- A BI-WEEKLY RELEASE -

OF

THE B. S. R. A.

3524 ADAMS AVENUE

SAN DIEGO 16, CALIF.

CLIPS, QUOTES, COMMENTS

A - 8 - October 15, 1953

MISCELLANEA:

-------- COLUMNIST BOLTON AND THE AIR FORCE (page 1)

-------- GREAT SNAKES (!) (IN SPRINGFIELD (page 1)

-------- "POPULAR AWAKENING CONCERNING THE IMPENDING FLOOD" Menace of the Antarctic Ice Cap - an unpublished book length manuscript by Elect. Eng. Hugh A. Brown. (page 2)

-------- REMARKABLE ITEM - A 'Voice from Space' interrupts radio program. (page 2).

-------- THE PRISM EFFECT (from Valor Magazine) (Pg. 3) The LOOK MAGAZINE article by Maj. Keyhoe -- TWO BROCHURES by James Baker -- (pg. 3)

-------- BSR RELEASE 10-A-53: The new Keyhoe book -- the Aeroforms and the Air Force - (Review from the Washington Times-Herald -- (Pgs 4-5)

-------- COMMENTS by the BSR Director -- - (pgs 5-6)

A Note in Remembrance of Estrella -- - - - (pg.7)

(C.Q.C. is distributed bi-weekly, 1st and 15th of each month, by the Borderland Sciences Research Hdqrs., 3524 Adams Ave. San Diego 16, California. -- 12 issues (6 months): $5.00 -- 6 issues (3 months), $2.50. Two issues, $1.00. Sample copy sent anywhere on request. CQC contains very short articles only and is supplementary to the BSR bi-monthly ROUND ROBIN.

Columnist Bolton and the A.F.

"The time has come to take almost the final covers off the flying saucers business... I had been told under pledge that the Air Force, greatly disturbed, had decided it was time to inform the public, altho hysteria certainly and panic possibly might ensue... What held the AF silent was failure to arrive at a way of making public the known, concrete truths. . . The only tragic error committed by the AF was tohandle the matter in so bungling and haughty a manner, that pilots refused to turn in any more reports of what they had seen - which accounts in the main for the paucity of flying saucer reports in the last few months... The Department of Defense has given to the publishers (of Keyhoe's book) a signed document which is staggering in its import (which ends by saying) that if maneuvers are as reported, the only remaining explanation is the interplanetary answer. . . This may be the way the AF has chosen to instruct the public..."

The "only remaining explanation" however, is not quite what the AF fondly believes it to be - or what the public will shortly accept and the pseudo-scientists preen themselves over. The course of events, however, goes and has gone in close conformity with every important statement made by BSRA sources during the last seven years. Once again, complete understanding and acceptance of the BSR explanation can safely be left to the processes of time - perhaps to the fairly near future.

(Clip from Assoc. E.S.Schultz; Whitney Bolton column in Buffalo Eve.News,10-7-53)

On Oct.6, '53 the same columnist quotes from Desmond Leslie's forthcoming book The Flying Saucers Have Landed. We congratulate Whitney Bolton, along with Frank Edwards, for courage, honesty, and enlightenment on a matter of great public importance.

The time to have begun the 'public instruction' now aimed at by the AF, was some six or seven years ago, simply by an honest acceptance of facts, reassurance of the public, and a campaign of honest scientific study and explanation. We have warned repeatedly that if the "Visitation" takes certain turns there may be a real panic - especially if these are tied in with great seismic disturbances and/or the threat of atomic war.

BSR Associates will be interested to know that Desmond Leslie has long been one of our most active Associates. We have reviewed his book (Flying Saucers Have Landed) in an insert page accompanying the last issue (IX-3) of the BSR ROUND ROBIN. Available in the U.S. after Oct. 23, from the British Book Center, 420 - W. 45th St. N.Y. 36. (Do not order from BSR Hdqrs.). Price $3.50

Great Snakes!

"A cobra, the 10th in two months, was killed today two blocks from where a souns truck was blaring a recording of the cobra-luring melody brought from India by a Lutheran missionary. The experiment was designed to bring the snakes out into the open so posses could kill them. Police said they could distinctly the weird music at the point where the snake was killed. In the last two months ten of the snakes have been killed within a six-block square area. Where they came from, no one knows. City Health Director Del Catwood and other city officials decided to try the "Cobra blues" broadcast despite many skeptics. But Caywood said "We're ready to try anything".

