THAT'S A GOOD QUESTION

Under the above caption, Medical Doctor William Bolton, as the Editor of the said department in "today's health", a monthly publication of the American Medical Association, wrote in its March 1953 issue an answer to an inquiry about:—

"COLOR THERAPY

Question — A friend tells me that a method called color therapy is now being developed by which various illnesses may be treated successfully. Do you have any information about this?

Answer — From time to time, theories are advanced that color may have value as a treatment adjunct in medicine, but we do not know of any evidence that a specific disease ever has been cured through the use of color alone. Various colors may have some value so far as mental attitudes of many patients are concerned, and this idea has been utilized in some hospitals. For example, walls and ceilings of hospital wards or rooms may be painted a light blue or green because such tints are believed to have a soothing effect. In general, colors probably should be considered for their secondary effect in helping a patient to overcome excitement or worry about an operation or illness."

TREATMENT BY "SILENT SOUND"

The same Medical Doctor in the November 1956 issue of "today's health," wrote a long article on the treatment of kidney and gall bladder stones, relieving pain, soreness and tenderness in certain kinds of bursitis, periarthritis, fibrositis, tenosynovitis, myofacitis and myositis, rheumatoid arthritis and osteoarthritis, successfully by means of "Silent Sound," "Supersonic Waves" or "Ultrasound," which is Sound Waves that the Human Ears can not catch. Sound upto 32,768 Oscillations per Second can be heard, but, after that range the Human Ears can not utilize it as Sound and the said Medical Doctor recommends for "Silent Sound" treatment 500,000 to 1,000,000 Oscillations per Second.

So, if that Frequency can produce the stated results, what about the Oscillatory Frequency of our **Visible Spectrum Of Color,** which has what I described and utilized decades ago as:—

562,949,953,421,312
Oscillations Per Second???

This publication is an answer to the stated view, as in our service to our Members, their own convictions by their personal investigations, researches and experiments will give them the accurate view of the Truth behind the Visible Spectrum. Let the reader judge for self.

DISLOCATED HIP, INFLAMED NERVES, HARDENING OF LIGAMENTS, TIGHTENED MUSCLE, SWOLLEN ANKLE, SKIN DISORDER, ITCHING REPORT BY M. H.

I had a Dislocated Hip for many years; on the same Leg my Nerve was inflamed, Hardening of the Ligaments and Tightened Muscle. Took Orange and Lemon Systemic Front and Back and am feeling 75 per cent. satisfied. My Right Ankle was very red and swollen upto my Calf. I took Turquoise and Lemon and was normalated in two weeks. I also had a Skin Disorder on my other Leg, the size of half a dollar. Had Itching and burning sensation. Tonated with Turquoise for 3 months and it was healing fine. (Signed and Affirmed Before F. J. V., Notary Public.)

* * *

LUMPS IN BREASTS, SICK HEADACHES REPORT BY H. C. H.

Four years ago, I was sent by my Doctor, who had been taking care of me for eleven years, to a Surgeon, who advised the removal of both Breasts, because, I had large Lumps in each Breast; they were afraid they might be malignant. This worried me greatly and I did not want to go through with the Operation; each day, one of my neighbors suggested that I try the Visible Spectrum and this I decided to do. After about 15 Tonations, I felt so much better that we decided to buy one of the machines. I followed the diet suggested and continued the treatments at home and after six months, the Lumps in my Breasts had disappeared. I had gained considerable weight and felt better than I had ever felt in my entire life. All my life, I had suffered with severe Sick Headaches; have had none of these either since using the Color. I also took Thyroid Tablets every day for eleven years; have had no Thyroid Medicine in five years. Do not need it and am able to do all my own work and really feel well and enjoy working. I shall always be very grateful to my friend and neighbor who recommended the Visible to me. (Signed and Affirmed Before J. McM., Notary Public.)

* * *

SEVERE HEADACHES, EYE WEAKNESS, HAIR COLOR REPORT BY F. B.

I purchased my Color Projector on April 6, 1934. I had been pothered with terrific Headaches for six years, due to an Accident which occurred when a street car hit the automobile in which I was riding. Had medical attention, but, it seemed that no Medical Doctor could understand my case as to why I had these severe Headaches, weakness of my Right Eye and

also affected the color of my Hair. These Medical Doctors advised me to take a weekly Serum Injection, costing $5.00 per Injection and for a period of at least one year, though no guarantee of absolute cure. One day A. K. came over to my home and told me about the Color Projector and the marvelous results in healing Disorders and maintaining health. I was positively sure A. K. was truthful in his statements and immediately gave him an order for my Color Projector apparatus. I have used it to neutralize many conditions in my home and am absolutely convinced it has great merits. Space is very limited to explain all the successful experiments I had used this equipment for in my own home. I send my praise and highest respect to the Originator Col. Dinshah P. Ghadiali and all those through which source he had received assistance to invent this marvelous instrument — a blessing to humanity, the Color Projector. If at any time I can assist or be of service to the Originator of the Color Projector I shall be glad to do so. (Signed and Affirmed Before E. R., Notary Public.)

A VISIT TO OUR V. S. R. INSTITUTE

By:— L. O. from Wisconsin

A week's visit at our V. S. R. Institute has enabled me to observe actually the many handicaps under which our President Dinshah works. Truly, he is doing a marvelous job, but, daily he wishes to be relieved of some of the many details, in order to use his precious time for bigger projects long waiting to be begun. The lodging at the Resident Quarters of the Institute was a delightful experience. The sleeping room itself is beautiful. You would not believe it unless you would come and see it. The walls of each room are of beautiful knotty pine. Each room is supplied with plenty of reading material, besides being equipped with a Radio and also a Color Projector for Tonations. The meals served were delicious and varied. Anyone who might be new to the Rational Food System and not understanding it, might say through lack of experience, "Well, what **can** we eat?" — here is a good solution! Go there and learn it! I benefited greatly from my visit to our Visible Spectrum Research Institute. It was both educational, enlightening and healthful.

EDITORIAL  REMARKS

We thank you cordially for your kind visit in opening the Resident Quarters. The accommodation at present is very limited and is open solely to female Members. The rate is uniform at $5.00 per day, all inclusive. Reservation must be made in advance.

SPECTRAL SMILES

Researcher — Is it true that women now shake hands more than they used to before?

Smile — We do not know about the hands, but, records indicate that they shake the pockets of men more than before.

Researcher — If a male friend going out meets another male friend who has with him a female friend, should the male friend stop to converse with them?

Smile — He may, but, should leave before the female friend cracks a compliment, otherwise, there is a liability of losing a long time friendship.

Researcher — In your pink Chart you advised me to sleep in a separate bed; what shall I do with my wife?

Smile — Do not worry for her; she will find the solution.

OUR STUDIO ACTIVITIES

EXPERIMENTER FINDINGS AND QUERIES

MEETINGS OF THURSDAY, AUGUST 1, 1957

First Cleveland Ohio Studio

J. D. — I had a very serious Accident to my Left Hand, when I tried to lower a window which was burnt and the glass was broken. The sash cord also was burnt and broke in the process of closing the window. The window dropped and cut the back of my Hand severing the Tendons of three Fingers. I went to the Hospital where I had several stitches and my Hand is now in an open cast. It is badly swollen and the discoloration is a deep purplish black. I am now tonating with Lemon Systemic and Indigo Local on the Hand. The Hand gives me much Pain while under the Indigo Tonation. The Colors were suggested by the Institute when I sent my Personal Research Information Chart.

F. B. — I went to the store; the street is uphill. On my return home, I became exhausted; I had to sit down and rest many times; finally, I had to be taken home by automobile. It seemed like I had no use of my Legs. I sent in my Chart and the Institute suggested Yellow on 6, 7, 8, 9, 10 and Magenta on 4 and 18. Tonight, I put forth the effect to attend our Meeting by making the trip in an omnibus. I came under my own power; I feel better now, tonating with Yellow Systemic.

(A. M. read Chapter 105, from Volume 3, Text Books Set, on Magenta The Goddess Venus.)

* * *

First Merrill Wisconsin Studio

Member 1 — I wonder what to do for Arthritis.

Member 2 — I used Indigo; used other Colors also, but, occasionally used Indigo.

(W. B. read some remarks from the St. Louis Studio Report.)

M. S. — I am 61 and work very hard. I have been using Turquoise for quite some time. I have Sore Muscles and a Strained Back from picking strawberries all day.

