(Assoc. J.S. Borland); - and - Comment - . . . . . - 9

Partial List of "Saucer" Publications --

***** ****** *****

CLIPS, QUOTES and COMMENTS is issued on the first and fifteenth of each month, by The Borderland Sciences Research Associates, at: 3524 Adams Avenue, San Diego 16, California.

Twelve issues (6 months) for $5.00; six issues (3 months) for $2.50; two issues for $1.00. Contains mostly short articles and miscellaneous material, supplementary to the BSR bi-monthly ROUND ROBIN.

N. Meade Layne, M.A., Director.

FLYING SAUCERS UNCENSORED

by

Harold T. Wilkins

A book of 250 pages of impossible facts, incredible happenings, unsolvable mysteries. A book which tries to present (we are told in the Foreword) "the uncensored story of the most amazing drama of all time" - and ends with the statement: "an average of 200 reports a month reach me, and they prove one thing beyond any shadow of doubt - that the truth of the existence of Flying Saucers cannot be censored."

The table of contents of this book reads as follows: The Foreword -- The coming of the Titans -- Mystics, Venusians and Hoaxes --

Silent Sphinx or Roaring Chimera -- Messages from Outer Space - Unseen Worlds Without End -- Strange Stories of Colossal Space Ships --

Mystery of the Martian Death Ceiling -- The Shadow of the Unseen -- The Nihilism of the Official Scientists -- Is There a Cosmic General Staff?

The Earth's Gravest Hour -- and Epilogue.

In spite of this tabulation, FSU is not a book that can be reviewed. That is partly because no one, including author Wilkins himself, knows what it is 'really' about. One can, it is true, say something remotely relevant, as is also true of nightmares, hallucinations, and the delirium of fever. And one can go further and say, these fantastic beings, these incredible experiences are real, sensory, and objective; one does not get rid of them by waking up, or by pillules and cooling lotions. FSU cannot be reviewed by quotations, because material on every page is worth quoting, nor disposed of by 'scientific' smugness, or scolded out by religionism. The story of the UFO cannot be summed up, or explained, or denied, or impounded by cults; the sole recourse is to ignore the data or flatly deny them - a possibility now almost at its end, with Mr. Wilkins book to hasten its demise.

The book is far from being a rehash of sightings and related phenomena; there is much new and much neglected material. But the author is intensely aware that the reality of the phenomena is not subject to debate, while the interpretation is a deadly serious matter. Our Associates of the BSR will note with personal satisfaction Mr. Wilkin's attitude toward the Etheric or '4-D' viewpoint; he is indeed very favorably disposed and favors us with numerous quotations.

Why should he not be - or how can he avoid so being? Practically the whole mass of visual phenomena (sightings) involve in some degree the fact of mutation, and to assign this to optical illusion or atmospheric friction is impossible. Everything points to the use and manipulation and perfect control of a kind or grade of matter (i.e., etheric substance) which is not the physical-chemical matter of our plane. These objects, and the bodies of the Entities themselves, are mutants, and this fact has been under the noses of everyone for a decade past. And etheric matter can be controlled and shaped by mind energy, and by sound, and also by mechanism of etheric making when within the earth's environs.

Mr. Wilkins also accepts in large measure a point repeatedly urged by the BSR, and based partly on statements alleged to come from the Etheric people themselves; viz., that the primary interest of the visitants is not the welfare of humanity per se, but the preservation of the planet - now endangered by the release of atomic energy - "A force so devastating that it has the cosmoplastic power to turn the earth into a flaming nova. By the appalling, etheric upheaval he can set up, man can gravely affect fourth dimensional worlds in space. It is from these worlds, perhaps the doubles of visible planets, that some of the space ships come. But there are others which appear to be third-dimensional and of our own order of matter."

