In course of life you reach a time,
When Doctor, Lawyer, Priest alike,
Does fail to give the sought relief,
To troubled mind or burdened heart—
Then come to me:
I help you to help yourself.

FIRST ALLENTOWN PENNSYLVANIA PLANET
(HOTEL AMERICUS, SIXTH AND HAMILTON)

Meeting Of Thursday, September 4, 1947.

Successful Use Of Spectro-Chrome In:—Stomach Ulcers, Prostate Disorder, Diabetes, Scalp Disorder, Sunburn, Neck Disorder.

Reported By:—MAE BURNSIDE, *Recorder*

Deputy Edwin D. Moyer was in the chair; 45 Affiliates were present. An Affiliate came without her Card and was denied admission. Communication from the Institute was read; also the newspaper clipping about the Birth of Shireen. A Resolution was unanimously passed to greet Shireen who had just discovered America! The Motion to forward greetings to Irene and Dinshah was by Mae Burnside, seconded by Emanuel Muehlen. An article in the magazine LIFE, dated August 18, 1947, under the caption "Quack Medical Devices," ridiculing Spectro-Chrome and Dinshah P. Ghadiali, was read. It was sent to that magazine by the American Medical Association.

The Sub-Deputy spoke about the Sensory Stimulant and explained the difficulties encountered where there were Operations performed. She also asked for a Silent Prayer before each Planet Meeting.

E. M. spoke on the use of Lemon Atcowa.

Question was asked about two people being tonated in one room. Discussion followed and explanation is asked from Dinshah.

Sub-Deputy asked why ½ hour Front and ½ hour Back Tonation should not be given. E. M. explained that 1 Tonation should extend to 1 hour.

A. C. testified to wonderful results by Yellow on Areas 6-7-8-9-10.

A. B. spoke of having taken X-Rays for Stomach Ulcers. After a year's deliberation, he decided to use Spectro-Chrome Yellow on Areas 6-7-8-9-10 and following the Rational Food Of Man became normalated.

S. C. had Prostate Disorder. Lemon Systemic and Purple Local was irradiated and has no more trouble.

N. W. spoke of the improvement in her husband's condition. He had Diabetes. Yellow Systemic and on 6-7-8-9-10 were used.

C. H spoke of losing so much Hair and Coloring that he was worried. Yellow on 6-7-8-9-10 and Magenta on Area 4 brought the Color back even into the Hair and stopped its falling.

E. H. testified to the efficacy of Blue for severe Sunburn.

T. K. spoke of a vertebral Disorder in her neck. She had no more trouble after irradiating Yellow on 6-7-8-9-10.

E. M. spoke about the incomplete Spectrum of Fluorescent Lights. They do not give a complete Spectral Band.

Many expressions of satisfaction were heard about the interesting Meeting.

EDITORIAL REMARKS

I am carefully watching the workings of the American Medical Association, which has been our Opponent since 1924. Let all call us

"Quacks," but, before I am through with my Life, I shall make them all quack like ducks. If you want to read the Truth about the real Quack who heads that Ass-ociation, read "Medical Mussolini", special contribution to our Affiliates, only $1.00 for the Popular Edition. I have the book in stock for prompt delivery.

Thank you for blessings to Shireen.

You are requested to cut off ALL "prayer" business, silent or otherwise, from your Meetings. We are NOT a Religious Society and if you will not follow the advice given so repeatedly, you will endanger the Planet. I admire and respect you all for your religious feelings, but, as explained before, we have all types of sick people, religious and non-religious and I must insist that this matter be kept out of our work, our service. Pray at home as much as you like and as you please, but,—do as I requested. This is a *Final Warning*. Read By-Law 54 and be tolerant of others who are NOT of your views.

A Tonation on any Area, Local or Systemic shall be a full hour; no division of time. As regards tonating 2 persons in one room, there is the risk of mixing the Beams and other considerations. You will have to supply full particulars. I do not advocate it, because of potential complications.

FIRST CHICAGO ILLINOIS PLANET

(MIDLAND HOTEL, 172 WEST ADAMS STREET)

Meeting Of Thursday, September 4, 1947.

Successful Use Of Spectro-Chrome In:—Poisoning, Spinal Injury, Phlegm, Indigestion, Itch, Boils, Pimples, Skin Disorder.
Explanation Of The Chronos.

Reported By:—HERMINE KUEMMEL, *Recorder*

Deputy Kurt W. Bader was in the chair, 24 Affiliates were present. Deputy read the Communication from the Principal Office. Question was asked about the "Chronos" on the communication. The newspaper article was read announcing the happy arrival of a daughter "Shireen" into the Dinshah Family.

Henry Schilpp—The whole Chicago Planet likes to express their heartiest congratulations to Irene and Dinshah, with best wishes for Health and Happiness for little Shireen. May she be a joy to her parents and grow to be as fine a woman as her mother Irene Grace.

Deputy—There you can see, what healthy living means. To be able to produce children at the age of 73, when thousands of young people are sterile thru their wrong way of living and Smoking; Tobacco is also the main cause of Infantile Paralysis and many other Disorders; Miscarriages are also very frequently caused by it.

For the Educational Program, the Deputy read Chapter 90, "Spectro-Chrome In Persistent Disorders" and lively discussion followed. Said he in speaking of Lemon Atcowa, "There is a book written by a Priest, where he states, that people with Kidney or Heart Disorder should drink as much of Lemon Juice as possible; of course, I do not emphasize to follow this as he advocates to take from one Lemon per day, increasing by one up to 30 per day and back the scale again. Dinshah's System is

the best of all Healing Systems; Dinshah is a very deep thinker; you may not understand it all, what he means as he has other reasons also, which the average person does not understand or it may take years to find out the real meaning. That is the reason why the Sufferer should always follow instructions strictly and he will improve. Many people take ice cold Lemon or Orange Juice in the morning on an empty Stomach; it is wrong. Take your fruit with the breakfast, when you have something warm; you should have Starches in the morning to warm your Body. You cannot start the day with the Lemon Juice only."

P. P.—I used to take Lemon in the morning in hot water; it did not cool me off.

Deputy—One has to use good judgment; with Rice and Yellow Split Peas I like Lemonade very much in the evening.

E. B.—People say the Blood becomes thin from Lemon.

Deputy—It moves the sluggishness away; thick Blood cannot move fast; thinner Blood is much better and more conducive to Health.

Figure 143 "Chemical Analysis Of The Lemon" from our Encyclopaedia, was read and explained.

Case Reports followed:—

M. S.—I had D. T. poisoning; was very nervous, had a choking spell; took Magenta for 2 days, but was still very nervous; then, I remembered, that I should take Green, so tonated with Green and Magenta for 3 days. Then, I was able to get up and felt better.

Deputy—Since there was a pulmonary condition, you did not go wrong by tonating with Magenta; of course, Green is the Cleanser and Balancer; it was good for you to stay in bed; even if you are used to be very active, you cannot expect Miracles from Spectro-Chrome and by tonating with Green and Magenta, you actually used the whole Spectrum.

E. B.—During the heat wave, my mother could not get sufficient air and her Legs were blue; her Kardoscil was high and Legs swollen. Should she be tonated with Blue?

Deputy—In Nature. everything has its governing. Yellow will take Spasm away and the Blue from the Legs; irradiate her with Yellow on 6-7-8-9-10, Purple on Area 4.

The Deputy gave some Reports.

E. S. Kardoscil 75, Spiroscil 21. In 1941, jerked his Spine, when the other fellow dropped one end of a stove both were carrying. He went to a Chiropractor, who could not help him, so went to a Medical Doctor, who took X-Rays and said that he had Pott's Disease and put him in a cast for 10 months, from the Shoulders to the Legs. Then he said, he could not do anything except operating, by what was called a Spinal Fusion and also the Left Kidney should be removed. This was in 1943. Three months later. he got out of bed and started to walk; a year after he had burning Pain, when passing Frontelim, which was very discolored and cloudy; he also had Pain in Bladder. Two months of Spectro-Chrome Atcowas 60°, 90° and 300° improved his condition so much, that he wants his own Equipment now.

H. L., Kardoscil 56, Spiroscil 24, was suffering for 2 years from Phlegm on the Chest and the last 2 months had difficulty in breathing; had much tightness in the Chest, Belching, Gas and Indigestion. After 2 weeks of Atcowas 60° and 300°, the Kardoscil and Spiroscil was 72 and 18. After 2 months, the other symptoms disappeared also; he was very well pleased with Spectro-Chrome.

F. B., Kardoscil 68, Spiroscil 18, was itching; had Boils and Pimples all over Body for the past 5 years. Had used Sulfa Drugs and Penicillin without relief. With Spectro-Chrome Atcowas 60°, 120°, 180°, 200° and 300°, the condition was cleared for the first time in 2 months. He was very skeptical at first, but very soon changed his attitude.

V. H., was suffering for 2½ years from Skin Disorder on the Legs; first weeping, then dry and scaly. Used Atcowas 60° and 300° with very good success. In about 3 months, the Disorder disappeared. The people take too many Enemas and Cathartics, until there is no natural Elimination any more; the Bowels become inflamed and if they still keep on with the Cathartics, Mucous Colitis might set in. We have a very fine example of it in the "Family Health Protector", Article 28, where Dinshah made his first success with "Colored Light" and that was the reason he perfected the Science of Spectro-Chrome Metry. That is still alive.

EDITORIAL  REMARKS

A man, using his youth well, can retain his masculinity to his dying day. Such matters of Health preservation should be taught in the schools and colleges, without prudery. All Body Organs are good for their normal functions and the Law of Obscenity is a humbug of prurient civilization. Were anything indecent or obscene, the Creator would have given clothes to babies at birth. Years ago, the French Legislature wanted to put all dogs in streets, in trousers, to inculcate morality!

Chronos in Greek means Time. The Mogen David has 6 Points and 6 Angles. Our Spectro-Chrome Science uses 12 Atcowas. Green at the top begins 12 o'clock and Magenta at the bottom is at 6 o'clock, the intermediate Colors being represented similarly in their appropriate position. A. M. is represented by White and P. M. by Black, in accordance with the Astronomical Reckoning, without relation to Sunrise or Sunset.

