THREE AOVANTAGES OF MAGAZINE ADVERTISING

1. ITS PERMANENCY.

The life of a magazine advertisement is long. It remains effective for many months, often for years. A magazine is read, passed on, reread, goes to hospitals, to the army, navy, abroad, and is at last put on sale in the second-hand book stores, to begin a new life. No other form of advertising has this longevity.

2. ITS PUBLIC.

The magazine reading public is the live, up-to-date, busy, enterprising, inquisitive public. The magazine is the business man's and the housewife's literature. It is the recreation of the leisure hour, and the mirror of the world's events, when they have been sifted from the chaff of rumor and mistake. Magazines are cheap enough to reach all intelligent readers, good enough to command their attention. The magazine public is the material upon which to build permanent advertising results.

3. ITS COMPANY.

The great magazine advertisers are the prominent successes of the business world. To be associated with them in the public mind is to secure the very best publicity—to enter the aristocracy of advertising.

Pan-American Notes.

Suffrage Granted to Mexican Women.

Mexico City, Mexico.—The legislature of Guanajuato has granted women suffrage with the restrictions that voters must be able to read and write and must also be self-supporting.

Mexico Taxes Railway.

Mexico City, Mexico.—The Mexican government has acquired the remainder of the stock of the United Railways of Yucatan and now has complete control of that company, which operated a line between the port of Progreso and Merida.

Naval Orange From Bahia.

It was from a plantation near Bahia, so far as can be determined, that the budded trees were obtained through which the navel orange wood was introduced into the United States. Several were shipped to the United States department of agriculture. Trees were grown in the department greenhouses, and others propagated from them were distributed to California and Florida. The variety proved to be unsuited to Florida conditions, but in California it is very productive and highly valued. Almost the entire present planting of the variety in that state, according to a writer in the Scientific American, can be traced directly back to two of the trees sent there by the department of agriculture in 1873.

Peruvian System of Fines

The directors of the Central Railway of Peru have adopted a commendable disciplinary measure in a system of fines. To levy correctional fines against employes for careless or improper acts is no new idea. It is in the disposition of the funds, as well as in the thoughtful imposition of the fines, that the Central Railway system stands out in a favorable light. The rule is to give the disciplined employe a receipt for his money, and immediately to turn the money over to the Mutual Society of Railway Employes, where it goes to swell the fund for sick benefits and similar uses—in effect, an involuntary contribution for a charitable purpose.

Valuable Relics Found in Ruins of Zuni Village.

Washington, D. C.—A scientific expedition organized by the Smithsonian Institution and the American Museum of the American Indians, which has been excavating among the Zuni ruins of Hawikuh in western New Mexico, has exhumed a number of valuable Indian relics, dating back to the early sixteenth century, it was announced today.

Profusely decorated pottery, baskets, tribal regalia and war implements were found in graves. Remains of walls beneath the site of Hawikuh indicate that a settlement existed there in prehistoric times before the Indian village was built.

U. S. Foreign Trade Last Year Almost Reached 9 Billion

Washington, D. C.,—America's foreign trade in 1917 reached the unprecedental total of $8,953,000,000, of which $6,294,000,000 was exports and $2,659,000,000 imports. Exports in June, the last month of the fiscal year, totaled $576,000,000, the highest of any month in the country's history with the exception of last January. Imports during the month were valued at $307,000,000.

The trade balance in America's favor for the year was $3,635,000,000. That was $1,499,000,000 more than the year before; $2,540,000,000 more than 1915 and $3,164,000,000 larger than in the last year before the war.

The increase in the country's total foreign trade was $2,422,000,000 over 1916, $4,511,000,000 over 1915 and $4,695,000,000 over 1914.

Exports during the year were greater by $1,961,000,000 than in 1916. $3,525,000,000 in 1915, and $3,929,000,000 in 1914. Imports also show a great increase. The 1917 total was $461,000,000 over 1916 $986,000,000 over 1915, and $765,000,000 over 1914.

Red Cap Camp in Arizona is Down to Boom

New Gold Field in Colorado River Range North of Kingman

Kingman, Ariz.,—Reports from the Red Cap gold camp are all favorable to a boom started in the new field. It lies in the New Weaver district, at the upper end of the Black Hills, an extension of the Colorado river range which bounds the western edge of the Sacramento valley. It is about ninety miles northwest of this point.

The first discovery is a vein which at shallow depth showed sixteen inches of ore which broke at $75 in gold to the ton as it came from the vein and which has opened to five feet, still carrying such values. There are already open several tons of milling grade that will average around $20, and the mine seems good for years of outputting rock of this character. The vein widens as the work proceeds and the company has located a second pay shoot in another part of the property in which it has blocked out a large amount of milling ore. Two shifts are being worked on the Red Cap, and a mill is planned to go up soon.

A number of good surface openings have been made, indicating the presence of a number of pay veins in the district.

