THE SOUTHERN OIL AND REFINING COMPANY.

Frank D. Hines: President

We have had so many letters of inquiry regarding Our Oil Company, especially The Southern Oil and Refining Company, that we deem it advisable to give a pointer thereon. We have spent no Money for advertising or literature, we have not, so far needed to do so; we have no salaries, dont need to have any; we have no Stenographers, need none. We are after OIL and its OIL we are placing our MONEY in shape to bring forth; we have a Driller's Outfit, at work for us, with a capacity for but 500 feet depth. This accounts for us having Well No. 1. down 788 feet and capped, with OIL and Gas, good showing, and yet about Twenty feet from the Real Sand, we seek; This well has some 500 feet, or so, of Oil standing in it, from 750 foot depth; Well No. 2, also capped at depth of 700 feet, for same reason as it was with No. 1. Well No. 2, passed through Two sands, one showing fine Oil; the other giving forth about a half Million Cubic Feet of Grey, Wet Gas, fine Casing Head Gas. The Third Well, Now under way, has drilled through Two Sands, already, the second could have been shot in and made a commercial Producer, also Gas in this Well, along with Oil; we have this well, now down 500 feet and propose to go down to 1250 feet, if needs be, in order to make it THE WELL we KNOW it SHALL be when completed, a FINE BIG producer, as it is, (according to Oil Expert Lucian Bechner, one of the ablest Oil Experts, in Kentucky) on "The Finest Oil Dome ever located in That State;" Our Holdings consist of about 812 acres of best Leases in Adair County. We shall soon have the heavier Machine for Drilling at work and, then, by July 20th 1919, we SHALL not need to worry about a Price for Shares of Stock, The Company is Capitolized for $350,000, with Shares at Ten Cents, Par Value; Selling NOW, (March 1919), at Twenty Five Cents Each Share, or Two and One Half Times, The Par Value, and are worth, at least, Sixty Cents. We have over Eighty Per Cent of Our Capitol Stock, as yet, in the Treasury; we have spent less than Nine Thousand Dollors, and have done more, on less expenditure, than any other Company we can Name.

The President went into this deal, because he KNEW before he did so, that it WAS a SUCCESS; he would NOT be in it, did he KNOW anything to the contrary; The Company is a SUCCESS NOW and beyond the SPECULATIVE, and none need look further for a REAL, LIVE OIL DEAL, who really WANT OIL and want it for the good of HUNANITY, as well as for their own GOOD.

We are NOT spending MONEY in Postage, or writing, or advertising literature, but putting it in the ground, hence this article, in order that the hundreds of letters coming in to our President, may come with MONEY for Shares and not for creating unnecessary and uncalled for Expenditures.

Oil is our object; OIL we shall be in every venture, or else into OIL we shal not enter at all. We know and that knowing is all sufficiency.

Pan-American Notes.

Four new Commercial Agents have recently been appointed by the national government of Mexico, three of whom are to establish headquarters in prominent American cities, while the fourth will go to Barcelona Spain.

Announcement is made in the Mexican daily press that the Government is taking steps for the resumption of the payment of interest on the public debt, such payments have been suspended throughout the revolutionary period.

The cultivation of cotton is to be introduced into the Bajio region of the State of Guanajuato, Mexico, one of the best agricultural section of the Republic. Experiments have shown the superior character of the fiber produced as well as the abundance of the crops.

It is stated that the recent coinage of the national mint in small gold and silver whose bullion value is approximately the same as its face value, has brought the total amount of coin now in circulation in the Republic of Mexico up to $300,000,000. or about $20 per capita.

The U. S. Senate recently ratified a trade treaty between this country and Guatemala, designed to aid in the development of commerce between the United States and Guatemala.

Twenty locomotives of the Pacific type have been ordered from the American Locomotive company in Schenectady for the Chemins de Fer de la Provinde Argentine Republic.

Digitized by Google

In one day recently fifteen thousand packages were received in the city of Mexico from the United States by the Post Office Department. It was necessary to run a special train from Laredo to transort these packages. The greater portion of them consisted of articles of clothing, shoes, hats, etc.

The extensive mining and smelting plant of the American Smelting and Refining Company at Velardena, in the state of Durango, Mexico, is to be opened within a brief period. It has been closed for some time owing to the difficulty of obtaining the needed machinery and supplies from the United States because of the war.

The famous Potrero del Llano petroleum well in the Tampico district has developed into a decided freak. After flowing some 50,000 barrels daily for eight years it suddenly began producing salt water. After several weeks this was changed back to petroleum, and now after a further brief period, salt water is again being discharged.