(Dispatch from Springfield, Mo. Name of paper not on clip. Dated Oct.5, '53. From Assoc. E.S.S., who notes - "Teleported, maybe". In lack of other data, we change 'maybe' to probably)

POPULAR AWAKENING CONCERNING THE IMPENDING FLOOD:

This is the title of a book length manuscript by HUGH A. BROWN, an Electrical Engineer of 141 Park Lane, Douglaston, N.Y. We are indebted not only to Mr. Brown, but also to Assoc. Elmer Fish and Reg. Director Edw. S. Schultz for the privilege of reading this ms. - copies of which are for the present unobtainable.

We abstract briefly from a Foreword by Eng. Brown:

'The South Pole ice accumulation now covers about six million square miles, about double the area of the United States. It is over two miles high at the polar plateau and would make a uniform layer 120 ft. deep over the entire globe...This accumulation must have an ending and that will happen when the weight causes our globe to careen sideways ... as has often occurred in past ages... It is only on account of the extrusion of icebergs that our generation has been able to live on this earth - the flow of the bergs being about 5½ trillion tons annually ... The gyroscopic energy of the equatorial bulge which normally holds the globe steady, acts like one jaw of a nutcracker, whose other jaw is the energy of the "throw" of the eccentric rotation ice cap. The energy of these pinch certain layers of earth strata until there is a crumpling and elevating at some point. The careens of the globe begin when these earth materials break away.

New and different land areas are stationed at the poles and equator after each careen has been completed and an entirely new bulge of the semi-plastic earth is evolved for the next epoch of time. . . To survive we must arrange to accelerate the flow of the bergs.

The book itself is a very serious and concentrated study of a great mass of relevant physical data and deserves competent scientific attention - since the danger involved is not remote, yet not beyond possible remedy (probably through the use of atomic power). Anyone who can and will cooperate in the publication of this ms. in book form, as a public service, should communicate with Mr. Brown, with the BSR Hdqrs., or with either of the Associates mentioned in the first paragraph above.

REMARKABLE ITEM: The following clip is from the Bremerton Sun, NY UP dispatch, Oct. 7, '53: sent us by Assoc. Al. Ramirez, Box 30, Silverdale, Wn. We have no verification, expose' or information of any sort.

"A telephone caller claiming to be 'from outer space' interrupted a radio show this morning and sent the listening public into one of the greatest spins since the Orson Well broadcast of 15 years ago. His warning sent hundreds of panicky listeners to their telephones to try to find out what they had heard. The NY Phone Co. immediately placed tracers on the call.

"Jinx Falkenburg and Tex McCrary were interviewing Maj. Donald Keyhoe about his new book on the Saucers, on the Waldorf-Astoria breakfast show, when they received the call thru the hotel switchboard. All disclaimed any responsibility. Miss Falkenburg answered but became too hysterical to talk, and McCrary in taking the phone held it too close to the microphone. Listeners heard a thickly accented voice speaking in rapid, grammatical English. The caller said at first he was calling from a space ship over Los Angeles; later, that he was 'now' over Salt Lake City. The gist of the call was this: -- 'This is a voice from outer space. I warn you earthmen to stop talking about flying saucers, bombs, and preparations for war. Unless you learn to live in peace your planet will be annihilated. I know this because I am in a position to see and you are not. I am reaching you with difficulty. You cannot see me and could not bear the sight of me if you did. It would be hideous.'

<u>This MAY be a prank or a canard</u> - but voice and code messages <u>have been received</u> heretofore - and more are expected. Pending further information we do NOT reject the item quoted.

ML

VALOR for Sept. 26 has a column entitled "Prism Effect" - by which is meant that both planets and stars when near the horizon are now showing "violent colors" - Arcturus, for example, flashing from red to high violet on the west, Capella doing the same in the east. Violet and red are said to appear at the same time, at the 'top' and 'bottom' of the same star. Prismatic effect of the atmosphere, of course - but WHY appearing now and not heretofore? Editor Pelley thinks, radioactive particles in the air ...

