EXTRAORDINARY CURE

Of a most obstinate Scorbutic Disease, by

DR. SALMON'S

BLOOD PILLS & OINTMENT.

Prepared by MRS. HAMMERTON, Student in *Astrology* and *Physics*, of "Globe Cottage," *Whissendine*, OAKHAM.

TESTIMONIAL, &c.,

From MRS. S. CROSS, *Orton Waterville*, near PETERBOROUGH, whose case was considered *hopeless* and *incurable* by every person who saw her!!

March 9th, 1868.

Dear Madam,

I cannot but utter my gratitude to God and yourself for the benefit I have received from your *Blood Pills* and *Ointment*. All who attended me in my sore affliction are astonished to see what I am at the present. So that unto God, as the first cause, and secondly, to you as the favoured instrument in God's hands, is the praise all due.

I remain, your humble Servant,

To Mrs. Hammerton. S. CROSS.

June 15th, 1868.

Dear Madam,

I am happy and thankful to inform you that I still continue to improve. My health is very good, and my legs are so much better that I am able to attend to business 15 hours in the day with less fatigue than I have done for these 24 years past. I still am troubled at times with a little itching, and a few spots come out. I shall always keep a supply of the *Pills* by me. You can make what use you like of this my Testimonial.

I remain, yours respectfully,

To Mrs. Hammerton. S. CROSS.

N.B.—For other TESTIMONIALS, vide "ORION'S ALMANAC" for 1868.

IMPORTANT INFORMATION

Dr. SALMON'S

SCORBUTIC OINTMENT.

This Ointment, confirmed by 200 years experience, is confidently recommended to the public as an *unfailing* remedy for *Scorbutic Eruptions.*

Prepared from the Original Recipe of Dr. Salmon, by MRS. HAMMERTON, "Globe Cottage," *Whissendine,* OAKHAM, and sent post paid to any Address in Boxes for 16 and 32 postage stamps, addressed to Mrs. H., as above.

WOUND OINTMENT.

This is a most excellent remedy for Wounds of every description, a certain cure for Ulcerated Sore Legs (if of 14 years standing), Burns, Scalds, Chilblains, &c. *Prepared* by MRS. HAMMERTON, and sent post free to any Address in Boxes for 16 and 32 postage stamps, addressed to Mrs. H., as above.

THE VICTORIA

DIGESTIVE POWDERS.

These Powders are strongly recommended. They make the timid and debilitated bold and vigorous; the trembling hand firm and strong; the fluttering and tremulously nervous person becomes animated with new strength and sight; despairing thoughts are annihilated, the mind calmed, and the spirits exhilirated. Several Families of high consideration, residing in different parts of the United Kingdom, speak in commendable terms of the salutary effects of these marvellous Powders. *Prepared* and sent post free to any Address in Boxes on receipt of 14 and 28 postage stamps, by MRS. HAMMERTON, "Globe Cottage," *Whissendine,* OAKHAM.

Prognostic Astronomy.

"Ye Stars, which are the poetry of HEAVEN!
If, in your bright leaves, we would read the fate
Of men and empires,—'tis to be forgiven."

Lord Byron.

NATIVITIES CALCULATED BY ORION.

In a NATIVITY, the disposition, traits of character, constitutional diseases, &c., are carefully delineated; also the pecuniary circumstances, and the employment or profession for which the Individual is adapted, are pointed out; marriage (if more than once), with a description of the wife or husband; children, journeys, friends and enemies described, and the general affairs of life, a foreknowledge of which may prevent much misery, and promote health, happiness, and prosperity.

Every respectable Son and Daughter should have this.

TERMS FOR NATIVITIES.

Several Correspondents having wished for a statement of *Terms*, ORION begs leave to inform them that for a NATIVITY, with a "*General Judgment*" thereon (as above) his *Terms* are 5s., 7s. 6d., and 10s, according to the extent of the Calculation and Information given; payable in advance, by Post Stamps or Post Office Order, to MR. JOHN HAMMERTON, "Globe Cottage," *Whissendine*, OAKHAM.

Observe.—Give your *year*, *day*, *hour*, and *place* of birth; your *sex;* also whether *married* or *single*.

For a Map of a NATIVITY, with all the Important Transits of the Planets calculated for *five* years, with an Explanation of *Events*, 10s.; for *ten* years to come, *fee* 20s., payable in advance by *Post Office Order* to MR. JOHN HAMMERTON, "Globe Cottage," *Whissendine*, OAKHAM.

☞ THE STRICTEST SECRECY AND PUNCTUALITY WILL BE OBSERVED.

No Interviews granted except by Appointment.

HORARY QUESTIONS.

ORION may be consulted (by letter only) on any lawful and proper Question as to the result, issue, or success of any important undertaking or sincere inquiry according to the "Science of the Stars." A *Question must* be confined to *one* subject only, and the *same* Question must not be asked a *second* time.

In Horary Questions it is not indispensably necessary that the *Querent* should give the *hour* of birth, but the *day* and *year* should be given if possible, especially on questions of *marriage*. Fee, 32 Postage Stamps; payable in advance to MR. JOHN HAMMERTON, "Globe Cottage," *Whissendine*, OAKHAM.

REVOLUTIONARY FIGURES.

These *Revolutionary Figures* are calculated from the Native's Birthday of every year, shewing many Events which will occur during the forthcoming 12 months; also what to avoid, and what to accept (very valuable), *fee*, 2s. 6d., 3s. 6d., and 5s., according to the Information given, payable in advance to Mr. J. H. (as above.)

GOOD AND EVIL DAYS,

According to the Horoscope at Birth.

Persons desirous of this valuable Information for a *whole year*, should send their *year*, and *day* of birth, and 13 Postage Stamps, addressed to Mr. J. H. (as above.)

TO STUDENTS IN ASTROLOGY, &c.

The Longitudes of the Sun, Moon, and Planets, sent Post Free to any part of the United Kingdom, on receipt of time and date required, inclosing 20 Stamps; for a *Chart* of the *Heavens* 30 Stamps must be sent to Mr. J. H. (as above.)

ASTRO-BOTANICAL INFORMATION.

Those persons who are desirous of *gathering* the various herbs under *Planetary Influence*, may write to me; and the *time* and *date* when they possess their full virtues, will be forwarded to any Address, on receipt of 30 Postage Stamps, to MR. JOHN HAMMERTON, "Globe Cottage," *Whissendine*, OAKHAM.