"The fourth-dimensional beings really are there ... to deny their existence is not to disprove them. 'They' do not care who is right or wrong in this earth. They are indifferent and coldly disinterested in our 'isms and 'ologies. They intend, in certain American opinion, to keep man from disrupting the solar system, even if they have to take over and run our entire planet." (177).

"There is now said to be an even more satanic weapon than even the H-bomb - the L-bomb; at least a thousand times more effective than the H-bomb, and much cheaper to make (13-14 million tons TNT equivalent). . . One L-bomb exploded over London would leave that mighty metropolis a crater (179)..." ("L" stands for Lithium. "It is believed that Russia has exploded at least 30 of these". Wilkins gives little-known information on this; v. note to page 178). . . .

"A revolutionary concept is being forced upon us by the behavior of certain types of flying saucers. It is that there may exist worlds of another matter than our own, whose beings though real are imperceptible to our normal senses ... Entities who regard us with Olympian indifference. These intradimensional aeroforms demonstrate their powers to become invisible, or dematerialize ..." (82) * On a following page (83) the author is so kind as to quote verbatim our own (BSR) expressions about these etheric constructs.

The BSR publications have often pointed out, that it is neither rational nor safe to assume that if there be some 12 million visitants in our vicinity - or even a few thousands - these are all alike, all from the same planes of existence, all resembling ourselves in ideals and ideas, with moral concepts like our own (only 'much higher, of course'), all devoted to our welfare and anxious to give instruction and right knowledge. This is indeed the wishful thinking that makes easy believing, and most of us are experts at it. Wherever some cult or program or visiond Utopia raises its head comes a gathering of the Invisibles with words of encouragement.

The point is, of course, that there is nothing realistic about this happy-go-lucky uplift from the Neant. Here, as in spiritism and astral communications, one can find support and illustration for any kind of belief. The more one knows about the incredible mass and nature and variety of the phenomena involved, the less satisfied and assured one becomes. As is usually the case, the less one knows the happier one feels. If you belong to the would-be realists and can 'take it' on an even keel we recommend that you read ALL of Saucers Uncensored - even if it does not make you feel any happier.

"While this book is going to press" writes Mr. Wilkins in his final paragraph, "the censorship clamps on tighter. Correspondents tell me their reports are ignored by Defense Authorities and the press. " Nevertheless, his average is 200 per month.

The book is published by The Citadel Press, 222-4th Ave. N.Y.3. @ $3.50

Note: In a note on page 82, Mr. Wilkins assents to the claim of one J.F. B to have originated the 'mat and de-mat'theory in connection with certain types of saucers. Our own records show that the whole etheric or emergence interpretation of the aeroforms was given by the Probert controls in the fall of 1946. There was some irresponsible guess-work at the start, included for the sake of the record, but the coherent statement followed at once and remains basically sound to this day. A great many questions remain unanswered, and increase in number and importance, but none propounded as yet invalidate the concept of emergence, or Etheric or "4-D" (mat and demat) interpretation. The BSRA did not originate this approach, but its true origin should go on record, in justice to our wise and helpful friends on the 'other side'.

CONCERNING OAHSPE :

HOW OAHSPE WAS WRITTEN: Some two years ago, Oahspe was mechanically written through my hands by some intelligence other than my own. Many Spiritualists a r e acquainted with this automatic movement of the hands, independent of one's own volition. There are thousands and thousands of persons who have this quality. It can also be educated, or rather, the susceptibility to external power can be increased. In my own case I discovered many years ago, in sitting in circles to obtain spiritual manifestations, that my hands could not lie on the table without flying off into these "tantrums". Often they would write messages, left or right, backward or forward; nor could I control them any other way than by withdrawing from the table. Sometimes the power thus baffled would attack my tongue, or my eyes, or my ears,and I talked and saw and heard differently from my normal state. Then I went to work in earnest to investigate spiritualism and I investigated over 200 mediums, traveling hundreds of miles for this purpose. Often I took them to my house and experimented with them to my heart's content. I found that nearly all of them were subject to this involuntary movements of the hands, or to entrancement. They told me it was angels controlling them. In course of time, about ten or fifteen years, I began to believe in spiritualism. But I was not satisfied with the communications; I was craving for the light of heaven. I did not desire communications from friends or relatives or information about earthlythings; I wished to learn something about the spirit world; what the angels did, how they traveled, and the general plan of the Universe. So, after a while I took it into my head that wise and exalted angels would commune better with us if we purified ourselves physically and spiritually. Then I gave up eating flesh and fish, milk and butter, and took to rising before day, bathing twice a day, and occupying a small room alone, where I sat every morning half an hour before sunrise, recounting daily to my Creator my short-comings in governing myself in thought and deed. In six years training I reduced myself from two hundred and fifty pounds down to one hundred and eighty; my rheumatism was all gone and I had no more headache. I became limber and sprightly. A new lease of life came to me.

