EDITORIAL
INITIATION

—Marianne Francis

This issue of STARCRAFT contains data of great importance, received here at the Center during the past three months. If it is carefully studied, it will be found to contain keys to the events which are not only imminent on the world scene, but are already manifesting. In the work which has been done here, we have continually endeavored to present a "whole" picture rather than a single facet. The world scene, the planetary focus, is viewed in its Cosmic perspective, not one clouded by nationalism, politics, or the uncertain values of a materialistic society.

Ever has it been taken into account that few individuals on the face of planet Earth can free themselves from the hypnotic spell under which the masses live and die, to view this life and this period of time as do the Space Brothers. Yet, it has been continually suggested and taught from this Center, that only as a Cosmic viewpoint is sought, only thus can the individual find real security, stability, and their true place in the eternal scheme of things.

Now it would seem, the time for preparation is running out and the time for facing of realities, at many levels of being, is here. Data from geologists and seismologists is included in this issue to verify the material the Space Brothers have been giving for fifteen or twenty years. Major earth upheavals are taking place and many more are due to shake the civilizations of planet Earth.

Politics will NOT solve these problems, yet several of our subscribers have written in to advocate a candidate whose whole political record has been one of limited vision and on whose face is the stamp of blind hatred and unspirituality. Wealth and materialism will not solve the crisis which is here and grows daily, yet there are those who still believe they can shut their eyes to the world's agony and live in the comfort & security which their wealth has bought. Poverty of spirit will not surmount the crisis nor will false humility. Yet it has been painfully true, for this period of time, that the "children of Light" on this planet have had neither wealth nor position. Their voices have been as voices crying in the wilderness, for they have spoken of things of the spirit.

The appeal to Man's inner self has not been accompanied by outer or materialistic proofs, nor will it be. For the spirit within hears not nor sees as reality the things which are dying. This is why few concrete proofs have been offered, at a mundane mass level, by Spacemen and women from "Light" planets and sources, of their coming.

The change which comes is basically a spiritual CHANGE, though it will be accompanied by social revolutions and might upheavals of nature. The change in Man will be a SPIRITUAL change or awakening. It is, in effect, an INITIATION of Earth and its peoples. Therefore, it is not permitted that mass materialistic proofs be offered, for this would not fulfill the purpose of the initiation.

The appeal itself is basically directed to Man's soul and only Man's soul CAN or WILL respond. Those who do so respond will then use their intelligence and their emotions to express the inner conviction, the KNOWING which "knows because it knows." So will come about the separation of the "wheat from the chaff" spoken of in the Christian Bible.

WARNING

A question was asked at the Victoria, B.C. lecture regarding the advisability of anyone attempting contact with the Space Brothers telepathically or physically. Here is my answer, somewhat enlarged upon for the benefit of all our readers.

I will no longer suggest or recommend interested people attempting such contacts unless they are willing to put themselves through a specific kind of program of self-discipline and self-knowledge. Over the last few years I have observed such juvenile antics and ego-inflation taking place on untrained and unprepared mentalities as to be downright dangerous, both to the cause, and to the individuals themselves.

If the Space intelligences want to contact you, they will do so; they do the choosing. If you wish to make yourself a fit candidate to be chosen, then I would ask the following questions:

- 1) Have you dedication of a spiritual nature?
- 2) Have you courage to stay with your convictions without bravado, quietly, reasonably, peacefully?
- 3) Do you really know yourself inside and out, through hell and high water? If not, start a self-knowledge program.
- 4) Have you an inferiority complex or a secret desire for power? If so,

forget about Space people and go to work to balance your ego and attain inner poise. When you truly know self, you will find knowledge of others follows.

The Space Brothers need highly stable individuals. Are you one?

Astral interlopers, masquerading as Space intelligences, clutter up the Space field. They flourish in the purely psychic realm. They feed on vanity and ego. Organizations have even been formed around power mad individuals claiming Space contacts from such sources. BE ALERT! BE AWARE!

Space men and women from the Solar and Galactic Confederations are concerned with the good of all peoples, of any nationality on Earth, whom they can reach. They preach no dogmas nor creeds, nor do they feed "ego food" to their channels. All True channels are part of a Plan to assist the Earth and its peoples through the great change or initiation. Some play a greater part, some a lesser, but all are part of the Plan, Cosmic and spiritual in nature. The desire to serve, to love, and to understand, is the real mark of a true Light server. "By their deeds shall ye know them".

CANADIAN AFFILIATES NEWS

"Mr. H. A. Pym has been elected the new president of the Vancouver Associates. Temporarily, meetings will continue to be held at the home of Mr. Bob Gale, former president, but this can be altered at short notice, due to Mr. Gale's uncertain health.

When Miss Francis came to Vancouver, a special meeting was held at the home of Mr. Gale which was very well attended. Following the playing of a Space ~~tape~~ recording, Miss Francis gave a short channelling session on the subject of unity, followed by an interesting question session.

After the channelling, two members reported seeing something unusual just before Marianne began. One man said he saw a beam of light surrounding Marianne from above and it reached out into the room as if scanning the audience. He felt it was from a Spacecraft immediately above the area. A lady reported seeing what appeared to be a type of television camera, switched on and all ready to go.

The Vancouver Associates extend their thanks to Miss Francis for both this session and the lecture at Oakridge Auditorium, and wish her speedy return once more."

Information about future meetings in Vancouver can be obtained from either:

Sec.-Treas. - Mrs. Bernice Young, 156 West 12th Ave., Vancouver 10. B. C.
President - Mr. Harold A. Pym, 2907 West 6th Ave, Kitsilano, Vancouver.

MANIFESTATION

Greetings, our brothers, our sisters in Light. The title of our talk with you is Manifestation. At this particular time in the affairs and events of mankind upon planet Earth, a period has been reached which is difficult to define in our terminology; perhaps even more difficult to define in yours. For many years we have communicated to you, our brothers, our sisters, of the imminence as seen through our eyes and our recording equipment, of change: Change in all its aspects, overall change on the face of your planet. Now, change is all about you in the consciousness of Man, in the changing standards, ethics, moral patterns. Change is, indeed, all about you and is fast taking place geologically even as it is in consciousness.

We find ourselves now in the position of looking on at affairs as they move on their appointed pattern and of communicating to you our thoughts of the next phase of operation: that phase we have entitled MANIFESTATION. We have entitled it this for a very good reason.

The time for consciousness adjustment, balancing, unlimiting, is almost over. Those who have not adjusted, unlimited, and balanced in consciousness have very little time left to do this before the mighty changes of a very physical nature make themselves felt. In the meantime, manifestation of not only our intent, but manifestation of our presence and of energy, of power, of Universal Light, is about to begin. By Universal Light, by energy, we speak of that power which permeates the Universes of God, which flows directly through all systems: Power from the Creator, from that being itself:

Manifestation of the substance of Light, manifestation of its workings in the hearts, minds, consciousness, souls, of those who are our own upon this planet and those who aspire to be as the children of Light and walk into the new radiance of a New Dawn.

Manifestation is beginning in its first phase with the outpourings of energies through the vehicles or bodies which are being used at this time by our peoples on this planet. Manifestation of ENERGY what does this mean? It means, my brothers, my sisters in Light, that as this energy is tapped in all its majesty, magnificance, unlimited quality, as it pours through the vehicle or vehicles of our peoples and of the children of Light upon this planet, that those things which were previously impossible will become as simple child's play; that herculean tasks will be performed with ease, that mountains will be moved as molehills; that the consciousness of those who might be termed hard in heart, closed in mind, will be reached and will be shaken as by a great force, by a power which, as the tape you have just heard has said, may not be gainsaid.

