CLIPS, QUOTES, and COMMENTS is issued on the first of each month, by the Borderland Sciences Research Associates -- 3524 Adams Ave., San Diego 16, California. Sample copy on request. Most back issues available. Twelve issues (12 months) for $5.00; six issues (6 months) for $2.50; two issues for $1.00.

Meade Layne, M.A., Editor and BSR Director. Margaret V. Locke, Associate Editor; Kathleen Rogallo, book-keeper.

CORRESPONDENCE:

EXCERPTS from letter, Trevor James, to "Clips, Quotes, and Comments" Editor, concerning in part his (James') forth-coming book. Mr. James is well-known for his excellent brochure, "SPACEMEN, FRIENDS OR FOES", and his new book promises important material. To be published by The New Age Publishing Co., 1542 Glendale Blvd., Los Angeles 26, California. I do not hesitate to recommend this work in advance.

ML

"On the UFO front events are marching forward with amazing speed and with rather unpleasant lineaments. My own activities in the telepathic field have died a natural death, largely as a result of pursueing a more ordered path of development which is making the murk clearer at every step. Also, it may be that all that was to be given had been given, and that was that. My efforts at present are otherwise concentrated. . .

"Steadily I am hardening upon the concept that the bulk of these craft (UFO) are of 'satanic' allegiance, and that the etheric constructs are in a minority. At least from the point of view of being detectable by our vision. Presumably they may carry out their missions without necessarily becoming visible. Comparing notes and experiences with a little 'reasoning and seasoning', I am also reaching the conclusion that frequently these satanic craft, when operating close to our frequency, definitely do NOT have the power to prevent themselves from descending into our optical range. At this point they choose to generate clouds as concealment, rather than appear as fully visible material. If the much bruited rise in the vibratory level of the earth is in fact taking place, it might well be that these appearances on the part of the UFO are involuntary.

"I am now absolutely positive that the craft are in our atmopshere constantly and without surcease. They are not perceptible, of course, but I venture to hope that full development of a proper photographic system in use with first-class optical equipment will make UFO photos as common as those of pin-up girls - though the occupants of most of the UFO are probably considerably less desirable. I doubt very much if any of these photographs will reveal the presence within them of the 'long golden hair and no dental caries' types, IF we are ever able to photograph them as they are.

"The delay in publication of my book has been very fortunate, for it has made possible the inclusion of much additional data. Also, I hope to have a fine crop of illustrations being exhibited for the first time.

(Our correspondent here refers to data bearing on the presence among us of 'moon physicals', passing themselves off as Venusians, Martians, etc. Deleted by his request from this summary, but will appear in the book.)

"Several unsavory gents have shown up at different places, and exhibited an ability to appear and disappear and yet remain solid. This has been sufficient to convince the nincompoops to whom they have appeared that they were all they claimed and purported to be. To me, their various nefarious activities stamp them for what they are -- cruel and unethical beings who are down here for purposes of subversion (as in their actions toward dogs and cats. 'By their fruits', etc.). One of the most dynamic of the theories advanced in the book is that satanic UFO are working with the Soviets. NOT in the sense of every Soviet scientist having an invisible buddy of whom he is cognizant, but in terms of allegiance. Stalin's corrupting

training in black magic under a Tashi Lama is very significant, and brings an early Ashtar message home to roost with a bang. There is a very significant relation - ship between the German aeronautical advances, and those of the Soviets when each nation was in its turn the major agency of anti-Christ on earth. Germany's rockets, flying bombs, rocket airplanes, jet aircraft were products of very advanced aero - nautical thinking. Nowadays the Soviets are seemingly ahead of us in missiles, and every plane we produce has an immediate counterpart in a nation that four decades ago was 95 per cent illiterate. Where this material, this inspiration is coming from doesn't need much imagining - for who is the Prince of the Powers of the Air? Is it impressed on some of the Lemurian incarnates now abounding in Russia?

