In course of life you reach a time,
When Doctor, Lawyer, Priest alike,
Does fail to give the sought relief,
To troubled mind or burdened heart—
Then come to me;
I help you to help yourself.

Spectro-Chrome Institute

Central Office and Experimental Laboratory

2401 NORTH BROAD STREET

Philadelphia, Pennsylvania

UNITED STATES OF AMERICA

(Numerous Branch Offices)

Incorporated under the Laws of the State of New Jersey. Authorized for the transaction of business as Foreign Corporation under the Laws of the States of New York, Pennsylvania, Illinois, Maryland, California, Ohio, Michigan, Indiana, Delaware, Rhode Island, New Hampshire, Connecticut, et cetera.

CHARTER

The main objects as set forth in the Charter of the Spectro-Chrome Institute are:

The instruction, advancement and practice of Spectro-Chrome Therapy and the research, development and pursuit of such sciences as may assist in the equipment and application of Spectro-Chrome Therapy or the restoration of the human Radio-Active and Radio-Emanative Equilibrium by Attuned Color Waves, without the use of drugs, manipulation or surgery, in accordance with the system conceived, originated, developed and applied by Colonel Dinshah P. Ghadiali, M.D., D.C., Ph.D., LL.D.

The building, equipping, establishing, conducting and maintaining of schools for the investigation, instruction, demonstration and practice of Spectro-Chrome Therapy; also the power to confer and grant the degrees of Spectro-Chrome Therapist, Master of Spectro-Chrome and the like, and to issue diplomas and titles in connection therewith.

The corporation shall also have power to use, manufacture, sell and dispose of, in any way, all means, publications, appliances, instruments or products that may seem fitting or in any way connected with such purposes or objects aforesaid.

INSTRUCTION

Spectro-Chrome Institute conducts complete *resident* courses in Spectro-Chrome Therapy in a number of cities each season. Each course, comprising 24 discourses, is delivered personally by the Originator of the System with demonstrations and experiments. At the end of the course, students passing the examination are granted Diplomas.

There are *no* correspondence courses.

Spectro-Chrome Institute creates no "Doctors," and its graduates have nothing to do with "the Practice of Medicine." Its motto is:

NO DRUGS—NO MANIPULATION—NO SURGERY.

PERIODICAL

Spectro-Chrome Institute through its own printing plant, publishes a lively monthly magazine, SPECTRO-CHROME, edited on broad and progressive principles, by its President, the Originator of Spectro-Chrome Therapy. It is an absolutely fearless, independent, unbiased publication, ever ready to enunciate the Truth, without restriction or reserve, for the service of humanity.

EQUIPMENTS

Spectro-Chrome Institute manufactures all the Equipments and Supplies for the practice of Spectro-Chrome Therapy, the Latest Revelation in the Healing Art.

DINSHAH'S PLATFORM AS ADOPTED BY HIM SINCE 1891

The Boundless Vibratory Ocean of Thought is Essentially Universal and All-pervading; it is the Individualized Monopoly of NO Person, and is the Common Heritage of Humanity's Evolution: thus, what a Development of Unrevealed Ages has given unto Me in the Form of Knowledge in My Present Incarnation is No Distinctive Acquisition of Mine for My Sole Use, Benefit or Elevation, but is All for Thee and Is Thine Without Condition, Without Obligation, Without Expectation. I Fear No One; Only God Above and Conscience Below, and From Them I have Nothing to Fear.

Attuned Red Wave

(The World Through the Eyes of Dinshah)

A SURGEON DEFINES A SURGEON

A friend Spectro-Chrome Therapist sent me the following from New Jersey. It is vouchsafed by him for the truth and has a grim humor attached to it. He says:—"In the year 1909, speaking before the Northwestern Medical Society of Philadelphia, Pa., Dr. John B. Deaver made the remark 'Every surgeon, before he is fit to operate on a human body, fills at least one graveyard; I have filled several'!"

Good luck to the surgeons and to their destructive methods. Spectro-Chrome Therapy saves their patients from approaching the graveyard prior to time allotted.

LIBEL ON OUR CONSTITUTION

A report comes from London, England that Ex-Governor William Sproul of Pennsylvania stated there in an interview that the death of President Warren G. Harding was hastened by Prohibition. He is reported to have said, "I think President Harding's death was hastened by the fact that he thought it his duty, because of Prohibition, to set a public example and abstain from the use of liquor. He was accustomed to take an occasional drink of Scotch Whiskey. I was his personal friend and I know, and in that laborious trip to Alaska I am sure he missed it."

This is a surprisingly mean libel on the United States Constitution and a worse one against the worthy dead. If Harding needed Scotch Whiskey *to live*, not anything was there in our Constitution to prevent his five medical doctors from giving him that. To me such an utterance like Sproul's appears more inconsiderate in as much as it is reported from abroad. A responsible Ex-Governor like him speaking such words would hold us more in ridicule before the Europeans than a million speeches here. It is only a political catch-trap for pure gallery play. None died of Prohibition and the facts that millions going to jail cannot get their regular dope and yet live through it is a standing proof that the human body through its compensatory mechanism can get over such wrong habits in a very short period. Prohibition did *not* kill that good man; it was purely the insufficiency of old-time scrap-heap type medical "science" that was responsible for his early death; nothing published shows otherwise.

MORE CANCER IN GREAT BRITAIN

The Ministry of Health reports that in two generations cancer has increased threefold and tuberculosis and other disorders have substantially decreased in Great Britain. The Committee on Cancer, which was recently appointed to investigate the matter, has reported complete ignorance as to the cause of the disorder or a remedy for it, but deprecated the use of quack medicines. I must admire the Committee for its frank admission, but shall be obliged if the worthy gentleman would please give a definition of *non-quack* medicines. Medicine and the medical art is one series of empirical quackery endeavoring to remove troubles whose origin they know nothing about. If they wish to abolish quackery, let the medical doctors shut their shops first. Cancer *will* stay as long as the butcher shop stays.

Spectro-Chrome Therapy *has* the sure remedy for Cancer; doctors of medicine *will* turn to Nature eventually.

ADRENALIN; NUMEROUS NAMES ALL SAME

The medical profession is going nutty over the wonders of Adrenalin. It was as early as 1897 that Dr. John Abel separated from the suprarenal capsules of animals the benzoyl-chloride of a base to which he gave the name Epinephrine. The Japanese doctor Takamine and the German doctor von Furth made a similar separation in 1901. Dr. Takamine patented his product and marketed it under the name Adrenalin. It is a light brown, micro-crystalline powder, almost white and its chemical composition is H_{13}-C_2NO_3. The doctors of medicine are exploiting it now as a "mysterious" preparation, but, it has been known and used during over 20 years under the various names of Supranephrine, Supracapsulin. Hemisine, Renalite, Adrenamine, Epirenan. Paranephrine, Hemostatin, Suprarenalin and the like.

Look into the physiological activities of this agent. A Spectro-Chrome Therapist need not be told twice that the substance in question would have a high influence on the blood through the large quantity of Hydrogen influenced by the less quantity of Oxygen. Hydrogen being Red and Oxygen being Blue, the resultant action in the case in question would pull the H toward the Violet base slightly, producing a Scarlet effect of raising the Blood Pressure. This is caused by the Vaso-constrictor influence of the Scarlet. The same credit that is given to such foul animal preparations will be given to Spectro-Chrome Therapy, in the near future, when its potentiality is better r e c o g n i z e d ; the reports of Spectro-Chrome Therapists are therefore requested. Please keep in touch with the Spectro-Chrome Institute.

THE GLORY OF GOD

The famous Persian poet Sheikh Saadi wrote:—"Look at this cupola studded with gems, whose vault stands firm without a supporting pillar." Recent investigations have measured the sizes and the distances of the various prominent stars and established the following as being near correct within pardonable error limits.

Star's Name	Distance in Miles (Approximate)	Diameter in Miles (Approximate)
Antares	2100 trillions	382,000,000
Betelgeuse	1055 trillions	242,000,000
Alpha Herculis	1266 trillions	185,800,000
Gamma Andromedae	4750 trillions	163,000,000
Beta Pegasi	544 trillions	74,400,000
Epsilon Geminorum	2700 trillions	40,000,000
Aldebaran	306 trillions	32,000,000
Beta Andromedae	316 trillions	23,000,000
Beta Ophiuchi	826 trillions	20,200,000
Arcturus	200 trillions	17,000,000
Pollux	316 trillions	14,000,000
Alpha Arietis	510 trillions	10,000,000
Alpha Persei	950 trillions	9,000,000
Capella	244 trillions	8,360,000
Polaris	240 trillions	8,170,000
Regulus	630 trillions	3,000,000
Gamma Serpentis	260 trillions	2,400,000
Sirius	50 trillions	1,030,000

We do not know much about our One Small Sun and his potency (exemplified in us through Spectro-Chrome Therapy) is yet not widely acknowledged by the general medical and scientific world. What then must the power be in these giant orbs and what must the power be in the Universal Cosmic Energy—the as-I-call-it Cosmenergy, the Grand Architect of the Universe whom the religionists call God (in His various names) and whose existence material "science" has started the youngsters to doubt. Surely, there can be no creation without its creator, there can be no energy without its energizer, there can be no force without its exerter, there can be no action without its activator, there can be no universe without its Universal Causator to Whose External Glory the firma-

ment with its silently blinking gems stands as a monument. Bow down to the ground ye thoughtless gropers-in-the-dark: the only way to know Him and His Power is through a thorough study of your own self in accordance with the principles of Occultism as revealed in Spectro-Chrome Therapy, the only physical healing science that joins with the metaphysical in humanity.