The energies of Light pouring through in their purity are energies of untold potency, vibration, and power. The mountains of Man's consciousness may be scaled, may be looked upon in a light previously unknown.

When the Light of the Universal vibration pours forth, changing the molecular structures, the cellular structures of all physical matter, the vibrating atoms spinning then at higher frequency vibrations, will incorporate within themselves the god pattern of being; and manifesting this in all its intent upon that level, will produce what mankind of this time will call miracles. Miracles, being but the outworking of Cosmic Law, will become the new order of the New Age. Manifestation of Universal Light is the phase and the pattern now commencing on planet Earth.

It is of no moment, my brothers, my sisters, as to the name of beings manifesting from high realms of spiritual identity. It is of moment and import as to the validity of that which cannot be gainsaid. Names are of small importance viewed from the higher realms of Man's consciousness, both discarnate and incarnate, both Devic and Space. Those who would proclaim that within a name lies import, significance, are deluding themselves with the importance of their own small concerns.

We who speak from Space, from the craft stationed above this mountain locality, the Saturn Council directives, speak of energies, of Universal Light, of beings of Light and sons and daughters of Light. We speak in terms of Service, of manifestation of Service, of manifestation of Love, of manifestation of Compassion. We speak not of identities. Those highest beings, by whatsoever name they choose to manifest to various groups, carry significance only within the vibration of that which they bring and that which they, in essence, ARE.

These things are undeniable, these things are the stamp of an evolved being or soul. Be not, therefore, deluded by the noisy concerns of those who would bring upon this field of endeavor, confusion and concern for small things. The concern now is placed upon the VIBRATION ITSELF, MANIFESTATION OF UNDENIABLE SPIRITUAL POWER and IDENTITY. All who carry this stamp, carry it in their actions, in their eyes, and in their words, but not in one only, but in all that they are and they do.

Manifestation of Divine Light, of Universal Energy, takes place in this your year of 1968 in its first and primary phase. From this point onwards it moves forward into other phases, carrying those of you who are prepared in consciousness into the etheric levels of existence and that which you have been taught to understand as the Frequency Change.

My brothers, my sisters of the Earth planet, I speak with you in love, in Light, in understanding, in brotherhood. I speak beyond you also, to those to whom my words will reach. I speak now to many thousands for the words which we utter go forth through this and many channels of Light to the children of the Earth planet, to prepare them, to assist them, to comfort them in the time ahead.

Great changes are upon you and manifestation of the Light energy will uphold all who turn

within to the source of the god self of the Divine and the Christ consciousness of being. For the rest, as they turn into the pathways of greater destruction, that which has been termed the separation of the wheat from the chaff on planet Earth takes place, in all its divisiveness, in all its final rending, even as the substance of the Earth itself divides between Light and dark.

This which we say to you upon this occasion is of import; carries with it the authority of the Saturn Council and the imprint of truth in its vibratory quality. We urge that you study our words, for soon it is our intention to reach out also by means of tape recordings through this our channel, as the new phase enters in and takes its manifestation also. The time for talk of change is ended. The time for manifestation of change is with you.

Talk no more, our brothers, our sisters of the Earth planet, but ACT. Cease to bewilder yourselves with the confusions of a confused planet and walk your pathways directly in confidence, in love, in compassion, and in surety of the energies which you draw about you and within, and emanate to all in your environs.

Our brothers, our sisters, I have spoken on this occasion at some length. I identify solely at the wish of those present as Sut-Ko of the Saturn Council. Truth, however, bears its own stamp within the soul of those who hear. Truth most certainly rings its own answering chords within the soul of the evolving ones and needs no names for guarantee.

In the Light of Our Radiant One, I bid you, Adonai vassu baragus.

(Telethought transmission, Solar Light Center, 27 July 68. Channel: Marianne Francis)

GUEST CORNER —

From: TESKA

WHITE STAR RELEASE

DESKA SPEAKS ON — TIME VALUE

Changes have been rapid since the turn of your Planetary Year which took place at the time of your Winter Solstice. All factors which involve the evolutionary progression of your planetary cellular life have been accelerated, creating reactions in all human and sub-human intelligences.

The affect of such acceleration is felt and responded to by all energy fields involved upon Earth; in ALL her life-energy levels-- from the lowest vibratory densities of life-streams unto the highest. LIFE on all Planes of Expression.. likewise... in ALL its Degrees of Awareness... has responded. Some toward constructive progression -- others toward destructive chaotic purpose.

To find balance, in the shifting elemental, psychic, and mental fields of influence, presents a great challenge to those mentalities which, having Power of Choice, can rectify adverse conditions by their attitudes of firm, positive stand toward Stability. But those, who have little awareness of what is transpiring, give vent to accumulated emotions through acts of violence and expressions of abandonment.

The speeding up of vibratory conditions -- likewise, brings forth a New Concept, wherein the command of a stable mind, produces quickly, desired results. While the unstable can likewise create chaos as rapidly.

The Time Factor, which has been a blessing to humanity, allowing for rectifying of energies of thought before the manifestation of their results, now lessens in its length, bringing forth with rapid manifestation, those conditions which are dwelt upon, both of a positive as well as a negative value.

It has been taught that...Energy Follows Thought...and the Result of Thought is its IMAGE. The Creation of circumstances follows after the Pattern of Energy Concepts. However, the Time involved for culminating an Energy into a Result of its Content, has been of a Frequency-Duration, and end results have been a conglomeration born of consistent variations of Thought Patterns which rapidly change in man's awareness, and constantly play upon each other, modifying original concepts with conditioning compensating energy wavelengths. A thought Image, before fully manifesting a reality of itself, has been changed and modified by Changing Concepts.

New Energy Potentials now bring forth the closing in of TIME, allowing less opportunity for change of mind before Results of thoughts set in motion. The awareness of this advent of Conditions have been given, plus the Methods which man must learn to use to keep Attuned and properly prepared to handle his Mental Energies in order to maintain himself in the New Age Consciousness.

Special Issues which have given Keys for Mental Attitudes, have been given forth, not in a sense to spiritualize man's soul, for that comes with Growth and Unfoldment, but Methods of Thought Attitude to assure him a retention of sanity and living balance.

The NOW of thinking has become the Now of experience...and the ensuing days will bring Time into a contraction which will bring about INSTANTANEOUS RESULT. An energy of thought creates a chain-reaction after its Kind...which, if Negative, swallows up a man's Victory, once it gains its action.

Thinking NOW, with POSITIVE CONSTRUCTIVE POWER, will bring PEACE into the Eternal NOW of experience...but to think NOW of a negative past, or a fearful tomorrow, brings the Reaction into the immediate field of experience...emotionally immediate, if not materially immediate...but, the Material becomes ever more rapidly a NOW EXPERIENCE.

GUARD YOUR THOUGHTS, and KEEP EVER IN THE LIGHT OF WISDOM !

From: WHITE STAR, P.O. Box 307, Joshua Tree, CA, 92252. Aug. -Sept. 1968.