I also have a new view on the atom bomb and its effect on the denizens of these worlds akin to our own. I am convinced that the inability of the satanic forces to leave the earth's envelope at will, as is the case with the etheric forces, is the major reason for their harping on the bomb... Certainly it is one thing we can use on them that they have no defense against, which is probably a fortunate thing for us. Little do we realize how all these things are interlocked in the UFO phenomena.

"As for the A.F., they don't know how to deal with these aggressive forces and cannot reveal details to the public at this time. Spirit beings properly defending themselves cannot be hammered into submission like recalcitrant incarnates, and there is abundant evidence that the old-time military thinking is going out as fast, if not faster, than the tandem bicycle. Also we must bear in mind constantly the fact that the military mind is a materialistic and singularly inflexible organism, not given to elasticity in concept nor to welcoming any viewpoint that threatens the status quo, and with it rank and income and social prestige. So I see no reason to expect too much from the Air Force, even though they are at their wits end in trying to figure this thing out from a materialistic physical standpoint. They are caught in this ridiculous interplanetary web, originally woven by Keyhoe and other early orthodox writers. There is no reason at all why they should all be from other planets, other than the somewhat pitiful and deplorable concept that we do not admit the possibility of beings different from ourselves dwelling in habitats that surround and interpenetrate our own.

"As for science, bringing as it does with the passing of every week new destruct- ive delights to flutter the hearts of the militarists, there is little that can be said, or need be said. Physical science is nearing the end of its rope, and with all its greater glories to be found in destructive achievement it does not present an especially pleasant panorama to the enlightened person. Trophies, prizes, adulat- ions, plaudits, handshakes, and publicity attend not the true benefactors of our physical sciences, but rather those who have added more efficient and scalier wings to airborne destruction.

"So be it. For in the final wash all will get exactly what they deserve. People who labor tirelessly for a better world have no appetite for the plaudits of this. Many who hope and wish, and would pray if they knew how that you would just simply go away, will one day seek you out. At that time you, and all of us, will know that the New Age is upon us.

Sincerely ...."

A FEW WORDS OF COMMENT on Mr. James' letter:

"Satanic allegiance". The first of these words, as used by Mr. James, does not seem to carry theological or religious implications, as of some Personality and Prince of Darkness, but only implies in a general way powers and entities devoted to what we call evil.

"Etheric constructs in the minority". My guess is, Mr. Trevor would be willing to make this read: 'most of the small disc-shaped objects reported by observers are probably material in our sense of the word matter - whatever their status may be before and after such observation'. Our information is, that the huge mother ships, capable of 'crossing' interstellar space, are etheric in nature (the ether itself being a 'finer and denser grade' of matter; that these can and do convert their frequencies, and are then visible and tangible on our plane of perception.

It seems possible if not probable that the Vimanas of the ancients were usable within our atmosphere only.

"I am positive that the craft are within our atmosphere constantly": The presence of vast numbers of UFO, of all sizes and descriptions, in the environs of our globe, has been asserted many times by various 'communicators' - who also describe themselves by rank and title and various high dignities, or again by well-known names of Masters and adepts, on astral, etheric or mundane frequencies. In this connection, the incursion of imps or elementals on a group of negro school-children at Casa Blanca (near Riverside, Calif.) is objective and factual, and notable if only because these happy gob lins had four feet and four arms apiece. (Described in BSR C.Q.C. - "E"-9, of November 15, 1955).

Moon Physicals., etc. There are increasing indications that lunar physicals (perhaps not native to Luna) have more than one finger in our terrestrial affairs and their role seems to be of increasing importance.

"Ridiculous interplanetary web. . ." We have always believed that the Probert Controls were approximately right, in affirming that our visitors are of races and kinds innumerable, and from many different habitats, forms, cultures, ways of life. Many celestial bodies are visited by them; there are those who dwell in space (i.e., in etheric worlds), and even in vast 'space-ships' sometimes of planetary size. They do not belong to any one civilization or possess the same moral and ethical ideas, or have the same intellectual and scientific attainments. The universe swarms with life, and the mind of man can imagine nothing so fantastic that Nature herself has not long since produced it in actuality. Our passion for simplicity, for some single, clear and easy explanation (beloved of all scientists) of the most complex phenomena, leads us astray and closes the door on 'the infinite actualities of Nature'.

