AMERICAN MEDICAL ASSOCIATION FINED $2,500.00

Washington District Of Columbia Court Found It Guilty Of Violation Of Anti-Trust Laws

The Grand Gazabo American Medical Association, which has continued its malicious control of all healing systems since its present incorporation four decades ago, got a slap on its jaw from an independent-thinking Court in Washington, D. C. Through the strenuous and able presentation of the case, under the direction of United States Assistant Attorney General Thurman Arnold, the A. M. A. was found GUILTY and sentenced to a Fine of $2,500.00. The District Of Columbia Medical Society also was fined $1,500.00. It is a matter of record that very few prominent newspapers in this country even mentioned the fact—proving again the control of the Channels Of Publicity by the Medical Octopus, through the glitter of medical advertising.

FIRST MILWAUKEE WISCONSIN PLANET

(HOTEL WISCONSIN, MILWAUKEE, WISCONSIN)

Meeting Of Thursday, May 1, 1941

Successful Use Of Spectro-Chrome In:—Kidney Disorder, Appendicitis, Face Sores, Prostate Gland Disorder, Stricture, Shingles, Lung Disorder, Sore Throat, Asthma.

Reported By:—EMMA SCHROEDER, *Recorder*

Deputy Frank S. Burns was in the chair.

The Deputy requested those Affiliates who did not submit their Affidavits to the Central Office to date to do so at once. Expressions, either favorable or otherwise, are welcome. Several Affiliates who were unable to attend the Special Planet Meetings were not in possession of Affidavit blanks.

Additional subscriptions to the weekly newspaper, **"Dinshah Impartial"** were sought.

Several questions which emanated from the Anniversary Celebration were brought up and discussed.

The idea seems to prevail, suddenly, with a few Affiliates, that Tonations are not to be taken during the Critical Period. This idea is erroneous.

Several persons inquired whether it is possible to become affiliated with Scientific Order Of Spectro-Chrome Metrists by purchasing a set of Spectro-Chrome Metry Encyclopaedia, after having previously purchased an Equipment and registered it in the name of another member of the immediate family. The Deputy informed them that it is possible.

The ruling on purchasing a used Equipment was given, quoting Colonel Dinshah: "It is like purchasing a mud-hole." There was no Free Guidance.

An explanation of the difference between the Sympathometer and the Itisometer was requested. Sub-Deputy Kurt W. Bader declined to do so in favor of Otto Lutz. In this connection, a woman who was in the Auditorium stated that she would like to know Colonel Dinshah's proposition in this matter, at this time, stating that she knew of three persons who were interested in the purchase of an Itisometer.

Another woman there complained that she became very weak upon abstaining from meat. She apparently did not read her Spectro-Chrome Home Guide, the Deputy stated and did not eat the legumes, with the Chaval, Dal and Limbupani daily as instructed.

Norma F. addressed the audience, stating that Colonel Dinshah requested her to make the following announcements:—

Due to price inflation throughout the country, Equipments for the present, might not have time switches, as the latter can not be manufactured for the same price.

Henceforth, Affiliation Cards will be sent to new Affiliates for signature immediately upon receipt of the Order, then to be returned to the Central Office for the Secretary's signature. This is being done to avoid any unpleasantness and embarrassment on Meeting nights due to failure to sign the Card.

Norma F. further requested that letters be written by Affiliates to the gentleman whose letter appears in the March issue of Spectro-Chrome Magazine, page 3085, informing him of the merits of Spectro-Chrome. Copies of these letters should be forwarded to the Central Office.

It was also suggested that writings be submitted to be printed in the new weekly publication.

The Sub-Deputy stated that unsigned Cards are lifted to protect both the Originator as well as the Organization, as the Medical Doctors are endeavoring to muzzle both.

Expressions on the reaction to the Twenty-first Anniversary Celebration followed:

Emil E. stated that he attended both Special Planet Meetings and three Public Meetings. Being an admirer of Colonel Dinshah's he can not say anything but good. He brought with him two people who never attended before. They found the lectures interesting but "deep". The average person does not understand Light and Color and must see things in order to believe. Most convincing, in Emil E.'s opinion, was the resolving of White Light into the three Primary Colors on the screen: Red, Green and Violet. It is more than "just talk", as many people think, Emil said.

Otto L. was interested in the Food Lecture, which, he says, 85% of the people try to avoid. Free and unrestrained discussion on Food followed.

The Recorder stated that she expected to be tired after attending two Special Meetings and six Public Lectures, but the reverse proved itself true. She credits her endurance to the Rational Food Of Man.

The Deputy gave an interesting account of the habits of living he formed and his reasons for doing so. He used to smoke and drink moderately, but was convinced of that fallacy in 1934. Always had a sick Stomach while smoking. He did not experience any weakness when he abstained from meat. The Deputy follows a plan of daily exercise and correct Food.

Otto L. thought this weakness, produced upon abstaining from

Meat, was caused by the Toxins and dross being loosened and that a condition similar to Spring Fever arose. He thought there was a reaction.

The Recorder reminded that people who partake of Flesh Food are eating Vegetables second-hand, for they are eating only the vegetarian animals, except possibly during an emergency such as war, when carnivorous animals may be consumed due to scarcity. She could not find one instance in the Bible where the Master Jesus Himself partook of Flesh Food.

The Deputy experimented and found that raw Vegetables retain the Life Principle longer than cooked Vegetables.

Otto L. suggested that Steak and Vegetables be placed in the Sunlight side by side and it will be found that the Meat will commence to rot. "The Vegetable will win."

Emil E. is eating Chaval and Dal daily. He finds himself getting "fatter but not fairer." (Smiles)

Otto L. told of a Health Inspector who inspects Meat markets. When, in the opinion of the Inspector, Meat is found to be unfit for consumption, kerosene is poured on it. In one instance, many pounds of Chicken were declared "unfit". However, those persons who were fortunate or unfortunate enough to purchase their Chicken shortly **before** the Health Authorities arrived got what—???

The Deputy pointed out that eating Meat produces Uric Acid.

The Sub-Deputy explained that the greater part of Mankind is vegetarian. Of the 350,000,000 inhabitants of India, 280,000,000 are strictly vegetarian. Only the Mohammedans believe in eating Flesh Food. Orthodox Hindus have been Vegetarians for centuries. The stronger animals of the World are vegetarian and have greater endurance. Look into the eyes of a cow. You will not see the cunning there which exists in the Eyes of a Meat-eating animal—Man included—which does one thing before your Face and another behind your Back. Vegetarian Food builds character of the right kind.

Otto L. added that Meat "decays its way" out of the Body.

The Sub-Deputy continued by relating the experience of a Danish Professor who wrote a book on the Slaughter of Animals, in which it is stated that a four-year experiment was conducted whereby people lived only on potatoes and linseed oil and were still healthy and strong and had more Muscle after than before. "Eat simple Food", he advised.

Otto L. stated that canned orange juice is squeezed out of rotten oranges.

One Affiliate reported that she is on a "cleansing diet" consisting of a dozen oranges a day and she feels better. (How about Atcowas Green and Lemon?)

Emily M. pointed out that when she was in Germany, during the last War, there were times when the people were glad to eat anything they could get and lived on lentils, peas, beans and potatoes. Children were fed rice water instead of milk. Even today she must force herself to eat fresh Fruits.

The Sub-Deputy said, "Eat everything which is in season. Starches and fats are not necessary in Summer as in Winter."

Affiliates were called on by the Deputy to relate their experiences with Spectro-Chrome.

William T. of Manitowoc, Wisconsin, possessed an Equipment for three or four years. He attended the Celebration and this is his third visit to the Planet Meeting. He found Spectro-Chrome very helpful.

Lydia S., Waukesha, Wisconsin, said although she can not always attend Meetings, she enjoys them very much. Her son had a stiff Limb—broken Neck. Several Cords were out of place and through using Spectro-Chrome, "came back". He is able to turn the Neck, despite the fact that it was never set. The Medical Doctors hesitate to set it—it is too dangerous.

Walter W., Juneau, Wisconsin said, five years ago he was the only one in his locality who owned an Equipment. Wonderful results. Now he knows of four persons who possess them and would not be without them. However, some are not willing to eat the Rational Food Of Man or to discontinue the use of Medicine. One visits the Chiropractor and uses Medicine in connection with Spectro-Chrome. Though this person does not say anything against Spectro-Chrome, he does not say much in favor of it. This man has the habit of calling Walter W. "Doctor" because he talks Spectro-Chrome so much. About five years ago, Walter W.'s wife was under the Medical Doctor's care. Kidneys were out of order; could not eat. Pills were given; condition became worse. They spoke of taking her to the Hospital for an Operation. After discussing the matter, they came to Milwaukee to see Otto L. and received good information. They went home and followed his advice. "No more Pills." The Medical Doctor called once or twice every day. The following day, she was able to keep things on her Stomach. Kidneys cleared; the child was born normally. The Medical Doctor could not understand how this was possible without a Caesarian Operation. "It certainly has done a lot for me."

Ida L., Richfield, Wisconsin, has not had very good success with Spectro-Chrome; used it and still has been sick every day. She admits it is somewhat her fault, for she does not eat properly. "Not much meat." She was weak, so she returned to the Medical Doctor, who found poor Circulation. Otto L. advised her to communicate with the person who sold her the Equipment. The Deputy requested Ida

L. to fill out a General Advice Chart and send it to Spectro-Chrome Institute. He also advised her to fill out a Chart and bring it to the next Meeting for discussion. She promised to do so.

Otto L. submitted the following Case Reports:

1. C. M., Male, age 35. Appendicitis. Turquoise set him right in three days.

2. F. W., Male, age 44, Sores on Mouth, Chin and Cheeks; used Ointments and Salves for three weeks; Eruptions increased. He was very much alarmed about his condition. He was normalated in six days. All cleared out. Atcowas used were Indigo and Turquoise.

3. L. B., Male, age 60, Prostate Gland Disorder and Stricture; tried three other methods first without results. He was advised to try Spectro-Chrome and was normalated in one month. This man suffered intense Pain and thought he could not stand it another day. Spectro-Chrome came to the rescue. Blue Local, Turquoise Systemic, Yellow on Areas 8, 9 and 10 and Magenta on Areas 4 and 18 were used.

