CLIPS, QUOTES, and COMMENTS is issued on the first of each month, by the Borderland Sciences Research Associates -- 3524 Adams Ave., San Diego 16, California. Sample copy on request. Most back issues available.

Twelve issues (12 months) -- $5.00; six issues (6 months) for $2.50; two issues for $1.00.

Meade Layne, M.A., Editor and BSR Director.

THE MODEL ENGINEER:

This technical or semi-technical engineering magazine is issued monthly at 19/20 Noel St., London W.1, Eng. Somewhat surprisingly, the February number contains a letter from Arthur Constance on the subject of the UFO; and this is of special interest to BSR readers on account of his support of our BSR interpretation. We quote below, page 330 of M.E. 1857. (Cr. Assoc Mrs. H.M.Salley, Quarters 37, Fort Belvoir, Virginia.

"Sir:

'My interest in your correspondence on the so-called 'flying saucers' derives from my research into things scientifically inexplicable for over 30 years. My private library contains some 16,000 books and over two million news cuttings on fantastic phenomena. I have extensive contacts with researchers in other countries; have made many news broadcasts, and have a book soon to be published' . . . (re Mr. J.D. Watt's letter)- one should have read at least a few of the 30-odd books pub - lished here and in other countries before venturing an opinion in print. Waveney Girvan goes to the root of the matter - his own book summarizes the rules of observation ... accounts of phenomena can be affected as much by the "will not to believe as by the "will to believe. The value of an incident may be negatived by scepticism or indifference, just as much as it may be exaggerated by credulity. Few people realize that UFO researchers are inclined to scepticism rather than to gullibility. Most of us are convinced of the extra-terrestrial nature of the UFO, because the evidence is abundant and overwhelming. It is quite impossible to give even a representative sample of such evidence in this letter. It is available in the FS books - enough., as Whitman said in another connection, "to stagger sextillions of infi - dels" ...

'W.H.G. makes the mistake that many make - he judges the nature and structure of life (and of intelligence) in extra-terrestrial conditions by those which ob - tain in this three-dimensional world . . .

' I believe that when all sightings that can be explained by natural law and earth logic are dismissed ... there remains a formidable percentage of sightings, fully authenticated by thousands of reliable witnesses, which cannot be explained. These clearly indicated that the world is being visited by large numbers of extra-terrestrial intelligences ... vastly superior to us in moral and intellectual development.

'The craft which they use are not 'material' or subject to the laws of earth physics. They can materialize and dematerialize, and that they may also (in a physical sense) come from other planets, they emerge into our own three-dimensional world rather than "travel".

' They are intimately concerned with mankind's preparations to shatter the world with A to Z bombs, and determined to prevent this world-suicide. The USA and other world governments know of these visitants, have abundant proof of their activities and actual landings (and kidnapping of some of our aircraft, and that governments in most countries are exercising censorship, using press-ridicule, and doing all possible to prevent wide-spread panic -- which would ensue if masses of people were officially told that this world was being invaded by Etherians ...

We shall have sensational news regarding the etherian satellite, or mothership , which now circles the world at the equator, outside our atmosphere, controlling the operations of what we in our ignorance and idiocy call "flying saucers"

(end of quote from Model Engineer)

NOTE:

The foregoing article is a summary from Mr. Constance's letter; we do not mean to imply that he agrees with the BSR interpretation at every point and detail, but only in basic concepts similar to those which the BSR publications have maintained for nearly a decade past.

A Continuation of the seance reported in Clips, Quotes, and Comments "F"-6 (May 15-1956), through the deep-trance mediumship of Mark Probert:

PROFESSOR ALFRED LUNTZ: "Good evening, friends. It is growing late in your system of time, so I will speak directly to the lady here who is suffering with the skin trouble. May I examine your hands and arms? You need not worry about possible contagion, because even if it were contagious, you could not give it to the boy as long as I am working through his body... It appears to me that there is a bug at work.... I believe that the doctors have said that it might be related to tuberculosis -- I do not see that at all. It has no relation to TB of the skin.... I want to suggest that you do not have any X-ray or radium radiations -- and that you do not go into the sun with something like this. Heat only energizes the little growths. All life has come out of heat, and such things as this become stronger by heat. It incubates them and causes them to spread..... This seems definitely to be caused by a living virus or germ..... it is in the pores of the skin, not underneath the layers."

(EHO: "Could it be connected with the nerves?")

Prof. L.: "Yes. Your nerves themselves have a tendency to tingle (?) and cause the sweat glands to become active and cause the irritation."