ML

ANTARCTICA: "News is beginning to come through about this mysterious area. First physical reports we heard of was in 1950 -- Commander Orrego, of the Chilean Navy, who told of taking thousands of feet of film of UFO's at low altitudes. Then Com. Byrd discovered a warm water lake in the Antarctica continent.

"Our group has been in on-and-off contact telepathically with Rainbow Civiliza - tion in the area for a long time. Location of one of the ancient Brotherhoods. They have over 350 of the circle wing craft, one tubular craft, in their under-the-ice cities. . . " (From "The Fellowship Of Golden Illumination, Inc", 1014 South Lake St., Los Angeles 6, Calif. --- Eugene H. Drake, Director, "Golden Light".)

"CITIES BURIED ALIVE" --

(Under the headline "A-Report Envisions Cities Buried Alive", the San Diego Tribune of July 12, 1957 quotes a government report, Washington (INS) dispatch, issued by the Defense Department and the Atomic Energy Commission. The alarming description of the H-Bomb effects is not, therefore, mere newspaper sensationalism):

"A government report today suggested that urban populations might be buried alive in all-out nuclear war. It also said that even a baby H-bomb is fifteen times more destructive than the Hiroshima explosion--not counting radioactive fall-out. And it told how to make 'dirty' nuclear bombs--devices that maximize fall-out --- but kept the anatomy of'clean'bombs a secret.

"The report is called 'the most valuable publication in recent years' by former Civil Defense Director Val Peterson. The 579-page document on 'the effects of nuclear weapons' said a single missile designed to burrow fifty feet into the ground before exploding could throw up ten million tons of rock and earth -- enough to cover one square mile to a depth of six or seven feet.

"The long-awaited report, issued jointly by the Defense Department and the Atomic Energy Commission, was the first revision in seven years of the government's standard handbook on weapons effects. The revision established 'megaton' explosions, equal to a million or more tons of TNT, as the 'nominal' or 'yardstick' weapons in place of the Hiroshima and Nagasaki type blasts, equal to 20,000 tons o f TNT. Peterson, who aided in the study, said the report provides 'necessary technical background for the development of counter measures against all nuclear effects', including blast, heat, and radioactivity.

"The government agencies drew conclusions from underground detonation tests conducted secretly in Nevada in 1951 and 1955, as well as from air and surface bursts. Their report said: 'It is estimated from tests made in Nevada that if a one megaton bomb were dropped from the air and penetrated underground in sandy soil to a depth of fifty feet before exploding, the resulting crater would be 190 feet deep and 1,400 feet across. This means that approximately ten million tons o f soil and rock would be hurled upward from the earth's surface. The volume of the crater and the mass of materials thrown up will increase roughly in proportion to the energy of the bomb.'

"Accompanying diagrams showed that the column of earth would rise about a mile in the air, with hot explosion gases pushing it outward in the shape of an inverted cone. The earth would then fall over a mile-wide area---the same area that would be obliterated by an air or surface blast of similar size."

WE AGAIN CALL ATTENTION to the recent mimeo brochure "JUST JOTTINGS", by F.R. Bartholomew -- 2501 Irving Ave., So., Minneapolis 5, Minn., -- (45 pages -- price $1.00) -- Quotations bearing on the interaction of spirit forces with electrons a n d protons.

- -

B.S.R.A. Item : TRANSCRIPTS (of the Mark Probert seances)-(about 10 pgs)-- Now sold as separate brochure. Latest is No. 31.(These do not duplicate records in "Seance Reports".)- Two for $1.00. -- We have on hand about 8 issues, printed during last two years.

"GHOST GUARDED MUMMIES -- (From "Prediction" magazine, Link House, Store St., London, W.C.1, England) ". . . . Neither toil nor ingenuity was spared, therefore, in building, first, the pyramids, and then, as these proved unable to keep out invaders, the burial-chambers, hewn out of the living rock in the Valley of the Kings.