4. O. B., Male, age 24, had Shingles of two weeks' standing; Spectro-Chrome set him right in eight days. Atcowas used were Indigo and Turquoise.

5. L. B., Female, age 25, Lung Disorder of long standing; tried other methods—no results. After two months of Spectro-Chrome, she could sleep all night without coughing, which she was unable to do for a long time. Her appetite returned and she gained in Health and Strength. She followed the Rational Food Of Man. Atcowas given were Lemon Systemic, Orange on Area 17, Magenta on Areas 4 and 18.

6. M. S., Female, age 38, a very Sore Throat. Tried many home remedies without results. Three Spectro-Chrome Tonations of Turquoise normalated the case.

7. H. S., Male, age 75, Asthma condition of long standing. He was not able to leave the house this winter. If he did, he would commence coughing and would be unable to stop. After one month of Spectro-Chrome, he walks to town, about six blocks and does all the family shopping without discomfort or Coughing Spells. He is well pleased with Spectro-Chrome. Atcowas used were Lemon and Yellow Systemic and Magenta on Areas 4 and 18.

A. B., Male, 96 years. Fell, stumbling over bedroom rug and fractured three Ribs. He was taped by another method but the intense Pain would not cease. He then tried Spectro-Chrome Turquoise. After two Tonations all Pain left.

Discussion on the Case Reports followed and all derived some good therefrom.

Emil E. reported that upon leaving the meeting room last month, he was approached by a very distinguished gentleman, about

fifty years of age, who said to him, "Did you just come out of that room? That is some racket, isn't it?" Emil replied, "Sir, just because one half of the World does not know what the other half is doing, that does not mean that the other half should be condemned." The man admitted being a Medical Doctor.

Adeline C. also saw the gentleman. She heard him say that Colonel Dinshah is selling Equipments and then selling a Course for $25.00 on how to use them!

The Deputy concluded the Meeting by referring to the Anniversary Celebration and the progress of Spectro-Chrome as was shown by the pictures; the heartaches, suffering, privations and unbearable insolence endured by the Originator. It is remarkable how this one man fought the opposition singlehanded. He urged Affiliates to do what ever is possible to assist Colonel Dinshah in the promotion and support of this noble Science which is destined to be the salvation of Suffering Mankind.

An Affiliate was interested in the progress of the incomplete case which was reported last month. The Sub-Deputy stated that the Ratio is still 1 to 4 and 1 to 5 and he does not give up hope as long as that exists. The tissue is still continuing to build and Spectro-Chrome is still performing its duty.

EDITORIAL REMARKS

The weekly newspaper "*Dinshah Impartial* will be published as soon as certain circumstances permit. Send your annual subscription of $1.00 to him personally. It is his enterprise. It will be a newspaper that will give the Truth, nothing but the Truth, the whole Truth without a hole in the Truth! It is upto you to make it a success.

On the contrary, during the Critical Periods, MORE vigilant Tonations are needed! Where do Affiliates read such unprinted instructions?

Any person may enroll from Spectro-Chrome Metry Encyclopaedia as a Free Student for the Home Training Course and request Affiliation with the Scientific Order Of Spectro-Chrome Metrists. Refer to Rule 12, Section 3 (c).

The reason some people become "sick" after leaving off meat-eating, is that they try to live solely on "stewed grass or fried hay." They do not comprehend that "vegetable food" is not "vegetarian food" and do not know or are too lazy to cook their meals as instructed by us.

Spectro-Chrome Equipments are still provided with the same Automatic Time Switches, but, if the Orders do not justify the higher material costs, the manufactured article *might* suffer some changes. Your Orders are needed now more than ever to maintain the product's low price. Of course, no matter how the model may change in construction, the Science and the Slides will NEVER change in their Attunement and Efficiency.

Before expressing any Order, the Purchaser *has to sign* ALL papers for Affiliation with our Organization. Nothing is sold without such Affiliation and the entire transaction is therefore with our Affiliates. No service is given to anyone outside our circle. This is *our* protection and found very valuable in preventing frauds and frameups. Honesty, 100% is successfully exemplified in our activities.

Write articles for our newspaper; boost it by ventilating the Truth.

Neither Lord Jesus, nor any Messenger of the Grand Architect, was ever a Meat-eater.

One need not eat Chaval and Dal daily. Prepare the Rice differently and eat some other Legume with it. Refer to Spectro-Chrome Home Guide, page 38, article 4.

As for Health and Strength of vegetarians, the Originator at his age of 67 (having been 50 years a strict vegetarian), is not a bad example. He drove his Plymouth truck 305 miles on

the first day from Malaga, New Jersey to Irwin, Pennsylvania and the second day from there to Plymouth, Indiana, 589 miles, making Milwaukee, Wisconsin (another 104 miles) early morning. On the return tour, he started from Fort Wayne, Indiana and made 398 miles to St. Louis, Missouri, in a single haul. Thence, he drove outward to Richmond, Indiana, 333 miles at one clip, making the next day, Malaga, New Jersey, another cool 615 miles without going to bed. On arrival, he followed his duties as if he had not traveled. Work does not kill; it is worry that kills and he lets the American Medical Association worry for him! Talk of endurance? He drove once from Milwaukee, Wisconsin to Malaga, New Jersey a 2 ton truck laden with his apparati, 888 miles without going to bed! All talk of Meat giving strength is hokum; the strongest group of animals with the greatest endurance, is totally vegetarian and Man in his anatomy and physiology is a genuine vegetarian animal—though now a carnivorous beast.

"Cleansing Diet" is another miscomprehension. A few Yellow on Areas 6-7-8-9-10 will "clear" all without waste of strength and watching meals.

We shall soon be heading to the plight of Germany during the last War!

Ida L. never sent for Free Guidance. What is FREE, is seldom appreciated. If she prefers to use her own judgment, it is her privilege. Let her suffer till she tires—then she will say Spectro-Chrome is "no good"!

Much obliged for all your kind words and feelings. The success of Dinshah is through your co:operation.

The following unsolicited Testimonial was mailed to the Originator by the First Milwaukee Wisconsin Planet. It is acknowledged with cordial thanks.

Milwaukee, Wisconsin,
May 24th, 1941.

Scientific Order of Spectro-Chrome Metrists,
Spectro-Chrome Institute,
Malaga, New Jersey.

The Affiliates of the First Milwaukee Wisconsin Planet of the Scientific Order Of Spectro-Chrome Metrists herewith express to Colonel Dinshah their most sincere appreciation and heartfelt thanks for the Educational Lectures delivered on his recent visit to Milwaukee during the Twenty-first Birthday Celebration of Spectro-Chrome.

It was an honor, indeed, to share this Anniversary with him, as an established fact and to listen to his ever-flowing fountain of knowledge.

The successful progress of Spectro-Chrome from babyhood to manhood, the motion picture tour through the Originator's life, the tour through the workshop, showing step by step, how Spectro-Chrome equipments are manufactured—all was most interesting. It is an example of how the unselfish service of one man can benefit mankind.

The enlightenment of the fundamental doctrines of the Order and the new proposals set forth, can not but lead to a better understanding among us and to betterment of all concerned.

The good will and good wishes of the Affiliates are with Colonel Dinshah at all times and we are proud to belong to an Order whose benefits are so far-reaching and are not judged from the monetary standpoint.

Again, we say "Thank you!" for Colonel Dinshah's unselfish endeavors and may the teachings of Spectro-Chrome Metry gain increased momentum, as time, human intelligence and understanding progress.

Respectfully,

FIRST MILWAUKEE WISCONSIN PLANET

Frank S. Burns, Deputy.
Kurt W. Bader, Sub-Deputy.
Emma Schroeder, Recorder.

Evert Elmer Dahlke,
Emile W. Egide, Committee.

No Diagnosis — No Drugs — No Manipulation — No Surgery
SPECTRO-CHROME — IN EVERY HOME

INVESTIGATION OF THE MERITS OF SPECTRO-CHROME BY THE FEDERAL GOVERNMENT

The Originator Welcomes It

Last year, when Dinshah P. Ghadiali went to Milwaukee, Wisconsin, for our Twentieth Annual Convention, his attention was drawn by one of our Members to the activities of a certain Agent of the Federal Food And Drug Administration, in regard to Spectro-Chrome Metry as a Science and Spectro-Chrome as an Apparatus.

On returning to the Central Office, the Originator promptly took the matter in hand direct and correspondence started. The following will indicate where we stand at present. Dinshah wrote to Chicago, Illinois:—

Tuesday, October 1, 1940,
Chronos:-Yellow 01 White

Federal Security Agency,
Food and Drug Administration,
1222 Post Office Building,
Van Buren and Canal Streets,
CHICAGO, ILLINOIS.

Kind Attention: Mr. Edward Rietz, Inspector.

Gentlemen:

1. My attention was drawn to some inquiries made by you in regard to our activities.

2. As I prefer to give first-hand information to assist public officials in the discharge of their duties, I shall thank you to let me know how you are interested in us or the writer and all the information at our disposal will be very gladly placed before you.

3. We have been twenty years in existence, serving mankind and during that time, there never was any impeachment of our integrity. Therefore, the writer will appreciate a word from you direct so he may have the pleasure of giving you all the information and presenting you with any literature for your records.

4. With the kindest regards and the best wishes, we are

Yours respectfully,
SPECTRO-CHROME INSTITUTE
DPG:S DINSHAH P. GHADIALI, President-Treasurer.

Five weeks later, a reply came from Washington, D. C.:—

FEDERAL SECURITY AGENCY
FOOD AND DRUG ADMINISTRATION
WASHINGTON, D. C.

November 12, 1940

Spectro-Chrome Institute,
Malaga, New Jersey

Gentlemen: Attention of Mr. Dinshah P. Ghadiali

Your letter of October 1 addressed to Mr. Rietz, one of our inspectors in Chicago, has been referred to this Administration for attention. We regret our reply has been delayed.

We have not as yet had the opportunity to review comprehensively the information which has been submitted by our inspector. After such review has been made, however, we shall be pleased to discuss this subject further with you in the event additional information appears necessary.