THEN a new condition of control came upon my hands; instead of the angels holding my hands as formerly, they held their hands over my head (and they were clothed with sufficient materiality for me to see them), and a light fell upon my own hands as they lay upon the table. In the meantime I had attained to hear audible angel voices near me. I was directed to get a typewriter, and I applied myself industrially to learn it, but with only indifferent success. For two years more the angels propounded to me questions relative to heaven and earth, which no mortal could answer very intelligently. I always look back on these two years as an enigma. Perhaps it was to show me that man is but an ignoramus at best; perhaps I was waiting for constitutional growth to be good. Well, one morning the light struck both hands on the back and they went for the typewriter, for some fifteen minutes, very vigorously. I was told not to read what was printed, and I had worked myself into such a religous fear of losing this new power that I obeyed reverently. The next morning, also before sunrise, the same power came and wrote (or printed rather) again.

I laid the matter away very religiously, saying little about it to anybody.One morning I accidentally (seemed accidental to me) looked out of the window and beheld the line of light that rested on my hands extending heavenward like a telegraph wire to the sky. Over my head were three pairs of hands fully materialized; behind me stood another angel with her hands on my shoulders. My looking did not disturb the scene; my hands kept right on, printing-printing.

FOR FIFTY weeks this continued every morning, held an hour or so before sunrise, and then it ceased, and I was told to read and publish the book OAHSPE. The peculiar drawings in OAHSPE were made with pencil in the same way. A few of the drawings

(OAHSPE contd) --

I was told to copy from other books such as Saturn, the Egyptian ceremonies, etc.

NOW WHILE I have been pursuing my vocation (dentistry), neither this matter nor my diet (vegetables, fruits, and farinaceous foods) have detracted any from my health or strength, although I have continued this discipline for upward of ten or more years. I am firmly convinced that there are numberless persons who might attain to marvelous development if they would thus train themselves. A strict integrity to one's highest light is essential to development. Self-abnegation and purity should be the motto and discipline of every one capable of angel communion.

-- J.B. Newbrough, New York, Jan 21 - - 1883.

-("The Kosmon Pioneer" - Vol. 13 - No. 9) -

-- e n d --

NOTE: The Probert Controls, questioned about Oahspe, replied only that it was dictated by "a group of very ancient spirits", that it is well in advance of our present-day thinking, and that this was probably a good thing, for the reason that it contains secrets of many magical operations capable of misuse. They added that the descriptions of enormous space craft, of planetary size, constructed by thought energy and by sound out of etheric matter, were perfectly correct and by no means fictional. And it is said (unprovably) that Einstein, Steinmetz, Tesla and others of similar caliber were students of its cosmogony.

OAHSPE should have the respectful attention (at very least) of all who are trying to understand the nature of the aeroforms- which are etheric constructs - and as being the only important treatise on the Etherian worlds and peoples and on cosmic history. Obtainable from ESSENES OF KOSMON; Route 2, Box 26-A, Montrose, Colo., and 2208 W. 11th St., Los Angeles 6, Calif. (890 pages; $5.00).