(F.O.: "Would you mind answering a question that was left over: Have you lived on other planets or known other universes?")

Prof. L.: "It is thought that there is a possibility of other planets being inhabited and of course they are. Without my saying so at all, let us consider their endless millions, and by the law of chance, do you think there would be only this one planet that has human life or anything of the sort? Neptune and Mars do have plant growth -- Neptune more than Mars -- but it is vastly different from that of the Earth. On Neptune there is profuse plant growth in the central part, but they are very heavy and rubbery, and the sap or liquids in them are heavy like molasses in January, and -- as my honorable colleague, Ramon Natalli, has said, 'they stink to high heaven.'"

(FO.: "But they are not obnoxious to the inhabitants?")

Prof. L.: "Oh, no; there is no life there such as your human beings. The atmosphere is heavy with ammonia, that would be very detrimental to human beings."

(F.O.: "Would that be true of Mars, too?")

Prof. L.: "Yes, but Mars has a much better chance of getting forms with lungs, for the central part of Mars is very much like Earth's atmosphere; some of the plant life there is green like yours."

(S.G.): "Could one go to these other planets to get necessary experiences?"

Prof. L.: "Yes, but it is not everyone who can do this. I shall simply say that it is not very likely that the ordinary layman who knows nothing but the life he has just left will be looking for something else."

(G.I.G.: "When you leave here are you conscious of a body?")

Prof. L.: "Yes -- let us call it a body. In any state of consciousness -- and if you will work at this a bit you will find it interesting -- the dissolution of the

- (continued at bottom of next page --)

EDITOR DISCOVERS THE HOLES IN FLUORIDATION FRAUD -- (by Russ LaVine). (Reprinted from"The Highland Park News" - Des Moines, Iowa.) "Once in a while the people who are violently "FOR" fluoridation cross themselves up. It happened recently in almost two identical cases, one at Ottawa, Illinois, and the other at Mason City, Iowa.

"Let's examine the facts in the Mason City case, as that is close to home, and many of you know local residents of the community who will verify the facts, if you will but trouble to ask them.

"In Mason City the drums started beating for fluoridation. The same canned and misleading literature was distributed; the United States Public Health Service was prominent in selling the community. The newspaper crusaded FOR it, as necessary if the children of Mason City were to have fine healthy teeth. Civic groups signed petitions, went all out for the plan.

"The'endorsements' of the so-called leading health authorities were all intro - duced. Local doctors and DENTISTS testified as to the horrible states of children's teeth in Mason City, and how the decay rate was so much greater than the available dentists could take care of and that the situation was out of hand. Dr. Charles Henshaw, tax-paid employee of the Iowa State Department of Health, Dental Health Division, made frequent appearances and gave mealy-mouthed facts as to the safety of fluoridation at one part per million, and showed his charts and graphs as to how this 1 p.p.m. would save 65 pe r cent of the dental decay in children in Mason City.

"Then came the rude awakening. With the taxpayers and the public ready for the kill, somebody thought to test the water in Mason City for natural fluorine content, and it tested 1.24 PARTS PER MILLION -- a little more than the MAGIC amount the fluoridators would add.

"And all of this occurred after they had gone on record as to the bad teeth among children in Mason City.

"All the above facts can be easily verified from press files and clippings of the fluoridation fiasco in Mason City, Iowa. About the same history was written at Ottawa, Illinois, the only difference being that the water there naturally tested 1.3 parts per million."

- e n d -

("We believe that this choice editorial contribution reveals better than anything we might write how really phony the fluoridation idea is. It becomes very obvious that the so-called facts and information released by the U.S. Public Health Service is nothing but propaganda." -- (by N.H.F. Editor.) (The whole of the foregoing article and note are re-printed from the BULIETIN of the National Health Federation, - 2454 VanNess Ave., San Francisco 9, Calif.)

- -

(continued from previous page --) "physical body means one has to disappear with it too. You have heard of astral projection? If so, you will realize that the body is not by any means the last thing in your existence. In fact, it has nothing to do with the 'I' of you except that it is needed for your experiences in a three-dimen- sional consciousness.... This body is a mind body in exactly the same way as t h e body you will have when you pass over. You will have a duplicate of the body you now have for a time; and then, as you develop a desire to exist under certain con- ditions, you can change that Earth body. You may live to be 88 years old, and wrin- kle up like a prune. You will pass over and take that body with you looking like a prune- because that is the image you have taken with you. However, as you pass on, you can change your body to whatever age you want - 20 years old, if you wish."

