible but imperative. How shall it be attained? If God is Mind or divine Principle, He is expressed actively and operatively in divine ideas. These must be sought and entertained until thought is transformed.

Man.

If the facts which have been declared in reference to God are admitted, then man, His image, must be something more than that which we ordinarily see. Christian Science denies that the evidence of the five material senses can be accepted as absolute in reference to man, his real being, his health, or his life. Generally speaking, man is thought to be both material and spiritual. It is declared that he is mortal; that is, that he must die, and yet that he is the image and likeness of God, or in other words, the image and likeness of immortal Life. When he is dead, it is supposed that he will begin to be immortal! Christian Science shows that such theories do not reveal the truth about man. It declares that man is not material, and that a mortal cannot be the image and likeness of God who is immortal. A mortal is only a presentation of the evidence of the senses. Man's real being and immortality is discerned in Science. Christian Science therefore looks away from matter in considering man and declares that the image or likeness of God is not to be found in physical personality but is indicated in mental and moral quality. Man must be spiritual and ever-living to be like Spirit, like Life. Man must be like good to be like God, like Truth, like Love; he must be the likeness of the divine Mind, the image of divine Principle. This true likeness discerned in Science is the true self that all men should seek, and they should not manifest any other self. Such a course means health and harmony to those who follow it.

The Evidence of the Senses.

Respecting the realm of thought which we characterize as religious or spiritual, it would not even exist if we were to accept the evidence of the senses. According to their testimony, matter is all, and Spirit, God, is a myth. But nobody, not even the most materially minded, would accept the evidence of the senses without reservation. Not a prayer is uttered that is not a virtual declaration against such evidence. Christians rise above it continually, and should do so still more. Christian Science shows how to accomplish this. It may indeed be difficult to conceive of a first great Cause, but it is vastly more difficult not to do so.

It is clear, therefore, that in denying the evidence of the senses we do nothing unusual. Christian Science, however, is unusual in making this denial applicable when anything exists or arises which is contrary to the harmony of man.

Christian Science shows how the body is controlled by mentality, consciously or unconsciously, all the time. The object of its practice is to establish the conscious control of divine Mind over the body. This demands the highest morality and spirituality on the part of the practitioner in order to be successful. It means constant and conscious communion with good, with God.

Comparison with other Systems.

Various systems of healing are extant. They are all more or less material except Christian Science, which represents more and achieves proportionately more than any other, because it is purely metaphysical, and rests upon a spiritual basis. It always uplifts the patient both morally and spiritually while healing him physically. In many cases, Christian Science practitioners discover that the moral and physical are so interwoven as to be inseparable in treatment. When a man's sickness is either partially or wholly caused or perpetuated by his sins, what is the use of giving him pills? No material remedies will touch or uplift his moral nature, and some of them seem to have a contrary effect. If sin has caused the disease, whatever leaves sin untouched cannot heal the disease. The world may well begin to learn that there is one and only one way of salvation. It must be scientific if it is to reach the cause of disease in sin and the cause of sin in mortal mind, obliterating it and its effects. Chrstian Scientists are in no wise arrayed against those who practise *materia medica*. We were all believers in it at one time. We are convinced through our experience in it and in Christian Science, that we have found in the latter a better way, and we believe it to be the very best way because it is God's way as shown in the work of Jesus. We have the greatest respect and admiration for the philanthropy and nobleness of many physicians. We count some of them among our best friends, but we cannot close our eyes to the faults of the system which they represent. If the tabulations which present the observations of *materia medica* together with the theories which are evolved therefrom, were of any absolute scientific value, should not the experimental stage be passed after four thousand years? Is it not a self-confessed condition of weakness and fear which impels our medical brethren to go before state legislatures demanding special legislation the tendency of which is almost invariably to shut out all other systems? The excuse generally given that the public needs to be protected against Christian Science is groundless and puerile.

Christian Science is quite as good for children as for adults. Thousands of children suffering with contagious and other terrible diseases have been restored to health and life through the intervention of Christian Science after they had been given up to die by medical practitioners. Thousands of children have been healed of chronic invalidism and of terrible deformities through the action of Christian Science when all other means have failed. Indeed, Christian Science has been proven the most efficacious healing agency known to man. What therefore can be thought of the proposition that Christian Scientists may be permitted to employ Christian Science for themselves, but shall be compelled by law to use a less efficacious system for their children whom they love more than themselves? Is it strange that the parents in these families should have more faith in Christian Science than in *materia medica?* Should they be condemned or punished for having learned to trust God in times of trouble as the Bible admonishes them to do? Let any one investigate, and he will find that in Christian Science families a more uniform condition of health and harmony prevails than those same families manifested when they were believers in *materia medica.* Christian Scientists believe in Christian Science treatment because they know from experience that their children have a better chance of living and growing up to useful manhood and womanhood. As for public protection, Christian Scientists are the most law-abiding people in the world. There is no fear that they will not observe the regulations of health boards in relation to contagious and other diseases, since they believe in the

Digitized by Google

Golden Rule and know that their success and happiness depend upon its literal observance.

Spiritual Healing the True Mental Healing.

Tardily the followers of material systems begin to acknowledge the part that mentality plays in disease and its cure, but as they have always looked for cause and cure in wrong directions, so now, with the perversity of long-established habits of incorrect thinking, they ascribe the cures effected by Christian Science to mental suggestion; will-power; hypnotism, or mental science, which is spurious and not related to Christian Science. When it is declared that God heals disease through Christian Science, learned materialists usually scoff at the idea. Wherefore this assumption of superiority, which considers itself a judge of all things? Do the four thousand years of failure on the part of *materia medica* to find the scientific way of healing the sick, or the failure of orthodox religion to heal according to the command of Jesus,—do these endow either one with the wisdom or right to judge and condemn that which heals the sick? Who knows best how Christian Science heals?

Again, we quite frequently hear from the pulpit, after a recounting of a lot of mere opinions as to what Christian Science is, that there is nothing new in it; it is Buddhism, or what not! Let it be said unequivocally that such assertions are mere exhibitions of ignorance. Christian Science is utterly unlike any Oriental theory, philosophy, or religion. That any one should consider them alike shows that he understands neither these theories nor Christian Science.

It is quite true that Christian Science is not new in one sense, since there can be nothing new to eternal Truth. It is in accord with the Decalogue and the Sermon on the Mount, which, indeed, express the essence of Truth. It cannot, therefore, be new in its Principle, but as made applicable to humanity's dire needs it is new. Although the influence of mentality upon disease is now acknowledged, how many understood it prior to the publication of Science and Health? The author of that book was the first person to discern the cause of disease correctly since the time of the Master, and to give an adequate and complete analysis of this cause. Science and Health is the only book that enables us to give a correct diagnosis of disease, and it is the only book that teaches how to heal metaphysically. Christian Science is even more opposed to wrong mental methods than it is to material ones. It declares that hypnotism, mental suggestion, so-called suggestive therapeutics, will-power are not proper methods for treating disease. They are not founded upon divine Principle but are only a product of "carnal mind" or error. No matter if it be declared in books with high-sounding or deceitful titles that such methods were employed by Jesus, the self-acknowledged fact that they may be used as readily for evil purposes as for good, shows that they are neither Christ-like nor scientific, therefore not his methods. The good they sometimes seem to do invariably results in worse conditions. Man is properly influenced by divine Mind only, and the human mind cannot outline that influence or picture it.

The Discoverer and Founder of Christian Science.

Along the vista of time we see here and there the great characters that have illumined the history of the race. We scarcely dare to think what the world would have been had not there appeared from time to time a man or woman good enough and great enough to be touched by eternal Truth, and brave and self-sacrificing enough to stand for it. Mrs. Eddy discovered and proclaimed to the world the God-given freedom of the race from all sickness, sin, want, and woe. She declared the Science by which men may begin to realize that freedom and enter upon their heritage of righteous dominion over all evil. Some time this knowledge had to come. According to the promise of Jesus, it was to be the Spirit of Truth, the Comforter leading into all truth. Some one had to be good and pure above all others in order to perceive it. Any great discovery along a given line is always made by one whose thoughts, desires, and studies are reaching out beyond those of other people. The world is somewhat accustomed to Christian Science to-day. It is a welcome subject in many circles, and its wonderful and blessed achievements are generally acknowledged, but there was a time when Mrs. Eddy was the only Christian Scientist on earth, when she stood absolutely alone with God before the whole world and incurred the ridicule of ignorance and the hostility of theoretical forms of religion and material modes of medicine because of her discovery of the Science by which the gospel is made more available. To-day all religions and all methods of healing are somewhat touched by it. The world is uplifted by her example. Through the silent and loving influence of her teaching, human thought is being lifted somewhat from the depths of gross materialism. Where would it be to-day, where would we be, but for the purity of purpose, unswerving perseverance, and sublimity of courage displayed by Mrs. Eddy through all those years of trial and persecution? Who that has gained any knowledge of Christian Science can but recall with a shudder the memory of the time when he did not possess it, when, in the language of Scripture, "the earth was without form and void; and darkness was upon the face of the deep." The gratitude of such an one will never let him forget that in his individual experience, through Mrs. Eddy's discovery of Christian Science, "the spirit of God moved upon the face of the waters, and God said, Let there be light, and there was light."

Is it not strange that every epithet of vilification and hatred should have been directed against this consecrated woman? Yet history shows that every person who has initiated a moral or religious reformation, has been hated and maligned by that which was in need of such reformation. It is both unnatural and reprehensible that the pulpit, which ought to welcome every hope of deliverance and every message of peace and good-will, has frequently joined in the cry of condemnation. To all this Mrs. Eddy has never made an unkind reply. Whatever others may do, she practises the gospel which she teaches,—the gospel of Christ, the gospel of Love.

These are the simple facts. I should consider it presumptuous to praise Mrs. Eddy. A character touched by the deepest humility and illumined with love to God and compassion for man, is Christ-like. It needs no eulogy. Her life is an open book wherein are recorded only good deeds. The signs of these times are prophetic. They point to the gratitude to God that is appearing in the hearts of men for the life and works of the Leader of this great movement, destined, as it is, to accomplish the regeneration of mankind.

The Promise.

We should be aroused to gain the God-given freedom which is ours by right, which is an inheritance, lawful, incorruptible, "that fadeth not away." It is awaiting our assertion of our right to it. God is good. You cannot find a place in the universe where He ever fails to be what He naturally and eternally is. Christian Science demands, however, something more than mere passive acquiescence or belief. Simply believing in good, offers slight protection from evil. The fangs of hatred and malice must be drawn. Actively at work in consciousness, Christian Science protects from sin, disease, accident, and every evil through the power of divine Love. It is an individual as well as a universal benediction. It comes to you and to me in our greatest or smallest need, revealing the eternal Christ, who saves to the uttermost; and it says with Isaiah, "Arise, shine, for thy light is come."

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

New By-laws.

ARTICLE XVI.

EASTER OBSERVANCES.—SECTION 2. In the United States there shall be no special observances, festivities, nor gifts at the Easter season by members of the Mother Church. Gratitude and love should abide in every heart each day of all the years. Those sacred words of our beloved Master, "let the dead bury their dead," and "follow thou me," appeal to daily Christian endeavors for the living whereby to exemplify our risen Lord.

ARTICLE XXVIII.

CHURCH MEMBERSHIP.—SECTION 14. Neither the Pastor Emeritus of the Mother Church nor its members shall teach Roman Catholics Christian Science, except they receive the written consent from the churches of which these applicants are members.

"Churches Losing by their own Offspring."

IN an address recently delivered before the Baptist Social Union of New York, the Rev. Dr. Russell H. Conwell declared that the Churches are showing no real growth in membership, and he lays the blame for the situation upon the founding of those institutions which may properly be termed the offspring of the Churches. The portion of the address in which the speaker dealt with this condition was quoted in a recent issue of the *Sentinel,* but we publish it again by request, and in doing so call attention to the fact that the views expressed are in harmony with the Mother Church By-law, "Church Organizations Ample," which appeared in last week's *Sentinel.* Dr. Conwell said:—

"And it's all the fault of the Churches, the blame alone is theirs. They are being submerged, swamped, as it were, by organizations they themselves started.

"The Young Men's Christian Association is a continued permanent protest against the failure of the Church to do what it ought to do, and it would have no existence had the Church done as it ought. The Churches started the hospitals, gave them their right of existence; now there is scarcely a denominational or even religious hospital to be found.

"And look at the colleges. President Harper says Chicago University shall be no more Baptist than he can help, and there is Princeton, hardly Presbyterian any longer. The Church of God is being lost sight of everywhere, and she suffers in consequence.

"If she is to get back the ground she has lost, the Church must recognize that teaching the ignorant, healing the sick, and preaching the gospel are three indissoluble things, each one her duty, and each one necessary for her salvation."

The tendency to subdivide Christianity by turning over to societies, clubs, unions, etc., those activities which are but different phases of the one Christian ministry has not been of advantage to the Church, and it is not surprising that this protest has been uttered. Neither Jesus nor the apostles attempted to specialize; their endeavor was to establish the kingdom of heaven upon earth, and in their work they proved that salvation from sin, sickness, and death must be effected by one and the same process, and they thus demonstrated the unity of Christianity.

It is to be noted that in prescribing the means by which the Church is to be rehabilitated, "to get back the ground she has lost," Dr. Conwell does not omit the healing of the sick, and in this he takes true Christian ground, for it is written that "Jesus went about all Galilee, teaching in their synagogues, and preaching the Gospel of the kingdom, and healing all manner of sickness and all manner of disease among the people."

Dr. Conwell's statement that "teaching the ignorant, healing the sick, and preaching the gospel are three indissoluble things," is certainly true, and failure to recognize this truth and to act upon it has brought about the condition which he and many other ministers so deeply deplore in their public utterances. The healing of the sick is so essential a part of Jesus' teaching and works that it cannot be disassociated therefrom, and the Churches must come to this realization if they are to perform their mission in the salvation of the race.

Jesus came not to destroy but to fulfil, and in healing the sick he was about his Father's business as truly as he was when preaching to the multitudes. He knew that health and wholeness are the birthright of man, and he proved it. His command, "Heal the sick," has not been abrogated, and the Churches must recognize the comprehensiveness of his gospel if their ministry is to save mortals as he saved them.

The Cause of Christian Science does not need the aid of *quasi* denominational organizations, the Church supplies our every need. M.

An Oft-repeated Inquiry.

As of old "There be many that say, Who will show us any good?" The Psalmist follows this query with the prayer, "Lord, lift thou up the light of thy countenance upon us," and he adds, "Thou hast put gladness in my heart, more than in the time that their corn and their wine increased."

To the inquiry, "Who will show us any good?" Christian Science comes to declare without any reservation that it can and does show the way to the realization of all good by its revelation of divine Principle. Among religious people there should be no hesitation in admitting that the realm of Spirit is the kingdom of God, since God is Spirit. The Bible teaches that this kingdom is not to be found in material conditions, but in "righteousness, and peace, and joy in the Holy Ghost," and it would certainly be inconsistent for any Christian to challenge the statement that these conditions may be realized in large measure here and now. This was clearly the Master's teaching, and therefore those who can aid others in attaining and retaining these blessings should be helped, not hindered, by all who profess to be followers of Christ Jesus.

It is true that some of the critics of Christian Science question its teaching on philosophical, not on religious grounds, but so far they have offered nothing in substitution for that which they assail, nor do they "show us any good" by means of which deliverance from the undeniable misery of mortal experience may be found. When they are ready to show us a better way than that revealed by Christian Science, we shall assuredly listen. Until they do, how vain are the arguments of those who do not know what it means to us to "live, and move, and have our being" in God, as this is understood in the light of Christian Science. There is surely no mission so noble as that of rousing the spiritual energies of our fellow-men and thereby showing them the way to Life and peace. Granting this, what can be more ignoble than to obstruct with philosophical arguments the ascending path of those who are seeking a way of escape from hopeless woe, especially when philosophy makes no claim to heal either sin or sickness.

Digitized by Google

As of old, the Christ teaching with its healing effects is to the material religionist a "stumbling-block," and to the learned "foolishness," but to those who hear and accept the loving call of Truth, Christ is again known as "the power of God, and the wisdom of God" available for every human need. And is it not wholly logical that our hearts should be filled with the deepest gratitude for the one and only "good" which has been shown us, and which leads each to say, "Thou hast put gladness in my heart"?

To one who has been healed, the *knowing* of Truth is of vastly greater importance than is the ability to explain the truth to cavilers, and it will ever take precedence over all else to him who can say with Paul, "I am not ashamed: for I know whom I have believed."

It is constantly admitted by all deep religious thinkers that people in general are too material. They would never think of saying that any one is too spiritual, that he knows too little about matter and too much about God. Our Leader says, "Through spiritual sense only, man comprehends and loves Deity" (Science and Health, p. 481). and if it is true that "eye hath not seen nor ear heard" the things of God, must they not be learned in God's way,—the Christ way? When thus learned, like St. John we shall behold as in a dissolving view, the disappearance of all sin, sorrow, pain, and death, and in their place we shall see that which God has eternally seen,—the harmony of spiritual being, revealed by divine Science, and then we shall no longer ask, Who will show us any good? K.

After the Resurrection.

SACRED literature does not contain a more inspiring appeal, nor give a more splendid ideal of the purity and privilege of the Christian life than that found in the third chapter of Paul's letter to the Colossians, which begins with the mandatory and suggestive words, "If ye then be risen with Christ, seek those things which are above, where Christ sitteth on the right hand of God." The outline he gives of the character and habit which are consistently associated with the initial postulate of our resurrection with Christ, thrills and humbles every aspiring heart. Like every high ideal it brings to all who hunger and thirst after righteousness no less of assurance and courage than of humiliation, for they are confident that to all who recognize and lay hold upon an ideal, to them there is the possibility of its realization.

The Christian altruist rejoices most, however, in the promised sequence of this escape from materiality, this "resurrection unto life," which is set forth in Jesus' words: "And I, if I be lifted up from the earth, will draw all men unto me." It is in the authority and effectiveness of the ascended and ascending thought that dominion and usefulness inhere. Spiritual elevation means breadth of vision, a truer apprehension of the nature and relations of those things which are beneath, a clearer perception of the presence and power of "those things which are above." It frees us from the obscurations of mesmerism, the mists of conventionality, and enables us to buttress our declarations of Truth with an illumined consciousness of Truth.

Every human difficulty is to be overcome, every earthly ill removed, every sinful bondage escaped from through that spiritual exaltation which is the only "universal panacea." This is the teaching and demonstration of Christian Science, that adequacy for every demand and exigency of human experience is to be found and maintained in the acquirement of a clearer perception of the truth of being. Aspiration, intuition, consciousness, healing power,—all are "lifted up" as we cling to our ascending Lord. In tracing the formations of the divine Mind "we constantly ascend the scale of infinite being" and "may rise to the spiritual consciousness of being, even as the bird which has burst from the egg and preens its wings for a skyward flight" (Science and Health, pp. 189, 261).

Hath the Christ-truth arisen in us? If so, its saving works will be manifest. We shall find not only an expanding freedom for ourselves, but we shall become "strong to deliver" our brother in bonds. We *ascend* to the plane of our largest usefulness. W.

Notice to Branch Churches.

Each branch Church of Christ, Scientist, is requested to send, as soon as possible, a report of its total membership, as it stood April 1, to William B. Johnson, C.S.D., Clerk of the Mother Church, 239 Huntington Avenue, Boston, Mass.

Letters to our Leader.

Los Angeles, April 5, 1904.

Dear Mrs. Eddy:—I trust that you will accept the love offering mailed to-day. As these California poppies grew and blossomed under the sunlight of Truth, the first use made of my eye during Love's affirming was to work this piece for you with love and deepest gratitude.

No words can ever express the debt I owe to you, dear Teacher, for the gladness and strength that has come to me through Christian Science.

Most sincerely and lovingly yours,

FRANCES W. ROSENHIEM.

Mrs. Mary Baker G. Eddy.

Beloved Leader:—If you have no time to read this letter, I shall have had the joy of writing to one I reverence beyond all women. I should like to tell you about a Jewess who a few months ago came to New York from a Western city, a sufferer for many years from hemorrhages and bowel trouble. She carried with her in traveling a satchel with many remedies, none of which gave her permanent relief; she felt that all pleasure in life was gone, and when she began Christian Science treatment, refused to hear the name of Christ spoken. She returned to her home a few days ago cured of her diseases, carrying with her a new satchel, and in place of her many remedies, she had a Bible, Science and Health, "Miscellaneous Writings," and *The Christian Science Journal, Sentinel,* and *Quarterly.* This seemed to me such a beautiful exchange from her old remedies that I wished to tell you about it, and to add my thanks to those of many others for your patient search for this wonderful truth which you have so lovingly given your followers, of whom I gratefully count myself one.

Most lovingly in Truth,

MARTHA KEEP SINCLAIR.

New York, April 21, 1904.

Milwaukee, Wis., April 20, 1904.

Rev. Mary Baker G. Eddy, Pleasant View, Concord, N. H.

Dear Leader:—We believe that it will rejoice your heart to know that the union of First and Second Churches of Christ, Scientist, of Milwaukee, Wisconsin, has taken place. The first service of the new organization, to be known as First Church of Christ, Scientist, will be held Sunday, April 24, 1904, at 10.45 A.M. and 3.30 P.M., and will be the dedication of the edifice of the former First Church.