FIRST CLEVELAND OHIO PLANET

(CARNEGIE HALL, 1220 HURON ROAD)

Meeting Of Thursday, September 4, 1947.

Successful Use Of Spectro-Chrome In:—Anemia, Nervousness.

Reported By:*—EDITH REES, *Recorder

Deputy George J. Brown was in the chair; 24 Affiliates were present. A hearty welcome was given the Recorder after her absence in two Meetings.

A new Affiliate, S. A., was introduced and given an opportunity to ask questions and to report on how he happened to start with Spectro-Chrome Metry and tell the results he had. His family friend told him that he was in a terrible condition and that he would have to take Shots and Pills regularly the rest of his life for Anemia and Nervousness. His wife heard of Spectro-Chrome through N. W. and became a Benefit Student

with her own Equipment. Much credit was given E. A. for seeing that he got the proper Tonations at the correct time. The Colors given daily for six weeks were Green Systemic, Magenta on Areas 4 or 18, and Red on Area 7. This routine was followed for six weeks and very satisfactory results attained. It was necessary that he report to the Medical Doctor for a periodic check-up and each time the Doctor took the credit for the improved condition and handed out more Pills which were thrown away as soon as possible! To this day, the Doctor thinks that the Pills did the corrective work! The friends tell S. A. how much better he looks and he is back to work and feeling fine. He still takes Tonations when needed. Instead of going on a Meat Diet for Anemia, he went on a fruit and vegetable diet and had his pound of grapes every day. He concluded his report by saying that he is now a Benefit Student and has his own Machine. The Affiliates enjoyed hearing the report and considered it one of the better ones given.

Communications from the Institute were read by the Deputy. The Affiliates send congratulations on having the little daughter, Shireen and wish her Health. It is nice for the family to have a daughter in the home, especially so for Irene.

H. S. and J. S. wanted to go to Malaga, so the latter may have a personal talk with Dinshah concerning her condition. The Deputy called him to make the arrangements, but, the Colonel said they could not take Sufferers at present and any how man and wife could not be received there at the same time. H. S. said that he would stay at the Hotel so Dinshah finally consented to let them come for their vacation as they requested and that they could have all their meals at the Institute, but, would have to stay nights at the Hotel. H. S. and J. S. then gave a very interesting report on their stay with Dinshah and his family. They mentioned about the Colonel's routine and what a busy man he is these days, taking care of Telephone calls and preparing his Brief. They were impressed with the harmonious living conditions in the home and how intelligent the sons are and how interested they are in every thing that occurs there. Several Affiliates came during their stay there for consultation and Free Guidance and every one was told that he must follow the Principles and Food to get results. Some one called from St. Louis to get eleven Equipments. J. S. found out what Colors to take and is following the Advice given. They both sang praises for the Colonel and his family and said that Dinshah has so much more to given us when he gets his freedom from the Courts. This too was a very interesting Report.

The Deputy and A. K. spoke concerning a Dentist who would like to become an Affiliate, but, cannot because of our restrictions. His wife could become an Affiliate, but, both men felt that there was too much risk in accepting her membership for the Dentist might turn out to be an agitator instead of a promoter. Everything is harmonious now in our Planet and we want it to remain so.

The Recorder then spoke concerning the lost Reports and stated that she held the receipts for each month this year, except the August Report and the Deputy had taken care of that Report and sent it in at her request.

J. W.—Inquired how to go about getting a new Motor. The Deputy said he wished he knew, for he too would like a new one. The Recorder and J. T. said they would like new Motors. Please advise for four new Motors for Aluminum Equipments. Please state the contribution and if they are available.

This was a very interesting meeting and the Affiliates who were not present missed something.

EDITORIAL  REMARKS

Thank you for good wishes. Shireen is living serenely and growing daily by one day. Before asking for stay in the Chromet here, it is necessary to have a complete General Advice Chart, to determine whether the Affiliate may be received. We have no facility for nursing cases. The Affiliate has to use self-help.

Duplicates of the lost Reports are now here and will be published.

All parts are available, but, not as spares; only replacements. If the old Motor be returned, a new one will be sent as replacement for a Contribution of $8.00.

FIRST MILWAUKEE WISCONSIN PLANET

(MILWAUKEE AUDITORIUM, WEST KILBOURN AND NORTH FIFTH)

Meeting Of Thursday, September 4, 1947.

Successful Use Of Spectro-Chrome In:—Anorexia, Imbackelim, Insomnia, Varicose Veins, Sore Feet, Fever, Gingivitis,, Swelling, Accident, Tooth Disorder, Pain, Soreness, Tooth Extraction, Hemorrhage, Urine Retention, Paralysis.

Reported By:—ETHEL L. SCHOTT, *Recorder.*

Deputy Evert Dahlke was in the chair; 148 Affiliates were present.

Affiliates were requested to hold up their Affiliation Cards, because, it was thought someone entered the Meeting without registering. All had the Cards.

The Deputy read and explained the communication from the Principal Office, which also contained the news of the birth of Shireen, daughter of Irene Grace and Dinshah. An article from "The Vineland News", regarding Shireen's Birth, was also read, after which A. E. suggested that it would be a good time to send congratulations to the Institute on the Birth of Shireen.

First, before making the Motion, the Deputy read and explained the "Good Thoughts" for August 23, "Liberty". Then the Deputy read a Motion that he had prepared for such purpose and which was stated as a Motion by O. L., seconded by A. F. and on vote was unanimously carried. Motion was as follows: "We wish to extend our most sincere congratulations and best wishes to the newest member, 'Baby Shireen', of the Dinshah Family and our Dinshah Spectro-Chrome Institute. We wish her Health, Happiness and Success. May the Higher Powers bless Irene Grace, the mother of this sweet bundle."

Deputy—At this time I should like to read one paragraph from last month's communication. "All Benefit Studentship Requests received AT THE PRINCIPAL OFFICE before Monday, September 15, 1947, will be accepted at the present $90.00 (Ninety Dollars) Contribution. All subsequent Enrollments as Benefit Students will be $100.00 (One Hundred Dollars). New forms will be in your hands in time."

The Deputy explained that those Affiliates who did not receive their magazines this month, did not receive them because they had not attended the last Meeting and therefore. they would receive all of them if they attended the next Meeting in October.

Deputy—At this time I like to read a communication from Emma Schroeder, dated September 4. 1947, to me as Deputy, Eleanor C. Luedtke, as Sub-Deputy, and all Affiliates of the First Milwaukee Wisconsin Planet of the Dinshah Spectro-Chrome Institute: "Many months ago, at a Meeting—and it was later printed in the magazine—I expressed the desire to be relieved of my secretarial duties. At the Convention, in March of this year, the issue was again brought up. Finally I have made a definite decision.

"After serving the First Milwaukee Wisconsin Planet for a period of about seven years, I submitted by resignation to the Institute during the past month.

"It is a rare privilege to work for this fine Organization and I felt highly honored when I received the Appointment seven years ago, to serve as Recorder of the Planet reputed to be 'the largest in the World'.

"It was not only an opportunity to serve, but, an opportunity to gain additional education in the greatest Science known to mankind and to gain intellectual experience which is not easily within the reach of the layman outside of a university.

"The name of my successor has not been officially transmitted to me, but, whoever is appointed to the office has my sincerest and heartiest congratulations and fullest co:operation.

"Suggestions and pointers which have come to me during my period of service were submitted to Deputy Dahlke.

"I have performed my duties conscientiously and to the best of my ability, always bearing in mind fairness and loyalty and devotion to the Cause.

"With best wishes for continued success, I remain

Sincerely,
Emma Schroeder."

(APPLAUSE)

Deputy—It was a pleasure to have been able to work with Emma Schroeder, as she was always conscientious and most capable and we hope that her successor will try to do as well after several months' experience.

At this time G. W. asked if this would be the time to affirm the new Recorder, but, was advised that it could not be done until the Deputy had received notice of Affirmation from the Institute.

E. L. suggested that the Deputy explain about the change of Annual Fees and Dues for continued Affiliation.

The Deputy then read from last month's communication as follows: "Furthermore, the Annual Fees and Dues for each Affiliate for continuing the Affiliation will be a flat $6.00 instead of the present $3.50."

Deputy—At this time I like to have all the new Affiliates stand up and give their names.

There were eight new Affiliates standing:—S. P., R. O'R., E. S., E. G., E S., D. S., F. P. and T. E.

Case Reports followed, were explained and comments offered. Otto Lutz gave three Case Reports:

(1) L. M., age 75, female. No appetite, felt weak. Backelim one in three days. In one month's time she felt like living again. Kardoscil was

104, Spiroscil 30. Kardoscil is now 74, Spiroscil is 20. Colors were Yellow 6, 7, 8, 9, 10, Purple on Area 4, then Magenta on Areas 4 and 18. Appetite returned, Backelim now is two in one day. She is *well pleased.*

R. B. asked how to decide what Color to use to bring down Respiration, Indigo on 17 or Purple on 4 and Otto Lutz said that he learned from years of experience that Purple acts quicker on the Circulatory System; for instance, one woman who had not slept for five nights, slept after Purple.

(2.) M. B., 50 years, female. Varicose Veins on right Leg. Always wore elastic stocking. Kardoscil 80, Spiroscil 18. One Backelim a day. Atcowas given were Yellow 6, 8, 9, 10, Orange Systemic. She followed the Rational Food Of Man, with good results. Indigo Local was used.

(3.) M. R., age 77 years, female. A case of sore Feet. All the Flesh under the Toes of both Feet was gone and Pus was coming out. The Medical Doctor said, after about 8 months of treating her, that it would be advisable to remove both Legs just below the Knees. Kardoscil 72, Sprioscil 17. Backelim, two a day. Atcowa used were Lemon Systemic, Magenta on Area 4, Yellow on Areas 6, 7, 8, 9, 10. In two weeks time, the bandages were loaded with Pus, as she had never seen before. There was a great deal of Pain at that time. Too much for her. Then used Yellow on Areas 6, 7, 8, 9, 10, which made the Pain less and the Feet were almost normal in two months. She said, "What do I care what I read in the papers in regards to Spectro-Chrome. It is my Feet that count to me. Please sign me up as a Benefit Student." Otto Lutz did enroll her.