PROCEEDINGS of the College of Universal Wisdom; Yucca Valley, Calif. A monthly publication. George W. Van Tassel, Editor. Copyrighted. Financed by contributions. "Mailed free to those who request it and support it". There is special need at present for a building fund.

The BSR Director has neither the knowledge or ability to make a critical estimate of Mr. Van Tassel's activities - nor of other publications and groups often referred to in C.Q.C, and Round Robin. But since the PROCEEDINGS certainly contain, from time to time, material of interest and probable importance, they are recommended to all BSR Associates. Send Mr. Van Tassell at least $1.00 for a few issues, after which you will probably want to continue with it.

The current issue, July 1956, is No. 4 of Vol. IV, and contains:

A front page picture of two space ships, taken from a plane and looking downward on them - thus giving them an earth background. Good enlargement on page 16. Obtained from the Mayor of Hiawatha, Iowa - near Cedar Rapids. "Verifiable".

Authors, Hearsay, and Facts: Comments on Keyhoe, Wilkins, Michel, Ruppelt and others. "The amazing part of this whole business is" - writes Editor Van Tassell - "that most of the authors who are accepted as authorities have stated that they have never seen a 'saucer', let alone contacted the people from one. Then again, the authors of 'contact books' do not have any titles, are non-authoritative, and are classified as crackpots."

"The thing that proves the reality of the saucers, and these contacts, is the fact that those who believe in them do not become unbelievers. The flow of thoughtful choice is all one way. Unbelievers become believers, but the latter never become unbelievers . . . "

"We have talked personally with two top civilian brain surgeons who were called in by the Air Force, to postmortem the brains of 16 bodies taken from the 'saucer' that crashed near Denver. (See Scully's book, "Behind the Flying Saucers" for reference to this ship."). Scully, myself and others have personally talked to a Captain in the Air Force, who was one of the personnelthat removed the bodies from this ship. I personally talked with "Venuto (of the Los Angeles Times case, who visited us here several months after he disappeared from his job in Los Angeles . This visit was in the presence of 23 witnesses.. . I talked with a Major in Air Force Intelligence ... who told me of watching a remote controlled ship vanish gradually into thin air near Mt. San Jacinto, after it had crashed. . .

"Truth will out - in spite of the hierarchy of money, churchianity, and authority."

Other articles in the current PROCEEDINGS are headed: U.F.O -- What's Going On? -- College Progress -- Verification Again -- New Book -- Bridey Murphy Saucers-- Local Sighting -- War Signs -- Tape Recordings...

(An additional quotation from PROCEEDINGS) : "The latest stupid proposal by the "experts" is a half-billion dollar underground shelter for several million people under Los Angeles. It might save having to bury that many people. It would have to be financed by Federal money, of course. An underground shelter of this size would not only make the surface subject to settling in an earthquake area, but would not provide for protection from radioactivity in the air. When people finally had to emerge due to lack of food etc. they would still be subject to radiation from the ground, air, food, and water. Leave it to the "experts" to find ways to waste the taxpayer's money. . . Something is wrong - but you can find the answer to many questions if you listen closely. Something inside is trying to be heard and recognized outwardly".

THE AKUALELE RESEARCH GROUP - of Honolulu, "is having another 'space Convention', according to their recent bulletin. Leader of the group is Riley Crabb, lecturer and publicist, BSR Associate, and also well-known in Theosophical circles. He has done much to make the BSR activities known in the Islands and his critical evaluations are always worth while. In this connection we quote the following paragraph from the Bulletin:

> THE REPORT ON UNIDENTIFIED FLYING OBJECTS, by Captain Edward J. Ruppelt: This masterpiece of indirection, misdirection, obfuscation and substantiation is supposed to be the last word on 'Flying Saucers'. It should be, because Ruppelt headed the Air Force's Flying Saucer Bureau from 1951 through 1953. Official name for his group was, if you've forgotten, "Project Bluebook". For those who have swallowed the Air Force line, hook and sinker, that flying saucers are either commonly known objects or hallucinations, Ruppelt's revelations wil be a shock. He does admit that the F.S. are real but absolutely refuses to draw conclusions as to where they come from and why they are here. To get the public's attention away from those naughty words, flying saucers, Ruppelt says he invented the term Unidentified Flying Object, or UFO (pronounced you-foh) . . . . . .
>
> We will have a display of BSRA material (Hdqrs at 3524 Adams Ave., San Diego 16, Calif.) This organization has held to the interplane, interplanetary origin of the UFO since 1946.
> ---