W. B. — I used Turquoise for Strained Muscles which I had by doing manual labor to which I was not accustomed. I became normal.

A. G. — I used Magenta on 18 for Pain in that Area; I was normalated.

W. B. — I went to K. B. in Milwaukee and took an Itisometer Test which showed a good chart with the exception of Area 11; used some Scarlet and Magenta on 4 and Green Systemic and am getting along much better.

(The Members were admonished to take the Tonations on time, because, that way the benefits are much better.)

D. N. — May we have an explanation of the following:— "If you start Tonation on an unfavorable day, will you get as much value as on a favorable day?" Also:— "If you take a Tonation the night of the Full Moon, will you get results?" There is some confusion in the Respiratory Rhythm Guide, which states there is a Full Moon on a certain date and yet in the lower paragraph states that the same date is a Favorable Date to start Tonations.

EDITORIAL REMARKS

The questions raised by D. N. are sensible, but they are indicative of some misunderstanding. There is no **harm** in starting any Tonation on any day, the only consideration is that the Body may not be ready for it. The Full Moon and New Moon are the Low and High Critical Times when if the Body of the Sufferer be unbalanced, there is a liability for Disorder to flare more. The dates marked as "Preferred" apply solely for **beginning** a **new** case and **not** for **continuance.** A zealous study of the third volume of our Text Books Set, Chapter 113, "Occult Operation Of The Vital Vehicle" is needed. The subsequent Chapter 114 has some more elucidation. I appreciate your interest in our Science.

* * *

First Milwaukee Wisconsin Studio

F. K. — Good evening, what a wonderful surprise. Here is our President Dinshah! (Applause) I want to read to you from "Good Thoughts," on August 1:—

PROGRESS

Progress is the goal of every process
Of existence; even apparent retrogression
Is essentially a Progress in eventuality,
The top of the wheel, in making a revolution,
Seems to reach the bottom, when in actuality
It is always on the top; Progress thus
Becomes an idea, a conception
And is present in all occurrences.

Motion is Progress,
It is in everything,
Retarding any motion,
Means loss of Progress.

I remind you all about our Fourth Annual Convention; it has a very interesting program; I advise everyone to be here. I shall read to you the program. The program I had for tonight, I shall keep for another Meeting, because, this evening it is my pleasure to introduce to you the Originator of our Science Dinshah P. Ghadiali. (Applause.) I like to say that we have a large Membership, but, this hot weather will keep some away. Do you know that two people from Florida came up to be here tonight. They have an orange grove and grow natural oranges.

Dinshah — She is a Naturopath, R. B. — F., you come here!

F. K. — It is an honor; I shall learn.

Dinshah — He is a Trustee of our Organization; where are all the Members? My friends, you heard the program; I was to attend in Chicago, Illinois a Joint Convention of The American Naturopathic Association, Inc. and the American Association For Medico-Physical Research, but they postponed their Convention for certain reasons, hence, I came here early. Making success of any organization is upto the Members; it is upto you to make a success of our organization.

F. K. — Now, let us have your questions; here is the man to answer your questions. Who will be the first one to ask about the advantage of the Visible Spectrum?

L. K. — I got advice from the Institute; it is my husband who is diabetic and we are going along. When he stays on grain and raw sugar, he does not eat all his meals at home. Are there two kinds of Diabetes?

Dinshah — This is one subject in which our Science is the one in the World. There are two kinds of Diabetes — Diabetes Insipidus and Diabetes Mellitus; in the former there is plenty of Frontelim without excess of Sugar, while in the latter there is a quantity of Sugar being voided. (He then explained clearly about the difference between Dextrose or Grape Sugar, which turns the beam of Light to the right and Levulose or Fruit Sugar which turns the beam of Light to the left. He emphasized that the Dextrose passes out in the Diabetes Mellitus, but the Levulose is absorbed by

the Tissues. He further explained the reasons why in Diabetes Mellitus we feed the Sufferer with Starch and Sugar, making clear the principles of Polarized Light.)

Questions were asked about Pain and the like and Dinshah told them that would be all explained in the Convention.

F. K. — What about those people who take Shots continually?

Dinshah — They will never tell you what happens afterwards. I thank you very much for having me speak at the Studio Meeting.

* * *

First New York New York Studio

In the absence of the Chairman and the Reporter, the Vice-Chairman conducted the Meeting and J. J. took the notes.

H. M. — I slipped and sprained my Ankle and took Indigo without results. After taking Orange, I felt better. I was also hit with a rubber hose on the Leg by playing with my dog. The Vein stood out in a big Lump; one Tonation of Orange and the Leg was back to normal.

P. Z. — I sprained my Ankle; tonated with Orange and Indigo and felt well again.

T. W. — I suffered with Headache; tonated with Green and Yellow; felt well after it. I want to know what Light to use for Migraine Headaches.

H. M. — Send your Chart to the Institute.

F. R. — I suggest that we ask Dinshah to write more about Atomic Radiation Burns, so we would be enlightened and know how to tonate. I refer to the men he tonated for such Burns.

A. K. — I had good results tonating with Turquoise and Magenta on 4 for Hay Fever.

F. H. — I did not receive my magazine for 4 months.

H. D. — We should get our friends interested in reading the magazine; through that, they might be interested in buying Equipment.

H. M. — I shall read to you from our Text Books Set, Volume 2, Chapter 50 about the Attributes Of Red Attuned Color Wave.

EDITORIAL  REMARKS

T. W. sent no Chart to the Institute. Atomic Radiation Burns may be either from the Heat side or the Ultra-Violet Cold side. The Tonation for the former should be on the Ultra-Green and the latter on the Infra-Green Division. Each case needs its individual study. F. H. did not write to the Institute about the magazine being not received. All complaints

should be promptly sent to the Institute and I assure you they will receive due attention. F. H., please let the Institute know upto which month you received.

* * *

First St. Louis Missouri Studio

C. N. — I should like to know which Member would like to attend the Convention. The Member will have to bear own expenses.

(There being no response, the question was laid over till late in the evening.)

C. N. — Any Case Reports?

A. K. — My husband had Sore Throat, which was becoming worse day by day. Finally, it was decided he had better go to the Doctor. I told him that if he would stop smoking, I should tonate him. Used Orange Local and Magenta on 4 and 18; the Throat cleared in 3 days, but, husband has not smoked since! My granddaughter who is 3½ years old has what the Doctors call Impetigo and my 12 year old daughter some times baby sits. What Color should I use in case she contracts it?

Member — What is Impetigo like?

C. N. — Blisters would form and itch; by scratching, they would open and run and where the fluid would spread, it would cause more Blisters.

V. S. — I doubt if it was Impetigo; they had purchased a new home and the back yard was not sodded; with all the wet weather this Spring, it was impossible to get anyone to fix the yard; it is just covered with weeds and when it was possible to work in the yard cutting and pulling the weeds, I have had the same symptoms twice. I came to the conclusion that it must be some kind of a weed poison. The first time, it spread all over my arms, torso, legs and face; I had it about 3 weeks; it was very uncomfortable and severe. The second time, it started on my Fingers and I made up my mind not to scratch. I kept it confined to my Fingers and it lasted only 10 days.

Member — What Color was used?

V. S. — I did not use any Color. I was interested in the Disorder and was curious to know what the duration would be; if I should ever contract it again, I shall use the Color and then be able to give a true report.

C. N. — How would the Members deal with this situation?

Member 1 — Green and Lemon.

Member 2 — I suggest Yellow or Lemon.

R. B. — I suggest Green, Yellow on 6, 7, 8, 9, 10, Magenta on 4 and 18 and the proper food.

C. N. — You covered about all.

A. K. — My daughter is expecting her third child. I was very displeased when the daughter told me that the Doctor had given her a Polio Shot to prevent it.

Member — What could be done in case of Hiccough?

O. S. — Two methods can be employed; if not near a Color Projector, press on the Diaphragm or place fingers back of the ears and press the Phrenic Nerves.

C. N. — I want Color suggestions.

Member — Orange.

C. N. — That is correct. A man came to me hiccoughing 40 per minute. The Kardoscil and Spiroscil was not in rhythm; used Orange and in an hour's time, the Hiccough was reduced to 5 times and in 2 days was normalated.