Your teachings and life of meekness, selflessness, and love for all mankind: the clear messages at the Communion season, urging upon all students the necessity for more self-abnegation, more of the spirit of Christ, less thought of self, personal ambition, or personal gain: the Lesson Sermon on Love at the last annual meeting, have been the impelling power in this movement. We hope we are ready to be blessed, and that the future of Christian Science in this field will evidence to the world our gratitude to God and to you, His messenger. With love,

Joint Committee, by LENA ERBACH, *Clerk.*

Digitized by Google

Fort Dodge, Ia., April 21, 1904.

Rev. Mary Baker G. Eddy.

Dearly Beloved Leader:—I think it may gladden your heart to know something about what the children of the Sunday School of this little branch did for Love on Easter day. It was demonstrated in a few moments that we could send what funds we had in the treasury as love offerings to the Building Fund of the Mother Church and to the Concord Church, each sharing equally. I found there was about thirty dollars on hand. The next day a little boy of the Sunday School came to me and said he wished to help make the love offering larger, and he had taken ten dollars from his little bank, money he had earned, and gave it to me. I said to him, "Now we will wait and not send this until we can make it fifty dollars. The next Sunday I spoke to the children about it, and last Sunday it was raised. Then again yesterday, a sweet little girl came and gave me five dollars more, all her bank savings; so to-day I wrote two letters, one to Stephen A. Chase, the other to Rev. Irving Tomlinson, and sent this Easter offering. Oh how happy and glad each little child has been, that they could do this much towards the "structure of Truth and Love's" temples, and to know we are a part of this structure, with you, our dear Leader, is best of all!

These children all love Science and Health, and have many beautiful demonstrations. We strive to teach them faithful obedience to God—divine Principle. We know we can best show our true appreciation and love for you by living Christian Science, and in this way bearing fruit for the Master's vineyard.

In loving obedience,

MRS. MARY A. ENGLE,
Superintendent of Sunday School.

A Thankful Heart.

THE following appreciative letter was recently received by one of the practitioners at Concord, N. H. The case was one of physical and moral regeneration, and the young man was put in a way to be a blessing to himself and to others.

"A little over a year ago my brother went to you in Concord for physical help, and through your instrumentality he was healed, body and soul. I have long felt that you should know the appreciation that we,—his people,—feel for your efforts. His case, no doubt, made no special impression upon you among the hundreds that are brought to your attention; but to one man a new life was opened up that day,—a life of earnest endeavor and strong purpose, and he is becoming now the man that he was intended to be in the beginning,—a wonderful help to his fellow-men.

"His physical healing we are grateful for, but it is a very small part of what has been done spiritually for my dear brother. He was a slave to the habit that wrecks a man, body and soul, had tried in every way to overcome it but with no avail. And this spiritual help brought him to himself and gave him use of the God-given powers he had never known before, and for this I bless God that he was reached through your influence, as I have always known he must be in due time in answer to all the prayers that have been uttered for him. I am no Scientist. It is to me simply one of the channels through which God reaches some of His children, but it will always have a sacred place in my heart for what it has done for one most dear to me. So thank you for your work with him."

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

Testimonies of Healing.

I have so often found help from the articles in the *Sentinel* and *Journal* that I should like to tell of my healing, hoping that it may induce others to come to Christian Science for that help which it never fails to give, if our faith be strong and reliance on God absolute.

It is nearly six years since I heard of Christian Science. Circumstances led me to inquire into it, and I attended a Sunday and a Wednesday evening meeting. It seemed to me a very beautiful religion, though its claims were such that I could not then understand them; still I felt that anything that brought happiness and health where misery and disease seemed so real, was something to look into with an open mind, so I bought Science and Health by Mrs. Eddy.

The reading of this book determined me to give up all material medicines; this was a demonstration in itself, as I was a slave to drugs of all kinds. I have touched none since. A few months after I began to study, I was called upon to nurse one dear to me, through a severe illness. I was always considered a delicate woman, and the nursing was very arduous and trying, but even then the truth I learned in Christian Science helped me to overcome all fatigue in a marvelous manner; but I was to be tried still further. I discovered one night that a growth had appeared in a place where for some time I had felt pain. The nature of it was such that for the moment I was overwhelmed with fear. It presented the appearance of a disease which I always dreaded even to think of, namely cancer. I knew that if I consulted a doctor and found it to be such, and an operation necessary, that this news would perhaps be fatal for the patient I was nursing under the doctor. Then I felt that now was the time to prove my trust in God and to prove what I felt was the truth in Christian Science. I longed for human sympathy, and had a temptation to tell one whom I knew would give it, but that seemed selfish, so I wrote for help to a practitioner in London. I then lived far from there. I prayed God to give me the strength to bear silently all that might be before me. The healing was not very quick, but it was sure, and in sixteen weeks there was nothing to be seen or felt, and I knew that God was All in all.

Of course it was said afterwards, when I told of the case, that it could not have been either cancer or tumor. I do not know that it was, but I do know that it was a something that filled me with fear and dread and gave severe pain, and whatever it was, it disappeared. I can never be grateful enough to God for giving us Mrs. Eddy and her discovery that makes such healing as this possible.

A few months after this healing I was staying with relatives in the country, and fell down a steep flight of steps, bumping my head on every step. As I fell I declared that God was with me, and felt no fear. My hostess and the nurse saw me fall and feared I should be terribly injured. I sat up at once, and I did feel very much shaken; the skin on one side the nose was slightly bruised, one eye and the side of my head were very much swollen and disfigured, and I looked rather bad. I refused all help and asked to be left in my room for a half hour alone. My hostess knew I was a Christian Scientist, and I told her that now I must prove that which I had told her was the truth. At first I could not see to read, but presently, after realizing God's power and willingness to help, I could see, and I read for a few minutes in Science and Health and tried to understand that I—the real I—could not be injured or hurt in any way. I prayed for wisdom and understanding. My hostess came back in half an hour, and she was quite overcome, and said it was "uncanny." I then looked at myself and there was no appearance of there having been any accident. The discoloration and swelling had all gone and the skin was unbroken. I still felt internally rather upset, and asked to

Digitized by Google

be left alone again. God was very good to me, and two hours after the accident I felt perfectly well.

Since that time I have had class instruction, which was a great help to me; the understanding gained from it with the study of the Bible and Science and Health, has enabled me to help others. A case of double rupture was healed in twelve days. A little boy had bronchitis and was given up by the doctor; he was healed in less than a week. I feel I have still much to overcome, for error still claims to be heard, but I know that if I am faithful God will give me strength to overcome all that is unlike Him, and, knowing this, I rejoice.—M. J., Surrey, England.

It is indeed a privilege to express in our periodicals some measure of my appreciation and gratitude for the benefits I have received through the knowledge of Christian Science. On a beautiful June morning about six years ago, I realized for the first time the healing power of the Christ, and after one treatment from a Christian Science practitioner, my weary, sick, and discouraged sense was replaced by a consciousness full of hope and confidence that God, whom I had ever loved and served, could and *would* heal me.

Throughout my childhood and girhood I had been a constant victim of ill health. The continuous efforts of some of the kindest, ablest physicians and specialists in my own city, had proved unavailing, and I was frankly told that the fundamental difficulty might never be removed. My school duties had been frequently interfered with, and finally, to my great disappointment, they were discontinued some months before commencement on account of my ill health. Constant throat trouble, abscesses, extreme nervousness, rheumatism, and severe attacks of fever, were among the diseases from which I suffered. I say "among the diseases," for there were many more. I seemed only relieved from one trouble, to be attacked by another.

Yet, as I look back upon these years spent in the wilderness, I can see how I was being led, slowly, surely, to the promised land, the "land of Christian Science, where fetters fall, and the rights of man are fully known and acknowledged" (Science and Health, p. 227).

From my earliest childhood my training and my own intuitions led me to rely upon my heavenly Father for the smaller as well as the greater needs of my life. An earnest worker in every organization of my own church, I strove continually to influence others only for good. To the best of my understanding I had laid down my own will, even praying, if it were God's will for me to be an invalid, I might still be so patient and sunshiny that all who came in contact with me would be blessed. Through all my darkness was the faith that somewhere there was light, and that when I had suffered enough, I should find it.

In May, 1897, a short but very severe attack of illness came, leaving me very weak and more despairing than I had ever been, and, for the first time, rebellious against the thought that God could allow me to suffer so. Why, I reasoned, should I be so punished when my every desire was to be a good child. Even my earthly father was more kind, for he would heal me if he could. Then came the thought, God *can* heal me if He will, and I must find some one who knows about healing by prayer. Of Christian Science I knew but little, and that little through one of my dearest girl friends, who was a Scientist. She never talked of her religion unless I requested her to do so, but once, while at her home, I had been immediately relieved of a sore throat which threatened an extended attack. My mother, however, had an old friend who was a Scientist, and after some conversation, mother and I decided that it would do no harm for me to go and talk with her.

Trembling in every limb, I arose, dressed, and went to see her. Sinking into a chair, I burst into tears. When I could speak she questioned me gently, and drew from me my miserable tale. Then she explained to me the requirements of Christian Science treatments, and I readily consented to give up my medicines, of which I had obtained that very morning a fresh and expensive supply. I promised to procure and to read copies of both Science and Health and "Miscellaneous Writings." She told me not to fear, but to trust God to bring about the desired results. My nervousness disappeared, and I left her, radiant with joy. I could be *healed!* I flew home to mother, who said I looked more like myself than I had for many weeks. I felt free as a bird, and *sang* again, which the doctor had forbidden me to do. I was healed, and I *knew* it. For a short time the practitioner continued her work for me, to establish the demonstration, but from the time I first felt the healing touch I was well.

Through the summer I earnestly pursued the study of Christian Science literature. I was not content with a blind faith, I felt I must know what had healed me, I must understand the process, and above all, I felt I could never have my faith in Christ shaken. Rather than be led away from my Bible or Christ, I would even give up the healing. I prayed earnestly that I might not be led astray, out of the true and narrow way. Day by day I saw more light, and by September I was fully convinced that Christian Science was not a departure from Christlikeness, but simply *more* of it; not a step away from the teachings of Jesus, but rather a clearer, more practical and reasonable understanding of them. Now, after six years of constant study, I speak from my heart, saying that through Christian Science I have received more of light, of peace, and joy, than I thought it possible to attain in this life. It is true that at times dark clouds have loomed up, threatening to obscure the light, but I have ever found Truth sufficient for my need. So I can go on rejoicing, and certain of this, that strict adherence to divine Principle will enable me to solve correctly every problem of human existence.

GRACE KEELER, Toledo, O.

In the spring of 1896 my health failed, and for a year previous to this it was with the greatest effort that I kept around. I had been told by my physician that I had organic trouble from which I would never be free. I finally tried other physicians and an operation followed, leaving me a wreck both physically and mentally.

As a last resort I turned to Christian Science for help, to please my husband. I had no faith in it whatever myself, but believed firmly what my physician had told me, as he was always cautioning me about overdoing, and also about my diet. One day, when speaking to the physician, I asked him what I could have to eat, to which he replied that he could not tell, that he had never seen any one in such a condition. I was suffering the most intense pain and nothing would quiet me. I would fall into a stupor for a short time after using remedies to make me sleep, but this would leave me feeling worse each time, and I positively refused to take any more, notwithstanding that my physician had said I must have at least eight hours' sleep at night, and at best they could not give me anything that would produce more than two hours' sleep. For five years I never knew what a good night's rest was, and the days were but little if any better.

One day when all hope had seemingly fled, I took up my Bible and read John, 11 : 40, also the 91st Psalm. I seemed to realize that these words were God's voice speaking to me individually, and I accepted those promises as mine, and also in Science and Health (p. 356) "Can evil be derived from good? Impossible!" When I could realize that the condition I was in was not good nor of God, I found the rest and peace I had never before known, and which comes not in oblivious sleep. I had been constantly looking for the healing of the body, but I learned that through the renewal of the mind, the body is transformed. I also learned that

Digitized by Google

when I could say with all my heart, Thy will, not mine, be done, I did realize the healing power of Truth and Love. I did not, however, "accomplish the change from error to truth at a single bound" (Science and Health, p. 77). I might say here that I felt very bitter toward the physician who performed the operation, and I was much disturbed at the feeling I held towards him, but seemed unable to overcome it, yet I had earnestly prayed to be forgiven. Although I do not remember that I said anything to my practitioner in regard to it, the thought has been entirely destroyed, and I can only say, "Father, forgive them; for they know not what they do," "Teach them the good way."

While the physical healing has been wonderful, the beautiful part of all has been the spiritual uplifting. My case was one of slow healing, and to any one who thinks it is long waiting, I would say, Trust in Christ, Truth, and through patient waiting will come the reward to those who do not grow "weary in well doing." After being under Christian Science treatment some time, as I did not seem to respond, it was thought best to change practitioners, which was done, and while there was no marked improvement for some little time, yet after I took my first step alone it was only about two months before I was doing all my own work, except my washing. It was my privilege most of the time to have Science help in the house, which was of great value to me. The troubles that have yielded to Truth are nervous prostration, catarrh of the bowels, insomnia, cankered stomach, spinal and local trouble. There is one ailment that as yet has not yielded but it surely will, for I do realize that God's work is perfect. It is now over a year since I was healed, and error has tried in various ways to keep me from writing of my demonstration, but Truth has prevailed.

I desire to express my gratitude to our dear Leader for teaching us how to overcome error in all its forms, and I feel that if any one has reason to praise God for Christian Science it is myself. To each of my practitioners I owe a debt of love, and to all who cared for me in my great need. I am greatly helped by the weekly Lessons of the *Quarterly* and by the helpful articles in the *Sentinel* and *Journal*. I feel in sending my testimony that it is but little for all the benefits I have received.

MRS. ELLA J. SMITH, Meriden, Conn.

I wish to give my testimony of healing through a deep sense of gratitude and love to God, and to our dear Leader, who, through the true understanding of the life and teaching of Christ Jesus, has solved the problem of life, and through her devotion to Truth we can participate in this full salvation she has understood.

Until about seven years ago I was groping in the dark and felt partially conscious of it, but how to find the truth that makes free I knew not. I had been a member of an orthodox church since I was twelve years of age, and tried to live a true Christian life. At this time through a dear friend I was persuaded to investigate Christian Science, the first I had ever heard of it, and I rejoice that it did not antagonize me, for I had always felt that the sick should be healed as Jesus healed them, and wondered why that part of the Scriptures was ignored, as it seemed to be by Christian people.

I had been an invalid for years, in fact from childhood, and seemingly had inherited every disease mortals are heir to. I was under the care of many physicians and with all the different verdicts (no two agreeing) I was so filled with fear that life truly was a burden. I was about ready to give up the struggle when this wonderful truth came to me. One physician told me I had heart disease, and, snapping his fingers, said, "You are liable to go out like that." Another one said I never could be a well woman, and wondered that I had not been bedridden, that it was a mystery to him how I kept up. My mother was a confirmed invalid, and had been confined to her bed for years, and I feared that was to come to me through inheritance. Three physicians told me they feared cancer, another, paralysis, and with all these and other troubles I had chronic constipation of which not one of the many physicians could relieve me. I have had many operations,—five at one hospital. I was promised full restoration to health if I would submit to them, but all of them proved ineffectual.

After two years of suffering I went to another hospital, and their verdict was that an operation must be performed within ten days or they could not vouch for the result from longer delay. I remember so well how anxious the surgeon was to impress me that it was a very serious operation, and that there were only two of the kind on record. I was made more comfortable from this operation, but far from being well, for it did not destroy the fear that was doing its work. Finally I lost all faith in *materia medica*, and, weary and heavy laden, I came to the conclusion that there was something radically wrong. I turned to God in prayer more earnestly than ever before, to be led into a higher and truer understanding of Him and our relations to each other, and am sure I was led into Christian Science. I commenced by reading the writings of our Leader, and was soon convinced I had found the truth that makes free,—the pearl of great price. I gradually improved as the result of my reading and from talking with Scientists, and to-day I am rejoicing in the ever-presence of Love and am striving to do the will of my Father in heaven, that I may do the works that Jesus did. In Christian Science we know nothing less than this can bring us full salvation, a consciousness of our at-one-ment with the Father.

MRS. AFFA STARK SEELEY, Poughkeepsie, N. Y.

I became interested in Christian Science through a relative who loaned me some *Sentinels* and *Journals*. He had just taken class instruction, having heard of Christian Science through a Christian Scientist, an American who had married a friend of ours and come to live in our island home. After reading a few *Sentinels* and *Journals*, I became convinced that there was something in it, and borrowed Science and Health. I could not then understand it and soon returned the book. I continued to read the periodicals and became more interested. I soon tried Science and Health again, and also applied to an experienced practitioner for treatment. I had a long-standing physical ailment that had been treated unsuccessfully by two New York specialists, but through Christian Science I was healed in two weeks. I read Science and Health slowly, going over and over each paragraph until I gained a little understanding, and in 1902 I was privileged to have class instruction.

In the light of Christian Science my Bible has seemed a different book. I had been a member of an orthodox church for some years and never could understand why the healing had been lost sight of. A few months after my return from class I had what was to me a wonderful demonstration. I had what seemed like rheumatism in my limbs and could not walk, sit, or lie down in any comfort or without pain. I had never been troubled with such an ailment before, and, being the only Christian Scientist in my family, I was advised to have a doctor. I refused, however, and concluded to help myself if possible, but was not sure that I had enough understanding. I went to Science and Health, read the chapter on "Christian Science Practice," and treated myself as well as I could. I went to bed, slept well, and have never had a return of the pain; in fact, I forgot all about it. A few months ago I was said to have the grip, and was obliged to remain in bed several days. I was again urged to have a physician, but I refused and tried to help myself and came through all right, while my sister, who had the same ailment, was ill several weeks with a doctor in attendance.

The *Sentinels* and *Journals* are a great help to me. Error

Digitized by Google

seems to rise up on every side to confound me, but my daily prayer is for understanding; to be so conscious of the omnipotence of good that the seeming hindrances can have no place.—M. D. M., Nassau, N. P., Bahamas.

I feel that I owe a large debt to Christian Science for the benefit I have received through its teaching. I will explain how I came to be healed of piles of twenty-five years' standing, for which I had used all kinds of remedies without any relief. I finally went to a doctor, who examined me and pronounced it a case of fistula. He said that an operation would be needed to cure me, but I did not like the idea.

After another experiment, which proved a failure, I came home in 1901 and a friend offered me a *Christian Science Sentinel* and asked me to read it. That was the first I had ever heard of Christian Science. I began to have faith in it, so I bought Mrs. Eddy's book, Science and Health, but before I had read it through I went to my friend to get the address of a practitioner and wrote to her stating my case and asking if she would treat me. She answered that she would take my case, and strange as it may seem, especially to those who have never heard of Christian Science, about the time the lady received my letter there seemed a wonderful change in me, as if a great burden was taken off, and a peace never known before came over me. In her answer to the last letter the practitioner advised me to do away with all material remedies, to keep on reading the Bible and Science and Health. Before I was aware of it my troubles had left me, also a desire for intoxicating drink, although I worked some in a brewery at that time. I had other beautiful demonstrations of the power of Truth, which never failed me in time of need. I have no desire to read anything besides Mrs. Eddy's writings (and I have the most of them), also the *Journal, Sentinel,* the *Quarterly,* and *Herold,* which are welcome friends whenever they come.

When I look to the past, I now can see how wonderfully God has lead me all my life to be spared to come into Christian Science, to find the friend who offered me the *Sentinel,* to find the practitioner, and to be granted the privilege of taking class instruction, also to be found worthy to be accepted as a member of the Mother Church and this local church. The only way I can express my thanks for the benefit I have received through Christian Science is to live up to its tenets, to be a living example to my comrades, to be able to live without any bad habits.

FREDERICK GROTE, National Military Home, Danville, Ill.

A number of years ago, before I knew anything of Christian Science, I found myself greatly worried and perplexed about many things, so much so that I did not know which way to turn. I poured forth my tale of woe in a letter to an old friend whom I had not met for a number of years, expecting she would give me some good, practical advice. She did so, and this is what she wrote me, "Seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you."

I was very much disappointed with the answer, because I could not see how it applied in any material way to my case; God, and the kingdom of heaven were afar off. Those words, however, remained with me, and I pondered them often, but not until I began the study of the Bible and Science and Health did I learn how to seek this "Kingdom of heaven,"—harmony. The Scriptures say, "Be ye transformed by the renewing of your mind," and Science and Health teaches how this is to be accomplished.

"The testimony of the corporeal senses cannot inform us what is real and what is delusive, but the revelations of Christian Science unlock the treasures of Truth" (Science and Health, p. 70).

I am very grateful for the changed thought which has come to me through the study of the Bible and our textbook, Science and Health. The words of Truth contained therein have been made manifest in the destruction of much error, in the form of sickness and sin. I have often proved the Truth of the words, "To those leaning on the sustaining infinite, to-day is big with blessings" (Science and Health, Pref. p. vii).

Language cannot express my gratitude to God, to Mrs. Eddy, and to my teacher, as well as to others who have helped me to understand the truth.

EMMA H. ROSE, Chicago, Ill.

I would like to tell what Christian Science has done for me. Last summer I was stricken down with what *materia medica* calls typhoid fever, and to material sense it was a pretty severe case. I was taken down one Friday and grew steadily worse until Wednesday when the fever left me entirely. I was left as weak as a babe, in fact more so, for I could not move an inch, and had to be fed; but after that I steadily grew stronger until now I am as well and hearty as any one.