JANUARY, 1869.

Now sharper bites the hyperborean blast,
While eager morning chills us at the dawn;
With drizzling sleet the sky is overcast,
And the white frost bespangles o'er the lawn;
The well-napp'd drugget clothes the rural folk,
And homely cots display a thicker smoke.

Let not the curious from your bosom steal
Secrets, where Prudence ought to set her seal;
Yet be so frank and plain, that at one view,
In other things, each man may see you through;
For if the mask of policy you wear,
The honest hate you, and the cunning fear.

MARCH, 1869.

And o'er the whole, Giles, once transverse again,
In earth's moist bosom buries up the grain.
The work is done: no more to man is given;
The grateful farmer trusts the rest to Heaven.
Yet oft, with anxious heart, he looks around,
And marks the first green blade that breaks the ground.

APRIL, 1869.

Now here we see great Jove salutes the Sun,
Presaging some great matters to be done,
When Justice rules, we've much less cause to fear
The dire effects of the Infortunes Square;
Yet question not, we shall be sure to smell
The smoke; if we escape the flame, 'tis well.

AUGUST, 1869.

The heat is oft intense—the cloudless sky
Ripens the grain, and brings the harvest nigh:
The feathered tribes are mute, though insects hum,
And Flora's choicest treasures are in bloom:
From *Eastern States* we shall of tumults hear,
And *Western* too—and yet we need not fear.

When vocal woods no more the ear delight,
And painted flowers have ceased to charm the sight,
In meek devotion heavenward lift the eye,
And watch the glories of the starry sky;
There in your Maker's works your God adore,
And sing His praise till time shall be no more.

To set a Clock or Watch by this Table.—Example, Jan. 1st. It will be found by looking into the Table, that a Clock to be right must be 3 minutes 58 seconds faster than a sun-dial; therefore set it so much faster accordingly, and so of the rest. Correct the Watch when the Dial marks just an hour. as 9, 10, 11, 2, 3, or 5 o'clock. Noon is not the best time for this purpose, nor near sun-rise or sun-set.

NEW PARADOX.

Christians the week's *first* day Sabbath hold,
The *Jews* the *seventh* (as they did of old),
The *Turks* the *sixth* (as I've oft been told).

Now, good sir, pray tell to me
How is it possible this thing can be,
That a Christian, Jew, and Turk, these three,

Being altogether in one place, may,
In and upon one and the self same day,
Have each his own true Sabbath, tell I pray?

ATMOSPHERIC DISEASES, &c.

By temperature of air we find
Changed is the body and the mind.

For the month we consult the Figure for the Sun's entrance into Capricorn. We find Mars ruling the Ascendant in the 6th house, and in opposition to the Moon, which denotes coughs, consumption, asthma, rheumatism, smallpox, fevers, &c., especially scarlatina. Bowel complaints attended with cramp. Lameness in the feet, &c.

Birthday Information.

Applicable to persons in all parts of the World.

Those persons who were born about the 3rd or 5th of this month feel the baneful and harassing anxieties resulting from Saturn and Uranus—females especially. Connubial trials and strange vicissitudes attend such as are married, and those that are single meet disappointments; the evil influence will also press rather heavily upon such as were born about the 7th of July, or the 27th of August, in any year. Those born on the 20th and 21st of January, by making proper efforts may benefit themselves in business. Persons who were born on the 30th of January would be benefited by cultivating the acquaintance of religious parties.

Mars potent in Leo denotes many will be afflicted in the liver, palpitation of the heart, and nervous debility. Eruptive sores, together with small-pox and measles. Pains in the reins and loins, the knees, and the lower extremeties generally; brought on by the variability of temperature.

Birthday Information.

The influences are slightly beneficial for those who were born on the 3rd of this month in any year; they may expect favours from the aged, or persons some years their senior. Those persons who entered on existence on the 11th or 13th of this month in any year, must beware of hurts, accidents, over excitement, quarrels, and disputations. The 22nd and 23rd are rather fortunate as birthdays for those who deal in fancy articles and ladies' ware; such as decorate and ornament females. Single females who were born on the aforesaid days will be generally successful in their engagements. Seek favours of and deal with elderly persons; court and seek the smiles of the fair.

ATMOSPHERIC DISEASES, &c.

From the fluctuating state of the atmosphere we shall experience this month to be of a sickly character, producing coughs and pulmonary affections, which will afflict those who are weak in the chest, and prove fatal in very many cases. Eruptive diseases seem prevalent, and Mars in Leo portends affections of the heart, and many sudden deaths.

Birthday Information.

Those persons who were born on the first of this month experience some benefits and prosperity through business transactions. The 3rd and 4th of this month will be good for persons who were born on those days, especially farmers, and others who deal in the products of the soil. The 8th is rather untoward as a birthday. The 9th and 10th, better influences obtain for persons who were born on either of those days. Some domestic unhappiness for females who were born on the 20th of March. Troublesome events for those whose birthday is on the 3rd of January, or the 5th of July. Persons born about the 7th of March or May, the 9th of September & December, now feel the evil influence of Saturn's position most severely.

ATMOSPHERIC DISEASES, &c.

The position of Saturn in the 5th house, at the commencement of the Spring Quarter denotes that children will become victims of disease—the rising generation will suffer. Venus, squared by Saturn, who rules the 6th house of the figure, is an evil omen for the fair sex, and many delicate females will succumb to the fatal effects of his electrical emenations. The atmospheric fluctuations will cause much disease, &c.

Birthday Information.

The 3rd of this month is rather unfortunate as a birthday; natives are liable to be annoyed by public bodies and eccentric characters. The 5th and 6th are rather good for professional men. The 10th rather evil for females. On the 12th and 13th better influences obtain; and the fair sex, who were born on that day, experience benefits and many happy events Those persons, especially the aristocracy of Britain, who were born on or near the 17th of April, will have a year of prosperity and honour, the Sun being in conjunction with Jupiter that day. The 22nd is good for wedlock; for the benefics join in synod, happy & benign.

ATMOSPHERIC DISEASES, &c.

On account of the variability of temperature this month, many will be afflicted with affections of the brain and nervous system. Apoplexy generally occurs in this month: purgatives should be taken. There are strong testimonies of violent headaches, bilious attacks, and other disorders brought about by corrupt blood; and Saturn's position will cause many to complain of tired legs, &c.

Birthday Information.