THE OLD ORDER PASSES

Greetings, our brothers, our sisters in Light. We have spoken to you on the last occasion of our discourse on the subject of Manifestation. During that discourse we acquainted you with the fact that Time as you know it for the expanding, the unlimiting of consciousness was, shall we say, "running out" on your world scene. We did not wish to convey the thought that at the time.. at the future of manifestation there would no longer be expansion, unlimiting, evolution of consciousness. Obviously, this could not be so, however, that which we did wish to convey was the imminence of CHANGE in its overall aspect and manifestation of Light energy, frequency change upon your planet, your world scene.

When we spoke of the running out of time, we spoke in terms which, perhaps, might be better understood if we elaborate to a certain extent on this concept. We have stated that the period through which your peoples have passed was one wherein a speeding up of the processes of consciousness was taking place. Through many means your peoples have attempted to unlimit, to evolve, to experience. The innate being of mankind upon planet Earth has, for many thousands and thousands of years, experienced through the rawest of conditions many things which have brought about a slow and gradual understanding within him of the forces by which he has felt himself controlled. Yet, in the last twenty-five of your years, an awakening has come to some of your peoples that these forces do not control but may be controlled, even as Man himself reaches out and expands in awareness to become the master of that which he surveys.

Certain of your peoples, in misunderstanding this concept, have attempted to force upon their surroundings and their fellowman in dictatorial manner their own aspects or concept of ego. This concept is false in that it does not take into account or understanding the divine nature of Man in his eternal, immortal being. Only as man, in that immortal being expresses, may he become lord of that which he surveys. You have listened to a tape which spoke to you of love, of beauty, of service and of compassion and of consideration. Only as Man understands of these attributes of the God-self, does he become consciously at one with his own divine essence, And in becoming one with that essence, he then is able to manipulate the forces of Nature and to live in harmony with himself and his fellow beings of all gradations of consciousness upon this planet.

In the period of time through which you have recently passed, of two of your so-called world wars, a tremendous acceleration of consciousness has taken place, due to great negativity and destructiveness which Mankind has been combatting within his own nature and with the conditions within which he finds himself at this time.

Now, in the last five of your years, attempts have been made by many of your peoples to expand the consciousness through means other than that of mysticism, philosophical discourse, or so-called religion, and through the use of drugs, an attempt has been made by Man who is seeking, to force upon the doors of consciousness or perception to other realms or levels of being. We have touched on this subject previously. We understand of the reasons WHY man has reached outward and, in impatience of thought and of being, has thought to throw open the doors of perception. No longer content with the three-dimensional world in which he physically finds himself, he has sought the other worlds from which his immortal being once came.

At this time we do not speak in terms of that which is advisable or inadvisable, but what he has sought to experience. Experience being the great teacher upon your planet for the many, it has been necessary for those who sought to know from the very essence of their beings of the reality of other worlds, for soon will come the time of the frequency change, and the catapulting of the New Race of man into a state of etheric, or partly etheric, vibratory existence. This New race of Man will be comprised only of those souls who have, as you would say in your terminology, made the grade in consciousness. It is of this subject, this evolution, unlimiting of consciousness, of which we have spoken so constantly in our discourses with you.

Even as Man is reaching outward, rapidly now comes the molecular change which will affect all molecular structure upon the surface of your planet. Only those who are so prepared and adapt to this change, to this higher vibration and become the New Race of Man, will move into the new density of the frequency change which is taking place, not only on this, but on all planets in the system. Because Time, even as you know it in your computation of years, is rapidly running out, we have stressed the consciousness evolvement, the unlimiting of the areas of mind previously closed with dogma, with rigidity and with lack of plasticity.

Now we have spoken with you of manifestation of Light energy, beginning in its first and primary phase in this year of 1968. We have rarely (though we sometimes indulge in this) put a date upon the beginning of a cyclic time in your calendar time. We have done this for a very specific reason. As the universal energies of Light pour forth from the Central Sun throughout this system, and throughout all planets in this system, the very molecules vibrating at an increased frequency will force Life, and the Life waves on this planet and others, into a new re-assessment of all values previously held.

Other planets in this system, as we have previously told you, are prepared, and are aware of this coming change. Yet the great masses of your peoples, except in a sub-conscious manner, are not. Now, as this change begins in its first phase, those on your planet who have understanding, who are aware of the nature of what is taking place, will be called upon to act as leaders, directors, comforters, wayshowers, to those who are stumbling, yet who seek the new awareness.

We do not speak now of those, and there are many, undoubtedly many millions, who will not, again to use your phrase, make the grade at this time. We speak only of the on-going ones who move forward at this time of cyclic change. We speak at this time to those who have understanding, to those who have ears to hear and eyes to see, to those who are aware of what is taking place in its many manifestations and guises.

As the great outpouring of Light flows in with the waves of energy, the changes will be rapid indeed, and many of your peoples who are only half prepared, will find themselves caught up in conditions of which they have little understanding. Then will come the time of the wayshowers, of the Lightbearers, to hold forth what must become the torch of understanding, of love, and of compassion to the children of the Earth planet in order to assist them through the change.

Once again we make mention of that which has been termed in your Biblical phraseology the separation of wheat from chaff. Knowing that this will take place, we do not need any longer to dwell upon the destination of those who are not as the wheat. For these things follow the workings of Cosmic law on this and any other planet. As the times change, and as the consciousness of Man adapts, so do the bodies or vehicles which are no longer required, or cannot withstand the increased energies, lay themselves down to be reactivated in another form, in another season of time.

Time is cyclic, my brothers, my sisters; time marches onwards throughout the galaxies of God, in cycles beyond cycles and in vibratory waves of energy, bringing forward at each new casting upon the shore those treasures which exist and have been garnered from the great sea or ocean of consciousness. At this time, the waves casting forth upon the shore, break and reveal, perhaps, but a few treasures, brightly gleaming in the sand of Earth, yet these few, this humanity, is the beginning of the New Race of Man, of the new consciousness of the dawn of the Age of Enlightenment, of the age of interplanetary brotherhood and travel. If you would be one with this and with these, know that your consciousness of being alone, and the love which resides within you to give unto others, is the key, and THERE IS NONE OTHER.

The time has gone for the buying and selling of souls. The time is past for the buying and selling of Man's birthright. The time is past for all things of the old order. In consciousness of being, in the Light of Our Radiant One, we see Mankind of planet Earth, moving forward into

a New Dawn of an Era of Light. We who walk in consciousness with you from many planets from within your system, coming at this time to impart that essence of our beings, that love from our very souls, walk with you and will be as one with you at the time of the manifestation of universal Light energy.

With those thoughts, and with that essence and outpourings of our beings (for I speak for many on this occasion) I leave you, my brothers, my sisters. Yet are we with you many times in consciousness as we gaze upon the surface of your planet.

I, Orlon, transmit upon this occasion from Saturn Command sources. Adonai vassu.

(By Telethought transmission, 31 August '68.

* * * * *

NEVADA UNDERGROUND NUCLEAR EXPLOSIONS BELIEVED CAPABLE OF TRIGGERING BIG QUAKE

The Atomic Energy Commission has set off two underground nuclear explosions from its Nevada test site this year and while they hardly have disturbed the gambling habits of Las Vegas residents, the blasts are becoming a controversial issue, particularly among people who feel they may provoke a major earthquake....