Our Contemporaries:

"Physical limitations imposed by the human body form the biggest drawback to space flight at present. As the Saucerians are reported to have bodies like ours they must have overcome these difficulties, possibly by using a force-field propulsion. " (But the MP Controls point out that their bodies are not like ours, except to casual observation and temporarily). (Australian Flying Saucer Record. See "Partial List of addresses in this CQC). *

"A hostile invasion and massacre of humanity by Martian monsters is completely out of the question. " (id. But the whole fantastic visitation would have been "out of the question" ten years ago.).

"A rather staggering figure of more than 10,000 sightings since 1947" (id.) (AFSR, id.).

(From Flying Saucer News: see Pub. list, last item -): "All available evi - dence indicates that the Swedish UFO's were not guided missiles, Russian or otherwise. If they had appeared in 1947 or later they would undoubtedly have been put in the "saucer" catagory, and that is where they must go now. They add several

(next page)

---

* We suggest that Associates retain this list for reference and to save time in answering inquiries.

hundred sightings to the Great Saucer Mystery; they put back the start of large-scale sightings by a year, and they offer valuable confirmation of an infrequently seen type of UFO." (Item 16: F.S.News).

(All correspondence to the FSN should now be addressed to The Hon. Secretary Mr. W.E. Nicholas, at 30 Melbourne Terrace, Newtown, Bristol 2, Eng.)

FSN announces an exclusive article by Arthur Constance, for its next issue. "Mr. Constance is greatly interested in the theory of "mat and demat" (as propounded by the BSR. (The BSR Director knows from personal correspondence that this distinguished investigator (Arthur Constance) is very favorably disposed toward the etheric interpretation of the UFO and has so expressed himself publicly on several occasions. ml).

Kind Words from Max Freedom Long: ... speaking of magazines which are hard to keep going but which give evidence of having seven lives, the Round Robin magazine comes to mind. This is the journal of the Borderland Research Associates, of which I have long been a proud member. It has become rather fabulous because of its recognition of "news" entirely overlooked by the journalistic world, or carefully avoided for various reasons. It scooped the world in report - first news of flying saucer type objects and stating that they were not something with which we have been long familiar... Its Editor ... has stood like a rock in the midst of the wild storm of information, lies, charges, denials, false explanations and so on and so forth, always weighing for us the evidences and giving the explanations of the "saucers" which seem nearest to reasonableness.He has overlooked no possible source of information, and has been the only researcher of whom I have knowledge who has weighed and sorted out the mass of statements made by spirits through mediums. When the big news does break I am confident that Meade Layne will be the first to give it to us ..."

(Bulletin No. 115 of Huna Research Associates: Dec.10,'55

(It is indeed high encouragement to receive such approval - and not for the first time - from Max Freedom Long. But I print it here not more from personal gratification, than because our Associates are entitled to know that they, and the BSR publications and the Director do not stand alone, are not without distinguished friends and scholarly support. For ten years we have maintained a non-popular and misunderstood thesis, which only now is winning respect and careful study/competent authorities. Max Long, most rightfully, does not commit himself to any thesis, but maintains a critical receptivity- which is all that is needed, or asked or hoped for to insure a final verification.

In this connection - the Saturday Evening Post of Dec. 3, 1955, carries a lengthy article entitled The Men With Deadly Dreams, by Nils P. Larsen, M.D. , of Honolulu - the subject being the "nightmare deaths"of some 130 Filipino men. Do I need to say that this distinguished physician does NOT solve the mystery, though exhausting every recourse of medical science? Should it be necessary - or worth while - to recommend the three distinguished books of Max Freedom Long, for their data on the operations of Huna magic and the lore of the Kahunas generally? Maybe - just maybe - Dr. Larsen already knows about such things, and that the Sateve Post doesn't, and so maintains discreet silence. At any rate the answer is to be had, in terms of good science and sound psychology... Figuratively speaking, of course, we hope that the servient spirits may "enter in and straighten out" - the doctor-in his ways of thinking.