It is announced that the Department of Foreign Relations of Mexico is about to establish forty new consulates in various portions of the United States, South America and Europe, where the demand for Mexican products has made it necessary to maintain consular representatives in order to assist and extend commercial operations.

A company has been organized in Mexico City for the purpose of establishing a motor freight service between that place and Toluca, Pachuca, Puebla, Queretaro and other important points. The first step to be taken will be the repair of the roadways between the cities named, some of which date back to the time of Cortez.

The necessary machinery has been received in Lower California for the sinking of a number of artesian wells by the Mexican Government for the purpose of securing water for the cultivation of a large area of fertile soil, which only needs it in order to become largely productive. Experts are of the opinion that water will be found in quantity at a comparatively moderate depth.

It is now reported that the garvanzo growers of Sonora and Sinaloa, Mexico realized upward of $12,000,000 (Mexican gold) from the crop of 1918. The demand for this article of food has extended all the way from British Columbia to Argentina, and preparations are being made to plant a much larger area thereof in the coming season.

A special commission of engineers has been appointed by President Caranza to take charge of development work in the entire Territory of Lower California. Artesian wells are to be sunk, pumping plants provided and an extensive area of hitherto arid land will be placed under cultivation in small tracts.

The Southern Pacific Railway of Mexico in repairing its track between Acaponeta and the city of Tepic, with the view of reopening traffic between those points, which has been suspended during the revolutionary period. This will afford direct communication by way of Nogales with the railway system of the United States.

According to statistics furnished by the agricultural Chamber of the State of Jalisco, the crops produced in that State during the past year included 16,500,000 bushels of corn, 1,259,000 bushels of beans, 375,000 bushels of garbanzos, 1,261,400 bushels of wheat, 28,600,000 pounds of sugar, and 1,000,000 head of cattle.

The Department of Industry and Commerce announces its intention to establish permanent exhibits of the natural and

Digitized by Google

manufactured products of Mexico various prominent American and European cities. There are already exhibits in San Francisco, New York, and St. Souis, and others are being prepared for Philadelphia, Buffalo and Boston.

The Chamber of Commerce of Mexico City has asked the associated commercial bodies throughout the Republic to join in a movement for the unification of the metric system of weights and measures and its universal substitution for other systems which still prevail in some portions of the country. Congress will be asked to adopt the necessary laws.

The National Railway Lines of Mexico have put several thousand men at work repairing and reconstructing various divisions which suffered severely during the revolutionary period. The lines receiving attention are the ones between Irrpuato and Manzanillo, Torreon and Saltillo, Monterrey and Tampico. The rails needed have been supplied by the steel works at Monterrey, being re-rolled from old ones.

A branch line of railroad is now under construction from Mexicali, a town on the boundary line between California and the Territory of Lower California, to San Felipe, the most northern port on the eastern shore of the Gulf of California. The region traversed has extensive agricultural and mineral resources, which have not been developed owing to the lack of proper transportation facilities.

Baltimore, Md.—The Johns Hopkins university has arranged to send the George Washington Williams memorial expedition to South America to conduct geological exploratious in the Andes of Peru, Bolivia and Chile. The party will leave early in April.

Rio de Janeiro—American flour and twenty other articles of import from the United States will enter Brazil with duty reduced 30 per cent. this year. Among the favored articles are condensed milk, windmills, typewriters, dried fruit, paints and varnishes, pianos and school furniture.

An English syndicate, it is officially announced, has sought a concession from the government, to build a railway that will connect Mexico City with Merida, state of Yucatan. The line, as projected, also would connect these points with Vera Cruz, Tabasco and Campeche and open up a vast stretch of rich but undeveloped territory.

President Carranza of Mexico has signified his approval of the project for the completion of the railway connecting the city of Durango with the port Mazatlan, Sinaloa. About eighty miles of the line have already been built, and when it is completed there will be direct rail connection between Mazatlan and the United States by way of El Paso, Eagle Pass, or Laredo, while a territory possessing extensive timber, mineral and agricultural resources will be opened for development.

In more than a hundred theaters thruout the Argentine republic American pictures are being seen daily by thouaands of people who now have an opportunity, as never before, to study the American people, their life, their customs, and their homes, from the most luxurious to the most humble New impressions are being made that will be beneficial to both countries.

In accordande with instructions from President Carranza, the National Agrarian Commission of Mexico, has sent circular letters to the local Agrarian Commissions throughout the Republic, requesting them to use all the diligence possible in carrying out the objects of their position, in order that the people desiring small tracts of land may secure them in time to place them under cultivation during the present agricultural season.