The trouble is that scientists have just learned, somewhat to their surprise, that large underground explosions are followed by a swarm of small earthquakes, unfelt but measurable on delicate instruments called seismometers. Since tremors have been known to trigger other tremors with cumulative effect, some experts are beginning to wonder if some day a thumper might trigger disaster.

On one side of the controversy are civic leaders who want underground testing of superweapons halted pending positive proof that it is safe. Ranged against them are makers of government policy who insist the risk is far outweighed by the need to perfect nuclear weapons....

The thumper that started all the furor came last Jan. 19. Although not the most powerful of the more than 250 underground blasts set off in Nevada up to that time--one in December 1966 had a bit more yield--it unexpectedly jolted buildings as far away as Salt Lake City and Los Angeles. It registered 6.2 on the Richter magnitude scale, which pegs major earthquakes at 7.0. For some unexplained reason, it was called Faultless. ---

Flying over the scene later, geologist David Slemmons of the University of Nevada photographed giant cracks in the earth three miles long and with an upward thrust of more than 15 feet.

TREMORS INCREASED

In addition to these tangible effects, Faultless triggered other events. Seismologists intensified their studies of earthquake activity after blasts, and big landowners demanded that future megaton testing be postponed until results were known. Nonetheless, an even bigger blast 100 miles closer to Las Vegas was set off April 26 at a slightly greater depth, 3,800 feet. It was called Boxcar and had a magnitude of 6.5.

After checking Faultless and Boxcar, Dr. Alan Ryall of the University of Nevada privately circulated a report showing that all explosions of magnitude 5 or greater were followed by an increase in seismicity -- earthquake activity -- for at least one day and in some cases up to five days.

Seismologist Ryall also found that after five recent explosions, the number of earthquakes recorded was at least twice as great as normal. Ryall's report concluded that effects of continued firing could be cumulative, "possibly resulting eventually in a sizable earthquake." - - -

Last Sept. 30 the AEC issued a statement that it "recognizes that some seismic energy releases occur shortly after, and in the vicinity of, underground nuclear detonations."

(Quoted from The Sunday Oregonian, November 3, 1968)

The data here presented is a complete verification of material received through the Tele-thought channelship of Marianne Francis over the last ten years concerning major geological upheavals. Data of an identical character has been received by many valid contactees (both physical and telepathic contactees) since 1947.

Quotation from an article entitled "UFOs, Earthquakes and Volcanoes" by Gordon Creighton, published in FLYING SAUCER REVIEW, Vol. 14, No. 4:-

"Many people have criticised our governments because, as is alleged, they are so 'cagey' about this business of the UFO's, but we should bear in mind, too, that there are plenty of other topics on which our political and technological rulers prefer the policy of the immortal Br'er Rabbit.".. "I have a feeling that one of these 'delicate' matters upon which we aren't being told too much relates to the question of whether there is good scientific evidence that planet Earth is headed for another spell of immense geophysical upheaval, and that in no remote geological future either, but perhaps in the lifetime of some of us now here."

"I know that geologists, from Lyell onwards, like to be preachers of the gospel of 'gradualism' in these matters. But I notice that, during the International Geophysical Congress held in Helsinki, in 1960, a sensation was created by the top Soviet delegate, Belousov, who declared, in a paper read before the gathering on July 26th, that vast quantities of magma are now on the move within our planet and that titanic upheavals, involving vast areas of the planet, are at hand.

Belousov, chairman of the USSR's Committee for the Geophysical Year and one of his country's most distinguished geophysicists, does not exactly fall within the category of 'small fry'. I have press clippings from European newspapers about his bombshell lecture, but so far as I know, nothing about it got into the British press. (In subsequent correspondence with the Soviet Committee for the I.G.Y., I received from him what may possibly be the 'official' version of his talk, but there are discrepancies and I think he perhaps went much further at Helsinki than the authorities would like)."

Quotation from PLAIN TRUTH magazine (Sept. 68):-

"Scientists had believed that volcanoes in Antarctica were dead...not merely dormant. Until early last year all reference works could only point out one active volcano in all of this southernmost continent. But, in January of 1967, New Zealand geologists revealed the amazing discovery of a second active volcano on the rim of Antarctica. Then in the following December, the volcano on the appropriately named "Deception Island" exploded. So suddenly, in fact, that trained scientists, lacking the discernment of penguins, were completely caught off guard. This third volcano, the second within a single year...had suddenly mushroomed and sent a jolt through the world's scientific community!

Something BIG, it is now admitted, is beginning to happen under the Earth! Scientists are concerned. They know that volcanic activity in the otherwise seismically quiet continent of Antarctica heralds TREMENDOUS significance for the rest of the world! It means we have entered the age of unusual earthquake activity. Antarctica is the barometer of world-wide seismic activity. Once volcanoes on Antarctica begin to

erupt.... LOOK OUT!"

"Worldwide Underground Revolution"

"Scientists from many nations are now busily trying to discover the import of these subterranean happenings. The 'International Study of the Upper Mantle' is now in progress..... Paradoxically, 1967 was, overall, the earth's quietest period in more than 70 years! Only six major quakes occurred. The average is 16 per year since 1897. Good news? No... rather an ominous development! 1967 was merely a quiet period in which subterranean stresses were building up for future tremendous volcanic and earthquake activity! A worldwide earth revolution is now beginning to take shape."

"Dr. Perry Byerly, a former professor of seismology at the University of California, admits: 'Something world-wide is going on, but it is hard to say just what it is... we don't know what. But Great Forces are at work in relative patterns, trying to pull out continents in one direction or another. This is due to something below, a GREAT STRAIN THAT IS ACCUMULATING...' (emphasis ours)." - End quote.

Quotation from SAGA magazine, July 1968:

"KILLER QUAKES"

"A catastrophe, say the geologists and seismologists, is inevitable in this country. In fact, they say it is long overdue"... "According to experts in seismology, like Dr. Clarence R. Allen, a geologist with the California Institute of Technology, it WILL happen." ... "California is literally a state living on top of a time bomb. In a remarkable survey, the nation's most prominent geophysicists were asked, a few years ago, 'Do you believe a major quake is due in California?' Nearly two-thirds answered with a resounding YES!"

"The next one is expected to strike within the continental limits of the U.S. where, in most areas vulnerable to earthquakes, population masses have built up to huge proportions. Obviously, the more population density, the more potential loss of life.".... "Aren't there any spots in the U.S. that are, by reason of their geology, completely earthquake-proof? The answer is, sad to say, NO. True, the area that binds Alaska and the Aleutian Islands is the most active and dangerous earthquake area of any affecting us directly, with close to 50 major convulsions creating upheavals since the turn of the century. Equally true, the West Coast region with its massive San Andreas fault--running an awesome 2,400 miles from off the Oregon coast, down the Golden State to the Gulf of California--is a potential quake disaster area of massive proportions. SCIENCE NEWS reports that in California alone, over 10,000 earthquakes have occurred in the past 30 years."

"Want more? The entire southern coastline is an earthquake zone. So are the mid-Mississippi and St. Lawrence River valleys. There is a seismic region in New England and--few people are aware of this--New York State had a severe earthquake all its own less than 100 years ago."....

"Furthermore, the science of seismology has become much more sophisticated in recent years; as a result, old theories are being questioned and startling new discoveries are being made. There is more going on underneath the ground than even the most astute scientists of yesteryear dreamed of. The upshot: poor old Mother

Earth--already wracked by wars and revolutions, ravaged by hunger and disease-- is now felt to be much more vulnerable to natural catastrophe than it was previously thought to be."