Hay Fever was discussed. Turquoise and Lemon were means of normalation. Poison Ivy was next in line; Turquoise Local, Lemon Systemic, Yellow on 6, 7, 8, 9, 10, Magenta on 4 and 18. Miliaria or Prickly Heat was discussed. Various opinions were expressed.

A. K. — My 12 year old daughter never has a natural Bowel movement and then only every 2 or 3 days. This trouble has existed since she was born. Yellow or Orange do not help her. She eats plenty of fruits, but, nothing seems to help her. I give her about ¼ teaspoon of Salt in a glass of water and just in a few minutes she has a Bowel Movement.

V. S. — I warn you that is not good, as the Salt Water draws the other fluids of the Body and drains the System.

Member 1 — I suggest Suppositories, to help relax the Muscle.

Member 2 — Radiate the Color Yellow directly on the Anus.

G. S. — What shall I do about perspiring so profusely that I may put on a dry shirt and in less than 4 minutes the shirt could be wrung out. It is so wet and I do not urinate as frequently.

C. N. — I tell you not to worry about it. The Skin is the largest Organ for Elimination of impurities and if that be stopped, you will be a sick man. In your case the Skin is relieving the burden from the Kidneys. Will you give a report about your son? I may give it, but, it is always more welcome if it comes from the individual concerned.

G. S. — My son will be 17 years old in August. When a baby, he started out with Rash. The Doctor treated with Salves and when baby was older, fed him Goat's Milk. The Rash would clear up in the Fall and would break out again until Summer. He could do nothing; the Doctors wanted to give Shots. A friend suggested taking him to C. N. who started Tonations; became much worse; then, began to clear up with the exception of the Hands. They became very bad and my wife wanted to stop, because, the Hands had not been affected before. I stood adamant, saying that was the reason the boy should stay with the Lights and I believed the Light was doing good and I had faith in C. N. At the present time, the Skin is entirely cleared. Used Orange Systemic, Scarlet on 4 and 18; then, Lemon and Yellow on 6, 7, 8, 9, 10 and Magenta on 4, 18.

C. N. — Skin Disorders are very difficult to control; they always become worse.

Member — I have a lady friend who needed change of her Eyeglasses. The regular Eye Doctor could do nothing and sent her to a Specialist who charged $10.00. He gave her a prescription and when she took it to a Druggist, he told her that he did not have that particular Medicine in stock for years. The Druggist called 3 wholesalers and they informed him that the manufacturers of that Medicine had discontinued it since 1930! The Druggist then called the Specialist and asked for advice. He was told to tear up the prescription, which he did not do, but, returned it to the lady.

J. C. — I am a Student; what can be done for Sinus Disorder?

C. N. — Did any of you Members have such condition?

R. B. — I had a Sore Throat and the Pain settled in the Lower Jaw for a week. I could not sleep and went to C. N. to be itisized. It was discovered that there was trouble in the Lymphatic Glands and the Mastoid was badly inflamed. Used Turquoise Local, Magenta on 4, 18 for 4 days; it became worse, the Mastoid becoming badly swollen. In about a week's time, I felt better.

J. R. — Before I knew about the Light, I had severe Headaches and Ringing Sounds in the Head. When we got the Color Projector, we used it and now I have no more Headaches or the Ringing Noises; they just disappeared.

Discussion began on Dogs being injured. One Member related that a rock had fallen on a Dog's Face and had smashed it. While he went into the house for something for the Dog, the Dog disappeared. He thought the animal went to some place to die, but, three weeks later, the Dog returned very thin, but, as good as new!

C. N. — Our Dog must have been in a fight, because, he was badly bitten on the Back and as badly torn between the Legs. I was afraid of the Dog, so, took a large piece of cardboard to carry the animal home. I gave him Color several times and in about a week, he was normalated. Then, another time I was called that the Police wanted to shoot the Dog. He was running around in circles, frothing at the mouth and the Dog had turned blind. The Police will not kill a Dog without permission, so, I promptly went to seek permission to take the Dog home. The Police are of the impression that I am a Doctor of some kind, so, they let me take him home. I tonated the Dog and the next morning, when the Police came to my home at about 8 o'clock, they were amazed to see the Dog well!

An article from a newspaper about the American Cancer Society blaming Smoking as a cause of Cancer was then read.

C. N. — Now, I again request to let us know if any Member desires to go to the Convention, if not I shall go.

W. B. — I propose that the Chairman should go as our Delegate.

W. W. — I second it.

Unanimously passed.

EDITORIAL REMARKS

A. K. was wise in not tonating unless husband stopped smoking. Impetigo is an Inflammatory Skin Disorder characterized by Pustules and may be tonated like any other Skin Disorder. Hiccough is an Involuntary Spasmodic Contraction of the Diaphragm and indicates Indigestion. Tonate Area 8 with Yellow. Fast eating, not enough chewing may produce that symptom. Miliaria or Prickly Heat is an Acute Inflammation of the Perspiration Glands and shows by formation of Patches of small red papules and vesicles with intense itching and burning of the Skin. It is caused by excessive Sweating in hot weather. A. K. should send the complete Chart of the granddaughter, showing what she is fed and drinks in a 24 hour period. The opinion of V. S. was correct.

* * *

First Detroit Michigan Studio
Meeting Of Thursday, August 8, 1957

As previously announced in our June 1957 issue, because of the visit of our President to the Studio, the regular Meeting of the Studio was held a week late. An unusual attendance of 74 marked the event.

A. G. — Good evening, friends! I am very glad to see such a fine turnout. I assure you that this evening will be well spent, as it is our privilege and pleasure to have with us a very distinguished guest. I like to present to you now the Originator of our great Science, Colonel Dinshah P. Ghadiali!!! (Rising ovation with applause.)

Dinshah — I am only a guest this evening and am highly honored to be here after so many years. We have present here tonight an exceptional case of a long time Member. I granted him a Special Dispensation under our By-Law 40, Section 1, so that his wife and three children could attend this Meeting. Since the children may not stand the strain until 10 P. M., will they please come forward now? (He then introduced J. B. the Member and L. B. his wife and their three children M., A. and M. requesting J. B. to describe his daughter's case.)

J. B. — When the baby A. was born, two years ago, she seemed perfectly normal. At the end of the first five days, when the mother and child were scheduled to leave the hospital, we were informed that the baby could not be released, as the baby had turned blue, accompanied by serious complications. She was immediately given Cardiograph Readings, X-Rays et cetera and her illness was diagnosed as Congenital Heart Disease. We became quite alarmed at this news, especially since she had been nursing and perfectly healthy the first five days. She was placed in an Oxygen Tent,

quite lifeless and remained thus the following twenty-two days under Oxygen and also was given Digitalis. Subsequently, an extensive examination was made at the ---------- Hospital and four Doctors deliberated, but, they could not determine the cause of her condition. Consequently, in spite of grave warnings from the Doctors, we finally gained custody of our child and took her home. We called the Institute and were advised Orange. She vomited. We were also advised Lemon and Magenta and she began to improve steadily. Her Kardoscil ranged from 160 to 180 per minute, against a Spiroscil of 120-140, a Ratio of much less than 2 to 1. Dinshah told us not to worry and we continued the Orange, Lemon and Magenta Tonations. After 2 months, her Ratio was 2 to 1, with her Spiroscil about 60-70. We fed her raw milk with brown sugar and water and today, her Ratio is about 3 to 3½ to 1; she eats Yellow Split Peas, Beans and the like. During this time, she also received Tonations of Yellow, Turquoise and Green as required, but, she was given Magenta on Areas 4 and 18 the most. She behaves presently as any normal child, full of pep and only occasionally when she cries exceedingly hard, is there slight evidence of discoloration.

Wife L. B. — Thank you Colonel Dinshah; we are very grateful and happy that you pulled us through.

(At this point, Dinshah extended his hands toward the baby A. and she jumped into his arms, among the laughter of the audience and got a big hug!)

Dinshah — I can not pat myself on the back; I would only break my arm and head also. Today, there are 11,250 Color Projectors in use; in Detroit, there are many dozens. Many people ask: "How is it possible for you, without any help, to aid so many? How can you help people in Detroit, when you are hundreds of miles away in Malaga, New Jersey? I shall explain the reason and how I produce the result. Will a lady step forward, please? (S. S. volunteered.) Madam, if you have 2 apples and I give you 3, how many will you have?

S. S. — The answer is 5.

Dinshah — Can anyone make it 4 or 6?