In the same issue the Valor editor remarks: "One thing is certain: by no manner of means is it coincidence that atomic energy, space ships, and world-wide drought all make their appearance upon the globe simultaneously. He who hath ears to hear ...etc."

We have repeatedly pointed out that what we call the Visitation - the incursion of the space ships and their occupants, long continued and in great numbers, is prima facie evidence of great events in the making. Add to these, seismic disturbances, unparalleled weather and various astronomical phenomena, and the inference is obvious and commonsensible. We do not, ourselves, have the advantage of 'Divine revelations' - but do have considerable confidence in the sources so often quoted by us - which so far 'click' very well with scientific data.

LOOK MAGAZINE for Oct. 20, '53 has an article by Maj. D.E. Keyhoe, "Flying Saucers from Outer Space". The sightings described are impressive but not new in their essential factors; the matter of real interest to our Associates is the way this data is forced - or forces itself - onto the lap of the Air Force, which is already eating crow in private and even nibbling at it publicly.

The A.F., having been determinidly in the wrong for some six years past and now forced to 'renig', has a new line of public misinformation; viz., the implied argument (a logical fallacy) that 'no proof is disproof' - hence no interplanetary craft or travel, no danger, and "nothing unforseen or mysterious is going on in our skies". This last statement is obviously false, the 'no danger' is a a guess, and so is the implied denial of space travel. All this is justified (is it justifiable?) on grounds of public policy - but at the same time it is sheer dishonesty, and in the long run will be recognized as a major mistake in the whole approach of the last seven years.

Major Keyhoe's book, from which the LOOK article is taken, should soon be available to the public.

(NOTE: because of hasty handling in making up this CQC 8, there is a certain amount of duplication between the above paragraphs and our Release 10-A-53, included herewith. But the subject is of importance and we hope our Associates will (as often) overlook such defects).

We again call attention of our Associates to the two brochures by James Baker: The Principles and Practice of Pneumatology, and, The Metaphysical Organs of Man. The first of these is "A scientific nomenclature descriptive of phases and incidents that occur in astral projection": The second is "A theoretical interpretation of the general body of pyschic phenomena". Both booklets are closely written and somewhat technical, an admirable piece of work and important to everyone making a scientific approach to this subject matter. Order from the William-Frederick Press, 313 West 35th St., New York 1, N.Y. $1.50 each, or both books for $2.50. (ML)

THE AIR FORCE & THE SAUCERS

BSR Release
10-A-53

"The Air Force has secret motion pictures of flying saucers which prove they are interplanetary craft, Maj. Donald E. Keyhoe, a retired Marine Corps officer and Alexandria author, declared Monday.

"His claim, he said, is backed by official Air Force documents.

"Maj. Keyhoe said the pictures were taken July 2, 1952, by Navy Warrant Officer Delbert C. Newhouse while the saucers maneuvered over Tremonton, Utah.

"Certain Air Force officers urged a press showing and a public statement," the major asserted, "but after a battle this plan was killed by a group which believed it was not in the public interest."

The movies show, he said, a formation of round, glowing objects maneuvering at high speed over the Utah city. After months of analysis by Air Force and Navy photografic experts, it was officially concluded the saucers could not be aircraft of any known type.

It was then that some Air Force investigators were convinced the objects were interplanetary craft, Maj. Keyhoe said.

A new secret analysis of sightings of unidentified flying objects --- including those seen over Washington in the summer of 1952 --- was made and a definite conclusion was reached, he continued. He said this conclusion also has been withheld from the public.

In the forthcoming book titled "Flying Saucers from Outer Space," Maj. Keyhoe quotes Albert M. Chop, former Air Force press official, then assigned to the saucer subject, as confirming the analysis.

In a letter signed by Chop, which appears in the book, Chop states that the Air Force told him "if the apparently controled maneuvers reported by many competent observers are correct, then the only remaining explanation is the interplanetary answer."

Some Air Force officers, said Keyhoe, attempted to repudiate the admission by saying it was only Chop's personal opinion. However, Chop has since informed the Air Force that it was a true statement of opinions given by officials investigating the sightings.

Maj. Keyhoe said the Air Force has given him an official statement saying weather conditions did not cause mysterious sightings over Washington and elsewhere in the summer of 1952. (The Pentagon previously blamed saucer sightings here as being caused by temperature inversions.)