CURE ONE DISORDER TWO

A remedy said to have been discovered by Dr. Louise Pearce of 535 Park Avenue, New York City, who spent four months in the Belgic Congo treating Sleeping Sickness, is now announced for disorders characterized by degeneration of Brain Tissue, such as Paresis. It is called Tryparsamid. Dr. Pearce is a Johns Hopkins Graduate and was the first woman to be appointed to the staff of Dr. Simon Flexner of the Rockefeller Institute. Dr. W. F. Lorenz, Dr. M. S. Loevenhart, Dr. W. J. Bleckwenn and Dr. F. J. Hodges of the University of Wisconsin have been working with this drug since 1919 and after enumerating their faith in its potency in the treatment of certain forms of Insanity, the professionals quietly state "We desire to emphasize the fact that tryparsamid possesses the potentiality of injuring the optic tract and should not be used in cases showing degenerative changes in the retina."

They are to be thanked most cordially for their sincerity in giving the final warning. A remedy that will disorder the optic tract which in itself is a part of the brain to be used for remedying brain disorders must certainly have *some* potentiality! And it is added that the said drug is not yet for sale. Ah! I breathe a sigh of relief on behalf of the poor sufferers, because the moment it goes directly on the market, the quack medicos will use it indiscriminately and Paresis will disappear in favor of accomodative blindness. Medical science is most assuredly a grand science without limit to its potentiality for ultimate damage to the vitals of humanity.

BULBS AND BREAKAGE

Each bulb and similar material supplied by Spectro-Chrome Institute is duly tested before packing and is sent packed securely in proper cartons or containers. However, once in a while, something is reported as broken, smashed or cracked and a claim made against us. Please understand that our responsibility ceases after delivery is made to the carrier and we do not entertain any such claims for compensation. Receiving a package, promptly examine it and in case of defective delivery at once file the claim with the carrier's agent at *your* end. *Then,* let us know and we shall send the necessary certificate of shipment.

Bulbs also are not guaranteed for their duration or life. If a bulb, after lighting will burn out quickly with a *white* deposit inside, while the tip is unbroken, it shows defect in manufacture and if returned *Express Prepaid* will be exchanged by us. Where the tip of any bulb is broken, *no* adjustment is available.

Bulbs, though we have the best manufactured, are like babies and are liable to cry on you at the critical moment. Busy Spectro-Chrome Therapists are therefore cautioned to keep a number in reserve, to avoid annoyance and delay. It is an investment you need in your work and buying them ahead will save disturbance of your routine.

Kindly place your orders in time. We always carry a quantity of our various bulbs in stock, but, sometimes when the factory delays the manufacture of special type bulbs, your order

may suffer unavoidable delay. Oblige us by ordering your requirements ahead of immediate need.

NOTICE TO GRADUATES BUSINESS ROUTINE DURING TOUR

AN OPEN WARNING

The usual business routine will be maintained during my California tour.

The mail will *follow* me.

All communications and telegrams—no matter to whomsoever addressed—are opened only by me. None has my authority or the authority of the Spectro-Chrome Institute to open mail, make payments, sign agreements or enter into contracts. Please therefore consult the schedule published and write, telegraph or telephone me either there or through the Central Office.

Broken slides may be very quickly replaced by sending them either by parcel post or Prepaid Express to my traveling address. I have arranged to keep in touch each day by wire with the Central Office and on receipt of your broken slides with the proper remittance, you will have replacement from the Central Office (or direct from me whichever may be convenient.)

No slides can be replaced by "handing over at the counter." All broken slide sets are personally examined by me before replacement. Slides for replacement must belong to the *same set.* If you have more than one set belonging to different equipments and have mixed the slides, return the *total* of the mixed sets for inspection and retuning.

There is much dissatisfaction expressed by a number of loyal Graduates because of my unyielding strictness in regard to slides. It is human dishonesty that is to be blamed. Here are three out of many cases that have compelled me to maintain this inviolable severity regarding slides.

1—A Graduate sent me five slides broken; I found they were of two different sets; should I accept them and send one new good set, his other set would be out of tune; I returned the slides as they came, requesting slides of the same set.

2—A Doctor of Medicine not a Graduate sent me four slides instead of five for replacement. When asked for the fifth he wrote his janitor threw the broken fifth away. The case is hanging further investigation. I cannot replace four and he cannot use without the fifth; yet the blame is thrown at me when he should be the one to suffer for his negligence.

3—A Doctor of Medicine, a worthy Graduate writes that the Graduates in his territory "are considering the use of other slides" (meaning imitation, spurious or non-genuine slides—in plain words "any old pieces of colored glass" which they in their judgment believe are "as good") if I do not open "a central service station" there and so on. I shall be obliged if they will also say that unless I run my business as it suits their views, they will stop practising Spectro-Chrome Therapy. Many Graduates who have ideas so suicidal, disloyal and dishonest to public interests and who believe they know more than their teacher, have been *known* to me to be using *false slides* and hoaxing their patients into believing they are using Genuine Spectro-Chrome Therapy. Such dishonest ones have been the main reason of my *not* opening such "service stations" at present, because, those in charge of the "service stations" will not be able to distinguish whether the broken slides returned for replacement belong to my system or are merely "any old colored glass." Until I succeed in training the suffering public to recognize the necessity and demand the use of properly matched slides, my strict policy will

not change. I prefer to lose a few disloyal traitors to the Truth than to leave any possible loophole open by which the suffering humanity may be defrauded by any of my own practitioners and the blame fall on Spectro-Chrome Therapy. This Doctor of Medicine further writes (warns me) that by not *trusting* him and his friends with slide sets I shall have a *fall* in business etc. etc. Doctor dear, you have yet *to know Dinshah!* The Sun and Moon may fall in pieces, the few earthly possessions I have fall like houses in the earthquake of Japan, but, I shall *never—never* be a party to allow any person with the motives of some of my disloyal would-be-dishonest Graduates to earn their livelihood by hoodwinking the sick public into believing that they are using my slides while they are using "any old colored class"! Tell them I do not wish to hear from them. Business will run *without* them, but *with* them the sick will suffer.

I issue an open warning that I personally would not care to associate with any of my Graduates who uses such underhand unfair methods. They are bound to fail in their *ultimate results.* Please stop threatening me; do what *you* please with your knowledge and your equipments and your "slides." I do not care to protect my Graduates at public expense; I taught you my system; use it as you think best; lure of business cannot make me change.

Wait some time more, dear friend; all this trouble will vanish when my Slideless Spectro-Chrome Equipment will be placed on the market. Let the fraudulent defraud now, the bully threaten, the dishonest prosper for a while—the hand of Retributive Justice will soon overtake those who think evil, for to the untrue and unconscientious I say, "he that smiteth me smiteth himself." I am sorry for their attitude; they may not know *me,* but I know *their* methods.

DEATH-KNELL OF MEDICAL SCIENCE — BIRTH OF SPECTRO-CHROME ITISOMETER

Following the Sympathometer, the instrument that enables the Spectro-Chrome Therapist to ascertain *at a glance* the patient's condition and to work *without any calculation* in accordance with the Occult Operation of the Great Sympathetic Nervous System, comes the new Itisometer (pronounced It-is-o-meter) which has been just perfected and brought to a point where the last straw that broke the proverbial camel's back has been laid on the monster of Drugs and Diagnosis—in reality sounding the death-knell of the entire medical "science."

As known to Graduates in Spectro-Chrome Therapy, in my system I have discarded all forms of intricate "differential diagnosis of strains of disorders" and aimed at bringing home to the mind of the student the rationalism of the Unity of the Universe.

However, a certain number of Graduates of Spectro-Chrome Institute never could get away from medical and other views about so-called Diagnosis and has been clamoring for some kind of an instrument that would help them to hold their own against the powerful practitioners of other systems of therapy backed by influential financiers.

Fortunately for the World, I have no financial backing of any character; never had any and soon will need none. My backers are on those spheres of human activity where money counts not and only individual direct effort survives. My backers are the Libraries of Lore, Sciences of Nature, Studies of Predecessors and the Lab-

oratories of Human Engineering which have created the present evolution and have left their oscillatory marks on the Oceans of the Higher Ethers.