"The Egyptian priesthood would certainly be called upnn to reinforce the material defenses with all the magic at their command, to ensure the inviolability of t h e tomb; or, if that could not be guaranteed, to contrive a sinister vengeance on any intruder. That they could indeed do so, no student of the Kahuna magic can doubt.

"We know from their own tradition that the Polynesians emigrated from the Nile, and it is to be supposed that the priestly caste of Egypt had a knowledge of the same high magic as the Polynesian Kahunas, which probably had its fountain-head in Atlantis. The priests of Egypt were possibly adepts good enough to summon up and trap elementals from the lower astral planes, and to make them focal points of malefic influence; but if they could not do that they certainly commanded the same power as the Kahunas to enslave spirits to be perpetual guardians of holy places.

"The Kahunas protected their shrines by controlling with hypnotic suggestion the subconscious spirit of a normal human being. They knew that two spirits inhabit each human body; that they can exist apart from each other; and that the lower animal spirit is unable to disobey a hypnotic command. The Egyptian priests, too, must have known this secret and made use of it.

"In the work at the tomb large numbers of slaves were employed, and it is obvious that those, at any rate, who had to know the intimate secret of where the Pharaoh lay, would be put to death after their task was completed. Like the slaves who buried Attila, their lips had to be sealed by death if the secret was to be kept.

"Every burial of a Pharaoh then, was followed by a mass execution of these unfortunates who had, in very truth, walked in the Valley of the Shadow of Death. They also supplied the psychic material for the black magicians. The subconscious spirits of such prisoners could be hypnotized before execution -- probably during sleep -- and commanded to separate from their conscious partners after death; to remain in the tomb, and attack, obsess, or otherwise molest any intruder; perhaps to drive him to madness, and death by suicide.

"The knowledge that such means of protection would certainly be employed must itself have constituted a deterrent to the mummy murderers, unless they were skilled magicians who could locate the shadowy sentinels and disarm them by powerful counter-suggestion -- a tricky business. Only the royal tombs needed ghostly protection, for there was no object in destroying the mummies of lesser men; hence modern desecrations have not all been followed by a host of dark calamities such as befell the discoverers of Tutankhamen's tomb.

"There may still be royal tombs awaiting discovery. Let intruders beware! Fifty centuries have passed since the ghostly sentries were chained to their posts, but time has no existence in the twilight sleep of subconscious spirits. . . ."

B.S.R.A. Item: "THE COMING OF THE GUARDIANS": (Mimeo brochure). Latest printing. (by N. Meade Layne) Rearranged text (about 1/3); 35-40 pages added; about 100 pgs. complete. -Interpretation of the flying saucers from the 'other side', through deep-trance mediumship of Mark Probert. (Communications from the "Inner Circle".) Price: $4.00 per copy. - B.S.R.A. No. 34,(on Publication List.) Order from BSR Hdqrs.

Cancer and Aluminum: (Dr. M.L. Parrott in The Challenge of October, 1949. Reprinted in Beacon Light Herald, William Kullgren, Editor, June, 1957. An important four-page article. The dangers in the use of aluminum cooking ware have often been pointed out, but with little effect on its enormous sale; but - "you have the right to die with a self-induced cancer" if you want to. We have space here for only a few concluding items from Beacon Light:

"..Tea looks cloudy instead of clear when made in an aluminum pot -- a fresh egg smells bad when fried in an aluminum pan -- apple or rhubarb turn dark green when left standing in an aluminum dish -- bread dough turns black when rubbed on or left in aluminum -- vegetables boiled until dry in aluminum ware are covered with a light frost -- cabbage turns an aluminum sauce-pan black -- tomatoes, apples, or rhubarb cooked for five minutes will make any aluminum pot bright and clean -- cherries boiled and allowed to remain for 12 hours will cause an aluminum sauce-pan to be full of little pits, or holes, apparently -- note the bitter taste of coffee made in an aluminum pot or percolator after standing a few hours -- stir the white of an egg with an aluminum spoon or in an aluminum dish, and note it change to a green color.