Saucers are still being seen in great numbers, Maj. Keynoe said.

New reports constantly pour into the Pentagon and the air technical intelligence center at Dayton, Ohio, he reported. These sightings by military, and airline pilots, form the basis for secret briefings of high government officials by Air Force intelligence officers.

"Last May," Maj. Keyhoe said, "intelligence officers of the military air transport service set up a new, confidential reporting plan called 'Cirvis' for airline pilots. All of the reports are immediately classified."

Many Air Force pilots who have encountered the strange craft are convinced they are space ships, the major revealed. He cited this case as being approved for publication in the book, which will be published Oct. 5.

The entire crew of a B-29 flying over the Gulf of Mexico saw 22 saucers. They were flying at more than 5,000 miles an hour, the bomber's three radar sets recorded.

Described by the crew as "blurs of blue-white light," the saucers joined a huge unit, believed by Maj. Keyhoe to be a "mother ship." This vehicle appeared to take the smaller ones aboard and vanished at a speed calculated by the B-29 crewmen at 9,000 miles an hour.

A new Air Force policy has permitted Maj. Keyhoe to investigate the sightings, he said.

"I discovered one group of officials was trying to make the fact public. But their battle ended when a 'silence group' killed the Utah pictures.

"I expect to be criticized by this group. But I feel their present policy is unfair to the public -- hinting at some hidden danger," the major said in a press statement.

"I want to emphasize that I have seen absolutely no proof of hostility by those who control the saucers.

"But the contradictions of the last six years have confused the American people, laying them open to unfounded rumors.

"There is also a danger that the Russians might claim the saucers as secret weapons," he warned.

"It is my honest belief that top-level Air Force officials should tell the American people the facts," said the major. "I know many in the Air Force would welcome an end to the present policy."

TIMES-HERALD, Washington, D.C. Sept. 29, 1953.
(Column by Donn Munson)

The foregoing article, along with other similar utterances from various sources, undoubtedly marks the beginning of the end of the long campaign of dissimulation on the part of the A.F. authorities.

We are entitled to say, in behalf of the BSR, that we accepted the factual existence of the aeroforms, their non-terrestial origin and their control by intelligent beings - as far back as 1946. We have published hundreds of pages of additional information as to the nature and purpose of these craft, the relation of their visit to eaeth conditions etc. NO IMPORTANT DATA GIVEN BY US SINCE 1946 HAS BEEN INVALIDATED BY SUBSEQUENT EVENTS.

This should be a good test of any hypothesis.

All of our data has been at the disposal of the Air Force and other U.S. authorities - tho' no slightest recognition has ever been accorded us - and probably never will be.

We have also said many times, that the authorities and the public would settle on "other planets" as the source of the aeroforms - since the Western mind is not conditioned to any other form of thinking. But the connection with other planets applies only in part - and this too will eventually be understood and accepted.

NO SINGLE EXPLANATION COVERS ALL OF THE DATA.

Some of these craft came (and come) from a small planet 'behind' the Moon. The life on this planet ("Clarion") much resembles earth life.

The true inter-planetary or space ships have no permanent home base on any celestial body. They visit all the planets of our system for purposes of observation and study of changing conditions. When they say that they 'come

from Mars', or Venus they are trying to talk to us in terms we can understand. What they say is correct, but only part of the truth. They are (many of them) those people known from ancient times as the Guardians.

The Space-Time conditions in which they exist are so different from ours as to be almost beyond our understanding.

They inhabit the Ethers - and the Ether is equivalent to Space. And Space is not nothingness. What we call space is a form of reality beyond the range of our sense perception. It is exceedingly dense matter - whereas the matter of our world is like a wide-open mesh. The ethers pass through it and are not detectable on account of their density.

We have many times outlined the physical concepts involved in this. It is not new thinking, and should be (and will be) acceptable to the science of the near future.

The matter of the ethers is of such fineness as to be responsive to the energy of thought. The ships are constructed by thinking, in matter invisible to us. The vibration rate of such matter can be converted - and is converted when the ships approach our own (or other) planet. They then become visible and tangible.

They navigate by riding the magnetic force lines - but employ varied means of propulsion. We have listings and descriptions of some eight or ten types of craft. But even the scanty information we have is too lengthy to be summed up here. We have folders and booklets covering this material.