Most persons who were born on the 4th or 5th of May will be benefited by public bodies, eccentric persons, &c. On the other hand, those persons who were born on the 6th of this month must beware of frauds on their property; they will be liable to meet with insults and annoyances from enemies, or supposed friends. The 9th and 10th days are rather good for single females who were born on that day; they will be generally successful in their engagements, now, and for some time to come. A "time" to marry. The 16th, 17th, and 19th days are generally unfortunate as birthdays. Natives may prepare for domestic troubles, losses in business, &c. The 30th of this month is evil for the fair sex generally.

ATMOSPHERIC DISEASES, &c.

From the position of Mars in Virgo there will be much pain in the back, stomach, and bowels. Flatulent cholic, stomachic diseases among the rising generation, also violent attacks of headache, &c. Let those who have a predisposition to any of the foregoing diseases prepare themselves with some botanic remedies.

Birthday Information.

Saturn opposes the Sun on the 4th of this month, creating much uncertainty and discomfort to persons who were born on or near that day in any year. Persons who were born on the 11th of June, by making proper efforts may benefit themselves in their business transactions. Slightly beneficial for those persons who were born on the 13th, especially if their occupation is governed by the planet Mars. Persons who were born about the 3rd of March, 3rd of June, the 5th of September, and the 4th of December, in any year, will suffer from the affliction of the Sun's place in their respective horoscopes. Death, illness, death of relatives, losses in business, bankruptcy, and other evils will attend them. The 18th is accidental!

Birthday Information.

Most persons who were born on the 6th of July may expect pecuniary benefits and advantages, according to their circumstances, and sphere of life in which they move. A very untoward position for persons who were born on the 10th of this month, in any year; they may expect slander and deception, strange losses and troubles in business matters; as well as troubles of a conjugal nature. Aged gents who were born on the 15th may sue the fair for favours. The 19th not good for courtship or marriage. The 26th is rather good for scientific characters who were born on that day. The 29th is rather good as a birthday for those who are engaged in the medical or the military professions.

ATMOSPHERIC DISEASES, &c.

Mars progressing through the sign Libra, will give pains in the reins and loins. Let those who have a predisposition to infirmity in those parts avoid excessive exertions. From the position of Venus in the sign Virgo, we judge that dysentric affections will prevail. Too free use of fruit and vegetable matter is apt to bring on flatulent colic, headache, &c.

Birthday Information.

The 1st of this month is good for persons who were born on that day, especially farmers, builders, and those who deal in the products of the soil. They will also be benefited by persons some years their senior. The 8th is rather unfortunate for females who were born on that day, as they will be liable to experience annoyances, and disappointments from false friends of the opposite sex. ATMOSPHERIC DISEASES, &c.

From the variability of temperature we look for dysentric affections to prevail; and the nights of this month will be obnoxious to impurities. Avoid exposure to damps or chill when warm. Headaches, and oppression across the chest. Mars in Scorpio indicates secret and latent diseases will prevail; and Saturn denotes weakness in the hips and thighs, old aches and bruises in those parts, &c.

Birthday Information.

Those persons who were born on the 3rd of this month in any year, will be subject to losses and domestic affliction —their friends will be fickle, and not trustworthy, but leave them in the time of need. Individuals who were born on or near the 12th of May, in any year, will find many pecuniary benefits now occur, but they should guard against a corrupt state of the blood, which Jupiter, being now on the Sun's place at that date, produces. Those born on or near the 21st of September, especially professional men may look for pecuniary benefits, and advantages. Much uncertainty and discomfort to persons who were born on the 19th of Sep., in any year.

ATMOSPHERIC DISEASES, &c.

The planet Saturn had chief rule at the commencement of the Autumn Quarter, indicating infirmities in the hips and thighs, and lower extremeties; sciatica or gout, &c. The moon was rather heavily afflicted at the Ingress, being opposed by Mercury and squared by Uranus, denoting violent headaches, cold chills, and low fevers, weakness in the eyes, coughs, &c.

Birthday Information.

Religious professors, and religious teachers who were born on the 3rd of October will experience many disappointments and annoyances. Females who were born on the 6th or 8th of this month must beware of false friends of the opposite sex. Those individuals who were born on the 15th of this month, experience some unhappy events of a conjugal nature; and if single, will be unfortunate in their engagements. Those persons whose birthday anniversary is on the 20th will experience strange troubles and annoyances. Females who were born on the 24th or 25th of this month may prepare for slander and deception; if single, disappointments and troubles through love affairs. Evil for persons born about July the 14th.

ATMOSPHERIC DISEASES, &c.

Rheumatism, and colds of the common kind will prevail, from the variability of the temperature. From the conjunction of Saturn and Mars in the sign Sagittarius, we judge that rheumatic affections will attack those persons who are liable to that plague. Gout, and pulmonic diseases will be prevalent, with cough, &c. Persons of delicate constitutions should avoid the evening and night air.

Birthday Information.

Persons who were born on the 2nd of this month will experience some troublesome affairs connected with writings, bills, &c. The 8th is rather unfortunate for professional men born on that day; they must avoid hazardous speculation. Much adversity and perversity for those who were born about the 6th March, 10th June, 12th September, or 11th December in any year. Those born on the 14th may expect favours from public bodies. Females who were born on the 18th will be generally fortunate in their engagements. On the other hand, those born on the 27th will be liable to meet with annoyances and disappointments from the opposite sex.

This we fear will be an unhealthy month, as there will be extremes of weather; erysipelas will affect those who are liable to that kind of inflammation, from the low temperature of some of the days of this month. The Sun passing the body of Saturn will cause many deaths among the aged aristocracy of Britain. Pains in the hips and thighs, knees, &c., will be prevalent, from the position of Mars.

Birthday Information.

The Solar conjunction of Saturn on the 11th of this month will trouble all persons who were born on or near that day, in any year; they should avoid taking cold, if possible, this winter, or they may suffer with chest disease or rheumatism; and those who do not suffer in health will find their affairs go wrong; death of some friend, &c. The 12th of this month is also unfortunate as a birthday, and natives would do well to guard against thieves, robbers, and frauds on their property. Most persons who were born on the 15th of this month may expect some pecuniary benefits. Persons born on or near the 10th of January and 12th of July, will be very liable to mishaps, &c. The 31st, rather unfortunate.

ARITHMETICAL PROPHECY.