S. E.—Sunday, August 17, when our son, age 21, came home in the evening, he complained of feeling hot and I took his Temperature. It was 102.8° at 11 P. M. His Kardoscil was 96, Spiroscil 18. At 11:24 P. M. which was the Favor Period, I gave him a Tonation, Turquoise Front Systemic. Monday, 2 A. M., the Temperature was 102° and 6:30 the Temperature was 100°. At 7 A. M., the Kardoscil 86, Spiroscil 20. Gave him Orange and Lemon Juice during the night. In the morning, I called E. L. and told her that he was complaining that a wisdom Tooth he was cutting was causing his Gums to feel sore and inflamed and she told me to give him Turquoise Local on Area 1 and Green Systemic Front and Back, alternating with Magenta on Areas 4 and 18. Wednesday, his Temperature was 99.2°, Kardoscil 80, Spiroscil 18. That afternoon, we went to the Dentist and he discovered that the boy had a Trench Mouth, due to low vitality. Our Dentist wanted him to consult a Physician, but, I told him I knew what Spectro-Chrome had done for our family in the past. I continued to give him the Tonations E. L. advised me and by Friday his Temperature was normal and the following Monday he went to the Dentist to have a cavity filled. When the Dentist looked at his Mouth, he said, "It is 100% O. K." and I told him we only used the Spectro-Chrome. For a couple of days following, I used Indigo Local instead of Turquoise, to harden the Gums and take the Soreness out, for they had been very inflamed and also had Pus. We are very grateful to Colonel Dinshah for Spectro-Chrome and the wonders it did for our family.

A discussion of this case followed.

Deputy asked if there was anyone who had trouble with their baby having a Fever when baby was cutting Teeth, to which S. P. said that her 23 month old baby had a Fever which lasted only 4 hours so she did not use Spectro-Chrome for Fever. She did, however, use Yellow for the Bowels. Deputy commented that the Body needs Yellow to pull Teeth

through the Gums and that in all cases where baby is cutting Teeth, the Blue will have little effect until Teeth are through.

L. L.—I had an automobile Accident July 18. Called Emma Schroeder and asked her to come and see me. My Lip was cut in two places, and my Knees were bruised. Emma advised me to use Turquoise Systemic, which I did and on the Favor Hour to use Magenta on Area 4. My Knees started swelling so I used Orange Local on Knees next Favor. Next day, Emma checked my Kardoscil 78 and Spiroscil 22, she advised to use Orange on Area 17, Magenta on Area 4. My Knees were swollen about 3 times the normal size. Next 5 days, I used Orange Systemic and Scarlet on Area 4. Swelling went down in three days. Then, I received Free Guidance from the Institute and was told to use Yellow on 6, 7, 8, 9, 10 and Magenta on Area 4. Started to use Yellow on Friday, August 25. Saturday my Kardoscil was 84, Spiroscil 17. My improvement was so rapid that I returned to the Class after 4 days. (100th Spectro-Chrome Metry Class).

J. T.—Four days ago, I had a Tooth pulled. It took two Dentists almost an hour to extract the Tooth. They gave me Injections and after they had started to pull, it did not come out. They X-Rayed Tooth and it showed that the Roots were hooked onto Jaw Bone They had the chair almost horizontal and took turns, different Forceps, to pull the Tooth, They gave me Anacin Tablets (which I threw away) and told me to put ice on the Area when I reached home, because it was going to be very painful. I went right under the Indigo before the freezing wore off. Took tonation in morning and in afternoon. I removed gauze and as I lay there I could feel the Bleeding stopping and after the evening Tonation, I had absolutely no Pain. I had Soreness about the size of a half dollar on my lower left Cheek. Altogether, I took five Indigo.

Otto Lutz jokingly remarked that J. T. "must have had Royal Blood to bleed that much!"

E. L.—When I fell and pushed Teeth into Jaw Bone, I used Indigo and got the same results—no Pain.

When A. T. asked if anyone had ever taken Purple before going to Dentist and without Injection had Tooth removed, N. F. said, "I took Purple on Tooth and could hardly feel the Extraction."

R. H.—I gave my eleven year old son Purple before I took him to the Dentist. The Dentist wanted to give him an Injection of Novocaine, but, I told him to go ahead with the Dentistry work without the Injection. I told him it wouldn't hurt him. He was surprised. The next time I called for an appointment for my son, the Dentist said that I should do the same as I did with him last time!

F. S. wanted to know if it would be wise to take Red Local to cause an Infection, before having Tooth pulled. He was advised against it.

H. K. wanted to see how Spectro-Chrome would work on her, so she took Purple before having a Tooth extracted. The Dentist did not want to extract it without giving her an Injection, but she wouldn't take any. After he had removed Tooth, "he grabbed a cigarette, because, it hurt him more than it did me." She felt only a little Pain.

When the Deputy asked H. K. if she used Spectro-Chrome in Dentistry, she said she used it for Hemorrhages. Hemorrhages stopped in ten minutes, where otherwise she would have to call a Physician.

H. K. stated the case of a gentleman who had a Tooth extracted and his Face became swollen. He called H. K. and said he wanted a Tonation

on his Face. She gave him Indigo. The man said, "To this day I do not know what I would have done if I had not taken a Tonation."

The Deputy explained to the Affiliates that H. K. could use Spectro-Chrome on Areas 1 and 2 only, because, she was in Spectro-Chrome before restrictions were put on it.

Deputy—I understand, J. T., that you were at the Institute last month. Do you have any comments?

J. T.—Last month, at this time, I was at the New York Planet Meeting. They have a nice group and are very interested, as we are, but they have to go some to compete with this one. To me, they don't discuss things as we do here, I feel sorry for Lina Fischer. She tries so hard to get people to say things. Colonel Dinshah took me to the Planet. He had brought my Case History Reports with him and was going to ask the Affiliates if he should take the case or what he should do. They "ohed" and "ahed", etc. and said that they thought the case was hopeless and that the Colonel shouldn't take it. The Affiliates were surprised when I got up and told them that it was my case. They made me run around and stand up on a table. We had quite a time. I enjoyed my visit at the Planet Meeting, because, everyone was so nice to me. I had a wonderful time at the Institute Irene Grace is a splendid person and although she was quite uncomfortable at the time, because she was expecting her baby, she went into the Office every day at eight in the morning and worked even though Air Temperature was 102°. She did not each lunch; did not even take time out for lunch. I was becoming restless because Colonel did not let me do any thing. It was hard for me to sit still, because, there was so much work to be done. The Dinshah family tries so hard to keep everything going.. They need plenty of help and plenty of co:operation. Yet they do have their "time outs". The boys play the violin, piano and other instruments. They play everything from classics to boggie-woggie. The boys do all the cooking and Irene supervises. How she manages to do all she does and still keep so cheerful, I don't know. I was treated as one of the family. They all made me feel so at home. We had breakfast at eight. We had such food as is listed in an example of a menu in Rational Food Of Man. At first, some of the food seemed too sweet to me, but I became used to it and now like it. One time we had so much whipped cream over blueberry pie that we could hardly see the pie.

A. T.—Tell them how much weight you gained.

J. T.—I did not gain; I lost weight. I had to take in the seams of my slack suit when I came home. All in all, I had a wonderful time and enjoyed my trip. I did not take any Tonations while at the Institute, but, I did notice it. I still notice it if I do not take Tonations.

At this point, the Deputy said that J. T.'s case would be read at the next meeting. She did, however, give a summation of her case as follows:

"I live in Kenosha (Polio area) and about a year ago I was very sick. I thought I had the Flu, called Medical Doctor who diagnosed it as Flu. About three days, I noticed I had trouble urinating. About two days later, I did not urinate at all. The Doctor said I should walk, but my Knees were stiff. I was rushed to the Hospital. They took the Fluid out of my Spine. I think that is what caused me to be so sick. I was taken to an Isolation Hospital, where I was not allowed to have visitors, not even my husband. They inserted a Catheter in me and took urine every 8 to 10 hours for two weeks. I stayed in the Hospital for two months. They stuck me with pins to see if I had feeling. I felt something like when a Foot

falls asleep. Specialists were called from Milwaukee and my husband and sister were told that I would be partially paralytic all my life. My sister took over, had release papers signed, took me home and removed the Catheter that was attached to my Body. I was given Enemas in the Hospital, but, nothing would come. After a little less than 48 hours of Scarlet, I was carried to the toilet and I urinated all by myself. We then switched to Yellow to get Bowels working. In two days, we got Bowels moving. I had two and three Movements a day and couldn't stop. Then we worked on Numbness. In two weeks I was out of Pain. Before I was sick I weighed 147 pounds, and 80 pounds after. Three days after I was home, the Doctor came to check the Catheter. He saw that I was sitting up in bed and said, "Well, what are you doing sitting up?" I told him Spectro-Chrome did it. He then asked, "What happened to the Catheter?" My sister said, "Here's your Catheter. Take it, we don't need it." The Doctor thought it was ridiculous for us to do the things we did. He wanted to know what right we had to remove the Catheter. My sister told him, "Well, Doc, if you ever need any help down at the Hospital, just look us up!" (APPLAUSE)

Deputy—I think everyone here enjoyed listening to your case, J. T. It really shows that the Doctors are at a loss. If we Affiliates use Spectro-Chrome conscientiously, we won't need a Medical Doctor.

The above led to a discussion as to how many times a day we should tonate. It depends upon the person, case and condition. Nature can only repair so much at a time. Otto Lutz said, "Sometimes 1, 2 or even 3 Tonations, but you can not crowd Nature."

The Deputy brought us back to the Institute for a few minutes, when he said he watched Dinshah put teaspoon after teaspoon of Sugar in the already sweetened Lemonade. Evert Dahlke asked him if that was not too sweet for him then, upon which the Colonel remarked, "I am an old sour prune and I must have something to make me sweet." (Now, we know that is not true, Colonel.)