S. S. — No.

Dinshah — No one can. The Sciences in this World of Arithmetic, Algebra and Geometry no man can change. Our Science of the Visible Spectrum, is based on that Mathematical Science. It took me 30 years to discover how one Sun, a ball around 93 million miles away can produce on the Earth fruits, vegetables and animals, all of which have breathing processes.You can put a black Seed in the ground, fertilize and water it and the Sun shines on it; yet, how does the Seed know what to produce, be it a Cucumber or a Tomato? I shall tell you a little of my life story. When Nebuchadnezzar the tyrant of Babylon destroyed the Temple Of Solomon and took the Jews as prisoners, it was the decree of King Cyrus of Persia and Media, which ordered the liberation of the Jews and restored the Tem-

ple. I am a humble descendant of that ancient nation; I raised 7 sons and 1 daughter in this Country. At the age of 2½ years, my mother sent me on the arms of a nurse to Bhulia Mehta Primary Gujarati School in Bombay, India, at the age of 8 years I entered the Proprietary High School. I must admit I was a very mischievous boy and that mischievousness was my salvation. Nothing ever just happens. Every thing is created. I found in an old book store Fownes Chemistry and bought it for five cents. From it, I studied about Hydrogen, Oxygen, Magnesium and the like. I had a father of high temper and very religious. I was given the name "Dinshah," meaning "King of Duty." Every son there takes the name of his father after his and the last name shows the profession of the parent. In my case, it means "Son of a Watchmaker." My mother's name was "Sunabai," meaning "Lady of Gold." She was of a kind nature, but, was under the strict temper of my father. I had no bedroom at home, but, slept in a small vestibule. I nailed all my tools and things on the wall. I read a book on Photography and wanted to experiment with some Elements including Magnesium. We lived on the third floor and a tailor shop on the opposite side of the street occupied the ground floor. As I conducted my experiment by lighting the Magnesium ribbon, seeing the brilliant flash, the tailor broke in with cries of "Fire." There was really no fire. Just then, my father came in. I had a grandmother who was even more religious than my father and she said: "Paddle your son; he will burn up the whole house." Father asked what happened and then grabbed all my scientific apparati and smashed them, throwing all the Chemicals into the gutter. I had to start all over again, so, in order to earn some money for experimental research, I thought I might fix some Electric Bells, Annunciators, Electric Lights and Burglar Alarms. I painted an appropriate signboard made of one inch thick wood and hanged it outside a window of my father's room. The next morning, my father noticed the newly varnished board and losing his temper, intending to break it, dashed it to the floor. The inch-thick board did not even crack, so, being further enraged, he lifted the sign from the ground and banged it right onto my neck. Blood gushed from my mouth; the crimson sight filled me with anger and losing filial respect, I grabbed his hand — as if struck by a stroke of high tension electricity, away was my parent's body hurled onto a bed by Psychic Power. Scarcely did this happen, when a resounding slap from an invisible hand fell on my cheek and in a moment I realized the wickedness of my action. What penalties that one rash act brought into my life may never be known to the uninitiated and I am sorry for it today. I began demonstrating hypnotic and psychic experiments in 1903, to show the powers of Nature. I was in 1896 in England and America speaking on the X-Rays. I also gave lectures on "Religion" which to me is what the great Lord Jesus taught: "Do ye unto others as ye wish that they should do unto ye." I married my first wife Manek (Ruby) in 1902 and she having been trained by me in Phenomenal Psychism, I was invited the following year to demonstrate such experiments before His Highness the

Maharaja of Baroda, India, under the critical supervision of Medical Doctors and the State Civil Surgeon, which I did by going with Manek and my younger brother Framroz. There, in the Maharaja's place, they blindfolded my brother with heavy bandages and I hypnotized him. They locked him in a room and I gave a piece of chalk to the Surgeon to draw on the floor certain diagrams like circles, triangles and so on leading to the outside of the door. Then, I transferred his eyesight to the feet and he walked over the diagrams blindfolded. Next, I placed Manek in a Hypnotic Trance; she was then pregnant and going on in the seventh month. I asked the Surgeon to lift her and place her with the feet on a chair and the neck supported by another chair, leaving the middle of the body unsupported, placing her in Horizontal Catalepsy. Even though jumping was done on her body, nothing — no miscarriage or any injury occurred. Then, I told the Maharaja to bring a book from his wife's room and place it closed on the table, which was done. I transferred the sight of Manek to her hand and she read whatever page she was asked, right through the cover. Then I took my brother Framroz totally blindfolded on a bicycle ride, through the city of Baroda, with the Medical Doctors following in a carriage, watching the demonstration. For this Psychic Exhibition, I was awarded a prize of 250 Rupees. At the age of 14 I began to practice Medicine in a country where there were no Medical Laws. Here, a long, extensive study is required (controlled by Medical Associations) to obtain a License for such practice. In India, at that time, you just put up a sign "Doctor." The result is the same — the victim goes 6 feet under the ground, whether without a License or with it. I practised Medicine around 45 years; I am 84 now and still work from 5 o'clock in the morning till about 10 at night. My first patient was my grandmother who had severe Headaches which always occurred at Full Moon and New Moon periods. Since my admission to the High School, I joined the Cowasji Dinshah Library, where I found in the Scientific American the recipe of a wonderfully effective ointment for Headache; it was composed of Menthol, Chloral, Cocain and Vaseline. At her request, I proceeded to try it on her. The recipe stated that it was to be smeared only on the forehead and temples, but, I thought that was for Americans and the Parsees needed more, so, I took the whole pot of the Unguent and slapped it onto her forehead and temples, covering the parts further with a tight bandage for better effect. The next morning, my grandmother hugged me gleefully and reported the Headache as totally disappeared. I removed the bandage — the Headache had disappeared, but, the Skin of the affected parts had disappeared with it also! She never spoke to me again. I continued my medical practice and became quite well known as a good "Doctor." One day, a night watchman came for relief. They get around $2.00 as salary and in Milwaukee I was informed that Stenographers receive $82.00 a week. In New York, in 1919, I had 5 secretaries and each received $6.00 a week! For 37 years, I worked for our Science without salary, giving away all my earnings from lectures, literature, Projectors and so on to the value

of around $1,500,000.00 for the good of the Cause. In this old age, I am living only on my Old Age Insurance of $61.40 per month, yet, I am in perfect health.

(He then demonstrated certain exercises, proving his agility and requested a Member to feel his Muscle. H. R. volunteered and reported "they are hard as stone." Dinshah said: "It is the Food you eat that makes the Body. I live and let live. I learnt these methods from personal experience and am passing my experience to you.")

Dinshah — Now, let us go ahead with the night watchman. He complained he had no Bowel Movement. I checked the British Pharmocopoeia and sent the man home with a concoction of Magnesium Sulphate (Epsom Salt), but, a stronger dose than in the book. The man reported the next day saying he had no Bowel Movement and had much Pain. I again consulted the good book and gave him strong powders of Calomel. He returned without results, so I referred to the volume and found Croton Oil as a powerful Cathartic, dose being 1 drop. I gave him 5 minims with warning as to its use. He reported the next day saying he had taken all the 5 and had just 1 Bowel Movement! I put that book away, because, how would one know what and how much to administer. (Being rather warm, Dinshah requested permission to remove his coat. He then proceeded.) During the Summer, eat less and drink more water; in the Winter, eat more and drink less water; that way you will stay healthy. Since I left Malaga, for the past 9 days, I did not eat much. I attempted to order a Vegetarian dinner in the ---------- Hotel, but, was given boiled vegetables topped with an egg. I refused it and the hostess came. I asked her whether she menstruated. She replied: "Yes." Then I asked her whether her husband licks it and said: "You are eating the menstruation of a chicken when you eat an egg. Eggs produce stinking gases in the Body." I had another case which made me realize the necessity of a new Healing Science. A man suffering from a chain of Disorders came to me and said he had Pain in his Neck, Chest, Back and Knees; in medical work it would be called Torticollis, Pleurodynia, Lumbago and Rheumatism. I prescribed four different Pills, two for the morning and two for the evening. The man looked at me and said: "How will the Pill know where to go?" That is what Medicine is! I am not opposed to medical men; only I am opposed to their healing MONOPOLY and against how they try to prevent me from my work. The forefathers of this nation, made the Constitution according to what they thought was right, but, that was **before** the era of Newspapers, Radio and Television. Today, you can see the Honorable President in your living room, coming right through the walls via Television and this is only the beginning of a new era. Many more astounding things will come. I invented a Telodor. Just turn a button and you will smell the Skin of the actress appearing on Television from Hollywood! Who will use that? I had a Doctor Member -------- who treated with our Color Projector the mother of actress