Digitized by Google

The Mexican government has provided for the restoration a large number of mining properties in the State of Chihuahua which had been temporarily "intervened" or taken possession of by the Constitutionalist authorities during the revolutionary period. The only exceptions made are those which stand in the name of Enrique Creel, Luis Terrazas, Victoriano Huerta and Pascual Orozeo, both the latter being dead. A large number of agricultural properties in the same State are also to be returned as soon as the necessary steps can be taken.

The Secretaries of Commerce and Labor, the Interior and Foreign Relations have decided to establish a Bureau of Commercial Statistics and Information for the purpose of collecting and publishing information and statistics of all kinds regarding the products, manufactures, and possibilities of Mexico. A directory will also be compiled giving the names and addresses of all merchants, manufacturers and producers in the Republic. The demand for Mexican products in foseign countries will also be studied and information supplied to those desiring it.

The Hawaiian Pineapple Packers' association has voted to expend $20,000 in the establishment of a sixty-acre experiment station. The principal object is to develop different varieties of pineapples which may be grown in Hawaii. At present the industry depends on the Cayenne pineapple, and the growers fear that if it should be attacked by disease the industry might be threatened with extinction.

The city of Payta, in Peru, is the driest place on earth. It is within five degrees of the equator, and the inhabitants see a shower on the average of about once in two years. Frequently, six or eight years elapse between rainfalls, but when a shower does come, it lasts usually from 12 to 20 hours. Strange as it may seem, there are seven species of annual plants which exist in this place, and the natives raise a kind of cotton with long roots which go down far into the soil and obtain noisture from the bed of an old, dried-up river which once ran thlough Payta.

A new school of Agricultural industry has been established in Mexico city in connection with the Angle-Franco-Mexicano Institute. Several Departments will be conducted in various suburbs of the city that are adapted to the different branches of experimentation. A four years' course will be followed, and among the studies pursued will agronomical and hydraulic engineering, sericulture, apiculture, horticulture, the chemistry of sugar, etc.

Reconstruction measures proposed for the Mexican republic include an ambitious scheme for the advancement of irrigation presented by Pastor Rouaix, secretary of interior development. He has asked for the appropriation of the sum necessary to establish irrigation systems in three of the most fertile valleys of Mexico. For one project in Chihuahua it is proposed to use water from the Elephant butte dam, on the American side of the border.

Decree Places Mexico on Strictly Gold Basis.

The decree which reforms the monetary system of Mexico, placing it under a strictly gold basis, was signed by President Carranza Nov. 13, and new gold coins are now being minted in that country worth 2.5 pesos. Millions of pesos in silver have disappeared from circulation, and have been demonetized to prevent speculation. It has been made illegal to give more than 20 pesos of the new decree as change. The new coins will be coined with less silver in them, making their exportation profitless. The recent monetary crisis in Mexico was brought about by the exportation of silver pesos and half-peso pieces, which, as the result of the high price of silver, were worth more in bullion than as coin.

Foreign and Government Trade Notes

The Sixth National Foreign Trade Convention, called by Chairman James A. Farnell, will be held in the Congress Hotel, Chicago, Illinois, on April 24, 25 and 26, 1919. The principle theme will be "Foreign Trade Essental to American Industry." Foreign selling will be discussed in all its different phases.

The Department of Commerce has issued a report calling attention to the almost unlimited opportunities of investing American capital in Latin America--in the development of mineral and forest resources, in agriculture and stock raising, and in the further development of public utilities.

Approximately four million officers and men of the Army and Navy are now insured with the United States Government for a grand total of almost thirty-seven billion dollars. The soldier and sailor should be careful not to let this lapse.

"The Boys" Working Reserve will go on with increasing organization and increasing energy as part of the U. S. Employment Service. Push it to the limit in Colorado. The service rendered last year by the Reserve does not begin to be the service that we must render this present year to save Europe from starving. There are features of the Reserve's work that already have put it permanently on the map."

Courier Service for Soldiers' Families

In view of the many inquiries that are being made concerning the welfare of soldiers in the American Expeditionary Forces, the War Department has recently instituted a courier service between America and France to get information desired.

This has been done because the quick demobilization of the army and the rapid change from place to place of different units have made it almost impossible for the Red Cross in France to follow up all inquiries satisfactorily.

In cases where there is doubt concerning reports that a man has been wounded, in fact in all casualty cases, the Bureau of Communication at National Headquarters of the American Red Cross, Washington, D. C., will continue to handle inquiries, but "straight welfare inquiries" should, in future, be made to the

ADJUTANT GENERAL,
WAR DEPARTMENT,
Washington, D. C.

instead of to the Red Cross.