Very truly yours,
P. B. DUNBAR,
Assistant Commissioner of Food and Drugs

As Dinshah was preparing to leave on his voyage for India, to conduct his Libel Suits pending in the Bombay High Court, he could not afford to leave such an important issue hanging; so he wrote back:—

Wednesday, November 13, 1940,
Chronos:-Turquoise 31 Black

Federal Security Agency,
Food and Drug Administration,
WASHINGTON, D. C.

Reference No. AF 19617. Kind Attention: Mr. P. B. Dunbar,
Assistant Commissioner of Food and Drugs.

Gentlemen:

1. This morning we received your kind communication of the 12th current.

2. We appreciate your courtesy. However, we take the liberty of informing you that the writer is leaving on a business tour around the World and as he is the President-Treasurer and registered agent of the Corporation and the only person who can give relevant information, it will be highly appreciated if you will write to us as early as you can what information you desire about either our activities, principles or apparatus and we shall be glad to place it at your disposal. After the departure of the writer, it may be many months before any responsible officer may be able to give you the correct information.

3. Some literature about Spectro-Chrome is herewith enclosed and a line from you will bring you a set of our SPECTRO-CHROME METRY ENCYCLOPAEDIA and other books published by us in connection with the Science of Spectro-Chrome Metry originated by the writer.

4. We have the honor to remain

Yours In The Service Of Mankind
SPECTRO-CHROME INSTITUTE
DINSHAH P. GHADIALI, President-Treasurer.

DPG:S Enc:Lit.

Reply to this came from the Commissioner:—

FEDERAL SECURITY AGENCY
FOOD AND DRUG ADMINISTRATION
WASHINGTON, D. C.

AF19617 December 20, 1940

Spectro-Chrome Institute,
Malaga, New Jersey

Gentlemen: Attention of Mr. Dinshah P. Ghadiali

It has been impossible to make an earlier acknowledgement of your letter of November 13 in further reference to your device Spectro-Chrome. We note that you are planning to leave on an extended business trip around the world and you suggest that we arrange to obtain any necessary information before you leave.

As we advised you on November 12, we have not yet completed our review of the information so far submitted to us, and in view of the press of other matters at this time we cannot forecast just when we shall have an opportunity to go over this information fully.

While, of course, it would be preferable to obtain any desired information directly from you, since you are President and Treasurer of the corporation, we must, of course, assume that if the business is to be conducted during your absence it will undoubtedly be necessary to designate some responsible individual to act for you in your absence.

While, as we have advised you, we have not completely reviewed all of the submitted information, we consider it advisable, in view of the situation set forth in your letter, to notify you that on the basis of the information so far reviewed the device "Spectro-Chrome" appears to be distributed in interstate commerce in violation of the provisions of the Federal Food, Drug, and Cosmetic Act.

Very truly yours,

W. G. CAMPBELL, Commissioner of Food and Drugs.

The reply went out:—

Monday, December 23rd, 1940,
Chronos:-Blue 52 Black.

Federal Security Agency,
Food and Drug Administration,
WASHINGTON, D. C.

Reference AF 19617 Kind Attention: Honorable W. G. Campbell, Commissioner of Food and Drugs

Gentlemen:

1. I thank you for your kind communication of the 20th current received this morning.

2. I am the Registered Agent, President and Treasurer of this Corporation and in all twenty years of its existence, my authority even in my absence is never delegated to any other officer, because Spectro-Chrome Metry is my original Science, Spectro-Chrome is my own invention and patent and I am the only person responsible for the conduct of the affairs of this Corporation.

3. Your last paragraph surprised me extremely. Therein you state that "on the basis of the information so far reviewed the device 'Spectro-Chrome' appears to be distributed in interstate commerce in violation of the provisions of the Federal Food, Drug, and Cosmetic Act."

4. I have no knowledge of any "violation" of any law, by the distribution of my "Spectro-Chrome". If you will please forward to me a copy of the said Act with the alleged violated section marked, it will be warmly appreciated.

Yours respectfully In The Service Of Mankind,
DPG:S DINSHAH P. GHADIALI, President-Treasurer.

In a week, the Law came:—

FEDERAL SECURITY AGENCY
FOOD AND DRUG ADMINISTRATION
WASHINGTON, D. C.

AF 19617 December 31, 1940

Mr. Dinshah P. Ghadiali
Spectro-Chrome Institute,
Malaga, New Jersey

Dear Sir:

As requested in your letter of December 23, we are enclosing a pamphlet containing the text of the Federal Food, Drug, and Cosmetic Act, together with regulations for its enforcement. May we direct your particular attention to sections 201(h), 201(n), 301, and 502 of the statute.

Very truly yours,
Enclosure FDC 1 P. B. DUNBAR, Assistant Commissioner of Food and Drugs

After going through the indicated Sections, the Originator replied:—

Wednesday, January 8, 1941,
Chronos:-Indigo 32 Black.

Federal Security Agency,
Food and Drug Administration,
WASHINGTON, D. C.

Reference:- AF19617 Kind Attention: Mr. P. B. Dunbar, Assistant Commissioner of Food and Drugs

Gentlemen:

1. I thank you cordially for your kind communication of December 31, 1940 and the copy of the Federal Food, Drug and Cosmetic Act, dated June 19, 1939.

2. I went very carefully through the sections 201(h), 201(n), 301 and 502 of the statute as directed by you. These refer solely to the "Label" and "Misbranding".

3. Enclosed please find the standard label which for years and years has been attached to every Spectro-Chrome Equipment. I fail to notice any violation of any part of the stated statute.

4. It will be warmly appreciated if you will draw my attention to what your Department considers "violation", so I may answer and act intelligently in the matter.

5. With regards and respects, I am

Yours In The Service Of Mankind

Dinshah P. Ghadiali, President-Treasurer.

DPG:S Enc: Label *Registered With Receipt Requested.*

The Commissioner gave the requested information:—

FEDERAL SECURITY AGENCY
FOOD AND DRUG ADMINISTRATION
WASHINGTON, D. C.

AF 19617 January 24, 1941

Mr. Dinshah P. Ghadiali
Spectro-Chrome Institute,
Malaga, New Jersey

Dear Sir:

We have your letter of January 8 with further reference to your device "Spectro-Chrome". You state that you have examined the label for this product and fail to note any violation of the Federal Food, Drug, and Cosmetic Act thereupon.

As a result of correspondence initiated by your letter of October 1, 1940, we have advised you that, in our opinion, your device is being marketed in violation of the terms of the statute. You have been furnished with a copy of the law, and being fully familiar with the mechanics of your device and all statements being made regarding its therapeutic effect, you are obviously in a position to readily determine whether or not a violation of the statute exists.

We would not be entirely frank with you if we did not state, as we are now doing, that we have been unable to find any evidence that the device "Spectro-Chrome" has any value in the treatment of the conditions for which it is being recommended.

W. G. CAMBPELL, Commissioner
of Food and Drugs

Dinshah promptly mailed a long explanation:—

Monday, January 27, 1941,
Chronos:-Blue 35 Black.

Federal Security Agency,
Food and Drug Administration,
WASHINGTON, D. C.

Reference AF 19617. Kind Attention: Honorable W. G. Campbell, Commissioner.

Gentlemen:

1. Please accept my cordial thanks for your courteous communication of the 24th current, received this morning.

2. I did not initiate any correspondence, but when it was brought to my notice during my 20th Annual Convention in Milwaukee, Wisconsin, that one of your Agents in Chicago, Illinois was indirectly inquiring about myself and my Spectro-Chrome, I wrote requesting him to make investigation direct through me instead of through indirect channels.

3. While I respect your opinion, I fail to see any violation of the Food and Drug Act by either my label or the device on which it is affixed. You mention about being "fully familiar with the mechanics of your device". It is not the *device* that performs the work, but the SCIENCE and TECHNIQUE of using it that does the work. Section 502 of your Act asks for "adequate directions for use." If that be in your mind, I may respectfully state that such directions accompany each Spectro-Chrome Equipment through a SPECTRO-CHROME HOME GUIDE. To put all those "directions" which occupy One Hundred and Two pages, on a label on the device itself, would be a physical impossibility.

4. Your exceptional frankness in stating that "We have been unable to find any evidence that the device 'Spectro-Chrome' had any value in the treatment of conditions for which it is being recommended", does great credit to you. However, the evidence about the value and merits of Spectro-Chrome as a Device and a Science, was proven in cases in the Law Courts time after time and each time I came out victorious, over testifying. Medical Doctors and University Professors, who tried to discredit and ridicule my invention.

I reciprocate your frankness by stating just as frankly, that the worst such case against me was instituted in the Original Side of the Supreme Court of the State of New York, at Buffalo, New York, where I was charged with Grand Larceny, for selling "take machines". In that case, I was submitted to a harrowing Jury Trial, but a unanimous verdict of "Not Guilty" was rendered resulting in my acquittal. Two Professors who testified against me, lost their jobs for incompetence! An Exemplified Copy of that case, duly certified by the Secretary Of State, is herewith enclosed.

5. I also enclose my SPECTRO-CHROME magazine of April 1934 in which is a report of what I spoke before the United States Senate Committee On Commerce on February 27, 1934, in regard to some provisions of the then proposed Food And Drug Bill. Please refer to page 1131 and on.

6. I further enclose a copy of my SPECTRO-CHROME magazine of August 1939, on page 2693 of which is printed under the heading "The Reach Of Spectro-Chrome—An Unrivalled Accomplishment Far Surpassing Centuries Of Drugs", the various Disorders in which Spectro-Chrome has been used most successfully during the past nineteen years—it is twenty-one years now.

7. I make no "claims" or "recommendations". My business is founded on established clinical RESULTS, reported without solicitation by the users of the apparatus. The items printed in regard to the efficacy of Spectro-Chrome as reported in the monthly meetings in various centers of the Organization and the like, occupy five big printed volumes and the Science of Spectro-Chrome Metry is fully described in three volumes of SPECTRO-CHROME METRY ENCYCLOPAEDIA, covering twelve hundred pages. They are all in the Library of Congress and extra copies will be gladly mailed on request.

8. Gentlemen, Spectro-Chrome is today in the same category as the telephone, telegraph, phonograph, electric light, talking motion pictures (another of my inventions) and other radical inventions were in their own times. I always believe in placing cards on the table and am ready to submit to you any and all "evidence" in regard to the value, merits and efficacy of Spectro-Chrome, to prove conclusively that no violation of your or any other statute is created by the marketing of my patented apparatus.