----------. I trained as Graduates between 300 and 400 Medical Doctors and had nearly 2,000 Graduates with Diploma, but, all that record was burnt in the disastrous Fire of 1945. Your Member C. R. is a Graduate and did much loyal service for which I commend him. (Shook hands with C. R.) In the first book of the Holy Bible, is stated: "God created man in His **own** image, in the image of God created He him; male and female created He them." To find God, just look in a mirror; His image is there: all His powers are **within** you if you know how to develop them and develop them. Those powers are great; invoke them. However, today, very few comprehend the reality. Blessed Jesus said: "Call thou on me in the day of trouble and I shall come to thee." Today, the religion of Christianity is converted into Churchianity. I published the Gems In The Bible in 5 small volumes; in them, you will find the truth devoid of involved history and the like; it has just the pure Philosophy. Our Constitutional Amendments are not carried out. Take for example, Freedom Of Speech, Freedom Of Press, Freedom Of Assembly. In the Camden, New Jersey case, I was fined $20,000.00 for an alleged misdemeanor; I fought that case 42 days; the typed Transcript Of Record had 7,000 pages and cost me $6,500.00 to buy it. The charge was sending misleading printed matter across the State Lines. I was also given a 3 year prison Sentence, but, fearing I might die in prison and my followers might make a martyr out of me, the Sentence was suspended and I was placed on Probation for 5 years. The Judge warned me that if I violated one State or Federal Law during the 5 years, I would be put in prison for 8 years and $8,000.00 more Fine. By Court Order, all my printed books and literature to the value of $125,000.00 was burnt. I took the case on Appeal and later to the United States Supreme Court, with a 112 page Legal Brief, but, the Petition was denied WITHOUT a Hearing. We have now our Principal Office in a $53,000.00 masonry building, the money being in part subscribed by our Members. Now, some of them are demanding the money BACK, saying it was a LOAN, NOT A GIFT! They threaten that I got that money under false pretenses! Well, if they say that money was BORROWED, I say IF DINSHAH SAYS SO, IT IS SO — I refuse to die until all that money is refunded — when I get it. I already paid of some. Many things have happened; I was jailed 11 times in presenting our Science. Because, I wear a cap and have a beard, some people think I am a jew. A multi-millionaire of this city, who had an independent newspaper in 1924, called me a "crook jew of India;" he is known for his hatred toward that race of citizens. I sent him a $14 telegram to investigate and came here to lecture. A Medical Doctor representing his Hospital joined my Class, became a Graduate and I presented him with one of my $425.00 Graduate Equipments. Instead of using it for the Hospital, he took it away himself. Finally, I returned here and made him bring it back to me. There are about 96 so-called Elements. During the Total Solar Eclipse of 1924, with the Spectroscope I discovered two new Elements, which I named Irenium and Kashmirium, in honor of my beloved wife Irene and daughter

Kashmira. I published 1,500 copies of this information and sent them to all the newspapers, but, none noticed it; perhaps, because, "how can a man born in India have such a brain!" After my Camden Sentence, hundreds of Color Projectors were seized from homes and destroyed. (He then described how he transferred a large number of the buildings to his wife Irene and lived alone in the Office Building to guard it, so during the Probation the family may be protected from interference. It was a sacrifice of self, but, he was happy to do it to safeguard his darling family during the Probation, which expired on May 24, 1953.) I am now again a free man. There is one great omission in the Bill Of Rights; there is NO FREEDOM OF HEALING. Every thing is just as a Court might interpret. I shall publish a book on "Cracks In Our Constitution And Blunders In Our Bill Of Rights." Look what is happening to the Fifth Amendment. It is construed wrongly; it is applicable to becoming "a witness against himself in a criminal case," but, now, it is interpreted variously. (He then described how he was saved from pistol fire of 5 officers, in Seattle, Washington, in the Gowman Hotel, in 1925.) I am a firm believer in the Higher Powers Of Nature In Man. When I was 18 years old, in 1891, I was the Telephone and Telegraph Superintendent of Dholpur State, in Central India. His Highness the Maharana Saheb sent me to Chehel, on the Himalaya Mountains (meaning the abode of perpetual snow), 9,000 feet above sea level, 60 miles away from the nearest railway station, to erect the dynamos and fix them for electric lights. (He then described how because he refused to sign a false affidavit for the contractor, he was left without food, water or heat in 2 feet of snow for 84 hours and how he was saved from it and when he left the mountain walking to go home, he fell into the Junga River and an invisible hand saved him by pulling him out. It was on that visit to the Himalayas that he learnt the secrets of the Yogis and of their Occult Science in controlling the Physical Body. Dinshah then demonstrated it by having a Member examine various movements of his muscles, breathing with one Lung and the like, an exhibition which was interesting to the audience.) Remember, he who serves the World, is served by the World. Man is the master of himself. Call not on God for Mercy; under the Law of Karna, God's Laws have no mercy; God is **Just.** Read my booklet "Essentials Of Occultism." My volume "Master Of Occultism," of 800 pages is out of print; 700 copies were burnt in the Fire of 1945. Whatever thought you generate, will at some time come true. Through scientific study we know that our Body has 19 different Elements, yet, what gives it life? Read your Text Books Set to find your trouble. Send in your Charts. Tell me, does the Heart move the Lungs or the Lungs move the Heart and what moves either? What is the difference between a Live Man and a Dead Man? It took me 30 years to produce our Science and the opponents call me a "quack" and a "faker." (He then described some of the events during the First World War, when he organized the New York Police Reserve Air Service and trained 200 pilots to fly and how by loyal services rose to the rank of Col-

onel and Commander. Then he gave a short account of how the opponents started in May 1934 a law suit to have him deported by depriving him of his Naturalization as a Citizen, under the statement that he was not a White Man. He fought the case himself and in 4 hours in the Camden, New Jersey District Court proved that he was a White Man and of the highest among the Races Of Mankind. He won.) Thus, because, the opponents quite openly oppose my Science, on all my literature, equipments, books and publications, I openly declare what has already passed calling me a "quack" and a "faker," thus avoiding any miscomprehension of the value of my original Science. Many people complain that the Rational Food Of Man which stops them from eating Flesh, Fowl, Fish, Eggs, Honey and drinking Tea, Coffee and Intoxicants and prevents them from Smoking, would deprive them of their endurance. (He then described how in New York in 1921, when he was President of the All Cults Medical Association and Vice-president of the Allied Medical Associations Of America, he picked up a challenge on "Endurance" and spoke for 14 hours at a stretch, without leaving the platform, when at midnight the challenging Medical Doctors were dozing, proving his point.) There is one request I make. Do not telephone me from California for an emergency case and say it is only 9 P. M. Truly, but, in Malaga, New Jersey, it is midnight! Also, write your Charts in clear handwriting, according to our Science and not in medical language which you may misspell. Now, are there any questions?

S. M. — Is it necessary to take one Color for a whole month to be effective?

Dinshah — No, it depends on the condition. Follow the advice stated in the report. Even Nature takes 9 months to produce a normal baby. Read the Text Books Set. Do you have a Set?