——ooo——

Too daring Prince! ah, whither dost thou run?
Ah, too forgetful of thy wife and son!
And thinkest thou not how wretched we shall be,
A widow I, an helpless orphan he!
For sure such courage length of life denies,
And thou must fall, thy virtue's sacrifice.
Greece in her single heroes strove in vain;
Now hosts oppose thee, and thou must be slain.

—— ooo ——

Figures are said to be incontestible; and, perhaps, that is one of the reasons why prophecy flies so much to arithmetic. Some of these calculations are well known: and here is the latest of the kind. What is wanted is to determine the date when the imperial rule shall end in France. Let us go back then to the reign of Louis Philippe for facts which may help us in the calculation. Louis Philippe ascended the throne in 1830. If we take that as a fixed point, we shall find that by adding to it certain numbers, the result will give the year 1848, when the reign of the Orleans family came to an end.

Thus, Louis Philippe was born in 1773. The ciphers of this date added together make 18; and, if you add 18 to 1830, it brings us precisely to 1848. Again, his Queen was born in 1782. The ciphers of the date added together make 18; and 18 added to 1830 make 1848. Or once again, the King and Queen were married in 1809. The ciphers of this year also make 18; and if we treat this amount as before, it will yield the same result. Now let us proceed in the same fashion to deal with the Empire. It was proclaimed in 1852. The present Emperor was born in 1808. If we add the ciphers of the latter date together, and add the result to the date of 1852, we obtain the figures 1869. Again, the Empress was born in 1826. Proceed as before, and the result is 1869. The Emperor and Empress were married in 1853. Still repeat the calculation, and the result is 1869. Last of all, take the date of the Revolution—1848. Manipulate the figures in the same fashion as the others—the total sum is 21; and this added to 1848, makes 1869. It is not perfectly clear, therefore, that the Empire will come to an end in 1869!

Horticultural, Botanical, and Herbal Guide,
For 1869.

JANUARY.—In open and dry weather, sow in mild exposure for a succession, a few early frame peas, common beans, short-topped radishes, lettuces, carrots, onions, spinach, and curled parsley, protecting them from the Frost by mats or straw. Plant, prune, and train fruit trees and bushes. Form new flower gardens, and shelter from frost tender evergreens, tulips, &c. Plant snowdrops, crocuses, &c. *Herbs* to be gathered are groundsel, chickweed, archangel, and others which are in flower.

FEBRUARY.—Make ready all the ground intended for early crops; and when the weather is favourable, continue to sow every fortnight, peas, beans, onions, spinachs, savoys, lettuces, celery, cauliflowers, carrots, parsnips, and radishes. Cut early kidney potatoes for seed, and put them in a stove or hot-bed in order to start them for planting out. Plant out evergreens and shrubs of all kinds, particularly roses, &c. Prune vine and fruit trees. *Herbs* to be gathered: foalfoot, lingwort, pilewort, speedwell, chickweed, shepherd's purse, and broom.

MARCH.—The principal crops of vegetables should be put into the ground this month. Sew asparagus, celery, cauliflowers, broccoli, spinach, onions, carrots, peas, beans, savoys, parsnips, radishes, &c. Plant red cabbage and sea-kale: sow cucumbers and melons in hot beds. Finish pruning, dress borders and strawberry beds. This is the best time for grafting fruit trees, perpetual and moss roses, &c. Pot dahlias and cuttings. Plant pinks, polyanthuses, carnations, &c. *Herbs* to be gathered for medicinal purposes: coltsfoot, fumitory, pilewort, ladyfrocks, lesser celandine, violet and comfry roots, and all kinds of herbal bark.

APRIL.—Continue to sow and plant rhubarb, artichokes, asparagus, sea-kale, Dutch turnips, German greens, and small salading. Earth up peas, tie up lettuces, and in very dry weather water seedling beds. Finish the grafting of fruit trees, and train and clean walks and edgings. Sow annuals, biennials, and perennials. Plant evergeeens and propagate by cutting, jasmine, lavender, sage, rosemary, rue, &c. Sow early Dutch turnips. *Herbs* to be gathered: ground ivy, dandelions, avens, buttercups, and others which are in flower, as well as all kinds of bark.

MAY.—Sow peas, cucumber, red beet for pickling, and a full crop for kidney beans. Transplant cabbages, winter greens, cauliflowers, and celery. Hoe and stake peas, water newly-planted crops, and propagate aromatic plants by slips or cuttings. Plant dahlias, if there be no appearance of frost, and protect from wind and rain choice tulips, &c. Propagate herbaceous plants by dividing the roots. *Herbs* to be cut: celandine, milkwort, moonwort, wood sorrel, and adder's tongue.

JUNE.—Top beans and peas to assist the filling of the pods. Set kidney beans, and transplant cabbage, savoys, broccoli, and sow turnips. Thin out onions, leeks, carrots, parsnips, and early turnips. Gather and preserve kitchen herbs. Shade and air melon plants, &c. Bulbous roots that have done flowering should now be taken up, and the off-sets separated. *Herbs* to be cut: avens, brooklime, centuary, comfry, woodbine, valerian, eyebright, pimpernel, speedwell, and elecampane.

Horticultural, Botanical, and Herbal Guide,
For 1869.

JULY.—In this month prepare all unoccupied plots of ground for autumn and winter crops. Sow turnips, radishes,&c. Plant out broccoli, cauliflowers, savoys, leeks, and winter cabbages, and earth up celery. Lift full grown winter onions, and prepare mushroom spawn. In fine weather, gather medicinal flowers and sweet herbs, when in bloom, dressing them first in the sun,& then in the shade for winter use. *Herbs* to be cut are all that are in flower, as lavender, tansey, vervain, bedstraw, agrimony, cinquefoil, mountain flax, foxglove,and meadow sweet.

AUGUST.—Sow early cabbages and parsley for the succeeding year; also spinach,broccoli,and cauliflowers to stand the winter; earth celery; hoe and thin turnips; transplant broccoli, savoys, and cauliflowers, and the principal crop of celery into the trenches for blanching. Make mushroom beds: propagate kitchen herbs by slips, and take up all onions, garlic and shallots that are withered in the stem. Sow the seed of bulbous flowers in pots. *Herbs* to be cut: all mints and sage, golden rod, pond weed, yellow gentian, tansey, mugwort, and loosestrife.