"Consider these astonishing, alarming observations made by geologists and seismologists within the past eight years: (1) At the present time in England, some land is inexorably sinking into the sea. (2) Simultaneously, land in Scandinavia and Canada is steadily rising to higher levels. (3) The land masses encompassed by the continents of Africa, Australia and South America are moving, imperceptibly, in a northerly direction. (4) A section of California is sliding into the Pacific Ocean at the rate of two inches a year."

"But the traditional earthquake belts are by no means the whole story. It was during the International Geophysical Year, 1957-58, that scientists concerned with the workings of Mother Earth received as much of a shaking up as Mother Earth herself has gotten on some memorable occasions. That was when the Lamont Observatory research ship VEMA, as well as other vessels fitted out for research work, made the rounds of a system of seismic recording units newly-installed on a global basis. What the researchers found out had only been suspected before. Stretching some 40,000 miles under the world's oceans is a fantastic chain of mountains and valleys, peaks and canyons. Some higher than the Himalayas, some deeper than the Grand Canyon, they practically encircle the Earth twice over."

"Their significance? These submarine trenches, these rifts some 6,000 feet below the ocean's surface, stretch and strain and gorge up matter from the mantle below. In effect, submarine trenches are 'tension cracks' in the Earth's crust and, according to Leet, 'places of greatest instability in the rocks of the Earth.' They trigger off earthquakes and volcanoes; furthermore, over a considerable period of time, they put pressure on the continental crust, contributing to earthquakes there."

"And what does this new discovery mean? Obviously, that the Earth's underpinnings are even more shaky than was thought.".... End Quote.

Further to this data, we have the channelled material from one of our subscribers who visited the Center last September. This is presented here as additional data:

"June 22, 1967. - Father within:-

Seismologists are beginning to be apprehensive over the 'ominous silence' of the San Andreas fault, fearing it is building up to a tremendous upheaval in the earth soon. Are their fears groundless or are we to experience a real earthquake soon? Please. There are no fears in me, as you know." Answer:

"Your earth is in a state of agitation everywhere, in men's mind as well as in the earth, and this can be seen by your many wars as well as the many floods, tornadoes, cyclones, fires and eruptions in the mountains, but this is to be expected at a time when the earth is reaching its climax for entry into a newer and higher vibratory rate. It is a time of revolt in nature and all old things must pass away that the new can take its place. So must it also be in the world of man. All who are unprepared to live in accordance with the laws of God must be removed from the earth that they do not bring their discord into the new world so soon to come."

"The San Andreas fault has been inactive for a long time. Not since the 1906

disaster has it been actively engaged in changing the surface of the earth but soon, soon it will again revolt over man's method of extracting from the earth the wealth it has to give and once more it will 'revenge' itself by sundering itself from its moorings and this time will the destruction be so devastating that few will remain to tell of its power. For much of the coastal earth will slide into the sea, leaving so wide a gap between earth and water as cannot now be imagined. When this time comes, then will all things of earth be changed, for everywhere on earth there will be chaos, chaos of the most horrible kind, chaos which God in His mercy must bring to an end quickly lest all innocents are lost with those who brought about their own destruction."

"Hold fast to your faith in God's love to bring you through the period so soon to come. It is fast reaching its climax."

"Thank you!"

* * * * *

Quotation from SCIENCE NEWS, October 7, 1967:

STRAINS SHOWING IN SAN ANDREAS FAULT

"Definite signs of strain that may indicate the imminence of large scale displacements are showing up in two places along the San Andreas Fault. The two areas are near Cholame, Hollister and Paicines in California's coastal range, and the Santa Cruz mountain area near the towns of Felton and Ben Lomond."

"They were identified in papers presented at a conference last month on Geologic problems of the San Andreas Fault system, sponsored at Stanford University and the Geological Survey, and held at Stanford."

"Near Hollister, according to a paper read by Robert A. Wallace of the Survey's Menlo Park office, the fault has been moving 0.45 inches a year for the past seven and a half years. In that area, he says, 'chances are great...that the most recently active strand will again be the sight of...surface breaks.'"

"In the Santa Cruz mountains, according to Professor Joseph Clark of the University of California at Santa Barbara, 'geologic evidence does not preclude large scale later displacement...' End Quote.

EARTHQUAKE FELT IN MIDWESTERN STATES

Associated Press (Sun. Nov. 10, 1968). A strong earthquake centered in Southern Illinois shook more than a third of the United States yesterday, rolling across at least 22 states. The shock was felt by millions of persons. It swayed numberless buildings. But there were no immediate reports of serious damage or of any casualties..... Carl von Hake, acting chief of the National Earthquake Information Center, said the quake had a magnitude of 5.5 on the 10-point Richter scale, which is just under the usual damage level of 6. -- The quake was the most severe in the eastern half of the nation since 1944. The quake was centered near the fault in Missouri that caused, perhaps, the nation's worst quake back in 1811 which reversed the Mississippi river by shifting earth and causing it to run upstream!

Greetings, our brothers, our sisters in Light. I, Orlon, speak with you on this occasion as you stand on the very brink of MANIFESTATION itself.

Much data has been given to you, in the last three of your months, of quality, if not quantity, concerning the changes which are all about you. Now we speak at the very brink or edge of CHANGE in these last three months of this your year of 1968.

The tremendous energies now being released through and from the Central Sun source are reaching into this Solar System and are vitally affecting planet Earth. You will be aware of these energies, as we have told you for the last year of your time, in what might be termed a higher and a lower octave of frequency. We will speak first of the higher octave.

This will be what has already been termed MANIFESTATION, manifestation of the LIGHT ENERGY in all its most creative phases, releasing powers of Light and of Love within the individuals so attuned and recognized as our instruments upon the surface of the planet. Miraculous events will take place: That which has seemed outside of natural law and has been called miraculous, however, which we know of as the outworkings of a higher or more universal Law, and therefore, in our understanding, within the scheme of things COSMIC.

As you attune with the higher vibrations, you will feel yourselves at peace, at peace within the heart, the mind, and the soul. You will find yourselves attuning with what has been called the music of the spheres, and you will hear sounds in this stillness that you have not previously heard, sounds of great beauty, the Symphony of the Spheres!

Take time, our brothers, our sisters of the Earth planet, to attune in the stillness, in the quietness of your own souls and in the still places of Earth with these higher octaves of frequency as they flow in now in their fullness, for in so doing, you will assist in stabilizing and clarifying your own beings.

Now, I speak of the second phase or the lower octave, rather than phase, of this frequency inflowing. This will bring about, and already is bringing about, a tremendous increase in what could be termed destructive type geological and related changes. These changes are intensifying both as to quality and quantity, and many areas of your planet are experiencing and will experience tremendous and overpowering effects of weather, unrelated apparently, to normal cycles or patterns. Earthquake activity is now manifesting around what you have termed the "Circle of Fire" and will follow a pattern around this circle as of an impulse being directed around and around this area.

First one location will be affected and then, as if the impulse moves on, another, and another at varying points around the circle of fire. Your own West Coast line is due to be affected in the not-distant future to a considerable and, what might be termed by your peoples, disastrous degree.