NEW BSRA BOOK CLEARANCE LIST (for Dec.1, '55) may be had on request: Also the new BSRA Publication list (mimeo. booklets etc.).

The Ethership Mystery, BSR mimeo publication, is now sold out. Wehope to reprint soon.

CANCER TREATMENTS: (from "A Voice From The Gallery": Ralph M. Holland. -- 2520 - Fourth Street, Cuyahoga Falls, Ohio. Fall, 1955).

KOCH TREATMENT --- This was the first one to receive widespread public notice, having been first introduced to the public about 35 years ago. Its main feature is a chemical known as "Glyoxylide", which is the synthetic form of an oxidizing substance found in a healthy body. The Koch researchers claim that lack of this prevents the body cells functioning normally and that toxins accumulate in them. The final result will be some sort of disease. It might show up as cancer, or as tuberculosis, polio, or any one of a number of others. The nature and location of the disease depends on which group of body cells are the weakest.

The injection of the "Glyoxylide" literally "burns" the toxins off the diseased cells, its proponents say, and will also usually start the body manufacturing a sufficient amount of the chemical itself. They make no claim that it is a 100% cure. In fact, they say, it is not a cure at all in the commonly accepted meaning of the word. It merely restores certain functions of the body to normal, and the body will usually then cure itself.

There is a diet which goes with the treatment, and is an essential part of it. In general, it follows the customary "health diet", but there are certain other things which must be eliminated during the course of the treatment. These include tobacco, alcohol, animal proteins, dairy products (except cream and butter) all food cooked in aluminum or preserved in tin cans, etc. Some of these things are not too objectional under ordinary circumstances, they say, but react against the "Glyoxylide" and will chemically counteract it.

GERSON TREATMENT: - This treatment, which was devised by Dr. Max Gerson, of New York City, depends entirely on diet. In most respects this diet is the same as the Koch diet, although it stresses high potassium intake and bans all fats or oils (which the Koch diet permits in some cases.) Some research workers are of the opinion that it really works the same as the Koch treatment, except that the diet causes the body to make its own Glyoxylide.

Readers interested in further information may write: The Gerson Foundation For Cancer Treatment, Inc., 815 Park Ave., New York, N.Y.

HOXSEY TREATMENT: This is the treatment employed by the Hoxsey Clinic, which has been the subject of quite a bit of publicity, but which has demonstrated in court that its Clinic at Dallas, Texas, actually does cure many cases of cancer which other doctors have given up as "hopeless". In contrast to the other treatments, the Hoxsey medication is a family secret and no information has ever been given out as to the exact manner in which it works.

According to some tales, the medicine was discovered many years ago by a horse which had a bad cancer on its leg. It was a family pet, and they could not bring themselves to destroy it, so turned it out to pasture. After a while the cancer fell off, and the wound healed up. In searching for the reason, they remembered that it had one favorite corner in the pasture where it did most of its eating. Investigation revealed that a rather rare herb grew there. Tests on other animals, and finally on humans, showed that it actually would cure cancer and it is still the most important ingredient in the medication.

LINCOLN TREATMENT: This is a bacteriophage. That is: an organism which will seek out and destroy certain types of harmful bacteria. It was developed for use in treating pulmonary ailments and its secondary effect on cancer was discovered

(LINCOLN TREATMENT contd):

accidentally. Its effect is not usually considered as powerful as other remedies by research workers, but it does have some dramatic cures to its credit. It was sponsored by the late Senator Toby, after his son was cured of cancer by it.

KREBIOZEN* This treatment was developed by Dr. Ivy, a medical professor in Illinois, and at one time high on the medical staff of American Cancer Society. But, despite his brilliant reputation, he instantly became a "bum" so far as the A.M.A. was concerned when he dared to advocate further investigation of a cancer treatment. Krebiozen is still largely in the experimental stage, but shows signs of being a valuable weapon in the fight against cancer, according to researchers.