There is, of course, no definite date for the beginning of the aeroform phenomena, since they have been known for centuries, but one convenient reference point is the night of the meteor shower in the fall of 1946. We cannot now locate a copy of the first bulletin issued by us shortly after that date, but quote from a booklet called Mystery of the Ethership which we put out in August, 1948, which begins:

> . . ."It has been nearly two years* since there appeared, in the night skies over San Diego, the strange aircraft later known as the Kareeta. It was a huge and formidable construction, dimly illuminated, with flexible, flapping wingtips, and it swooped and darted at immense speed, or hung poised, or drifted slowly at varying altitudes. Some hundreds of people must have observed the craft from varying positions, and the present writer took the trouble to collect statements from 35 or 40 of them, and to publish a summary of what these contained. This report was given a measure of attention by the press and radio, but always of course with tongue in cheek, was derided in some quarters, and on the whole ignored or soon forgotten.
>
> "It is still forgotten, but not because it proved to be a canard or a delusion - as it certainly was not:" .....

It was 'forgotten' because it was in a sense the beginning in this country of the Haunted Decade, when the news services were deluged by 'sightings' from all parts of the world, more astonishing than the Kareeta - and when for nearly ten years we were deafened by the brays of human jackasses and a thousand incredible stupidities of 'scientists' and 'experts' and the blattings of press and radio. L'affaire Kareeta was indeed lost to sight, but only through the advent of even more astonishing events.

It is somewhat strange that the first known person to see the Kareeta (which is said to mean 'God-man-in-flight) was the medium Mark Probert - through whom was to come the first interpretation of the aeroforms - and to this day the only workable and inclusive one. If the future should boast a historian of our present, perhaps this remarkable and devoted personality will receive some tithe of the distinction he deserves.

* 1946 to 1948

ml

FLYING SAUCER REVIEW: In his article entitled This Amazing Universe, the well-known writer Arthur Constance remarks: "Surveying most 'saucer' publications now current, and excluding F.S.R. from my survey, I feel that Meade Layne and the Borderland Sciences Research Associates have the right attitude. In the publications that they issue ... they do not repeat sightings - unless it is to stress some new angle or reveal new evidence.

They take the question of the UFO and all associated questions seriously. There is no cartooning, no joking about them - no silly drawings. They realize, as I do, that it is bad enough to have to fight the light-hearted ridicule which the unfortunate phrase "flying saucers" has always attracted to our investigations, withmaking ourselves even more ridiculous. I agree with them that the problem of the UFO lies in the ultra-dimensional field rather than in terms of our three-dimen - sional world. But that does not mean that either Meade Layne or I is prejudiced toward "psychic" explanations.

"It does mean, however, that such explanations - and the mass of data that is 'coming through' mediums - needs serious investigation. I have indicated the BSR viewpoint because I feel that it is the sanest, and most likely to produce results.

"Summarizing it: (1) Avoiding repetition of sightings unless there is something fresh to say, or some new angle. (2) Taking the UFO seriously - for the fate of mankind may well depend on them. (3) Examining all evidence with an open mind, and realizing that any approach to the solution of the problem may well lie in untra-dimensional fields, dismissing conventional time-space conceptions. . . We need not be depressed by the conventional scientists' emphasis on "authority" (nor) be surprised, in a few years time, to read articles in the press giving Menzel and Woolley the honor of having been among the first to investigate the UFO with "I told you so" implications regarding their reality. . ."

CONTENTS of Flying Saucer Review for the issue quoted include: Moseley in Cloud-land -- Antarctic Phenomenon -- Flight Without Effort -- International Saucer Day -- Report on the UFO -- Official Saucers Screened -- Does Antarctica Hold the Key? -- Who's Who in F.S. Reports? -- Current Events in the Heavens -- The Amazing Universe (quoted from above) -- World Round-up -- Book Reviews. A slick-paper magazine, 32 pages; edited by Derek D. Dempster. Bi-monthly. No. 1 Doughty Street, London WC 1, Eng. Per year, $3.50; single .60. Extensive foreign circulation.

In addendum to the above: Arthur Constance proposes to discuss, in the next issue of F.S. Review, the book OAHSPE, which is unique in the literature of western occultism and in its concern with the history of Etheric worlds and peoples.