For many, many of your years, we have warned your peoples and we would have prevented what will, undoubtedly, be a tremendous disaster to many of your large coastal cities. However, it is impossible for us to intervene further in the free wills

of your peoples. We will do all that we can do to assist at the time of the upheavals, that is, that which we are allowed to do within the framework of Cosmic Law, in the internal affairs and karmic outworkings of another planet.

Other events, even more catastrophic, could be and may be triggered off by the breaking up of land masses and the resultant inrushing of tidal waters into areas previously untouched by these. Do not expect your policital machinations to proceed along their predestined paths. The economic disturbance which will ensue following the greater catastrophic events will be such as to precipitate chaos, not only within the scene of this United States, but within the world scene or pattern of events.

Three months remain in the time of this your year, and within these three months much will be precipitated and will continue on in manifestation into the year of 1969, of those events of which I have just spoken.

Those who are our channels, our emmisaries, our peoples upon this planet, working in their varied catagories and performing their appointed missions, will be sent and directed into specific areas to act, in a sense, as catalysts in those areas. For those of you who remain here in this area of anchor point or Light descent, it is well that you unify at all costs and pool your Light energies, for the stabilization of areas such as these depends to the highest degree upon the stabilization and unification of the individuals so involved.

Where there is an area of Light descent by energy anchor point, it can only function to its optimum efficiency according to the efficiency and functioning of the human vehicles who reside in said area. The stabilization of individuals and the indrawing and outpouring of Light and Love from the soul center of every individual concerned, regardless of personality, is a minimum requirement...a minimum requirement, my brothers, my sisters, for the performance of the mission of Light bearers.

Such will be the disturbance which is coming on your world scene...such will be the chaos within individuals, that only those who function from their own point of stabilization, their own point of Light within, and who function through Love, will remain uplifted and in the higher vibratory frequencies, protected against all onslaughts of all forms of destructiveness...and there will be many!

I speak upon this occasion with much solemnity to you gathered here this evening, as this is the last occasion for some weeks that I may converse with you in this manner. My channel had no knowledge of my communication, as is usual, upon this occasion, however, we have been attuning with her for many hours of this day in preparation for this particular contact.

The many demands of the world scene which will be put upon all Light bearers, all chanel of Light, in the coming weeks and months, will draw greatly upon you all. Even as you give forth of Light, stabilization, and energy of Love to assist others, draw in to your very beings from the highest realms and from the Universal Light which is flooding your planet, to replenish yourselves and to remain vitalized and, shall we say, re-fueled.

I am transmitting upon this occasion from Saturn Command Source, from the

Communication Craft stationed above this mountain locality. I transmit data of import and suggest that it be issued to each before my channel leaves in order that it may be studied and utilized in the time ahead.

The Solar eclipse which occurred recently has been as a trigger point for certain energies which are now, and I do not have the word within this one's vocabulary, shall we say: are acting as contact and release points for the many disturbances within the Earth itself. Do not be surprised at the erratic behavior of those within many of the larger cities due for upheaval, for these individuals as a mass are already within the vibratory pattern of molecular disintegration and are experiencing this reality within their beings, whether they are consciously aware of this or not.

Individuals who are now within such areas and are not destined to be part of the destruction, will either be removed by direct impression to so remove, or will be placed in areas where they may assist in holding some point of stabilization in such case. They are part of our pattern for stabilization and will be protected. For the rest, their own particular destiny or karmic patterns will manifest at the time of the upheavals.

Having spent some time discoursing upon the lower frequency outworking, I would again draw your attention to the tremendous upliftment of attunement with the highest frequencies of Universal Light as they now flow in. Attunement at these levels may bring about spiritual experiences, spiritual rebirth, and what could be called, a type of spiritual ecstasy. You have, therefore, the two extremes: Yours, oh people of Earth, is the choice! Yours alone is the choice. We know which choice we would make but we cannot choose for you.

I speak with much love, much feeling for my brothers, my sisters of the Earth planet, on this occasion. The outpouring of Light and Love which we feel in its entirety is of such magnificance, such beauty, such warmth, that we would share it with you if you will but permit us.

In the Light of Our Radiant One, I leave you. May you be encompassed with that Light, at one with it, and enfilled with its radiance.

Adonai vassu, my brothers, my sisters.

* * * * *

"The spiritual spindles are actually weaving the web of a universal history; the spiritual shuttles are threading the warp and woof of a new garment to be worn by the children of a New Creation, whose aim will be the union of all the souls of the inhabitants of the Stars in the religion of Love."

-- Song of the Caravan, by Mirza Ahmad Sohrab

THE INVISIBLE UNIVERSE

Recent scientific research has revealed that much of creation is not visible to the human eye but is radiating at frequencies outside the normal range of visibility. Most people can observe light waves in the narrow range from 5,000 to 7,800 Angstrom Units. This is only a very small part of the known electro-magnetic spectrum as can be seen in Figure 1.

Science has made much progress in extending the range of frequencies which can be observed and measured. Infra-red photography and radio telescopes have widely extended our observations of the Cosmos, while electron-microscopes and particle accelerators have extended the range into the sub-microscopic and sub-atomic range. Special techniques using various types of detectors enable us to measure radiations from the lowest sub-sonic range to the highest Cosmic Ray frequency.

Studies made at the Mount Wilson Observatory by California Institute of Technology have revealed that the night sky would appear remarkably different to us if our eyes could detect infra-red radiations as well as visible frequencies. The well-known constellations would no longer stand out due to the addition of thousands of unfamiliar stars whose radiation in the infra-red range is much greater than in the visible range. If man's vision were extended only a little further, into the infra-red range, think how different Greek mythology might have been!

An interesting article on Infra-red Stars appears in the August 68 issue of Scientific American magazine. Experiments are described in which infra-red radiations in the two-micron range were measured using a 62-inch plastic mirror to scan the heavens. This wave-length is about four times that of yellow light. Several basic problems make it more difficult to study infra-red rays than visible light. Earth's atmosphere absorbs much of the radiation from outer Space. Fortunately, however, there are certain "windows" which allow some frequencies to pass through. Such windows exist at wavelengths of 1.65 and 2.2 microns as well as at 3.6 and 4.8 microns. Broadband windows also exist between 8 and 14 microns and between 17 and 22 microns. The 2.2 micron range happens to be the most convenient to use.

FIGURE 1.

Another problem with infra-red research is that detectors for this frequency range are only about one-thousandth as sensitive as those used to measure visible light. To compensate for this, it is necessary to use a large reflector. Also, there is more "noise" from background radiation due to thermal energy in the environment. Even the body temperature radiates and must be shielded during experiments.

Results of the studies made at Mount Wilson show some very interesting features. Visual observations of the night sky reveal about 6,000 stars normally seen by the unaided eye. Of the 5,500 infra-red stars which have been plotted, only about 30% can be seen from their visible light. Thus, if our eyes were sensitive to infra-red, we would see an additional 3,850 stars or 65% more than we now see in our night sky! Imagine what new constellations would appear!

Radio astronomy has revealed even more unusual sources of radiation called Quasars. The nature of such invisible stars or energy sources is not well understood as yet. The Galactic Center of our system has been the object of special studies. The position has been determined by measurements of the "Milky Way" rotation, however, the center itself is not visible. An infra-red map of the center shows a strong point source near the center with a wavelength of 2.2 microns. Radio measurements at 1.9 centimeters also show a radiation source in that area. It would appear that a very large star might be expected at the very heart of our Galaxy. However, from the scientific research so far, it appears that the Central Sun of our Galaxy may not exist on the strictly physical level at all.