Digitized by Google

Already the prospectors are coming in, and something of a rush is expected as soon as the word goes out that the early promises of the veins are being fulfilled. Mining conditions in the district are above the average of new Arizona fields. There is a good spring for camp purposes, and the cost of mining will not be oppressive

In The Sage Along The Trail

Thru the sage the sunlight shimmers.
Where the Alamosa flows.
Comes a winding o'er the desert
From the distant mountain snows.
Where the cattle dot the mesas,
Dot each hill and sandy dale.
Where the cowboy reigns unchallenged
In the sage along the trail.

Blood is red that flows in freedom.
Hearts beat strong to do and dare.
Eyes are clear and nerves grow stronger;
More of joy, and less of care.
Life is like a page of romance
Torn from out a fairy tale.
There's a gleam of heaven's splendor
In the sage along the trail.

One has time to think while living
Close to earth and close to God.
Sleeping 'neath the starry heavens
In a couch of sage-brush sod.
Was there ever grander palace
Built upon this earthly vale,
Where the cawboy dreams contented
In the sage along the trail.

—Fremont Pollock Livingston.

Rich Oil Field Opened on Island in Mexican Gulf

Angel de la Guarda Promises to Become Rival of Tampico.

Commission Explores

Lower California Section Included in the New Field.

Washington, D. C., Aug. 18.—The Mexican News Bureau makes the following announcement concerning the discovery of a new oil field:

An official report announces the recent discovery of extensive petroleum measures on the Island of Angel de la Guarda, in the Gulf of California and on the opposite side from Tiburon island, which is close to the east shore of the state of Sonora and almost due west of Hermosillo, the capital city.

A commission of engineers engaged in exploring this little known region encountered quantities of asphaltum on the shores, being natural exudations, and after examination of the entire region gave it as their opinion that the oil field was so extensive as to promise to equal anything of the kind in the republic. The deposit is not confined to the island named, but extends to the mainland on the peninsula of Lower California.

Steps are being taken for the prompt exploitation of the measures upon a large scale. The nearest railway and outfitting point to the newly discovered oil fields is on the Southern Pacific railroad of Mexico, at Hermosillo, from which place it is some sixty or seventy miles in a direct line to the gulf coast. From Guaymas, 110 miles southwest of Hermosillo, there is direct communication by water with the island named, a distance of 150 to 170 miles.

Makers of Trucks Offered Widening Field in Mexico

Immense Export Market Will Develop Within the Year, Says Capitalist.

"You American motor truck manufacturers will soon have an immense export market right at your very doors," says Senor Emanual De Campo, prominent Mexican capitalist and Kissel Kar dealer in Mexico City.

"It is my opinion that within a year normal conditions will be a reality in Mexico, and then American motor trucks will be in great demand to help build up the country. The transportation facilities in Mexico at present are very badly disrupted, owing to the terrific destruction of rolling stock as well as live stock, mules, etc. What automobiles and trucks there were have been commandeered by the different armies or destroyed. While

Digitized by Google

the railroads are being repaired trucks will be the only means of haulage and transportation."

"The unlimited quantity of oil at Tampico is assurance that this supply will never be exhausted and always will be cheap. Right now oil is selling at 25 cents a barrel."

Senor De Campo recently purchased a building containing 30,000 square feet of floor space, originally erected as the largest dance hall in Mexico, with foyer, cafe, card and gambling rooms. Boxes extend completely around the floor. Located in the heart of Mexico City, it has been transformed into an up-to-date automobile display and sales room with service station, garage and repair shop.

One of the present difficulties which American shippers have to contend with in shipping to Mexico City is that the United States railroads will not allow their cars over the Mexican boundary line where experience has proven they will either be commandeered or destroyed. Senor De Campo in order to get his shipments to Mexico City must unload at the boundary line and reload his own box cars which he purchased outright as native box cars are too small and have doors only on the sides instead of at the ends, which are necessary in loading trucks.

Resources of Luna County, New Mexico.

Its Greatest Wealth Lies in its Underground Waters

Luna County, in southern New Mexico, is not rich in metallic minerals, but parts of the county are underlain at no great depth by waters which are great value for irrigation. These waters are now used extensively, and when they are fully utilized their products will be of great value. In the Deming folio of the Geologic Atlas of the United States, now being issued by the United States Geological Survey, Department of the Interior, Geologist N. H. Darton gives a description of the greater part of Luna County. He shows that although the area underlain by water is wide and long, it has its limits and homesteaders taking land outside of the favored district will be disappointed in their water supply. In this publication many facts are given as to depth of wells, volume of water available, and other important details as to water resources. The water bearing beds are 20 to 50 feet thick and consist of gravels and sands deposited by Mimbres River, mostly lying from 20 to 200 feet below the surface. They underlie about 500 square miles of country, and it is estimated that in this area there is sufficient water to cover 2,560,000 acres to a depth of 1 foot. This supply will bear considerable draft, but as the source of the water is not unlimited crowding of pumping plants would in time seriously deplete the supply. There are in the area about 300 wells now being pumped, and the many acres under irrigation are yielding good crops of forage and vegetables. Accordingly the region is prospering, and Deming has developed into a town of considerable importance

Besides discussing the vital subject of water, Mr. Darton gives data as to the rocks and minerals of various kinds which appear in the scattered ridges and rough mountains rising out of the great desert plain. These rocks represent portions of geologic time from the most ancient to relatively recent, and some of them are igneous, the products of vigorous volcanoes.