I had projected in my mind long ago the device that would stop the thoughtless grumblings of those who declined to think and wanted their intellectual foods served on an automatic salver. But the time was not ready; even my most beloved adopted Mother America with her highest intellectual progress was not ready to receive such a device. I had to create first a general understanding among the public and the professional about the new-born science of Spectro-Chrome and collect at its altar a number of devoted practitioners for a while before divulging more of the profundities of Occultism.

For Spectro-Chrome Therapy is nothing but an initiation into the Higher Mysteries of Life; yet what has been given out is far—far short of what will soon be given to those who have proved deserving of the trust.

The greatest ghost that terrorized some of our practitioners was the "how" of deciding the necessary Attuned Color Waves. They were thoroughly taught the theories and practices, but, many had their prejudged views. They wanted an automatic device. Well, to them and the World I have now the pleasure to announce that I have perfected what they wished for and more that they did not even dream of.

These are some of the workings of the Itisometer:—

1—It will show *where* the patient has trouble.

2—It will show *what* trouble the patient has.

3—It will give the *Medical Name* of the disorder.

4—It will prove to the patient positively whether there *is* any trouble or not.

5—It will show what *color* is predominant.

6—It will show what *area* has predominant that color.

7—It will show what *Attuned Color Wave* to apply.

8—It will indicate what *improvements* are day by day taking place in the various organs of the patient.

9—It will show conclusively to both patient and practitioner when *health* is restored.

10— — — — — —

11— — — — — —

12— — — — — —

All this and much more will the *Itisometer* show—*without questioning the patient, without any calculation, at a glance* and furthermore, it will indicate its own defects, if any.

The name of the Lord be thrice blessed. At the altar of the Universal, the Microcosmic Forces, I lay this new creation of mine for the Service of Suffering Humanity.

The day *has* come; the blinds put over the eyes of the long-sick public by the oligarchy of the Medical Trust will now be pulled off by each of my conscientious Graduates. The biggest grip this monster had on the jugular of the practitioner of any system not sanctioned by its age-worn, fossilized, unnatural, stupid, filthy and inhuman viewpoints — viewpoints some of which were born when Tut-Ankh-Amen was cradling in Egypt and even before—was the "how" of the humbug of diagnosis—the Itisometer is the device that has completely broken that grip, the practitioner is free and the World will be one step forward toward the goal of "Therapeutical Emancipation."

———————

Attuned Yellow Wave

(Correspondence, Query, Catechism, Inquiry, Interrogatory)

OSTEOPATHIC PHYSICIAN REPORTED HAVING SOLD WORTHLESS IMITATION FOR SPECTRO-CHROME EQUIPMENT—WARNING TO PUBLIC.

An Osteopathic Physician, one of our Graduates in Spectro-Chrome Therapy and a man who has created for himself some name in his line of work which includes Electro Therapy, is reported to us as having advised and sold to another Osteopathic Physician a labelless spurious imitation for a Genuine Spectro-Chrome Equipment.

This is only the beginning of what the suffering innocent public may have to put up against in the future.

The success achieved by the Originator of Spectro-Chrome Therapy and the wide recognition his teachings and Equipments are receiving have evidently opened the path to unscrupulous imitators. We have full knowledge and information in our hands as to the offenders against truth and the infringers on our work and warn the public, patients or otherwise, against accepting the teachings or Equipments of any person outside of the Originator as the original work of the Spectro-Chrome Institute.

No person, except the Originator, is authorized to teach Spectro-Chrome Therapy.

No person represents the Spectro-Chrome Institute except its President in any business capacity to create contracts.

No person, Graduate or otherwise, has the privilege, right or authority granted by the Spectro-Chrome Institute to give out its discourses or teachings or make Equipments, parts of Equipments and the like.

No person has been instructed by the Spectro-Chrome Institute in the process of matching slides so as to produce the Attuned Color Waves which forms the foundation of the success of Spectro-Chrome Therapy and without which the 5 "slides" would be merely pieces of colored glass worthless for "Therapeutical Precision."

This process and all the copyrights, publications, patents and the like of Dinshah P. Ghadiali are the exclusive property of the Spectro-Chrome Institute.

REWARD

Spectro-Chrome Institute hereby offers a standing reward of $250 to anyone who would place into its hands full evidence leading to the conviction of any person guilty either of selling a fraudulent imitation as a Genuine Spectro-Chrome Equipment or offering slides as Genuine Spectro-Chrome Slides.

The following is a part of a complaint lately received from the Middle West. The names are purposely withheld until the investigation is completed and may be published later should a fraud be unfolded.

Meanwhile *keep watch on the black sheep.*

Col. Dinshah P. Ghadiali,
2401 N. Broad St.,
Philadelphia, Pennsylvania.

Dear Doctor:

Please send me full particulars concerning the different Dinshah Spectro-Chrome apparatus put out by you, or recommended by you.

What has been your experience concerning the breaking of colored plates? Is there any way to temper them

against breaking from heat of lamp?

Recently I ordered a Spectro-Chrome apparatus via Dr. ....., which he claimed would be better in appearance and superior to the catalogued Dinshah. After considerable delay it came, a very presentable looking apparatus, carrying a 1000 W. light and 5 color plates, 9½ inches square, built of 4 separate slats.

Before first patient had been on light 30 minutes, heat had cracked a slat. We now have been using machine since last Monday (not quite one week), and all plates except one are ruined. Treatment is given in a closed room where no draft is possible.

What is the matter and what can be done to stop such a loss? It is, of course, evident we cannot sustain such a rapid loss and never be certain of a color plate.

This machine seems to bear no name plate and we were not furnished with any book of instructions, for its use. I have also written Dr. ..... concerning the matter. I have a copy of your Compendium of Spectro-Chrome Therapy for use in treatment and am very appreciative of the excellent manner of its presentation.

Thanking you for an early reply, I am

Fraternally yours,

.....D.O.

Dear Doctor:—

I returned recently from a long tour through the East and the Middle West.

I am exceedingly sorry to hear from you that the osteopathic physician mentioned in your letter put you into such trouble. He is one of our graduate Spectro-Chrome Therapists and ought to have been the last person to play such a game.

The word "Spectro-Chrome" is copyrighted and patented by the Spectro-Chrome Institute, and if you ordered a Spectro-Chrome apparatus and received something different, that doctor has committed a flagrant fraud. If you be positively sure that you did order a Spectro-Chrome apparatus and did not consent to accept a downright spurious imitation, that person who sold you the apparatus is likely to go to jail. Evidently, the man was too shrewd for you, and it is likely that you agreed to accept an imitation on his recommendation, in which case, your money is lost, and you may get no redress.

All our genuine Spectro-Chrome apparati are built to my design, and have genuine Attuned Color Wave slides matched by me. All our standard slides are only 6"x4" in size, and each apparatus bears our registered label and trade marks.

Eighteen months ago, I designed and marketed my graduate Spectro-Chrome equipment, which has a motor-driven exhaust and inter-built slides. This is the only equipment of 1000 Watts which has these improvements, and as a general rule, the slides thereby are protected against breakage through heat. The price of this highly finished machine is $425.00 (Four Hundred and Twenty-five Dollars) without the Attuned Color Wave slides, which are built into a sealed slide carrier to prevent tampering by unscrupulous persons. This slide carrier is the permanent property of the Institute, and is leased without charge to the practitioner.

Any further information you desire will be gladly given.

Yours fraternally,

DINSHAH.

(Spectro-Chrome Therapy, Spectro-Chrome Therapists)

CHRONIC CONSTIPATION, HIGH BLOOD PRESSURE, CHRONIC CATARRH, ACUTE APPENDICITIS AND GLEET RELIEVED BY SPECTRO-CHROME THERAPY

By:—Alan A. Evans, S.C.T.
Boston, Massachusetts.

Following is a list of several patients that I treated successfully:—

Case 1—Mrs. C. D. Chronic constipation. (Extensive inflammation of either right ovary or appendix.) In parenthesis I give her physician's correct (?) diagnosis. He neglected to mention the inflamed condition of her œsophagus or did he try to correct her inability to eat, sleep and enjoy living. Correct diet (Dinshah's) plus Yellow on 9 and 10 followed by Orange; then Lemon systemic, later Turquoise. She is now enjoying perfect ease. Eats well, sleeps well and has no more pain.

Case 2—Mr. I. B. High blood pressure. Three treatments of Purple both front and back. The patient was amazed but extremely happy.

Case 3—Mr. P. W. Man in forties, generally run down, constipated and complained of stiffness or soreness at back of neck extending to left shoulder blade. This he had been treated for some time with both Osteopathy and Chiropractic adjustments. He also had a chronic catarrhal condition. His pulse and respirations were 3 to 1. This patient would not adhere to diet and smoked quite heavily. Nevertheless, in eight weeks, I discharged him "as nearly normal as he ever felt." That is his own statement.