9. In order to bring this matter to a satisfactory conclusion, I may suggest that you send your duly accredited representative by appointment to visit me personally in my Research Laboratory here, so I may have the pleasure of giving him first-hand scientific demonstrations of the marvels of this invention, which has stood successfully all tests to which it has been put during the past twenty-one years of its presentation to the suffering World.

10. Incidentally I may state, that the Maryland Academy of Sciences conferred on me the degree of Academician with Life Membership, for the origination of Spectro-Chrome Metry, after hearing a discourse given by special invitation before its members. Please refer to the inside of front cover of my SPECTRO-CHROME July 1922, herewith enclosed.

11. Awaiting your kind, early decision, before I start on my next tour, I have the honor respectfully to remain

Yours In The Service Of Mankind

DINSHAH P. GHADIALI, President-Treasurer.

DPG·S Enc: as specified. *Registered With Receipt Requested.*

Next month, the Honorable Commissioner promised investigation:—

FEDERAL SECURITY AGENCY
FOOD AND DRUG ADMINISTRATION
WASHINGTON, D. C.

AF 19617 February 27, 1941

Mr. Dinshah P. Ghadiali
Spectro-Chrome Institute,
Malaga, New Jersey

Dear Sir:

Receipt is acknowledged of your letter of January 27 with further reference to your device "Spectro-Chrome." We note your proposal that we have a representative of this Administration visit you personally in your research laboratory at Malaga for the purpose of observing scientific demonstrations of your device.

We have given careful consideration to your proposal and we can see no reason why your suggestion cannot be followed. It so happens that those representatives of the Ad-

ministration who are qualified in matters of this character have other engagements dealing with pending court cases and hearings on proposed regulations in connection with the enforcement of the Federal Food, Drug, and Cosmetic Act, which makes it impossible for such a meeting to take place for several weeks. If we do not hear further from you, we shall assume that such a postponement is agreeable to you, and we shall communicate with you at a later date for the purpose of making final arrangements regarding a definite appointment for the meeting.

Very truly yours,
W. G. CAMPBELL,
Commissioner of Food and Drugs

The procrastination not being suited to the business expansion tours of the Inventor, he took a different course to assist the dutiful Government Officers in expediting a proper understanding of Spectro-Chrome Metry:—

Friday, March 7, 1941
Chronos:-Indigo 35 Black

Federal Security Agency,
Food and Drug Administration
WASHINGTON, D. C.

Kind Attention: Honorable W. G. Campbell, Commissioner of Food and Drugs

Sir:

1. Please accept my best thanks for your kind communication of February 27, 1941.

2. Noting from it that your Department will not be ready for the investigation until the lapse of several weeks and not finding it possible to postpone my business tour any longer, I thought it best to fall in with your views and wait for the convenience of your investigation Officers.

3. It seems to me that your attitude is exceedingly sensible and businesslike; yet, I do not think it will be fair to your Department Officers to visit my Research Laboratory and endeavor to investigate something about whose Fundamental Principles they may have very little knowledge.

4. The development of the Science of Spectro-Chrome Metry was started by me in 1891. The Science and its practical commercial application were perfected after thirty years of deep scientific research. In 1920, those fruits of my labors of three decades were first presented to the public. This is the twenty-first anniversary of Spectro-Chrome Metry and at present there are nearly 7,000 (seven thousand) Equipments in use all over this Country, Europe, Java and India, with unequivocal success. I have two offices in India also.

5. Spectro-Chrome Metry is now an established, original Science and there is no guesswork or human equation of error possible in it, as was proven in thousands of cases declared "hopeless and incurable" by the Medical Doctors and Hospitals. Thus, thinking it would be unfair to your Department to expect it to gather a correct perspective of the ramifications of this work, I sent you by Book Post four volumes of my periodical SPECTRO-CHROME having printed case reports, editorials and the like extending from June 1922 to December 1938, three volumes of SPECTRO-CHROME METRY ENCYCLOPAEDIA and a copy of SPECTRO-CHROME HOME GUIDE, one of which is issued with each Spectro-Chrome Equipment for directions about the use of the apparatus in the family.

6. I may incidentally state that these Equipments are now sold exclusively to persons who are affiliated with Scientific Order Of Spectro-Chrome Metrists ard are not available to the general public without such Affiliation. That Organization is a Not-For-Profit Corporation, chartered in the State of New Jersey and is controlled by an extremely rigid Code Of Honor, as you may find by casting a glance at Rule 22 in the Constitution And Rules also mailed to you. The Affiliates are thus joined into a solid Organization of well-meaning persons who believe in the Service Of Mankind and no quackery or unfair procedure is at any time tolerated.

7. Tomorrow, the 8th current, I am leaving on a tour to Detroit, Michigan, from which I shall return in a week. Then, I shall visit my Affiliates in St. Louis, Missouri, Milwaukee, Wisconsin and other places, where I have many thousand students in all walks of life. I shall be happy to welcome your investigators at any of these Meetings.

8. From this tour in the Middle West, I shall be free toward the end of May. In the month of June 1941, I have my usual annual instruction class in my Auditorium here. I believe that if your Departmental investigation be conducted at that time, after your Agents have gone over the volumes sent, it will be an exceptionally good opportunity for them to acquaint themselves with this unique Science.

9. Of course, everything is left to your own good judgment and discretion. As a Scientific Researcher, I placed the fruits of my labors at your disposal and it is entirely upto yourself to determine the issues which you may think are involved in this pending matter.

10. I have the honor to remain, respectfully

Yours In The Service Of Mankind

D:CS DINSHAH P. GHADIALI, President

Registered With Return Receipt Requested.

Dinshah completed his stated tours and returned to the Central Office. He had parcelled many pounds of those volumes to the Administration and was willing to abide by the convenience of the busy Officers, but his Pacific Coast tour was now due and not hearing from the Government, he sent another letter as a reminder:—

Tuesday, May 27, 1941,
Chronos:-Indigo 29 Black.

Federal Security Agency
Food and Drug Administration
WASHINGTON, D. C.

Reference: AF 19617 Kind Attention: Honorable W. G. Campbell, Commissioner of Food and Drugs.

Sir:

1. I have the honor to draw your kind attention to my communication of March 7, 1941 and the several books pertaining to Spectro-Chrome Metry parcel posted to you.

2. I completed my tour of the Middle West as I informed you before and a week ago returned to my Central Office here. I am now becoming ready to go on my Western tour and shall be away about three months.

3. Knowing the pressure on your valuable time and also appreciating that your investigators will need an appreciable amount of time to study the books sent by me, I take the liberty of making a respectful suggestion that you give me an appointment right in your own office in Washington, D. C. and I shall bring my documents, evidence and scientific paraphernalia to demonstrate the Fundamental Principles and the value as well as merit of my unique and original Science.

4. It is now over twenty-one years ago that I presented it to the World and what stood the test of time with all the difficulties to undergo, added to the skepticism of the World, will be apparent right to you when you hear me personally and see the proofs I may present.

5. I do not like to have you feel that I am endeavoring to put any pressure on your time and courtesy. I offered a sheer suggestion to facilitate the formation of a definite opinion as regards the genuineness of my Science which I feel sure will appeal to you from all angles of provable facts.

6. Incidentally, I may remark without appearing commercial-minded, that Spectro-Chrome should prove of incalculable value in saving the lives of our warriors, in case of Burns and the like. The Pain disappears in every such case in less than One Hour! If given the opportunity, I shall feel happy to donate a number of Spectro-Chromes for use in specific centers of the Government.

7. Awaiting your kind reply, I have the honor to remain most respectfully

Yours In The Service Of Mankind

DINSHAH P. GHADIALI

DPG:S President; Originator of Spectro-Chrome Metry.

Registered With Receipt Requested.

The overdue reply soon came from the Acting Commissioner:—

FEDERAL SECURITY AGENCY
FOOD AND DRUG ADMINISTRATION
WASHINGTON, D. C.

AF 19617 June 6, 1941

Colonel Dinshah P. Ghadiali
Spectro-Chrome Institute,
Malaga, New Jersey

Dear Colonel Ghadiali:

We have your letter of May 27 with further reference to your offer to furnish information dealing with Spectro-Chrome.

We have, of course, already received the books which you forwarded to us with your communication of March 7. We had hoped to be able to visit you at Malaga some time ago, but circumstances beyond our control made it impossible to carry through our original plans.

You now suggest that we arrange for an appointment with you at Washington in lieu of our visit to Malaga. We shall be pleased to make an appointment to see you at your convenience.

We suggest 1:30 P. M. on Wednesday, June 11. If this is not convenient, please let us know. The address is Room 4803, South Building, 12 and C Streets, Southwest, Washington, D. C.

Very truly yours,
GEO. P. LARRICK,
Acting Commissioner of Food and Drugs

The letter was undoubtedly written in a spirit of fairness and openmindedness, but, meanwhile the Originator had already packed his automobile with the scientific apparati and the program having been arranged, it was not possible to visit Washington, D. C. He had announced his departure for June 14, 1941 and any delay would set back numerous appointments. He wrote about his inability to make the appointment which would have cleared the pending issues for all time. However, it was unavoidable. His complex duties demanded the sacrifice and reluctantly he wrote:—

Monday, June 9, 1941
Chronos:-Blue 37 Black.

Federal Security Agency
Food and Drug Administration
Room 4803, South Building
12th and C Streets, Southwest
WASHINGTON, D. C.
Reference AF 19617 Kind Attention: Mr. George P. Larrick, Acting Commissioner of Food and Drugs

Dear Commissioner Larrick:

1. Your very kind communication of the 6th current was received this morning. I sincerely wish I had received it a few days earlier.

2. I thank you cordially for the appointment, but the demonstration apparatus is already packed in the truck for transit to the Pacific Coast and I too am leaving with it this week. I, therefore,find it not possible or convenient to be at your service on Wednesday the 11th current.

3. I truly regret the missing of this opportunity so graciously placed by you at my disposal, but on the return leg of my tour from California, passing through Washington, I shall present myself personally to you in the end of August or the early part of September, 1941 and shall gladly fix a day and time suitable to the convenience of yourself and your investigators.