SEPTEMBER.—Plant savoys,broccoli, cauliflowers, leeks,celery,and perennial aromatic,and pot herbs. Hoe winter spinach and turnips,earth up celery and cardoons, prick out cabbage plants, gather ripe seed, &c. Pull onions if the tops appear dying. Plant cuttings of gooseberries, currants, raspberries, and strawberries, taking out the old stools which have twice produced fruit. *Herbs* to be gathered; angelica, field gentian, valerian, feverfew, southernwood, briony, and wild berries.

OCTOBER.—Plant home radishes, early cabbages, and other greens neglected last month, in sheltered situations; also cauliflowers, mint, and tarragon, in frames for winter use. Earth up savoys and cabbages as high as the leaves. Take up carrots and parsnips, cut off their tops and bury them in dry sand. Crop the tops of parsley, to make fresh leaves for winter. Transplant fruit trees and shrubs after the 10th day. Gather tree seeds: and sow for stocks. *Herbs* to be gathered: ivy,yarrow, wall rue, shepherd's purse, broom, rape, wall cress, and wild berries.

NOVEMBER.—Dig the ground where the crops are carried off, and which is not intended toplant again till spring: manure and prune fruit trees. Shallots are readily propagated by offsets. A stiffish soil, and open aspect should be preferred. These offsets,or "claws," should have their basis only pressed into the ground,without being covered. Tulips and hyacinth roots may be planted. *Herbs:* not many to be gathered this month for medicinal uses, except rose moss, rock fern, and polypody.

DECEMBER.—In this month forward the business of manuring, digging,or trenching vacant ground. Set all sorts of stones,kernels,&c. Complete tree planting,and forward all winter pruning. Continue planting various hardy roots, bulbs and shrubs. If frosty weather, be particular to protect all tender plants, trees, &c. Earth up celery. Sow small salad in warm borders, covered with mats. *Herbs* to be gathered: rose moss, rock fern, polypody, evergreens, and the mistletoe.

Celestial Phenomena.

☿ MERCURY, from his proximity to the Sun, is seldom visible, except at or about the times of his *greatest elongations;* so that we may be able to see him about an hour before sun-rise, near the eastern horizon, about the 18th of *March*, 17th of *July*, and the 5th of *November*. Again he may be seen a little after sun-set, near the western horizon, about the 3rd of *February*, 29th of *May*, and the 25th of *September*.

♀ VENUS will be mostly seen in the *eastern* sky during the mornings, until she arrives at her *superior conjunction* with the Sun on the 9th of *May;* after which she will be visible during the *evenings*. She will attain her greatest *eastern elongation* on the 14th of *December*.

♂ MARS meets the opposition of the Sun on the 13th of *February*, and consequently culminates near midnight; he will then be an interesting object, and may be advantageously viewed with a good telescope. He will be found between the *eastern* horizon and the meridian, from dusk until midnight, and afterwards to the *westward* of the meridian.

♃ JUPITER. This beautiful orb will be visible in the heavens as an *Evening Star* on the opening of the year, and may be advantageously viewed from 7 to 9 o'clock in the evenings of *January*. He will be the *Morning Star* during the Summer months; and he comes to the Solar opposition in *November*, and may be advantageously viewed at various times, and in various positions, from *August* to the close of the year.

♄ SATURN will be in conjunction with the Earth on the 4th of *June;* hence, during this, the two preceding and two following months, he may be frequently observed with a good telescope to advantage, though his great *southern* declination renders both his nocturnal sweep and altitude much less than could be wished by Astral observers.

♅ URANUS. This remote planet is only a telescopic object, it is in opposition to the Sun on the 5th of *January*, and will be best for observation about and after that time.

THE ECLIPSES

In 1869.

In the Year 1869 there will be *two* Eclipses of the Sun, and *two* of the Moon.

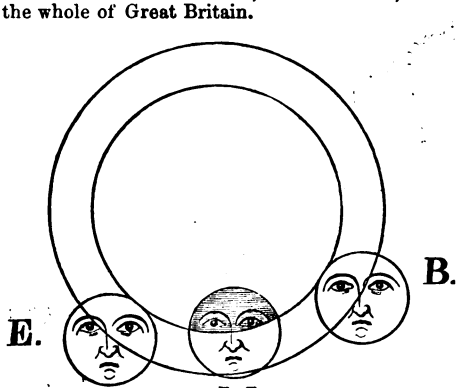

I.—A PARTIAL ECLIPSE OF THE MOON.

January 28th, Visible in England.

First contact with the Shadow 28th, 0h. 29m. 12s. a.m. } Mean Time
Middle of the Eclipse ..... 28th, 1h. 38m. 12s. a.m. } at
Last contact with the Shadow 28th, 2h. 47m. 12s. a.m. } Greenwich.

Magnitude of the Eclipse (Moon's diameter=1) 0·450
on the Moon's northern Limb.

The annexed representation of the positions and path of the Moon, as she passes through the dark Shadow of the Earth from right to left, has been sketched for *London*, and will serve, without sensible error, for the whole of Great Britain.

B, denotes the *Beginning*; M, the *Middle*; and E, the *End*.

At the Middle of the Eclipse the Moon will be vertical or directly over head, in Long. 21° 23′ W. of Greenwich, and Lat. 17° 33′ N., which falls near the Cape Verd Isles, off the West Coast of Africa. From this and other data it is evident that this Eclipse will be visible throughout Europe, Africa, North and South America, the Atlantic Ocean, and to the Coasts and Islands adjacent.

II—AN ANNULAR ECLIPSE OF THE SUN,

February the 11th, Invisible in England.

Begins on the Earth generally February the 11th, 10h. 54m. 48s. A.M., Mean Time at Greenwich, in Longitude 80° 15′ W. of Greenwich, and Latitude 35° 43′ S.

Central Eclipse at Noon, February the 11th, 1h. 28m. 48s. P.M., in Longitude 18° 35′ W. of Greenwich, and Latitude 54° 9′ S.

Ends on the Earth generally February the 11th, 4h. 38m. 0s. P.M., in Longitude 26° 34′ E. of Greenwich, and Latitude 9° 51′ S.

This Eclipse will be visible to a section of South America, the South Atlantic Ocean, South Africa, and the Coasts and Islands adjacent. It will be followed by captivities, slaughter, rapine, and profanation of sacred things, as well as physical evils, storms, and earthquakes. This Eclipse will prove an interesting phenomenon to the Mariners who may be sailing in the South Atlantic Ocean, between Cape Horn and the Cape of Good Hope. The Sun is Eclipsed in the 23rd degree of the sign Aquarius, and will therefore afflict most persons who were born on or near the 11th of February, or the 16th of August, in any year.