A week later he had about three drinks of liquor; the following morning, he had an attack of Vertigo (dizziness) and fell. He struck the left side of the face on the bathtub. Two hours later, he reported for treatment; his face was swollen and still swelling. I immediately used Purple, then alternated with Indigo. I treated him for about a week to eradicate swelling and color. He never felt any pain, for, when he came his face was still numb and after being treated with the Purple and Indigo, numb it remained until I started to use Lemon and Green to dissipate the color. We later noticed that he had split the bone above the eye and also broken a sliver off the cheek bone. I continued to cleanse with the Green and Turquoise for about two weeks. I am at a loss to account for the normalcy of his pulse and respiration; when he came after the fall, he looked like a Dr. Jekyll and Mr. Hyde—one side normal and the other swollen three times the normal size.

He now tries to live up to the diet and ease up on his cigarettes. I forbade the use of liquor. Was that the demon that toppled him over? If so, he had to learn one rule of good living to avoid dis-ease, for now he will not touch a drop. Amen!

Case 4—Miss F. L. aged 42. Acute attack of Appendicitis. Pulse and respirations less than 3 to 1. Magenta for half hour, after I had used Indigo for several hours, gave her quite a healthy appearance. Kept her at my office all night. She slept like a peaceful child. Next day, Turquoise for two hours was given and she was sent home. When she came she was carried; when she went she walked out. Her various pre-existing complications will necessitate a course of treatment. She has a scrofular condition of the scalp, so-called heart trouble, enlarged tonsils, deafness and chronic constipation. If she continues her treatment I shall report later. Suffice it to say she realizes that Spectro-Chrome saved her from the surgeon's knife and may be death.

Her breakfast on the morning of the attack was "just a light one" she said—only a few pork chops. I put her on a fruitarian diet. Last night she came for a treatment and said she would simply *have* to eat her beloved meat. She will no doubt, now that the pain is all gone, go to her former physician because he will not take her meat away. Well, such is life. This same woman will not wear the feathers of a bird on her hat because it is "cruel and wicked"! ! !

Case 5—Mr. C. D. G. Age 25. Chronic Gonorrhoea and Gleet. Lemon and Green systemic used alternately, Magenta on 4 and 18 occasionally. The Gleet and painful urination entirely went. Sleeps well and has gained weight. Before coming for Spectro-Chrome, he would get up 3 or 4 times during the night to urinate. He is apparently well and insists on going back on the road. I shall try to keep him in Boston for a time to make sure that he is entirely rid of trouble. He had 7 weeks of treatment daily. He now thinks he will go on the road and expose himself again. Perhaps we correct these dis-eases too quickly!

I shall soon have other cases to report; one is a Locomotor Ataxia patient who a few weeks ago could not move. Well, I had better save this one till next time.

DR. KATE W. BALDWIN, F.A.C.S., VOICES HER OPINION ABOUT SPECTRO-CHROME THERAPY IN PROVIDENCE, RHODE ISLAND

Our esteemed and learned friend Dr. Kate W. Baldwin, whom we have the honor of having as the First Vice-President of the American Association of Spectro-Chrome Therapists took a special trip to Providence, Rhode Island, by request of Dr. Samuel L. Gants, S.C.T.

Her visit to the Violet Flower State created a commotion there and the newspapers printed articles voicing her views. Our cordial thanks are due to the worthy doctor for her unselfish devotion to the cause.

The Providence Sunday Journal of November 18, 1923 had the following:—

MEDICINAL DRUGS BELIEVED DOOMED

Dr. Kate W. Baldwin of Philadelphia Says Spectro-Chrome is Best Healing Agency

TO LECTURE HERE TO-DAY

New Science Declared by Woman's Hospital Senior Surgeon to be Better Than Either X-Ray or Radium in Treatment of Cancer

Drugs as a means of healing may be ultimately eliminated by the new science of spectro-chrome therapy, which is based on the principle of colored light waves, in the opinion of Kate W. Baldwin, M. D., senior surgeon at the Woman's Hospital of Philadelphia, who arrived in this city last evening. Dr. Baldwin is a Fellow of the American College of Surgeons.

Spectro-chrome was perfected less than three years ago by Dr. Dinshah P. Ghadiali of Philadelphia, and has been gradually spreading as an adjunct to other therapeutic methods in use throughout the country. It is based on the theory that light waves of different colors contain the same elements as compose the body, and can re-establish the balance of these elements when it is disturbed.

"Each color in the spectrum," says Dr. Baldwin, "has its own therapeutic value. Spectro-chrome, or attuned color, is picked up by the radio-active and radio-emanating forces of the body, acting through the sympathetic nervous system and re-establishing any

loss of balance between the elements of which the body is made. Loss of balance in the chemical elements of the body is the cause of almost every physical disorder or ailment. Spectro-chrome is the most worth-while contribution to the healing art of the century."

"BETTER THAN RADIUM"

Dr. Baldwin gave a few examples of cures she had effected in the Woman's Hospital of Philadelphia, which, with the ordinary facilities of medicine, drugs, or even surgery, would have been hopeless cases. She declared that spectro-chrome is better than either radium or X-ray in the treatment of cancer, and is accompanied by no danger of burning or devitalizing tissues.

One woman, paralyzed for years so that she could not find her feet, and addicted to morphine in quantities such as one ordinarily uses of butter, was brought in the hospital with a fracture. Spectro-chrome, says Dr. Baldwin, not only ..... relieved the paralysis, but also, without having been intentionally applied for that purpose, absolutely cured the patient of the drug habit in a few days.

Almost every ill to which the human body is heir, contends Dr. Baldwin, is susceptible to cure by spectro-chrome. The list of remedies she says she has worked with the method includes the curing of blood poisoning, gallstones, nervous conditions, mental conditions, strangulated hernia, wounds and burns. If the method were good for nothing except burns, Dr. Baldwin holds, it would be worth all the money spent developing it.

One instance of a girl whose case was hopeless, with arms and body so badly burned that ordinary medical science would have concentrated only on relieving the suffering of her last hours, was cited. The girl's skin was virtually renewed and a spinal curvature resulting from the position in which she was obliged to lie for a long period of time was corrected by means of spectro-chrome.

GIVES ILLUSTRATION

As an illustration of the principle involved in the method, Dr. Baldwin explained that fire is chemically an excess of hydrogen. The ordinary method of treating burns is to reduce the chemical element oxygen to an assimilable form for application to the body. Spectro-chrome, by applying blue rays, which contain a great excess of oxygen, neutralizes the excess of hydrogen, at the same time working through a medium, light, which needs no reduction for assimilation by the body.

By using the finer forces of nature instead of the grosser ones, that is, by substituting quickly assimilable light waves for slowly assimilable materialized drugs, spectro-chrome is said to receive a speedier response from acute cases and to have received response from chronic cases when no other method has been in the slightest degree effective. Positive cures in several cases that would have gone on the operating table within 24 hours after admission to the hospital are claimed by Dr. Baldwin.

A considerable number of physicians and many leading osteopaths have already adopted spectro-chrome as part of their healing methods. Notwithstanding, Dr. Baldwin says that there is considerable antipathy toward the new science, especially from manufacturers of drugs and the old school of allopaths drilled in the tradition of drugs. The opposition of the former, she says, is based on consideration of huge financial losses should spectro-chrome completely supplant drugs. The American Medical Association also opposes the method, she says, unjustly.

Dr. Baldwin at first met with many

objections, when the study of the violet ray and its use in the Woman's Hospital of Philadelphia led her to introduce the new science of spectro-chrome. This opposition, she says, has now completely disappeared, as demonstrations of the superior efficacy of colored light rays over every other method in use at the institution pile one upon another. Many physicians refer their difficult cases to her, and it is her hope to be able soon to utilize the new science in all her work, without exception.

She will lecture this afternoon to an audience of invited guests at 721 Broad street, and this evening at 6 o'clock will address members of the New England Spectro-Chrome Association at the same place.

SCIATIC NEURITIS, RACHITIS, TUBERCULOSIS, FACIAL PARALYSIS, CONSTIPATION RELIEVED

By:—Dr. Bert C. Smith, S.C.T.,
Detroit, Michigan

I have had wonderful results on the Sciatic Neuritis case; also the case of Rachitis (Rickets) gained 2 pounds in two weeks.

My wife's bad case of Tuberculosis is showing a wonderful improvement; also relieved scald on fingers; used Indigo twice. All well.

Am trying two Goitre cases. Shall report progress.

Case of Facial Paralysis nearly relieved in 2 weeks. Used Yellow and Lemon.

Constipation responds in 1 to 10 treatments.

SPECTRO-CHROME SAVED WOMEN FROM PARALYSIS

By:—Dr. Emma H. Gabriel, S.C.T.,
Philadelphia, Pennsylvania

I send you a report for the Spectro-Chrome.