4. Meanwhile, I am enclosing my *Spectro-Chrome* of December 1923-24, in which you will find a report of the journalistic investigation made by the prominent daily and other

newspapers of Oregon when I went to the West first to introduce my Science of Spectro-Chrome Metry and the apparatus Spectro-Chrome. A glance at pages 449 on is requested.

5. I have the honor to be very respectfully

Yours In The Service Of Mankind

D:CS ENC. as stated DINSHAH P. GHADIALI,

Registered With Receipt Requested *President.*

Thus, the matter rests. For 21 years, the Originator has been clamoring for investigation, but his requests fell on closed ears. He feels thankful to the Federal Government for placing this opportunity at his disposal and he assures the Officers that he will reciprocate by giving them free access to all his documents, proofs and evidence, to substantiate the claims of the Science of Spectro-Chrome Metry and the apparatus Spectro-Chrome.

—o—

FIRST ST. LOUIS MISSOURI PLANET

(HOTEL MELBOURNE, ST. LOUIS, MISSOURI)

Meeting Of Thursday, May 1, 1941

Successful Use Of Spectro-Chrome In:—Kidney Disorder, Cough.

Reported By:—VIOLA C. JEUDE, *Recorder*

Deputy Clemens M. P. Neumann was in the chair.

The Meeting was opened with a discussion about the coming visit of Colonel Dinshah, May 16, 17, 18, 1941.

Charles S. wanted to know if the Deputy had received any Circulars. The Deputy replied, not at present, but when the Circulars will arrive to be busy and interest your friends and if your supply becomes exhausted, call him for additional Circulars and distribute them, as he knows the Lectures will be very interesting, with Motion Pictures.

He said he felt sure Colonel Dinshah would begin with the Birth of Spectro-Chrome and while this subject had been heard before by some of the old time Affiliates, it would be new to the new Affiliates. He felt sure if the old time Affiliates paid close attention, they would derive as much benefit as the new Affiliates, as each time Colonel Dinshah lectured, one could always find a new idea and he has a way of presenting the same thing with variations, regardless of how often you hear the same Lecture, there are always new thoughts.

There will be six Lectures. They will be so arranged that each will present a topic in itself, but after all are heard it will be a consecutive affair, so it will be advisable to attend and hear all if possible, bearing in mind that the Lectures are given first to benefit you and secondly your friends as well as the Public. No Smoking will be allowed as usual, no written notes may be taken. He felt sure Colonel Dinshah would answer any question relevant to any of these Lectures.

Rules 52, 53, 54 and 55 of the Constitution And Rules were read and each Rule was explained, step by step. The Deputy asked if there were any questions about them. There were no questions, as the Deputy went over them so thoroughly, he did not leave room for any.

The Deputy then asked for Case Reports. There being none, he said he had a few to present.

1—Joseph P., 50 years old, brought a paralyzed girl for Tonation. He decided to be itisized himself. The Kardoscil was 63, Spiroscil 16. The Chart showed Infra-Green Predominance. Of course, Green was given to start, then Turquoise, Magenta on Areas 4 and 18, later Lemon and Orange Atcowas. In two weeks, he said he "had never felt better."

2—Mary P., 62 years old, had Disorder in Areas 18 and 19; could not stoop, complained of a tightness there; Kardoscil 82, Spiroscil 20. Started with Green Systemic Front and Back, Magenta on Areas 4 and 18, then Orange Systemic Back; was normalated.

3—Henry G. had Cough for 9 years in the Winter. His Chart showed Ultra-Green Predominance. He started with Green, Magenta on Areas 4 and 18, Orange Front and Back, Turquoise on Areas 2 and 3, finally finishing with Lemon Atcowa.

The Deputy asked if there were any questions in regard to the above Cases.

Thelma S. said she had a Cough similar to the one he described. She said she had a Cold about four years ago and that developed into a Cough. She coughed about 1½ years, went to Medical Doctors and Chiropractors and finally, to a "Specialist". At last she was rid of it about 6 months later. About 6 months more, it returned and she had to doctor again for another 6 months before it was entirely gone. Around 3 weeks ago, she had another Cold and it developed into another Cough. She used Lemon and Orange Atcowa, Magenta on Areas 4 and 18, but does not seem to be able to conquer it. What should she do?

The Deputy said Colonel Dinshah had forbidden him to give any information, unless the Affiliates filled out Sufferer Charts, as then information was complete and the Kardoscil and Spiroscil would be mentioned and that was one of the main factors. Thelma S. informed him that her Ratio was 4 to 1, 92-22. The Deputy said the Ratio was good and did she have any other Symptoms? She said she was normal. He questioned her in regard to Frontelim and Backelim. She said they were proper. She spits much Phlegm and sneezes much. He questioned her in regard to the Rational Food Of Man. She said she did the best she could, as she boards and has to take her meals out. The Deputy said a Cold is an Inflammation and he could not tell

her what to use unless she presented the complete Sufferer Chart. She should refer to the Spectro-Chrome Home Guide, study the Green and Turquoise Atcowas. Lemon would loosen the Phlegm and Turquoise should be irradiated for the Dry Sensation.

Turquoise was then studied from Spectro-Chrome Home Guide, page 53 and gone over step by step.

Charles S. then asked the Deputy if he did not think it was a good idea to give each Affiliate one of these Sufferer Charts to take home and in that way they could get the information when they wanted and needed. In the Case just described the Sufferer would have to wait a whole month before she would get the proper relief.

The Deputy thought it would be permissible and he would consult Colonel Dinshah when he came to St. Louis.

Charles S. addressed the Deputy, saying he thought it advisable to inform the newcomers that if the wrong Tonations were taken, it would not be harmful.

The Deputy then explained how the Physical Body shows a Predominance of either the Ultra-Green or Infra-Green Atcowas. He requested them to study the Table Of Spectral Divisions, page 24 and Spectro-Chrome Affinity Waves, page 25 of Spectro-Chrome Home Guide. He also explained that if one did take the wrong Atcowa, it would not hurt the Body, but the results would be impeded and the process of Normalation would take longer.

Spectro-Chrome Axioms, page 60 of the Spectro-Chrome Home Guide were then read by the Sub-Deputy and gone over step by step.

The Deputy spoke about Colonel Dinshah's ability in examining the Aura.

Charles S. said there was the case of the young man in a Sanatarium suffering from Tuberculosis and given over as a hopeless case. He was brought to the Originator and after Colonel Dinshah studied his Aura, the young man was made well in a week's time.

The Deputy said he was tonating a woman at the present time from whom two months ago the Medical Doctors wanted to cut out some Ribs and deflate the Lungs. At the present time she does not cough any Phlegm. He will make more of a report later when the woman has recovered.

He also reported that a man was under the Medical Doctors' care for five years. The man told him the Doctors do not know it all. He told the Deputy when he used Spectro-Chrome, he used it ½ hour on the Front and ½ hour on the Back. The Deputy instructed the Affiliates that they should never do this, but to take the complete hour for one or another.

In explaining about the Vital Ratio, the Deputy spoke of a friend who they said was dying in the Hospital. He went to see him.

While the person did not seem to be very ill, he asked the Nurse how his condition was and what the Heart Beat and Breathing were. The Nurse said he was very low and they expected him to die. The Heart Beat was 72 and the Breathing was 18! The Deputy said if all the people only knew that a 4 to 1 or 5 to 1 Ratio was good and if it could be maintained, they would get well. The man lived 4 years after that!

A question was asked if it were advisable to drink water more between Meals or should most of the drinking be done at Meal time?

The Deputy said that Cold or Ice Water should not be used at Meal time, that if one were compelled to drink Cold Water, to hold it in the Mouth until of Body Temperature and one would find that two or three Mouthfuls would be sufficient. Thirst was in the Mouth and not in the Stomach. He said not to drink water before one sat down to a Meal.

Someone asked about drinking water on arising in the morning, especially Hot Water. The Deputy thought it was good and it would help to flush the Alimentary Tract.

Charles S. asked the Deputy if he did not remember that Colonel Dinshah in one of his Lectures said not to drink Hot Water on an empty Stomach, as this caused the Muscles to relax and the Stomach to expand. The Deputy did not remember. So, please Colonel Dinshah, would you kindly answer the Water question, as it was not answered clearly, as the Deputy said he had occasion to dine with you several times and you did consume much liquid. He did not know how much, if any liquid, was consumed between Meals, as several Affiliates said you were the only Lecturer they ever saw who did not drink anything during your Lecture.

Nathalee B. said her father had trouble with his Bowels. She gave him an Orange Tonation. After his Backelim, he had a soreness. She wanted to know if she had given him one of the Ultra-Green Atcowas, would not this have decreased the Elimination. The Deputy informed her that it would only have allayed the Pains, as there must have been a slight Irritation or Inflammation.

Charles S. teased the Deputy about eating Doughnut and the Deputy said he was off Doughnut as well as Garlic Soup!

Charles S. said that Medical Doctors claim that only 50% of the people have healthy Colons.

The Deputy said he had occasion to see an Autopsy and he was surprised to see the large space in the Human Body. It was large enough to hold three Spectro-Chrome Metry Encyclopaedias!

Lena W. said when she washes the floor or when she awakes she has a scary feeling. She was advised to use Yellow on Areas 8, 9 and 10 for 3 or 4 weeks. She also said she had a bitter taste and was

advised to use Orange and eat Rice and Yellow Split Peas. She said she did not care for the Rational Food Of Man and has a terrible time in eating the Rice and Split Peas. She said she cooked them with Salt and Butter, but she could not get them down. Asked if she used any Spices, she said not. The Deputy informed her that was where the trouble lay, that the Spices acted as an Orange Wave in the System and helped to digest the Food, that unless she adhered strictly to the Rational Food Of Man, she was putting Poisons back into the System. Spectro-Chrome is not a Magic Lamp of the 20th Century by itself, as certain parts of the Body may be depleted and these will be benefited by Spectro-Chrome, provided one co:operates with the Rational Food Of Man.

It was suggested that none should miss the Lecture on Food.