———ooo———

III.—A PARTIAL ECLIPSE OF THE MOON,

July 23rd, Invisible in England.

First contact with the Shadow	23d, 0h. 40m. P.M.	Mean Time at Greenwich.
Middle of the Eclipse	23d, 2h. 2m. P.M.	
Last contact with the Shadow	32d, 3h. 25m. P.M.	

Magnitude of the Eclipse (Moon's diameter=1) 0·559.

The first contact with the Shadow occurs at 127° from the Northernmost point of the Moon's limb towards the East. The last contact at 141° towards the West.

During the *middle* of the Eclipse the Moon will be vertical in Longitude 150° 50′ E., and Latitude 19° 30′ S., which falls on the Eastern Shores of Australia, about 4° North of the Tropic of Capricorn. I find that this Eclipse will be visible to the Continent of Asia, the whole of Australia, the Indian Ocean, and the Coasts and Islands adjacent. This Eclipse will bring turmoil and many changes in the Eastern Countries generally. Pirates commit some atrocious acts, and the warlike Mars tinges the blue wave with blood.

IV.—A TOTAL ECLIPSE OF THE SUN.

August 7th, 1869, Invisible in England.

Begins on the Earth generally August the 7th, 7h. 38m. P.M., in Longitude 144° 20′ E. of Greenwich, and Latitude 36° 54′ N.

Central Eclipse at noon August 7th, 9h. 46m. P.M., in Longitude 145° 9′ W. of Greenwich, and Latitude 61° 45′ N.

Ends on the Earth generally August the 8th, 0h. 24m. A.M., in Longitude 90° 11′ W. of Greenwich, and Latitude 14° 53′ N.

This Eclipse will be visible to some portions of the North Pacific Ocean, the Arctic Seas, the Russian Territories in America, and to that Continent generally. I judge that this phenomenon will cause great disruptions of the ice, and wondrous geological and geographical phenomena will ensue in the Polar Regions.

OF ECLIPSES,

The Prodigies of Heaven.

Eclipses, especially of the Sun, have been always considered as events of the most remarkable kind. *Isaiah*, and others of the sacred writers, speak of them as indicative of the wrath of the Almighty. *Homer*, *Pindar*, *Pliny*, and many of the ancients, also make mention of them in a similar way; and it used to be noticed, more particularly by Astronomers, that an Eclipse was often accompanied by a national calamity, or an occurrence of a very striking nature. An Eclipse of the Sun presents a spectacle of a most awful nature, and it cannot be deemed irrevalent to describe the phenomena that have attended one or two of the most remarkable. Clavius observes, that at the Total Eclipse of the Sun of 1560, the darkness at Coimbra was greater, or at least more striking than that of the night, and that the birds fell to the earth through terror. The grand Total Eclipse of the Sun on the 22nd of April, 1715, presented most interesting phenomena; and from its having been the only Total Eclipse of the Sun visible at London since the year 1140, its approach was awaited with no small degree of anxiety, especially among the scientific. *Dr. Halley*, who observed this Eclipse at *London*, says, "both planets and fixed stars were seen, the birds went to roost in terror, the bats came out of their holes, and the fishes swam wildly about, a sensation of cold was experienced, and the dew fell upon the grass, upon the extinction of the Sun, since ourselves could not behold it without some sense of horror."

N.B.—*A large and interesting Eclipse of the* SUN *will be* VISIBLE *to the Inhabitants of* GREAT BRITAIN *next year!*

PREDICTIONS AND THEIR FULFILMENTS.

Destructive Storms in the Autumn of 1867, as Predicted.

The Stormy Weather.—From the 28th of October to the 1st of November, which we prepared our Readers for (vide Almanac for 1867, pp. 24, 25, and 72,) appears to have been far more disastrously realized in the East and West Indies than in countries nearer home. Telegrams have made known to us that on the 29th of October, 1867, a tremendous hurricane occurred in the West Indies, which laid the town of St. Thomas in ruins, and wrecked over 50 vessels, including four mail steamers. A telegram from the East also tells us of a violent cyclone at Calcutta on the 1st of November.

The causes of these storms are sufficiently apparent to Astro-Meteorologists, when they observe that on October the 28th and 29th the planet Mercury was quartiled with Jupiter, and ses-qui-quartiled with Uranus and Neptune, that Venus was angulated with the two last-named planets; that the Sun was in equal declination to Jupiter; that the Moon was in conjunction with *three* planets; that Mercury was in similar relationship with Uranus; and that *Mars* was in *conjunction* with *Saturn!* If these stellar configurations had *not* produced some dire physical effects we should indeed have been astonished.

Predicted High Tide.

PREDICTION.—(February) "7th and 8th, high and flowing Tides into many ports—8th, very high tide." *Feb.* p. 8.

Fulfilment.—"The Tide at Hull on Saturday morning (the 8th) rose to an unprecedented height, and occasioned many thousands of pounds damage. The Thames, the Tyne, the Weir, the Tees, and other tidal rivers all overflowed their banks, and much mischief has been occasioned by the influx of water."

Stamford Mercury, Feb. 14th, 1868.

Failure of the Grass and Seed Crops.

PREDICTION.—"The Sun in trine to Saturn is favourable to the Agricultural community, but I fear more powerful influences will deteriorate the grass and seed crops."

Fulfilment.—The excellent wheat harvest of 1868 was "favourable to the Agricultural community," but the ill effects of the severe drought in the Spring and Summer, rendered the "grass and seed crops" almost an entire failure!

PREDICTIONS AND THEIR FULFILMENTS.

———ooo———

PREDICTION.—"All is not right in Spain, Italy, and other places which I could name, that are sighing for a more liberal form of government."

Winter Quarter, p. 65.

Fulfilment.—"Let us look abroad upon the tendencies of things in the South of Europe, Spain, and Italy. We conclude it may be fairly inferred that whatever is popular and liberal is destined to triumph, while monopoly, privilege, and exclusiveness is predestined to defeat."

London Papers.

PREDICTION.—"The conjunction of Mars and Mercury in the sign Pegasus, and squared by the ponderous orb of Saturn from the sign of the Archer, point with unerring precision to nations and kingdoms ruled by those signs, which are Spain, Egypt, Arabia, Italy, &c; and the southern parts of Asia Minor, great physical evils fall upon those lands, and War imprints his bloody footsteps on their coasts."