Income Tax Due.

Returns Must be Filed on or Before March 15.

Bill Provides Heavy Penalties.

Work on the collection of $6,000,000,000 has been begun by the Bureau of Internal Revenue. This is the estimated yield of the new revenue bill. The income tax provisions of the act reach the pocket-book of every single person in the United States whose net income for 1918 was $1,000, or more, and of every married person whose uet income was $2,000 or more. Persons whose net income equalled or exceeded these amounts, according to their marital status, must file a return income with the collector of internal revenue for the district in which they live on or before March 15.

The South and Central American fields offer so much of promise and opportunity to American industries that the subject of proper methods of preparing goods for shipment is an important one. There seems to be a good deal of misunderstanding about the various conditions under which such business must be handled, and in response to a popular demand, the American Express Company has prepared a booklet of shipping instructions in which all of these subjects are treated. Send to American Express Company, Foreign Trade Bureau, 65 Broadway, New York City.

The Victory Liberty Loan. Statement by Secretary Glass.

The Victory Liberty Loan campaign will begin not later than April 21st. The requirements of the Treasury are imperative and cannot be financed without such a campaign. The form and terms of the securities to be issued remain to be determined. Whether they be bonds or notes, it is absolutely essential that the widest possible measure of distribution be realized. This will necessitate a campaign of the same character as that conducted in the past through the existing Liberty Loan organizations. They have pledged again their united support in order that the Victory Liberty Loan bonds or notes may be distributed as widely as possible among the American people.

War Savings

Americans in 1918 invested $1,015,067,471.80 in Thrift and War Savings Stamps, according to the report issued today by the Savings Division Treasury Department. The total represents a per capita investment of $9.64 according to the latest census figures.

To Nebraska goes the credit of having attained the highest total with net sales of $27,450,189.95 and a per capita sale of $21.18. Ohio came second with a total of $86,244,733.20 and a per capita of $16.39 and South Dakota third with $9,911,807.81 and a per capita of $16.38. The District of Columbia which had been organized as a separate unit for the sale of Thrift and War Savings Stamps was fourth with a per capita of $15.93, sales being $5,882,850.40. The gross sales for Ohio were the largest of any state.

December sales alone aggregated $83,728,119.43. Connecticut leading with $3,568,370.70, a per capita sale of $2.67. Vermont with a per capita sale of $2.03 was second and Iowa third with a per capita of $1.71.

Government Needs Accountants.

About one thousand high-grade accountants and auditors are wanted by the Government as quickly as they can be secured.

The Income Tax Unit of the Bureau of Internal Revenue, Treasury Department, has a tremendous job on its hands, and is in urgent need of 350 traveling auditors and resident auditors for the higher-grade positions and entrance salaries ranging from $3,000 to $4,500 a year.

The ordnance Department of the Army needs at once 250 senior cost accountants at entrance salaries from $2,200 to $4,200 a year, and 250 junior cost accountants at entrance salaries from $1,200 to $2,000 a year. These are needed in connection with contracts and disposition of plants and material.

The Interstate Commerce Commission wants 50 examiners of accounts for work in connection with the valuation of common carriers and the examining of carriers' accounts. These are usually appointed at entrance salaries from $1,800 to $2,100 a year, the higher-salaried positions, which pay from $2,200 to $3,000 a year or more, being filled as a rule by promotion.

All of these positions are open to both men and women, except positions of examiner of accounts in the Interstate Commerce Commission, which are open to men only.

The United States Civil Service Commission will receive applications for these positions at any time until further notice. Full information and application blanks may be obtained by calling upon the secretary of the local board of civil service examiners at the customhouse or post office in any important city, or by communicating with the United States Civil Service Commission, Washington, D. C.

Applicants will not be assembled at any place for a written examination but will be rated upon their sworn statements in their applications as to education, experience, etc., and upon corroborative evidence adduced by the Civil Service Commission.

PRECIOS DE SUSCRIPCION:
Por un año, 50 centavos, Oro, en los Estados Unidos, México, y Nuestras Nuevas Posesiones. Suscripciones al Extranjero, 75 centavos. Un ejemplar, 5 centavos.

CARTA DE VICTOR HUGO.

Al Presidente de la República Mexicana, Juárez.

Vos habéis igualado a John Brown por quien ha muerto la esclavitud; vos por quien ha vivido la libertad.