An old woman of 89, awoke one morning with a numbness and tingling sensation in the right arm. As she had a Spectro-Chrome Equipment in the house, we could apply it immediately. After being called on the 'phone, her daughter gave me the symptoms. I advised the use of Lemon Wave, followed by the Orange Wave for about ½ hour and to call me later.

About 2 P. M. I was called and told that the right hip and leg was numb and tingling and there was not proper control on that side. I advised to use Magenta on the heart about 4 P. M.

At 8 o'clock at night, I was called and told that the symptoms were still the same and the speech seemed very thick. Then we used Purple on 18 about 8:30 for ½ hour and at 10 P. M. Magenta on the heart.

The diet was very light, mainly Spectro-Chrome Lemonade and fruit juices; also a little milk if she wanted it.

The next day, I saw the patient and took Blood Pressure which was 158 mm.; the pulse and heart were good. We continued the same treatment—Lemon Wave to stimulate the circulation in the arm, Magenta and Purple. When I saw her three days later, all symptoms had disappeared and she seemed to be as well as before.

There is no question in my mind that she had a slight Cerebral Hemorrhage, but the quick action of Spectro-Chrome saved her from Paralysis.

I congratulate you for the fine result you had in Detroit and such a good class. I wish you furthermore the same success and even greater as you fully deserve it.

EXPERIENCES OF A LAY USER OF SPECTRO-CHROME EQUIPMENT

By:— Mrs. Richard Sandbach, Wellsboro, Pennsylvania

It has now been almost two years since we purchased your most wonderful invention The Spectro-Chrome. It has been my intention many times to write you and thank you for this God-sent gift. Had I the command of the most eloquent language, there would not be words to express our gratitude to you for the patience and sacrifices you must have endured to bring to fruition your mind's ideal.

Having had just a glimpse of Nature's laws, just a little of the laws of Vibrations and Colors, I was ready to believe in your invention, when my sister Mrs. Sophia Wasseen of Philadelphia, who graduated in your first class there told me about Spectro-Chrome.

My husband ordered the Spectro-Chrome at once, as we both needed it very badly. I had so many ailments—to relate where I was out of order would sound like thinking up a list of ailments for a patent medicine advertisement!

At the time we were in Philadelphia, your second class was nearly completed; had it just begun I would have stayed and taken the course of lectures. Have been very sorry I didn't go down and have you tell me just what colors to use. I had had pleurisy and inflammation of lungs two years before; on our way home, I took a cold and Spectro-Chrome didn't arrive for about six weeks. By that time I felt as if it wasn't much use existing any longer.

We studied the Compendium and referred to Encyclopedia for some enlightenment on medical names, conditions, etc., and went to work with "Dr. Dinshah" as we dub our Spectro-Chrome. First Green and Yellow were used with good results; then I took Lemon systemic. When I sat before the Lemon color, a spot in my left lung about 4 inches felt like an abscess drawing. On right side, there were three patches like inflammation which drew after two treatments. I didn't feel any drawing on these places and each treatment the drawing lessened on the spot of left lung. After taking Lemon systemic three weeks and several Green systemics, I began to feel life was worth while. I have some other conditions. I have treated to the best of my knowledge and had very good results; need your advice, which I hope to be able to avail myself of on November 28th. Then I hope to make of myself a new woman.

Formerly Mr. Sandbach took enemas and mineral oil for several years; had sore throat and colds nearly all winter for years. Has no more colds now and says the price of our Practitioner's Equipment is well spent if for relieving Constipation only. We both hope some day to become graduates of Spectro-Chrome Institute for our own enlightenment.

Five people here died of cancer, one our near neighbor. We offered the family Spectro-Chrome; they only looked at us. Another neighbor and friend, a brilliant Attorney-at-Law, had tuberculosis; he was 47 years old. My husband talked to him the past two years, offered use of our machine, wanted him to go and consult with you; wouldn't ever say he didn't believe it or did. Last week he died; might be alive and well today. Another near neighbor and lifelong friend

had pernicious anemia. We wanted him to go and see you; had plenty of means; went to the Rochester Hospitals, took all kinds of treatments and blood transfusions. We gave him Spectro-Chrome magazines to read, talked and talked; he finally took six treatments; he slept better and you could see some red on his lips and ears; before he looked like a copper man; then he quit, went to drugging again and died; might be alive today.

We often vow we shall never speak to any one of Spectro-Chrome; then some one complains and we tell them; most people look at one as if one were an escaped lunatic, when you talk color treatment.

We helped one old man 80 years of age, which to me is a miracle. This old man my husband knew since he was a child and he was a kind old fellow, with his weak points. He was taken with double pneumonia. The doctors doped him three months; gave him up to die. Mr. Sandbach was in to visit him and he was so enthusiastic about the results we had had, he told the old man; he wanted to try it, if he could only get here. My husband said, "Do you think we might help him." I knew he was pickled in intoxicants and tobacco and I said, "There isn't much chance." He didn't have mind strong enough to diet or quit tobacco and intoxicants; he couldn't get on any longer. My husband took his auto and put him in, took him out and we gave him first Green then Yellow as he had terrible constipation. Doctors couldn't help him; first treatments started that trouble right. Then, I put him on Lemon systemic and treated the heart with Magenta. After second day, he could help himself around. Then he said, "I'm Oh! so much better; only my head pains me so, and I haven't slept for three months," I say, "why didn't you tell me before?" He said, "I felt so bad and weak all over I didn't think." The doctors told him they thought he had trouble in his head. I gave him Blue on Area 1; he slept nearly all night that night, had very little pain; gave him second Blue, had no more pain in the head and third day climbed in and out of auto alone. After a week, he slowly walked around; after six weeks' treatments, he was going everywhere and feeling well though a little stiff. This summer, he worked in garden and at carpenter work, about a year after taking treatments for only six weeks. He never dieted and continued constantly to chew tobacco. When Mr. Sandbach brought him in our home, I thought he might as well go out and saw out a wooden man and set it in front of "Dinshah," (we dubbed our S. C.) and expect the colors to start life. We think this was truly a miracle, considering age and conditions.

We have helped several other friends: one of severe nose bleeding with Indigo 40 minutes. He is another doping and dying. We wanted him to go to you and get a Spectro-Chrome rather than dope and be sick; all I can say, let them die.

One friend had rheumatism; couldn't raise arm or get coat on or off alone; third treatment Lemon systemic, Magenta on 4 put arm over his head.

One girl, tonsilitis, three treatments brought relief. Yellow and Turquoise used.

Another friend had constipation of years; had generally polluted system; used Green, Yellow, and Red on liver a few times, a few Lemon systemics; two weeks of treatment; she never had as much ambition in her life she said, as she had after these treatments.

I note your latest achievement—Sympathometer. I often said to my husband, "If Dr. Dinshah could invent something which could indicate the color the person required," and I also said "I believe he *will* some day." So now you have my hearty congratulations. May you receive all the good

you deserve!

You see we just let these people use our Spectro-Chrome free of charge, not even ask pay for the electricity, as we have no right to practice. We did it out of kindness to sufferers and tried to get them to order a machine. I get thoroughly disgusted with their stupidity.

You are a good example of what a diligent person can do with a Spectro-Chrome Equipment even without having learnt the use of it according to the teachings of the Institute. The Compendium of Spectro-Chrome Therapy is a valuable guide if properly studied and applied. However, for lay users like you, I am preparing a new booklet which will be of much service.

I thank you for your kind wishes and have pleasure in informing you that the device you wished for is already perfected. Read the announcement of my invention of the "Itisometer."

I shall be glad to meet you at the Convention.

RHEUMATISM, TONSILITIS, CATARRH, HEART AND OVARIAN TROUBLES RELIEVED

By:—D. Richard Holder, S.C.T., Worcester, Massachusetts

The following are a few cases which have responded well to Spectro-Chrome treatment:

Case 1—My wife was having rheumatism badly and had enlarged tonsils at the time I graduated. Doctors said tonsils and teeth caused it and they must be removed. The teeth were removed because they really were bad, but, I drew the line at the tonsils, because, I believed the same cause was at the back of both rheumatism and tonsils, namely impure blood. This trouble came on after childbirth; she was never ill before.

I used Lemon systemic, Yellow on 8-9 and Indigo on the tonsils; in two weeks rheumatism was gone and the tonsils did not bother her although they are still enlarged.

Two more cases of rheumatism were treated similarly with about the same result.

Case 2—Man, 40, had trouble with tonsils and catarrh for several years, during which time he had treatments from throat specialists; could not breathe through left nostril; always felt as though a hair was in the throat.

Five treatments of Lemon and Indigo of ½ hour each relieved him although he smoked.

Case 3—Girl, 19. Troubled with appendicitis for 8 years; also weak spot in chest and pus discharging from right ear; was having an attack when she heard of me. She refused operation and struggled to my office; abdomen hard and tender.