Spring Quarter, p. 67.

Fulfilment.—Recent accounts from the Continent represent the affairs of Spain and Italy as one hotbed of ferment and tumult. In Asia Minor, fever, &c., prevailed to a most serious extent, so much so as to be termed by the public press—a pestilence.

PREDICTION.—"The fiery star of Mars is rushing through the Ascendant of Ireland, but when on the verge of leaving that sign he is opposed to the malignant beams of Saturn. These are direful omens for the sons of Erin."

Summer Quarter, p. 68.

Fulfilment.—"In Ireland, murders most foul and unnatural are occurring; shocking cases of suicide and poisonings, murderous outrages on the Police, incendiary acts, &c.; occasioned by the tyranny and misrule of its foes and oppressors."

London Papers.

Explanation of the Hieroglyphic for 1868.

The warlike and defensive position of the British Lion, opposed by the threatening attitude of the "Archer," expresses our recent engagements in Abyssinia, and the capture of the late despotic and cruel King Theodore.

Britania seated with clasped hands, and in attitude of Prayer, is indicative of the many Public Prayers and Thanksgivings in the United Kingdom, by which the year 1868 has been marked. The prominent position of death denotes the pestilential character of the year, and the great mortality amongst mankind during 1868, both at home and abroad!

THE HIEROGLYPHIC FOR 1869.

Herein the aspects of the Heavens learn,
And of the times the my-tic signs discern.

SIGNS OF THE TIMES.

Extraordinary conduct on the part of Foreign Governments, and great probability, aye, even certainty, of a stir amongst the Continental Powers. All nations cannot be happy at once, the glory of one state depends upon the ruin of another; there is a revolution and vicissi tude of their greatness, and they must o'ey the motion of that wheel moved by the hand of God, whereby all estates arise to their zenith and vertical points according to their predestined periods. Let crowned heads beware, for the thread of fate is broken suddenly like flax before the fire!

THE WINTER QUARTER.

Yet Winter, in its august form
Has charms,— there's grandeur in the storm
When the winds battle with the floods,
And bow the mightiest of the woods;
When the loud thunder, crash on crash,
Follows the lightning's herald flash;
And rocks, and spires, and towers are rent,
'Tis startling, but *magnificent.*

The Solar Orb ingresses the first commencement of the tropical sign Capricorn, in our latitude, December 21st, 1868, at 28 minutes past Noon; and the Horoscope of the firmament, at that precise period, presents us with 19 deg. of Aries, arising in the *Eastern* Angle, while 7 deg. of Capricorn, are on the *Meridian.* There are several peculiar configurations in the face of the Heavens which deserve notice: Thus, Saturn, who rules the 10th Angle, is posited in the house of death; which, in an Astrological sense, certainly denotes the *death* or dethronement of a *Kingly Personage.* The conjunction of Mercury and Saturn, near the cusp of the 9th house, it will be an evil time for our maritime resources. Bad news from the watery element. Jupiter forms the benefic trine aspect with Saturn at this Ingress, shedding a ray of sunshine over the clouded sky of Spain. As Jupiter is in Aries assistance may be offered by England to the unhappy Spaniards, whose ignorance and apathy have for so many centuries allowed the priesthood and the army to tread them down into the dust. Let them now awake to a preception of the true cause of their misfortunes; for Jupiter will not assist them if they put not their "shoulders to the wheel." The aspects foretel many grave deliberations, state policies, and important embassies. The Pope (if living) will soon be on the theatre of jesuitical duplicity; and Italy will, in all probability, be a scene of confusion. Saturn's progress through the sign Sagittarius will affect not only the courts of law at home, but in the Southern cabinets much disquietude will be occasioned, and deep debates in the political departments of England will most likely ensue. A chasm in a certain administration, where it is least expected, will be heard of. The Sun is afflicted—aged "great ones," droop and die!

THE SPRING QUARTER.

I breathe with a voice of life and light
My song of joy o'er the glad young earth;
I come, and young flowers are fair and bright;
I speak, and ye hear the tones of mirth;
And the sun looks bright in the golden sky,
And the birds in the smiling heavens roam;
And the silver rills their music sigh,
And the fruit begins—but lo! Summer hath come.

The Sun was, with propriety, called by the Ancients the Heart of Heaven. To this glorious luminary, the exhaustless fountain of universal Light and Life, we are indebted for the variations of the Seasons. He now begins to display his genial influence; for on *Saturday*, March 20th, 1869, at 1h. 32m., P.M., he enters the Equinoctial sign Aries; at which time, 23 degrees of the sign of the Ram *Culminate*, and 12 degrees of the Celestial Lion *ascends* the Eastern horizon. All hail to the happy omen! The mighty Star of Jove vibrates on the summit of Heaven at this Ingress, in the sign Aries, the constellation of our native land, and he will mark his progress through, by causing some great event or change to take place, *decidedly beneficial to England.* 'Tis true his Transit through the sign will be but short; but let those who defend our rights and liberties strain every nerve, leave not a chord untouched: probe out the evil, and success shall attend their endeavours—but let them bear in mind—*delays are fatal!* The commercial prospects of the country, on the whole, wear a pleasing character; the importations will be rich and extensive. It will soon be an important period for Great Britain; but she must not be too subservient to the eagle of the north! Be prepared for political changes in America about this period, as a secret plan is agitating in that country! Its policies are subtle and not very advantageous to England. Egypt will know trouble, and some sudden convulsions of the southern world will soon be manifested. Saturn in the 5th house of the Figure will afflict the rising generation. Saturn, Mars, and Uranus, all three, stationary at this Ingress, is a sign of dreadful storms in foreign parts, hurricanes, earthquakes, and other convulsions of nature. Explosions, and coal-pit accidents.

THE SUMMER QUARTER.