A. E. (directing remark to Deputy)—You are to be commended on the way in which you conduct your Meetings and the way you make the Affiliates feel like talking and discussing cases. Also A. T. and J. T. add much to our Meeting, because, they are so interested and when they want to know something, they ask until they get the answer. That is the way more of us should be. "Boy, I'm glad they are here." (APPLAUSE)

Deputy—Thank you. I am trying to be conscientious and I hope you Affiliates will co:operate with me by bringing questions up that will keep the Meetings interesting. If your questions cannot be answered here, they will be answered in the Editorial Remarks.

R. S.—We found, from past experience, that the Affiliates must be "pumped" for information.

Theodore Mohrhusen sends us his regards from Omaha. Edward Straub visited him about two weeks ago and said that he looks well, gets his magazines once a year, misses the Meetings and thinks of us. (APPLAUSE)

The Deputy read a communication from Emma Schroeder which she had received from former Congressman Samuel Pettingell, "Gentleman from Indiana", who took up the opinion of Judge Claude McColloch in regards to the American Citizen's rights.

E. T. asked J. T. what Atcowas she used and was told that Yellow

and Lemon, alternate Front and Back and Magenta on 4 and 18 were used. Orange was used for the Respiration. After Yellow, she swung over to Lemon. because of Injections that were given her (fifty Penicillin Shots) and the four Spine Taps she had while in the Hospital. She remarked that the odor in the room after taking Lemon Tonations, was terrific, showing the cleansing process.

The composition of Scarlet and its use in J. T.'s case, in regard to increasing Urination, was explained to one of our new Affiliates, E. S.

The Meeting certainly was interesting.

EDITORIAL  REMARKS

Thank you for your kind wishes. Yes, "Liberty" is what drew me to American Citizenship and now ——? American Liberty is the shadow of its former self, because, Civil Liberties are daily disappearing under the sinful heel of the haughty Bureaucratic Cheapjacks.

The resignation of Emma Schroeder came with a sudden shock, but, the Council Of Trustees had to accept it, because, she refused reconsideration. She has multiple other duties and we are highly appreciative of the phenomenal services rendered by her in the past and convey to her our cordial thanks.

The new Recorder Ethel L. Schott is one who was our First Champion. Her first Report shows her competence for the onerous duties and I congratulate her on the efficiency with which she performed the task. She promises to be a fit successor to Emma Schroeder. I am sure she will grace the post. Give her your kind co:operation by speaking clearly.

When a Planet Officer receives the Appointment, as soon as the Card is shown, Affirmation is in order. It needs no special instruction from the Principal Office. Study By-Law 6.

Purple, by lowering Circulatory Tension where needed, assists in easing Pain.

H. K. acts within her rights, being under By-Law 52, Section 2. She is one of our staunch Affiliates and is very reliable for her devotion to the Cause.

J. T. had certainly a lively time here at the Institute. The boys kept her busy listening to their musical orchestra. If she will follow the Free Guidance and other instructions given, she will have a happy life. She is a woman with plenty of good nature.

I need plenty of Sugar (a Carbohydrate), because of my concentrated, intensive studies and peculiar activities. When a man has to think of both physical as well as metaphysical problems, he exhausts his Vital Energy during Vigilance as well as Sleep and to keep him in trim, Carbon and Hydrogen are essential. Without the Sugar, I should be walking with a third leg in my hand, at this age of 74 and those who see me working, ought to know the unusual strain under which I perform my duties without flinching. Work to me is a pleasure—in fact, I need more work—not legal worries—to make me happy.

Evert E. Dahlke is proving a good Deputy and with your continued co:operation he will make your Planet a greater success. A Commander is only as good as his soldiers and if you all stand by your Deputy and take proper part in the discussions and the Educational Program, even

Medical Doctors will be glad to listen to your Meetings some day—as our honored guests.

FIRST ORANGE NEW JERSEY PLANET

(ESSEX HALL, 327 MAIN STREET)

Meeting Of Thursday, September 4, 1947.

Successful Use Of Spectro-Chrome In:—Pain, Dogbite, Swelling.

Reported by:—MARYANN KLENNER, *Recorder*

Deputy Lothar C. Klenner was in the chair; 13 Affiliates were present.

Communication from the Principal Office was read. The news concerning the Birth of Shireen was received with great joy and all send their most sincere congratulations to both Irene Grace and Dinshah.

G. d'A. had several Teeth extracted and irradiated Indigo to relieve the Pain. He was very pleased.

H. M. related how her son was bitten by a Dog. She tonated him with Green once and twice with Orange. The Swelling disappeared and it healed wonderfully and quickly.

The Deputy read from our Spectro-Chrome Metry Encyclopaedia, Chapters on "Bugbear Of Diagnosis," "Fevers By Medical Conception," "Spectro-Chrome In Fevers," "Rubor, Calor, Tumor, Dolor" and "Absurdity Of Differentials."

Some questions and answers followed.

EDITORIAL REMARKS

I thank you for kind wishes. Build your Planet steadily and some day Irene Grace and Shireen will visit you!

—o—

FIRST MERRILL WISCONSIN PLANET

(HOTEL BADGER, MERRILL, WISCONSIN)

Meeting Of Thursday, September 4, 1947.

Successful Use Of Spectro-Chrome In:—Pain, Heart Trouble.

Notes By:—DOROTHY D. NELSON, *pro tem.*
Reported By:—GERTRUDE L. PARSHALL, *Recorder.*

Deputy Emil Erben was in the chair; 17 Affiliates were present. The Deputy read from "Good Thoughts" for to-day. Communication from the Institute was read; also article about Birth of a daughter to Irene Grace. Congratulations! Lively discussion on Kardoscil and Spiroscil. The question was raised as to which was faster, the male or female Kardoscil. W. B. read from our Encyclopaedia. Chapter 109 regarding the Heart. Welcome was given our new Affiliate from Wausau. We hope we see our new Affiliates every month. Our Wausau Affiliates are very loyal.

Case Reports followed:—

C. S., daughter of K. M., reported by her father. This morning at six o'clock she had severe Pains under the Heart Area. Kardoscil was very fast. She got up to feed the baby and had a very difficult time to breathe. She was breathing in short jerks and it was hard to take her Kardoscil and Spiroscil. Magenta was used and she was relieved. One hour after that, she was down town and felt better.

J. M.—The thing I like about Spectro-Chrome is, that you can take it and get up and go down town. If you have the Medical Doctor, you would probably have to go to the Hospital, have a Blood Transfusion and so on!

One of our new Affiliates asked if too much Magenta could be taken. We like Dinshah's advice on this question. W. B. said if he takes a Magenta late at night and his kardoscil is high, it would reject the Red and take the Violet and he could sleep well.

J. M. wondered about the use of two Machines simultaneously. The thought is that in the case of a Burn, where both Front and Back Areas were burned, relief would be much quicker if a Machine could be used on the Back and Front at once or where Tonations were needed on both Areas 4 and 18, if taken at once would that not be satisfactory?

Editorial Remarks on Meeting of Thursday, April 3, 1947 read by Deputy.

E. E. asked if all new Affiliates knew what we mean by the Aura. He read the Editorial Remarks, under the St. Louis Planet Report.

K. M.—A thought to those who have not made a study of the Aura. It is the heat of the Body and unlike a stove which radiates heat and is lost, the Body has a North and South Pole, starting with the Head to Genitals. This can be replenished by the proper food and when it is depleted we use Spectro-Chrome.

The Deputy remarked that even the Chemistry of a Stone projects an Aura. Sleeping with someone affects the Aura; that is why Dinshah advises sleeping alone.

Excerpts from article from 1946 edition of Milwaukee Journal read by the Deputy. The name of it was "United States a Sickly Nation."

C. G.—The few Colds I have now are nothing compared to those I used to have; in fact, I hardly know I have a Cold. K. M. said it was rare when I didn't have a Cold in the Winter. He said our entire Nervous System is fed through the proper Breathing and it has to be rejuvenated. It is important.

Question—I lost my sense of Smell. What can I do for that?

Upon questioning it was also found her senses of Hearing and Taste were not as keen as they should be. She was advised to send in her General Advice Chart.

K. M.—I would like to extend a vote of thanks, for all the hard work Emil Erben put in the Planet and we are all grateful for that. We hope he enjoys his trip. Emil is planning to leave our Planet and move to Arizona where he said there is a great opportunity.. It is a place where people go for their Health.

EDITORIAL REMARKS

As the Atcowas operate through the process of Reinforcement and Interference, the Auric Vehicle will receive or reject them according to

the requirements of the moment. It is this that makes Spectro-Chrome Metry the safest Healing System. Any excess of any Atcowa is rejected and any excessive use can produce no harm and it is that property that removed Differential Diagnosis as a necessity. The Aura is merely the Chemical Emanation of the Chemicals in the Physical Visible Body.

All Senses are governed by the Infra-Green Division of the Spectrum, the Red being the most Sensory Stimulant.

Our best wishes will follow Emil Erben.

FIRST PORTLAND OREGON PLANET

(MASONIC TEMPLE, 1119 SOUTH WEST PARK AVENUE)

Meeting Of Thursday, September 4, 1947.

Successful Use Of Spectro-Chrome In:—Bump, Pain, Bruise, Soreness, Swelling.

Reported By*:—LEWIS BISCHOFF, *Recorder

Deputy Stanley Burroughs was in the chair; 19 Affiliates were present.

A letter from Dinshah was read by the Deputy. In connection with the letter an article published in The Vineland News and sent, referring to Dinshah's new baby girl, was read and everyone was greatly surprised and pleased. This is the man who the Food And Drug people and Judge Philip Forman thought might "die in prison" because he was so old! He will probably be alive after many of the ones now prosecuting and persecuting him will be dead and forgotten. We all noted that Vincent M. Miles started the procession. The rest will follow one by one; Dinshah will outlast them all. Other men at his age would never have thought of putting up a fight against such tremendous odds. We all pray to God that he may live to see "Spectro-Chrome—In Every Home," and the American Medical Association where it would put Dinshah if it could.

Tonight was question and answer night. V. W. asked what to do for Varicose Veins. The Deputy explained what he followed as a schedule for such cases, Hemorrhoids and similar conditions.