S. M. — No; how much are they?

Dinshah — Sixteen Dollars. After the First World War, I predicted that the next War will not come here from the Atlantic, but, if we continue our meddling, will come from Japan. Two years later, this prediction materialized at Pearl Harbor. I traveled over much of the World, Germany, Italy, France, Switzerland, England, Java and I have been invited to return. During my Probation, I wrote "Inroads Of Socialism And Communism," published by me on May 4, 1950 and predicted more trouble for America. I mailed a copy to the then President Harry S. Truman, all the Senators and Representatatives of the United States Congress, all the Justices of the United States Supreme Court and the Governors of every State in the Union. Nobody paid attention to it. The Federal Probation Officer who came monthly to question my conduct said: "We are at peace, there is no war." Even the President instead of investigating what I wrote later called away General Douglas MacArthur. Seven weeks later, on June 25, 1950 when the Korean War began, the Federal Probation Officer came and said: "It will take a couple of years for us to be ready." Said I: "No, it will not take

more than 24 hours to stop that war. I had sent to the General by airmail a copy of my booklet. All that was to be done is simple. On the Yalu River between Manchuria and Korea, are the Electric Power Generating Stations. Blow them by Atomic Bombs and the war will be over. Tell the Judge to remove my Probation and I shall go to that zone." The reply from the Judge was that I am a dangerous man and should not be released from our jurisdiction. Now, there is more mess with Colonel Nasser of Egypt and the powers of Israel. The former is of the Moslem faith, the latter of the Hebrew faith. By their religious principles, the Moslems are polygamous. They are permitted to have 4 wives at one time, besides 12 Concubines and numberless mistresses. Nasser seized the Suez Canal, which belongs to an English-French Corporation. I crossed the Suez Canal 17 times and well know the layout. If we do not act with proper sense and wisdom, there is bound to be great trouble with Russia. (He then spoke openly about much of the political mess in the districts and nations involved in the East.) I have many of my boxes coming from India, held up by the Suez Canal seizure. May the blessings of the Divine Master be on America and you as Americans! The Sky and the Earth may meet, the East and the West may reverse, but, our Science and its guidance will never change. Thank you A. G. for bringing me to your Studio from Milwaukee! May you all find happiness from within! (Applause.)

A. G. — Thank you Colonel Dinshah! Friends, please, meet with us the first Thursday, of each month, to learn more of our Science.

EDITORIAL REMARKS

Because of the absence of the Studio Reporter E. K. who is on vacation in Germany, the above report was made by I. G. I offer I. G. my best compliments and thanks for the accuracy with which she reported the proceedings, which were of a somewhat complicated nature.

CONCISE REPORT OF OUR FOURTH ANNUAL CONVENTION

Milwaukee, Wisconsin

THE SIX SESSIONS OF AUGUST 4, 5, 6, 1957

Our Fourth Annual Convention was held in the "A" Hall of The Republican Hotel, in Milwaukee, Wisconsin; the First Session opened at 2 P. M., Sunday, August 4, 1957. President Dinshah P. Ghadiali was in the chair. (The Report was taken by F. G.)

Dinshah — There is a number of Members here who do not know about our Organization. I shall endeavor to bring home the subject. Look

at the attendance! The last year it was Labor Day; now it is Sunday and many are not here. (He then explained the birth of this new Institute and spoke about the transfer of the real estate to it.) F. K., did you examine the paper I gave you two days ago as a Trustee?

F. K. — Yes.

Dinshah — Have I used any Institute funds for my living?

F. K. — No.

Dinshah — Another calamity has fallen on me. Many who subscribed for rebuilding after the Fire, now want that money back! Well, there is the $53,000.00 building! Let me tell them, "When we get the money, they will have it." (He then spoke about how Government Agents went into homes and smashed their Color Projectors.) I did not buy a new suit to wear in the 8 years. I am still faithful in my service to you. We have large debts. We owe $12,000.00 to one person, to another family over $8,000.00 and here is N. F. who gave $2,000.00; I assure you, all will get it back, if they want it and we have it. Some Graduates are so faithful(?) they sent for Membership $6.00 instead of $12.00! What keeps me alive and happy? It is your blessing. If each of our Members will sell one Set of our Text Books and introduce one Experimenter Member, we can soon wipe out the Healing Monopoly. (C. N. from St. Louis, Missouri was greeted as a Delegate and the First Session closed at 5 P. M.)

The Second Session opened at 8 P. M. and was reported by F. G.

Dinshah — Here is a new Sign for our Graduates, so none could say we are practising Medicine. (Exhibited a polished metal Sign.)

F. K. — I make a Motion that we accept this Sign for our Graduates and that they display the Sign.

O. L. — I second the Motion. (Unanimously passed.)

Dinshah — I have a dozen ready here; $6.00 each. (Many promptly took them.)

Dinshah — I have the honor to introduce to you Dr. C. P., Chiropractor, from Florida.

C. P. — I came home on vacation last July, as I often did. My father was not able to walk and could not move his left side. He had a Stroke and had to stay in bed from 4 to 6 weeks. I knew about the Color Projector from working at the B. I. and got one. My father used it and the first month he was satisfied with it; he is 76 years old. Every night, he used to take a Laxative, but, since October, he has had good Bowel Movement. A friend of his had a Stroke and they still have to hang on to him. Father's Lip was hanging; he is gradually learning to walk around the city block and we are happy at his progress.

Dinshah — She left her practice in Florida to take care of her wonderful father. We have another wonderful person here; she is here with her husband and mother-in-law. I have pleasure in introducing M. S. from Minnesota.

M. S. — I know nothing; I am new in this Organization. I want to live to be really old and become wrinkled! I visited the Institute. He has a lovely white building. I wish I could help him arrange the place; he can not get any help. I know this man is made of real stuff. I am new in this Science, but, I want to say to you that anything we can do about it, ought to be done. This is all I have to say.

Dinshah — You follow this Science and you will have no wrinkles on your face!

A. E. — She does not know anything about our Science; how did she know about it?

M. S. — I attended the Naturopathic Convention in Chicago last year.

Dinshah — She came with her mother-in-law.

M. S. — I get along with her too.

Dinshah — She is a nice woman. (He then spoke about Rational Food, Endurance and the like and described how when challenged by the Medical Doctors, he spoke for 14 hours without leaving the platform, in New York.) Do you believe that I should be giving away my property and life if I were not convinced about the value of our Science? (At this time, E. B. entered and hugged him.)

E. B. — I came from California and am happy to be here. I looked forward to the coming. I do not know what I would do without the Color Projector.

Dinshah — She is our first Champion. She was a girl in High School and stood up for our Science. (He then spoke on the "Sevenfold Human Constitution as is described in our Text Books, saying the Doctors know nothing about it.) I am asked to raise the fees for Membership; the fees will stay as they are. There is a S-C. Institute working in Germany now. I am invited to speak in Italy. (He then spoke of his first wife and a younger brother whom he trained years ago to perform experiments in Phenomenal Psychism. He described the Six Major Plexuses and their control; also about the 84 Postures of Yoga Shastra or Occultism for controlling life.)

N. B. — My mother has some peculiar power; if her sisters have trouble, she thinks of them and dreams of her mother.

N. F. — What is Formaldehyde?

Dinshah — It is a powerful disinfectant gas.

N. F. — A woman can not go to sleep unless she takes it.

Dinshah — It acts as a Tranquilizer; give her a Color Projector. (He then spoke about the Psychic or Astral Body and the Session closed at 10 P. M.)

The Third Session opened on Monday, August 5, 1957, at 2 P. M. The subject was: "Deciphering Our Personal Research Information Charts" and was reported by N. B.

Dinshah — Before we begin, I have pleasure in introducing to you one of our worthy Graduates from Missouri; C. N.

C. N. — There are here quite a number of people I know from previous Meetings. Last year, I visited the Munich Museum in Germany, which houses one of the instruments which was the beginning of our Science. I looked at the different instruments and asked the man if he would open the case in which that instrument was placed. He said there was a man who came some years ago and asked the same question and talked to him about it. He said he could use Colors for Healing. I touched the instrument and got a peculiar feeling. (It was the instrument of Joseph Fraunhofer and the man who made the request before was Dinshah.) A man who died 100 years ago, to bring about the basis of a Science which is so marvelous, having so few simple parts. Very few people came into life and stuck to some one thing that the rest of the World could use it. Dinshah is one of them. It changed my life. It brought me enlightenment and meaning. Life is not all eating and drinking. Try to learn all you can and help others. Go home and think of what life means and bring it home to your friends and neighbors. They may ridicule you and laugh, but, Truth will always prevail.

Dinshah — Thank you C. N. Now let each of you take a white Chart. It asks for the name of the person. Remember, I am **not** personal; do not think I am talking of you, when I speak of something. I lead a secluded life; do not be offended. The American system of names is Tomfoolery. John Jones, sr. or jr., the same name in the Chart; how could we know whether it is the father or the son? This happened recently. In a certain State, there is a lady named Jane Jones; she is a Member in good standing. A Chart came to the Institute signed by the husband of Jane Jones. Jane Jones needs my advice; age 4½ years, child. Later, a Chart came for Jane Jones, having no age, height or weight. I thought they forgot, so I turned it over and read: "Menstruates 28 days, has 2 children!" At 4½ years? When did she have the first child? At the age of 2? Impossible. I sent the Chart back. Then I found that both the mother and the daughter had the same name. The mother signed the Chart for the child. In India, we have a foolproof system. Each person has a particular name, which is never repeated in the same family. The first name is that person, the second name is the father's name and the last shows the family's surname by occupation. It is more sensible and no mistakes are generally possible. Another trouble is many write "You have my history"; how can I remember the history of the lives of thousands? Here is another instance. This Chart came in my hands, on July 29, 1957 and for the Signature it has a number! No name. I can not read the History asked in Question 5. A. B., come and read it.