México se ha salvado por un principio y por un hombre; ese hombre sois vos. De una parte dos imperios, de la otra un hombre; un hombre con sólo un puñado de hombres desterrados de ciudad en ciudad, de pueblo en pueblo, de rancho en rancho, de bosque en bosque, perseguido, errante, rechazado a las cavernas como una bestia feroz, refugiado en el desierto, proscripto. Por generales algunos desesperados; por soldados algunos desnudos. Ni dinero, ni pan, ni pólvora, ni cañones. Los matorrales por ciudadelas. Aquí la usurpación llamándose legitimidad. Allí el derecho llamándose bandido. La usurpación precedida de todas las legiones de la fuerza. El Derecho, solo, desnudo y abandonado. Vos, que sois el derecho, habéis recogido el guante y aceptado el combate. Labatalla de uno contra todos ha durado cinco años. Falto de hombres, habéis tomado por proyectiles las cosas. El clima terrible os ha socorrido. Vos habéis tenido por auxiliar a vuestro sol.

Vos habéis tenido por defrenors los apos intransitables, los torreates llenos de caimanes; ;las vegetaciones mórbidas: el vómito prieto de las tierras calientes; las soledades de sal; los arenales sin agua y sin yerbas, donde los caballos mueren de sed y hambre, la grande y severa mesa del Anáhuac, que, como la de Castilla, se defiende por su desnudez; las barrancas siempre conmovidas por los temblores de los volcanes, desde el Colima hasta el Nevado de Toluca, Vos habéis llamado en vuestro auxilio a vuestras barreras naturales, a la aspereza de las cordilleras a las altas murallas basálticas, y a las colosales rocas de pórfido. Vos habéis hecho la guerra de los gigantes, y vuestros proyectiles han sido las montañas.

Y un día, después de cinco anos de humo, be polvo y de ceguedad, la nube se ha disipado, y entonces se han visto dos imperios caídos en tierra. Nada de Monarquía; nada de ejércitos; nada más que la enormidad de la usurpación en ruina, y sobre este horroroso derrumbamiento un hombre en pie; Juárez y al lado de este hombre la libertad.

Todo esto vos lo habéis hecho, Juárez, y en verdad es grande, pero lo que os resta que hacer es más grande todavía.

Escuchad, ciudadano Presidente de la República Mexicana: Vos acabáis de demostrar el poder de la democracia; ahora mostrad su belleza.

Después del rayo mostrad la aurora. A los bárbaros mostrad la civilización; a los déspotas, los principios.

Dad a los reyes delante del pueblo la humillación del asombro; vencedlos sobre todo por la piedad.

Los principios se afirman por la protección de nuestro enemigo. La grandeza de los principios consiste en ignorarlo todo. Los hombres no tienen hombre delante de los principios. Los hombres es el hombre colectivo, el hombre representaudo a la humanidad. Los principios no conocen a nadie ni a nada más que a sí mismos- En su augusta estupidez no saben más que esto: La vida del hombre es inviolable. ¡Oh venerable imparcialidad de la verdad! ¡Oh hermosura del derecho sin discernimiento, ocupado sólo de ser el derecho! Precisamente delante de los que han merecido legalmente la muerte, es donde debe abjurarse de las vías de hecho.

La grandiosa destrucción del cadalso debe hacerso delante de los culpables.

Digitized by Google

Que el violador de los principios sea salvado por un principio. Que tenga esta dicha y esta vergúenza. Que el perseguidor del derecho sea salvado por el derecho. Despojándolo de la falsa inviolabilidad de la corona, vos lo ponéis delante de la verdadera inviolabilidad humana. Que se quede asombrado: que vea que el lado por el cual es sagrado, es precisamente por el lado por el cual no es Emperador.

Que este Príncipe, que no adiviraba que era un hombre, sepa que hay en él una miseria, el rey: y una majestad, el hombre.

Jamás se os ha presentado una ocasión más magnífica.

Juárez, haced que la civilizacion dé un paso inmenso: Abolid sobre toda la tierra la pena de muerte. Que el mundo vea esta cosa prodigiosa. La nación en el momento de aniquilar a su asesino vencido, reflexiona que es un hombre, le suelta y le dice:

—Tu éres del pueblo como los etros:—Vete.

Esta será, Juárez, vuestra segunda victoria. La primera, vencer la usurpacián, es soberbia. La segunda, perdonar al usurpador, es sublime.

—Sí . . . a estos príncipes a quienes obedecen los justes: a estos jueces a quienes obedecen los verdugos, a estos verdugos obedecidos por la muerte, mostradles cómo se perdona a la cabeza de un Emperador.

Sobre todos los códigos monárquicos de donde manan las gotas de sangre, abrid la Ley de Luz, y en medio de la más senta página del Libro Supremo, que se vea el dedo de la República sobre esta orden de Dios:—NO MATARAS.