Marie J. asked if she brought her three-year-old boy, would Colonel Dinshah look at him, as the Growth in his Throat is getting larger and she has to press it and drain it, when he throws his Head back it sticks out much. The Deputy said he did not think Colonel Dinshah would look at the boy, but that she should fill a Chart and present it to the Originator when he came. He asked her if the boy were sick or felt bad in any other way. She said he is never sick, that he does not even have a Cold like her other children. The Deputy said that Nature sometimes uses these avenues to eliminate the impurities and not to be alarmed if the Ratio be right.

The Deputy suggested that each of the Affiliates bring at least one friend to hear the Lectures. In that way you can prove to your friend by listening to the Lectures and seeing the Demonstrations that there are merits to Spectro-Chrome.

Charles S. said that there are 3 or 4 cases on his route that would be benefited by Spectro-Chrome. In one case the Medical Doctor advised the woman to move to another place on account of the dust and dirt. He said he informed her that unless she got rid of her rugs and carpets it would do her no good.

He also said that another patron had to stop wearing a dress shield, as the Medical Doctor told her that in the process of making them they used Arsenic.

C. Earl B. said he heard that in a city in Illinois, Green Lights were installed in the basements to improve the Eyesight.

The Deputy said he thought the old style coal oil light was the easiest on the Eyes, as it has a soft and soothing effect. Charles S. said there were more glasses worn today than ever.

Marie J. said her boy had a deep gash over his Eye. She used Green and Turquoise and asked if it would be correct to use Indigo. The Deputy explained that Indigo was a Phagocyte Builder and will destroy the harmful Micro-Organisms and will not cause any Infections.

Discussion going on Glands, the Deputy said when he viewed that Autopsy, the Spleen was shaped like an umbrella and it was Violet in Color; in fact, each Gland was different in Color. He said that is surely God's handiwork and surely must be for a purpose.

Attributes Of Lemon from the Spectro-Chrome Home Guide, pages 51 and 52 were read.

Richard F. J. asked if it were not a good idea to be itisized twice a year.

The Deputy said it would be a good thing to do, but if he suggested anything like that, people would think he was working for his own personal gain.

Charles S. said he wanted to get an Itisometer for home use, but was informed he would not be able to get it until after the War. The Deputy said he wanted one, too, that he could take with him when he made calls.

The Affiliates were requested to study page 26 of Spectro-Chrome Home Guide, on Spectro-Chrome Technique or Method Of Using.

The Deputy asked Karl L. how his wife was. He said she was very well pleased; in four years she could not have a natural Backelim and for 6 months had Colonic Irrigation 3 times a week. She is well satisfied with results from using Spectro-Chrome. His daughter will buy an Equipment as soon as she can get the money together.

EDITORIAL REMARKS

Information given without Sufferer Chart completely itemized, would be nothing short of quackery. Follow the rigidity of Spectro-Chrome Institute. It will educate the untrained new-comers and will maintain the beauty of our Precision. A few might grumble, but, we are not intending to please; our slogan is Service To Mankind. Let the lazy ones know the value of correct information. Those Charts are FREE for the Planets and are issued for the asking.

Wrong Atcowa has no hurt; it will refuse to normalate.

The Human Aura being the Emanation of the Visible Physical Vehicle, is a factor of great importance. When the present crisis blows away, more instruction in the direction of the Invisible may be considered.

Drink nothing when the mouth is full of solid material. Never place any food or drink in the mouth on rising in the morning without cleaning the mouth and teeth. Be hygienic, please. Hot water should not be drunk, because, it will adversely affect the process of Digestion. The habit of drinking hot fluids is injurious. Nothing warmer than the Body Temperature should be thrown into the Stomach. Ice Water is the ruin of this nation. Drink cool, but not shivery.

Giving Orange Atcowa for motivating the Bowels, is like trying to start a stalled automobile uphill on high gear. Cases of Persistent Imbackelim should be started on the Lemon and lowered to Yellow afterwards. Proper Food, with Yellow on 6-7-8-9-10 will remove such stagnation, if the natural Posture be used as illustrated in Spectro-Chrome Home Guide.

No Colon jammed with the products of carcases can be healthy; no wonder the Medical Doctors admit it to be Semi-Colon!

Lena W. should send General Advice Chart. Those "scary" feelings result from Heart as well as Spleen Disorders. Those feelings affect the Emotional (Astral or Psychical) Vehicle. Americans do not know much of vegetarian cookery. If Lena W. is unable to cook the Chaval and Dal as instructed, she needs a Vinag.

If Dinshah would start giving "personal interviews and examinations", all the cripples

of the World would plague him to death. He wants to live and serve and Spectro-Chrome Metry avoids such "consultations". No—not until the grafty Medical Laws are repealed will he consent to see any Sufferers.

Rugs and carpets are the hot-beds of Microbes; so are feather pillows and furs. Discard those filthy articles.

For full Chemistry, Light must be as made and neither polarized nor tinted.

The Portable Itisometer is ready and you saw it exhibited, but the present conditions do not justify the commercializing expenses. In time to come, not only will there be a Spectro-Chrome in Every Home, but there will be an Itisometer With Every Spectro-Chrome.

—o—

COMMEMORATION OF 21st ANNIVERSARY

Steps Taken To Perpetuate Spectro-Chrome Institute, As A Benevolent Foundation Devoted To The Service Of Mankind.

Present Business Corporation Will Be Dissolved On Monday, September 15, 1941

When Spectro-Chrome Metry was presented to the World on April 26, 1920 and later when Spectro-Chrome Institute was chartered as a Joint Stock Business Corporation, on January 19, 1922, it never was in the mind of the Originator Dinshah P. Ghadiali, to use it as another money-grabbing institution. His ideals were to serve Suffering Mankind by saving humanity from the Poison Fraternity, Pus-Punching Savagery and the Knife-Stabbing Butchery. To accomplish his purposes, he worked without salary for 20 years, but, since the ruinous financial tax policies of the hypocritical New Deal, he found his aims blocked at all points by hedges of unconstitutional legislations. Thousands of dollars which he intended to use for service expansion were dragged away by the thoughtless and wasteful Government actions and were he to sit quiet in such quandary, the World would again be without its Spectro-Chrome before long.

To avoid such catastrophe, sooner than surrender his main objects and principles, the Originator calmly took in the whole situation and cheerfully decided on turning over his entire property to a Non-Stock, Non-Profit Benevolent Foundation, so the public may be perpetually protected and served.

To that effect, the following Notice was dispatched by registered mail to all the Stockholders of the Corporation, on Friday, June 13, 1941.

NOTICE

1. Please be informed that on Monday, September 15, 1941 at 2:00 P. M., there will be held in the Auditorium of our Central Office at Malaga, New Jersey, a Meeting of all the Stockholders, Preferred as well as Common, Voting as well as Non-Voting, for the transaction of the following business. The Propositions stated hereunder will be submitted to a Vote of the Stockholders:—

(A) That the Board Of Directors having passed a Resolution, declaring it advisable and most for the benefit of the Corporation that it be dissolved, the Stockholders having duly considered all the circumstances involved, hereby consent in accordance with the Law to dissolve the Corporation.

(B) That the Board Of Directors are hereby authorized to set a convenient date for the Dissolution of the Corporation and are hereby empowered to use their best judgment in paying off the Creditors of the Corporation.
(C) That the Board of Directors are hereby empowered to file such Certificate with the Secretary Of State for New Jersey and do whatever is called by the Law pertaining to General Corporation and applicable to the said matter.
(D That the Board Of Directors are hereby empowered to sell the Property and Assets of the Corporation or dispose of them in whatever manner is deemed fit in their judgment in the best interests of the Corporation.
(E) That the Board Of Directors are hereby empowered to file with the Secretary Of State for New Jersey a new Charter under the Non-Stock Not-For-Profit Corporation Law to perpetuate our existence as an Educational, Scientific, Literary Organization and continue the same Corporate name SPECTRO-CHROME INSTITUTE.
(F) That the prior action of the Board Of Directors in redeeming the Preferred Stock at Par Value is hereby sustained.

2. You are further notified that each share of $10.00 carries One (1) Vote in the Dissolution procedure.

3. Your kind presence is earnestly requested and it will be to YOUR benefit to send by Registered Mail your Stock Certificate to us PRIOR to the said Meeting, so we may redeem it at Par value, as after the Dissolution Meeting and the passage of the stated Resolutions, no claim for redemption can be entertained.

Yours In The Service Of Mankind
SPECTRO-CHROME INSTITUTE
by Stephanie Hand., Secretary

To avoid any interruption of business during this change and transfer, Dinshah had requested a Ruling from the Honorable Secretary Of State For New Jersey and the following answer was promptly given:—

STATE OF NEW JERSEY
DEPARTMENT OF STATE

Trenton, June 6, 1941.

Mr. Dinshah P. Ghadiali,
Spectro-Chrome Institute,
Malaga, N. J.

Dear Sir:

I have your communication of the 4th inst. Immediately upon the filing of the certificate of dissolution of your corporation you may file in this office a corporation under the Act not for Pecuniary Profit, bearing the same name.

Yours Very truly,
THOMAS A. MATHIS,
SECRETARY OF STATE

Thus, without any hitch, our activities from a Business Corporation will slide into those of an Educational, Literary, Scientific, Benevolent Corporation and the enormous tax burden, which would have compelled us to raise the prices of our products, will be lifted from our head.

The move is in the right direction to perpetuate our Service Of Mankind. The Originator, on that day of Monday, September 15, 1941, will voluntarily surrender ALL his holdings for the benefit of the World and continue to work just as cheerfully as in the past, so Spectro-Chrome may live forever. All creditors will be paid in full and so will all the Preferred Stockholders.

SPECTRO-CHROME — IN EVERY HOME!

FIRST DETROIT MICHIGAN PLANET

(HOTEL TULLER, DETROIT, MICHIGAN)

Meeting Of Thursday, May 1, 1941

Successful Use Of SpectroChrome In:—Measles.

Reported By:—SOFIE HALL, *Recorder*

Sub-Deputy Ralph Clark was in the chair in the absence of our Deputy Lucille Greenham.