DROSNES - LAZENBY CLINIC: This Clinic, located in Pittsburgh, Pa., is the most recent entry in the field. They are treating cancer with a mold-grown antibiotic which they discovered and have named "Mucorhicin." To date they have never found a toxic or other unfavorable reaction from its use, and it has an impressive list of cures despite the fact that they have been taking only "terminal cases" who had a certificate from their doctor saying that their condition was hopeless. As is usual in such cases, the organized medical profession is fighting them tooth and nail, with every trick in the book.

A group of women in the neighborhood of the Clinic have now formed a Women's Auxiliary for the purpose of raising funds to carry on the research, pay for the treatment of patients whose own funds are exhausted, and publicize the Clinic. They are now seeking a nation-wide membership. Readers who are interested may write the president: Mrs. Betty Stewart, 439 South Aiken Ave., Pittsburgh 32, Pa. Since this is a voluntary organization, we suggest that return postage be sent.

- - - - - - - - - -

The following is a compilation of the addresses of the various Clinics mentioned above:

KOCH TREATMENT: -- write to: Christian Medical Research League - 14350 Jefferson Ave., Detroit 15, Michigan.-They will try and supply you with names and addresses of doctors in your locality who handle the Koch Treatment.

GERSON TREATMENT: -- The Gerson Foundation For Cancer Treatment, Inc.-- 815 Park Ave., New York, N.Y.

HOXSEY TREATMENT:-- Hoxsey Cancer Clinic - 4507 Gaston Ave.,- Dallas, Texas.

LINCOLN TREATMENT:-- 1000 Arizona St., El Paso, Texas. (Clinic).

DROSNES-LAZENBY CLINIC: -- 4774 Liberty Ave., Pittsburgh 24, Pa.

(Please write to the above for further details on each specific treatment.)

* NOTE, re Krebiozen: Bailey, Herbert - Krebiozen - Key to Cancer: new, 312 pgs. $3.50 plus .20. Pub. by Health Research, Lafayette St., Mokelumne Hill, Calif. Said to have "created a sensation" by revealing the whole story of the opposition to this treatment.

WANTED: A copy of Round Robin for May 1949. Address Mr. Wainwright Evans; Box 321 New City, Rockland Co., N.Y. & state price

Addendum to our Books-for-Sale list: EQUINOX, VOL. I, NO. VIII: $5.00.. "THE MORLEY-MARTIN EXPERIMENTS, mimeo brochure, NOW READY: $1.00

SEANCES IN AFRICA:

Excerpts from letter to BSR Director:

"....Before I came to this country (England: I am a South African), I was privileged to sit in on many seances similar to those of Mark Probert - deep-trance mediumship. One of the Controls was Nobel, the physicist, who communicated on the Discs, though unfortunately he did not give us much information. The Medium was, however, shown around various Saucers and also the "factories" where they were being constructed. He also visited most of the planets of our own system. What confused us was the fact that we did not realize that he was visiting etheric doubles of the planets. We knew that these existed and the function for them just as you do, but thought that the Discs came from the physical bodies. . . The information from these Controls was exactly similar to that which you receive. Here are a few points that might interest you:

"Most of the Discs come from Mars and Venus (i.e., Etheric doubles), while there are some from Jupiter, Saturn, and Uranus. Others come from outer space and base themselves on planets of this system.

"The people in the Discs are concerned with radiation in our Earth and the atomic explosions (as we are told many times).

"That the Discs (some types) are moved by a jet of some sort which utilizes cosmic radiation.* This was stressed many times, but it was not ascertained exactly what was meant by cosmic radiation.

"That other Discs were spheroidal and that there was an outer skin which revolved setting up magnetic force fields. What was stressed here is the fact that there is a gap between the outer skin and the actual sphere.