Gave Turquoise ½ hour for two days; became worse, then Blue and Yellow on 8-9. Pain went but returned getting less each time for several weeks. Continued treating, using Turquoise, later Lemon, also Orange on 4-5, Green and Indigo on ear.

After two months' treatment, she has gained weight and is well in all but the ear. She was a very run down case.

Case 4—A friend of the patient in Case 3, a married woman, aged 30; had miscarriage 2 years ago; was doctored since then without benefit for

pain in ovaries; had heart trouble which caused pain inside and under arm so she could not sleep; was anæmic.

Started with Green in ½ hour or more treatments, then Indigo on 10-11, Magenta on 4 and 18 alternately. After seven treatments, the pulse dropped from uncountable rate to 76; slept well; no pain in ovaries.

She then told me her menstruation was 3 weeks overdue; gave Scarlet; result in 12 hours thereafter.

This patient insists on eating meat, no vegetables and much coffee; therefore, she comes back every few weeks, but, Spectro-Chrome always relieves her where drugs did not. I also used Red systemic for Anæmia, alternating with Lemon.

Case 5—Man, aged 50, had locomotor ataxia for 30 years; specialists here and in Sweden failed to give relief though he was nearly filled with Salvarsan.

Gave him 20 treatments with Practitioner's Equipment, of ¾ hour each, alternate Red and Green. He then began to feel more strength in his legs, so on my advise he purchased a 400 Watt equipment, because, it will be a long time before he could get well. He reports to me every few weeks and lately said his sense of balance is returning. This I consider is good for an "incurable dis-ease."

I am now treating a girl of 27 who is alleged to have tuberculosis in glands of the neck; she is very nervous; she has improved remarkably in five treatments of Lemon and Red mostly local.

This and a case of cancer of leg I shall report fully later.

Any criticism will be gratefully received.

Thank you for asking "criticism"; I am glad to help you at all times. Always handle cases according to Infra-Green and Ultra-Green positions and always let the Systemic *precede* the Local. All conditions when they come to the practitioner are constitutional; there is no local disorder then. Furthermore, the elimination functions must be righted before beginning main treatment. Magenta on 4 should be used with the systemic to equilibrate the circulation of blood; without this, no dis-ease can be eased.

The fifth case needs a Practitioner's Equipment; it is no use playing with a 400 Watt Equipment when dealing with the devil of Mercury and Arsenic which are the bane of Salvarsan. Orange on the back areas with Magenta on 4 is especially indicated, after properly administering systemic Lemon.

Follow the principles laid down in Spectro-Chrome Therapy in its fundamental purity and you are sure to achieve success.

Ear and other orificial cases are better treated with the Graduate Spectro-Chrome Equipment.

LIGHT AND HEALTH

OUTLINE OF THE SCIENCE OF SPECTRO-CHROME THERAPY

By:—WALLACE F. MACNAUGHTON,

M.D., S.C.T.

Detroit, Michigan

The success which has accompanied the use of Spectro-Chrome Therapy, since its origination a few years ago, is nothing less than phenomenal.

Colonel Dinshah P. Ghadiali, M.D., M.E., D.C., Ph.D., LL.D., the originator of Spectro-Chrome Therapy, is a Parsee Zoroastrian of world-wide renown as a scientific investigator. Many years were spent by him in patient study and research in Sound, Heat, Light, Electricity and Magnetism, resulting in a system of treatment for "dis-ease" which is, to quote the words of the North American Journal of Homeopathy of "almost unbelievable perfection."

Dr. Dinshah, like many another great mind, has merely discovered—and made use of—that which lay unnoticed only because of its simplicity; the fact that SUNLIGHT IS THE BASIC SOURCE OF ALL LIFE AND ENERGY UPON OUR EARTH.

Having realized the tremendous significance of this fact, he set to work with tireless enthusiasm (which is born only from the discovery of a great idea and an intense desire to share the benefits of that idea with his fellow men) and, through years of research and experiment, determined, with positive accuracy, the actual effects of correctly Attuned Color Waves upon the human system.

The culmination of that work is an entirely new science, a science based upon mathematical principles, which makes possible the application of the precise remedy indicated, when once that indication is determined. It involves the use of the most conservative principles of precision and accuracy. It pours upon the various organs of the body accurately Attuned Color Waves, which are specific etheric forces of tremendous potency. These oscillating streams of etheric energy reinforce, or depress by interference, the oscillatory frequencies existing at the time in the different portions of the body. The equilibrium of absorption and radiation of energy is, thereby, assisted back to the normal and the condition known as "dis-ease" is replaced by that of "ease" or health.

The age of experimental healing is now past. The Spectro-Chrome Therapist knows precisely the nature of the force which he is using and how that force activates the body.

It is in response to a number of requests from those who wish to have a simple explanation of the scientific basis of Spectro-Chrome Therapy that this short outline has been produced.

* * *

At the present time, when, on every hand, man's knowledge has enabled him to improve vastly the conditions in which he must live, it is difficult to realize what life must have been like without the conveniences which he now enjoys. The steam engine, the giant ocean liner, the automobile, the airplane transport him rapidly from place to place, with incredible speed—and yet it is only within recent years that such machines have been constructed for his use.

For untold ages, man has dug iron from the earth. He has molded it to the shapes which he desired. He has known how to temper it for better service. He has been fully cognizant of the properties of water and of steam; but, with all the necessary materials available for the construction of a fully equipped and powerful locomotive, HE DID NOT REALIZE THE SIGNIFICANCE OF THE THINGS WHICH HE HAD.

The origination of Spectro-Chrome Therapy is another illustration of this same condition. Almost everyone is aware of the simple fact that sunlight is the basis of all life. Every living thing, be it vegetable, animal or human, absorbs the radiant energy which we call sunlight and is dependent upon those vital rays for its very existence. Were the sun to cease shedding his beneficent rays upon our planet, all life would cease to be.

Yet it is only within recent years that any attention has been paid to the therapeutical value of light. But this field of research is now being recognized. Sanitariums have been constructed with the object of using the direct sun-rays to relieve tuberculosis. This method, originated in Switzerland, is known as the "Rollier" treatment, and everyone has heard of the forced growing of flowers and vegetables, by electric light, even at night.

Sunlight is absorbed into the body, directly through the etheric portions of our organs and indirectly through the food which we eat, which has as it were stored-up sun rays within it.

It should, therefore, be obvious that the two vital factors in dis-ease and health of the body are FOOD and LIGHT.

Spectro-Chrome Therapy is based upon this obvious, yet still little realized, fact.

Owing to the nature of sunlight, which we are absorbing, all the colors of the solar spectrum are present in the etheric portions, of the body, each color oscillation being present in direct ratio to the chemical elements in a particular organ. Any condition of dis-ease in the body is an indication of a disturbance of a vital force—a disturbance of color balance by a disproportion of chemical elements. Restoration of the required equilibrium brings health.

There are many misconceptions about health, as there are many misconceptions about dis-ease. Health is not merely physical comfort; it implies also the ability to act and to think without undue fatigue. A splendid definition of health has been given by one writer, who says, "From the highest point of view, perfect health is a thorough co-operation between a serene mind and a responsive body, in which every organ is sound and properly active." Every normal function of the body is pleasurable. There is no greater joy in this world than the joy of perfect health in its highest sense—the complete co-operation between a healthy mind and a properly responsive body. Under such conditions, life is surely worth living. Unfortunately, it is the possession of few. Ease—the condition of health, is sacrificed for dis-ease.

As demonstrated by Dr. Dinshah, drugs, electricity, X-rays and similar therapeutical measures, also produce their effects in the system through the liberation of color waves. But other results which they produce are often extremely deleterious because they are not normal forces operative in the body and foreign energy introduced into the body must always cause some form of disturbance of equilibrium. On the other hand, an energy poured into the body, having an equilibrating intent, WHICH IS OF THE SAME NATURE AS THE FORCES ALREADY THERE can produce only natural and beneficial results. The energy of scientifically Attuned Color Waves is of this character and will restore the required equilibrium, by opposing those waves of radiant energy which are over-active and by reinforcing those which are under-active.

In order to understand a little further the way in which this system works, we must realize something of what the body is and how it is activated. First we must bear in mind that we have two primary divisions—MATERIAL and ENERGY. The body is built of various materials and through these materials, energy, of varying kinds is being expressed. The maintenance of good health is, therefore, a dual problem—that of building suitable materials into the body and that of causing the natural energies to function normally through those materials.

The following table shows the requirements necessary for the maintenance and renewal of the body.

THE HUMAN BODY NEEDS AS FOOD:—

ELEMENT:—	FUNCTION:—	SUPPLIED BY:—
Caloric	Heat building	Carbohydrates and Hydrocarbons
Carnic	Flesh building	Proteids
Osseous	Bone building	Salts
Solvent	Blood building	Water
Energic	Vitality building	Light

In order to maintain and operate the body, man must take into it and absorb, elements which supply heat, flesh, bone and blood. These, as indicated above, are obtained from the carbohydrates and hydrocarbons, such as sugar, oil, fat, etc., proteid, the nitrogenous foods, salts, mineral matter containing phosphates, iron, sulphur, etc., and water. All these rebuild the material waste.