The Case Reports were begun immediately and they are as follows:—

Lita B.'s baby had the Measles, was covered with them and was very sick. Green and Orange were used with great satisfaction. Her other little girl was also coming down with them, but the first Tonation made them disappear. The Sub-Deputy read Rule 17 of the Constitution and Rules, about **Supreme Authority.**

An Affiliate asked if it were violating the Rules of Spectro-Chrome to buy an electric bulb for the Spectro-Chrome Equipment elsewhere.

The leaflets concerning Colonel Dinshah's Lectures in Detroit were given to the Affiliates for distribution.

Gladys Clark spoke about showing the Affiliation Card at the door and feeling no resentment about it, as we should be glad to obey the Rules.

The Sub-Deputy called Albert Greenham in regard to Colonel Dinshah's Lectures. He urged all to come and bring as many as possible, as Colonel Dinshah excels every body in the United States Of America, on healing by Color. There are no other authorities on it. He related that Colonel Dinshah several times had challenged the Medical Doctors to a debate on the Healing System. Colonel Dinshah would pay all the expenses and let the profit go to some charitable organization. Albert Greenham stated he would like to have everybody in Detroit hear the series of Lectures by Colonel Dinshah; fill the Arabian Room to capacity. We should all see what we can do for him this time.

Ralph Clark then called L. Roy Dodman to the platform and the Affiliates applauded.

He spoke on keeping our Bowels clean. This alone would help in normalating any Disorder. Imbackelim causes many Disorders. The Rational Food Of Man helps to keep the Bowels in good condition. We should always drink the raw milk.

Emma H. stated her husband had Ulcers of the Stomach ten years ago and he would drink three or four quarts of milk a day and is very much improved.

Albert Greenham stated we should never drink milk if it is

pasteurized and never drink milk fast, but to "chew" it, as it will thus form small beads in the Stomach. Any food passed through a "process" loses many of the better qualities.

A detailed account of Henry S. was given.

The Sub-Deputy read an article out of The Record entitled "Take It From Me". The Affiliates applauded.

EDITORIAL REMARKS

About the Bulb, Rule 78, Section 3, is quite clear. It is a part of the Integrity Policies, as Affiliates are not expected to disturb the uniform character of the work. Many Affiliates make a mess of the Tonation, by using Bulbs of the wrong voltage, wrong light centre or wrong wattage. That Rule provides for honesty and it is upto the Affiliates to maintain their Integrity or some day incur Discipline for Violation. All our standard Bulbs have the name of DINSHAH and SPECTRO-CHROME etched on them. Use *no* other.

Please send the "Detailed account" mentioned in your Report.

DINSHAH EDUCATIONAL BROADCASTING SERVICE

Non-Stock, Non-Profit Corporation Chartered In New Jersey

Soon after arriving in Malaga, New Jersey, Dinshah fulfilled his promise, given in Detroit, Michigan, about establishing a weekly newspaper and Radio Broadcasting Station. He took the first step and filed the following Certificate with the Clerk of Gloucester County and filed and recorded it in the office of the Secretary Of State for New Jersey:-

Certificate Of Incorporation
OF THE
Dinshah Educational Broadcasting Service

THIS IS TO CERTIFY:-

That the undersigned do hereby associate themselves into a Corporation under and by virtue of the provisions of an Act of the Legislature of the State of New Jersey, entitled "An Act to incorporate associations not for pecuniary profit", approved April twenty-first, eighteen hundred and ninety-eight, and the several supplements thereto and acts amendatory thereof.

Constitution

NAME

ARTICLE 1:—The name of this Corporation is:-

DINSHAH EDUCATIONAL BROADCASTING SERVICE.

PURPOSES

ARTICLE 2:—The Purposes for which this Corporation is

formed are:-

(a) To encourage and broadcast Truth for the Service Of Mankind.

(b) To disseminate knowledge concerning all Physical, Metaphysical, Spiritual and Occult Sciences and in the broadcasting thereof to establish, utilize and maintain all Channels Of Publicity available for the Service Of Mankind.

(c) To uphold unreservedly and spread correct comprehension about the prerogatives of Liberty, Property, Security and Contract, which are universally established as Human Birthrights.

(d) To establish and maintain an International Fraternal Nucleus, for the exchange of views among the peoples of the World, to acquire and disseminate facts conducive to the Service Of Mankind.

(e) To form and maintain Fraternal Centres in connection with the International Body, for the exchange of views among individuals interested in the promotion of the Welfare Of Mankind.

(f) To organize and maintain Bureaus Of Educational Service, for enlightenment through Discourses, Publications and all other legitimate means for dissemination of literary and scientific knowledge, in conformity with the highest standards of Integrity.

(g) To advocate and take all lawful measures as will accomplish Freedom of Thought, Judgment and Action to insure to Humanity now and forever, the Birthrights of Liberty, Property, Security and Contract.

(h) To encourage such sensible Legislation as will promote the Welfare Of Mankind.

(i) To spread by all lawful means, the principle of the Fraternity Of Mankind without any distinction, throughout the World.

PRINCIPAL OFFICE

ARTICLE 3:—The location of the Principal Office of this Corporation is in the village of MALAGA, TOWNSHIP OF FRANKLIN, COUNTY OF GLOUCESTER, STATE OF NEW JERSEY, UNITED STATES OF AMERICA.

AGENT

ARTICLE 4:—The name of the Agent in charge of the Principal Office of this Corporation and upon whom process may be served, is:—DINSHAH P. GHADIALI.

TRUSTEES

ARTICLE 5:—The number of Trustees of this Corporation is Three.

ELIGIBILITY OF TRUSTEES

ARTICLE 6:—The eligibility of any person for nomination as a Trustee, shall be determined in accordance with the By-Laws, as may be in force from time to time.

FIRST YEAR TRUSTEES

ARTICLE 7:—The names and postoffice addresses of the Trustees elected for the first year of the existence of this Corporation are:—

DINSHAH P. GHADIALI....MALAGA, NEW JERSEY.

IRENE GRACE DINSHAH....MALAGA, NEW JERSEY

CICELY STURGES.....MALAGA, NEW JERSEY

POWERS OF THE CORPORATION

ARTICLE 8:—Among its inherent lawful Powers, the Corporation shall have the Power:—

(a) To have perpetual succession by its corporate name.

(b) To sue and be sued, complain and defend in any Court.

(c) To make and use a Common Seal and alter it at pleasure.

(d) To appoint such Officers, Managers, Representatives and Agents, as the affairs of the Corporation may require.

(e) To make By-Laws for the management of its property and the regulation of its affairs, in accordance with the Law.

(f) To make and enter into Contracts.

(g) To take and hold by Lease, Gift, Purchase, Grant, Devise or Bequest, any property, real or personal, necessary or desirable for attaining the Purposes of the Corporation and carrying them into effect, subject however, to any alteration or modification hereafter made by General Law as to the amount of real and personal property to be held by the Corporation.

(h) To transfer and convey its real or personal property.

(i) To borrow money for the Purposes of the Corporation and issue Bonds therefor and secure the loan by Mortgage or otherwise.

(j) To exercise any Corporate Powers necessary or incidental to the fulfillment of the Purposes above enumerated.

AFFILIATION

ARTICLE 9:—Only Contributors devoted to the Service Of Mankind, as may be provided in the By-Laws, shall be eligible to Affiliation with this Corporation.

In witness whereof, we hereunto set our Signatures and Seals, Friday, the 13th day of June, 1941.

Signed, sealed and delivered in the presence of.....
Dinshah P. Ghadiali
Irene Grace Dinshah
Cicely Sturges
Stephanie Hand.
William D. Caccese
Incorporators.

State Of New Jersey,
County Of Gloucester.

Be it remembered that on this 13th day of June, Nineteen Hundred and Forty One, before me, a Notary Public, personally appeared Dinshah P. Ghadiali, Irene Grace Dinshah, Cicely Sturges, Stephanie Hand. and William D. Caccese, who I am satisfied are the persons named in and who executed the foregoing Certificate Of Incorporation and I, having first made known to them the contents thereof, they did each acknowledge that they signed, sealed and delivered it as their voluntary act and deed.

(SEAL) DOROTHY CACCESE
Notary Public Of New Jersey
My Commission Expires January 29, 1942

Received June 13, 1941 at 11:45 A. M. and recorded in the Clerk's Office of Gloucester County, at Woodbury, New Jersey, in Book 4, of Certificates Of Incorporation for said County, page 601, etc.

R. EDWARD KLAISZ,
Clerk.

Endorsed
Filed and Recorded
JUNE 16, 1941
THOMAS A. MATHIS,
Secretary Of State

Now that the Corporation is chartered under the Laws of the State Of New Jersey, the way is open for progress. Mere talk ceases and actual activity commences. Those who lifted their hands and promised co:operation, are welcome to remit their Contributions, to the company, because a Bank Account is already opened for the purpose. Remittance by check or Money Order should be for $25.00 or any multiple of 25, to the order of **Dinshah Educational Broadcasting Service.** ANY person may contribute to the Cause, subject to the approval of the Board Of Trustees. Amounts and names will be published from time to time. The By-Laws and the Rules also, will soon

be formulated for Affiliation and for the conduct of the corporate affairs.

—o—

FIRST MERRILL WISCONSIN PLANET

(BADGER HOTEL, MERRILL, WISCONSIN)

Special Educational Meetings Of May 1, 2, 3, 4, 5, 1941

Reported By:—HILDA SCHNEIDER, *Recorder*

Deputy Lydia Danner was in the chair.

Colonel Dinshah was presented to the Affiliates by the Deputy.

At his request, certain documents were read to the audience by the Recorder.

The Originator asked the Affiliates if the Board Of Trustees did the right thing in expelling Michael Ruczkall of Detroit, Michigan for giving Aid and Relief by Spectro-Chrome Metry to persons not affiliated as Collaborators. It was opined unanimously that the Board Of Trustees did the right thing.

The motion was made by the Deputy and seconded by the Sub-Deputy that the Educational Lectures should be delivered as follows:—

Friday, May 2 — Fundamental Principles of the Science Of Spectro-Chrome Metry.

Saturday, May 3 — Pictorial Lecture.

Sunday, May 4 — Rational Food Of Man.

Monday, May 5 — Disorders And Their Tonation.

After hearing those Lectures, we feel that we can show our appreciation for his marvelous efforts in giving us the Free Lectures on this wonderful Health and Healing Science only by purchasing Spectro-Chrome products and selling more Equipments.