"I think the foregoing information should be sufficient to open thinking people's eyes to the fact that by the use of aluminum cooking utensils they are placing themselves in a very dangerous position. The gentlemen who have vouchsafed this information are men of standing in their profession, and they are big enough and brave enough to get out of the rut and think things out for themselves. The danger of aluminum poisoning was discovered by them, and instead of looking up statistics of various experimentation they studied its effects on their own patients, and after years of hard work and careful study they gave their findings to the public. As was, and is to be expected, their colleagues who were content to go on in the same old way were the first to persecute and belittle them, and they were branded as shareholders in enamel companies! Such is the pioneer's reward!

"I will close with a London doctor's advice: 'If you want sores in your intestines, ignore what I am writing and use all the aluminum utensils you wish; don't allow anything I say to stop you; you have the right to die with a self-induced cancer the same as anybody else."

- -

SOME PERTINENT OPINIONS CONCERNING CANCER: (From "National Health Federation Bulletin", March-April, 1957): "... Dr. L. Duncan Bulkeley, senior surgeon of the New York Skin and Cancer Hospital: 'Cancer is not a surgical disease. Neither surgery, X-ray or radium have changed in any way, the ultimate mortality of cancer in forty years!'

Dr. Herman Joseph Muller, Nobel prize winner, world renowned scientist, states that the medical profession is permanently damaging the American life stream through the unwise use of X-rays. There is no dosage of X-ray so low as to be without risk of producing harmful mutations.

Dr. Chal P. Bryant, M.D., Seattle, Wash.: 'I know too well the folly of attempting to cure cancer by surgery, X-ray or radium (after 20 years of major surgery). I also know that cancer is not a local disease -- never has been. Chiropractic has accomplished far more than any surgery, etc.' **
(Quoted by "The Beacon Light Herald", Wm. Kullgren, Editor.-- Vol. 25- No. 7 (July, 1957. -- Monthly publication - address: Atascadero, California.)
(** plus 7 other authorities).

MIND AND MATTER is the title of a quarterly Journal published by the de la Warr Laboratories, Raleigh Park Road, Oxford, England. The descriptive folder and subscription form sent to ROUND ROBIN contains the following interesting paragraph:

". . . . The average person may be excused from seeing the down to earth connection between Mind and Matter, because there has hitherto been insufficient information to enable him to do so. It is possible, for instance, that were he shown how he can affect all forms of living matter merely by his intermittent thought, he would respond accordingly, as it is a very simple process.

Research at the de la Warr Laboratories at Oxford has shown that the conscious effort can increase the number of atoms in either plants, animals, or humans, even over great distances. This simple exposition of the power of the Mind calls for an immediate reconsideration by the scientists of what constitutes Matter. We are all affecting each other in a chaotic interchange of emotions. The materialistic patterns of modern life have practically parted company with spiritual values, whereas a greater knowledge would have integrated them. The new light that can now be brought to bear on even our domestic problems would at least dispel the illusions that enable those problems to persist.

Ample evidence is available, for example, that the adverse cell growth of early cancer may be corrected by this new information concerning the formative forces of Nature. Equally significant evidence is available to show that even emotional forces such as greed and hatred can be corrected by judicious application of these same principles. The pages of MIND AND MATTER are being devoted to the world wide dissemination of the basic principles involved. T h e discovery of these basic principles is the birth of a new voice that must be heard in the council chambers of the free world. . . ."

RADIATION HAZARDS IN WAR AND PEACE: Address delivered by Hon. Chet. Holifield, M.C., Chairman of Special Sub-Committee on Radiation: 22 mimeo pgs.; received by BSR July 13, 1957. Congressman Holifield's address is: 1034 New House Office Bldg., Washington, D.C. (See next issue ROUND ROBIN (XIII-2).