Thus, could it be that our Central Sun exists only at the ETHERIC or higher levels of manifestation???

NEW UFO SIGHTING IN SPAIN

MADRID (UPI)— A Spanish meteorological station Saturday reported a fresh sighting of an unidentified flying object. The report came shortly after a flying object had been witnessed by thousands of Madrilenians Thursday night.

The Meteorological station at Cuenca, northeast of Madrid, said it kept a UFO under observation for several hours. It said the object remained stationary at a great height for more than three hours, then moved off in a westerly direction. The station said the object appeared to be triangular, the same shape as that seen in Madrid.

The report was the latest of several from different parts of Spain in recent weeks. The Spanish Air Force has sent up aircraft in unsuccessful attempts to get close to objects picked up on radar screens. But the things were reported high above the range of conventional jet fighters.

The air force suggested in a communique that the latest sightings may be of a meteorological balloon making tests for future flights of supersonic aircraft. One such balloon came down in Logrono, northern Spain, Friday. It was quickly reclaimed by technicians from the French National Center for Space Studies. The technicians said they had followed the balloon from Pau in France by car and plane and that there was no possibility that it could have accounted for the UFO sightings in Madrid and Cuenca.

The Spanish Air Force said Friday that the unidentified flying object easily eluded a supersonic F104 jet fighter scrambled to intercept it Thursday night. An official announcement said the pilot climbed to an altitude of more than 50,000 feet and reported the object was still above him when he had to return to base for fuel. Another pilot flying at 36,000 feet reported seeing the same UFO.

"BLINDING LIGHT"

Air Force radar screens tracked the mysterious triangular object which some observers said gave off a "blinding light". Radar men said the object was flying at 90,000 feet and moving slowly when picked up.

The Air Force announcement said it had no scientific explanation but suggested the object might have been a meteorological balloon. The Madrid Weather Bureau said it had no lost balloons and offered the theory that the object was part of a Space Satellite returning to Earth.

Radar operators and the nearby U.S. air base at Torrejon, and at Madrid International Airport reported nothing unusual on their screens.

By June of Venus

Greetings, our brothers, our sisters in Light. I who speak with you upon this occasion, have not spoken for some space of your time. I am June of Venus, as my name is known to you at this time. I speak to you on the cadences or tones of Light, relating to you a concept of the varying gradations or tonal qualities of Light energy or Light outpouring.

As I speak with you by tele-thought transmission, as I transmit my thought impulses and receive those flowing out from you in my direction, I see many colors; colors which interpenetrate, which move, which flow outwards, constantly changing. As these colors flow out into the ethers, they bring with them the energy of the Light Force inherent within the individual from which they came.

Light cadences, or tonal qualities, reflect the soul, the entity, the being, around which they are built, created, brought into being; for from Man flows many levels of expression: conscious, unconscious, superconscious. And on these many levels, or cadences, or tones of being, Man expresses himself through the Universe unto other forms and levels of Light. When the highest radiations pour forth in softly subtly interwoven hues of brilliance, density, manifestation, then flows through that being the pure white Light or energy from that Source we speak of as Our Radiant One or Being of Light, the All-Knowing One, Creator of All.

When these cadences, or tonal qualities of Light, become distorted from their purity of source by the coarsening of the lower earth mind or consciousness or mentality, then flow forth cruder, less subtle, less softened hues of expression, bringing into being or manifestation actions and reactions of violence, of enmity, of confusion. Thus it is that the Light energy, the cadences of Light flowing from their highest source, must be received down through what is known as the Crown Chakra and, thus permeating the being, they issue forth unsullied by the coarser vibrations of what has been known as animal man.

In this period of time, energies flowing, crossing, interweaving, are those coming from the highest sources of being and those rising from the lower consciousness, from the earth animal-man mentality into the ethers of planet earth. Though it may appear that the more dominant coarse qualities of Light predominate, and that the subtle, softened hues are delicate and fragile, it is but that one is of a higher vibratory composition than the other.

The more spiritualized nature of Man in responding to the higher vibratory call, is calling down the white Light energies from the Godhead, and in calling this down, it issues forth from the Children of Light on the planet, and though appearing subtle, fragile in hue, gentle in composition, it has a tenacity and a spiritual strength of energy composition which allows it to permeate into areas where force could not; softly flowing, issuing forth interweaving itself, and leaving its essence in the workings upon consciousness. Consciousness itself, in its ever-changing expression, guided many times by the emotional nature of Man, sends forth at another level of expression, these same energies into the world of concrete thought and concrete action, and

in the emotional nature of Man once again is found the same divergent energies, from those of the coarsest passions to those of the highest, purest, most elevated expressions of love, compassion, tenderness, harmony and beauty. In that this time, into which Earthman moves, is the time of sudden and abrupt changes, it behooves him to manifest within his auric patterns at all levels of being or expression, the pure cadences of Light, that these may flow forth into the world of manifested endeavor, and produce an edifice of etheric composition, building upon this an actual bridge or energy field between third-density Man and fourth-density Man, so that across this bridge, Man of the New Age, the New Race of Man, can step into the world of the manifested Light.

The concepts which I am attempting to convey are conveyed with some difficulty, as the planetary conditions and areas through which I transmit are not most conducive to the transmission of free-flowing thought energies. I ask your indulgence, that my discourse has been somewhat halting. I have endeavored to present a clearer concept, albeit somewhat subtle, of the confirmation and conjoining, in a sense, of Light, color, sound, and action: These are but manifestations of the one, original Energy: all energy flowing directly from the God-source or Creator, Our Radiant One, aptly named by us Our Radiant One, unto all manifested life and creation.

I, June of Venus, attune with you upon this occasion, bringing in the Venusian ray through this my channel of Light expression, grounding the energies from our own planet through the vehicles of those who can so receive these energies, these energies of love, of beauty, harmony, compassion, and creation. Endeavor in consciousness to carry these attributes into your conscious expression in the days through which you walk. For LIGHT IS, and all else is illusion.

With the love and the Light of my planet, of myself and my daughter Gloria, I leave you. May Our Radiant One be at one with you.

(By Telethought Transmission, 21 Sept. '68. Channel: Marianne Francis)

WANTED: MEN and WOMEN

Single or married, young or retired. Willing to work and willing to live an almost monastic life on Orcas Island, located in beautiful Puget Sound in the State of Washington. All kinds of work to be done: building, gardening, printing, office work, maintenance, cooking, etc.

NO PAY....but all personal needs taken care of. Do not apply if you have strong family ties now, or cannot transfer your love and loyalty to a new family--and work...and share in God's Plan for the LEWIS FOUNDATION. You're needed; you're wanted...and you can help. Write us about yourself.

OUTLOOK INN, EASTSOUND, WASHINGTON

LETTERS FROM OUR READERS

16 Sept. 68

Dear Marianne Francis and Others of the Solar Light Centre:-

You may enjoy knowing that I was healed of a thought-to-be incurable mental and emotional illness of many year's standing at your (Marianne's) beautiful, wonderful lecture at Victoria.

I am most grateful for this healing, and for the wonderful messages of Hope and Life received from your Centre since. Your little STARCRAFT magazine is the most vital and timely publication in this field that I know of anywhere.