A copy of the Deming folio (No. 207) may be obtained by remitting 25 cents to the Director of the United States Geological Survey, Washington, D. C.

"The United States Government needs, and needs badly, great numbers of stenographers and typewriters, both men and women, for service in the departments at Washington, D. C., and the situation in Federal offices outside of Washington is scarcely less urgent. The supply of qualified persons on the Commission's lists for this class of work is not equal

to the demand, and the Commission urges, AS A PATRIOTIC DUTY, that citizens with this special knowledge apply for examination for the Government service. At present all who pass the examination for the Departmental Service are certified for appointment. Examination papers are rated without delay.

"Examinations for the Departmental Service in Washington, D. C., for both men and women are held every Tuesday in 400 of the principal cities. Examinations for the Field Service (positions outside of Washington, D. C.) are held frequently.

"The usual entrance salary ranges from $900 to $1,200 a year. Advancement of capable employees is reasonably rapid.

"Applicants must have reached their eighteenth birthday on the date of the examination.

"Full information and application blanks will be mailed to persons interested upon application to the United States Civil Service Commission, Washington, D. C., or to the Secretary of the United States Civil Service Board of Examiners at any of the following-named cities: Post Office, Boston, Mass., Philadelphia, Pa., Atlanta, Ga., Cincinnati, Ohio, Chicago., Ill., St. Paul, Minn., Seattle, Wash., San Francisco, Cal., Customhouse, New York, N. Y., New Orleans, La., Honolulu, Hawaii; Old Customhouse, St. Louis, Mo.; or to the Chairman of the Porto Rican Civil Service Commission, San Juan, P. R."

Pink Bullworm Spreading in Mexiao

Explorer for Department of Agriculture Reports Seen from Infested Territory Planted near Eagle Pass, Texas.

Washington, D. C.—That the pink bullworm is becoming widely distributed in Mexico, and through shipments of infested seed is likely to appear nearer the Texas border this year, is the report brought back from Mexico by a representative of the Federal Bureau of Entomology, who recently explored the territory in northern Mexico now infested by the bollwarm.

Near Eagle Pass, Tex., on the Mexican side, the representative found a field of 60 acres of cotton planted with seed obtained in the Laguna region of Mexico. This region now is widely infested with the insect, and it is considered likely that the pest will become established much nearer the Texas boarder as the result of plantings of infested seed. Such seed has been planted at Morales near the town of Allende, about 50 miles from Eagle Pass and even nearer the United States, at a point opposite Del Rio. Agents of the United States Department of Agriculture are keeping a close watch of the territory along the Mexican side and will endeavor to stamp out any outbreaks which may occur this season.

The wide distribution of the pest in the Laguna region was shown by samples of seed obtained by the entomologists. Of 40 samples collected throughout this region, 30 were infested. In some parts of the Laguna section the new pest has not attracted much attention, the specialist reports, perhaps because its seriousness is not yet appreciated. In other localities, notably the southeastern parts of the Laguna, it has reached such numbers as to interfere seriously with the cultivation of cotton.

The rapid spread of the pink bollworm in Mexico probably is due to the wide demand for seed of the Fgyptian variety in which the pest was carried to this country. The pink bollworm was first introduced in Mexico in 1911 through the importation of 125 sacks of Egyptian seed, which were planted in the vicinity of Monterey. The plantings from this seed yielded well and a demand arose for the seed. Much of it was sent to the planters in the Laguna district.

Mexico Extends Liquor Tax

Mexico City, Mex.—The special tax which recently was placed on liquors and intoxicants in bottles has been extended to include the same class of articles in other containers such as barrels and demijohns.

Landholders Give up Concessions in Mexico

Mexico City, Mex.—The department of fomento has announced that lands aggregating almost 29,216,000 acres have reverted to the government thru failure of the persons holding the concession on the land to comply with their contracts.

The report states colonies have been placed on the islands of Guadalupe, Socorro, Cedros and Coronado.

It is announced that a commission has been named to investigate conditions in northern Lower California and study methods by which the waters of the Colorado river may be utilized in that region, the yield from which, it is stated, is in the hands of American companies who have built canals for irrigation.

Mexico's Liberty Loan will total $150,000,000

Chihuahua City, Mexico,—Mexico is to have its Liberty loan like its northern sister republic. Committees are now at work thruout the state creating sentiment in favor of a loan of $150,000,000 (gold) to the federal government to provide funds for the reconstruction of Mexico following the six years of revolution.