- -

B.S.R.A. Items: "GLIMPSES OF THE UNSEEN WORLD" (mimeo), and "T H E ETHER AND ITS VORTICES": both by physicist C.F. Krafft (address: Rt. 2- Box 687 -- Annandale, Va.) "GLIMPSES", about 22 pages. (Order from BSRA). --- "THE ETHER AND ITS VORTICES" (printed) (about 65 pgs). - The existence of the ether is vital to a correct interpretation of the aeroforms. (Favorably reviewed by a national magazine.) -- Order from BSRA, as BSRA No. 47, or from author (address given above). Price, $1.00 for each broch.

"APOLLONIUS OF TYANA", by Alice Winston. (An Akashic reading). $2.00.

EXCERPTS from Open Letter, Major Wayne S. Aho to General Nathan Twining, Chief of Staff, The U.S. Air Force, The Pentagon, Washington, D.C.:

". . . This is the avenue of approach to eliminate the false nuclear program, which is continually poisoning our waters and atmosphere twelve years after the entrance of the atomic age and is pronounced an unsolved problem of fantastic proportions. Rather than destroy matter and nature with destructive forces man can begin to utilize the creative energies exhibited by the space ships in our atmosphere and between the planets.

"Many of our scientists already know that better energy is available and that many of our long-standing formulas of physics are incorrect. However, many in top echelons, gainfully employed in the present Nuclear field, would have us spend billions more to follow the billions already wasted on nuclear research and development, while the public and officialdom are ignorant and still deluded with the Nuclear fission camouflage. Knowledge of the new concepts and new energies will be released slowly, in small unspectacular doses, while the taxpayer groans with his burden. Many scientists have tried for years to correct the direction of our scientific development but have been ignored by the Atomic Energy Commission and the government. The true energy and correct concept of physics is quite well brought out in a recent book by Robert Stillmar; who after nine years of fruitful research for the Army Signal Corps, trying to use physics formulas generally accepted and still in use, finally solved his assigned problem by using the Crehore theory which he found in a book in the Pentagon Library. This points the way for others. The title of his book is Gravitation Matter and Anti-Matter, published by Albert Cushing Crehore, 1854 Marloes Ave., East Cleveland 12, Ohio.

"Last week I contacted the Policy Division of Air Force Intelligence at the Pentagon commanded by Major General Millard Lewis. I inquired about present Air Force policy on the Unidentified Flying Objects and the reasons for the apparent silence on all UFO developments. I was supplied with a document dated October 25, 1955 (No. 1053-55, titled News Release, Department of Defense) and told this is the latest information there is -- a document two and a half years old!

"This report contains a statement by Secretary of the Air Force Donald A. Quarles, as follows: 'On the basis of this study, we believe that no objects such as those popularly described as flying saucers have overflown the United States. I feel certain that even the unknown three per cent could have been explained as conventional phenomena or illusions if more complete observational data had been available.' In the last sentence of the meandering report it is stated '. . . that there is a complete lack of any valid evidence of physical matter in any case of a reported unidentified aerial object.'

"Is it the intention of the Air Force to qualify this entire release to the public by the last sentence in the Report, implying by the statement that no physical matter has been found to be involved and that, therefore, they cannot be considered as being significant?

"This Air Force Report brought world-wide repercussions epitomized by one publication which stated 'This is an insult to the intelligence of the American people'. Many across the land have made statements that they are 'losing faith in the integrity of the American Air Force'. In my opinion, this is a serious situation.

"I have had the first-hand experience of sighting a spacecraft and seeing it land (with witnesses) on the night of May 11, 1957; therefore, I have reason to believe that the contact reports are authentic and have merit. I have personally investigated and talked with many of the persons claiming contact with beings of other planets, & have complete faith in their sincerity and integrity. . ."

-- A POINT OF ORDER --

A most welcome and friendly letter from Professor M.K. Jessup, too late for quotation in full in this issue, includes one comment which I am anxious to correct. "I do believe", he writes, "that the BSRA is over-anxious to put all UFO phenomena into the etherical group. I do not believe we have gone far enough into UFOlogy to offer all-inclusive explanation or draw fine lines of demarcation, or that our sources of information are sufficiently proven to accept without reservations.. ..."