Will you be so kind as to send introductory copies to the persons on the accompanying list? I am sending you ten dollars and many, many thanksgivings and good wishes to help you with this so important work.

With love and best wishes,

(signed) Owen D. LeBaron

Victoria, B. C.

* * * * *

(The Healing Mr. LeBaron received has been confirmed by friends, and by his daughter)

- - - - -

THANKS FOR YOUR LETTERS AND SUPPORT

Thanks go to all who have subscribed to STARCRAFT and/or made contributions to further the work in any way. Since we are still very short on secretarial help, we have not been able to answer all letters personally, but try to keep up with orders for lectures and material. Special thanks also to those who have helped organize public meetings and lecture tours.

We appreciate receiving informative letters and clippings of general interest, however, due to lack of space, only a few can be published. Some are printed in Starcraft from time to time if they are not copyrighted. Our apologies for delays in filling orders and for any mistakes made. Please let us know if you do not receive your order in a reasonable time.

CENTER NEWS AND TRAVELS

After returning from the June/July lecture trip, I promised myself to relax and swim and generally catch up on nervous energy. Some of this was achieved despite the heat of August and the long dry days. Fired with enthusiasm by the sight of the new carpet, I determined to finish the redecorating of the large room here in which all our Guest channelling sessions take place. As of this writing, it is largely completed and much admired by visitors. The color scheme of green and white is cool and restful and the amethyst accents complement my large collection of African violets. Still needed is \$500 to \$1000 and a volunteer carpenter to build on the extra bedroom so badly needed, and the remodeling of the kitchen area. But progress has been made. The planting of next Spring's bulbs is next on the schedule.

All Guest Sessions of July, August and September were very well attended and many new faces, plus our faithful supporters, were greeted. Material of much importance was received is included in this issue of STARCRAFT. September passed in a blur of activity preparing for the Fall lecture trip. One highlight just a couple of days before leaving was the lecture I gave to 1500 students at the Medford Senior High School on "Telepathic Contact with Space Intelligences".

October 6th saw me leaving the Center for Portland where I stayed the weekend and then on to Seattle and Vancouver. A miserable virus of the sneezy type made the first six day rough going in spite of quantities of vitamin C. It seemed to be an epidemic.

A ten-minute interview on Television in Vancouver opened the publicity, followed by radio interviews on the Jack Webster (CKWX) and Mark Raines (CJOR) shows. The interview with Mark Raines was particularly well conducted and allowed me to bring out much data of value. Finally, the lecture on the 14th at the Oakridge Auditorium arrived after a busy week. Due to a slight oversight, the hall was booked for the Canadian Thanksgiving evening and this cut the attendance somewhat. However, much literature was sold and an enthusiastic question session followed the lecture. Thanks go to my hosts and dear friends, Irene and Harold Pym, and to all members of the Committee who worked so hard and efficiently to make the meeting a success. Special thanks also go to Bob and Joan Gale for their help and use of their home for meetings.

The ferry trip to Nanaimo on the 15th was stimulating: cold fresh air, a blue sky

with great white clouds, and grey gulls following the boat. A pleasant stay with my hostess, Elyse Dial, who arranged the lecture in Nanaimo and the radio interview on CHUB with Larry Thomas, another interviewer who really gets down to the "meat" of the subject. Chemainus on the 16th and the opportunity to share material with the delightful and enthusiastic group who meet at Joan Carnac's home.

Dr. Leslie Lambert, very beautifully and expertly chaired my lecture in Nanaimo, leaving little room in his opening remarks for critics. On to Victoria the 18th and a three-hour stint on Ralph Pashley's radio show. I shared the first twenty minutes with a couple who travel, make movies, and have twin lion cubs aged 5 months. Later I saw the cubs and fell in love with the boy lion! I suggested they mail me a lion for Christmas, for I have always longed to own one again...shades of Egypt! Now, I am afraid I might get my wish! The inhabitants of this mountain have had many problems with skunks (both the two legged and four legged kind) and I am afraid a baby lion might just prove too much for them! In any case, Precious Jade, my "littlest lion" (he thinks he is) takes a rather dim view of his larger cousins of the cat tribe!

My thanks to Capt. Christofferson who arranged the lecture in the theatre of the New Provincial Museum in Victoria, and to Owen LeBaron who assisted. A long question session and then on to talk further with interested people from the audience wanting to form a group of Solar Light Associates in Victoria. Lovely memories of love expressed and shared, especially with the younger set and the hippies who attended the lecture. Kenneth Kellar was able to come up to Vancouver for the lecture weekend. Also, Harold and Irene Pym crossed to Victoria for the lecture there and Kenneth joined us too. All that extra help and support was of tremendous assistance.

Orcas island again...and a few days rest at Outlook Inn. Louis was on tour, so Stephan, Laura and Jeannie held down the fort. Rain and sunshine, misty sunsets, and a freen island nestling in the grey waters of the Straits...moss and waterfalls, writing letters and generally lazing around....a peaceful time.

Seattle, and the last lecture at the Aquarian Foundation with capable Dick Kiltz chairing. The "Call of the Phoenix" lecture was requested and very well received. An "alive" group and most appreciative. Many thanks to Thelma and Zady for hospitality.

Friends to visit in Puyallup on the way back: Rachel and Loren - keep up the New Age research...we need you in today's world. On to Portland and some time with old friends and new. A long-held wish to meet Erica Strath-Gordon at last realized; also her friends: Lu and Monty Woolly. Thank you, Erica for a wonderful evening and a new and dear friendship.

Home at last, via Roseburg, and the mountain and its peace and quiet, so welcoming after the noise of the cities. Did I say peace?? Well, there were problems on the mountain when I arrived. Yet I can't help feeling the largest problem is removed at last from this locality, even as the Brothers said it would be.

The Winter is nearing and monthly Guest channelling sessions are discontinued. Please phone us to check on snow conditions if you wish to visit. Also, I may not be here all Winter as I am planning to do some research, writing, and catching up now that the lecture season is over for 1968. It has been a year of discovery, challenges, long trips,.. the ending of one phase and the beginning of another, in all, a wonderful year.

In Light,

Marianne Francis

ANNOUNCEMENTS

GUEST SESSIONS: Regular Guest Channelling Sessions will not be held at the Center during the Winter months due to weather conditions and bad roads. Also, Miss Francis is expecting to be away part of this period.

LIGHT WORKERS NEEDED

Older couple wanted to live on mountain and assist with Solar Light Center. Must have own car and pension or small income, as all work is on a volunteer basis. Help is needed with clerical and domestic work and some gardening. Hours would be short and help needed only three or four times a week. Excellent opportunity for service-minded couple to give much-needed assistance NOW when it is so urgent. A single, strong woman might be considered if used to living alone and in the country. Trailer space possible, but septic tank and well need developing.

HOUSE FOR SALE

A house is now for sale on the mountain for a total of \$6,000 with only \$600 down payment and \$60 per month. Also, a wooded lot is for sale in a good location near the Center. Electric power is available for all lots in the area as well as telephone service. Water can be developed by shallow wells. Most homes in the area use fuel oil for heating. If interested, write us for details.

PUBLICATIONS of the SOLAR LIGHT CENTER:

Lectures by Marianne Francis:

FREQUENCY CHANGE AND THE SECOND COMING	\$1.25