Light supplies the energy which operates on the material through the etheric organism.

One of the more interesting facts which has been drawn from Dr. Dinshah's experiments is his demonstration that all chemical elements have their predominant color wave. With this knowledge, the physician who has studied Spectro-Chrome Therapy can produce similar effects in the bodily organs to those produced by the corresponding drug. For example:— Yellow is the cathartic wave and all drugs producing this effect are found to have this wave preponderating when the color wave is liberated by high frequency bombardment. There is, however, one important difference. The potency of the Attuned Color Wave can be confined locally, affecting the desired organ only, instead of having to be introduced into the digestive tract, absorbed and spread through the entire system, affecting other organs adversely, as with the drugs. This fact of color correspondence is applicable also to the food which we eat, for, being composed of various chemical elements, every particle of food contains within it certain color oscillations and the material so taken into the body is attracted to the various portions and organs, because of the reinforcing relation between substances having similar oscillatory rates.

All forces must have a medium for their expression. The vital energy coming from the sun performs a double duty. It animates the vegetable kingdom, producing materials of a definite oscillatory power—color wave—which, combined with the matter drawn from the earth, is called an "element." Such elements are taken into the human body as food, absorbed and built into the various organs, producing material of a certain responsiveness. Into these organs, *made capable of responding by the vitalized material,* the direct energy from the sun is poured. THIS IS THE FOUNT OF OUR STRENGTH AND THE KEY-NOTE OF OUR HEALTH.

Here we may refer to the fallacy that flesh should be consumed for food. Putrefaction begins at the moment of death. Flesh is dead, and built into the organs of the body, it responds but poorly to the incoming forces. The poorer its response, the less its power to attract the necessary material for the renewal of the waste of the organ. In this way, the tissues deteriorate and dis-ease results. On the other hand, the products of the vegetable kingdom contain all the elements necessary to rebuild the waste of the body and these elements are taken into the body directly, with their oscillatory power undiminished. This highly responsive material, built into the body, is more completely attuned to the powerful forces coming from the sun, the vital energy is absorbed in greater quantity and with more consistent regularity, producing increased endurance and more exuberant health.

An analysis of the human body shows that it is composed of the following elements:—

CHEMICAL MAN.

	Per Cent
Oxygen	72.0000
Carbon	13.4000
Hydrogen	9.1000
Nitrogen	2.5000
Calcium	1.3000
Phosphorus	1.2500
Sulphur	.1476
Sodium	.1000
Chlorine	.0850
Fluorine	.0800
Potassium	.0250
Iron	.0100
Magnesium	.0018
Silicon	.0006
Total	100.0000

The above table, it will be understood, refers to the material composition of the body. Light, as we know, can also be analyzed. Sunlight is composed of the seven "prismatic colors." These are:—

Green
Yellow Blue
Orange Indigo
Red Violet

Sunlight, as it is received by the body, is split into the prismatic colors and their combinations, as white light is split by being passed through a prism. Red and Orange are mainly sensory stimulants, Yellow and Lemon are motor stimulants and chronic alteratives, Green and Turquoise are germicides and acute alteratives, Blue and Indigo are anodynes and sedatives, Violet and Purple are depressants and Magenta and Scarlet are emotionals and circulatory stimulants.

As we need a balanced diet to build the material of the human body for health, so also do we need a color (energy) balance. Spectro-Chrome Therapy produces its results through scientific application of this principle.

The physical body is a wonderful and delicate piece of mechanism. As such, the greatest care should be taken of it. It is surprising how much ill-use it will tolerate before final rebellion. But, soon or late, ill-usage will tell and dis-ease will appear—Nature's warning that all is not well.

Violation of the laws of physical well-being will produce ill-effects whether the action is conscious or unconscious; whether we know that we are acting unwisely or whether we do not. Often, quite unwittingly, we disturb the energy equilibrium of the body—in common parlance, we cause "diminished resistance" and bad effects must follow. The ways in which this may take place may be briefly described:—

DIETETIC: Wrong food, either in kind or quality, will make it impossible for the body to build into the organs the necessary material to repair waste and the color balance will be disturbed, although this disturbance may not become apparent for months or even years.

HYGIENIC: External cleanliness must be carefully observed at all times, so that the eliminative processes of the body can be carried out unhindered, through the pores of the skin. Fresh air is absolutely essential. Reference to a previous table will show that 72% of our body is built of Oxygen. If we do not absorb sufficient Oxygen, the color balance of the body is immediately upset.

FUNCTIONAL: Internal cleanliness is also necessary. The digestive and eliminative tracts must be kept active to prevent absorption of poisons into the blood. Likewise, poisonous chemical combinations in the blood and tissues must be broken up in order that the displacement and elimination may be complete.

Proper technique is essential in all functions, if the most satisfactory results are to be achieved. Such tech-

nique is usually acquired instinctively but often missed altogether, with the result that a train of symptoms follows, which may be the fore-runner of more serious trouble.

MECHANICAL: Exercise is vitally necessary for health. Much of the dis-ease of the present day is caused through neglect of this factor. Those faculties which we do not make use of Nature removes. Lack of exercise causes the digestion to become impaired, the circulation of blood to decrease and the muscles to degenerate.

MAGNETIC: During sleep, we lie horizontally and the magnetic force of the Earth, which comes in lines from the North and South magnetic poles of the Earth, passes through the body. To obtain the full value from sleep, we should always lie with the head toward the North magnetic pole and the feet toward the South magnetic pole. This will ensure a maximum number of magnetic lines of force passing through the body. The value of this position in sleep will be apparent at once when it is tested. For this, and for other reasons, it is highly undesirable for two people to sleep together. Separate beds should always be used.

PSYCHIC: The effect of emotions and of thoughts upon the body is very strong. Anger will poison the saliva. Fear will entirely change the composition of the blood. Experiments have demonstrated these facts beyond all possible doubt. Hate emotions destroy. Therefore, we may safely assume that love emotions build. A "serene mind" and a "responsive body" are necessary factors for good health.

No one can estimate the value of good health. It is the most valuable possession in the world. There are no riches comparable to it; no wealth which can equal it. Priceless jewels are as nothing compared with the beauty and attraction which health brings to its possessor. With a healthy body, life is a joy and the exercise of its faculties a fountain of happiness. Nature is a hard taskmaster—she exacts to the uttermost, but she is a wonderful helpmate and lavishes her bounties, upon those who obey her laws, withholding nothing. Her gifts are broadcast throughout the world. She knows no distinction of race, caste, creed, sex or color; all are equal in her eyes. Upon all alike—except those who choose to live in darkness—the beneficent rays of sunshine fall. For all except those who refuse the proffered gift—the pure, fresh air and glorious light are available. There is food and drink and life and joy for every one. But man too often turns from these splendid gifts and seeking a world of his own making, finds to his sorrow, that that world is one of bitterness, reached by a path of suffering, retained by the torture of his body —and all the while, health and happiness await him, if he will but make the choice.

Spectro-Chrome Therapy is the latest revelation of the healing processes of Nature. Its success is only natural, for it makes use of the greatest power in the universe—the power of LIGHT through its ATTUNED COLOR WAVES.

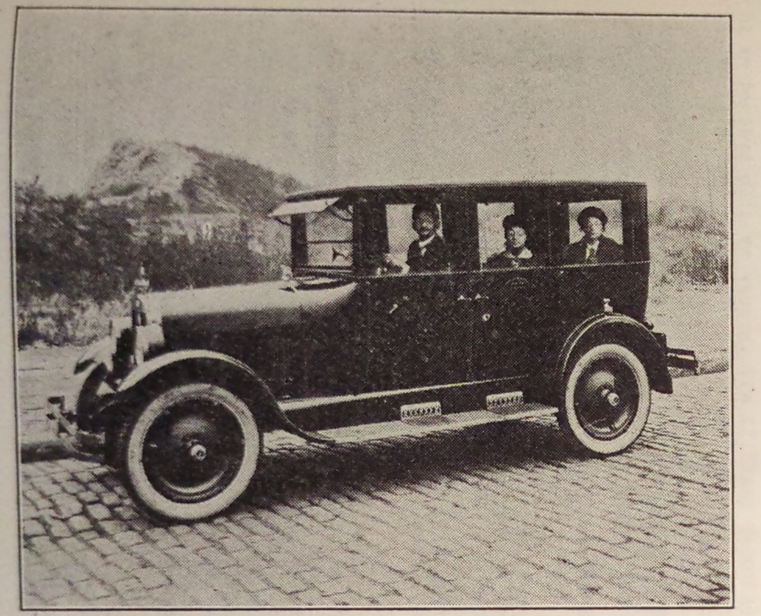

When the history of our day is written and future generations place upon record the things we accomplished, among the greatest of the benefactors of the human race will be placed the name of *Dinshah*, the master mind, through whom the science of *Spectro-Chrome Therapy* was given to the world to cleanse it from sickness and to point the way to perfect health.