L. T. asked for what was Blue used and it was explained that it was used for Fevers, Burns and Irritations. Blue is also used as a Vitality Builder. When one is very tired after hard work the Blue helps to supply Oxygen and revives one very quickly. N. H. said that is what she needs. The Deputy replied that her condition was different and that she needed Red as she had a tendency toward Anemia. She also asked what to do in case of a Fall and Swelling as the result. A. W. asked when a Bruise would be considered a Chronic Condition. He stated he had gotten a bad Bump and about twelve hours later he started with Green and Turquoise and not much happened, so he used Red and it stopped hurting; then, he went back to Green and it seemed to help more. L. T. also asked what to do for Boils. The Deputy explained. L. T. asked further about Heart Disorders.

M. L asked what to do for Soreness in Area 11. It felt sore most of the time just like a very Sore Throat.

R. A. mentioned that she had a very bad Accident some time ago and was very severely bruised. She had used a great deal of Green, Lemon

and Magenta with very good results in keeping away the Soreness and Swelling.

N. H. asked what to do for her boy. He was subject to frequent Headaches and Hay Fever attacks. She was told what to do.

F. B. said that her boy was beginning to complain a little of an occasional Pain in his Muscles and Joints. The Deputy told her to use Green Systemic.

EDITORIAL  REMARKS

Benign Jesus said "As ye sow, so shall ye reap." Those beautiful words are as true today as when they were uttered centuries ago. We wish no evil to anyone. Even to our Opponents we say "Live longer and see the growth of the message of Truth—Spectro-Chrome!" I say verily unto them: "The Law Of Karma is the Divine Law Of Retributive Justice. Action and its Reaction is Karma. If we keep our mind on the discharge of our duties, discharge them conscientiously and wish good to all, the percussion or rebound will *never* hit us. Our Opponents even are our Brothers, so let us mind our business and let the Opponents get their reward through Him Who Ever Watches The Innocent.

In conducting the Educational Program, I suggest that instead of giving haphazard replies to questions, you use our Sufferer Chart. A batch of it may be had Free by any Planet for the mere asking. Without its use and without having full particulars before you, there is a likelihood of sinking into the Bugbear Of Differential Diagnosis which we discarded in our Science. A batch was sent to your Deputy.

—o—

FIRST DETROIT MICHIGAN PLANET

(CONCORDIA HALL, 62 EAST COLUMBIA)

Meeting Of Thursday, September 4, 1947.

Successful Use Of Spectro-Chrome In:—Cold, Accident, Pain, Urethritis, Asthma, Backache.

Reported By:—ELIZABETH ROEMMING, *Recorder*

Deputy Charles J. Renn was in the chair; 74 Affiliates were present.

Communication from the Principal Office was read; also the Good Thought for August 23 from the book, "Good Thoughts" by Dinshah. The Affiliates were not surprised to hear of the Birth of Dinshah's daughter, Shireen, but were surprised to hear it was a girl instead of a boy. Dinshah told us of the expected Birth when he visited our Planet Meeting last July.

Deputy—Our Sub-Deputy would have lost his best, if anyone had taken him up on it. (Recorder's Note—The Sub-Deputy was willing to bet an Equipment that the baby would be another boy!) Will the Recorder please read this newspaper article?

The Recorder read an article from The Vineland News, of August 24, 1947 about the Birth of the baby. Dinshah's bland remark about the child being "the first of several daughters" was greeted with applause and hearty laughter.

Communication from the previous month, August, 1947 about Resident Class was read to the Affiliates.

Deputy—How many of you would like to take this Course?

Four hands were raised.

Deputy—That is not enough to bring Dinshah here. Understand Friends, Dinshah has much valuable Equipment that he uses during this Course. To bring it here costs money, to say nothing of his time spent in giving the Course. If you have never taken this Class I urge you to think it over carefully.

Case Reports followed:—

L. B.—My husband is still sick. He has a bad Cold. There was Pain in his Spine and left Leg. He had something similar about two years ago. At that time, we did not have Spectro-Chrome and the Medical Doctor who attended him gave him the wrong "Shots". He almost died! That is when we got our Equipment. He has been feeling fine for a long time, but, a few weeks ago he went out and played ball. I guess he must have caught Cold. He has had it now for about six weeks. He has taken several Colors and is now using Magenta and Lemon. I know if he did not have Spectro-Chrome he would be very sick.

Deputy—He has probably overdone it and may possibly be 'run down' a little. Give Spectro-Chrome time. Do not expect Normalation within a few Tonations.

V. C.—My wife's Finger was smashed between the front seats of our car. It was very painful and it is still sore. X-Rays were taken and showed that the Bone is splintered on the side. She is using Blue. Spectro-Chrome surely helped her, but, I like to know what she should do now?

Deputy—Is there a Cut?

Affiliate—She is wearing a Splint and she still has Pain. There is no Fever. It just seems as if she is always hitting that Finger.

Deputy—Well, of course, she will have a sore Finger if she is always hitting it. Lemon is the Bone Builder, I should suggest Lemon.

An Affiliate—What about Green?

Deputy—Why not Lemon? It is ¾ Green and the Lemon will build Bone. J. N. have you anything to add?

J. N.—Lemon is the Bone Builder as the Deputy just stated. Green is a wonderful Cleanser, so I should suggest Lemon for one week, followed by Green for one week. Now, to counteract any shock that may be present, I suggest also Magenta on Area 4 and Violet on Area 18.

Deputy—Yes, that is something we all have a tendency to overlook, the Magenta. Of all the Colors, in my opinion, Magenta is the most beneficial. It builds the Aura, remember that is how Spectro-Chrome works, strengthens the Heart and Kidneys, builds the Blood, etc., etc. Many times Affiliates tell me how long they took a certain Color and are not quite satisfied with the results. Never once have they used Magenta. If Magenta did only one thing and that one thing was build the Aura, it still would be the most beneficent of all the Colors, because as I said before, it is through the Aura that Spectro-Chrome functions. If the Aura be depleted you can not expect success. Remember, when tonating, to use Magenta also.

A. M. (A visiting Affiliate from Florida)—On our trip North, we had an Accident and the automobile tipped over. My wife had a broken Rib. As soon as possible, she was put under Spectro-Chrome and was tonated with Lemon, Orange, Magenta and Yellow.

Deputy—What about yourself?

A. M.—I was "shaken up" a little, but, one Tonation and I was all right. She was the worse one.

Deputy—Was she in a Hospital?

Affiliate—Yes, two days only. She is feeling much better now.

J. J.—About three weeks ago, I became sick in the shop. Pain in Areas 8-9-10. Earlier in the day, I had drunk some Grape Juice and thought it might be that caused the upset. When I reached home, I drank some water and tonated with Orange. The trouble was not in my stomach, but, the Appendix. I put ice on my side and later tonated with Turquoise. I called J. N. and she advised Turquoise and Blue. I was out of work ten days. Then I went and happened to cut my Finger, but one Tonation took care of that. On top of that, I had a Cold and my Kardoscil was 114. Two Tonations of Turquoise and I felt much better. I have a slight Cough, but, I know that will soon be gone.

Deputy—No Medical Doctors, no Penicillin?

J. J. (laughing)—No, nothing like that. J. N.'s advice and Spectro-Chrome did the job.

Deputy—Any Inflammation, regardless of name, shows a predominance of Hydrogen in the Body and the Remedy is on the Ultra-Green. I recently read where scientists said that future generations will be born without the Appendix—we shall have no further use for it! Figure that one out. God creates the Body, but man is now convinced he can improve on it! Forget all these "Miracle Drugs" and follow our true Science. No man can ever improve on Nature. Talk to any young man coming out of College today, he is convinced he can—they know it all—at least they think they do. People permit Surgeons to remove Organs from their Bodies and then they expect to regain their Health. Remove the gears from your car and see how far it will go. Stay away from Medical Doctors. If you have a Bone to be set or a bad Cut to be sewed that is all right, but after that, you have no further need of them.

L. S.—My husband had a Heart attack. Within two days he was feeling better; we used Spectro-Chrome.

Deputy—We have a man at the shop about 64 years old. He has never been sick in his life and I do not believe he missed a day in 34 years. A few days ago, he complained of a Pain in his Chest. One of our Affiliates told him about Spectro-Chrome and he had him almost convinced to try it. Unfortunately, the Foreman cannot see anything in healing by Color and talked him into going to the Ford Hospital, which he did. After all sorts of Tests had been made, he was informed he had a bad Heart. He was advised to leave town for a few weeks and take a rest. One day after he returned to the city, I was talking to him and in our conversation mentioned the death of another old worker. "Yes," replied this elderly man, "the way I feel now I'll be next." I tried to tell him the Pains might be Gas Pains, but it was hopeless. The Medical Doctors said he has a bad Heart and that is that. The way he feels now, I give him about 3 months. There is nothing like Magenta for Heart Disorder.

G. S.—We had our Equipment with us at our Summer cottage. My daughter is tonated regularly. My Mother tonated Yellow for two days. She had complained of a burning sensation during Front Elimination. Condition cleared. She was certainly surprised with the quick results. In spite of that and also the way we feel about Spectro-Chrome ourselves, we can not get my father to use it. He definitely needs it, because, he has

trouble with the Eliminations. My son has had only one Asthma attack this year and the Hay Fever is not as bad as in previous years.

Deputy—Continue with your Tonations and you will see results.

G. S.—That is the trouble; as soon as we begin to feel better we slip up on our Tonations.

Deputy—That is the common complaint of most of our Affiliates. We must remember a run down condition can not be normalated within a few Tonations. It takes time. Advertising tells us Aspirin relieves Headaches, but, we are not interested in just relief; what we want is Normalation. Stay with Spectro-Chrome and you will get it. I stopped renting my Equipments to people with Asthma, Sugar Diabetes or some other Disorder of long standing. It takes time to bring about Normalation and they do not have the patience to wait. Not only that, but, I warn them about cleaning the Thermocept, but it is no use. I have given them an Itisation, made out a Chart for about 15 weeks ahead, yet within 3 or 4 weeks they come back and say "it does not work." What do they expect? If Spectro-Chrome does not work, the fault is theirs and not of the Machine.

W. K.—I had a Backache with a great deal of Pain. Two "shots" of Indigo and I had no more trouble. Speaking about dirty Thermocepts, I remember speaking to Dinshah about that and he said "fill the Thermocept with water and add one-half teaspoonful of vinegar; leave overnight or for several hours. Rinse and use as usual."