The plan is to make ths Mexico Liberty loan. Federal officials have agreed to give one day's pay during each month having thirty days and two days' pay during months having thirty-one days. Street car companies have consented to increase the fares 1 cent, this extra cent to go to the Liberty loan. Young women have undertaken to spread the Liberty loan propaganda thruout the state and nation, and a special effort will be made to raise the loan before the end of the present year.

Dr. Brown's Bowel Educators

CURES CONSTIPATION, BUILD HEALTH, STRENGTH AND VITALITY

Not a medicine nor a sickening drug but a very nutritious and a perfect constipation food, made from Nature's own products; Wheat, Barley and a very rare Oriental Herb. All these especially selected for this preparation. The finest selected wheat, the perfect malted barley and the pulverized leaf of a rare Oriental Herb.

The most PERFECT FOOD, the laboratory can produce. Special introductory offer $1.00 a package, extra remedial strength. Six packages for $5.00.

THE DR. BROWN LABORATORY,

SOME SEASONABLE RECEIPTS

Drying Fruits

Apples—Use winter apples, not the early sweet varieties. Pare, core and cut into eighths, or core and slice into rings, using fruit or vegetable slicer.

Do not stand long before drying.

To prevent discoloration dip fruit as it is prepared for one minute in a cold salt bath (one ounce salt to one gallon of water)(Remove surplus moisture by placing fruit between towels, or by exposing to the sun and air.

Spread thickly on trays or earthenware plates. Dry in sun, in oven, over the kitchen stove, or before the electric fan, until the apples are tough and somewhat leathery, Stir from time to time.

Pears—Pare core and cut into eighths, or core and slice into rings, using fruit or vegetable slicer. Do not let stand long before drying.

To prevent discoloration dip fruit as it is prepared, for one minute in a cold salt bath (one ounce of salt to one gallon of water). Place in colander and set in container of hot water. Place cover on container and steam for ten minutes. Remove surplur moisture by placing fruit between towels, or by exposing to the sun and air.

Spread thinly on trays or earthenware plates. Dry in sun, in oven, over the kitchen stove, or before an electric fan, until the pears are tough and somewhat leathery. Stir from time to time.

Peaches—Peel, cut in halves and pit. Spread thinly on trays or earthenware plates. Dry in sun, in oven, over the kitchen stove, or before the electric fan, until fruit is tough and somewhat leathery. Stir from time to time.

Cider-less Recipe for Apple Butter

The national emergency food garden commission has decided to waste no cider this year on apple butter, hence the following cider-less recipe:

Allow firm, tart apples to simmer slowly for a long time until they are a smooth, thick sauce. When nearly done add a pound of brown sugar for each gallon and spice to taste.

For those who will make no attempt at conserving cider here is an excellent apple butter recipe:

Boil five gallons of cider down one-half, skimming occasionally. Wash, pare, quarter and core the apples and use in proportion of two parts apples to one part boiled cider. Boil slowly four to six hours, stirring often. When the butter is two-thirds done add a pound of brown sugar to the gallon and spice to taste:

If the apples are a little over-ripe, add lemon or vinegar to give acid taste. Apple butter should be stored in sterilized receptacles of which the tops are sealed or covered with paraffin paper or cloth.

Spanish Rice

To 2 cups of rice cooked in a double boiler, add 1 cup strained tomatoes, salt, pepper, a dash of cayenne pepper, 1 tablespoon butter or oleomargarine. Let cook about 20 minutes, and just before serving add 1 gill of cream. The rice will have largely absorbed the tomato, so there will not be too much liquid. This is an inexpensive, nourishing and savory dish.

Spanish Scrambled Eggs.

(900 Calories)

Two tablespoonfuls butter, one chopped onion, one-half chopped green pepper, one-half chopped pimento, one-quarter cupful rich milk, one teaspoonful salt, one-quarter teaspoonful pepper, six eggs.

Cook all except eggs together until tender; then add eggs, stir while cooking, and serve on toast.

Barley Sugar

Dissolve lump sugar; boil and skim it until it is crisp and clear and no scum arises; test the crispness by dropping some in cold water. Flavor with lemon juice or essence of lemon.

SHORTHAND FOR EDUCATED MEN AND WOMEN

Every intelligent man and women would use shorthand a dozen times a day if they had learned it. Not only in school taking notes of lectures and the hundreds of things of great value and special interest, telephone messages, contracts, making memoranda of all kinds rapidly and in readable form. Any young man or woman can earn his or her way through any school of college by the aid of shorthand.

Any intelligent person CAN actually learn to write and read Snell Shorthand in a week or ten days. After learning the alphabet and principles it is largely a a matter of practice to gain any speed desired. And you can read it just the same as if written in longhand. Send for sample lesson and full information.

Siembra y cultivo del coco

Por el Profesor W. Cradwich

La siembra del coco es una empresa lucrativa y perjudicial, según que el terreno y locación que escojan para plantarlo sea ó no conveniente.