I love the Summer calm, I love
Smooth seas below, blue skies above,
The placid lake, the unruffled stream,
The woods that rest beneath the beam;
I love the deep, deep pause that reigns
At highest noon o'r hills and plains;
And own that Summer's gentle rule
Is soothing, soft, and *beautiful.*

This Quarter commences at the time the Sun enters the tropical sign Cancer; which is on *Monday*, the 21st of June, at 10h. 4m. in the *Morning;* when we find the 9th degree of Virgo *ascending* the Eastern Horizon; and 2 degrees of Gemini, *Culminating*. Saturn is posited in the dark angle of the 4th house, in the sign of the Archer, and squared by Mars. this is far from being favourable to our goodly metropolis of London, Paris, Lyons, &c., it portends some public disasters, as well as evils of a physical nature, sickness, storms, and electric shocks. England and America—alike in language, energy, and endurance—shall they ever be antagonists? Forbid it Heaven! No it cannot be that the wise of either country will submit to the madness of demagogues. United, these two can work wonders—opposed, and the ravens of the old world will screech for joy. It appears as if our enemies regarded the tranquility of Englnd with invidious eye—they seem insulting, but let them beware to rouse the Lion from his sleep Saturn posited in the 4th angle at this Ingress, the sign Sagittarius, and in square to Mars—this will assuredly cause some very severe storms and smart shocks of earthquake this quarter: the locality of which (most probably) will be in the countries ruled by the sign Sagittarius and Virgo—that is, Calabria, Portugal, Hungary, Arabia, and Spain, as also Turkey, the West Indies, some parts of France, and the South-west of England. There will be numerous deaths by fire, sun-stroke, lightning, explosions, and coal-pit accidents. America presents a scene of turmoil, disaster, and derangement. Political feuds of a most aggravated form will continue; and monetary conditions will be most alarming. There are signs of warlike indications, for the "red star" arises in the East!

THE AUTUMN QUARTER.

I love to look at the silvery light
Of the sparkling gem at the pole,
And view the others so fair and bright
That round it continually roll.
I love to picture each well-known sign
Where planets their courses urge,
And watch to see them more brightly shine,
Arrived at their topmost verge.

This Quarter dates its beginning, when the Sun enters the equinoctial sign Libra, which I find from careful calculation, to take place on *Thursday*, the 23rd of September, at 0h. 28m., in the *Morning*, when 3 degrees of Leo will occupy the cusp of the *Ascendant;* and 9 degrees of Aries the *Midheaven.* Mars passing through Scorpio in opposition to Jupiter excites the warlike propensities of the Poles and the Irish. Let Englishmen no longer be guilty of the hypocrisy of sympathizing with the wrongs of Poland, while they leave Irish grievances unredressed: let them first cast out the beam from their own eyes. Statesmen, beware of American Ascendancy! they will have control in our own land by crooked politics:—beware of their schemes. Mars, the emblem of Royalty in this quarterly Figure, is going to an opposition of Jupiter. This portends some evil: accidents are not unlikely. The affairs of the low countries, Holland, Brabant, and Belgium, also Algiers, Constantinople, Venice, and parts of the German States, are much discussed; strange circumstances occur connected with their government. Saturn still continues moving onward in the sign Sagittarius—a sad omen for the countries affected by this malignant influence;—its effects will be spread over the north of Egpyt, Portugal, Spain, Hungary, and some parts of France; it will be of a curious and mystical character, secret plots will be discovered; and some deep-laid schemes of treachery unfolded The aspect of Mars denote fires and disturbances, and will most probably cause the destruction of some public buildings, or a church; and in many countries there will be earthquakes and other convulsions of nature. Queen Isabella of Spain will feel the evil effects of Uranus in square to her Sun during the year.

How to take the Temperament.

Take the nature of the sign ascending at the *hour* of birth, the nature of the Sun and Moon with regard to the signs they possess, and the true nature of any planet which may be found in the ascendant, or in conjunction of the Sun or Moon, without any regard to the signs they occupy.

When *heat* and *moisture* predominate, the native is SANGUINE; when *cold* and *dryness* predominate, NERVOUS; when *cold* and *moisture* predominate, LYMPHATIC; when *hot* and *dry* predominate, BILIOUS.

When the Sun, Moon, and Ascendant, are in signs of the same nature, and in conjunction of Planets of a similar nature to the signs they occupy, the temperament will be extreme, and prove detrimental to health.

UNMIXED TEMPERAMENT.

The Sanguine Temperament.

The *Sanguine* person has a *clear, florid, blooming,* and *pleasant complexion,* what is usually termed *fair complexion,* and has an animated air of the countenance. The more florid the complexion the

more sanguine, as far as this singularity is concerned. The sanguine temperament is further indicated by *light or chestnut coloured hair, blue eyes,* and *sparkling;* by the easy and voluble motions of the body, the *muscles hard* and *firm;* combining grace and variety; *body rather plump* and *fleshy.* With this temperament, of which the physical circumstances I have stated are the indications combined—*spirits lively* and *boisterous;* but the feelings are singularly evanescent, and liable to be easily displaced, and succeeded by new impressions.

——ooo——

THE BILIOUS TEMPERAMENT.

The Bilious or Choleric Temperament is more noble than the Sanguine. Is indicated by a darker swarthy complexion, of a ruddy character, dark brown, black, or red bushy hair; harsh skin, the eyes brown or hazel, vigourous, ardent, and piercing; strong and well defined muscular features. They are less than in the Sanguine, but harder, and of a fiery confident aspect. Bilious persons have in everything a character of vigour and intensity; their susceptibilities, though as easily excited, are more vivid than in the Sanguine, and are more under the dominion of real feeling.

——ooo——

THE NERVOUS TEMPERAMENT.

The *Nervous* or *Melancholic* Temperament evinces itself by a dry spare constitution; by a pale sallow complexion, by a sunken eye; by the cold, soft, heavy, languid outline; by its long features; by the delicate feminine form; by the fine black or brown hair; by the smooth skin, with small muscles; and by its unvarying character of permanent emotion. The Bilious and Nervous man possésses great energy and strong passions, overstepping the low, grovelling laws of necessity, by which the bulk of mankind are urged to crawl their little rounds. The Nervous Temperament, when mixed with the bilious, its sensibilities are refined, which are essential to genius. To these mixed, almost all the great men may be traced, the leaders of mankind, who guide and govern in the arduous struggle of contending interests and passions.

——ooo——

THE LYMPHATIC TEMPERAMENT.

The *Lymphatic* or *Phlegmatic* Temperament is the least excitable of all the temperaments; it seems to be the morbid condition of the sanguine; it is characterised by a clear, soft, doughy skin, with full fleshy body, light hair, light grey eyes, pale complexion; the countenance is soft undefined outline, heavy, indolent, and unmeaning; abounds with watery, tenacious mucilage; the slimy blood languid. This temperament was very large in the person of *Daniel Lambert.* The Sanguine Phlegmatic is a good combination, producing mild and estimable, if not highly energetic and commanding characters.