"That the Moon is being brought to life by the beings on the Moon's Etheric double.

"The Medium watched land being plowed on one planet without the use of any mechanical instrument. This should have tipped us off to the fact that this was a n Etheric planet.

"The Medium conversed with a young man on Venus who was constructing his own space ship. Again we did not realize that he was in contact with Etherians.

"There was more to this, but those are the most interesting points. The Control, Nobel, often said that there was a barrier to his giving more information, and I wonder now whether this was not the fact that I could not realize that the Saucers were Etherian. But then, why did he not explain this? However, that opportunity is lost but there are plenty more.

F.S. Service, Ltd. Lon.)

The magazine PREVENTION devotes the whole of its issue Vol. 7 No. 11, Nov. 25, 1955. to the subject of Vitamin C only. Prevention is published by the Rodale Press, Inc., at Emmaus, Penna., 6th & Minor Sts., one year for $4.00. Our recent article and comments on the values of the C Vitamin have caused much interest and approval, so that we add this information about the Prevention issue.

Correspondence:

"(To the BSR Director): I wish to take this opportunity to congratulate you and the BSR Associates on the wonderful work you are doing. The fact that your organization is non-sectarian, non-political etc. means that you have few hindrances to progress - although it does admit the possibility of much confusion. Spirit communication is nothing new, of course. But I think you have done much to put it on a scientific basis.

It must be remembered, however, that discarnate entities probably retain for long periods of time the beliefs and prejudices they had in earth life. And there are probably a number of liars in the group. These facts probably explain why so many conflicting statements are obtained from discarnate entities. Also, it is probable that high-raised Etherians would not appear as individuals.

In spite of this, I think the world has much to learn from your publications. Your growing success is a sign of the times."

J.S. BORLAND, JR.(NY).

Many thanks, Mr. Borland, for your interest and encouragement. It is my own belief that the thinking of the future - its science, religion, and philosophy - will be thoroughly ecclectic and reorganized from new premises. If this is so, it follows that no sectarian approach can be adequate. Yet creeds and dogmas are dear to us, and probably necessary to mankind. Perhaps the best we can do is to replace one credo by another which is a little more intelligent.

The difficulties and puzzles attendant on mediumistic and psychic investigations are well-known, and are as varied as the personalities with whom the investigator must deal. Generalizations in these matters are almost impossible. But I personally believe that communication with the excarnate is a practicable and legitimate source of knowledge, and will be so recognized in days to come, as it has been in times past.

In this connectionwe have always said explicitly that the Etheric or 4-D interpretation of the aeroforms was no invention of our own, but was first given us by the Probert Controls in the fall of 1946. We have supported it since that time, not because it came from the 'other side', but because it is adequate, and has no worthwhile alternative, and makes 'good' science and sound metaphysics. I draw more than usual confidence from this source, because after some eight years of weekly contacts with these Controls I have NOT uncovered any deceit, or extravagant pretense to knowledge. Perhaps I shouldadd too, since you mention the "high-raised Etherians", that these Controls are not etheric people, but excarnate humans from various Astral levels, some of whom have learned how to visit the etherian planes and people. Etherians are not excarnate humans, and the average human on the 'other side' knows nothing about the Etherians... These Controls are simply highly cultured humans, of fine mental caliber and widely informed, who are in position to learn and to explain many things beyond our present reach.

We do not emphasize this side of our BSR investigations, for obvious reasons. To do so would introduce irrelevant and controversial material and awaken prejudice from the start. We ask only that ideas and interpretations offered by us, or by any other source, be judged on their own basis, by their own content, and without prejudice - that is to say, with the "critical receptivity" of a scientific approach.

Yet the historian of the future (if there be such)may note with interest, that the only interpretation which the western world had to offer concerning the Visitation of the Aeroforms came not from any wisdom of its own, but from an often despised source and doctrine - of survival and communication. "From the Light from the Other Side" - to quote the words of Egon Friedell.