Un desagüe perfecto es de absoluta necesidad, y á menos que el terreno tenga un desagüe natural ó pueda desaguarse artificialmente es completamente inútil intentar plantar cocos en él. No quiere decirse con esto, que el terreno debe ser seco, pues un surtido abundante de agua en el suelo es de tanta necesidad como el desagüe perfecto, y sólo el terreno rico en humus y gran fuerza retentiva producirá buenos cocos en abundancia, si la caída de lluvia es grande ó puede abastecerse de agua á los árboles por medio de irrigación. El agua salina del subsuelo no es una objeción, cuando puede producirse el coco, con tal que esa agua esté sujeta á la acción de las mareas, lo que aseguaría un surtido abundante de oxígeno á las raíces de los árboles.

Ninguna elevación considerable sobre el nivel del mar es de necesidad para el cocotero. Cuatro ó cinco pies sobre la marca de la marea bajasería suficiente.

Los terrenos bajos pantanosos, ricos en materia vegetal, como ellos casi siempre lo son, parecen muy á propósito para el cocotero, si se preparon prra que el agua del mar pueda entrar y salir libremente. Cualquier estancamiento de agua dulce en su camino al mar en tales terrenos, inevitablemente causará la muerte del cocotero. No quiero decir que esos pantanos son los mejores terrenos. Estos se encuentran un poco más arriba del nivel pantanoso en la forma de grandes bancos de depósito aluvial, combinados con un depósito de arena y algas marinas, arrojado por la acción del mar. Tales terrenos son ídeales para la producción del coco, pues los árboles crecen en ellos con rapidez y llenos de vigor, dan fruto antes, producen cosechas grandes y de fruto mejor y viven más tiempo que en cualquíer otro suelo.

A estos terrenos siguen en bondad los areillo-arenosos próximos al mar. Los terrenos yesosos ó margosos deben evitarse, pues los cocoteros plantados en ellos generalmente son de producción pobre y viven poco tiempo.

La roca triturada con tierra negra forma un terreno bastante satisfactorio, si está cerca del mar. En una palabra, siempre que pueda ser, los árboles deben recibir la brisa del mar aunque estén situados á larga distancia de la playa. Con tal que el terreno sea propio para el cocotero y abierto á las brisas del mar, los árboles se desarrollarán con salud.

La distancia del mar no es factor importante con tal que aquélla sea razonable. El cocotero aunque esté plantado cerca del mar, pero que no reciba sus brisas, podrá por algún tiempo producir, pero después disminuirá su producción, estando además sujeto á las enfermedades.

Otra cosa que debe tenerse en cuenta es la variedad que se ha de plantar.

Los cocos se compran en los mercados de Europa y América según el tamaño. Cada coco que no pase por una medida de 3¼ pulgadas se cuenta como uno. Es decir, que cualquier coco que pase por la medida vale sólo la mitad del que no pase por elia. Al mismo tiempo debe tenerse cuidado en evitar la selección de coces de árboles, que producen sólo una prequeña cantidad de cocos muy grandes, porque esto es ctusa de pérdidas considerables, pues no se paga más por cocos demasiados grandes. Hay varies tipas de cocos bien marcados, que se distinguen por su forma, por la del racimo y por el color del coco.

TREASURY DEPARTMENT

Office of the Secretary, Washington

To Clubs, Societies, Organizations, Etc. of the United States of America

The response to the first call for two billions of Liberty Loan Bonds has been an emphatic and convincing demostration of the unity of purpose among all of the people of the United States, in this war for the defense of America rights and the establisnment of a permanent peace.

Americans of foreign birth or extraction, individually as well as through their organizations, participated in a manner which was the source of much gratification to me.

The Government will soon be called upon to seek additional credit. In this we must not fail. Like one gigantic unit with an enthusiasm, a willingness, a determination unprecedented, the American People must heed this call. They must do it regardless of creed, regardless of party, regardless of sex, regardless of age, and regardless of birth or descent.

It is only through well organized, thoroughly systematized, and thereby nationally concentrated efforts, that this can be achieved.

William G. McAdoo,
Secretary of the Treasury.

Office of Director of Publicity.

Referring to the above statement of Secretary McAdoo and taking it for granted that as loyal, patriotic, and thrifty Americans, you are desirous and anxious to have an opportunity to prove it, I respectfully request the following, that:

Every club, society or organization, fraternal, educational, social or otherwise at its next meeting, and if too far off, at a specially to be called meeting, Appoint a Liberty Loan Committee, and Notify the Bureau of Publicity, Treasury Depar ment, Washington, D. C. giving the names and addresses of such Commitee, together with the name and address of the Society.

Respectfully yours,
Oscar A. Price,
Director of Publicity.

THE MINIT DISHWASHER

We have tried, tested and proven that the "Minit" Dishwashing machine will wash all your dishes, glassware and silverware, quickly and economically; no breakage, no greasy dish rags, no wet hands. Just 8 quarts of hot water, two teaspoonsfull of any soap powder, 5 minutes' time and your dishes are washed, wrinsed, sterilized and dried. You wipe only glassware and silver. The machine is self-cleansing and sanitary; a ten-year old child can do all the work. When once tried you will never be without your "Minit" Dishwashing machine.