AUTOMOTIVE EQUIPMENT OF SPECTRO-CHROME INSTITUTE

This faithful Oakland 6-44 and this speed-truck built by the Chevrolet Motor Company in Michigan, to Dinshah's specifications, form the present hill-and-vale traveling equipment of the Spectro-Chrome Institute. With it, covering over 200 miles a day, it has been possible to open and complete a new class on Spectro-Chrome Therapy in a different State every month. It conveys approximately $10,000 of special laboratory apparati for the quick and intensive yet thorough training of students in the system with experiments and demonstrations and is a silent evidence of the unaided work accomplished by the Originator of Spectro-Chrome Therapy in the short period of three years.

INDUCTION OF THE FIRST AMERICAN GIRL INTO THE ZOROASTRIAN RELIGION

Citizen Dinshah Initiated his Wife Irene and Daughter Kashmira into the Faith of the Glorious Prophet of Ancient Iran With the same Occult Ceremony as is Performed In the Land of his Ancestors.

DEPOSITION

I, IRENE GRACE DINSHAH, being duly affirmed, do solemnly depose:

1- That I was born of White American parents, at 43 William Street, City of Orange, County of Essex, State of New Jersey, United States of America, Thursday, December 1, 1904 and was not confirmed in any religion or faith.

2- That I became acquainted with DINSHAH PESHOTAN GHADIALI in the Spring of 1921, through the humanitarian work he was doing and thereafter through my constant association with him in his SPECTRO-CHROME INSTITUTE, was highly impressed with the purity and excellence of the Sacred Doctrines of ZARATHUSHTRA, whose tenets he followed in daily life.

3- That on Wednesday, March 14, 1923, I married him in the City and County of Philadelphia, State of Pennsylvania, in conformity with the Laws of the State.

4- That having studied under him the principles of the Zoroastrian Religion, I of my own free will and accord requested him to induct me into that faith.

5- That having gone through the ceremony this day, I announce myself a Zoroastrian, a follower of the LORD ZARATHUSHTRA.

I, KASHMIRA DINSHAH, being duly affirmed, do solemnly depose:

1- That I was born of White Parsee Zoroastrian parents, in the Electro-Medical Hall, Maccai Bridge, City of Surat, Presidency of Bombay, India, Wednesday, November 9, 1904, left my birthplace Friday, January 8, 1909, for England and came to the City, County and State of New York, United States of America, Tuesday, October 17, 1911.

2- That my father DINSHAH PESHOTAN GHADIALI all through my life trained me in the Zoroastrian Doctrines, but, for obvious reasons, I was not inducted, until owing to my growing age, he performed the ceremony this day.

3- That I announce myself a Zoroastrian, a follower of the LORD ZARATHUSHTRA.

I, DINSHAH PESHOTAN GHADIALI, being duly affirmed, do solemnly depose:

1- That I was born of White Parsee Zoroastrian parents, at 92 Parsee Bazaar Street, City and Presidency of Bombay, India, Friday, November 28, 1873.

2- That in my boyhood, I was duly admitted into the Zoroastrian Faith in my birthplace and have strictly followed in the same path.

3- That I left India for England, Friday, January 8, 1909, domiciled in the United States of America, Wednesday, August 9, 1911 and was naturalized as a Citizen of the United States of America, Friday, June 15, 1917, in the City of Hackensack, County of Bergen, State of New Jersey.

4- That in accordance with my firm belief and teaching that conscience alone is the justification for admission into a faith, this morning, Thursday, November 15, 1923, at our residence in 2401 North Broad Street, Philadelphia, Pennsylvania, I performed the SACRED NAVJOTE CEREMONY (observing every detail, except in the use of the Pomegranate for the customary Nerang) in conformity with the dictates of the Holy Zend Avesta and invested my wife IRENE GRACE DINSHAH and daughter KASHMIRA DINSHAH with the SUDREH and KUSHTI the potential Occult Emblems of the Religion of the GLORIOUS LORD ZARATHUSHTRA, the Prophet of Ancient Iran, initiating them into the faith of my revered ancestors.

Irene Grace Dinshah - Kashmira Dinshah - Dinshah Peshotan Ghadiali

PRICE LIST

The following Equipments and Supplies may be purchased from the **SPECTRO-CHROME INSTITUTE**, 2401 N. Broad Street, Philadelphia, Pennsylvania, United States of America:

.....The pages refer to the Compendium of Spectro-Chrome Therapy.

COMPLETE EQUIPMENTS FOR SPECTRO-CHROME THERAPY:

Graduate Equipment (As per Page 2)	$425.00
Practitioner's Equipment (As per Page 10)	150.00
Intermediate Equipment (As per Page 32)	90.00
Standard Floor Equipment (As per Page 18)	60.00
Standard Table Equipment (As per Page 19)	50.00
Standard Gas Equipment (Similar to Standard Table Equipment but fitted with complete gas attachments)	45.00

SUPPLIES AND EXTRAS:

Iris Diaphragm for Standard Equipments of all Types	$15.00
1,000 Watt Bulb for Graduate Equipment	9.00
1,000 Watt Bulb (Specially Frosted for Use with the Dinshah Attuned Color Slides in Practitioner's Equipment)	6.00
1,000 Watt Bulb with Concentrated Filament (Specially Frosted for Use in the Lower Socket for Practitioner's Equipment for Local Area and Orificial work)	10.00
400 Watt Bulb (Specially Frosted for Use in the Intermediate Equipment)	5.00
100 Watt Bulb (Specially Frosted for Use with the Dinshah Attuned Color Slides in Standard Equipments)	2.00
Replacement of Dinshah Attuned Color Slides (To replace one or more broken slides, **RETURN THE ENTIRE SET INCLUDING THE BROKEN SLIDES. A NEW SET** will be promptly supplied at a charge per Broken Slide, of	3.00
Spectro-Chrome Game of Health (a very enjoyable and entertaining game teaching the Fundamental Principles while playing)	2.00
Compendium of Spectro-Chrome Therapy by Dinshah	2.00
SPECTRO-CHROME (Monthly Publication of Spectro-Chrome Institute) per month	.25

CHARTS (by Dinshah):

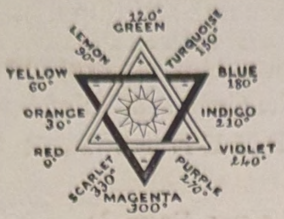

Spectro-Chrome Acoustic Therapeutic System	.25
Universal Mirror (showing Cosmic Evolution)	.25
Human Psychogenic Rays	.25
Occult Operation of the Great Sympathetic Nervous System (The Only Correct Medico-Ontological Chart)	.25
Human Brain Structure	.25
Rational Human Diet (for Health and Beauty)	.25

ALL THE ABOVE PRICES ARE NET CASH WITH ORDER.

REGISTRATION NOTICE OF TRADE-MARKS

Notice to Purchasers and Patients

Notice is hereby given that on the twenty-third day of January, 1923, the Patent Office of the United States of America issued to the Spectro-Chrome Institute, its Certificates Numbers 163,761 and 163,762 for the Registration of the word DINSHAH (a part of the signature of DINSHAH P. GHADIALI) and the Star Design with Color Names and their Numerical Values, and on the nineteenth day of June 1923 its Certificate Number 169,554 for the words SPECTRO-CHROME as certain Trade-Marks for Apparatus for the Treatment of Dis-Eases by Spectro-Chrome Therapy.

Therefore, all persons (Graduates of Spectro-Chrome Institute or otherwise) are hereby warned against the use of such marks.

These marks are the property and the Registered Trade-Marks of Spectro-Chrome Institute exclusively and their use is positively forbidden to any and all persons (Graduates of Spectro-Chrome Institute or otherwise).

All genuine Spectro-Chrome Therapy Equipments bear such identifying Trade-Marks and all genuine Color Slides made in accordance with the Attuned Color Wave System of the Originator of Spectro-Chrome Therapy have one or more such marks and are manufactured and sold *exclusively* by Spectro-Chrome Institute.

Patients going to any practitioner are requested in their own interests to insist that they be treated with DINSHAH'S ORIGINAL SPECTRO-CHROME EQUIPMENT AND ATTUNED COLOR WAVE SLIDES.

Any person, practitioner or otherwise, substituting his own equipments and slides or using equipments and slides other than the Original Dinshah Equipments and Slides is not using or treating patients with **Spectro-Chrome Attuned Color Waves** and is therefore not honest in representations or accurate in therapeutical results.

Remember to insist always for SPECTRO-CHROME THERAPY and DINSHAH ATTUNED COLOR WAVES with genuine DINSHAH SLIDES.

TO OUR CONTRIBUTORS