Estas cuatro sílabrs contienen el deber.

El deber vos lo haréis.

¡El usurpador será salvado, y el libertador no ha podido serlo! Hace ocho años, el 2 de Diciembre de 1859, sin más derecho que el que tiene cualquiera hombre, be tomado la palabra en nombre de la democracia, y he pedido a los Estados Unidos de America la vida dos de Jhon Brown: No la he obtenido. Hoy pido a Máxico la vida de Maximíliano. ¿La obtendre?

Sí Puede ser que a esta hora esté ya concedida.

¡Maximiliano deberá la vida a Juárez!

VICTOR HUGO.

Hauterville House, 20 de Junio de 1867.

EL FERROCARRIL---THE RAILROAD.

Levántese amigo mio, ya es la hora para ir á la estacion.

¿Ha llamado Vd. el coche?

No, no fué necesario irémos á pié, no está lejos.

¿Hizo Vd. enviar el equipaje temprano?

Si, todo está arreglado.

Déme esa tabla, vamos á ver la ruta que debemos tomar.

Salimos de aqui á Nueva York á las nueve de la mañana, y llegarémes en San Francisco la noche del cuarto dia.

¿Pero, no vamos á parar en algunas de las ciudades más importantes?

Sin duda, visitarémos á Buffalo, Chicago, Denver y Salt Lake City.

¿Cuanto tiempo permaneceremos en esas poblaciones?

Conforme á lo que hay de ver. Y debemos ver á los saltos de Niagara, los mas maravillosos del mundo.

Y las matanzas de Chicago, las minas del estado de Colorado, y el tabernáculo famoso de los Mormones en la ciudad de Salt Lake.

¿Ha comprado Vd. las boletas?

Si, aqui las tiene Vd. Nos dan tiempo para visitar todas aquellas ciudades.

Saldrémos en el tren de mañana?

Por supuesto, y el tren expreso, que sale muy de mañana.

Tengo deseos de salir; quiero ver todo lo que hay de ver en los Estados Unidos de la América del Norte.

Muy bien; le despertaré á Vd. á las tres de la mañana,

Buenas noches.

Que duerma Vd. bien.

¿Donde está la estacion del ferrocarril?

Está al pié de la calle veinte.

Llámeme un coche para las diez.

Está muy bien, señor. ¿Quiere Vd. un expres para llevar su equipaje?

Get up, my friend, it is time to go to the depot.

Have you called the carriage?

No, it is not necessary. We shall go afoot; it is not far.

Did you send the baggage early?

Yes, all is arranged.

Give me the time table. Let us see the route we ought to take.

We leave here for New York at 9 o'clock in the morning, and shall arrive in San Francisco the night of the fourth day.

But are we not going to stop at some of the more important cities?

Undoubtedly, we shall visit Buffalo, Chicago, Denver and Salt Lake City.

How long shall we remain in these places?

According to what is to be seen. And we should see Niagara Falls, the most wonderful in the world.

And the slaughter houses of Chicago, the mines of the state of Colorado and the famous Mormon tabernacle of the city of Salt Lake.

Have you bought the tickets?

Yes, here you have them. They give us time to visit all those cities.

Shall we leave on tomorrow's train?

Of course, and on the express train which leaves very early in the morning.

I have a desire to leave. I wish to see all there is to be seen in the United States of North America.

Very well; I shall awaken you at three o'clock in the morning.

Good night.

May you sleep well.

Where is the railroad station?

It is at the foot of twentieth street.

Call me a coach for ten o'clock.

All right, sir. Do you wish an express wagon to carry your baggage?

Initiate Lesson No. 8.

GENDER

By Frank D. Hines, Magus

Everything is governed under this Law, the great Seventh Hermetic Principle and to me, this principle should come first. I feel that Gender being the creative Principle should come first of the Seven Principles. The word Gender means "to beget; to procreate; to generate; to create; regenerate; to produce." Bring forth a new creature.

Many books have been published on the "sex question," and societies have been formed giving instructions on this subject, but they are teaching the doctrine of separateness instead of unity. Gender and sex are not the same in the Hermetic sense. Sex means to put apart; to separate the soul of man from the soul of woman. Gender means masculine and feminine, male and female, positive and negative, so conjoined that they form an exact polarity without any question as to separateness; without any possibile opportunity for separateness; without any possibility of any drawing apart, because Gender is the absolute necessity for everything, everywhere, all the parts of the universe from "The Absolute Is", down to the minutest atom. And Gender brings the corpuscles, electrons, or ions, into the atom form; chemiacl affinity is nothing but Gender operative in such an extent that it holds together and attracts the good and repulses the evil. Electrons, ions' and corpuscles are united thru the process of Gender--the formation of the atom is due to the clustering of the negative corpuscles around a positive one--the male element is sought by the female, instead of the female being sought by the male as seems to be the rule on the human planes of life.