Write today for special introductory prices on machine built for the home and ranch, giving your dealers name and address.

THE KITCHEN SUPPLY COMPANY
348 Gas & Electric Bldg.
Denver, Colo.

A cut of this Washer should be here, but it isn't.

Hemos probado, puesto a prueba y absolutamente probado que, esta máquina El Lavador de Platos "Minit" lavará sus trastes, cristalería, y vajilla de plata pronta y económicamente; nada que se quiebre, nada de trapos grasosos ni manos mojadas. Solo echo cuartos de agua caliente, dos cucharaditas de polvo de jabón, cinco minutos de tiempo y sus trastes están lavado, enjuagados, esterelizados y secos.

Solo se secos con trapo la cristalería y vajilla de plata. La máquina se lipia por si sola y es sanitaria.

Un niño de diez años puede hacer todo el trabajo. Si se usa una vez, nunca dejará de usar El Lavador de platos "Minit".

Escriba hoy pidiendo los precios especiales de las máquinas hechas para el hogar o para el rancho, dando el nombre de su comerciante.

LA POSADA---THE HOTEL.

1.—La posada Imperial *está en la esquina de las calles sexta y Broadway
2.—*Tiene ocho pisos y tres entradas, y la principal *da á la calle sexta.
3.—En el primer piso *hay la oficina, la cantina y los comedores.
4.—El despacho *está á la derecha de la entrada principal.
5.—La cantina *está á la izqueirda de los comedores.
6.—El hotel *es uno de los mejores de la ciudad.
7.—*Vamos á la oficina y *pedimos un cuarto por una semana.
8.—El dependiente *dice que *tiene buenos cuartos con baño á tres pesos por día.
9.—*Escribo mi nombre en el registro y *llevan mi equipaje á mi cuarto.
10.—*Subo al segundo piso en el asensor; el mozo *abre la puerta con la llave y *entro.
11.—Los muebles del cuarto *consisten de una cama, varias sillas, un lavamanos, un tocador y *hay una alfombra sobre el suelo.
12.—*Toco la campanilla eléctrica y *digo al mozo de *traerme agua caliente para *lavarme.

The following is a literal translation of the above. The student will realize why the foreigner twists the English language, to suit the spirit of his own. Avoid literal translations as much as possible. With the above hundreds of questions may be asked, and below are some of them in Spanish that may be answered by the above sentences. The verbs are marked with a *. In answering invariably use the same verb that is in the question.

TRANSLATION OF THE ABOVE.

1. The Imperial hotel is on the corner of the streets Sixth and Broadway.
2. It has eight stories and three entrances, and the principal gives to the street sixth.
3. On the first story there are the office, the saloon, and the dining rooms.
4. The office is to the right of the principal entrance.
5. The saloon is to the left of the dining rooms.
6. The hotel is one of the best of the city.
7. We go to the office and we ask for a room for a week.
8. The clerk says that he has good rooms, with bath, at three dollars per day.
9. I write my name in the register and they carry my baggage to my room.
10. I go up to the second floor in the elevator; the boy opens the door with the key, and I enter.
11. The furniture of the room consists of a bed, various chairs, a wash stand, a bureau and a carpet on the floor.
12. I ring the bell electric and I tell the boy of to bring me water hot for to wash myself.

¿Donde está .....? Where is .....? Supply the noun. Your answer begins with está .... it is ..... followed by a preposition and then the place where it is. Cuantos ..... tiene? How many ..... has it? Supply the noun. Example: Donde está la posada Imperial? Answer: Está á la esquina de las calles sexta y Broadway. Cuantos pisos tiene? Tiene ocho pisos. By learning the verbs and the prepositions and adverbs, any number of questions can be asked and answered.

Metaphysical and Transcendental Department
1608 Broadway, Denver, Colorado
Phone Main 7728
Frank D. Hines, Ph. D. Sc. D. C. Editor.

Excerpts from Lesson No. 22
by Frank D. Hines, Magus
The Inner Circle. Secret Messages Eliminated.

Spirit which is The Absolute not alone rules ALL, hut rules in ALL and over all, and is "all in all" and brings you the realization of the right control over all that is Relative.

Spirit is real and is closer to us than our bodies; closer to us than our minds; closer to us than are our thoughts, for Spirit is all of these and the very Soul of our Souls.

All that is Relative is merged into the Irrelative. Saturating the mind with these realizations renders the mind fearless, free and all powerful. (If you can get the mind saturated with this realization you will then find that you are fearless and free).