We have repeated many times in print, especially during the last two or three years, that the UFO phenomena are enormously complex, that no single and simple interpretation could apply to all of them, and that the etheric hypothesis applies especially and with great force to the huge mother ships which are capable of "crossing" interstellar "spaces" of many light-years. We have also stated that it seems possible, even probable, that some types of smaller UFO are either made or based in Arctic regions, perhaps within the globe, perhaps in the Himalayas, perhaps in almost inaccessible tropical areas. These suggestions do NOT invalidate the etheric interpretation - which is not propounded in any all-inclusive and dogmatic manner of thinking.

This is not an argument, but only a corrective memorandum, and as such I respectfully call it to the attention of another distinguished writer and friend, Mr. Arthur Constance of England, and of the Editor of the widely read "FLYING SAUCER REVIEW", The Hon. Brinsley le Poer Trench. Like most of our critical-minded Associates in America, they cannot desire anything but the most accurate and clear-cut statements possible: "rari nantes in gurgite vasto".

M.L.

"U.F.O. INVESTIGATOR" - Vol. I - No. 1. This is the long-promised publication of N.I.C.A.P. (National Investigations Committee on Aerial Phenomena): Major Donald E. Keyhoe, Director. - 1536 Connecticut Ave., Washington 6, D.C. One year subscription goes with membership in NICAP; costs $7.50. Issued monthly, 32 or more pages. Tries to be rigidly factual and does not adventure into interpretation, which of course is the real and urgent need. No. 1 received by the BSR July 15, 1957.

- -

B.S.R.A. Items: "SEANCE REPORTS": Memoranda of the Mark Probert seances (about 30 pgs. each). -- We have on hand the following issues: Nos. 1-2-3-4-7-10-12-13, at $1.25 each. Order BSR No. 14 (on Publication List), from B.S.R.A. Hdqrs.

"VITIC": (Effect of carbon & magnet). 8½ x 11" brochure.- Order B.S.R.A. No. 5.

"THE METATRON THEORY": (by John A. Hilliard). Huna research. - Price, $2.00. Order BSRA No. 7.

CORRESPONDENCE:

THE B-CELL IN ACTION: I am writing you with regard to the B-Cell of the Brown Laboratories. I know how much good it has done for humans, in my own family, and I have given it to my pets and have seen the marvelous changes it has made in them, but I think this case will stand out. I am a great lover of animals, and I live just a few blocks from the Maryland S.P.C.A. Hdqrs., which are under the charge of Mrs. Covington. On the 16th of May I went up to visit her and she showed me a beautiful male Boxer, one year old, which was covered from head to tail with ring-worms and which the 'vet' has pronounced incurable.

I asked her to let me try the B-Cell for two weeks and she agreed. The attendant was told how to use the B-Cell, not only in the dog's drinking water but f o r wetting the sores with the activated water. (Inside of two weeks) the sores had healed nicely and a new coat was coming in. On June 5 Mrs. Covington called and told me the dog was in perfect health, with a new coat of fur, no worms, fleas or infections. It was soon placed in a good home. . . All these facts can be verified by writing to Mrs. Covington, SPCA SHELTER, 3300 Falls Road, Zone II, Baltimore, Md. (Credit Assoc. Mrs. C.G. Ludwick --- 1502 Clipper Rd., Baltimore II, Md.)

(Ed's. Note:)
(It is customary in many quarters -- all four quarters where the cut-and-collect fraternity is concerned -- to attribute all remarkable and 'unorthodox' cures to autosuggestion in one form or another. However, when the 'patient' happens to be (say) a dog or a tomato vine, and the 'cures' pile up, explanation by normal means gets to be a tough job. I understand that biologist Brown makes no point of medical or therapeutic value, but if people insist on curing themselves and their pets by using his B-Cell, how can he prevent it? While we think of it, his laboratory is now at Lemoore, Calif. (PO.Box 158) -- and his residence address, pro tem., is: 870 Grangeville Blvd., Hanford, Calif. (c/o Mr. Wm. Waggnor).