While I was down, I had contemplated going on a little trip, and was afraid I would not be able to go, but as is always the case, Truth vanquished error and I went, having a fine time. When I got out of bed I weighed about one hundred and fifteen pounds; I now weigh one hundred and forty-seven pounds. In my case a practitioner in Boston, Mass., was telegraphed to, and I had absent treatment. I am thankful for her help in destroying error, and enabling me to acknowledge Truth.

Our family has been in Science seven years, and this truth has met and destroyed every ailment that has shown up among them, blood poison, measles, croup, inflammatory rheumatism, and several others.

I cannot be too thankful to Mrs. Eddy for her great discovery of the healing power of Truth and Love.

W. J. Y., JR., Charleston, S. C.

I became interested in Christian Science through the healing of my sister of consumption. When all material means had failed she turned to Christian Science and was healed.

When I saw this wonderful demonstration I at once sent for absent treatment, several hundred miles, not knowing that there were practitioners in my own city. This was in 1894; I was healed of indigestion, liver complaint, and other diseases. I soon learned where Christian Science meetings were held, and I shall never forget the first one. It was on Communion Sunday and I thought it most beautiful.

From that day, thank God, I have tried to know that I am the reflection of Life, Truth, Love. I most sincerely thank Mrs. Eddy through whom this revelation of Truth has come to the world.

MRS. JENNIE NENNINGER, Utica, N. Y.

Before I knew anything of Christian Science I was obliged to wear elastic stockings and my physician told me I could never do without them; however, through the knowledge that I gained in reading Science and Health, I was able to lay them aside, although I had worn them for many years. I have also given up the use of glasses, which the optician had said I would have to wear always.

I am very grateful for the many blessings that I have received through Christian Science, thankful to God and to Mrs. Eddy who became the mouthpiece of this truth.

MRS. K. SEISSIGER, Cincinnati, O.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

From Our Exchanges.

We are just beginning to emerge from the cloud of pessimism which the scientific doctrine of heredity, because of its narrowness, cast over the mind of the last generation. Even in the case of disease, where a few years ago it was supposed that heredity was a fate against which one might strive in vain, we are now learning that the heredity is more in the mind than in the blood, more in the infections which persist in the household and in household associations than in any persistence of the disease itself. Tuberculosis is now proved to be not hereditary, while even insanity, it is suspected, runs in families, not because the taint is in the blood, but because it is in the mind, in habits of thought, in the talk, the fears, the superstitions, the influence of foreboding, and many a baneful thought which can be warded off, met with an antidote, and made harmless. Moral diseases are even more amenable to the healing forces of sympathy, wisdom, good training, and a total change of mental and moral atmosphere.

The Christian Register.

The Sermon on the Mount closed with the emphatic requirement of all who had listened to the words of Jesus to go and fulfil them. His doctrine, like all truth, must be made practical or it will lose definiteness in the mind. The hearer of the word goes away and forgets what manner of man he is. It is easy to deceive oneself with the fancy that in hearing a good sermon and according with its sentiment one is sufficiently benefited. The effect is superficial and has no practical result unless truth is wrought into deeds and character. In photography the sensitive plate which has received the impression of an object must be "fixed" in a suitable chemical bath, or the image will fade out on exposure to light.

Nothing short of the perfect work of truth can be satisfactory to the divine judgment. Whatever may be the emphasis laid upon faith at the beginning of the Christian life, it must reveal its complete work at the end in what men are and what they have done.—*The Watchman.*

The Bible is not a fetich; it does no good to reverence it merely as a book. It is not a book to conjure with; no one is benefited simply by reading it. There is no magic in "a chapter a day." Unless we read it with open mind and a receptive heart we might as well, for all the spiritual good it will do us, con a chapter in Euclid. It is the use we make of the Bible that determines its value to us. If it guides our hearts to him who is the Way, the truth, and the life, and imparts to us the knowledge of God, it becomes a priceless spiritual treasure, the Book of Books, God's Word to our souls in very truth.—*The Examiner.*

The best proof of the divinity of the Christian religion is the daily life of the Christian himself; not his words and professions, but his conduct and spirit; not his Sunday garb and service, but his every-day tone; not his church ways, but his home walk. In the first third of the first century the world saw the incarnate God—the Word of God made flesh and dwelling in human form among men. The nineteenth and twentieth centuries need no less than this.

JOHN H. VINCENT.

When love forgives, it forgets. It does not recall the past in anger. It does not hold the wrongs of other days as a sword over the heads of offenders. The upright man who trusts God can always afford to be generous. Thus God deals with man. Love blots out the sins of yesterday, and will remember them no more.

REV. G. CAMPBELL MORGAN, D.D.
The Standard.

THE CHRISTIAN SCIENCE TEXT-BOOK.—Science and Health with Key to the Scriptures with latest revisions and additions, and numbered lines. 700 pages.

For description, price, and other information, see last page of cover.

THE NEW CONCORDANCE.—A complete Concordance to Science and Health with Key to the Scriptures. This work has been compiled from the late revised edition of SCIENCE AND HEALTH, and contains about eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10x7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

CHURCH MANUAL.—Containing the By-laws of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. This does not include the list of members. Price, prepaid, $1 per copy; $5 per half dozen; $9 per dozen.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, and is valuable as an authorized representative of the movement, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

German Supplements

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. The Christianity of Christ. By Rev. IRVING C. TOMLINSON.

Reprints from the Journal and Sentinel

THE TRUE LAW.
SERVICE AND STIPEND.
THE BROTHERHOOD OF MAN.
RESIGNED TO THE WILL OF GOD.
TO BUSINESS MEN.
THE TRUE ORTHODOXY.
LESSONS FROM A WORKSHOP.
THE LESSON SERMONS.
HEALING THE SICK.
HOW SHOULD THE SICK BE HEALED?

Works on Christian Science

Written by Rev. MARY BAKER G. EDDY

SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES. In one volume, 700 pp. Enlarged and Revised, 1902. THE ORIGINAL, STANDARD, and only text-book on CHRISTIAN SCIENCE MIND-HEALING. Cloth binding, each, prepaid $3 18

Two to twelve books (cloth only) to one address, each, prepaid 3 00
Twelve or more books to one address, each, prepaid 2 75

Full leather, stiff beveled boards, gilt edges, same paper as in cloth binding, each, prepaid 4 00
Twelve or more to one address, each, prepaid . . 3 75

Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, each, prepaid 5 00
Twelve or more to one address, each, prepaid . . . 4 75

Levant, divinity circuit, leather-lined, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper, wide margins, each, prepaid 6 00
Twelve or more to one address, each, prepaid . . 5 75

Orders for Science and Health, in lots of twelve or more to one address, may include any or all the different styles of binding.

A COMPLETE CONCORDANCE to Science and Health with Key to the Scriptures, 595 pp., 10 x 7. Bound in cloth, marbled edges. Price, single copy, prepaid . . $5 00
Twelve or more copies to one address, each 4 50

MISCELLANEOUS WRITINGS. A book of 471 pages, containing articles published in THE CHRISTIAN SCIENCE JOURNAL since 1883, with revisions and additions.
Price (cloth), each, prepaid 2 25
Twelve or more books to one address, each, prepaid 2 00

Morocco, limp, round corners, gilt edges, convenient for pocket, each, prepaid 4 00
Twelve or more to one address, each, prepaid 3 75

Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, each, prepaid 5 00
Twelve or more to one address, each, prepaid . . . 4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

National.

The contract by which the ownership of the Panama Canal passes to the United States was signed, sealed, and delivered complete on the 23d ult. The document bears the names of President Bo and Director Richman of the Panama Canal Company.

Secretary Shaw has been perfecting the details concerned in the payment of the forty million dollars to the Panama Company. These will be paid to the Banque de France in Paris, which is to receive the amount for the Company. It is expected that twenty-seven million dollars will be drawn from the depositary banks and the balance paid direct from the Treasury. The payments may be made at intervals so as to avoid any strain on the money market.

Two payments have already been drawn for the Republic of Panama. One of a million dollars in favor of J. P. Morgan & Co. to reimburse them for money advanced to the Panama Junta, and one of nine million dollars to be handed to the minister of Panama when he arrives.

In the presence of the Cabinet and representatives of nearly every nation in the world, President Roosevelt shortly after one o'clock, Washington time, April 30, pressed the gold and ivory telegraph key in the White House which formally opened the Louisiana Purchase Exposition at St. Louis and started in motion all its machinery.

The United States Geological Survey is investigating the occurrence of radium in this country and is seeking the coöperation of the public in the gathering of data regarding the localities of radio-active minerals.

The second session of the Fifty-eighth Congress adjourned on the 28th ult. The Committee on Appropriations reports that the various sums voted for public expenses amount to $781,574,629.99.

The Department of Agriculture reports that the loss by fire in the Adirondack region last year between April 20 and June 8 amounted to $3,500,000.

Foreign.

The visit of President Loubet of France to repay that of King Victor Emmanuel of Italy to Paris last October was marked throughout Italy with great cordiality and enthusiasm. In Rome five hundred thousand people witnessed the passage of the procession to the Quirinal. The naval parade and review of the French and Italian fleets in the Bay of Naples was impressive and magnificent and was watched by great crowds. After this review and the final exchange of courtesies the President embarked for France on board a French cruiser amid a scene of great enthusiasm.

The first participation by the women of Iceland in an international movement will be at the Louisiana Purchase Exposition. Miss Lavinia Egan, secretary of the Board of Lady Managers, has received a letter from Elin Nielson of Kjobenhavn, Iceland, stating that her countrywomen have completed the collection of a fine exhibit which they desire to send to the Fair.

According to the news reports the Younghusband expedition to Tibet will at once retire from its mission of penetrating to the capital at Lhassa. The reason for this is not given, but it is believed that some strong influence has been brought to bear, possibly from China, which has opposed from the first the invasion of its vassal's territory.

The result of a conference between General Reyes, recent minister plenipotentiary to the United States in the Panama negotiations, and President Castro of Venezuela was the renewal of consular relations between Colombia and Venezuela.

It is reported that the Hungarian railway strike completely collapsed when the Government took the drastic step in dealing with the strikers of ordering all men subject to military duty to report to their respective regiments.

King Edward, Queen Alexandra, the Princess Victoria, and their suites have been paying a visit to Ireland and were everywhere given a splendid reception.

Industrial and Commercial.

"The best time to stop a strike is a long time before you begin it; which is true, if it is Irish," said Terence V. Powderly, former President of the Knights of Labor, at the annual banquet of the Shoe and Leather Association of Chicago in the Auditorium Hotel. "The labor leader who has the interest of his men at heart will fight the strike to the last ditch," continued Mr. Powderly, "for of all the costly, cumbrous, wasteful, cruel methods of settling a difficulty in labor matters, the strike and lockout are the worst. Let the labor unions incorporate. The union has nothing to fear from incorporation; there is nothing the law can reach under incorporation that it can't reach now." Mr. Powderly talked to the toast, "Reciprocity between Employer and Employed." He bore hard on the thought that there must be absolute candor and frankness in the relations between the employer and the employees, as much upon the one side as upon the other.

The success of the rubber road, recently laid under the archway at Buckingham Palace and on several other private roads in London, has brought forth the proposal that London roads should be paved with India rubber. It is estimated by experts that the cost of every square yard of rubber-covered roadway would be fifteen dollars.

"Rubber roads are hopeless," said an expert. "No public authority would ever dare to venture on the initial expense of such a costly undertaking, in spite of the fact that the rubber road lasts a lifetime. Apart from the cost, however, there is no reason why London's streets should not be rubber paved. Horses, for one thing, could dispense with shoes, and heavy traffic does not affect it much. Rubber roads, moreover, are sanitary, clean, and waterproof."

After half a century of stagnation or slow progress the railway systems of Chile and Argentine Republic are on the point of being connected. Only twenty-five miles remain to be built to complete this Trans-Andine system, but a considerable part of this is tunnel. This strip reaches from Salto del Soldado (4,100 feet above the sea), to the "cumbre" or summit (12,800 feet). When this link is closed the journey from Buenos Ayres to Valparaiso may be made in forty-eight hours, though several transfers will be necessary owing to the different gauges in some portions of the line. It is expected that the road will be commercially very profitable.

The Pacific Steel Company, recently incorporated at San Diego, Cal., with a capital of one hundred million dollars and owning extensive iron deposits at the mouth of the Balzas River, Mexico, has also acquired from the Mexican Republic, large iron deposits near the Pacific coast, in the State of Michoacan. It is asserted that the Company has options on other iron lands on the Pacific coast. The purpose of the Company is to erect large smelters and steel plants on their Mexican properties with a view to supplying iron and steel for the Panama Canal and to the trade generally in Central and South America.

According to a report of the Geological Survey the tonnage of anthracite coal for the year 1903 exceeded by more than six million tons that of any previous year, and the demand for coal enabled a fair return to all concerned in the industry. The consumption of small sizes of coal increased 2,468,694 tons over 1901, despite the opinion expressed at the close of the anthracite coal strike that bituminous coal would largely supplant anthracite for steam purposes.

The United States Agricultural Department has supplied the Filipinos with generous quantities of garden seed, but the ravages of the Filipino ant on the seed when planted have been found to present quite a serious obstacle to the propagation of garden vegetables.

The annual season of shipping seed oysters from Long Island Sound to be transplanted in other waters is now at its height. Thousands of bushels are being conveyed on schooners. Sixteen carloads were recently shipped to Pacific coast points.

The sugar crop of Cuba last year was less than one million tons. The crop for this season is estimated at over one million one hundred thousand tons, and the prospects for next season point to even a greater increase.

General.

The London *Times* publishes an article by Edouard Naville and H. R. Hall, in which they announce the discovery, through the excavations on behalf of the Egypt Exploration Fund, of the most ancient shrine yet uncovered at Thebes. It is the mortuary chapel of King Mentuhetep Nebkherrura of the Eleventh Dynasty, B.C. 2500. It is in an unexpectedly good state of preservation. It is not doubted that a great deal will be learned through this discovery of the history and art of the Eleventh Dynasty.

An archæological undertaking of a most important character is about to be set on foot; namely, the complete excavation of Herculaneum. It is proposed that this vast work be carried out by the coöperation of Italy with all the civilized countries, and that there be a central managing committee at Rome with national committees elsewhere. The scheme, there is reason to believe, meets with the full support of the Italian Government.

The will of the late Gordon McKay of Newport, which provides for a bequest of over one million dollars for Harvard University, was allowed recently by the Probate Court.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

Report of the National Christian Science Association Meeting.

Held in Chicago, Ill., in 1888.

We feel sure that our readers, many of whom have learned of Christian Science only within the past few years, will thank our friend who has preserved the following newspaper clipping giving the facts in connection with our beloved Leader's address at Central Music Hall, Chicago, in 1888. Those who were present on this occasion will recall the peace and joy of it, the close attention with which the immense audience followed Mrs. Eddy's every word, and the profound impression created by her address.

CHRISTIAN SCIENTISTS.

RECENT CONVENTION IN CHICAGO.—PHENOMENAL INCIDENTS.

To the watchful, unprejudiced observer, signs indicate facts.

That a body of people numbering nearly eight hundred should come together for mutual enlightenment is no marvel, but that they should come together "with one accord, in one place," acknowledge one Leader, one Purpose, one Cause, and that Cause the establishment of God's Kingdom on earth, is big with meaning.

The presence in Chicago of the Discoverer and Founder of Christian Science might seem of but little importance to the casual looker on, but when it is remembered that for twenty-two years Rev. Mary B. G. Eddy has declared and demonstrated that Science and the material senses are, and always will be, at variance, is it strange that certain signs should follow her which are unexplainable from the basis of personal sense, but which bear marked testimony that she has, as is so largely claimed for her by all true followers, the unction of the Holy Ghost and the signs consequent?

The common people, as well as the instructed students, are given evidence of the truth of Christian Science, that they too may heal and believe. Do the ensuing incidents afford any proof that God's right hand is upon this hour, and that His inspiration and power have come to one individual more than to all others?

Nine months ago there took place in Boston a convention of so-called mental healers, under the name of Christian Scientists,—persons who rejected Mrs. Eddy as Leader of this Cause, yet who had received from her all they knew of this grand truth. Wrangling and elbowing for leadership characterized their meetings. The public mind was prejudiced against the participants and their methods called Mental Science. At Chicago where the work was carried on in God's grooves, the utmost peace, good-will, and harmony prevailed, and the loyal, grateful students, numbering over six hundred, gave the Teacher and Leader her rightful place. On the morning of the 14th it had been announced that the public would be admitted to hear the addresses. Mrs. Eddy having requested that the delegates be the chief speakers, knew not until her arrival at the hall, where there were from three to four thousand people, that she and she alone, had been announced through the newspapers to deliver the address. Without a subject selected and without notes, she entered upon the platform, when, as by some preconcerted plan, the whole vast audience rose to its feet and welcomed her, standing.

By what power did her voice fill that immense auditorium, so that those most remote from her, heard her distinctly?

When she had finished, the scenes that followed will long be remembered by those who saw them. The people were in the presence of the woman whose book had healed them, and they knew it. Up they came in crowds to her side, begging for one hand-clasp, one look, one memorial from her whose name was a power and a sacred thing in their homes. Those whom she had never seen before—invalids raised up by her book, Science and Health—each attempted hurriedly to tell the wonderful story. A mother who failed to get near held high her babe to look on her helper. Others touched the dress of their benefactor, not so much as asking for more. An aged woman, trembling with palsy, lifted her shaking hands at Mrs. Eddy, crying, "Help, help!" and the cry was answered. Many such people were known to go away healed. Strong men turned aside to hide their tears, as the people thronged about her with blessings and thanks.

Meekly and almost silently she received all this homage from the multitude until she was led away from the place, the throng blocking the passage from the door to the carriage.

What wonder if the thoughts of those present went back in memory to other scenes of eighteen hundred years ago, when, through the personal Jesus was manifested the healing power.

Can the cold critic, the harsh opposer, the disbeliever in Christian Science, call up a like picture through all these centuries till now? Is there similarity between the records of these two conventions, the entry into Jerusalem and the betrayal? And is the bloodthirsty tyranny of animal magnetism the vail of the temple which is to be rent from top to bottom? What was the Pentecostal hour but this same dawning of God's Allness and Oneness, and His supremacy manifested in gifts of healing and speaking "with tongues"? Let history declare of Mary Eddy, and what were the blessings and power that she brought, and whence did they come? What mean those prophetic words which closed her utterances to the people, "Christian Science and Christian Scientists will, *must,* have a history; and if I could write the history in poor parody on Tennyson's grand verse, it would read thus:—

Traitors to right of them,
M. D.'s to left of them,
Priestcraft in front of them,
Volleyed and thundered!
Into the jaws of hate,
Out through the door of Love,
On to the blest above,
March the one hundred.

AN EYE-WITNESS.

From our Contributors.

The Tree and its Fruit.

BLANCHE H. HOGUE.

ONE of the clearest lessons taught by the Master is that of the tree and its fruit. Simply and directly he said, "Every good tree bringeth forth good fruit;" and his query, "Do men gather grapes of thorns, or figs of thistles?" defines clearly the impossibility of an effect being unlike its cause. The fact that like produces like, and that an effect must, by reason of inevitable law, manifest the nature of its cause, obtains just as surely in mental and moral matters as in the physical realm.

The fruit of a good tree cannot be other than good, under normal conditions of growth and fruitage, and in like manner the fruit of a good life bears witness to the soundness of its roots and the sweetness of its heart. That which is wholesome in origin and nature, will be fair and attractive to its utmost development.

The world has always accepted this truism, and men's lives have borne much good fruit from the sturdy mental integrity of their ideals; but it has remained for Christian Science to discover that there is no thought so unimportant but that it externalizes itself "after his kind." The *thinking* is, primarily, the man. Individuality is determined by the differences in the qualities and modes of thought which distinguish one mortal from another. It is well understood that thought precedes all voluntary action. Christian Science has penetrated mental conditions to the discovery that thought is the antecedent of all involuntary action, as well. The student learns that he is not at the mercy of a material body governed by laws dealing with matter as a thing wholly apart from thought, but that because matter is, of itself, nothing but "a thing of thought," governed always by thought, it must be, as phenomenon, subject to the changes of thought. The student is further instructed that it is the relinquishment of wrong thinking and the adoption of the "precept upon precept, line upon line;" of that "Mind which was in Christ Jesus," which brings better conditions into the phenomenon.

This does not necessarily mean that one must think consciously about any certain disease, or disaster, before it may appear. It means that the whole question of life and death, of pleasure and pain in matter, has been for generations so accepted by general thought, that many conditions of so-called cause and effect in matter have become a race-belief, and will result by reason of the generally accepted law, wherever the conditions for its operations exist. The individual thus exposed does not need to think expressly about the disastrous effect to bring about its appearance. The universally believed law will have its effect, even though the individual be unconscious of both the exposure and the law. The law which produces the condition is, however, none the less mental, in its inception and in its field of action, and its effect can be annulled only by mastering the race-belief in the mental realm in which it originates.

This point clearly discerned, the investigator can readily see that Christian Science opens the way for complete and universal redemption from the temptations and ills of the flesh, as well as from the conditions formerly relegated to "mind" as apart from matter; for the so-called "fleshly elements" actually change under the operation of awakened thought, and the individual whose thinking is conforming more and more to the "Mind of Christ," is less and less subject, in body as well as mind, to the laws of sin and disease, which cease to operate in the human mind to the degree that it is redeemed by the divine Mind. Christian Science healing is not the result of personal will-power dominating matter, but rather, the glorious release from that will which affiliates with matter to its own discomfort and destruction; such release coming justly to the man who, learning that the law of God really ordains only that which is good, enters his protest against these race-beliefs taking effect upon his body, his affairs, his environment, or his destiny.