Everything in the Universe exists thru the junction of Spirit and Matter, Substance and Force. Everything from thought down is Matter. You begin with Matter when you begin to deal with thought, and there is where, when we become Altruistic, we fall back on The Absolute Spirit, and permit our thought to become spiritualized, or Infinite Thought, and hence, we spiritualize Matter. Thought is but rarified Matter and your form is thought; whatsoever nature, or character, your thought may be, so is the form. The form will be just what you think it to be; therefore we should be Wisdom in thought, and be very careful what we think, how we think and to what end or purpose we think, for as we think so is the form or personality.

How to proceed to break the bonds of Matter? That is the question. Let us say, day after day, repeat over and over, (not parot like), but with spirit in the thought," I the Soul am not bound by my body". Who dares to assert the "I" as Christ did, will become Power." The Soul is not Mind; The Soul, as the Image and Likeness of God, is free to to exteriorize as The Mind, Indwelt of Divine Spirit, thus becoming Righteousness, in THOUGHT Form, the body. If the Soul is permitted thus to exteriorize itself it can make the Body Perfect, even as was the Body of Jesus of Nazereth. The Soul expresses itself thru Mind, but can never be limited by This Mind.

Soul being Immaterial is not bound by Matter. "Beyond thought, the very essence of Intelligence, it is not bound by thought; soul is beyond thought, for it of itself, is the essence of Intelligence which is not bound by thought." Any sense of any such bondage is but a mere dream, an illusion; it is mythical. It arises from identification of the Soul with the mind and the mind's form or body. "Arise thou effulgent One; I am one with all blessedness, all purity, all that is Divine or Infinite Good", All that is Potent; the whole of these surrounding or intimate changes cannot effect the Changeless Spirit in me; "I am Soul with a body, obedient to The One Spirit of The All, in my Soul, as myself in completest realization, here and now, a Spiritual Being, in Divine Being".

The Sight shall come and it will pierce all these apparent folds of darkness. Ignorance shall, then, vanish and "I shall have

Digitized by Google

become, "I am the I am that I am", Soul, Image and Likeness of God". Grasp this thought, realize that the Relative Universe is but a wave of thought force, backed by Spirit and Soul, In GOD, and you will realize that you have the power in, back and thru you operative; this differs from "The I AM God" theory so sickening to all true Mystics, everywhere. This idea will keep you from error and from making sad mistakes, and will make you a power instead of a mere motor, and you thus are the power it self, working in, and thru, and of you and round and about you, actually moving in and thru you and moving and altering all about you. Spirit is the Wisdom that speaketh; as the mouth that even your enemies cannot gainsay; He is the waarior Who fights all baittes, and He never strikes a blow amiss. Depend, then, upon the Soul that Spirit may inspire right effort.

I am, Individual Soul thru whom Absolute Spirit operates. Will, it is true, must be considered in all Occult work and we should remember Will is not willing and being stubborn, it is not antagonizing others, but it is that drawing, effective, motive power, that Kinnetic, Dynamic Soulual Force and Intelligenced Volitionery power that works silently, effectively and subtely until everything is drawn into manifestation as Willed. One never admires who drives him; never does a powerful man drive any one, he wins, and rules thru a primal, subtle Omnipotence, of Wlll-energy as an active principle or intelligenced power, silently operative as a Soulual Gift; he seeks true cooperation with others; he creates friends; wills them into his ideal of manifest, expressive obedience to his desires and wishes; sees others and all matter as he would have it and, consequently, he may attract or repulse as best suits his ambition or desire; the law is within himself an active Principle, they come or go as he Wills, he may manipulate circumstances; for he wills all into accord with his own ideals; he harmonizes with all he contacts. This is the true province of cultured Will-energy. It is "The Gift of The Holy Ghost" in reality.

Never think or dwell on your imperfections, your defects or of such matters as impossibilities; never believe in Negative assertions, or in things possibly adverse to you. There is nothing that is Impossible to whom The Absolute Spirit is a recognized Soul Fact. Hence never think of your ills, defects and impossibilities as of power or consequence; dismiss all such error possibilities instantly. You should study the how to Will and how to draw, thru Will-energy, all that is your real good. Many persons think they are nervous, tired, worn out, overworked; believe they are excitable, hysterical, believe they are always rushed to death with imaginery work, sometimes real work; they have held this belief until it has actualized itself in their innate Consciousness; they have willed it into the desire phase of mind until it is there and they wear themselves out, act out, the part, like a horse fretting on the bit. This has really become the after results of a fatal Auto-suggestion, which has hypnotized the poor creature of false thinking methods, into a delusion, almost impossible of eradicating method. To rid oneself of this, take up this saying and at least, twice daily, Affirm and Will it, "today, this instant I am quite calm;" This very minute, I am perfectly composed"; I, this instant, am Master over all and each of my emotions"; "I have

Digitized by Google

hours to spare for my own recreation today, and I realize I am not hurried nor flurried"; I can work in ease and accomplish with ease all I have to do. I am Master of my Nerves and I have now Calm, quiet Nerves, and I am freedom from all Nervousness, now, this instant. I can control my mental moods, and also control my nerves, I am free from all error thought, worry thought or anxiety thought; now and always, I am Free. Do not hold to your enemies, let go of your undoers, never hang on to error moods, dismiss all that attacks you by saying, this does not belong to me, I positively know it is not of me or mine, I will that it shall depart this very instant. Stick to it till all has left you in your own self freedom. You can WILL, and you can DO and you can OVERCOME any Ill that besets you, by this method. You must become a human sun, radiating beautiful sun rays about you, and nothing can penetrate such an Aura, for it soon becomes God-Od, (Divine Love Light). Try this lesson thru and do not despair, if at first, you seem to fail to overcome, keep at it till you are Master of all your mental moods, impulse waves, Nerve Storm and etc. You cannot learn any Art without constant effort.