The female must seek the male--this would do away with family rows. Man has been through the sex principle unreasonable; woman has been imposed upon. Man has mistaken his mission; he has not considered woman as the means, the instrument, in which he must create everything he expresses and puts into action. Without the female side there would be no creative process possible; without the male side there would be no projection. Without the female there is no womb to the universe, and hence there is no incubation. Without the female principle there is no power; without the male there is no expression of power possible. Without the Father-Mother actualized Gender, there is no Son no expression, no action no creation, Without action there is no Spirit of Energy--hence, no life, and consequently the Son is the Savior of everything there is, hecause He is the Light expressed as the Omnipresence everywhere.

So, between man and woman there is the factor of Gender--the male and the female, and consequently they are within themselves the projection of Light and the creative process. Without woman, man cannot project Light without man, woman cannot generate Light. There is the male and female side to everything in the universe--without the one the other cannot act, Woman, Power man, is Force.

Digitized by Google

Those persons who are teaching a philosophy of sex contrary to Gender are in the wrong science and teaching a wrong doctrine, and are teaching the doctrtne of separateness instead of unity. Without Gender there can be no result, because the object is the emenation of your thought, and there can be no thought creative without Gender; there can be no projection without the male element to send out thought as the Spirit of thought, and no receptivety without the female element.

Gender being true of everything in the universe, it gives you a correct understanding of the law, of Chemical Affinity. Electrons and corpuscles becoming the atom as really the first Gendered expression of Matter. There is, then that which is the male and female principle manifested in the atom, but not before. electrons, ions, and corpuscles have no Gender--but when the negative electrons find a positive one, they cluster around it; the positive seems to exert a certain influence upon the negative electrons and corpuscles, causing the latter to assume certain combinations and thus create, or generate, an atom. And this atom finds its affinity, after becoming detached or separated from the feminine electrons (this is called "ionization") and its affinity finds another affinity and so on--and these chemical affinities are the most active workers in Nature's field--everything is built up of atoms; they form cells, electricity, light, heat, magnetism, attraction, repulsion, chemical affinity never the reverse.

The late Hudson said there is an "objective mind and a subjective mind." Hermetics do not say objective and subjective mind--there is a male, female mind; it is Gendered; the "I" working in the intellect, the "Me;" the "Me" the recipient, the generative, regenerative, recreating process, operating through the "I", or of the "I", the male side. There is a right side and a left side of the intellect--one vibrates across to the other--one creates, constructs, forms.-the other throws out- projects. Yet they weave into each other, interblending--and there is no such thing as objective and subjective; it is male-female "positive and cathode"--Cathode meaning the South Pole, the creating pole, the mother principle--the North Pole represents the masculine, the positive; this is Gender operative.

Gender keeps the sun and the stars in their rhythmic courses. Gender is that which absolutely polarizes--brings to them polarity which enables power to become energy; energy to become that which is created and it becomes something else. In mind you have the two principles; you cannot operate a mind that is not male and female, and in our person this Gender holds good--the male has the female element, and the female has the male element. In all our processes of operative work which amounts to anything, which builds up and becomes something, which is projected out and becomes force and energy--wherever you accomplish anything, you have Gender operating. The "I" and "Me" part of the mind represent the male and the female operating. The one, the "I", gives the "Me" something to do--wills it into being--and it is taken up by the "Me", cogitated upon, turned about, held in the womb of the intellect; held there until it is ready for projection, and then the will, the "I", comes up and throws it out a finished product. It is your child then--a son of yourself. You

Digitized by Google

are all the sons of God, because you are the projection of that which is the "Father-Mother principle of the universe" a product of the universe--a child of the correct working of the Law of Gender.

There is a masterful difference between Gender and that which is termed sex. Sex means to separate to tear apart; but Gender means to unite with a purpose, projected as a Son, and out of that the Spirit expressing Omnipresence, the savior of all.