Deputy—I use Distilled Water and have no trouble at all.

An Affiliate—Is Dinshah against drinking Distilled Water?

Deputy—I do not know about that. Suppose we ask for a comment from the Principal Office. I have been reading a magazine entitled "Organic Garden" in which it cites the danger to our soil by constant fertilizing with Chemicals. It has been found that soil becomes run down when fed with Chemicals over a considerable period of time and is also infested with Parasites. We have no one to blame but our "Scientists", who in turn are backed by our Government. Our soil can become corrupt through wrong care, just as our Bodies become corrupt through wrong eating. Soil poisoned means food poisoned, and in turn the Body is poisoned. It looks like we may have to grow our own food if we want to be sure it is clean. If there are no more Case Reports we shall begin with our Educational Program. I believe the Recorder wants to say a few words.

Recorder—Did anyone read "Life" Magazine dated August 18, 1947, Page 123?

B. N. raised her hand.

The Recorder then read a brief article from that Magazine pertaining to "Quack Medical Devices". One of the Devices, sadly observes the American Medical Association, is by one Dinshah P. Ghadiali who has charged $750.00 for a "Graduate Spectro-Chrome which he claims would stimulate the Pituitary, energize the liver, build hemoglobin and promote digestion, to say nothing of killing worms."

An Affiliate—Some one should write in and say it does just that!

The Recorder next showed the Affiliates a book she had come across recently entitled "Healing And Occult Science" by Dr. J. Croiset van Uchelen. Dinshah's teaching is mentioned several times in this book. Concluded the Recorder, "We must remember Dinshah is a well known Scientist. We are so used to addressing him as Colonel Dinshah, but his full name is Colonel Dinshah Ghadiali."

Deputy—Yes, some day this work will be recognized for what it is.

Albert Greenham, Sub-Deputy, then began the Educational Program. He introduced five new Affiliates. They were greeted with applause.

Sub-Deputy—While I agree with the Deputy about the soil corruption et cetera, we must also remember that within us there is a "Chemist" who knows how to take care of conditions like that. I remember reading that in Chicago I believe the year was 1923, two men were sentenced to die. Medical men wished to make a Test and the condemned men were told if they took this Test the Sentence would be commuted to Life Imprisonment if they lived! The men agreed and each was given a vial containing Diphtheria Germs enough to affect a large population! They drank the contents and nothing happened! There is something powerful in all of us that has the final word.

L. R.—I did not give a report tonight. I have had my Equipment since January and am taking Tonations regularly, but, my Hay Fever is still here.

Sub-Deputy—Do you have Hay Fever now?

Affiliate—Yes, I do.

Sub-Deputy—Well, I saw many cases of that Disorder and I must say you look very good to me. (Laughter)

L. R. (laughing)—You should see me sometimes.

J. N.—What about her food?

The Affiliate gave a list of foods and also her food eaten that day. She admitted she was not strictly on Rational Food Of Man, but was close.

B. N.—Starchy foods are bad and aggravate that Disorder. Better stay with Fruit and Fruit Juices and cool Salads.

Several Affiliates offered suggestions.

Sub-Deputy—We have two courses open: either we work with Spectro-Chrome or put up with the Disorder. Remember, it is her Hay Fever and not any of yours (Laughter). Seriously though, I should advise following strictly the Rational Food Of Man and tonating faithfully. Hay Fever can be normalated but it takes time. We can never harm ourselves; we are only working with the Visible Side of the Spectrum, the side that supports Life. Use Spectro-Chrome as you are taught, taking Tonations at the correct Favor Period which is very important.

G. S.—How does Dinshah decide on the Time Schedule and can it be explained simply? I am asked that question many times.

The Sub-Deputy gave a brief explanation, including Junction Period.

J. N.—We must always remember this is a Science and can not be discussed in a few words. Dinshah explains that in detail in the Class that he gives.

Sub-Deputy—Yes, it is all in our Encyclopaedia too.

J. N.—I took the Course twice. I had a hard time believing the Nares do not breathe together. Many a good discussion I had with the Colonel. I lived near a skating pond and one day I went down and watched the children skating. I tried to watch two boys, but, they were breathing through their mouths also. I went back another day and found a little boy I could watch. I stayed until the Junction Period and I was convinced. This is the most marvellous System Of Healing—a True Science. (Applause).

Sub-Deputy—How many have read our Encyclopaedia?

Many hands were raised.

J. R.—You should ask, how many have studied it? (Laughter).

R. G.—Everytime you open it you find something new. Could we ever have a demonstration of the Breathing here. I am referring to the Junction Period.

J. N.—Dinshah explains very clearly in his Class work, but it is not for us here. Many people come to the city and give "Breathing Exercises" but, these "Exercises" are harmful, not helpful. It would be better to take the Course with Dinshah himself.

Deputy—Before the Meeting closes, did you notice that our Governor Kim Sigler of Michigan vetoed the Bill, that would have made Vaccination compulsory for every child entering school?

All agreed it was a splendid move.

Sub-Deputy—Vaccination, Penicillin and the so-called "Miracle Drugs" can not stand beside Spectro-Chrome. The inventor of "Twilight Sleep" died not long ago and he said once: "If I have anything to regret, it is that I brought forth Twilight Sleep:" We have one man in this Country—one in 140 million—who has the fortitude to stand up and tell all: "You are wrong and I can prove it"; that man is Dinshah. He needs our help today, let us show him we are behind him all the way. The first prerequisite is "Know Thyself", you do just that when you take up the study of Spectro-Chrome Metry.

EDITORIAL REMARKS

Taking wagers and betting are gambles and I never do it. Surely, Albert, by my non-betting habit, saved $100 in his pocket!

Unless a reasonable number of Students pledge Enrollment, I can not bring or make a Resident Class in your or any other city. The expenses and the time and labor involved are too great to risk.

Those who are ready for Spectro-Chrome, need no persuasion. They will approach themselves. Those who resist, let them alone. The Deputy did right in not hiring Equipments for "experiments". The refractory mental attitude, reflects adversely on regaining of Health.

All our Thermocepts now are of heat-tempered glass; we discontinued Aluminum Thermocepts long ago. Contribution $3.00.

The agricultural situation in America and Europe is senselessly stupid. The Scientists are howling about Bugs and Beetles, the same way as the Medical Doctors are nutty about Germs, Viruses and Serums. None goes to the root of all the troubles. Just stop hunting the Birds. Those Bugs and Beetles which are the pests of agriculture, are the food of the Birds, but, by indiscriminate shooting, the balance of Nature was disturbed and now as Remedy, the wiseacres are shouting about spraying with D.D.T., Mercury Chloride, Arsenic and a host of downright Poisons on the vegetation. Have not they the knowledge that the leaves of Plants are the Lungs and breathe? Can not those numskulls comprehend that there must be some absorption of those vicious Chemicals into the body of the Plants, thus poisoning the eaters? It is that policy of killing Birds that started the downward cycle of Agriculture and until all accept the Rational Food Of Man system, more Medical Doctors, more Hospitals and more Relief Funds will be needed in increasing ratio. That is just what our Opponents want; it is that which fills their pockets.

All articles in newspapers—the prostituted henchmen of our Oppon-

ents—will be answered by me at the appropriate time. Their silly, adverse criticisms bring in more inquiries, because the people want to know who such an arch swindler and faker is and how he stayed where he is for 27 years. Americans are always the friends of the underdog. I laugh at all of this hullaballoo, as it proves that after all there IS something in Spectro-Chrome, of which they are afraid. $50,000,000,000.00 Investment is at stake! Just wait, watch and keep silence.

The writer of that book which mentions my work, was in California at one time our Student. He is not now affiliated.

L. R. sent only her initial General Advice Chart over a year ago and never reported since. We are here to serve. She has much to change in life.

G. S. should come to Malaga, sit in the Office for a whole day and see how the Time Schedules are made. It needs numerous data and understanding of natural phenomena and is really a "labor of love."

Your Governor Kim Sigler of Michigan, showed great wisdom in vetoing "Compulsory Vaccination." It is the curse of civilization and I am opposed to it emphatically. Keep the Blood pure and uncontaminated with Pus and Filth. I wrote to him and sent him a copy of "Family Health Protector." Distribute that one book as much as you can. Contribution only $1.00 for 4 copies.

"Twilight Sleep" is a Poison to the oncoming baby; shun it and bear the joys of a clean motherhood.

FIRST ST. LOUIS MISSOURI PLANET

(MUSICIANS' CLUB, 3535 PINE STREET)

Meeting Of Thursday, September 4, 1947.

NO GIFTS TO DINSHAH FAMILY RULE HAS NO EXCEPTIONS

Reported By:—VIOLA C. JEUDE, *Recorder*

Deputy Clemens M. P. Neumann was in the Chair; 60 Affiliates were present. Communication from the Principal Office was read, with remarks and explanations; the Deputy also read " "It's A Girl for the Ghadialis. First After Seven Sons, And Her Father is 73 Years Old." from the Vineland News of August 24, 1947.

Deputy asked if there was any question.

Sub-Deputy—Dinshah is a stickler for boys, but, no doubt Irene did her best!

T. P. said she would like to send Dinshah her best wishes and wish Irene the best of luck on the "New Baby Girl."

Deputy asked the Affiliates if they wanted to pass on T. P.'s kind wishes for the Dinshah family. They assented. It was voted on and unanimously passed.

An Affiliate suggested sending the Baby a gift.

The Recorder said it was not permissible; that was against the By-Laws.

The Affiliate said this gift was for the Baby.

The Deputy explained the By-Law 68 and said if any one wanted to send a gift, it would be accepted if sent to the Spectro-Chrome Fund.

The Deputy told the Affiliate that Dinshah looked very well and his wife looked wonderful, also about the new Experimental Apparati. He said the movement is under way whereby Wisconsin, New Jersey and Missouri will soon make Spectro-Chrome in each State respectively. The Educational Program was then begun by Sub-Deputy Charles H. Stiermann.