Copies of OAHSPE can be obtained from The Essenes of Kosmon Publishing Comapny, Rt. 2, Box 26-A, Montrose, Colorado - and - 2208 W. 11th St., Los Angeles 6, Calif. 844 pages, plus Index. Price $5.00 unless lately increased. The Head of the Essene organization is Wing Anderson, widely known as a publisher of prophetic and occult books; Los Angeles address as just given. . . There have been 11 American editions since 1882, and four English since 1910.

"If a book were to fall down from the sky with Jehovih's signature to it, man would not accept the book on that account. Why then should anything be said about how this book was written? It is not a destroyer of old systems or religions. It reveals a new one, adapted to this age, wherein all men can be as brethren."

(From Editor's preface to first edition)

EVA SEES ALL. -- Boston, (U.P.)-from The Washington Post and Times Herald, Friday, February 3, 1956. New instrument called "Eva" makes it possible for man to see in the dark. "Eva can detect and picture a black man sitting on top of a pile of coal in an underground cave without openings," Dr. Bruce Billings said.

Dr. Billings is vice-president of Baird Associates, Inc., of Cambridge which developed the device, an "evaporagraph". It was presented yesterday to a non-military audience for the first time at an annual meeting of American Research and Development Corporation, in Boston.

Billings, who dubbed the device "Eva", says the instrument captures every detail even in pitch black darkness. Pictures taken with the instrument's aid were clearly defined. Dr. Billings said its success was possible because all objects throw off infra-red rays which in turn are picked up by "Eva".

Radiation enters a lens at one end of the instrument. Development of the image is watched through an eye piece at the other end. Billings said the device would be used to measure heat flow in radio, detect heat leakage from homes and examine suspected areas for surgery.

QUESTION FROM SAO PAULO:

"What do you think about this case? At 6:00 p.m. of June 3rd, 1956, several people of Cantanduva, a city of Sao Paulo State, saw an odd thing in the skies: some sort of fireball in vertical descent that let loose a white band of great length. That band remained in the air for a while. Probably not a meteor because the band did not disappear immediately when the ball ran in space.

(Under an earlier date the same correspondent, Sr. Jose Faria, reported: 'that a cigar-shaped object over Sao Paulo delivered 3 discs. By two gaps the UFO let loose dense smoke, and described a long circle when it delivered at three times the Discs with a metallic flare. Seen against the sun they had a red color. Two fo the Discs went off, south and north, but the third remained in the open sky about one hour doing complicated flight evolutions. Finally the mother ship (cigar-shaped) got the upper sky and disappeared in a few seconds.

Sr. José Escobar Faria
Rua 13 de Maio, 1240, Sao Paulo, Brasil.

Lic. Faria is a BSR Associate and would welcome correspondence concerning UFO and related phenomena.

IN REPLY TO INQUIRIES: The booklet entitled THE RESULT, by F.R. Bartholomew, has now been reissued, increased in size to about 60 pages, has an attractive plastic binding, and carries the cover by-line: "Ancient Christian Traditions Compared with Ancient History - and the Resulting Symbolic Religion, as seen by the teachings of Dr. O.A. Ostby.-F.R. Bartholomew, Narrator; 2501 Irving Ave. So., Minneapolis, Minn.- Or, order from BSRA Hdqrs. $1.00 per copy. This small book (5 x 8½ ") is deservedly popular.

In a somewhat similar vein to the above, we can now offer a few more copies of Spiritism and the Beginnings of Christiantiy, by James Russell Lowell Morrell; 87 pages, neatly printed, flexible cover, pocket size (4½ x 6"). Along with this we include (pro tem.) two smaller items entitled Thy Kingdom Come. Interesting reading, competent scholarship. All three items, $1.00. Order from the author, at Remington, Ind. - or from BSR Hdqrs. if preferred.

CONCERNING VIVISECTION - A few comments on what is probably the most damnable practise known to 'civilized' man.

Vivisection is a crime! (Victor Hugo)

There will come a time when the world will look back to modern vivisection in the name of science as they do now to burning at the stake in the name of religion. (Dr.Henry J. Bigelow; Harvard Medical School, etc.)

Damnable in its effect on human character. (Bishop John Chanler White)

A detestable practise. . . I cannot understand how any civilized man can countenance its continuance. (Cardinal Manning).

Honorable men do not behave dishonorably, even to dogs (George Bernard Shaw).