The Deputy expressed a wish that all who attended the Food Lectures would adhere to the Rational Food Of Man 100% as examples to the public. She feels that our Food was our biggest problem and that even though the audience was comparatively light they benefited by the Lectures; it cleared many of their problems.

We wish to express our heartfelt thanks to Colonel Dinshah for giving us the opportunity to hear his wonderful Lectures. We are very sorry that more of the Affiliates could not be present but the Originator should know that his efforts were not in vain, for those who attended the Meetings feel that his instructions were very worthwhile and they have been a great help in furthering our education in Spectro-Chrome Metry.

EDITORIAL REMARKS

We thank you and appreciate your good will.

TWENTY FIRST ANNIVERSARY CELEBRATION OF THE SCIENCE OF SPECTRO-CHROME

Weekly Newspaper And Radio Broadcasting Station Coming

In Milwaukee, Wisconsin, the Milwaukee Auditorium witnessed a scene of great rejoicing. The six lectures delivered by the Originator Dinshah P. Ghadiali, were heard by crowds. The date of Saturday, April 26, the birth date of the Science in 1920, will ever be remembered with gratefulness by the thousands of sick persons who received a new lease on life through Spectro-Chrome. Many important matters were discussed and much progress and more interest were in evidence. Among the Case Reports the following drew attention:—

Lydia Danner—"I had cases of Blood Clot, High Blood Pressure and Paralysis. My niece was paralyzed; Spectro-Chrome made her 100% right. A boy of 13 was given up after an injury. Today, he is in perfect health. I had wonderful results in septic cases. In 3 days many were normal. Of course, Persistent cases would need patience. People do not give enough time. They run to Medical Doctors for 10 or 20 years, then expect a miracle from Spectro-Chrome. However, they should follow the Rational Food Of Man. I do not want to be without Spectro-Chrome. I use several in my practice." (Applause)

Albert B. Hale—"I have had plenty of experience with Spectro-Chrome. My wife had High Blood Pressure of 240. For three years, several Medical Doctors attended to her, but no results. They could do nothing; told her to make the will. Spectro-Chrome set her right. A year ago, my eldest son had a Collapsed Lung. He was taken to the Hospital in my absence. There they said he was not expected to live. He had several Injections. I went there and wanted him out. They said I was crazy. I took him home and gave him an Orange Tonation. Four Tonations and he sat up in bed. In 7 days, he went to work. My 2 year old grandson had a hand caught in a pulley. Flesh was burnt and bone left. Was in Hospital 10 days. They cut the Skin and wanted to amputate the little finger. I pursuaded my son to take him out. They said I was crazy. They would have to amputate the whole hand and leave the little fellow with a stump. Spectro-Chrome set the hand right; it is as it ever was. All Scars disappeared." (Applause)

Sub-Deputy Kurt W. Bader—"I reported many cases in the Planet Meetings. A woman of 46, had Operations on Tonsils, Gall Bladder, Ovaries, Uterus and so on. She heard of Spectro-Chrome and said, 'What can you do for me'? I said, 'try it'. Her legs were swollen to twice the normal size; she had a Kardoscil of 124 and Spiroscil of

24. I gave her an old Equipment. In 6 months, the Swelling was gone, the Heart was 78 and the Respiration 18. Another woman had Abscess on the Breast, with Pleurisy, Pain and Swelling on right side. She suffered 3 months; asked me what to do. Well, do as I tell you. Left Breast had a hard core swollen. Kardoscil 100, Spiroscil 20. I used Lemon Systemic, Orange on 4 and Magenta. In 4 weeks, 2 Abscesses broke and cores came out as big as a thumb. Healed from the inside. Medical Doctor wanted to operate, but, she is all right now." (Applause)

M. spoke about his own case of Pulmonary Tuberculosis. In 1939, he was in the Herman Keiffer Hospital. He went back and forth. Received no benefit, so finally went home. They told him to sell his home and go to Arizona. Cecilia D. spoke to him about Spectro-Chrome. He got a used one and now he is well.

Recorder Emma Schroeder—"Milwaukee should be proud to be having the 21 year Celebration. For 6,000 years, statements have been made about Medicine and the use of Drugs. The Earth is millions of years old; Spectro-Chrome is only 21, but, the progress made by it should satisfy us all. The activities of this week make me proud. Colonel Dinshah will be the most famous scientist. The Science is so simple, it will live to Eternity. Spectro-Chrome prolonged my mother's life and my life. I bought Pills by the hundreds. In another month it will be 5 years I knew of Spectro-Chrome. The Rational Food is important. The healing method may be right, yet the Food must be right too. Medical Science is full of cobwebs and is now obsolete. Spectro-Chrome put it out of business. (Applause)

Kurt W. Bader proposed and Albert B. Hale seconded that a vote of thanks be extended to the Milwaukee Auditorium Board and the Manager William Maas, for their great courtesy in placing at our disposal all the facilities needed to make the Celebration a success. Unanimously passed.

Deputy Frank S. Burns—"Spectro-Chrome is just a 21 year old upstart. It is still growing from its infancy, yet its banner was carried several times from the Atlantic to the Pacific Coast. It is known in many countries and there are several Spectro-Chrome apparati in India also; India is as you know the birthplace of the Originator. It is saving mankind in an inestimable manner. It has done for Suffering Mankind more than any other method—more rapidly and thoroughly. It dares to do anything no other did. Look at the case of the burnt girl Grace Shirlow! In a reasonably short time a complete new Skin was built on an area so large no other method could have done it. I do not hesitate to recommend Spectro-Chrome. We must be proud to be the pioneers. It is a privilege to listen to the Originator and heed his advice. I joined the work 7 years ago; never once regretted it. It

does all that is claimed for it. However, one should not transgress the Laws of Nature. One must co:operate and follow the Rules laid down by the Originator. I never regret I have Spectro-Chrome in my home. I am thoroughly convinced of its efficacy." (Applause)

The usual Lectures were delivered to interested audiences and for the first time, the pictures portraying the life events of the Originator from his age of 2½ to the invention of the Spectro-Chrome, were shown on the screen. Finally, the inner workings of the various departments of Spectro-Chrome Institute were projected by Motion Picture and the audience expressed its appreciation by volleys of applause. The appearance of the Vice-President Irene Grace Dinshah (the wife of the Originator) on the screen, working in her office, was greeted with a vociferous round; Evelyn Roman, the Secretary of the Scientific Order Of Spectro-Chrome Metrists, being personally known to the Affiliates in Milwaukee, also received an applause. It was an unexpected treat to see the Alma Mater in action and carried home the point that Spectro-Chrome Institute was not a fly-by-night affair, but, a live Organization for unselfish and permanent Service To Mankind.

Similar lectures and demonstrations were given the following week in Merrill, Wisconsin and the Celebration was then opened in Detroit, Michigan. There, in one of the Sessions, Affiliate Albert E. Greenham being called on the platform, started a new ball rolling. Said he, "We have been talking of Spectro-Chrome many years, but it is all talk. We did nothing constructive to help Dinshah's work. He takes no gifts or presents; well let us do something to help the Cause. He can say nothing against that. We need an impartial newspaper that will tell the Truth and no party propaganda. Let us have a Radio Station so the World may know about Spectro-Chrome. Let us put our hands in our pockets and subscribe to such humanitarian work." (Applause)

The President Dinshah thanked the speaker and said he did not accept any gifts or presents, but, there should be no reason why a separate Organization could not be made to fulfill all the unselfish aims enumerated by Albert E. Greenham. Dinshah then requested the Recorder Sofie Hall to mark the names of those who volunteered to subscribe to such a Cause. He set $25.00 as the minimum Contribution; a higher figure should be any multiple of 25. Promptly Albert E. Greenham asked to be put down for $25.00 and Dinshah set his figure as $100.00. He marked Irene Grace Dinshah also for $100.00. Others joined. (Their names and amounts will be published in a later issue.) At the following Session, to the surprise of Dinshah, many brought their subscription in cash which Dinshah refused to accept, with thanks. He requested them to wait till he actually formed the

Corporation and got the Charter from the State Of New Jersey and would open a proper bank account for the new company. He promised to do so before starting for his Pacific Coast tour. (For further particulars see elsewhere in the current issue.)

Vice-President Jessie E. Ness—"I am highly in favor of the new move. I saw Dinshah fighting in the Supreme Court in Buffalo, New York and the way he tore open the issues. That case should be printed. My experience of Spectro-Chrome is highly favorable. Medical Doctors have fear infused in the mind of the public. Sufferers went to the Mayo Clinic for examination. They test all and then what? Spectro-Chrome has the hopes of the World in it." (Applause)

Albert E. Greenham—"There are so many frauds going on in Medicine. No newspaper publishes them. Take Aspirin, Bromo-Seltzer and numerous others. They are all harmful, but are consumed by the tons. So we need a newspaper in the hands of a fearless man. Dinshah is such man. Such a newspaper weekly at $1.00 a year deserves all our support. Dinshah has no creed; he is a great orator. He will give us the Truth, the sure Truth. Let the Affiliates give him Affidavits of what Spectro-Chrome did for them. Do not delay. Give him the Radio Station. He can broadcast Attuned Color Waves even— it needs a volume of money. Let us collect it for him. That day will soon come." (Applause)

Dinshah thanked all for their exemplary sympathy and said that his **Dinshah Impartial** will be graftless newspaper, taking no sides and no advertisements. His **Radio Station** too will broadcast solely for education and will accept no money for jamming the Ether by useless advertising jargon. The program of operation will be formulated soon. The Radio Station will be free for public use and educational service— a unique idea.

St. Louis, Missouri had similar Sessions and many subscribed to the new enterprise.

The 21st Anniversary Celebration will be taken to Portland, Oregon in June 1941, thus flagging Spectro-Chrome from Coast to Coast.

RESIDENT EXPERIMENTAL CLASS

The Annual Resident Experimental Class in the Science of Spectro-Chrome Metry, to qualify for the Diploma of Spectro-Chrome Normalator, will begin in our Auditorium in Malaga, New Jersey, on Monday, September 22, 1941, at 10 A. M. Please make your arrangements accordingly and write for advance reservation.