The student who has discerned this, and who is beginning to adjust his life to the demands of right thinking, very soon sees better results springing into his experience; and just here, where he is groping for the new methods of thought which apply Christian Science to his daily affairs, he is confronted by a danger point, in that the yet undestroyed instincts of selfishness may urge him to attempt to *use* right thinking for the purpose of accomplishing results pleasing to himself. To be sure, Christian Science heals the sick, destroys poverty, alleviates unhappy conditions, and makes its adherent a happy, healthy, and useful individual. But to attempt to guide right thinking toward these results solely for their own sake, would often be a dangerously selfish matter. The aim and end of Christian Science is rightness of thought, word, and deed. It fosters a knowledge of God for the joy of the knowing. It encourages acquaintance with God primarily that God may be understood, and His kingdom come. That the effect of this coming includes the destruction of that pain and discord which mark the absence of His kingdom, and that we have a right to expect this destruction, is something for which we may be deeply grateful; but it must not be forgotten that the healing is an effect. No man can "take up" Christian Science nor "use" it. Christian Science takes him up, leads him out from the darkness of human desolation, clears his vision, and transforms his heart, that it may "use" him for the establishment of the reign of righteousness. For Christian Science is the Science of all Christianity, too pure to be turned into selfish channels, too mighty to be harnessed to the service of personal interests.

The question may be asked, "Why, then, is treatment given, if not for the purpose of healing the sick or relieving the oppression of poverty?" Treatment in Christian Science does accomplish just these results, and the patient often applies for treatment with only these results in view; but the practitioner must have learned that he has only to abide in the right-thinking, and trust every right thought to shape its own result, just as he trusts each tree to bring forth its own kind of fruit. God alone ordains what shall be the fruit of righteousness. Science and Health, p. 591, defines Mind as "Deity, which outlines, but is not outlined." The student surely cannot outline just how and when the effects of righteousness shall spring forth; he cannot prophesy an immediate change of condition, nor can he make any personal effort to accomplish his own or another's desire; but he can abide in the knowledge of the eternal facts, as they have been revealed through Christian Science, and let that knowledge externalize itself "after his kind," as God's laws are obediently fulfilled. He who plants a fruit-tree and gives it right conditions in which to grow, expects that tree to produce its own good fruit in due season; and in like manner, he who pursues, intelligently, this matter of right thinking, need not concern himself about its results. He may, rather, rejoice in the knowledge that right thought will bless, "after his kind," all which comes under its influence, and he may well leave the nature of that blessing to the direction of Him who doeth all things well.

A student may decide that a certain thing, in all reason, is right and good. He thinks it is right to be well, to be happy, to be at ease in financial matters, to accomplish some change for the better in his surroundings. All this is right and good, and Science and Health is teaching the world not to submit to the opposing sickness, unhappiness, poverty, or oppression. In accordance with his decision, the student may attempt to bend the energies of his right thinking into the channel of this special desire, and here he must

Digitized by Google

watch, lest the impatience of the cherished desire blind him to the deeper lessons the experience may hold. Assuming that his judgment is sufficiently illumined to be in accord with omniscience, and his desire so pure that the taint of self cannot color its aspiration, even then his outline is unnecessary, for the right thinking will, by its own law of externalization, bear its own good fruit without this human direction; and the student, furthermore, has failed to find the lesson of complete self-surrender. On the other hand, if the student has not outgrown the intricate and subtle impulses of selfishness and human will, such an attempt to direct his thinking toward defined plans or objects opens the door for the entrance of sad mistakes, or worse, for a wilful perversion of the pure teaching of Christian Science.

It is not an uncommon temptation to look to Christian Science for immediate improvement in personal interests, worldly affairs, and matters pertaining to comfort in the things of the flesh, forgetting that material losses are often the stepping-stones to spiritual possessions, and that our Master rebuked those who sought the Christ because of the loaves and fishes. If this ambition to build for selfish interests cloaks itself in the letter of Christian Science, it only serves evil to its own destruction; but care must be taken that, in its passing, it be not confounded with the purity of true mental work. So subtle is the root of personal interest in each human heart, that every Christian Scientist may well stand guard over his own consciousness, that the selfish instinct taint not his daily work. Such fidelity to the purity of motive surely prepares the way for a fruitage more abundant and beautiful than the limited vision of human desire can possibly outline. "Eye hath not seen" the beauty of it, but the present yields a radiant promise of the final fruition.

The chief aim of life lies not in doing good, but in being good. The being ends in doing. The "doing" which springs from such "being" can no more be stayed in its outgoing, than can the fruit of the vigorous tree. The one great concern of the Christian Scientist is to *be* like his model, the perfect ideal Christ. This "being" of itself puts forth leaf and bud and blossom, and, in due season, ripe fruit, because activity is its very nature and law. The tiny tree, in its early growth, need not be anxious as to its eventual fruition. It does not outline the nature of its fruit, concern itself for the time of its coming, nor fear future frost, or drought, or pest. It simply grows. And if it grows obediently and sturdily, that growth itself will mature into a strength and beauty which saves the fruit from all untoward conditions, and ripens it into perfection. And, let us note, this little tree has grown in the contentment of nature's perfect peace, because at no stage of its growth has there been any concern for its future fruitage. That human desire which plans what shall be the eventual outcome of the forces of God, is the procurer of all unrest, for it holds within its aspiration, as well, the fear that the cherished plan may not mature. When any matter is trusted wholly to the will of God, and the hand of human guidance is in no way put upon it, there can be no unrest, for nothing is being cherished save "Thy will be done." Such surrender removes the obstructing anxiety, and sin and disease must then yield to the mighty activities of holiness and health which are, indeed, God's will.

Such implicit trust is not a natural trait of the human mind, for, unlike the little fruit-tree, mortals have learned to take anxious thought about life's fruitage. But the growth of the right thinking is, of itself, destroying the habits of fear and distrust, and more and more abundantly the "peaceable fruit of righteousness" is rejoicing the heart and life. The axiom that two things cannot occupy the same space at the same time, is equally true of two kinds of thinking. And if right and wrong thinking cannot hold place simultaneously, neither can their fruit. Good fruit must abound where right thinking abides, and the only concern is to accomplish the right thinking, faithfully and persistently, leaving its reward to the righteous judgments of that divine Mind from which all good thought springs. In Science and Health, p. 261, we read, "Hold thought steadfastly to the enduring, the good, and the true, and you will bring these into your experience proportionably to their occupancy of your thoughts."

True Gratitude.

LAURA C. TUCKER.

To-day, while striving to prove ingratitude unreal, the solemn question, "Are we really grateful for the good already received?" (Science and Health, p. 3), voiced itself to my awakening consciousness as never before. And then I pondered the question, searching my own heart, only to find many ways in which I might have manifested the deep gratitude I feel for what Christian Science has brought to me. For many years I have tested it, and proved it to be the Comforter, which is leading into all truth. I have proved it, in my individual consciousness, to be the healer of sin and disease; and with the understanding which comes through one's own purification, I have utilized this unerring Principle in the endeavor to aid others, who have sought the help, and have seen error, in all its phases, dissolve into nothingness.

There is no gratitude so sincere as that manifested in a life consecrated to God, the false sense of which is hourly laid down, in the destruction of human selfhood, whereby the life "hid with Christ in God" appears.

Paul says, "Owe no man anything, but to love one another." Our debt to mankind will never be paid until we *love;* and to love is to reflect in thought, word, and deed, that divine Love which is manifested in obedience to spiritual law,—the law that is fulfilled in having but one God and loving one's neighbor as oneself. Not until the perfect man appears, has the individual paid "the uttermost farthing" and cancelled his debt to God and his brotherman.

Words fail to give expression to my love and gratitude to our beloved Leader for her unbounded love for God and man, which is manifested in a life of self-sacrifice and obedience to Principle.

The silent, ceaseless prayer, however, to be accounted worthy of the name Christian Scientist, and that my life may express "daily watchfulness" and a "striving to assimilate more of the divine character" (Science and Health, p. 4),—this may voice my gratitude in some measure for her life, her work, her example, and her great love for God's "little ones" to whose betterment she has consecrated her life.

Living the Truth.

C. C. M.

The spiritual interpretation of the Lord's Prayer as found in Science and Health gives one a desire so to live Christian Science that others will be attracted to it for its practical value.

The love which leads us to love all, whether friends or enemies, which teaches us to see the faults of others in the true light, which yearns to help and bless others, will attract them and cause them to see the possibility, the beauty and blessing of doing unto others as they would be done by. In that way God's kingdom does come to us on earth and the famished affections are fed, even as Jesus fed the multitude, and the supply is more than enough.

The path of duty, though often the path of sacrifice, is always the path of strength and honor. Genuinely noble life and service, disclose, in the end, their true worth, and the unselfish leader is at last approved by his fellows and blessed by God for the sacrifice.

Christian Science and the Church.

The real purpose of the church is not to establish and maintain certain dogmas and creeds, but to save mankind from sin. Religious beliefs are beneficial only in proportion as they affect the character of mankind, and one creed is superior to another only as it works out better results. The Scriptures do not declare, "He that believes most earnestly and sincerely in his creed shall inherit the future blissful estate," but "He that overcometh shall inherit all things."

Jesus introduced into the religious world, not only in his Sermon on the Mount but in his daily life, an example of the most exalted form of religious deportment. It has been named Christian because it embodies the Christ teaching and practice. In his actions the Master was governed by a spiritual intuition or knowledge which was superior to that of others of his day and of those who had preceded him. All due credit should be given to every institution on earth, whether it be called social, philanthropic, or religious, which elevates in any degree the human race; but it is evident that it is only as religionists arrive at the knowledge which Jesus understood and demonstrated, and deport themselves accordingly, they can become the greatest blessing to humanity.

When the understanding possessed by Jesus is perceived and enforced by the church, then the church is governed and controlled by the perfect religion.

It may readily be seen that it is not the mission of Christian Science to displace the church but to spiritualize and improve its methods. The mission of this Science is not to supplant the Christianity of Jesus, but to make it clearly understood and thereby render it more practical.

ALFRED FARLOW.

Conversation about Disease.

It may be a surprise to many who are in the habit of conversing about disease to learn that this practice is detrimental to the person who indulges in it as well as to others, and to a much greater extent than most people suppose.

Though many seem to be aware of this fact in a way, they do not investigate the matter closely enough to learn the mental cause and effect and abandon the habit; hence even people of otherwise high intellectual and moral attainments continue to contemplate and "talk disease," seemingly all unconscious that this daily practice is stealing away their health and happiness, sometimes slowly, but nevertheless surely. Jesus, the Christ, said, "By thy words thou shalt be justified, and by thy words thou shalt be condemned." Saint Paul states, "Whatsoever a man soweth, that shall he also reap." These verses from Scripture are proven true when we see one who constantly talks sickness ever in need of healing, and those who tell the truth or a lie forever being "justified" or "condemned" thereby. Punishment for thoughts and conversation about disease or sin comes every day and every hour, though to the material senses the effects of these false thoughts may not immediately follow. "He that soweth to his flesh [thoughts of the material body] shall of the flesh reap corruption; but he that soweth to the Spirit [thoughts of God] shall of the Spirit reap life everlasting." Thus we see plainly that Scriptural warning has been given on this subject.

Most people sentence themselves to suffer; they talk sickness on the trains, at the reception, at the golf club, while at card parties, weddings, funerals, in church, any time, and apparently under all circumstances. If these people have not "been sick" themselves or do not "feel as if they were going to be" they almost always know of some one whose unfortunate condition becomes the immediate subject of conversation, and all the details are entered into with relish, possibilities of recovery discussed, and the patient either sentenced then and there, or hope expressed for recovery. These people are constantly sending out disease in every direction. What is the result? A mental contagion; and thousands of conscientious physicians try in vain to stem this tide of "mental miasma" with material remedies poured into the stomach to reach the mind, and thus to minister to a "mind diseased."

The human mind must think about something; why not contemplate the beauty, the truth, the harmony and majesty of God's universe? Why not speak of the everlasting goodness of God, who maketh the sun to rise upon the "just and on the unjust"? Why not contemplate and try to see all the good we can in each other, thus bringing in transformation by a renewal of the mind as the Bible advocates?

It is self-evident that sin, disease, and the myriad evils that accompany them will never be eliminated from our minds while they are daily subjects of thought and conversation; and if they are not eliminated from human consciousness, how can we ever rid ourselves of the fear of them?

The world is fast approaching that metaphysical stage of development when mental causation will be carefully and practically considered.

H. COULSON FAIRCHILD.
Passaic (N. J.) *News.*

It has been well said that "sometimes a man is a physician and a metaphysician at the same time." For example, there has been only one perfectly successful physician for the body in the history of the world, and that was and is the divine metaphysician, Jesus, the Christ. In Christ Jesus we find, "the true physician and the true metaphysician," and from his teaching and practice we learn that man is governed by Spirit, Mind, or the one infinite and Holy Spirit. This, then, is the Holy One of Israel, the infinite God; and the first commandment is, "Thou shalt have no other gods before me" (or "besides me").

Now if one comes "to believe in mental healing" by psychology, or by suggestive therapeutics, then if such systems are based on the premise of other minds, spirits, or gods, besides the one infinite Mind, Spirit, God, and if it is true, as the Bible says, that "God is Spirit," and that there is one God, then there is but one Spirit, the Holy One, or the Spirit of Christ, or the divine Mind of the Master. For, says Paul, "we have the mind of Christ," and again, "be of the same Mind." But in teaching the oneness and infinity of Mind we do not rob man of individual mind, but bring him into communion with the one Mind of all. It is this union with the infinite Mind that Christ referred to when he said, "I and My Father are one."

In Christian Science the good news of the unity and perfection of Mind and idea, or God and man, is again proclaimed; and the kingdom of good Mind and good ideas is preached to mankind to free them from the usurped dominion of evil mind and evil thoughts, which war against the Spirit and spiritual ideas and which are overcome and cast out by the good thoughts of the Christ-mind.

WM. H. JENNINGS.
Omaha (Neb.) *World-Herald.*

Christian Scientists are aware that their methods seem novel, and this because they have not yet been sufficiently studied to be understood, but this is not their fault. They know that everything new must withstand the test of opposition until it proves itself, and in this regard the Christian Scientists are a marvel of patience and forbearance.

The Lectures.

St. Cloud, Minn.

A large and interested audience greeted Hon. William G. Ewing yesterday afternoon [March 6] at the Opera House. The speaker and his subject, "Christian Science, a Religion of Works," have both been given considerable publicity through the newspapers for several weeks past, and a great many presented themselves no doubt from an innate desire to learn.

Rev. J. H. Jones of the Unitarian Church introduced the speaker.—*The Journal-Press.*

The introductory remarks of the Rev. Mr. Jones were in part as follows:—

It is needless for me to say to you that I am not a Christian Scientist, for you all know me to be a Unitarian. But Unitarians everywhere are always willing to listen to any new doctrine and are never willing either to advocate or condemn anything without first informing themselves as to what the thing is. I am confident that the speaker for to-day can and will enlighten us on the subject which is evidently near and dear to his heart.

My very general conception of Christian Science is that it believes in the supremacy of mind over body, the superiority of spirit over matter, and the final triumph of good over evil. In so far as they believe this they are one with the best thinkers of the age. The profoundest of English poets says, "The mind is its own place, and in itself can make a heaven of hell, a hell of heaven." The best-loved of English poets has said, "There is nothing either good or bad but thinking makes it so." It is also well agreed by us all that a man's thinking determines his actions and his worth to the world and to his fellow-men. This being the case, Judge Ewing will do us a lasting benefit if he can teach us how and what to think with regard to the great problems of human life and destiny. I therefore take great pleasure, ladies and gentlemen, in introducing to you Judge Ewing of Chicago, who will now tell us about Christian Science.—*Correspondence.*

Peoria, Ill.

The attendance at the Grand Opera House yesterday afternoon [March 20], to hear the lecture on Christian Science by Mr. Bicknell Young of Chicago, under the auspices of First Church of Christ, Scientist, filled the house; and the earnest attention given to the speaker for an hour and a half, showed the deep interest in the subject in this community.

Mr. Young was introduced to the audience by Mr. Frank Meek, who spoke in part as follows:—

Almost every religion at some period of its history has had to meet with a certain measure of distrust, prejudice, and hostility on the part of the adherents of older religious denominations, and Christian Science is no exception to the rule; on the contrary, it has had more than its share of criticism, but to-day, the public thought has reached the conclusion that Christian Scientists are not enemies to the state and nation, but a body of zealous, earnest, Christian workers trying to do good for their fellow-men, not only raising them up spiritually and morally, but helping them physically. Should not a religion that will aid humanity by alleviating sin and sickness be welcomed instead of censured? Any religion that brings hope and cheerfulness to the thousands of men and women throughout the land, that teaches the Fatherhood of God and the Brotherhood of man, will not lead the world astray.

The average citizen prides himself on his conservatism; and yet it is indeed strange that we become so attached to the old theories and old dogmas, when we stop to think conservatism never gave the world a new idea or a new thought. All advance in science, art, and literature in the centuries that have passed, has been against and in spite of conservatism, and so among the many new discoveries given to the world in the century just closed is this new religion of Christian Science. Its Discoverer does not claim that it is new, but that it is the old religion as taught and practised by Jesus Christ while here on earth; if this is so it will survive; if it have truth it will live; if not truth, it will perish from its own lack of merit.—*The Herald-Transcript.*

Owosso, Mich.

Bicknell Young of Chicago, delivered a lecture on Christian Science, Sunday afternoon, March 27, at the Armory, under the auspices of First Church of Christ, Scientist, of Owosso. The large audience manifested deep interest throughout the entire lecture, and many remained afterward to express gratitude for benefits received. The speaker was introduced by Mr. William Broad, in the following words:—

Ladies and Gentlemen:—It gives me great pleasure to greet you here this afternoon. It is also very gratifying to see so many of my fellow-citizens here to listen to a lecture on Christian Science,—a subject that has been so much misunderstood, and maligned because it was misunderstood. I sincerely hope that after hearing this lecture we shall go away with new thoughts, thoughts that will grow and bring forth fruit an hundredfold.—*Correspondence.*

Winona, Minn.

Under the auspices of First Church of Christ, Scientist, Miss Mary Brookins, on March 20, lectured to a large audience in the Winona Opera House. Assistant Postmaster George P. Tawney introduced Miss Brookins, and said in part,—

The words of the lady who honors us with her presence on this occasion, will appeal to many present as words pointing the way to new truths and experiences—as the words of a message of light and life—while those of us who have not embraced the Cause which she advocates and who perhaps are largely uninformed as to the tenets of her faith, as I must confess myself to be, may gain the information that will qualify us to think intelligently hereafter of this comparatively new movement in the religious world, which notwithstanding is the object of a favorable and sympathetic reception on the part of so many of the good people of our own and other countries.

I am sure it will be a great pleasure to all of us to hear, as it is to me to introduce, the lady who will now address us.—*Correspondence.*

Rochester, N. Y.

W. D. McCrackan delivered a lecture on "Christian Science and the Brotherhood of Man" in Cook Opera House, Rochester, N. Y., Sunday, April 3, at 3 P.M. A thoroughly representative audience which numbered well toward a thousand people listened with the closest attention. The speaker was introduced by Rev. Arthur R. Vosburgh, a fellow-member of the Board of Lectureship. The lecture was given by First and Second Churches of Christ, Scientist.

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

By-law Amended.

ARTICLE XXVI.

CHURCH ORGANIZATIONS AMPLE.—SECTION 14. Members of the Mother Church shall not be made members of clubs or organizations, the Free Masons excepted, which exclude either sex or are not named in the Manual of the Mother Church. God separates the tares and wheat to garner the latter in His storehouse.

A Righteous Judgment.

ANOTHER case in which medical legislation has proved ineffective to prevent the practice of Christian Science is recorded in the following news item copied from *The Cincinnati Enquirer*:—

"Sandusky, Ohio, April 18.—Judge Charles S. Reed, in a decision rendered to-day, held the state medical registration law unconstitutional on the ground that it is class legislation, and discharged Oliver W. Marble, who had been convicted of practising without a license. Marble is a Christian Scientist. The coroner had caused his arrest for treating a man named Christopher Hehil and charging a regular fee.

"Judge Reed held that the medical registration and license law recognized none but practitioners of medicine and osteopathy and required Christian Scientists to pass an examination in *materia medica*, when, as a matter of fact, they used no medicine, but depended entirely upon prayers to God for healing. This, he said, was class distinction, and he declared that the legislature should recognize any and all kinds of healing. The case will be taken by the State to the Supreme Court."

This decision is in line with other decisions of the Ohio courts, and certainly bears the imprint of common sense. Judge Reed seems to have thoroughly appreciated the illogicalness of compelling practitioners who neither use drugs nor practise medicine, to pass an examination in *materia medica*, and he very justly pronounced the law "class legislation." Such laws as that under which Mr. Marble was tried are ostensibly for the regulation of the practice of medicine, but in reality they are often used for the purpose of creating and maintaining a monopoly in the hands of a select few. If some one should propose a law compelling coal miners to pass an examination testing their efficiency as charcoal burners, the absurdity of the proposition would be apparent at once; yet such a law would be no more ridiculous than one compelling Christian Scientists, who absolutely eschew drugs and all material remedies, to pass an examination in *materia medica* before allowing them to pray for the recovery of the sick, most of whom desire these prayers because medicine and surgery have been proved impotent.