When you carry this idea of Gender into effect and carry it into all your mental processes, all your words--for every word is male-female--you will find there is something in it. If it is the Son that comes out of your words, it is as a Savior; if it is an evil word, it will be a destroyer; beware of the words you send out, because you are male and female, you are Gendered, polarized and your words will come out in the shape of that which you send out as a child born from the willed word you have projected, and that child's spirit will become an active principle. When I curse anybody the child will be named a curse, and consequently the spirit of destruction will emanate from that child and I have sent the spirit of destruction forth as that child, and it will come back to its own father-mother. Those persons who understand the Law of Gender will always think before they speak a word--they will always study and get back to the right principle before they utter a thought, because thoughts are sons projected from the male and female spirit and are either constructive or destrnctive forces until they are annihilated. Your own shall come back to you through the Law of Affinity. Now, according to the law of chemical affinity, the electrons, ions, and corpuscles form an atom. These atoms connect with other atoms--perhaps not your atom, but with someone's atom somewhere. You sent out words and you have projected the male upon the female atoms; you have affinitized the electrons and corpuscles and you have crystalized them into the shape of atoms; it meets another atom, and out of all these atoms a body is formed,--and this body will eventually be your own body. And we gather not only what we send out, but we gather all their relatives that have been sent out also, and soon they form a monster, by associating with similar vibrations of expression,--and whoever has had n hand in the creation of this monster will receive his share of the destructive forces, and consequently every one is going to suffer--and all that belong under the law of hate, under the law of jealousy, combativeness, of destruction--will form relationship with the others that belong to its kind, for under the Law of Gender you bring back to yourself your own. It pays to belong to that which is good and constructive--to be strictly in harmonious relationship with the Constructive Principle in Nature; with all the good souls, and all the good thoughts and all the good people, and through the Law of Gender, you are polarizing with such; you are affinitizing with such; you are building a building that comes forth from the thoughts of such; you are relationing yourself into a citizenship, into a kingdom of righteousness, good--or you are going to belong to the kingdom of destructiveness. There is only one way to accomplish good and one way to accomplish evil; you cannot "straddle the fence." The Law of Gender prohibits this and if you try it you are not in Gender--you have lost the male and female element--

Digitized by Google

you have divided your forces. The moment you take one side or the other you are a creator of destruction, chaos, or a creator of life and harmony. It is Gender that governs the whole thing; it is Gender that keeps this universe together; it is Gender that renders all things capable of expression; it is Gender that rules over stars, over earth and everything on the earth, and everything in the universe and every atom of everything. Beneath the atom there is no Gender. And there are spirits that manifest that have no Gender--they are spirits of chaos, and represent only one thing--the destructive forces; they have no mothor principle; they have no creative principle; they are a magnified force that carries everything before it. A tornado might be called a force that is not in Gender--it has become a one-sided force; it is devoid of the female or calming force. And we might say when the air is humid and depressing that it is too negative; it has lost its positive force--it has too much of the female element manifesting--it is out of Gender. The woman that becomes out of Gender becomes a regular termagant; the man out of Gender becomes a destructive cyclone; the positive without the negative (or female) is a tornado. Gender comes in as that which levels, equilibrates, brings to the right manifestation the right forces in each one of us. So, I say that a man without a woman amounts to nothing--and a woman without a man amounts to nothing; not in the physical relationship of man and woman, but the influence of woman and man--the influence of Gender, if only a handshake or casual association. A man's influence, of course, is to stir up, to make positive, to make active, to energize--the man the tornado, the woman the calm, and we must bring the two forces together, equilibrate, and get the force that comes out a son, a savior, which to me means the Great Magical Agent, because he sprang out of that which is the Father-Mother principle of the universe under the Law of Gender--and we say we make this Magical Agent the Body of the Holy Ghost, because it is of the Father-Mother-Son--it is something the result of Gender, rightly manifesting as Spirit, and Spirit is actualized Gender, or the Law of Gender in full Omnipresent manifestation--and when you seize upon the Father-Mother-Son principle, in Nature, you have something that is invincible.

When members of this class attend a lecture where our new hygiene teachers meet to discuss the question of sex, you will know where they are wrong--you will know what they are trying to work out--and you will find it a process to keep man and woman separated, to keep them, forever, at daggers points, to make them feel they have separate spheres of expression and activities, which is all contrary to the Law of Gender, and you cannot work without Gender--it is essential to correct polarization, or law of affinitizing the two sides of being, as an individualized constructive process. The point is--when you are under Gender there is no separatences. This is where we get into the Great Brotherhood, because there is no separateness in the Infinite, Living Mind and there is no separateness in the Infinite, Living Word, or in the Infinite, Living Spirit; because it is the Father-Mother principle, Gender, rightly adjusted and expressed. There is no error in the Eternal Plan because it is under the Law of Gender, operative, and no force can undo me, provided I am under the Law of Gender; I cannot be worked against because there is no error in the Eternal Plan.