H. G. said she looked into Webster's Dictionary and found Red, Yellow and Blue can be made into White Light.

Deputy—They use pigments and this may be true with pigments which is paints, but, they cannot prove this with Light and we deal with Colored Lights, that they tried to prove this in the Trial against Dinshah, but, when Dinshah asked to test the apparati, he found that they had been using a Diffraction Grating and tried to cheat and disprove his theory.

The Deputy said an Affiliate had shown him the American, August 1947 Magazine, "Color Chases the Blues Away." He said while he has the Magazine at home he had not read the article. He asked A. W. if she would bring the magazine to him. She told him to read page 129. He read as follows:—

> "And we haven't seen anything at all, he says, when it comes to functional Color. While he has learned some few facts about it, and put them to work, there is still not one university in the world doing really comprehensive research on the subject. Some individual Psychologists, psychiatrists and ophthalmologists are giving more attention to the Therapeutics of color than ever before, but a deep veil of mystery still colors most of its properties; as this veil is penetrated, Color may be used to perform all kinds of miracle undreamed of today. It may be used to heal the sick, prolong life, and change the emotional attitude of Nations. Faber Birren has advanced only a short distance, he feels in his work of harnessing the rainbow. He sees magnificent opportunities for those who wish to follow him."

Deputy—Faber Birren says "He sees magnificent opportunities for those who wish to follow him." He should follow us or better still Colonel Dinshah who has already harnessed the Rainbow over 26 years ago. But putting all jokes aside, give the man credit for thinking if he has not heard of Spectro-Chrome.

Going through Chapter 25 of our Encyclopaedia, "Mysterious Mogen David," the Sub-Deputy explained how David selected smooth stones and placed them in a sling, (demonstrating with handkerchief how stones were placed in the sling) twirled the handkerchief, let go and the stone went forward with the rapidity of a bullet pierced David's adversary's Head and he slew him.

Sub-Deputy in drawing diagram 29 "Elucidation Of Removal Of Indigo Color" referred the Affiliates to Figure 5 "Perfect Circle Of Seven" and explaining the Corpuscular Theory of page 96 and comparing this with the Chlorophyll of plant life.

Deputy said he would like to add at this point that the Chlorophyll of Plant life (which is the life of the plant) is closest to Blood, that if the Magnesium in Chlorophyll were removed and Iron substituted you would have Blood.

Sub-Deputy said he could not understand why, so brilliant a man as Edwin D. Babbitt did not discover the true Primary Colors?

Deputy said it might be proper at this time just to pass along a thought that the Recorder expressed to me the other evening. "That it did not surprise her about the difference in the opinions in Color, that anything that is first discovered is usually used in destruction or the material side of things before it is utilized for good. Babbitt proved no different from the rest. In considering the Triangle of the Mogen David the Apex of which points down (Represents Matter or the Material side) and the Colors, Yellow Blue and we call the third Magenta, (But those not trained in Spectro-Chrome would call it Red.) Then along comes Dinshah who upsets the Color Theory and tells that Red, Green and Violet are the Primary Colors or according to the Mogen David the Triangle with its Apex pointing upward represents the Spiritual side; there is always a clash between Matter and Spirit. But, Spectro-Chrome will win. (Spirit always does in the end.)"

Deputy read Good Thought of August 23rd "Liberty" on the Birth Date of Shireen.

Question—Would Spectro-Chrome heal a Cataract of the Eye?

Deputy—If not turned into a stone. Incipient Cataract may be benefited.

Question—Why is it when you look into the Sunlight you sneeze?

Deputy—I don't know; I cannot answer that question, but, Dinshah says you sneeze when there is a slight irritation. You may also sneeze when you tonate and you can rest assured that is the turning point and you will normalate.

Affiliate—When my son washes his Face or his Hair he sometimes sneezes 8 or 10 times.

Affiliate—Is it true in Operations the same as in pruning, that the Celestial Planets had certain effects? I discovered that pruning at certain times causes the Plant to "bleed to death." Would this have the same effect on the Human Body?

Deputy—Yes. That is the High and Low Critical Period.

N. B.—Pruning should be done in the Full Moon Period as then the sap is lowering in the trees, whereas in the New Moon period the sap is rising in the trees.

Nathalee Britton said she would like to say a few words. She was pleased and happy to hear about the Sweet Bundle Of Pleasure And Love that arrived in the Ghadiali's family. She also wanted to say how grateful she was for Spectro-Chrome, that when her husband got beyond her control and the place where she could not take care of him at home, the Medical Doctors in taking the history of the Case could not account and were amazed and said "this Man is living on borrowed time for the past seven years," so I am thankful for Spectro-Chrome and have witnessed the passing of some who knew nothing of Spectro-Chrome and some who used Spectro-Chrome and there is a marked difference. Facing the Affiliates she told them they did not know how fortunate they were in having Spectro-Chrome and let no one persuade them in giving it up.

The Deputy then introduced Nathalee Britton and informed those Affiliates who did not know her, that she was a Past Sub-Deputy acting in the capacity of Deputy for more than a year. He informed Nathalee that when he arrived at the Institute he had just read the Report about her husband Earl and was very much put out, in fact had quite a long talk about Earl. He requested her to see him after the Meeting.

EDITORIAL REMARKS

Our By-Law 68 and Article 9 in our Constitution are explicit about Gifts. Furthermore, the Dinshah family has a strict rule against receiving any Gifts. WE GIVE, NOT TAKE. Do not, therefore, send any such Tokens, because. they will be *returned.* The Rule has NO EXCEPTIONS. Thank you just the same.

There is no objection to drinking Distilled Water, except that it is flat in taste and generally airless.

Our Primary Colors are based on Radiant Energy Principle as Red, Green, Violet. The Red, Yellow, Blue is for Pigment, Paint and Printing.

Faber Birren deserves credit and he may soon know, that his dream of Healing By Colors, was actually precipitated onto the Material Plane 28 years ago. So goes the World!

David must have known about the effects of Inertia, Momentum, Motion, Time and Space, when he killed Goliath.

The Chemical Formula of Chlorophyll A is C55 H72 O5 N4 Mg and that of Chlorophyll B is C55 H70 06 N4 Mg. A is Bluish Green, B is Yellowish Green. While the Carbon, Nitrogen and Magnesium Atomicity remains the same in both, the Hydrogen and Oxygen are in different proportions, hence, the difference in Color characteristics. As you go deeper into a consideration of Atomic Composition, your mind will become more clear and more impressed about the Truth in our Science.

Edwin Babbitt had a more brilliant mind than mine, but, I had more experimental facilities in the 7 institutions of learning, in Bombay, Hindustan, where I was permitted or received as Experimental Demonstrator in Chemistry and Physics. Here are the names of those institutions:—

1—Private Class of Professor Dadabhai Khurshedji Kateli.
2—Private Class of Sorabji Bamboatvalla.
3—Proprietary High School.
4—Fort High School.
5—Chandanwadi High School.
6—Elphinstone College under Professor Nanabhai Ardeshir Moos.
7—Wilson College under Professor Dadabhai Khurshedji Kateli.

Those seven, besides my private Laboratory. Edwin Babbitt's book started me on the path; he, therefore, was one of my teachers in every true sense.

An Incipient Cataract or one just starting to form, is remediable by Spectro-Chrome, but, one already formed may not disappear. That is in the field of Constructive Surgery.

If the Laws of Gravitation be true, what may influence masses of water in the oceans must exert similar influence on the Plant Sap and Blood Circulation. It took around 14 years of cogitation, for me to formulate the Favor Period System.

FIRST NEW YORK NEW YORK PLANET
(YORKVILLE CASINO, 210 EAST 86th STREET)

Meeting Of Thursday, September 4, 1947.

Successful Use Of Spectro-Chrome In:—Fever, Swelling, Imbackelim, Burn, Pain, Poison Sumac, Pomples, Athlete's Foot, Waspbite.
Message For Shireen Dinshah.

Reported By:—EMMA C. HAITZ, *Recorder*

Deputy Lina Fischer was in the chair; 113 Affiliates were present. Two Affiliates were denied admittance, because, they did not have their Affiliation Cards.

The Deputy read the communication from the Principal Office. As the Deputy read the announcement of the Birth of Shireen, a chorus of "Ah's" ensued from the Affiliates. The Deputy asked, "Who wanted a boy?" No hands went up! "Who wanted a girl?" All hands went up!

The Good Thought for August 23 entitled *"Liberty"* was read by the Deputy as follows:

> Liberty, above all we acquire
> By our own exertions or what passes
> To us through our gracious ancestors
> Is the most precious of human heritages;
> It consists in freedom of thoughts, words
> And deeds; common sense, however,
> Restricts its exercise to one's rights,
> Without encroaching on those of others.
> Liberty, is not
> License unlimited; it ends
> Where the tip
> Of my nose begins.

Deputy—Live and let live—that is the way we should live. If everyone would feel that way, we would not have any War. There is nothing good or bad, but, it is our thinking which makes it so. The bad thinking is what takes the liberty away from you. I conquered many things since I am with Spectro-Chrome, which I could never havc conquered before. Stick to it and learn by it and you will conquer the same way. When you are emotionally upset. there is something in you and you are not free. Use your Magenta and you will see what a free mind and free thoughts you have.

It was suggested by the Sub-Deputy and agreed by the Affiliates that the following sentiments be our message of congratulation on the Birth of Shireen:—

> "The Affiliates of the First New York New York Planet, present at the September 1947 Meeting, send their heartiest congratulations and wishes to their beloved teacher Dinshah and his charming wife Irene, on the happy occasion of the Birth of their daughter Shireen.
> May this youngest offspring of the Dinshah family grow up to be as sweet and beautiful a child as her name suggests—an ever new source of joy and pride to her father, of happiness and comfort to her mother, of love and affection to her brothers."

Case Reports followed:—

H. M.—I was a very sick woman four weeks ago. I could not get up one morning and had high Fever. My Neck was swollen and felt as if I had swallowed a piece of wood. I started tonating with Turquoise, but it did not help. Then we tonated with Yellow on Areas 6, 7, 8. 9, 10. After three days, the Bowels moved. We used Orange on Areas 1, 2, 3, because, there was a Swelling and it had to open. I didn't eat for a few days. Spectro-Chrome was something out of this World. Our Deputy was also close by and helped me over everything.