If it could be said that there is a certain and absolute science of medicine, unfailing in its effects when understood and applied, there would be good excuse for compelling all who undertake to heal the sick to conform to that science and to demonstrate their knowledge of it. But the severe condemnation of the drugging system by some of the most eminent members of the medical profession is our authority for the statement that there is no science of medicine known to-day.

The following editorial in a recent issue of the *Toledo* (O.) *Times* states the case fairly and impartially:—

"Another blow at exclusiveness and prejudice has been struck in the decision by Judge Reed of Sandusky that the state medical and registration law is unconstitutional. The law now limits the right to practise the healing art without the use of drugs or medicines to osteopathy, and on this account was ruled against. The decision, we hope, will be upheld for the sake of fairness.

"People should be encouraged to get away from the use of drugs and medicines to cure their ailments whenever it is possible to do so. And it is as wrong to limit healing to certain methods as it would be to seek to curtail benevolence by rule and regulation. The healing art is not now well enough understood nor its limitations well enough marked to enable a legislature to set bounds beyond which people cannot legally go. As long as there are thousands of people who have been undeniably cured or healed by drugless methods, it is small business of the State to interfere and say which of these methods may and may not be employed. The State should protect people from actual fraud or imposition, but it can safely go no further. And it is often difficult to go thus far." M.

Doubt and Demonstration.

IN giving his reasons for retiring from the ministry, after what would be called a successful pastorate of many years, a clergyman has recently declared that while his desire to serve the people steadily grew stronger, his confidence in the conventional methods used to help them, as steadily waned. He says,—

"In the beginning of my ministry the method was plain, the desire only moderately strong; now the desire is so strong as to be overwhelming, but the method is less clear, and I confess that, at times, I have no theory as to what it is at all. There has been an ever-increasing obscurity of conception regarding the task before me. It is perpetually shaping itself differently to different men. Once the evangelistic method claimed attention; then great missionary enterprises; then came the study of sociology, and then the doing of institutional church work. To what does all this lead? It is at this point that my doubt takes its deepest plunge."

Such a confession makes it clear that this brother's retirement was wise and altogether creditable to him, for he who is in a state of uncertainty as to the practical value of his Christian endeavor can but lose heart, and especially if sincerity is a marked element in his character. The fulfilment of conventional requirements will constantly place such an one in what seems to him a false position, and the end must inevitably be self-contempt and rebellion.

That doubt means the death of effectiveness in any line of religious activity would be witnessed to by thousands of earnest ministers everywhere, and this fact was recognized by our Lord, when he urged his disciples to "have faith in God," and added, whosoever "shall not doubt in his heart, but shall believe that those things which he saith shall come to pass; he shall have whatsoever he saith." It was to remove the doubt of the slow-of-heart Thomas, that he was suffered both to see and to feel the mark of the cruel spear, and it was to remove this interdiction of spiritual advance and usefulness for all his followers, that he constantly called attention to his own works of demonstration over physical want and woe. Chiding his students at one time, he said, "Do ye not understand, neither remember the five loaves and the five thousand, and how many baskets ye took up?" Thus by both word and work he constantly emphasized the importance of the ever-repeated demonstra-

Digitized by Google

tion of truth as an indispensable aid to our unquestioning and tenacious hold upon truth.

If the students of Christian Science are giving evidence that they have attained to a more calm, continuous, and joy-bringing faith, it is certainly the direct result of their awakening to the teaching of the Master, that theory cannot be convincing, if it be not inseparably attended by proofs of the truth of its propositions. The relation of healing to true preaching is not merely incidental, it is *vital* in the sense that it must follow. It is the invariable effect of Truth's reflection, and Christian Science is blessing Christian workers of every name, and the wide world over, by insisting that the practical demonstrations of Christian faith are the divinely appointed and only effective means of removing so-called Christian doubt. "The hour has struck when proof and demonstration, instead of opinion and dogma, are summoned to the support of Christianity, 'making wise the simple'" (Science and Health, p. 342). W.

Letters to our Leader.

Manchester, Eng., April 19, 1904.

Beloved Leader:—We, the undersigned, Building Committee of First Church of Christ, Scientist, Manchester, England,—your loving child and grandchildren (student and students' students) are gathered together on the eve of opening our new church edifice to express the gratitude and love we feel towards you, our dear Teacher and Guide, for having made such a demonstration possible to us.

We were constrained to take steps to build a church because, Christian Science being so little known here, it was found impossible to procure suitable premises in which to hold services. Therefore, although the oldest of us, with the exception of our Readers, had only known of Christian Science a year and a half, we commenced our search for a site on which to build.

For over a year we passed through deep waters of seeming failure and insurmountable obstacles. We toiled long and caught nothing. When, however, we recognized that these experiences were the result of having cast our net on the wrong side, and when we changed our methods, exercised "more faith in God and His spiritual means and methods, than in man and his material ways and means" (Miscellaneous Writings, p. 153), Love secured for us one of the most beautiful sites in Manchester.

Having learned a lesson in divine Love; namely, that humility, promptness of action, and untiring energy were the necessary qualities to carry through the demonstration,—only two days elapsed between completing the negotiations for the purchasing of this site, and the laying of the corner-stone! Surely it was a reward to have your faithful worker, Judge Ewing, with us on that occasion.

To-morrow, Wednesday, April 20, we open this little church with the usual testimony meeting, which will be one long psalm of gratitude and praise for this revelation that you have been the means of bringing to us.

This building stands in the old country to-day and forever, a tribute of love and gratitude to you for your selfless labor on our behalf; for this city is just beginning to realize and appreciate the great fact that your labor and your love includes all the world.

The building of this church has called forth spiritual qualities,—the sacrifice of material sense and self, and a greater sense of the unity of brotherhood,—all of which we know you will treasure more than any material structure. You have been so near to us throughout this work, and especially so in the hour of our joy and triumph. We all know you have prayed for us, and helped us, and it is our earnest prayer that we may always express in our lives the gratitude which we owe you for the new understanding you have given us, whereby we know that God is with us in all we do,—in our home, our business, and in every walk of our daily life.

Lovingly and gratefully yours,

VICTORIA MURRAY (*Chairman*).

JOSEPH DANIELS.
WM. ROYLE (*Clerk*).

---

468 West Peachtree Street, Atlanta, Ga.

My Beloved Leader:—This morning I have been sitting on the piazza reading aloud from the revised Science and Health to your dear old cousin, Mr. H. H. Smith, for many years editor of *The Atlanta Journal*. He has a wonderful memory, recites from the poets and from many languages with splendid understanding and ease. He is one of that fine old school of scholarly gentlemen to which Emerson, Lowell, and Longfellow belonged. More than this, he has a *great* love for spiritual things.

A lady of seventy-five, healed through Christian Science of twenty-three years' complete invalidism, called to see me yesterday. You should have seen your cousin's eyes when she told him that last summer she climbed Mount Deception and Mount Willard, in the White Mountains, and thought nothing of a six-mile walk for pleasure. He was so grateful to have my friends talk to him. We said, "You are Mrs. Eddy's cousin and we love you." And he said, "Dear Mary, how I would love to see her!" It was an experience for the dear man to hear my friend of seventy-five talk; and it is an experience for him to hear me declare the truth of being. He seems to love the truth, and is hungry for it.

Mrs. Whiteside, with whom I was last year, is here with her daughter. It is a fine large place with many trees. Last night Mrs. Whiteside went to church with me for the first time. Through God's dear love, shown me in Christian Science, I was able to heal a dear friend of this family of nervous dyspepsia. Your cousin was in Texas last year while I was South, so this is the first chance I have had to meet him. He has one of the most beautiful smiles, and a gentle manner.

Your loving child,

GERTRUDE SMITH.

Berlin, Germany.

Beloved Leader:—This Easter day would not be complete without a word of love and gratitude to you. In the past seven years each day has brought to me a clearer sense of what you are doing for the world; but with this Easter-time has come a higher understanding than ever before. Good Friday is a day of mourning in the German churches. They are draped in black, and the people are all clad in mourning garments. The old German word for the service is *Wehklage*, which means lamentation. It is the greatest church day of the year.

We have our English testimonial meeting on Friday, as the German meeting is on Wednesday evening; and on this Friday the subject that seemed to utter itself spontaneously in all the talk was joy. And as I thought of the sable forms and sorrowing faces in the other churches throughout this great city, and gazed on the joyful countenances in our congregation, and heard the ringing tones of those who told of their thanksgiving to God and to you for the good that had come into their lives, my heart went out to you, toiling alone, with unutterable love. The way has been lonely and hard, but oh, what a wondrous reward is yours, to have revealed to mankind for all time that that which to mortal sense was so dark a tragedy on Golgotha, was in reality but

Digitized by Google

an opportunity for the demonstration that the Son of man is indeed the Son of God.

Our Easter services were the most beautiful we have ever had, both the German and English. How it would gladden your heart to hear these services in the German tongue, and to see the love of these dear people for you who have brought the truth to them. The world is ringing to-day with songs of praise for him who died for all, and the time is not far distant when all will join in pæans of praise to them who live for all.

My greatest joy is that I am permitted to be a worker in this great Cause, even in a humble way; to march under your banner and to yield loving obedience to your commands.

As I write I see in memory that dear tower window, with your lamp shining through; and I catch a faint glimpse of the joy that is yours, in the consciousness that your love has raised mankind from the grave of hopeless materialism to the knowledge of God and His Son, which is eternal Life.

Lovingly, gratefully your disciple,

FRANCES THURBER SEAL.

April 3, 1904.

Philadelphia, April 26, 1904.

Rev. Mary Baker G. Eddy, Pleasant View, Concord, N. H.

Beloved Leader:—Many times of late I have wanted to write you a letter, but knowing the value of your moments I have refrained from claiming any one of them. Philadelphia has had so many blessings within the past few months that it seems as if the favor of God were at last won for our beloved city, and His smile were constantly upon us.

Judge Hanna's lecture of two weeks ago was a most happy and profitable occasion. The gentleman who introduced him is Judge William B. Hanna, who for many years has been the President Judge of the Orphans' Court, and also President of the Trustees of Hahnemann Medical College. The lecture was held in the auditorium of the Presbyterian Board of Publication, the most conservatively managed hall in the city. Many clergymen were present, and the attendance was so large that hundreds of people were turned away unable to get in. A beautifully furnished suite of offices, located in the center of the city, has recently been opened as a reading room and for the sale of your books and other Christian Science literature. In addition to the many other blessings, steps are being taken to provide our congregation with a beautiful church edifice. Within the past few months I have placed several thousand copies of Christian Science articles in the hands of ministers and others in this vicinity.

May I be permitted to thank you for the new by-law regarding outside organizations. It supplies a need and will prove a safeguard to our beloved Cause. The temptation to try and "climb up some other way" is so subtle that many times even the faithful ones are misled. Time and again your wisdom as a Leader has been shown in pointing out the snares and pitfalls, and now again you have given us a proof of your watchfulness and care.

In closing this rather lengthy epistle I want to pledge anew my earnest faith in God and His Cause, to give expression once more to the gratitude which fills my every hour for the countless blessings which your priceless teaching and example have given me.

My earnest prayer is that my understanding and application of the truth may be sufficient to meet each day's needs, that I may be enabled to heal the sick and bind up the broken-hearted, so many of whom in this old Quaker City are feeling for the first time the awakening touch of Truth.

Mrs. Miller is with me in all I have said and joins me in sending unbounded love and affection.

Your earnest follower,

ALBERT E. MILLER.

Testimonies of Healing.

I had been a minister of the Gospel for thirty years and was one of that type who think they have all of the Gospel. My wife had been an invalid for ten years and we had the services of the best medical skill at our command, but she continually grew worse. I had for the last three or four years given up preaching and had gone into the mercantile business in a little village ten miles from the railroad. I built my dwelling near the store so that I could reach my wife at a moment's call. Her physician had prescribed the lightest food, of which she ate barely enough to keep an infant in health, and any violation of this law caused such terrible suffering that she was reduced in weight from one hundred and ten, to eighty-seven pounds. The doctors said that she had a complication of four or five different diseases, and she had to take as many different medicines every day of her life.

While we were having those dark days of struggle between life and death, there was a very hotly contested congressional race going on in our county. Among other announcements for speakers at our place was one for Hon. —— of Dallas, Texas. He had lost his way and it was very late when he arrived and he did not make any arrangements for a place to stop for the night. The speaking closed about midnight, and when nearly all the people had departed I learned that the stranger had no place to spend the night. Seeing his condition, I told him that my wife was an invalid in bed, but that if he would accept, I would do the best I could for him. He accepted the invitation thankfully. Here was fulfilled the admonition of Paul in Hebrews, 13 : 2. Verily a messenger of Love had been sent to us and we knew it not. The next morning I told the stranger to make himself at home either at the store or at the house, as I had to go about my business. He remained at the house and after some conversation with my wife, remarked to her that she seemed to be in very poor health. She replied that she was, and that she often wished that she were dead, as she was no pleasure to herself or to those around her, that she had nothing but suffering day and night, and that she had no hope of relief, as all means had failed. Without saying anything he went to his hand-bag and took out a paper, wrote his address on it, and handed it to her, saying, "Read this; I hope it will prove as great a blessing to you as it has been to me and mine." He added, "I am a Christian Scientist, and have no patience with any religion that does not teach the healing of the sick." He said afterwards that his wife had placed that *Sentinel* in his grip for him to read while away from home. God bless that wife, for that *Sentinel* was the means, through divine Love, of bringing to our home the true knowledge of God with all the blessings of peace, joy, love, and health.

My wife read the testimonies with great interest, and they brought to her a beam of hope, as she knew that God is no respecter of persons. As she was so weak and nervous she secured the services of a lady friend to write to the stranger for more literature, which he had offered to send her if she should desire it. When she had read the *Sentinels, Journals*, and tracts which he sent her, a new hope and courage filled her heart and she saw that there was yet a chance for life. She wrote again to know the cost of treatment, and when she learned that it was five dollars per week she came to me for the money. And now comes the saddest part of it all. I refused to give her the money and said, "O pshaw! I believe God will hear prayer, but that He will hear mine just as readily as he will theirs. It is all foolishness, but if they will guarantee a cure I will pay them two hundred dollars." This I said more as a bluff than anything else, but I was like Paul, I did it ignorantly.

My wife wrote that she would like to have the treatment but that she could not get the money, as her husband had no

Digitized by Google

confidence in it. He then replied that he was not a regular practitioner, but that he had relieved some people and that inasmuch as she had shown him kindness he would do what he could for her. She accepted the offer, and in less than two weeks I heard the hum of a busy housewife as she went about her daily duties. All catarrh of the stomach, all indigestion, all constipation, all insomnia, all sick headache, which she was accustomed to have two or three days each week, all kidney trouble, and nervous prostration had fled into their native nothingness. Instead of the sad story of the day's suffering which I had heard for so long at night, I would return to hear the song of a happy wife.

Up to this time I had been simply a spectator watching the developments with keen interest. My wife's helper had advised her to get a copy of "Science and Health with Key to the Scriptures" by Mary Baker G. Eddy, which she had done with her own little savings. About two weeks after she had received this book, seeing the marked improvement, I became curious to know how it had come about. On a Sunday morning I thought I would get the book and see what I could learn about it. I fully decided that if I would learn any truth I must begin at the beginning and not read as a critic. I read the preface and thought that was pretty good. This brought me to the chapter on "Prayer." When I began to read this wonderful lesson my sense began to rise higher and higher. All this time I was exclaiming, "This is the truth." So on I went until every page was read. I accepted the teaching at once and began to spread the good news. A few demonstrations caused our church to withdraw her fellowship from us, and we were left alone in the world with the Bible, Science and Health, and the other Christian Science literature as our only guide for a year. We are now in Dallas, Texas, and are members of First Church of Christ, Scientist, of that place. We have had many wonderful demonstrations of the allness of God and the truthfulness of Christian Science as taught by our Leader, Mrs. Eddy, to whom we owe everlasting gratitude.

C. C. ECHOLS, Dallas, Tex.

When I was a little girl, I was taught to say "Thank you," whenever anybody did me a kindness. For a long time now I have wanted to say "Thank you" to the faithful *Sentinel* and *Journal* whose visits mean so much to us all, bringing as they do, from all over the world, words that test and teach and inspire. I am very grateful to them both.

It was one day in November, 1897, that my feet turned carelessly into a new path. It looked like a very narrow and unimportant little path that day, marked only by a guide-post that read "Physical Healing," but ever since, it has grown wider and wider, until now I know that it is nothing less than the way to Truth and Life. I had no thought of any change coming to my petted opinions and convictions, which seemed to me very fixed and fine, but on the second day of treatment the practitioner gave me the illustration of the mirror as it is given in the chapter on the "Science of Being" in our text-book, and I do not believe that I have ever doubted from that moment that Christian Science is the one true thing in all the world, although many things have come very slowly to my consciousness, and the kind patience of my teacher has had much to do for me. On the third day of treatment I took off the glasses that I had worn for a long time, and the rest has followed, easily and quickly when I have been faithful, slowly and with many pangs when I have forgotten my royal descent as daughter of the King. For all the way that God has guided and guarded and kept me, I thank Him. For the loyal, true teaching that I have had, for our text-book and the other books that Mrs. Eddy has given us, for the *Sentinel* and *Journal*, for our dear church here in Concord, for the massive gray walls of the new church building soon to be our home, and for the happy, holy work that lies hidden in the years to come, I thank Him again. For her, through whose translucent thought it has all become possible, even the dawning of "the day of his coming," I thank Him again and yet again.

About a year ago I had an experience that was a great help to me, showing, as it did very clearly, that the root of all suffering is indeed "a false sense mentally entertained, not resisted" (Science and Health, p. 411). One Saturday morning, as I was busy about my work, I suddenly thought of a pot of beans that was baking in the oven of my very hot stove. I went to see if they needed any attention, and in my haste took the hot handle of the bean-pot in my bare hand. I seemed to see what I was about to do before I fairly touched the burning surface, only not quite in time to avoid it, so that the thought of protection, of "being covered," was ready almost in the instant of my need. I do not think it was three minutes before every sense of burning, of redness, of blistering, had disappeared. That was good so far, and proved to me that "God is . . . a very present help in trouble" now, as truly as in the days of the three Hebrews in the fiery furnace, "upon whose bodies the fire had no power." But then I made a mistake. Instead of giving God the glory, and letting it all slip away like the dream it was, I kept rolling it over and over in my thought,—how wonderful it was, how burned I might have been, how hot that bean-pot was,—until presently, in perhaps a half hour, my hand began to smart and burn, and pretty soon I had a *bona fide* burned hand, as far as my senses could see, red, smarting, and showing signs of blisters. That time it took a good deal longer to wipe it out, and it wasn't satisfactorily done even then. If I had doubted before that "the cause of disease obtains in the mortal human mind" (Science and Health, p. 174), I could never doubt again. It showed me, too, that it is as wrong to remember evil as real in the past, as it is to believe it real in the present, or to dread it as real in the future, since God is the same yesterday, to-day, and forever, and the eternal Christ forever His image and likeness.

It all helped me very much, and so I send it on to help somebody else.—CYRENE EMERY, Concord, N. H.

The sense of love and joy that came to me as I caught the first ray of light in Christian Science will never be forgotten. It came while reading an old copy of *The Christian Science Journal*, and was from an article written by our loved Leader, Mrs. Eddy. It can now be found in "Miscellaneous Writings" under the heading of "Mental Practice," page 219.

I was healed in two treatments of dyspepsia of many years' standing, but this was only a beginning in my case; there was a greater work to be done for me, which required much love and patience on the practitioner's part. I seemed to have so much fear of a return of the dreaded dyspepsia that other ailments were in part forgotten for the time. I was suffering from a complication of dyspepsia, consumption, hip disease, and headaches. I began to eat anything I wanted from the first, and was waiting for nature to help me in my more grievous troubles. We had employed many doctors, and as many different treatments had been taken. Each time I had been told that if the stomach trouble could be overcome nature would build me up in my other troubles.

I finally got tired waiting for nature, and called for help to overcome a chronic condition of hip disease. I had hardly expected to get entirely rid of this, as the trouble began internally and was caused by jumping from the front of a buggy and holding a fractious horse by the bit. The horse lifted me up from the ground three times, and in my excitement I did not realize how badly I was hurt, until a disease of the hip developed, and twelve years of great suffering followed.

I had been taken to Albany, N. Y., for help, but found

Digitized by Google

none; and was advised by a brother-in-law, who was a practising physician in that place, not to allow an operation, as I was not strong enough to stand it. On account of these conditions I was not much disappointed because the hip trouble did not disappear under Christian Science treatment immediately, but was greatly surprised to have consumption disappear in less than forty-eight hours.

I was taken with hoarseness so I could not speak above a whisper, but not feeling sick in the least, prepared to take a journey of one hundred and sixty miles to spend the holidays with friends. We reached our destination in the evening, and found our friends full of sympathy. They advised my going to bed, which I did. I was wakened in the night by a choking sensation which caused me to cough up large quantities of a disagreeable substance. My voice was clear in the morning and all appearance of lung trouble had disappeared.