Mr. Brown has had to discontinue, temporarily, the free distribution of the catalysts or plaster matrices, but hopes to resume this in about two months when the laboratory installations are completed.

ML

Associate George C. Wilson, to C.Q.C. Editor: After reading the Yada and his 'point of no return', I thought the least I could do was to write to the News-Press. The Yada said a long time ago, that 'fall-out' drifts toward the north magnetic pole.' They're just finding that out.

To the Editor, S'ta. Barbara News-Press, S'ta. Barbara, Calif. (6-11-57). Are the 2,000 scientists guilty by association?) Today, June 6, the Senate Internal Security Sub - Committee has said that the people of the United States, as represented by this sub-committee, question the loyalty of 2,000 scientists whose high crime is to plead for an end to the H-bomb tests.

The big question is that: Will the Senate Committee go through each scientist in the petition and say: 'Here is John Doe, who works for the X-Aircraft Company. The FBI has cleared him to receive 'secret' documents. He is not a Communist. Or will the Committee say, 'Dr. Pauling, it is alleged that you were once a member of a Communist front organization in 1946. These 2,000 men on this list must be Communists or Communist sympathizers. These men are guilty by association.'

(contd) -- Late at night, in Wheeling, West Va., if one is very quiet, one can hear the voice of the head of another Senate Committee say: ' I have here in my hand a list of government employees 'known' by Secretary of State Dean Acheson to be members of the Communist Party.' (G.C.W. c/o BSRA)

One of our Associates, skilled in publicity matters, reminds us that many newspapers will print all kinds of 'Letters to the Editor', even including ideas and facts of interest to the BSR - to which they would pay no attention if offered in any other form. If, for instance, you really believe that the BSR interpretation of the aeroforms (UFO) is the only one worth while, it might be in the public service to say so - publicly - especially since the situation is nearing a 'show-down', anyway. ML

The July-August issue of "The Aberree" (Vol. IV - No. 4) quotes from a recent book,"Cancer and Common Sense", by Dr. George Crile, Jr., (a distinguished name in the medical world):

". . . Fear of cancer has been beaten into them (the public) until this fear has become as great an enemy as cancer itself. . . They (the campaigners) have fashioned a devil out of cancer. They have bred in a sensitive public a fear that is approaching hysteria. They have created a new disease, 'cancer phobia' -- a contagious disease that spreads from mouth to ear. It is possible that today 'cancer phobia' causes more suffering than cancer itself.

"The trouble is that cancer has become the whipping-boy for all disease, a symbol of the fear of death.

"It is quite likely that the propaganda...has had as serious effect on them (the campaigners) as on the public. This is inevitable...Never has the weapon of fear been used more actively than in the campaign against cancer. No constructive philosophy of life has ever been built on fear."

"The Aberree" also makes the following quotations:

". . .Immediately after the March of Dimes began barraging the public with its pathos and bathos, the incidence of polio shot up sharply, until in 1955, it was four times greater than it had been in 1939, when the Foundation for Infantile Paralysis had its inception. Nor has the Salk vaccine experiment been able to reduce the incidence below the 1939 figure. Does this signify that 75 per cent of t h e polio 'victims' were created by the March of Dimes, and were'cured'only by the belief that a mysterious injection of dead germs into their bodies made it unnecessary for them to be ill? If so, then apparently, the vaccine itself has no more curative effects than would be so much water -- except for its psychological effect. . ."

USED BOOKS: IF YOU HAVE Used Books in the general field of BSR interests -- metaphysics, philosophy, occultism, 'unorthodox'science -- and which you no longer want or need - you might send them along to BSR Hdqrs., with permission to sell - proceeds to be applied to BSR operating expenses. -- Many of these donated books have now been sold; so if you have the books, we have many unfilled requests ..... (Also, we seldom have more than one copy of each book, and fill requests in the order of their receipt.; THIS IS AN IMPORTANT ITEM IN MEETING THE BSR BUDGET...