Modern scientific men in their biological inquisitions have deliberately placed themselves outside the human conscience ... They undermine the sensitizing of the general conscience. (John Cowper Powys)

Vivisection is the blackest of all the black crimes that man is at present committing against God and His fair creation. (Gandhi)

THE HUMANITARIAN LEAGUE, of Rochester, N.Y., Inc.
97 Tremont St., Rochester 8
is active and dependable in the struggle against this iniquity. Write them for information.

ml

We are in receipt of Issue 1, Vol. I of the MARKED BLADE: "Published by Charles A. Marcoux, Managing Director of the Sub-surface Research Center, located at Flint, Michigan. Free to members and co-workers. Published only when necessity calls and finances are available. The express purpose is the pooling of ideas and making them available. 563 ½ Louisa - Flint 3, Mich. " --- MARKED BLADE characterizes Round Robin (page 11) as "the best in its field for those interested in the occult, supernatural etc. Mark Probert is one of its main highlights."... We perceive that Editor Marcoux is a man of discernment (!). Merci beaucoup.

ml

ULTRA-DIMENSIONAL - or WHAT?

(From Sta.Barbara News-Press; from San Bernardino, July 25, '56. Photo reproduced, NO story, in L.A. Times of July 25. Associate George C. Wilson, 1517 Bluff Drive, Sta. Barbara, Calif. sends us the following:

"A 15-year-old boy produced a picture of a saucer-like object today and said that he snapped it when it flew over his back yard last week. Michael Savage, 15, son of a San Bernardino surgeon, said he was trying out a new camera when he saw a quick motion in the sky and snapped a photo. The picture shows a large flattened spheroid apparently in the air over some trees.

"This sighting (Assoc. Wilson says) is one of the best to prove the ultra - dimensional field theory. No one can tell me that huge ships can be cruising around at tree-top level without a great number of people seeing them and something like a panic resulting. Someone should get the boy's story at first hand; it might prove more interesting than the Casa Blanca incident ... A red fireball was seen off Sta. Barbara three days ago that was described as bigger than

the moon. When an airplane came along it went up vertically almost out of sight, then dropped down to its old observation place. . . Yada says on a tape I have, that "many more 'Saucers', some of them very strange, will be seen shortly after the conclusion of the next H-bomb series. "Put it down in your little black book." Boy, has he been right! " G.C.W.

ASSOC. DON GREEN of Anaheim, Calif. sends us the following:

Sober Reality: July 23, 1956 an Air Force C 131 en route from Hamilton A.F.Base near San Francisco, to Albuquerque, about 40 miles north of Bakersfield struck or was struck by something that the pilot said felt like a brick wall. He also said that none of the members of the crew saw any other craft in the air before the accident. The plane went into a steep dive from 16,000 ft.. The pilot regained control at about 7000 ft. and made an emergency landing.

Coexistent: After the mysterious accident, 'saucer' reports began to come in. A.P. dispatches reported that a Highway City woman near Fresno saw a 'south-bound egg' south of her home about 5:30 a.m. some six hours before the near crash. A similar sighting was reported by a Madera County couple, who saw the object west-bound above Pixley.

Obscuration: The Air Force declined to comment on the reports. (Data from the L.A. Times.

Conjecture: None of the crew saw any other craft before the accident -- yet six hours after 5:30 a.m. would be 11:30 a.m. and broad daylight. Whatever tore into them was no small object, if it hit like a brick wall. My knowledge of MAT and DEMAT is practically nil - so in consequence I'm wondering whether or not if an object in the 'demat' cycle collided with a Mat object, would anything happen to either one? Or would the frequency difference, or density difference, render them far apart - even though one of them passed through the other.

One thing seems to be known definitely -- Something hit that plane with enough force to rip off "the elevator, the left horizontal stabilizer and part of the plane's tail assembly.'

And maybe this is normal - but it seems odd to me that the collision took place 40 miles north of Bakersfield, and pieces of the C 131 D were picked up 25 miles northwest of Bakersfield. However, nothing has been found to indicate that another aircraft was mixed up in the deal. Could it have been one of our 'guided' missiles - say 'unguided'? Or the egg-shaped gismo, say, temporarily unguided? Or ? That's right - OR." D.G.

(So far as we know, the best the A.F. has been able to offer as an explanation is summed up in the one word "rivets". CQC Ed.)

ASSOCIATES PLEASE TAKE NOTE: If you have friends suffering from cancer, and if you wish them to have information concerning the various treatments now in use, send their names and addresses to BSR Hdqrs. Remember that this service is limited and informational only; we have nothing to sell, and never give medical advice.