"Be still and know I am God."

He who has really attained the knowing of the Presence of The Absolute Can never be sad. The key to all excellence as to all ignominy lies in our own selfhoods; this Key is, - To Think Is To Create". The one who would resurrect all things, the personality included, should never be distrurbed, annoyed, or discommoded. A pleasant attitude of mentality, alone, guarantees victory of the self, and adverse circumstances or conditions. The man of strength of Will and a pleasant attitude of mind is always young, be his years as they may. According to the mind of each so is the god of each. Fear is a fundemental instinct and all weakness and other ills develop from fear. Seeing of spirits, ghosts, etc., is of the phenomenon of Nature; To look within and become awareness of ALL from the Soul View, (The blending method), is to attain the Gift of an Adept.

All that ever was, is or may be, as contained with the relative Universe, can be seen from within man, not from without. The body and all Forms come and go, but Soul remains, "deathless, changeless, Immortal". Its background is the Infinite and It alone fearlessly faces all circumstances.

Shakespeare says-

"How poor are they that have not patience."

What wound did ever heal but by degrees?"

Bulwer Lytton, in his "The Coming Race" foretold what has at last arrived; What is already becoming the reality, and is actualized fact, The Absolute Spirit operative. White Art, or "Magic" has made every great Nation of earth to raise and Thrive. Black Art, or "Magic" has caused the fall of every great Empire or Nation of History. "White Magic" today, will save the world from distressing decay and annihilation of present Civilization, and nothing but such "Magic", will avail us in our present terrible crisis.

"As ye sow shall ye reap", is the only great Law of all laws. Nations and a civilization can never rise higher in the scale of excellence than is the real character of its individual citizenship. The Religion of Jesus Christ was a Ritualistic Occultism, a Sublime System of Mystic

Digitized by Google

Initiation, a pure Mysticism, and its restoration is the last, final hope of modern civilization, when Creed must give away to Universal recognition of Pure Mysticism, pure "White Magic", and the Reign of The White Magi as Occults, controlling the very elements, per the silent forces of Nature.

When Jesus was born, the "Three Wise Men" (MAGI), came forth and recognized, HIM; the same MACI, as "WISE MEN", also, were the means of saving the CHRIST CHILD from Pharao and his assassins.

"Let there be Light and let it be GOOD".

The Great White Brotherhood is in evidence and a new civilization is the promise.

"Est Sit, Esto Fiat"

White Magic, means The Light Overcoming The Darkness, the ruling of the Four Elements of Nature, and the control of The Material Universe, through Mind and as Mind, by and of The Absolute Spirit. All is Mind as an Emanation of God, the Undefinable, Unknowable, One, Only Spirit. To work in Mind is God's Divine Fiat. The Absolute Spirit rules the material universe and all that is on or in it, in and thru man as Mind, and who recognizes this Revealment is a Master Occult and of White Magic, an Adept. We can, as Magician, change all to Good or its reverse, simply by Willing It to be, and permitting The Absolute Spirit unhindered action, in and thru Mind, as Mind is All that is in the material Universe, or rather, all that is outside of God, Himself as the Absolute Spirit. "Dare to WILL, and to DO and to be SILENT."

Too many laws and too many ready to fly to the lawing of men into line will prove a boomerang ere another year to the overdosing process now the general trend of things. It seems strange that human nature can never be led to realize the gravest dangers, until too late to rectify them. The world is not only in war but its facing worse than war. The world is sick, that is its civilization is sick, and unless those who are making it sick stop quickly, no man may prophecy what the finality shall be. It looks as if the day of extreme riches is about to close forever, and the sun of immense fortunes is about to sink never to rise again. We say this in all seriousness and with fullest apprehensiveness. We would that man might become man in all that man infers and put a quietus on this lawing fortunes into men's hands. Its a dangerous indication when the heart of Millions of the world's population is ready to lose hope, and drop all present ideals and rend asunder all that has been built up, by countless generations of men.

Private Sittings in our Offices, each day except Sunday from 10 O'clock, a. m. to 6 O'clock p. m. Prices to all alike and no exceptions, One Dollar.

All desiring to join our next Initiates' Class will please send in their name and address as soon as Possible. Class will meet Tuesday ot Office Parlors, at 8 p. m. and Ten Dollars will be the cost of the course of Twenty Four Lessons.