The hip trouble, however, still remained. It was then that I began to understand there was a work for me to do. My practitioner told me I should read Science and Health more, and write her, as she lived over two hundred miles away. I became worse and my husband wrote to her to come as quickly as possible, as I could not last much longer without help. He said, "I have prepared her medicine and her battery, but she will take neither, nor will she let me call a doctor." The reply that came back to him was, "Her faith has made her whole, and she is beginning to learn that God is her Life and her healer." She then sent a loved student who lived near us to quiet my husband's fear, as she could not leave home at the time. In a few days carious bone appeared at the three running sores on my hip, which the doctors had failed to remove, and it came away in a mass resembling sawdust. Thus again was Truth victorious. I was also healed of sick headache from which I had suffered since my childhood.

Not half has been told in this statement, and there is not a day I do not thank God for all the blessings which have come to me through the author of Science and Health, Mary Baker Eddy; also my loving teacher and all those who have tried to help me in this good work. There is no mail comes into our home that I am so glad to see as the dear *Sentinel* and the *Journal*.

MARGARET T. CALKINS, Rockford, Ill.

I am very thankful for my knowledge of Christian Science. Before I knew of this new, yet old, truth I was continually taking medicine and continually losing time from business, and previously from school, on account of sickness.

I cannot remember a winter during which I was not in bed for from one to four weeks with what the doctors called tonsilitis. Soon after becoming interested in Science, the usual seige commenced; this time I called for help from a Christian Scientist, had two treatments, and got up well. That was six years ago, and I have had no return of that trouble.

I was also healed of indigestion which was very troublesome, and for which I was taking medicine and dieting under a doctor's orders. I had hay fever every year and chronic catarrh, the latter producing severe headaches, for which I had tried patent medicines, physicians, and even had the passages in my head forced open, but without any lasting benefit. Of all these ailments and many more which might seem small, I am now entirely free, and all through Christian Science. I have been for three years in the business I am at present engaged in, without losing a single day on account of illness. While I am grateful for all this, to me the greater blessing is my better understanding of my relation to God and to my brother man, which I have learned through the teaching of Science and Health.

I was formerly a member of an orthodox church and enjoyed it, but the spiritual part did not satisfy. I can see now that I wanted Truth. I can remember one night shortly before hearing of Christian Science, of making a vow that I would not pray again until I knew what I was praying for and to whom I was praying. I then came to the conclusion that it had been superstition on my part, and that my prayers were not answered. When I forgot to pray, which I frequently did, I seemed to get along just as well. I now feel that this was my first real prayer. I was beginning to think. Science and Health says, page 1, "Desire is prayer," and I am sure I did desire then to know Truth. That prayer was answered, for in a few days or weeks Christian Science was presented to me and I felt almost immediately that I had found light. Since then I have known that my prayers were answered, and I would not care to try to get along without praying. Jesus' words, "The kingdom of God is within you," and "Pray without ceasing," are explained to me.

The privilege of receiving class instruction from one of Mrs. Eddy's students has been of untold benefit to me. I have received so much in the last six years that I feel I can never be grateful enough to Mrs. Eddy for Science and Health and all her patient work for us; to my teacher for her careful instruction, and to all the kind Scientists who so lovingly helped to show me the way in my first steps.—EDWIN MARQUAND, Mt. Vernon, N. Y.

It is with sincere gratitude for the many blessings Christian Science has brought me, that I give this testimony. I first heard of Christian Science about fifteen years ago. A friend of mine was taking treatment for physical troubles, and was reading the text-book of Christian Science, "Science and Health with Key to the Scriptures." The title of the book appealed to me very strongly. I said to my friend, "If that is a Key to the Scriptures, I must have it."

I had long been a member of a Bible class in an orthodox Sabbath school, but I never felt satisfied with that which was taught; there was something lacking, I did not understand then what it was. I purchased a copy of Science and Health and began to study it. I wish I could express in words what that book brought me. It illumined the Bible with a glorious light and I began to understand some of the Master's sayings, and tried to apply them.

I had had a longing to live a better Christian life for many years, and often wondered why I failed so utterly to understand the Bible. Now I knew; it was lack of spiritual apprehension.

I did not know at first that people were healed of disease and sin by simply reading Science and Health, but found after a while that such was the case. At that time I had many physical troubles, and one after another of these ills simply disappeared and I found that I had no diseases,—I was perfectly free. The spiritual uplifting was glorious too, and as I go on in the study of this blessed Science, I find I am gaining surely an understanding that helps me to overcome both sin and disease in myself and in others. My faith in good is increased and I know I am losing my belief in evil as a power equal to good. The pathway is not wearisome, because each victory over self gives stronger faith and a more earnest desire to press on.

I am deeply grateful to God and to Mrs. Eddy, our beloved Leader, and to my teacher also, who has so patiently and lovingly pointed the way as taught in Science and Health.—EMMA J. ROWLAND, Toledo, O.

I first heard of Christian Science through the healing of a dear friend of spinal and hip disease. The proof was very great, but I was not willing to accept it at once, although greatly in need, both mentally and physically.

After being with this friend, and another who was earnestly seeking, for several months one summer, I returned home with the thought, "Well, they have the same dear old

Digitized by Google

Bible that we have in the orthodox church, why can't I find this healing which is doing so much for them without accepting the other book,—Science and Health?

The result was that after trying in my way, without the pure confidence and trust that alone satisfieth, I was confined to my room for three months.

The doctor, pastor, and friends were tender and kind, and a loving Christian Scientist, a relative, called almost daily with words of cheer, and although we are learning that it is not absolutely necessary to suffer to learn our lessons, I am grateful for the experience of those three months, for they taught me much. After accepting the sweetness of healing through Christian Science, I was able to say to a pastor in answer to his question, "Didn't you find any good in the orthodox church?" "Yes; I was taught much of God, and now I am learning clearly how to put it into practice."

During the ten years since I first read and accepted the light through our text-book, I have been gaining a glimpse of the meaning of the word gratitude and the rejoicing that goes hand in hand with it,—gratitude for the unfolding of the true light that heals and saves, as Jesus taught, and the uplifting that comes as one is enabled to tell others that God's love is universal,—grateful for every step, though sometimes slow and rugged. I am grateful for class teaching, and in this hour, when so much is given us through the *Quarterly, Sentinel,* and *Journal,* the Concordance, the new Manual, the Board of Lectureship, the Publication Committees, we see the steady, dignified, growth of our Cause, we know that through the loving, steadfast, unselfish work of one who heard and obeyed God's voice in this age, all this has been made possible.

MAY BURNS JOHN, Wilmington, Del.

Twelve years ago I was obliged to undergo five surgical operations for a severe and aggravated case of fistula, causing me intense pain and loss of much time from business. At the time I was told that the trouble would probably return, for it was hereditary. True to the man-made law, the difficulty returned one year ago, and, after bearing the suffering as long as I could, I concluded my only relief was to be found in the hospital. However, in my extremity, having little faith in *materia medica,* my thought was directed to Christian Science, and I decided to give it a test, resolving that if I were healed in a reasonable length of time, I would accept the healing as a voice from God and endeavor to be led by the result.

How well I remember the struggle I had with error before I went for a treatment; in fact, I went by the building several times. Finally, realizing that I was not following out my resolve, and not giving God the opportunity to prove His love, I turned about and went in to what proved to be a haven of rest; for no sooner did I breathe the atmosphere of the Christian Science Reading Room than I felt better.

My prayer, after meeting my practitioner, was, "O God, I desire to be led by this truth; heal me, and I will try to prove my gratitude, and willingly seek to do Thy will."

In three treatments I was entirely healed, and the joy and love that came into my heart words cannot express. My gratitude goes out to God and to the practitioner who so clearly reflected divine Love, and also to our Leader, Mrs. Eddy, for her revelation to the world. How much those words of hers mean to me: "Divine Love always has met, and always will meet, every human need" (Science and Health, p. 494). I had always been subject to severe headaches, but Christian Science has obliterated this false dream. Although but children in Christian Science, my wife and I have been made very happy since coming into the truth. We have met many ailments and demonstrated over them successfully.

Every day brings reward,—blessed experiences,—which is to me proof that God is Love, and that nothing but this Love could accomplish the wonderful healing with which I am blessed.

I am now a member of First Church of Christ, Scientist, of this city, and thank God it is my privilege to testify for Truth.—CHARLES A. RYDER, New York, N. Y.

Christian Science healed me after everything else had failed. For years I had been a hothouse plant, requiring constant and tender care. I was never free from pain, and was often confined to bed. In addition to the physical difficulties, I had settled into a condition of melancholia. I had every kind of treatment,—medical, surgical, and the so-called rest-cure; and my latter state was worse than the first.

I then turned to Christian Science, and though the healing was seemingly slow and my faith often put to severe tests, "I know whom I have believed."

I am to-day a working Christian Scientist, and I realize more and more that "Whatever it is your duty to do, can be done without harm to yourself" (Science and Health, p. 385). I am striving daily, hourly, to make my life an expression of gratitude to our dear Leader.

MRS. ELIZABETH T. BELL, Charleston, S. C.

As I dwell on the many blessings that have come to me through Christian Science, my heart o'erflows with love and gratitude to Mrs. Eddy, to my dear teacher, and the many friends who are helping me in my journey out of the land of Egypt. The Christian Science publications are doing their share in this work too, and I thank God for the conscientious, earnest workers in the Field.

Christian Science has brought me out of a labyrinth of human want and woe into joy and peace. It has established harmony in our home, healed me of daily suffering of over ten years' standing, and saved me from a dangerous operation. Every day brings demonstrations of the power of Truth. What a blessing to know that God is with us always and to realize that in Him we do "live, and move, and have our being." My daily prayer is to grow out of all selfishness into the knowledge and power of Christ Jesus our Lord.—N. B. S., Kansas City, Mo.

I wish to give my testimony for all that Christian Science has done for me. I did not seek it for the physical healing, although I had much to overcome. While reading Science and Health, to my surprise, I was healed of sick headache which I had from childhood, and have had no return of it. This was nine years ago, and many other troubles were also healed. I left off glasses that I had worn for years. I can do all my sewing, reading, and writing without them, through the understanding of Truth, and am able to help myself and others, for which I am very grateful.

I united with the Christian Science Church five years ago and have had the privilege of class instruction from one of our Leader's students. I also belong to the Mother Church. I thank God for revealing this blessed truth to our dear Leader, Mrs. Eddy, for all mankind.

M. P. MAGUIRE, Brooklyn, N. Y.

NOTICE.—Applications for membership in the Mother Church must be in the hands of the Clerk on or before May 20, 1904.

An application sent to the Clerk of the Church does not constitute the applicant a member until he is elected to membership by the Christian Science Board of Directors, at which time notice of election will be sent.

CLERK OF THE MOTHER CHURCH.—Correspondence relating to membership with the Mother Church and requests for blank applications for membership, should be addressed to WILLIAM B. JOHNSON, C.S.D., Clerk, 239 Huntington Avenue, Room 8, Boston, Mass.

From our Exchanges.

The real environment, the mighty forces that play upon life and mould character, are spiritual; and this is where we have power over our environment.

Because it is spiritual we can open mind and heart to it, or we can shut the door against it. We can submit to what is evil in our environment, or we can shun it. We can also, to some extent, select the forces that act upon us. If we wilfully submit ourselves to the influence of the lower, if we choose to associate with what impoverishes true life, if we let evil intercourse do its corrupting work on us, it will pervade and pollute all life. We may think that we can play with evil influences, enter their company when it suits us and leave it as we entered; . . . but we are deceiving ourselves.—*The Standard.*

It is a mistake to assume that a change in theology is a change in religion. Changes in theology may sympathetically effect changes in religion, but quite marked changes in theology may lead to only slight changes in religion. Theology is a mental concept, and religion is the obedience of the heart and will to God. The demand for a reasonable religion is frequently made, which clearly is a demand for a religion of the reason, a religion level to the reason, and that seems to be equivalent to a logical theology. Religion and a system of religion are quite distinguishable. A system of religion is creedal, while religion is experimental. Theological unrest must be distinguished from religious unrest, and opposition to theology as taught must not be accounted as essentially irreligiousness. The best and most Christian of men reject a considerable part of the theology of a few generations ago.—*The Examiner.*

Fifteen years ago Canon Wilberforce, the new canon of Westminster, wrote a letter to a friend, which is now given in a London publication. In this letter he says,—

"My ailment leading surgeons declared incurable, except by a severe operation, which they said I could not bear. While trying at the seaside to gain strength for the operation, the passage, James, 5 : 15, was impressed upon me with indescribable force. I resisted it and reasoned with myself against it for two months. I even came up to London for the operation, but the spiritual pressure increased until at last I sent for elders, men of God, full of faith, by whom I was prayed over and anointed, and in a few weeks the internal ailment passed entirely away. 'This is the Lord's doing, and it is marvelous in mine eyes.'"

Hartford (Conn.) *Times.*

Assaulting the man who speaks the truth is not answer to the truth. The Church might learn this to advantage. A divinely founded and endowed Church has nothing to fear and everything to hope from an examination of its claims. A Christian who violates the Christian rule of charity in judging his fellows does more harm to religion with honest and impartial minds than all the declamation of infidelity, however loud or however eloquent.

The Christian Advocate.

A genius, a spirit, an atmosphere exhales from the Bible, and one does not know the Book until his own inner life responds to and appropriates this subtile influence. . . .

We have much to learn in learning how to understand the Bible. Words at their best and highest are only symbols, and they bring no vital message until spiritual insight penetrates beneath the symbol to the spiritual reality for which it stands.—*The Watchman.*

Every good life is a veritable inspiration. It tells of the triumph of the spiritual and the living over the natural and the dead. Real character belongs only to him that overcometh.—*The New Church Messenger.*

THE CHRISTIAN SCIENCE TEXT-BOOK.—Science and Health with Key to the Scriptures with latest revisions and additions, and numbered lines. 700 pages.

For description, price, and other information, see last page of cover.

THE NEW CONCORDANCE.—A complete Concordance to Science and Health with Key to the Scriptures. This work has been compiled from the late revised edition of SCIENCE AND HEALTH, and contains eighty thousand references (more than ten thousand words being indexed). It also contains an index to the Marginal Headings, and a list of the Scriptural Quotations in SCIENCE AND HEALTH. 595 pages, 10x7, bound in cloth, marbled edges. Price, prepaid, single copy, $5. Twelve or more to one address, $4.50 each.

CHURCH MANUAL.—Containing the By-Laws of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass. This does not include the list of members. Price, prepaid, $1 per copy; $5 per half dozen; $9 per dozen.

Address all orders for books named above to JOSEPH ARMSTRONG, 250 Huntington Avenue, Boston, Mass.

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—the Mother Church,—printed on folded sheet for the use of branch churches of Christ, Scientist, with space for the names of churches and their by-laws, can be had at one dollar per hundred.

Not less than one hundred are sold. Postage stamps are not taken for payment.

All orders should be sent to WILLIAM B. JOHNSON, C.S.D., 239 Huntington Avenue, Room 8, Boston, Mass.

BUILDING FUND OF THE MOTHER CHURCH.—Contributions to the Building Fund of the Mother Church should be collected by Branch Churches and Societies and forwarded by them to the Treasurer, who will receipt to the churches and societies for amounts sent. Each Branch Church and Society should keep a list of its own contributors. When not convenient or desirable to send as above, individual contributions may be sent direct to the Treasurer.

STEPHEN A. CHASE, Treasurer of the Building Fund.
Box 56, Fall River, Mass.

CHURCH TREASURER.—Per capita taxes and contributions to the Mother Church, The First Church of Christ, Scientist, in Boston, Mass., should be sent to STEPHEN A. CHASE, Treasurer, Box 56, Fall River, Mass. Please do not send currency.

A Word from Mr. Chase.

Per capita taxes, contributions to the Mother Church, or contributions to the Building Fund, should be sent by check, post-office money order, or express money order.

Do not send currency. If currency is sent it will be at the sender's risk.

All persons who have sent remittances to the Treasurer of the Mother Church since June 1, 1902, either to pay their per capita taxes, for contributions to the Mother Church, or to the Building Fund, and who have not received a receipt therefor, are requested to notify the Treasurer of the date and amount of the remittance, and the form in which it was sent, whether in currency, check, or money order.

Receipts will be sent promptly as remittances are received. If you fail to receive a receipt within a reasonable time, notify the Treasurer.

Please write your name plainly. Always give street and number or number of post-office box.

STEPHEN A. CHASE, *Treasurer.*
Box 56, Fall River, Mass.

THE CHRISTIAN SCIENCE JOURNAL

FOUNDED IN APRIL, 1883, BY THE AUTHOR OF "SCIENCE AND HEALTH WITH KEY TO THE SCRIPTURES," REV. MARY BAKER G. EDDY, DISCOVERER AND FOUNDER OF CHRISTIAN SCIENCE

This monthly Magazine is the official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, and correctly represents the Christian Science movement. It contains interesting discussions of the teaching and the practice of Christian Science, and in addition to dissertations, lectures, and contributed articles, publishes always a number of reports from cases of spiritual and physical healing, which practically illustrate the redemptive work of Christian Science.

Terms of Subscription: Payable in advance, postage free, to any part of the United States, Canada, or Mexico, Two Dollars per annum; One Dollar for six months; Single Copies, Twenty Cents; Foreign Subscription, $2.40 per annum; $1.20 for six months.

The Christian Science Quarterly

Published January, April, July, and October

Contains the Lesson-Sermons which are read at the Sunday Services throughout the year in all the Christian Science Churches. These lessons, which present citations from the Bible and "Science and Health with Key to the Scriptures," are valuable for daily study.

Terms of Subscription: For one year, 50 cents; fifty copies or more to one address, 50 cents yearly for each copy. Foreign subscriptions, 60 cents. Yearly subscriptions only are received.

Terms of Sale: One or more copies, postage paid, each, 15 cents; fifty copies or more to one address, each, 12½ cents, postage paid.

Der Christian Science Herold

PUBLISHED MONTHLY

A magazine printed in German, which publishes original and translated articles bearing upon Christian Science, and also testimonies of healing from Germany and America. It contains about thirty-eight pages of such reading matter, and is valuable as an authorized representative of the movement, also the Lesson-Sermons which are read at the Sunday services in all the Christian Science churches.

Subscription Price: For the United States, Canada and Mexico, $1.00 in advance; all other countries, $1.25. Single copies, 10 cents, postpaid.

Supplements to the Sentinel

CHRISTIAN SCIENCE. The Religion of Jesus Christ. By the Hon. WILLIAM G. EWING of Chicago, Ill.

CHRISTIAN SCIENCE. Its Worth and Work. By Rev. ARTHUR R. VOSBURGH of Rochester, N. Y.

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago Ill.

CHRISTIAN SCIENCE. Is it Christian? By Mrs. SUE HARPER MIMS of Atlanta, Ga.

CHRISTIAN SCIENCE. Its Work and Scope. By CAROL NORTON of New York City.

CHRISTIAN SCIENCE. The True Idealism. By ANNIE M. KNOTT.

Price. Single copies, two cents each, postpaid; ten or more copies to one address, one cent each; one hundred copies, seventy-five cents; five hundred copies, $3.25; one thousand copies, $6.00. Orders for supplements may be assorted as desired.

German Supplements

CHRISTIAN SCIENCE. Its Promises and their Fulfilment. By EDWARD A. KIMBALL of Chicago, Ill.

CHRISTIAN SCIENCE. The Christianity of Christ. By Rev. IRVING C. TOMLINSON.

Morocco, limp, round corners, gilt edges, convenient for pocket, each, prepaid 4 00
Twelve or more to one address, each, prepaid 3 75

Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, each, prepaid 5 00
Twelve or more to one address, each, prepaid . . . 4 75

Orders for Miscellaneous Writings in lots of twelve or more to one address may include any or all the different styles of binding.

No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

CHRIST AND CHRISTMAS, an Illustrated Poem.
Single book, prepaid $3 00
Twelve or more books to one address, each, prepaid . 2 50

RUDIMENTAL DIVINE SCIENCE. An interesting and valuable book, containing a brief and concise statement of Divine Science, *alias* Christian Science, in the form of questions and answers. It is a very succinct statement of Christian Science. 35 pages. Leatherette covers, gilt top. Prices, prepaid, 37 cents; $3.00 per dozen.

UNITY OF GOOD. It lays the axe at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. The following are some of the topics treated: SEEDTIME AND HARVEST, DEEP THINGS OF GOD, THE EGO, DEATH, SAVIOUR'S MISSION, SUFFERING FROM OTHERS' THOUGHTS, CREDO, MATTER, SOUL. 80 pages, cloth covers. Prices, prepaid, 55 cents; $2.50 half dozen; $4.50 per dozen. Leather covers (pocket), $1.00 each; $5.00 half dozen; $9.00 per dozen.

RETROSPECTION AND INTROSPECTION. A biographical sketch of the author. The way she was led to the discovery of Christian Science; its growth and fundamental idea; 120 pages, cloth covers, gilt edges. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

PULPIT AND PRESS. A unique work of importance in the history and to the readers of Christian Science; containing Dedicatory Sermon delivered at the Mother Church, and scintillations from the press on that occasion; 132 pages. Prices, prepaid, $1.06; $5.00 half dozen; $9.00 per dozen.

NO AND YES. A brief statement of very important points in Christian Science. 56 pages. Pebbled cloth covers. Prices, prepaid, 27 cents; per dozen, $2.50.

CHRISTIAN SCIENCE *versus* **PANTHEISM.** The Pastor Emeritus' Message delivered at the Communion Season in the Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are Pantheists. Leatherette covers; 21 pages. Prices, prepaid, 26 cents; per dozen, $2.50.

MESSAGE TO THE MOTHER CHURCH. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1900. Deckle-edged. Prices, prepaid, 26 cents; per dozen, $2.50.