A. B. — I can not read this.

Dinshah — M. S. you read it.

M. S. — It must be English!

Dinshah — N. F. you are a Graduate; read it.

N. F. — I do not know what it says.

Dinshah — Let me try to read it: "Carn san kinser l hann Sleeps mit ant(hill) no mohr hurt mann fall in sleep, I am pob in terbel turn meine angen badem mih alle time. habe kinnet Opartion gehslep 1942, kann aint miht Ice trepp an grit gehen hiebe skurt breading. I'm more hurt broken seit mine only Sister gertorben ist, 4 Jahre rg side ribs nihl mehrgrit He most hin nehme ist Jella drinkt I am sorry I cann not better English." It is neither German nor English! All correspondence **must** be in the American language, to receive our service. In Question 6, we ask for the "present condition"; A. B., read this.

A. B. — This is totally blank.

Dinshah — Now at 7; what Surgical Operations?

A. B. — I can not read it.

K. B. — What is it? That is not German.

Dinshah — Here is for 8; what Medicines or Drugs? "Bills for Slipping!" (He then talked about the value of Squatting Posture for easy Backelim. He spoke also against Enemas and Colonic Irrigation.) If you eat right the Rational Food Of Man, you will have a Backelim for each meal. I had a case of a Sufferer moving once in 15 days. The dress of women is wrong. They have two legs like men; why then should they wear a cylinderlike skirt, where cold breezes might enter the delicate areas? In some States, they are forbidden from wearing slacks. Men here believe in not wearing a cap on the head; they must realize that the Brain needs much more Circulation of Blood than the whole Body. (He then spoke about the Ratio of the Pulse and Respiration and alluded to the Menopause and how parents are imitated by the children in their habits.) Parents should explain to children what Life is and how it is produced, in a proper manner before adolescence, so they may not get wrong views endangering their future. Talking about Respiration, I had a personal experience about the exercise of the Lungs When I married my first wife Manek (Ruby) in 1902, I had an Electro-Medical Hall in Surat, India and worked around three hours a day, spending the rest of the time in company of my lovely wife. Soon, I could not breathe rightly. I went to my friend Major Bennett in the Hospital and after examining me he opined that I had Acute Tuberculosis! I asked him as to what to do and he directed me to drink a bottle of wine a day, eat plenty of beef and take rest. I told him I was Supreme Lodge Good Templar, a total Vegetarian and as for rest that is all I was getting. He gave me 6 months to live. I went home and told Manek to look for a new husband! Then, being only 29 years old, I began to lecture every night before the public to exercise the Lungs on the idea that "used keys do not rust." Well, years after that the Major was dead and I am still here at 84! (He then spoke about using the powers of Sex in a very sensible and guarded manner and said that the idea of the Equality of the Sexes was wrong, because, the Female is the Superior Sex, bearing the responsibility of creating the next generation. Thus, an unhealthy mother should not ex-

pect to create a healthy baby. Then he spoke of the new Resident Quarters he was building so women may visit there and learn how to cook and what to eat.) It will be in the care of my worthy daughter-in-law Martha Jane who was here two years ago and talked to you and the rate will be a uniform $5.00 a day, all inclusive. In New York, last May, L. F. told me that charge was not enough; I said that we as a Non-Profit Corporation should not go only after the money.

R. S. — It will be like a sanatarium service for a few Members.

Dinshah — No. Members may come as guests.

N. F. — $7.00 at least; it would be better than going to a Hospital.

Dinshah — That would give a Profit.

A. B. — We should take a cost analysis to find out how much.

K. B. — Stay in the black. (Dinshah then explained its operation costs and the like. He alluded to our Constitution And By-Laws for Salaries and Net Earnings of the Institute.)

Dinshah — I am not worried about anything else than thinking of who will run the show if something happens to me. I work all alone and am glad to serve you. They ask me "what will a worker get?" I say that a worker will get her Lodging, Boarding, Laundry, Traveling Expenses, plus a reasonable Weekly Allowance for personal needs. It is a service to Mankind and not a mere job. Is it not fair? (He then spoke about the demerits of Fluoridation.) I like to introduce at this point a worthy Graduate Researcher from Plymouth, Wisconsin, A. H., who fought against it there and stopped it.

A. H. — We fought against it twice and the people voted against it. We still have there fresh deep well water. I have had wonderful success with the Visible Spectrum. My grandson in Glendale got his Left Hand in a pulley. They were ready to take off the Hand. I got him home for Tonation. They said we were crazy. After a few Tonations, Soreness left the Hand. The Hand is perfect, except for a little Stiffness in the Little Finger. My son had a Collapsed Lung. They wanted to remove the Lung. In 2 weeks, he went back to work. They said he was not a Human Being! That is my experience. I hope you get similar results.

Dinshah — Thank you. All the great Inventions of the World are simple. (He then spoke about the Bell Telephone, Edison's Electric Light and so on. He alluded to Question 15 and elucidated about the Menstruation, Excessive Flow and the value of our Indigo Wave for such cases.) Medical Doctors now claim women should not flow more than 3 days; otherwise, there is Cancer and they remove the Womb. They are backed by the Radio, Television and the Newspapers. We need to have our Educational Broadcasting Station; no paid commercials.

N. F. — There used to be a Station that never advertised Liquor and Tobacco; now it does.

N. B. — You can now get Medicine to stop the Flow if you have more than 2 days, so you may not be inconvenienced.

Dinshah — White women practise Birth Control and the Negroes breed more; years ago, in my book "American Sex Problems" (now out of print) I printed that there will be a Negro President in the White House in years to come. If you wish to have valuable knowledge about these natural methods, you can get the book on such vital subjects from the Institute for just 50 cents. (He then spoke about Sleeping Habits and the like.)

K. B. — If South of the Equator, should we sleep with the Head to the South?

Dinshah — No; always sleep with the Head to the North; the Rotation of the Earth and Centrifugal Force govern the Body Axis. Speaking about Question 19, one woman wrote "Unmarried 'Yes' — Married 'Yes' — Divorced 'Yes' — Widow 'Yes' — Separated 'Yes.' (Laughter.) Judge for yourself. It is now 5:20 P. M. We shall meet again at 8 P. M.

The Fourth Session opened at 8 P. M. and was reported by F. G.

Dinshah — My friends, we have only two hours and I have many things to speak. This afternoon, we spoke many languages. There are a few pointers left out. Look who is here! K. M. from California. You may say a few words about anything.

K. M. — I think it is premature for me to say something. I missed very much not attending the Meetings and the only thing that satisfies us is the Magazine. I am very glad to be here tonight and tomorrow evening.

Dinshah — We came upto the question on Sneezing, during this afternoon. (He then explained.)

N. B. — Why is it I sneeze in bright light?

Dinshah — Light is an Energy and if there be slight obstruction in the Breathing Passages, its tickle is liable to induce Sneezing. It proves you are healthy, because, when one stops Sneezing for around six months, it indicates approaching dissolution. Now, some Members wrote to me not to send two Magazines for the wife and the husband. Under the Postal Regulations, each Member is an individual subscriber and we want to fulfill our duty.

C. N. — Anybody buying the Text Books Set of three volumes, becomes a Student Researcher?

Dinshah — Yes, under our By-Law 60, Section 3. (He then spoke about his former Distributor General who began selling imitation Color Projectors.) He died years ago, but, now, the man who was formerly Chairman of the Portland Oregon Studio is selling fake Equipments with Cellophane Slides! (He showed one.) Another Graduate of Chicago, Illinois began to sell also imitations, but, protected himself by selling only to Medical Doctors. He ran away to Florida.

J. M. — Oh Colonel, I am so happy to see you.

Dinshah — I bless you every night; do you feel me near?

J. M. — Yes.

E. B. — I live in California. We go up to the mountains and I get a funny feeling in one of my Ears. I used a hair pin and a gem clip and I could not open my mouth; a horrible pain started. I took several Tonations of Orange and Magenta, used Cocoanut Oil and Indigo and Turquoise and I felt a liquid coming and then the other Ear started. It felt like a knitting needle in my Ear and I took a Turquoise and Indigo before I came over the mountains. The liquid drained out of my Ear and I could not hear, but, I had no ill effects crossing the mountains.