Deputy—Evidently, there was no Diagnosis; but, there must have been an Abscess or something there. I even recommended calling Dinshah. She had 104½ Fever. I would not want to be any place without my Spectro-Chrome. I would not even like to visit friends if they had not a Spectro-Chrome in the house.

T. S.—I was frying Meat for the men in my family. Put water in the pan and put it on the stove. It boiled over as I was doing the dishes. When I picked it up it was boiling hot. I could not let it drop, so I put it back on the stove. My Hand looked like a grilled steak. I immediately took a Tonation. A Blister had already started to form. After one Tonation, the Pain disappeared, also the Swelling. My Hand shows no signs of the Burn and I only used one Tonation.

A. K.—My sister was in the Country. Her little girl got Poison Sumac. My brother-in-law is a skeptic, but, the first thing he got was Spectro-Chrome. She could not look out of her Eyes. We tonated with Magenta and Turquoise on Area 1. It was too cold up there to take it Systemic. It took about five days.

Deputy—Speaking of allergies, so many people have given Reports on Hay Fever lately. Some people say they have had the Equipment for so many years, but still get Hay Fever. They say they eat a *little* Meat and have not used Spectro-Chrome all year. It takes about seven years to change one's system completely. If you want to keep your Health, stick to the Rational Food Of Man and Spectro-Chrome.

T. S.—Is there any chance that one can get Protein Starvation?

Deputy—Yes, it has happened. It is a shame that it has happened. Many don't eat Rice, Split Peas and Lemonade. The first thing a Medical Doctor will tell you is that you are Protein starved. I am not Protein starved, neither is the Dinshah family and many others too.

A. M.—Our son M. has never been quite satisfied with the Country, so we sent him to Camp this Summer. He was happy. Three or four days after he was home, he had a Fever. Tonated with Turquoise and then Yellow. A week passed—all of a sudden he got Pimples all over his Face and Arms and he had a Fever again. We gave him Yellow for three or four days. We asked him what happened. He said they made him eat Meat at Camp.

C. V.—My boy was away at Camp for eight weeks. I told them he had to have Vegetables and plenty of milk. He had French Toast and became sick.

F. C.—About Proteins—Legumes have more Proteins than Meat.

Deputy—I recommend everyone to become interested in the Human Body. Get some books on Anatomy and read them. Compare it with your Spectro-Chrome Metry Encyclopaedia. First study your Spectro-Chrome Metry Encyclopaedia and then study what the other side has to say.

E. H.—I have two books from Germany and there even the Doctors say Meat is no good for you.

Deputy—If you get the same information from another source you believe it.

M. F.—I had an experience last Sunday. We went to Bronx Park. My sister was constantly annoyed by Flies, but, they did not trouble us. I told her it was because she ate Meat and we did not.

A. K.—People often get Athlete's Foot in the Summer from going swimming. I had it once and took two Tonations of Lemon and it was gone.

A. M.—I used Cocoa-nut Oil and in two days it was gone.

M. G.—I got six Bites from a Wasp. My Leg swelled up terribly. After two Tonations of Turquoise, it was all gone.

Ten new Affiliates were introduced and greeted with applause. Turning to the new Affiliates the Deputy said: "I hope you people come to the Meetings regularly. You need the education and I want you to report your cases. If you do not come to the Meeting, you will not get your Magazines. You are new, you know very little about Spectro-Chrome. If you do not know, get up and ask about it. That is for what this Planet is. Don't do what the old Affiliates do—just sit there. You set a good example."

It was asked by a new Affiliate, H. M., if there are any recipes for cooking the foods. The Deputy explained that the Cook Book was in progress and that we look forward to having it some day.

Deputy—Do not forget the change in time on September 28th. You will take your Tonation then according to the Favorscope without adding the hour.

K. G. and H. M. who attended the recent Class in Orange, New Jersey both stated they enjoyed the Course very much, but that it was finished too quickly. They wanted a longer Course.

The Deputy read an article from "Consumers Research Bulletin" regarding the seizure of the Equipment in the recent Portland, Oregon case. It stated in the article that "the ailment of the user was aggravated by failure to consult competent medical authorities."

The Deputy asked the Affiliate how they would like to have Dinshah for their Deputy. All are greatly in favor.

Chapter 48 "Spleen As Gateway" from our Encyclopaedia was begun and discussed.

F. H.—I read an article written about the Aura by a Doctor. He said it was bad for children to sleep with older people because, the older people take the strength away from the children.

The Meeting was enjoyed by all and it is sincerely hoped that the new Affiliates will continue to come to the Meetings. Again, our heartiest congratulations to Dinshah and Irene on the birth of Shireen.

EDITORIAL REMARKS

Cordial thanks for the loving wishes about Shireen (Sweet). The sentimental appreciation, was worth more to the family, than all material wealth as Gift.

Once Infra-Green and Ultra-Green Divisions are thoroughly grasped, selection of Atcowa for Tonation becomes very simple.

You have a gem of a Deputy, whose sole aim is to help you to help yourself.

Skepticism has its place, but, condemnation without investigation is not sensible.

Hay Fever of many persons is traceable to their Feather Pillows, Furs and Sheer Hosiery. Eat the Rational Food Of Man and discard the stated materials and your vitality will stay so high that Disorders will rarely be encountered. The true cause of such attacks as "Hay Fever", is purely mechanical—pollen or sheddings of minute, irritating particles.

Sneezing is Nature's effort to restore the Equilibrium of the Two Chains of the Great Sympathetic Nervous Eystem as well as to expel foreign disturbing particles.

Our alleged Civilization is a mere mask. We still eat the same carcasses of Animals, still kill living creatures, still eat the same malodorous Fish, still gulp the same stinkpots of Eggs which are nothing short of Poultry Menstruation. still go to War for money, still have the same Slavery in the shape of Military Draft, still take pleasure in becoming intoxicated and act like fools, still blow rings with filthy Tobacco and call it fashion—we are nothing but a batch of hypocritical morons, who can not see beyond the tip of the nose. Civilized indeed! We grabbed the Country from the Red Indians and in return for their hospitality and generosity, handed them the Whiskey Bottle to make them blessed with Tuberculosis.

Having Dinshah for your Deputy is a good suggestion. Well, if I stay out of imprisonment and you go over the top with attendance larger than that of your Milwaukee Planet. I might give the matter some consideration. However, you might feel later sorry for it, because of my disciplinary methods.

—o—

DINSHAH IMPARTIAL

The Universe Through The Eyes Of Dinshah
"I Fear No One; Only God Above And Conscience Below And From Them I Have Nothing To Fear."—Platform Since 1891.

GAS FOR MOTHERHOOD

Reporting in the New York Journal-American, a United Press correspondent asserts that the United States Department Of Agriculture Scientists found some very novel facts: "A whiff of Anaesthetic Gas turns a virgin queen bee into a mother without the benefit of a mate." The gas used was a Carbon Dioxide Anaesthetic and the Agriculture Department is excited beyond expression. The statement was made that: "Her offspring will all be males, known in the bee world as drones. These fatherless sons can be mated to their mothers, the still-virgin queens, to produce generations of super-bees."

What a marvel of Entomological Research! One step forward and girls working in Dental Offices, as well as Nurses working in Surgeries, will be in danger by Anaesthetic Gas! The report came from Washington, D. C. where any marvel may happen, but, for the good name of our beloved beauties, I hope they will find some error in the Science. Yet, as America abounds in Drones, the eventual outcome is difficult to predict.

X-RAYS AND RADIUM CAUSE CANCER

I printed in Spectro-Chrome of June 1922, about "Areas Fatal In X-Ray Work" and in our Spectro-Chrome Metry Encyclopaedia, in 1934, in Volume 2, warned fully about the "Dangers Of X-Rays And Radium." Now comes Bob Considine, a columnist, who writes in New York Journal-American that: "X-Ray, an established treatment for Cancer, can also cause it if improperly used. So can Radium and a group of Chemicals and Chimney Soot . . . Cancer is the uncontrolled growth of Cells, the failure of one part of the system to put brakes on the normal growth of Cells . . . There are no quick cures, despite what you might read here and there. Surgery, X-Ray and Radium remain the only accepted treatments. When another is found, the news will be emblazoned across the front pages of every newspaper in the land." Is that so? That "cure" will never be found while we continue to eat animal carcases and as far as the "another" is concerned, that has been actually in existence 28 years, but, there will be no emblazonment until the newspapers are released from the grip of the Medical Octopus. The Chimney Soot Cancer is easy to explain. It contains Creosote, which is damaging to Tissues. Read the Article on "Coal Tar And Cancer" in Spectro-Chrome of July 1922 and the Editorial Remarks about Bromo-Seltzer, containing Acetanilid or Antifebrin (a Coal Tar Compound) and Antikamnia.

—o—

ANSWER TO WILLIAM R. OLSEN

WHAT FRIEDA WEHRHAGEN THINKS

I am in perfect agreement with him. You told us in Class that God gave you this wonderful work we call Spectro-Chrome. "Don't give me the credit; thank God; He helped me; He will help you." First Chapter of John says in verses 1 to 3: "All things were made by Christ." (Ed. note: She mixes the word "God" with "Christ".) Help will come by fully trusting in the Creator.

WHAT FIRST ORANGE NEW JERSEY PLANET THINKS

The opinion of the entire First Orange New Jersey Planet, in regards to a letter sent to Dinshah, by William R. Olsen, from Portland, Oregon is, that it is very evident Olsen has never been in close contact with Dinshah or he would never have wirtten what he did. It is far from fairness to state, that, Dinshah should have a "proper relationship with God." During our Resident Experimental Course every session was opened by a prayer and also a religious song by the good Colonel. Furthermore, he made many references to the Bible, also quoted many verses and phrases, which only one acquainted with the Bible could quote. The Affiliates were astounded at his knowledge of the Bible. In the opinion of the entire First Orange New Jersey Planet, there lives no one, who in our humble opinion and estimation, is more God-fearing and also cognizant of God, than our loyal and esteemed teacher Dinshah.

Lothar O. Klenner, Deputy.
First Orange New Jersey Planet.