OUR LEADER'S MESSAGE. The Annual Message of the Rev. Mary Baker G. Eddy to the Mother Church on Communion Sunday, June, 1901. Deckled edges; 50 pages. Prices, prepaid, 50 cents; per dozen, $4.50.

COMMUNION MESSAGE, June, 1902. The Annual Message to the Mother Church on Communion Sunday, June 15, 1902, by the Pastor Emeritus, Rev. Mary Baker G. Eddy. Deckled edges. Prices, prepaid, 50 cents per copy; $4.50 per dozen.

CHURCH MANUAL. Containing the By-Laws of the Mother Church. Prices, prepaid, one copy, $1.00; six copies to one address, $5; twelve copies to one address, $9.

CHRISTIAN HEALING. A sermon delivered in Boston; 17 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

PEOPLE'S IDEA OF GOD. A sermon delivered in Boston; 14 pages. Paper covers. Prices, prepaid, 21 cents; $2.00 per dozen.

FEED MY SHEEP. Words by Mary Baker G. Eddy. Music by Lyman F. Brackett. Prices, prepaid, 50 cents per copy; $5.00 per dozen.

Direct all orders for above works, and make remittances payable to

SUBSCRIPTION PRICE:

Single copy, one year, one dollar.

Ten copies or more to one address, one year, each copy, ninety-five cents.

Twenty-five copies or more to one address, one year, each copy, ninety cents.

Fifty copies or more to one address, one year, each copy, eighty cents.

For Foreign subscriptions add, for postage, fifty cents per copy to rates given.

Six months' subscriptions received at half the above rates.

No subscription received for less than six months.

Subscriptions to the *Sentinel* will be entered to begin with the first of the month.

The date of expiration may be found on the address. No other notice will be given.

TERMS OF SALE:

Three cents a copy, postpaid, to any address; twenty-five copies, fifty cents; fifty copies, ninety cents; one hundred copies, $1.65.

Foreign: Four cents a copy, postpaid, to any address; twenty-five copies, seventy-five cents; fifty copies, $1.40; one hundred copies, $2.65.

Entered at the Boston, Mass., post-office as second-class mail matter.

Items of Interest.

National.

The monthly statement of the public debt shows that at the close of business April 30, 1904, the debt, less cash in the Treasury, amounted to $918,854,058. The debt is recapitulated as follows: Interest bearing debt, $895,157,440; debt on which interest has ceased since maturity, $2,347,480; debt bearing no interest, $392,268,326; total, $1,289,773,246. This amount does not include $979,999,869 in certificates and Treasury notes outstanding which are offset by an equal amount of cash in the Treasury held for their redemption.

The cash in the Treasury is classified as follows: Gold reserve fund, $150,000,000; trust funds, $950,490,069; general fund, $135,216,270; in national bank depositories, $162,729,006; in Philippine treasury, $5,971,495; total, $1,304,406,842, against which there are demand liabilities outstanding amounting to $1,033,487,653, which leaves a cash balance on hand of $370,919,108.

The United States Canal Commission on May 4 took formal possession of the canal route and of the property of the Panama Canal Company. William R. Russell, the retiring United States Minister to Panama (recently appointed United States Minister to Colombia); Secretary Lee of the United States Legation, and Dr. Pierce, superintendent of sanitation work, were among those present. The canal works will now be under the direction of Major Mark Brooke of the Engineer Corps of the United States Army, who represented the Canal Commission at the ceremony of the transfer. Immediately after the transfer the United States flag was hoisted over the legation and over the canal offices in the Cathedral Plaza.

General George W. Davis, the governor of the canal zone, left this week for Panama accompanied by a corps of American engineers to assume control of the canal property. For the present the work now in progress there by laborers employed by the French Company, of whom there are about seventeen hundred, will be continued.

At a recent meeting of the Columbian University trustees at Washington the name of the University was changed to the George Washington University. It will hereafter be continued as a memorial to George Washington. A new building to cost $250,000 will be erected at once on ground west of the State, War, and Navy Building by women who have prevailed upon the trustees to take this action. Further effort will be made to have Congress reimburse and appropriate to the University an amount of money equal to the value of a tract of land in the same neighborhood which was left by Washington for the establishment of such a University, but which has been pre-empted by Congress for other purposes.

United States Minister Powell, in a recent conference with President Morales of the Republic of Santo Domingo, assured him that the United States Government would not consent to any part of the San Domingo territory passing under any foreign control, that the future prosperity of the Republic would rest largely upon the keeping of all obligations with foreign creditors, on respecting the concessions of the government to foreigners, on developing the resources of the country, and on passing laws that ensure quiet to the land.

Another step toward a union of Harvard University and the Massachusetts Institute of Technology has been taken—this time by the Corporation of the Institute, which passed a vote authorizing its Executive Committee to look into the question of closer relations with Harvard.

It is reported that United States Minister Davidson is proceeding from Shanghai, where he has been detained because of the hostilities between Russia and Japan, to his post at Antung. Foreign papers comment upon this as the "beginning of the triumph of the open door policy."

The Boston Public Library last week celebrated its fiftieth anniversary.

Foreign.

It is reported that Emperor William has commissioned an agent in Venice to purchase for him there a large, old, historic palace, in which he intends to spend a few weeks each year. The palace is said to be full of art treasures.

Lord Curzon, of Kedleston, Viceroy of India, has sailed from Bombay for home. The city was decorated and large crowds gathered on the sea front to bid him farewell.

The Constitutional Convention of Venezuela has approved the new constitution, which gives the President a term of six years instead of four as formerly.

Antonin Dvorak, the composer, formerly director of the Conservatory of Music, New York, passed away at Prague, Bohemia, May 1.

It has been decided that King Alphonso of Spain will in the near future visit Paris, Berlin, and Vienna.

Industrial and Commercial.

The contracts for a sugar plant to be erected in Cuba by the Colonial Sugar Company have been let. The plant will have a capacity of five thousand tons of cane per day and will represent an expenditure of about five hundred thousand dollars. This company was organized in 1902 with a capital of three million dollars. It controls fifty-four plantations with about thirteen thousand acres under cultivation. There are about fifty miles of railroad on the estate.

In the little village of Shawmut, Maine, on the Kennebec River, millions of pie plates are made of wood pulp. The plates are being turned out at the rate of sixty thousand a day, and the capacity of the factory is to be increased. By a secret process the pulp is so treated that it is said to be rendered hard and non-inflammable, so that pies can be baked on the plates. The pulp is made of the waste of two sawmills in the village.

Paper made from the bagasse of sugar cane under the supervision of the Government has been manufactured. It is claimed that the paper made from this heretofore waste product can be used for almost anything for which paper is demanded.

Officials of the Canadian Pacific and the Steamship lines have decided, after careful investigation, to equip a large number of their steamships with apparatus for submarine signalling. The distinct advantage of the submarine signalling device is that by its agency the captain of a ship can ascertain his exact position, no matter what the weather conditions.

The cable steamer Stephan is paying out for the German-American Cable Company a duplicate line of cable from New York to the Azores. The portion from the Azores to Borkum on the North Sea has already been laid.

The steamship China, just in from the Orient, brought a shipment of Japanese gold worth $3,334,350 in United States gold coins.

France produced last year 2,827,000 metric tons of pig iron, which is an increase of 422,000 tons over 1902.

General.

Carroll D. Wright, United States Commissioner of Labor, in a recent speech in Philadelphia on "The Wage Question," is reported to have said:—

"The wage system will pass away. In its stead, I believe there will come a system which will be composed of profit-sharing and the coöperation of ideas. This great labor question means the struggle of humanity for a higher standard of life. The employer must consider his employe as well as the stockholder, as an investor."

Dr. Hans Goldschmidt of Essen, Germany, has invented a new compound made from proper proportions of aluminum and oxides of iron, to which he has given the name of thermit. This substance when ignited produces a heat as intense as that of the arc light and in a form easily available for the reduction of the pure metals, for welding large masses of iron *in situ*, and many other purposes.

The new railroad which is to encircle the island of Porto Rico is already in operation from Ponce to Yauco on the south, from Mayaguez to Aguadilla on the west, and from San Juan to Hatillo and Arecibo on the north. There is also a railroad from San Juan to Rio Piedras, with several stations in the summering country of the citizens of the city of San Juan.

An unused specimen of the 2d blue Mauritius "Post Office" stamp of the issue of 1847 has just been sold by auction in London for $7,250. It is rumored that the stamp was purchased for the Prince of Wales, who possesses a fine collection. A representative of the German Postal Museum at Berlin bid unsuccessfully for it. The stamp is one of the rarest known.

Two old masterpieces, a Corot and Diaz, have just been sold to a party in Cincinnati for approximately $110,000. The pictures which have changed hands are Corot's "Le Soir" for a price approximating $75,000, and the other, "Autumn Forest of Fontainebleau," for a price approximating $35,000.

The incorporation of the Massachusetts Zoölogical Society makes possible the establishment of a "Zoo" in Boston. It is purposed to locate the "Zoo" in the Stony Brook Reservation, which is under the supervision of the Metropolitan Park Commission.

Drew College, one of the pioneer educational institutions for women in the country, was destroyed by fire last week.

Russia has an area of 8,650,000 square miles—one-sixth of the land surface of the world.

CHRISTIAN SCIENCE SENTINEL

"What I say unto you, I say unto all, *WATCH.*" *Jesus.*

From our Contributors.

The Multiplication of Nothing.

W. C.

THE story is told of a millionaire's daughter, who said to her father, "If you will give me a cent to-day, and twice that amount to-morrow, and so continue to double the amount each day for a month, I will never ask you for any more allowance." Allowing thirty-one days for a month, a compliance with this request would have made the father indebted to his daughter to the amount of $10,737,418.24. This seems almost incredible at first thought, especially to one inexperienced in mathematics, but the working out of the problem can bring no other result, and with patience it can be proved almost as easily by a child as by an adult. To state to the average person, however, the enormous result of such a multiplication usually elicits an emphatic denial of its truth.

In much the same way the testimonies of Christian Scientists are first listened to with incredulity, but those who have patiently worked out the lesser problems, step by step, very soon perceive that the farther one advances the greater become the demonstrations and the more astonishing the results.

By way of suggestion, it will be a practical help for beginners in Science, and especially children, to work out the above example on paper, each for himself, so that he may see how small are the results for the first fifteen or twenty days, and then how, in the latter days of the month, the doubling of the amount, rapidly jumps up to the enormous sum named. When a beginner says, "See, I have multiplied two by two and the answer is four," the observer may laugh and say, "That's nothing, any one can do that," and thus too the doubter looks with ill concealed ridicule upon the demonstrations of the beginner in Christian Science, but as the continuance of the process of multiplying by two results in a surprising increase, so will persistence in the demonstration of Christian Science give the greater manifestation of the power of Truth.

Now suppose that instead of using the figure 1 we take 0—nothing—and pursue the same doubling process. What will be the outcome? Simply *nothing*. This presents the contrast and difference between reality and unreality. The multiplication of one means "greater works," while the exaggeration of the other means nothing more than that with which we began; and no matter what multiple is used, the answer will always be the same,—unreality, *nothing*.

An expert bookkeeper worked for several days endeavoring to locate an error in his trial balance, and finally discovered that an eyelash had fallen against a cipher while the ink was moist and had adhered to it in such a way as to make the figure 9. So long as he treated it as a nine the trial balance was incorrect, but when his finger chanced to displace the eyelash and the nine became a cipher and was treated as such, the error disappeared and the books balanced perfectly.

The illustration is of easy application. So long as error and disease are recognized and treated as something real, just so long it is possible to multiply and increase their apparent effects; but the moment their nothingness is discerned then their multiplication is seen to remain nothing. No apparent increase of error can possibly give truth, no multiplication of unreality can ever result in reality. How true this is respecting the false claims of heredity. The absurdity of the proposition that an error, nothing, is increased generation after generation, has not been apparent to us, and humanity has been working on the problem without discovering its woeful mistake. While the physician believes that a disease is real he can scarcely be blamed for fearing that its multiplication means a menace to posterity. If disease were real then heredity would indeed be a dreadful foe, but to vanquish this enemy we must locate the error as did the bookkeeper by taking away from the cipher everything that makes it seem to be something, then we will see that we can neither increase nor intensify it, and that it will ever remain just what it was in the beginning,—nothing. To realize this is to destroy the fear, the asserted power and hence the effects of heredity.

The Discoverer of Christian Science says, "The nothingness of nothing is plain; but it should be understood that error is nothing, and that its nothingness is not saved, but must be demonstrated, in order to prove the somethingness —yea, the allness—of Truth" (Science and Health, p. 346).

Let the beginner start with the simpler manifestations of Truth and repeat his lesser demonstrations, with full assurance that these repetitions will bring larger and larger results, and when tempted to be overwhelmed at the seeming increase of error, let him remember that the multiplication of error—nothing—can never make it *something*.

Ten Years After.

E. E. CHARPIOT.

TEN years ago I was a rank infidel, and had been one for twenty years. Ten years ago I was a slave to sickness and medicine, and had been one for twenty years. Ten years ago the Bible was for me a book full of contradictions and absurdities. After having been laid aside for many years this book has been given back to me by Christian Science, and it has become my best friend. Read in the light of this truth, it has become to me a new book, full of the love of God, rich in blessings, imparting a sweet sense of peace and hope. To the despondent it brings courage, to the weak it gives strength, to the sick in body and mind it brings the oil of gladness and the healing power of the Spirit. The sweet and gentle influence of infinite Love which pervades its sacred pages, has wrought in me a complete transformation, for whereas I was once an atheist, I am to-day a firm believer in the teachings of the Bible as interpreted in our text-book, Science and Health by Mrs. Eddy. The things of the world in which I once found great delight have become insipid and repellent. The evils in which the "old man" used to take pleasure, are now abhorred by the "new man," and he who once was a diseased and puny mortal, wrestling continually with sickness, pains, and aches, has

Copyright, 1904, by Mary Baker G. Eddy.

Digitized by Google

been so transformed by Christian Science that during the past ten years he has enjoyed health and happiness which had never before been his. He has been able to eat, and enjoy every one of the many articles of food which the physicians had forbidden and the stomach had rejected. Doctors and medicines have been to him as nonentities during these ten years, for he has had absolutely no need of either.

Who but one who has experienced all that I experienced can understand how I love the Science which has made me free and given me an ever-present God instead of a Deity so far away that He could neither hear nor heal. Christian Science has given me a God who sends no evil and no disease upon His children, and who needs not the help of death to give them eternal life. This Science has opened the prison door, has freed me from bondage and brought me "into the glorious liberty of the children of God."

Instead of the gloomy and dismal precincts of the grave as the final refuge and resting-place of infidelity, materialism, and atheism, Christian Science has opened wide the door of immortality, and to my awakened consciousness has come the realization that in Life, God, there can be no death. Since "in him we live, and move, and have our being," the second death, or end of materiality, can have no power over us. It cannot touch us; it cannot extinguish us, because man is the image and likeness of God, who is Spirit, "who only hath immortality."

In conversation and in correspondence with friends in the other churches, the old belief concerning the soul has often been brought up during the past ten years, and these friends would invariably oppose me when I asserted the immortality of man. With them, man is mortal, but the soul is immortal. Before becoming an infidel I belonged to an orthodox church, and I, too, believed in the mortality of an immortal soul, but the true meaning of the word Soul is made so plain in our text-book that no other interpretation of it can now seem true and satisfactory as a logical explanation of man and of his real being.

In the creative act God did not say, "Let us make soul," but *man* "in our image, after our likeness," and "God created man in his own image." If, therefore, man was created in the likeness of God, and if God is immortal, have we not an impregnable ground for maintaining the immortality of man? Paul says that man "is the image and glory of God," and he speaks of the "old man" which must be put off; why? because he is not the man of God's creating; and the "new man" must be put on, because he is the true man, made "after the image of Him that created him."

I have also found that another stumbling-block encountered by our friends is our claim that "Matter has no sensation" (Science and Health, p. 278). To refute this claim a friend once said, "How absurd! If I were to cut my finger I know I would feel it. Is not that sensation?" I answered, "Who, or what is it that feels? Who, or what is that *I* which speaks of cutting his finger and experiencing sensation? Is it the finger, bones, and blood or is it the mind that moves the finger?" "Oh, well," said he, "it is the mind, of course." Said I, "Very well, you admit precisely what Christian Science teaches; viz., that matter, as matter, and of itself, having no intelligence, cannot be sentient, cannot be conscious of any pain, and this 'proves sensation to be in the human mind, not in matter'" (Science and Health, p. 212).

My experience with our opponents during these ten years has shown me plainly that they only oppose their own misconceptions of Christian Science. After reading a few pages of our text-book and placing their own construction upon the meaning of detached sentences, they jump at erroneous conclusions, and ridicule the teachings of Christian Science with a zeal surpassed only by their ignorance of what this Science really is. But I have no right to condemn them, for I myself, before accepting Christian Science, did precisely what they now do,—I condemned Christian Science and pitied "those poor, deluded Scientists." Now, thank God, I rejoice in the fact that that which was once "last" has become "first," that which was "first" has become "last," and that in Christian Science I have found the perfect health and peace which no material means could give me; and above all I have found the true God, whom to know aright is life eternal.

"Ask, and ye shall receive."

JEANNETTE K. NORTON.

"LET us unite in silent prayer."

I wonder if these words, as they are used in the Christian Science service, ever fell upon the ear of a searcher for truth and light,—for a practical, comforting religion,—with the pulsating harmony with which they fell upon mine. It seemed like a benediction, the descent on the little congregation of the real "peace of God, which passeth all understanding," for all seemed so happy and cheerful.

I had come from a faithful service of many years, in an old line church. For a long time I had felt unsatisfied and had repeated creed and prayers without thinking much of their meaning, and with a longing for comfort, for some tangible support to lean upon in my daily life. That night I found it, and during the moments of silence my heart went out with love and gratitude to God. As the first beam of truth lighted my soul, it answered "not my will, but thine."

Nearly every one comes to Science because of some great cure, heard of or experienced. But I came in health and comparative comfort, in search of Truth and light, and I have found a cheeriness and a new strength that removes or lightens all obstacles in my daily path, a mental uplift that minimizes all annoyances and makes little ills disappear before it like dew before the sunshine. My home had always been filled with love and harmony, but now it seems richer, deeper, more holy, and it sheds its love beams beyond its own limits.

I have noticed that children come sweetly and naturally into Science, and it seems to solve many problems for them. The scientific understanding of Truth aids them in their school work, and harmonizes their play hours. It teaches them charity for one another, helpfulness, patience, and obedience to the law of right.

One of the great blessings for which the faithful Scientist longs and strives is the removal of fear from his daily life,—fear of sickness, death, poverty, accidents, or any other form of misfortune that is supposed to befall humanity, and which destroys peace of mind. How can persons ever expect to keep well, if they fill their minds constantly with thoughts and images of sickness and pain? How be prosperous if they continually hug their tatters of despairing poverty and distress to their breasts, bewailing the fate that makes them poor? How be happy if they live in continual dread of misfortune?

I find that Scientists strive to live in love, truth, and obedience to God's laws and commandments; they aim to love their neighbor as themselves, to cheer the disconsolate, heal the sick, cast out fear and help others to help themselves. They trust in God's goodness and guidance, and have broad, generous charity for all. Though glad to tell of Christian Science to all who are seeking, they do not thrust it upon the uninterested. I find that it is not easy to be a Scientist, to follow in the Master's footsteps, drink of his cup of bitterness and uncomplainingly bear the cross, but I am convinced it is the true and only way to reach and wear the crown. We must keep our hearts and minds filled with love and good cheer, so that there is no room for wretchedness. We shall then gain the first step, and God,

Digitized by Google

seeing our efforts, will bless and strengthen us. Standing "porter at the door of thought," as Mrs. Eddy says (Science and Health, p. 392), letting none but the good and just thoughts hold sway, evil must be banished in every one of its hideous forms, and good dominate our lives, before we are real Scientists.

Let us pray for greater spiritual understanding, let us deny the existence of evil, and with love and courage born of true faith, push on until we see the light, then walk in its soft beam with our hand clasped in that of our Father.

An Appreciation.

FLETCHER L. WILLIAMS.

WHEN I began to read "Science and Health with Key to the Scriptures," it caused me much "mental pain." But as I discerned something of the truth, even in the passages not then clearly intelligible to me, and felt a strong incentive to "dig" in this book and the other writings of our beloved Leader, I followed the impulse with continual aspiration and prayer for divine illumination, that I might be called to understand them. It is remarkable that I should have thus prayed to understand a book, at a period when I had lost the sense of prayer, on account of my self-life.

By the assistance of prayer and patient reading and passing over any little objections and difficulties that stood in my way for the moment, I perceived that my sense of things was illumined. My understanding was opened, till at length I discovered the wonderful treasures hid in our text-book.

Having gained this understanding by prayer, I began the study of the Bible in the same way, and its spiritual meaning then came to my awakened thought. Under these circumstances, is it remarkable that the last part of our text-book should be named a "key"?

Before coming into contact with our beloved Leader's writings, I accepted Jesus the Christ only so far as to receive the history of his birth, person, and character, and as that was all that I knew of him, I was as much without him, as much left to myself, as little helped by him, as if I did not know him at all.

[Written for the *Sentinel*.]

Omnipotence.

FLORENCE V. EDDS.

SINCE Love is all,—our certain guide,—
How can we stray?
See where the way
Stretches, glad, free, and glorified
On every side!

A way of high, sweet holiness,
We do not fear,
Love's strength is here
To heal, to comfort, and to bless.
Love's hands caress.