Dinshah — As you go up, because of the altitude, the atmospheric pressure lowers and on some persons it has effects as you described. (He then spoke at length against the use of Enemas, explaining the anatomy of the Intestinal tract and its Valves.) The subject for this session is the "Four Birth Rights Of Human Beings." They are: "Liberty, Property, Security and the Right Of Contract." (He then expounded the theme fully as is described in his booklet "Inroads Of Socialism And Communism.")

The Fourth Session ended at 10 P. M.

The Fifth Session opened at 2 P. M., on Tuesday, August 6, 1957. It was reported by N. B.

Dinshah — I shall read to you some articles which came to my attention. Here is one from U. S. News & World Report on "The Truth About Smoking And Cancer," dated July 26, 1957. It is an interview with Dr. John R. Heller, Director, National Cancer Institute, U. S. Public Health Service. (It was read. It stated emphatically against Smoking Tobacco.)

C. N. — The Chicago Daily News says that if the Tonsils be taken out, one will have Polio faster.

Dinshah — In the Newsweek of August 5, 1957, is an article by its medical editor Marguerite Clark, on "Operation — Needed And Not." Get a copy and read it.

A. G. — I am from Detroit, Michigan. I am delighted to be here today. In Detroit, we are still going strong. Our number is not so strong as in Milwaukee, but, we are strong in our interest in the work. As long as we use this System — and there is no other, believe me. I told other people we have the greatest Healing System that is known to those who investigate. The Medical Doctors have not the least concept of what it is. Light was not meant to enter the INSIDE of the Body. When a Surgeon opens the Body, it is very dangerous, for oxidation occurs.

A. B. — That is why people die more quickly after Cancer Operations.

Dinshah — I have a clipping from yesterday's paper from Chicago, Illinois, where a man died, because, a Surgeon forgot a pair of surgical scissors in the Body of the person on whom he operated. The coroner's jury returned the verdict as "accidental"! In the New York Journal American of July 30, 1957, is an article, "Drug Industry Now A $1.2 Billion Giant" a year! True Science can not change; Drugs and their uses change annually.

L. O. — Someone asked if it is of benefit to drink water from the Irradiator.

Dinshah — I am intending to remake that also. I shall market a Slideless Color Projector too. (He then described how in our Science the names of Disorders and Differential Diagnosis are avoided, by fully explaining the principles underlying Rubor, Calor, Tumor, Dolor, as mentioned in our Set of Text Books.) H. K., I am trying to open a Studio in Chicago; please, find an inexpensive hall.

The Fifth Session closed at 5 P. M.

The Sixth Session opened at 8 P. M. It was reported by F. G. The subject was "Elucidation Of The Variant Breath Phenomena." The two hours were spent with great interest by the Members as the explanation given in full details as is described in the third volume of the Text Books Set. Much humor resulted when Dinshah spoke about the two Nostrils breathing at variable different pressures and asked the Members to blow their Nose. All blew both the same time and were shown afterwards to close the less open Nostril and blow first the more open one.

The Fourth Annual Convention closed its Sixth Session at 10 P. M. with cordial thanks for their presence offered by the President to the Members. The next morning, Dinshah departed with A. G. for the Meeting in the First Detroit Michigan Studio.

MILWAUKEE STUDIO NOVEMBER MEETING CHANGED

Because of the reservation of "A" Hall, of The Republican Hotel, for the Convention of another Organization, on Thursday, November 7, 1957, the monthly Meeting of the First Milwaukee Wisconsin Studio, will be held the following week, on Thursday, November 14, 1957, at 8 P. M. Members will please note.

GRADUATE RESEARCHER

OUR STUDIO DIRECTORY

On the First Thursday of each Month, there is held a **Membership Meeting**, at 8 P. M., in each of our following Studios, for reporting the results and findings of Personal Experiences in the use of the Visible Spectrum of Light and Color:—

First Cleveland Ohio Studio—The Colonial Hotel, 523 Prospect Avenue, Cleveland, Ohio. Albert J. Martin, Chairman, Sleepy Hollow Lake Road, Brunswick, Ohio. Jacob Dussing, Vice-Chairman, 1253 Melbourne Road, East Cleveland 12, Ohio. Theresa J. Soree, Reporter, 9216 Orchard Avenue, Cleveland 9, Ohio.

First Detroit Michigan Studio—Knights of Columbus Hall, 4740 Woodward Avenue, Detroit 1, Michigan. Albert Greenham, Chairman, 30906 Robert Drive, Livonia, Michigan. George G. Weiland, Vice-Chairman, 19692 Hanna, Detroit 3, Michigan. Elfriede Kolmetz, Reporter, 6735 Meadow Avenue, Van Dyke, Michigan.

First Merrill Wisconsin Studio—New Badger Hotel, 310 West Main Street, Merrill, Wisconsin. Walter Briese, Chairman, 707 E. Third Street, Merrill, Wisconsin. Edward Katke, Vice-Chairman, Route 6, Merrill, Wisconsin. Dorothy Nelson, Reporter, 1814 West Main Street, Merrill, Wisconsin.

First Milwaukee Wisconsin Studio—The Republican Hotel, "A" Hall, corner North Third and West Kilbourn, Milwaukee 3, Wisconsin. Frederick Knepprath, Chairman, 10120 W. Harrison Street, West Allis 14, Wisconsin. Otto H. Lutz, 3823 North Fifth Street, Milwaukee 12, Wisconsin, Vice Chairman. Florence Gutsch, Reporter, 3041 North 53rd Street, Milwaukee 10, Wisconsin.

First New York New York Studio—Hotel Diplomat, Blue Room, 108-110 West 43rd Street, New York 18, New York. Ralph W. Diedrichs, Chairman, 423 Jackson Avenue, Mineola, Long Island, New York. Hildegard Muehlfriedel, Vice-Chairman, 817 Lancaster Road, Ridgefield, New Jersey. Margarete B. Wolschendorf, Reporter, 19 Van Buren Avenue, Norwalk, Connecticut.

First St. Louis Missouri Studio—Albrechts Hall, 3549 Arsenal Street, St. Louis 18, Missouri. Clemens M. P. Neumann, Chairman, 4348 Virginia Avenue, St. Louis 11, Missouri. Walter Bloss, Vice-Chairman, 6408 Lansdowne, St. Louis 9, Missouri. Viola C. Steiner, Reporter, 9632 Tesson Ferry Road, Affton 23, Missouri.

OPEN DECLARATION FROM THE EDITOR
DINSHAH P. GHADIALI

NO WARRANTY, NO GUARANTY, NO LIABILITY

Since in June 1922, I became the Editor of a similar monthly magazine, controlled by another Corporation (now dissolved), I had complete records of all Case Reports and personal matters in my files. Those were totally destroyed on Tuesday, January 2, 1945, by a disastrous Fire of unknown origin, which burnt my 30 room Main Office Building and Laboratory, causing a loss of over $250,000.00, being without insurance.

A few months later, Law Suits were instituted in the United States District Courts, at the instigation of certain opponents of the new Science of the Visible Spectrum and because of our inability to produce the original documents as proof of various contested matters, verdicts were rendered against me and the controlling Corporation to the effect that our literature was false and misleading under the Federal Food, Drug and Cosmetic Act, as a result of which we received heavy Sentences and Penalties, I being dubbed a "quack" and a "faker." $125,000.00 of printed literature was also destroyed by Court Order.

The American Medical Association and Licensed Medical Doctors and Surgeons strenuously maintain that the Visible Spectrum of Light and Color has no Therapeutic Effect and that it has absolutely NO HEALING or CURATIVE VALUE.

For that reason the VISIBLE SPECTRUM RESEARCH INSTITUTE openly warns the Reader, that the said INSTITUTE issues this Monthly copyrighted in accordance with the Constitution of the United States of America, Article 1, Section 8, Sub-Section 8, protected under Article 1 of the Bill of Rights; the Reader who uses the contents as basis for own investigation, experimentation and (or) research along the lines of the Visible Spectrum, to determine the Powers and Effects of Light and Color upon Living Organisms or otherwise, will do so on own absolute responsibility, taking and assuming ALL RISKS pertaining to such activities.