The concept of the dense ethers, along with that of other space-time frames of reference, has been known for millenia. The mistake of the West is in rejecting out of hand every approach not approved by our elementary scientism. ("The superstition of the West is its rationality" says Egon Friedell).

The conversion of energy into and out of our sensory range, accounts for the fading-in-and-out of the visible craft.

The problems of space, time, gravity, and cosmic radiation do not exist for the Guardians. The craft are weightless except when converted into matter of our gravitational field.

A number of landings have taken place, and also personal contact and conversation with the occupants of some of the craft. They make themselves earth bodies as required, just as they make the ships. They can and do make themselves bodies in which (like fish) they can live comfortably under the sea.

Nearly all the data we have is unbelievable and repugnant to the masses of our people. This is a cultural situation, the Time Spirit, and very little can be done about it. Mankind, as so often in the past, may now have to learn the hard way.

The purpose of these comments is once again to make clear how far our own information coincides with the "new thinking" of the A.F. and other authorities- and in what respects we differ and think we can supplement. We offer free synopses, and other material at near cost, as a public service. Our hope is (as for eight years past) only to reach individuals and small groups who can to some extent understand the great events now transpiring. We point to the record of the BSR for nearly a decade, but gratefully acknowledge the true and tested Sources of our information. **

This is a critical period in human and planetary affairs. If you think our information helps you, then you can help others - and us - by passing copies of this folder to "minds of critical receptivity". **

BORDERLAND SCIENCES RESEARCH - 3524 ADAMS AVE., SAN DIEGO 16, CALIF.
October 1953. Meade Layne, M.A., Director.

A NOTE IN REMEMBRANCE:

On the first of this present month of October, Estrella, young married daughter of Rev. Verne L. Cameron, was killed by a hit-run driver in the streets of downtown Los Angeles. She was much loved by all who knew her, and our sympathy goes out to Rev. Cameron and his family and Estrella's many friends.

As most of our readers know, Rev. Cameron is the inventor of the remarkable instrument known as the Aurameter, and has long been one of the most active of the BSR Associates. This instrument, incredible as it may seem, actually does respond to the presence of thought-forms and etheric objects and entities. Like all devices in the field of radiesthesia, it requires (usually) a certain amount of practise and the right method of handling. But all our preliminary tests, plus a great amount of subsequent data shows conclusively that it will perform the feats mentioned above.

Since it is commonly believed among occultists and spiritualists, that many, perhaps all 'departed spirits' enter an etheric body for a time (and can return to the etheric level from other planes also), and since Rev. Cameron's daughter was informed concerning such matters, it was natural that he should ask her to manifest in some way if possible, and should use the aurameter as an instrument they were both familiar with. To quote his words:

" Suddenly I got a powerful urge to get the aurameter, the instrument which I found long ago would locate and trace out the shape of a thought picture, the invisible bodies over our heads, the telepathic beam from the left eye and other amazing things. I had pictured Estrella as hovering over my bed, but when I tested that area there was nothing. But the instrument pulled violently to the right, pointing to a spot at the foot of my bed. There I was able to outline her tall slender figure. I tracedher hair, her breast, her height, even the auric wings which we had traced out only three or four months ago. . . The next day she was still with me, and still is. This sounds unreal and fantastic, but it will not seem so to persons familiar with the tested and known properties of the Aurameter.

"When I drove my car the next morning it had a feel entirely unlike my own driving; it had the spirit and dash characteristic of her, so much that I was almost convinced she was at the wheel. Later on testing her mother, brother and husband I * her figure present with them. This presence did <u>not</u> leave at the end of the third day, as she had believed it would do, and I have many times been made aware of it through odd and unexpected effects on the instrument I use.

"Now, if the Aurameter will outline a thought picture and the invisible auric body, if it will denote a diseased spot in the body by a projection of force similar to infrared light, and a projection from an infra-red source which will pass through a stone wall and eight feet beyond - then is it so fantastic to believe that it should outline the after-death body? It will do so before death. Is it unreasonable that it should do so after death also?"

---

* sup. <u>found</u>.

Associate Cameron is a geologist and engineer: Route 1, Box 1120,
Elsinore, Calif.