Strong hands, so full of tender might!
Then sing, my heart,
Do thou thy part
In trusting, knowing, faith bedight,
Walk in Love's light.

Lift up thy head as one delivered from slavery. Dare to look up to God and say: Deal with me henceforth as thou wilt; I am of one mind with Thee; I am thine. I reject nothing that seems good to thee; lead me whithersoever thou wilt, clothe me in what dress thou wilt.—EPICTETUS.

Selected Article.

A Correct View.

To the Editor of the *Boston Transcript*.

The temperate tone of Dr. Churchman's dissertation on Christian Science which appeared in a recent issue of the *Transcript*, is indeed commendable. True, he employed such terms as "inaccuracy," "ignorance," "charlatanry" and "theft," but one does not mind epithets when they come from a gentleman and are hurled in a kindly manner.

If Christian Science is "suicidal" and really "amounts to nothing," some learned men are surely making "much ado about nothing."

So far as text-book knowledge is concerned, Dr. Churchman appears to be well informed on the subject of physiology and *materia medica*, but it is apparent, at least to Christian Scientists, that he has failed to grasp the teaching of Christian Science with regard to the points upon which he bases his discussion. My reason for making this assertion is that in his comments he does not state it in accordance with the Christian Science text-book as I understand it; and having been a student and practitioner of Christian Science for many years, I do not deem it presumptuous to assume that I have stronger proofs of accurate understanding than a mere observer can have. True, our critic makes some correct quotations from Mrs. Eddy's writings, but these are in most instances accompanied with comments which do not explain but, on the contrary, obscure her meaning.

The gentleman charges Christian Science with being un-Christian; yet he makes no quotations from the Scriptures to prove his assertion. He declares that Christian Science discards the atonement of Christ, yet in this connection admits that Scientists do believe in the atonement, though they explain it in a manner differing from that of others.

He asserts, "Christian Science makes its way without the assistance of logic," yet in the next breath he affirms, "If Mrs. Eddy's premises be correct, her conclusion is the only consistent one." In accordance with this admission, he declares, "Then it is the duty of the critic of Christian Science to detect some weakness in its basal principle. That duty neglected, he has accomplished nothing finally." With this fair, common-sense admission, it is a little surprising that while our erudite opponent has stated the Scriptural premise of Christian Science; namely, its definition of God, he has not attempted to controvert this teaching, but occupies sixteen pages of a magazine in dealing with his misconceptions of a remote conclusion; namely, that material sense testimony is deceptive!

Our Lord evidently considered his affirmation, "God is Spirit," to be fundamental, since he gave it to the woman of Samaria as the basis of his teaching and the sufficient reason for the new concept of worship which he stated. History records no favorable thing that he ever said regarding the flesh or matter. In this connection, it is well to note that all the affirmations of Jesus were consistent with his premise, and we find him making such assertions as the following: "It is the spirit that quickeneth, the flesh profiteth nothing." This text clearly sets forth that spirit alone animates—gives life and existence; that flesh, matter, contributes nothing whatever, is altogether unprofitable; and yet our critic who appears to champion the Scriptures, contrary to their teaching, bases his entire contention upon a plea that matter-testimony is to be accepted "absolutely." Incidentally, it may be well to mention, not as a news item but as a fitting reminder, that most modern philosophers approximate very nearly to Christian Science in respect to the nature of matter.

Christian Science does not teach that the senses are illusions, any more than that the body is an illusion. In her text-book, Mrs. Eddy asserts in so many words, "The senses of man are spiritual." The deduction that man does not see materially is based upon the premise that he does

Digitized by Google

see spiritually. The teaching of this Science is that we never really see by means of material sense, but that we perceive in spite of whatever of materiality there may be in our vision.

Christian Science affirms that God, the Creator, is Mind, Spirit, that His creation is therefore spiritual; hence, the conclusion that it is not material. It does not teach that the senses are lies, but that, in so far as they are blinded by materiality, they mislead.

We regret that Dr. Churchman did not state whether or not he believes in the Scriptural teaching, "God is Spirit;" but we infer that he does so believe, inasmuch as he has made an opportunity to defend the Scriptures, and we would therefore call his attention to the fact that in his endorsement of the proposition that God is Spirit, he utterly repudiates the testimony of material sense, which asserts, "I do not believe that God is Spirit and with us, for I do not see any spirit." If we can conscientiously set aside the testimony of the personal senses sufficiently to believe that God is Spirit, we ought to be able to accept the consistent conclusions therefrom as taught in Christian Science. On the contrary, in his discussion, our critic bases his entire argument upon his belief in the reliability of the material senses as opposed to spiritual understanding.

Since he has made the declaration that Christian Science is not in harmony with the Bible, he should note another declaration; viz., "For the flesh lusteth against the spirit, and the spirit against the flesh: and these are contrary the one to the other." No one will dare dispute that material sense denies the existence of Spirit, while spiritual sense denies the existence of matter. We must therefore choose one or the other; otherwise, we can never arrive at a conclusion.

Christian Science does not claim that there is "the world of matter and the world of spirit," but that there is in reality one world; that the same which to material sense seems to be material is, in truth, spiritual. It agrees with Paul when he writes, "For if that which is done away was glorious, much more that which remaineth is glorious."

If the body and that which constitutes the universe could be seen as they really are, they would be as much more wonderful and beautiful than they now appear as is infinitude greater than our present degree of comprehension.

It requires no more assumption to accept the fundamental proposition of Christian Science that God is Spirit, Mind, than to accept a mathematical rule. It is taken for granted that the rule is true, and it is proved by the solution of the "examples for practice." In like manner, Christian Science is proven by the results of its consistent application to human needs; such results as are seen in the improvement of physical and mental conditions and the moral uplifting of its beneficiaries.

Our critic states that "to deny that matter exists and assert that it is an illusion, is only another way of asserting its existence." According to this logic, when a defendant denies a charge brought against him in court, he is only choosing a method of asserting its truth! As a matter of fact, such a defendant accounts for himself truthfully, thus proving the falsity of the charge. It would not do for him to ignore the charge; he must give it a hearing and then prove it false.

Our critic ventures to assert, "There is nowhere the slightest Scriptural warrant for expecting immunity from pain;" and yet the Scriptures throughout teach the possibility of rising above trouble through the power of God. It is even prophesied, "Neither shall there be any more pain;" and David declared, "Because thou hast made the Lord . . . thy habitation, there shall no evil befall thee, neither shall any plague come nigh thy dwelling." The story of Job does not teach that it is normal for man to be unhappy, but affirms that one should continue to trust God despite the extremest adversity; that one should endure unto the end of all sufferings, as is expressed by Paul, "And let us not be weary in well doing; for in due season we shall reap if we faint not."

It is queried, "If all psychic phenomena are dreams, why do I recognize only certain psychic phenomena as dreams?" We dare say that we recognize no phenomenon as a dream so long as we are fast asleep. It is only when we are awake or partially so that we recognize that we have been dreaming. What we are pleased to call the sleeping dream seems real until we awake; then we know it as a dream. Thus also the dream of material experience seems real until we begin to waken to an understanding of the spirituality of being. Furthermore, human experience witnesses that the sleeping dream is the result of a spontaneous, unfettered, and lawless mentality, while the waking dream acquires a certain uniformity, continuity, and reliability in view of the fact that we are in the presence of a real universe whose stability and orderliness are counterfeited in the experiences of material sense.

Science does not claim that any experience of life is a dream except in so far as it is clouded by material sense. If a dream is a dormant state of consciousness, that term correctly applies to any state less than the perfect, spiritual condition. The Psalmist understood this; hence he sang, "I shall be satisfied, when I awake, with thy likeness."

Dr. Churchman erroneously assumes that Mrs. Eddy teaches that there is no power in a material drug until mortals consciously invest it with power. The universal belief may give the drug its specific power even before the individual mind is conscious of that fact; but it is none the less the fruit of mortal mind, and none the less capable of being destroyed by a correct understanding of the divine Mind. Were this not true, then Jesus' promise, "And if they drink any deadly thing it shall not hurt them" is mere mockery. Mortals naturally believe in the power and conditions of matter until, through spiritual understanding, they outgrow this belief.

It should be noted that Christian Science has not only accomplished much for the longevity of its own adherents, but has contributed largely to that of others by educating the world to look upon the bright side of life and to cease from its continued thought and discussion of sickness and calamity. Nor can it be denied that multitudes are alive to-day through Christian Science who would otherwise have been in their graves, and this fact must of necessity add something to the longevity of the race.

Christian Science does indeed indorse the Scriptural teaching that "God is all in all," but not in a pantheistic sense. Pantheism affirms paradoxically that the creator and creation are identical, while Christian Science teaches that the creation, though inseparable from its creator, retains its eternal individuality; and it demonstrates this, rendering the individuality of the practical Scientist stronger with experience. It agrees with the Scriptures, "And when all things shall be subdued unto him, then shall the Son also himself be subject unto him that put all things under him, that God may be all in all."

Our critic says that "a few æons of disappointed hopes have taught us to smile at that word 'panacea.'" But what of the Scriptural statements, "God is a very present help in trouble;" "For he shall give his angels charge over thee, to keep thee in all thy ways;" "Seek ye first the kingdom of God and his righteousness; and all these things shall be added unto you." Though mortals have not thoroughly proved that the truth of God is a universal "panacea," the fault lies not with the panacea, but with mortal inability to utilize it. If God, according to Scriptural promise, cannot be made "All-in-all" to us, He is a myth.

ALFRED FARLOW.

It is not things but opinions about things that trouble mankind. When, therefore, we are worried or troubled or grieved, never let us blame any other than ourselves; that is to say, our opinion.—EPICTETUS.

The Lectures.

San Bernardino, Cal.

The Pavilion was not crowded last night [April 13], but it has never held a more interested audience than the three hundred people who listened to Edward A. Kimball of Chicago, a lecturer who would have magnificently entertained three thousand, had they cared to avail themselves of the treat that was in store for them. Such addresses and such speakers do not often come to San Bernardino or to the West.

Whether one agrees with him or not, the address by Mr. Kimball last night compelled attention. He has been a student of Mrs. Eddy herself; occupied most of the various positions in the gift of the cult; was for five years a teacher of Christian Science in the Massachusetts Metaphysical College, and is nothing, if not philosophical.

The speaker was introduced last night by Attorney C. B. Morris, and he held his audience for about an hour and a half.—*San Bernardino Sun.*

Mr. Morris introduced Mr. Kimball as follows:—

Friends:—All of us who, even in a fair degree, attempt to keep pace with the best thought of the hour are seriously impressed with the advanced attitude of thousands of the serious minded men and women who are doing so much to uncover that which has for too long a time been unknown. Any agency, under whatever name we may call it, which has as its primal object that of trying to show us our true relationship to God, and which makes truth clearer and our duty easier and plainer is Divine. While we may not all agree with Christian Science in all its claims we must fairly admit that the world is better for its teachings.

This community is fortunate in having with us to-night, one so capable as is Mr. Kimball to present to us Christian Science and what it stands for in the world.

I have great pleasure and true satisfaction in introducing to you Mr. Kimball of Chicago.

Chicago, Ill.

An interesting lecture was given in Second Church of Christ, Scientist, of this city, April 5, by Bicknell Young of Chicago. Every seat was taken, many stood throughout the entire lecture, and many were turned away for want of room. The lecturer was introduced by the First Reader of Second Church, Mr. Lansing B. Warner, in the following remarks:—

Ladies and Gentlemen:—The message we have to bring to you this evening is one of joy, and peace, and hope. It speaks of the risen Christ, who comes to human consciousness as a Saviour,—a Saviour from the beliefs in sin, sickness, sorrow, and strife, which have so long bound humanity. This message comes in the spirit of love and not of argument.

We who have felt the regenerating power which the understanding and demonstration of the truths revealed to us in Christian Science have brought into our lives, hail with gladness the opportunity of making it known to others.

Throughout all ages humanity, whether savage or civilized, bond or free, has been looking for something higher, and above and beyond this dream of material existence. The spark of hope has always been present. Man has known intuitively that he would eventually be raised to a state of health and harmony. This harmonious state has, however, been a far-off rather than a present possibility, and the belief has been prevalent that it could not be reached this side of the grave, and that God sent suffering to better prepare us for the life beyond. Jesus said, "If a man keep my saying, he shall never taste of death." And "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father." The human thought was slow to apprehend the import of Jesus' words, and after the early centuries of the Christian era the healing power of the Christ-truth lay dormant until it was again revealed through Christian Science.

Christian Science unfolds to us in a practical, comprehensive way the teachings of Jesus, and by its fruits has shown that the works which he did are possible to us here and now.—*Correspondence.*

Erie, Pa.

The beautiful Majestic Theatre was crowded yesterday afternoon [April 10], nearly a thousand persons being present, to listen to a lecture by the Rev. William P. McKenzie of Cambridge, on the subject of "Christian Science and the Emancipation of Man." Mr. McKenzie was introduced by J. W. Sproul, Esq., who spoke in part as follows:—

Men and Women of Erie:—We not only live in an advanced age, but in an age of rapid development; an age of scientific discovery and progress. He who is content with present conditions and closes his mind against all new thoughts and ideas, will soon find himself far in the rear of the procession marching toward the highest point of intellectual and spiritual development. It is not the part of wisdom to say, because we do not at first understand, do not fully comprehend, "away with it; we will have none of it."

Suppose the contention be true that mind is not only superior to matter, but entirely absorbs or takes the place of matter; or, to state it another way, there is no matter but all is mind, how can it possibly harm us?

I understand that the advocates of this new belief claim it to be founded upon certain statements in the New Testament Scriptures. They claim that it is not impossible to have real successors of the apostles in working cures; that it is not impossible in our own day and generation to literally obey the command of Christ,—

"As ye go, preach, saying, The kingdom of heaven is at hand. Heal the sick, cleanse the lepers, raise the dead, cast out devils: freely ye have received, freely give."

As I understand it, however, the healing of the sick through faith in God is but an incident in this remarkable belief; the invitation which they extend is for all to wait upon the Lord for a richer and deeper blessing, to learn to know better His message and testimony to His people; to promote the deeper spiritual life among Christians, and help all who are seeking such a life to enter into complete union with Jesus Christ and thus achieve complete victory over sin.

We have met together this afternoon to give a patient hearing to an authoritative statement of Christian Science. I take pleasure in introducing to you the Rev. William P. McKenzie, who will now address you upon the subject, "Christian Science and the Emancipation of Man."

CHRISTIAN SCIENCE SENTINEL

Editorial.

MRS. EDDY TAKES NO PATIENTS.

The author of the Christian Science text-book takes no patients, does not consult on disease, nor read letters referring to these subjects.

Christian Science Board of Education.

MARY B. G. EDDY.

THE Magna Charta of Christian Science means much, *multum in parvo*,—all-in-one and one-in-all. It stands for the inalienable, universal rights of men. Essentially democratic, its government is administered by the common consent of the governed, wherein and whereby man governed by his Creator is self-governed. The Church is the mouthpiece of Christian Science,—its law and gospel are according to Christ Jesus; its rules are health, holiness, and immortality,—equal rights and privileges, equality of the sexes, rotation in office.

The long term of the incumbent teacher in the Board of Education, Mr. Edward A. Kimball, C.S.D., expires in June next, when he retires crowned with honors—his Teacher and Leader loving him, his students praising him, and the race benefited by his labors. May his successor "go and do likewise."

Card.

Thanking the courteous Christian Science lunchers for their respectful attention to our denominational By-law on clubs and organizations, I beg to say: Said By-law prohibits neither informal meetings nor luncheons and select, invited guests. MARY B. G. EDDY.

Pleasant View, Concord, N. H., May 6, 1904.

Correct Diagnosis.

ONE of the arguments frequently used by critics of Christian Science is, that lack of technical medical education renders Christian Scientists incapable of properly diagnosing cases brought to them, and therefore they should not be allowed to treat patients; but if we may judge by the absurdities, contradictions, and inconsistencies of so-called "expert testimony," given by physicians in the courts, the same argument will apply to some members of the medical profession.

The position of Christian Scientists on the subject of diagnosis is thus explained by Mrs. Eddy in our text-book: "The Christian Scientist, through understanding mental anatomy, discerns and deals with the real cause of disease. The material physician gropes among phenomena which fluctuate every instant, under influences not embraced in his diagnosis; and so he may stumble and fall in darkness" (Science and Health, p. 462). The correctness of the Christian Scientists' diagnosis is proved by the healing of the greater number of their patients.

"Expert testimony" is much used in cases involving the sanity or insanity of persons who are the subjects of judicial investigation, and in these cases the experts are about evenly divided in opinion, men of equal eminence in the medical profession drawing radically different conclusions from the same set of facts. This state of affairs has become so well known, that courts and juries regard "expert testimony" with much less favor than formerly. That it is possible for both sides to obtain numerous experts, indicates a lack of scientific basis for the opinions given under oath, or a lack of individual capacity to form a correct opinion from given data. Under these conditions, either the practice of medicine or the individual practitioner is subject to criticism.

A case recently reported in the newspapers will lessen the confidence reposed by some in the absolute finality of human judgment, when expressed by those who are never at a loss for an opinion. In fact the case in question serves to show the recklessness and absurdity of some of the opinions thus given under oath. The expert in the case referred to testified that certain persons, whom he in all probability had never seen and whom he certainly never had examined, were insane, and not the least surprising feature of the incident is that this man was permitted to give such testimony in a court of justice. The persons named were in no wise connected with the case, and if the statements had been made in conversation instead of from the witness-stand, there would be no question of their slanderous character.

We do not wish to be understood as saying that such practices are common with physicians, because we have a very high regard for the large body of conscientious men and women who are serving their fellow-men to the best of their ability, men and women who deal fairly and compassionately with all, even where they do not share their views. Such practitioners know that their license to practise medicine does not give them liberty to pass indiscriminate judgment on their fellows, nor does it place them outside the pale of moral accountability to society. M.

"A Door of Hope."

AMONG the many rare gems of thought found in Hebrew poetry, Hosea's reference to "a door of hope" is peculiarly impressive. The writer once heard a highly educated Hindoo speak of the difference between the Oriental and the Occidental idea of God. He said that the conceptions of deity which prevail among the peoples of the West and of the North fail to attract Orientals, inasmuch as they are lacking in the tenderness and warmth which the latter always associate with the nature of the Supreme Being. He, however, added that these were really to be found in our Scriptures, but that we did not seem to utilize their touching appeal, either in our intercourse with each other or in presenting our religious views to the people of the East. He was much interested to learn that Christian Science has opened the eyes of many to the precious treasures contained in the Bible, and that we were keenly appreciative of our obligations to the prophets and seers of the olden time, who saw in the sweetest and purest relations of human life, glimpses of the infinite tenderness of "our Father-Mother God" (Science and Health, p. 16), and who inscribed their thoughts on the "deathless page," for the awakening of the world, and the interpretation of divine Science.

Hosea's mention of "a door of hope" is of especial interest, in that he speaks of it as being in the valley of Achor (of trouble), and the picture he presents is that of a woman, —a type of the human race which has wandered away from God into sin and consequent misery. In the very midst of these conditions, divine Love points to "a door of hope," and says, "She shall sing there, as in the days of her youth, . . . and I will say to them which were not my people, Thou art my people; and they shall say, Thou art my God." Is not this indeed the "hope which maketh not ashamed"? and does it not point to "Christ in you, the hope of glory"?

Among the many testimonies to the healing power of Christ, Truth, which are given in our periodicals, the greater number tell of utter hopelessness before the light of Christian Science dawned. Many tell of ever-narrowing prison walls of fear and suffering, when suddenly, in fulfilment of the Divine promise, a door was opened out into the sunlight; and as the Psalmist said, "He hath put a new song in my

Digitized by Google

mouth, even praise unto our God," so do they tell of their escape from the bondage of sickness and sin, into the freedom which is at once physical, mental, moral, and spiritual.

It is true, say these people, that the Bible tells of God as Life and Love, but until the message of Christian Science came to us we never knew that the realization of this truth is the most potent remedy for all woe. With their healing came an illumination which caused the sacred page to glow with spiritual light and warmth, and which freed them from the icy breath of creed and dogma that has never even claimed to teach with the Master that Truth is the liberator from every form of evil.

In the chapter called "Emergence into Light" in "Retrospection and Introspection," our Leader tells of her deliverance from the bondage of material sense in words that thrill, and that find an echo in a thousand grateful hearts. "When the door opened, I was waiting and watching; and lo! the bridegroom came! The character of the Christ was illumined by the midnight torches of spirit. . . . Soulless famine had fled. . . . Being was beautiful, its substance, Cause, and currents were God and His idea, I had touched the hem of Christian Science." K.

Springtide at Pleasant View.

THE following reference, in the *Concord Patriot* of May 9, to the present beauty of Mrs. Eddy's grounds and flower gardens will bring pleasure to all Christian Scientists, and especially to those who have been privileged to visit this peaceful and inviting home.

Not all the people in Concord know what a paradise Mrs. Eddy has prepared for all lovers of the beautiful in nature in her spacious grounds, which are very beautiful even in their natural state but replete, especially at this time of the year, with flowering beds and budding shrubbery.

All passers-by on the Pleasant Street highway are favored just now with a rich landscape scene as they come within range of Pleasant View, and many pedestrians are seen walking out from the city, just to look at the pretty beds of tulips, which are now in their prime, some of the beds fringed with hyacinths in full bloom, and the summer-house to the west of the main entrance flanked with a profusion of exquisite pansies.
